Ears -Swelling of external, with contractive pains. S of meatus, with twinging carache and discharge of bloody matter Suppuration and discharge from evening in bed, with burning pain; boring ing of their muscles. kmfelike, externally behind 1, with sudden general

Tearings in 1, beneath 1 at 4 PM, in drum, corner, painful when eating Soreness of 1 co with tensive confusion of head Sensation as if every-Pain as if sore Tearings. Spasmodic sensation. thing were dragging outward and as if they would Jaws.—Tension and pain, so that they were difficult

from 6 to 8 P.M., with stinging, dryness and photophobia. | burst, like a tearing mingled with itching. Twinging. Boring in r., in fossa below r., then on pressure brused pain; behind I at one time, at another pulsating-throbbing. Pain in mastoid process: in r. meatus in evening, in meatus on cleaning, as if sore and ulcerated

Sensation internally of jerking outward behind Sensation of contraction in I and in whole side of head in evening when lying, with inability to sleep upon that side, and when touched (but > pressure) sensation as if flesh had been senarated from bone Crawling in 1, with itching-biting Itching in 1 . sticking, in front of r meatus Sensation as if cold wind were blowing into r meatus. Air Itching on lower and on its inner surface, with burning as rushes in during eructations Stopped sensation

Re-echoing of her own words and steps; of sounds. with difficult hearing; every morning Roaring before E , in r , in each alternately in evening before sleep Difficulty in opening. < morning, with Rushing sound as of a waterfall, with difficult hearing Thundering tones in r Ringing in 1; in front of r. in evening Singing as of distant crickets, then throb-

Clinical.-Chronic inflammation of the middle ear Buzsau, cruoning, so that ischrymation is produced the ing, rearing in ear, with re-choing of sounds (in Memere's lachrymation, in I timer like flac-intex, volliptions, feel to addresse), (compare with Nat soil) Barning heat of ears after a lachrymation, in I timer like flac-intex, volliptions,

> Nose.—Hairs in nostrils fall out Swelling in morning, > evening. Cutting tearing through r wing Soreness internally. Septum painful to touch Sore pain in lower part, as in severe corysa Burning in nostrils, as in coryza. Itching internally; as before coryza Tickling in l nostril, external pressure Frequent sneezing, in morning, ineffectual attempts at S

> Coryza, with inability to speak aloud, C, with cough and scraping in larynx, with cough, pains in chest, drawings in limbs, frequent waking at night and chilliness; stopped; stopped, when lying, with nightly dryness of throat; stopped and fluent, with rawness in throat and smarting in chest caused by cough, fluent, in morning, with agglutination of eyes, fluent, with painful cough at night and headache Discharge of offensive mucus, with sneezing Watering after drinking. Bleeding, from I nostril, blows out blood every morning. Loss of smell, with stoppage

Clinical.—Dry catarrh, with stoppage Finent coryza, with acute inflammation of larynx and traches Ulcers and crusts in tip of nose

Face.—Pale, with suffering expression during menstruation. Discolored, yellowish about temples, pale bluish lips Sickly look. Swelling of cheeks, with throbbing pain Stickings in cheek, over lower law Tearing in I cheek-bone, T. in cheeks, with sticking Drawing pain in r. cheek, then in ear. Burning pain in cheeks, in front of ears, as if an erupwithin, with offensive odor Stitches on outer mar- tion would appear. Throbbing in cheeks, with twitch-

Lips -Swelling of lower, and papulous eruption, sweat, paroxysmal, in r, intermittent, in r mastoid with stacking and crawling in it Papules in I. corner, process, tearing, with roaring, as from a storm of with crawling stacking. Tetter on lower. Ulcer on inside of upper, with burning pain Vesicles in r. Soreness of 1 corner.

too long. Difficulty in opening, with sensation as if night, causing dryness Stitches in I side of palate. throat below law were swollen or tense Tearing in r. Pain in mouth, esophagus and epigastric region; antelower Prickling-digging in lower. Pain in r joint riorly on palate, as if suppurating, when touched with (in "Hahnemann's Mat. Med. Pura" it is 1), rheumatic tongue Burning scraping in lower; burning, in lower Drawing first from r., then from I. ramus towards the chin and thence back again in direction of angle of mouth.

Chin,-Tearing in middle of bone; T on lower part. Burning-cutting in r side, as if a piece of glass were cutting outward Tensive drawing pain in lower part.

Clinical.—Facial neuralgia at every change of weather Paralysis of face from taking cold, with hemiplegia. Acne resaces. Rheumatism in the articulation of the lower jaw.

Mouth.—Teeth Looseness of some, of incisors; painful L of incisors Stitches; on biting on them, on opening mouth; in upper back, extending upward, in lower back, extending downward. Tearing in diseased root of a l lower, T in last 1 upper back, at 2 PM, < open air; in both r rows, extending into zygoma, with brused pain in both r. jaws on pressure and on chewing , extending into head and l. eye, in all in forenoon, as if they would fall out; intermittent, in roots of lower in morning Boring in a lower molar, extending to nose and eyes. Prickling-digging in lower back, extending to ear Pain, with much spitting of saliva, in a r back; in a sound one on drawing in cold air; consisting of pressing-tearing and sticking combined, with erysipelatous swelling of cheek and a swollen suppurating pimple on gum; jerking, throbbing, with painful gum, so that he could not chew, throbbing, in a diseased back T Toothache as if ulcerating, at night and during the day when she moves the mouth Pain as if of gum Drawing toothache, in l lower, from articuand extending into temples Burning pain in hollow in roots of both anterior upper molars. Sensitiveness sensation in roots, so that he must gnash the teeth

Gums -Swelling, in front and behind, with pain; of I side, with sensitiveness while eating and with spasmodic pain in evening, with excoration of lower. Sensitiveness without pain in teeth

Tongue -Vescicles on margin; painful V; painful on mouth as if covered with a skin, burning S on tip, over palate, with salivation as if burnt, with salivation and burnt taste. Burning on tip Dryness, with thirst

Epidermal coating of mouth and fauces abraded; in morning, but partly hanging in large pieces, the mucous membrane itself swollen and loose, tongue scarlet, papille perfect cylinder. Pain swollen, arch of palate and uvula swollen and dark red, in mouth and fauces sensation of glowing coals, with con-stant pressure to evolution and have, which increased the poin, discharge of much adiva and mucus, voice hoarse and nasal, disposition bordering on desperation, with febrils symptoms, rapid pulse and unquenchable thirst.

to open, with difficulty in eating because a tooth seemed | cheek, which he bites when chewing. Mouth open at Burning on palate, with soreness Crawling posteriorly on palate, with burning pricking Dryness at night, all forenoon, without thirst; and on lips, without thirst; with thirst; burn-Salivation, when walking after cating, with moisture in nose, rancid, watery, in forenoon, with

Taste of food remains long after eating, T for food diminished. Futty Bitter. Offensive, afternoons, as from a disordered stomach Viscid, glutinous

Clinical.-Violent toothache from taking cold, even in sound teeth, from cold air Painful looseness and clong Gums bleed easily, and are swollen Dental fistula

Throat.—Painful swelling of 1 submaxillary gland. Distention of 1 side, with suffocative sensation and necessity to loosen the neck-band Audible cracking, deep-seated Mucus after eating, clots of M; after dinner which he cannot loosen by hawking, but he is obliged to swallow it. Hawking of mucus; in morning; from 5 " M till night, with soreness and burning in throat: every half hour of mucus, which immediately accumulates again, with pain in pit of throat.

Torn sensation, not on swallowing, but on making an exertion with head and on lifting or carrying anything Pressure behind palate and on epiglottis, in pit on deep breathing; as if under sternum, as from swallowing too large a morsel, choking, in morning on waking, as from swallowing a large crust Sensation after eating as if food stuck Frequent contractive sensation. Tension in r. side of T. and chest, drawing sore, in morning, then throbbing, the pain > bleeding the body towards r side Sensation as if swollen and too narrow; as if swollen and raw Sensation of lation to chin, in afternoon, with itching between tightness and suffocation, obliging him to loosen the teeth, in r second molar, more in external surface, neck-band Rawness, with ticking and with dry cough and expectoration only after long coughing; R, with T while eating and drinking Pressure from without heartburn, with hoarseness and sore pain, with oppression of chest and febrile coldness, and, when to touch, S of T and gums in morning Peculiar breathing, sensation as if he had inspired too little air. Scraping, < evening and swallowing, S, with clawing and with heartburn Scraping-clawing, with sensation on swallowing as of a lump Burning

Soreness, behind palate, from morning till afterpudenda on urmating Bleeding Drawing pain in noon, > dinner, with stitches, so that he could scarcely swallow, as if attachments of tongue had grown fast; as from a lump, with sticking, burning-sticking, < tip. T. and back part of mouth three off a thick and swallowing, and on uvula. Dryness in morning; D tough membrane Sore pain on and beneath T. and on when swallowing, then scraping down throat, of back part; palate Pain on I side as if bitten Pain as if burnt in forenoon, with dry hacking cough; without thirst; on tip and margin Scraping, then roughness of now D, now moisture Coldness, rapidly passing Nauseous sensation Itching, extending along Eustachian tube into car. Constant inclination to swallow Dysphagia, with stricture five inches and a half from incisors

Œsophagus —Ejection of mucous membrane in a

Clinical.—Acute sore throat, with laryngitis. Paralysis of muscles of pharynx.

Stomach.-Eats with too much haste. early, ravenous H.; causing headache, > eating; but food is not relished. Appetite, but without having Sore, painful epot on hard palate Swelling of inside of aversion to food it seemed as if she did not dare to eat Little appetite, but food is relished; little A but in epigastric region. Pleasant warmth, and in abdomuch thirst. < eating Satisty, then hunger, speedy men S it she attempted to eat without being hungry Appetite disappeared when beginning to eat; A, but when eating aversion to food Aversion to food, even when beginning to eat, A to sweets Can eat only smoked meats, vomiting on eating fresh meat. Thirst. mornings, for beer, for something cold from forenoon till 3 PM

Enuctations, with choking in resophagus, impeding breath Suppressed in middle of throat Loud, explonye . violent, with a sour taste Of air It seems as if lime were dissolving in stomach, causing a bubbling, with a continual rolling eructation of much air soreness of anus Eructations of tasteless water, or rising of it into mouth, with nausea, which disappears ward, loud, all the afternoon, offensive. after the cructations. Acrid fluid rises into mouth Cool waterbrash in evening on lying down, with constant spitting Salt waterbrash in forenoon; slimy salt W. after the third stool that day Hiccough

Nausea, every morning, in afternoon, in afternoon, with good appetite, after stool, with frequent gulping of water, which causes constant spitting, with emptiness in stomach and acid taste, with weakness

Statches, in pat, an pit, seeming to contract heart Cutting in pit after eating, extending to abdomen, with he down Cramp, like a pressure and contraction, in morning on waking from a frightful dream, with Pulsations mausea and salivation Clawing in pit, pinching, in purgative nd on deep breathing Pressure in pd , in epigastric region, in region of S and in diaphragm, in morning after rising, only when sitting; in morning after rising, < sudden motion, with heat in r side of head and necessity to he down, and the pain seemed now in stomach and now in chest, in morning fasting, then contractive sensation in abdomen, at night on waking, Hypochondria—Distention of l. Stitches in l., after breakfast, in orfice, < leaning against edge of beneath last r. true ribs, below r ribs in evening, m periodic stitches from back forward to r. side of abdo- on back. Burning pain in l men, arresting breathing

Bruised pain, on pressure. Rhythmical chilling touched Griping, in morning, > rising Crawling, pressure in pit, as from ice Tensive pain in pit with sensation as before diarrhea Contractive sensation in epigastric region The tight-

Weakness

Abdomen.—Jerking at night, with uneasiness, preventing sleep until midnight Twitching contraction at noon Distention all afternoon, with frequent loud emissions of flatus, which relieved only for a short time, D. in evening, also with hardness; after eating; after eating and drinking, with uneasiness and drawing in it, < evening, with cramps, with internal pressure, < deep breathing Rumbling after eating, with distention, then frequent emissions of flatus; Hot, in afternoon and evening Of food five hours after and croaking, as of frogs, when sitting, as from emptieating; E as when undigested food remains in stomach, ness. Moving about, > soft, brown stool, with cutting. E tasting of the soup cuten at breakfast, E having the Accumulation of flatus, with hard stool, A of much odor of the food With the odor of musk Pleasant- F. after a slight meal, on account of which the tasting, almost like almonds Gulping of water, with hamorrhords protrude, are painful and moist. Emissions of flatus, after breakfast; upward and down-

Sticking in whole A at 4 PM : S preventing sitting Pain during menstruction, as if everything were torn apart, with bruised pain in sacrum and discharge of large clots Cutting in morning, then three soft stools, and all day sensation in abdomen as of diarrhoa; then hunger; on waking from evening sleep, in evening or appearance of menses, < motion, with tearing in indeen loginings to eat, before eating, with thun-back and small of back, during menstration, with ger, while eating, after supper, which had been eaten dearthea, with emission of flatus on inspiration. Pinching, with paleness of face, P, with cutting and with yawning, with soft stool, cutting, even while eating, > emission of flatus Pain in morning; in of stomach and with alternations of chill and heat, morning after rising, with shortness of breath, every with anxiety Vomiting, sour, then sour eructations, afternoon; in evening, extending into throat, twistof clotted blood at night Movements extending to ing, before stool, drawing back and forth just before menstruation, and on first day of it, when breathing, as if constricted by a string

Tension at 7 PM., with distention, causing difficult taste of food in mouth, eructations tasting of food, con- breathing, with frequent passage of flatus; contractive fusion of head, diarrhoea, chilliness and necessity to T, and in stomach. Emptiness, > pressure Electric shocks, extending to fingers and bending the fingers Crawling, with moving about, as after a Coldness internally, with cracking and crackling, becomes cold easily, if air touches it he has pressure in stomach and diarrhora.

Upper—Cutting in a streak, > dinner, with soft stool at 11 A.M Frequent griping Burning pain about epigastric region, waking him Contractive

sensation Tension, with pressure
Hypochondria — Distention of 1. table, reading aloud, talking much, lying upon back hepatic region in afternoon; in a spot in hepatic and when cold are strikes abdomen Pressure, shang region when riding, and touch caused a starg-doma; below and, with durrheast three times at might, with a liver in evening Tonsave pain in liver when lying

Umbilious-Swelling, with pain about it when

Sides - Distention in 1, extending into groin. ness of clothes about stomach and hips is very oppres-Stitches in 1; in r in evening, in r when lying; in sive Heartburn after supper, H in mouth, burning r, then bruised pain in I lower ribs, also noticed rising from stomach, as if he had eaten pepper Sen-upon pressure; in r, extending through and through sation as if disordered, with distention of abdomen It bowels and out at small of back. Cutting in r, with seems as if she would constantly cructate, which does pinching, as in diarrhoxa. Griping in r., below navel, not happen, but all manner of trouble is caused thereby. after eating. Bruised pain in r, then sticking out-Sensation of fasting Emptiness at 4 pm. Crawling ward through pudends. Sticking burning in r., with

Hypogastrium,-Twitchings in l. side when sitting bent. Stitches below last false ribs, above ilium. above l. hip, extending to l false ribs; in r groin, extending downward, as if a hernia would appear, after breakfast; as with an awl in r. groin, > rubbing Deep-seated pain, at last with fever, heat, anxiety and restlessness, so that he could not sleep at night nor he, and pain on touch, as in inflammation of abdomen; P. above l. hip as if it would burst there on coughing; as from a weight. Bruised pain in l. groin at 2 PM when walking; in r groin, at first > then < pressure, with Dragging in inguinal regions, extending forward, while sitting, with ineffectual urging to uri-

Rectum. — Frequent, sudden pressing-piercing pain Sticking during stool. Cramp, obliging her to sit still. Sensation of something hard in it, like a kernel of fruit. Pressure all day, < after stool, and in anus Dragging, as if fæces should be expelled Urging to stool, with rumbling in abdomen; U after dinner, stool hard and difficult, but spasmodic contraction of anus, so that no stool passes, frequent, with emission of only flatus; frequent, meffectual, with pain, anxiety and redness of face Crawling. Itching, and in genitals . I , with sticking

Anus.—Hemorrhoids, with sore pain, unendurable on walking or reflecting, swollen H, with itching-sticking, and much moisture, hard H, stinging-burning, painful when touched (Æsc h), when walking, standing or sit-ting, > stool, impeding stool, painful Stitching before a meal Spasmodic drawing pain after contion. Sore pain, with moisture Biting pain after stool Burning during stool; after stool, with depressed pulse and palpitation; after stool, making him powerless Itching (Æsc. h, Sulph), after dinner, crawling Pain in perincum, with pulsation

Clinical.—Hemorrhoids, intolerably painful, < walking. Partial paralysis of rectum, stool passed better when standing Pruritis of anus and fistula.

Stool .- Watery , with stomachache Semi-fluid , at 5 A.M Diarrheea in evening, at night, from taking cold in abdomen; with tenesmus and burning in anus, with passage of blood; with passage of flatus Constipation Solid S.; with passage of a round worm Nodular, with mucus and clear blood, without trace of hæmorrhoids, N, then contraction of rectum, then soft stool, then in form like a goose-quill First hard, then soft then dyspnæs, then distention of hypochondria, < r., with pinching on every step Black, after the sweat. Bloody, with burning and soreness in rectum, painless passage of blood, with a soft stool With white mucus Passes better when standing Passes with sensation as if only flatus passed.

Urmary Organs.—Pain in bladder, with mability to pass urine, but if a few drops pass he has pain in urnary passages, with constrpation and cramp in rectum. Micturition so easy that he is not sensible of the stream, and can scarcely believe in the dark that he is urinating until he makes sure with the hand. Involuntary M. while coughing or blowing nose (Zn); I. at night in sleep. Intermittent M. in evening Delay of last drops of urns. Entresses with violent rections without desire. Frequent micturition; at night; at largue on blowing nose Drawing in largun. Pequent might, and copious, with darkness, which was repeated in the control of the

sensation as if something would be loosened. Tension in morning; and copious; and copious (K. c.), soon

depositing a sediment like yeast; F and scanty
Urethra — Discharge of blood, with the ejaculation of semen during contion Cutting. Pain in evening after urinating, with aching in vertex. Burning; when urinating, after an emission; when urinating, or at root of urethra; in region of frenum when urinating. sudden, at maht. Itching in orifice.

Urging to urmate after a walk, U, with necessity to wait long, then scanty urine, then renewed urging. Frequent urging, at night, waking her; with involuntary dribbling of urine, then shivering in open air Frequent, ineffectual U, then while sitting involuntary micturition. Ineffectual attempts at micturition, after passing a few drops pain in bladder and (after much walking in order to relieve it) cramps in rectum.

Urme-Copious; then scanty; and slightly acid. Scanty, with great thirst Often dark brown Turbid on standing Reddish. Clear, like water Containing much tenacious mucus.

Gillateal.—Weahnes of bladder. Paralyss of bladder, the unto is expelled very slowly and sometimes a even retained. Weakness of the sphincter of bladder, especially un children, the urne passes involuntarily, sepacally during the brist sleep at mighales involuntarily from the slightest excitement during the day. Paralysis of bladder after labor, the urne is retained

Sexual Organs .- Cutting in mons veneris, < walking Increased smegma, much on corona glandis Red spots on penis Herpetic redness of penis, with oozing on franum of glans. Vesicles under prepuce, becoming suppurating ulcers Burning pain in penis. Itching scurf on inside of prepuce Itching of frænum; on inner surface of prepuce, at one time tickling, at another biting, voluptuous, of penis, with incomplete erection Erection in morning, with desire, E. all the forenoon; frequent, incomplete, in morning after contion. Impotence Itching cutting in septum of scrotum Itching of scrotum and on skin of penis, of scrotum and sweating Stuches in r. testicle Tearing in testicles Pain in testicles at noon. in r T as if crushed Desire, with disinclination to work, very little. Discharge of prostatic fluid after stool Irritation to emission Frequent emissions at night and next forenoon, with constant excessive erections, frequent E in an old man, E every night and during afternoon nap in one who was impotent

Female -Burning Biting in pudenda as from sult during and after micturition Lencorrham flowing like menses and of same color (Zn.), L at night (Nat m) Uterine spasm, application of warm stones, pain now in hypogastrium, now in stomach, now in chest, now in small of back, obliging her to bend forward, with intolerance of clothing on epigastric region, pain in abdomen and stomach from even the most digestible food, fulness as if abdomen would burst and ineffectual desire to eructate Menstruation delayed; too soon, no discharge at night (Puls ), offensive and causing itching in pudenda, copious Intermittent traces of bloody discharge for many days after menstruation had ceased

Clinical.-Uterine inertia during labor (K carb) Postpartum hemorrhage from mertia of uterus Leucorrhoa espe-

Muscles of L. do not perform their function and inability hensiveness, then rumbling in abdomen, and griping to speak a loud word. Hourseness (Kali bi), < morning extending into chest, > passage of flatus; deep in C., and evening, with scraping in throat; in morning, with out to back, near nipple, extending suddenly towards rawness in throat Stoppage of voice every morning, navel, < inspiration, as with a nail; knife-like, anteas if there were a wedge in larvix which should be riorly in I side, piercing through to back, at night, with expectorated

Cough in forenoon, with rawness in throat, C in at times dry, with pain in r side of abdomen Hollow C, coughing, with stopped caryou Dry hollow C, in parox- pain when coughing yems, with a sore streak down traches, where it pains Scraping Rawness in morning Anaety in even-on every paroxysm of cough and almost prevents breathing after stool, with distention of abdomon. Tightness, scraping in throat, without expectoration; causing difficult breathing, dry H. cough and only seldom some expectoration of mucus Hoarse C, < morning and evening, > night Irritation to cough, even in moining in bed; I, with every expiration. Expectoration of tough mucus, at first difficult, then easy to loosen

Suffocation in attacks during inspiration while sitting, as if some one grasped the trachea Arrest of breath while speaking or walking rapidly, with necessity to suddenly catch for breath; sudden A when hunting, with rapid palpitation, necessity to kneel, general sweat, shortness of breath, rush of blood to head, bluish-red breath, with weakness of thighs Dyspnea after lying (almost thready) and slow down; < sitting, spasmodic Inspiration difficult and deep Short breath in morning, with pain in abdomen, S. when walking in open air, with oppression of chest: then paroxysms of cough.

Clinical.—Acute laryngitis, loss of voice and rawness and soreness in larynz and traches (Bell and Benzom). Sudden aphonia after taking cold. Paralysis of vocal cords. Loss of voice in singers and speakers Cough, < warmth, < 1.000 to Yotch cores, singers and speakers Cough, with season as if he "could not get under the unusual" to rause it. Constant hacking cough, with involuntary incturation. Expectoration as a rule seanty, must be swallowed, excessive rawwes in cheet on coughing, especially under sternum.

Chest .- Rattling when coughing (Ant t) Stitches on ensitorm cartilage; in I side, on a level with pit of leucorrhea. Crawling. Pulsation in middle. stomach, in first I false ribs, below I female breast at 5 P M, > rubbing; deep in C. in forenoon on deep and hawking and on exerting voice. Tearing in r.; respiration, beneath 1 breast during menstruction; between scapulæ at 4 P.M.; in vertebræ between S. exabove heart on motion, in 1 after eating, in 1. when tending into r scapula, then into 1. Pain on border coughing, in r side on inspiration, in sternum on deep of r, extending to back, < bending r. upper arm and breathing and on lifting, in sternum on physical exer- head backward, and at last on every motion of body, tion, below sternum on inspiration and expiration, even if the part be only shaken, < turning head towards then stuch in sternum, lasting all the forenoon, with the l., with tearing. Stiff pain between Tensive alternating severity, < expiration, with stitches in 1. pain in upper part on motion. Drawing; in 1. shoulder-joint; on two last false ribs, > rubbing, Loins—Stuches in 1. by last false ribs; above r. ilium,

beginning of cold, with general febrile excitement, below arms, extending to pit of stomach, with appreanxiety, restlessness and sleeplessness.

Tearing in forepart, < open air; sticking, in l. side. torenoon, with ratting on every inspiration as from Cutting in morning, with burning. Pressure; above mucus in r side of chest, wakes her in evening and pit of stomach; by I lowest rib, on r. side; on r side marning, during the day; only at night; every in evening, with difficult or short breathing; in internight at 2 AM, > during the day, with much ex- costal muscles, transversely across chest, on stooping; pectoration, always caused by speaking, caused by in upper part of ensiform cartilage, extending upward crawling in largez or by stooping to pick up anything, sharp, after dinner, < walking. Pain in r side as if caused by incessant crawling, on becoming warm after lung were loosened from pleura, even when lying; being cold. < after eating, with expectoration of rheumatic P., and in abdomen Bruised pain in musnnucus Ticking cough Paroxysmal C, caused by cles, < pressure, B pain below r. mamma, not affected tickling of mucus in throat Violent C, even at night, by breathing. Sprained pain in I lower muscles on moving I arm Burning pain, and sometimes < night and morning, with adherent mucus in chest, in which stitches Drawing pain internally in upper part after there is studing, soreness and ulceration, with and without immoderate running or singing, with heaviness Sore

ing Dry cough at night, disturbing sleep; C, with with frequent necessity to take a deep breath Sensition as if clothes were too tight. Painful compression from both burning in chest, racking, in morning on waking and sides towards sternum, with appression of breath and weakpreventing him from sleeping again. Hacking C, with ness of voice Constriction, with hoarseness and rawness of throat Oppression in afternoon, > dancing; O. (bronchi) after eating, of both sides as if pressed together Rushing in region of heart mornings, until rising, > motion, returning when lying. Heat internally; rising into throat

#### Clinical.-Nipples sore and cracked.

Heart and Pulse -- Oppression of H, with melancholy Palpitation in morning, with irregular pulse and pain in back, P. in evening, with anxiety, which made the breath short, with weariness, anxious, with color of face, as if he would have apoplexy. Want of rhythmical constriction of abdomen. Pulse small

> Meck.-Jerking motion, near head Statches at night when lying Pinching in r side Bruised pain, Tensive pain, extending to head. Tension of muscles on becoming suddenly erect or on turning head. Tensive sensation in nape as if drawn backward by both ears. Stiff pairs in r aide. Stiffness, so that he could not move head (Zinc); S. of N. and throat, with pairs in occuput, and bound feeling in muscles, so that he could not move

the head, of r side, with tensive pain

Back.—Stitches; when sitting; then pain. Sticking piercing-jerking, and in sacrum, arresting breath. rearing in a spot. Pain during menstruction Pain like a drawn and beaten sensation, then extending into walking in open air, S beneath skin; in region of r. small of B and thence into abdomen, where there is clavicle, in I breast below nipple, in I side opposite flatulence, with pain, then discharge of flatus and

Scapulæ.-Stitches in l.; near r. when swallowing

like electric sparks, extending to ribs, itching. Tear-| flowed back into it, with pain in r side of chest as ings. Pinching in region of kidneys. Pain; on every from contraction of muscles, inclination of 1 to become motion; when sitting, after copious micturition, the stiff, waking him at night. two last days before menstruation, with anxious dreams; cramplike, while sitting; pinching cramplike, and in nates, so that he must bend over, with pain in hypogastrium Sore pain, then pressing in hypogastrium, as if everything would come out of rectum and pudenda, like flatulent colic (from straining). Bruised pain towards evening, with passage of leucorrhœa, B. pain when walking, > sitting Sprained pain on motion Tensive pain Pain as if squeezed Staffness of lumbo-sacral joint.

Coccyx -Brussed pain Drawing pain in region. Jerking pain

Clinical.—Lumbago, painful stiffness of back and sacrum, < attempting to rise.

Extremities.-Twitchings in evening. Stitches in joints after taking cold. Tearing now in one, now in another, at one time severe, at another slight, T < joints and extending thence into long bones Pain in arms and thighs. Gouty pains Drawing pain in r index finer and in 1 second toe Drawings here and there, D in fingers, soles and toes Uncasiness in morning in after rising from a seat Weakness and trembling; ; so that he can scarcely walk and the hands must be outstretched Crawling in arms and legs, as if they would go to sleep Heaviness at night, preventing sleep

Clinical.—Rheumstic paralysis of arm, < r Unsteadinese of the muscles of forearm and hand. Numbers, loss of sensation in hands. Contracted tendons in palms of hands Skiattes, on r. sate, < motion, especially < essetely storms. Rheumstade arthritis, especially in persons who suffer from great weakness of the limbs, < east wind, limbs become distorted. The humating under the knee seem too short, in chromor chemistens. Weakness

Upper Extremities. - Axilla. Glands swollen Statches near, extending towards breast

Shoulder -Statches on top, in 1, tearing, in r, extending into hand Tearing in joint of 1, in r at 6 PM if she moves r arm or turns head to r, with bruised pain on inner border of r. scapula, but if she turns to the l. the place feels tense. Pressure upon Pain on moving r arm, in l as if dislocated, from morning till evening; in joint and in elbow as if asleep, at night, waking her frequently, < morning after wak-ing; paralytic, in 1 Goutlike drawings here and there, < motion, and in elbow and wrist Stiffness

Arm -Spasmodic flexion of l. at times sions up and down I. (which is weaker) after exertion, then heaviness of arm, then rumbling down muscles, extending into bone, as from crawling of a mouse, with which the twitches disappear Trembling of r. if he holds anything at arm's length. Inclination of r. to cramp, waking before midnight, with crawling as if asleep. Stitches, extending into l. side of chest. Tearing, and in hand; extending into back; in l., and in shoulder-joint. Pain in r Drawing pain in muscles; in bones at night, preventing sleep Drawing in r, with paralytic heaviness Weakness of r, with crawling in front of both shoulders, W. of r, almost

Upper Arm.-Statches in r on raising arm; S near l. shoulder, on inner margin of r.; in upper part of r, > rubbing; in r at night in bed, preventing motion, in deltoids if she carries anything, outward in L humerus, near its head. Tearing just below shoulder-joints, T at night in warnth of bed, especially in shoulder-joint; in 1 humerus, extending to elbow, in which it is most painful Drawing cutting in r deltoid. Pinching in deltoid, with coldness that ends in burning. Bruised pain in flesh. Drawing pain in l humerus; now in one, now in other deltoid, extending to clavicle

Elbow -Quivering externally when leaning upon arm Boring in tip of l at 4 PM, with sensation as if it would force him to bend the arm. Bruised pain : in bend. < pressure. Drawing pain, and in forearms. Pain in bend of L on stretching arm, as if a tendon were

too short Forearm -Swelling, as if on persosteum, painful when pressed. Trembling of r while writing, with twitching. Stitches along tendons on inner surface of r , drawing, in muscles in lower part of r Tearings : bed; in evening Sensation as after great exertion, in tendons of r.; in 1, from elbow downward; throbbing, in l. Boring in a spot below r elbow as if in bone, at 4 PM., with tearing Drawing pain ine muscles of lower part of 1 Contractive pain in muscles of lower part of l Paralytic pain in r ulna. Paralysis, with difficulty in raising it on account of heaviness and stiffness.

> Wrist -Sticking in r as if sprained, when at work; crawling sticking in r., and in second and third fingers Tearing in r : on back of r., extending into middle finger, with pinching Pain in r as if sprained or dis-located. Drawing pain, from r into fingers, in bones, through metacarpal bones into little finger, where it is worse in tip, < stretching hand, when fingers are involuntarily drawn together, then the drawing extends from bones of wrist into the other fingers and they all become bent, drawing pain in 1, from within outward.

> Hand -Swelling at night, with crawling in them. Trembling Stitches in I palm, with crawling in fingers, jerking, in muscles of l, transversely across dorsum, on moving arm Tearings, and in fingers, on dorsum, now of one, now of other, in metacarpal bones of thumbs; in inner margin of r, extending towards little finger, as if in bone Spasmodic sensation Tensive pain transversely across l, as if sprained, on moving it. Fulness in inner part of I when grasping anything. Weakness in a hot room, spasmodic W. in morning on waking. Heaviness of r. Paralytic sensation in r. Going to sleep, with crawling in it

Fingers.-Twitchings when writing, drawing, in 1. Statches in little, then extending upward like knifestitches, with apprehension and aching about heart. Tearing; in I index; in joints of r index, with pain on pressure, in 1 middle, at 3 PM, with pinching, in tips of all, with trembling of hands Pain under nails when touched Drawing pain in joints; 1 Burning pain under nails, but when touched pain as if suppuralike paralysis, writing, with stiffness Heaviness, ting, shooting-burning pain in joints. Crashed pain with weakness; H. of r., as from a blow upon thick in tip of . little; in tips, as if they would burst, now part of forearm. Stiffness of 1 when holding it up- of one hand, now of other. Throbbing pain as from right for a long time, with sensation as if the blood an ulcer in proximal joint of r thumb. Tension in knuckles of last joints on bending in forenoon. Numb-| Weariness in morning on waking, > after risingness, with loss of sensation and with tension Dead-Heaviness, at night in bed, and of feet. Falling ness, < morning, seem dead, icy-cold, white and with- asleep out sonsition

from hu-joint and then from patella downward. < rest Weariness from afternoon till evening, especially in legs and knees. Numb or bruised pain in nates when sitting

Hip -Stitches in joint every two minutes, extending towards abdomen; in l as if in bone Tearing in joint, when sitting and walking, and down whole leg; in I as it in bone, and on pressure bruised pain Punching in region, above joint, with twinging and with coldness that ends in burning Pain above joint, paroxysmal, in l. joint, as if sprained or dislo- on a misstep or on bending it from side to side, with

and walking; prickling-burning in region

Thigh -Twitchings above knee Stitches in 1; in bend of r , on outer surface of r , just above knee , in l in evening when walking, extending into chest Tearing in middle of 1, > rising from a seat, scraping, in I , paralytic T on outer surface of r Brused pain downward Trembling or throbbing sensation in oflesh, like a painful tingling Tension in bend of r in morning on rising, and on bending knee Beatings in tendons above bend of l knee Weariness when walking, and in leg, W, with want of breath, in upper part, from without inward, < rest Paralyzed feeling when sitting and walking

Knee - Cracking when walking; painful, when walking, as if it would be broken or sprained. Jerking in I in afternoon Statching when at work. Tearing in r , on outer side of l , in patella at night, preventing sleep, in I, extending through toes, with stitches, so that he could not step and could not sleep at night: drawing, in evening, extending into ankles Boring in r, with bruised pain on pressure. Pain externally, as from an ulcer, extending to thigh Sore pain Drawing pain, then jerking pain Drawing and jerking pain in I patella. D. pain, as if weary from walking, worse when extending knees than when bending Drawings Tension in hollows when sitting or beginning to walk, > continued walking Tensive pain in hillow when walking, with stiffness. Weariness after hollow when walking, with stiffness. Weariness after walking, with heaviness of foot, W < ascending steps, so that they knock under Stiffness of l. when walking (Led), stiff pain in patella when rising Tingling, gone-to-sleep sensation in morning, and in

Leg -Varices Twitchings Trembling on beginning to ascend (e. q, on a ladder), > standing still and Uneasmess in evening, in l. at night large areola.

Calf -Cramp in morning in bed : at night. Intermit-Lower Extremities - Tottering from side to side tent stitches in 1 Tearing in tendons beneath r.; down when walking, with sensation as if he staggered more 1, and on dorsum of foot, from outer part of r to outer than he really did, without vertigo Stitches, first margin of toot, < moving foot or toos. Bruised pain in r. all the forenoon, extending into and above knee. Contraction of r. Tension as it some one forcibly contracted the skin, from 7 to 8 PM Drawing when rising from a seat and when walking, with sensation as if r leg were too short Crawling in 1, with prickling, as if it would go to sleep

Ankle.—Tearing stitch, extending to knee and thence to hip-joint, but not in the knee itself Tearing in outer malleolus in evening Pain when walking as if sprained or as if it would be broken, S pain cated, causing lameness, drawing pain when sitting cracking in joint. Pain as if weary or crushed when sitting after walking, > walking again Drawing pain when sitting, with sensation on sitting as if leg would

bend under. Drawing Stiffness

Foot.—Swelling, especially of anterior part, in evening, with heat and internal itching, as if frozen, and on pressure pain as if suppurating Cramp, on stretchin morning in bed, and in legs Jerking pain from nates ing it, in r sole and tendo-achillis on stretching them Tearing in dorsum of l; in ball behind great toe, in inner margin of r. , in inner margin, even in morning in bed, in 1 tendo-achillis when sitting, sudden, in r heel Boring and burning pain in a corn. Pressure on dorsum Aching in soles like a nervous disease. Drawing in r in evening, in tendons of r in-step, extending into great toe, where it is only felt on motion Tension in heel and tendo-achillis ness in morning so that he can hardly stand Going to sleep when sitting or lying Numbness of heel when sitting, with pithiness

Toes -Statches in great, in ball of great; in a corn on little toe, burning in ball of great; burning, beneath nail of l great. Tearing in great, in l great towards tip; on outer margin of r little, on margin of little, extending towards tip; burning in second little, burning, behind nails of first and second. Pain on posterior joint of great; in great as if suppurating; as from inflammation behind nail of great; in great as if burnt Drawing during a storm, extending into thigh, with tearing Crawling in l. great, with sticking, as if it would go to sleep, crawling falling asleep of r. big toe in afternoon.

Skin.-Spotted on thighs and legs, full of dark red veins Red spot above upper lip, which seems cracked and causes a burning pain; painful red spot on tibia, extending along length of leg, with itching when healing. Inflammatory swelling beneath chin, as if an abscess would form, with burning pain working, as from a chill when walking or standing in liver-spots become elevated, with corrosive itching. open air Tearing down outer side of I from knee Eruption in face, more felt than seen Nettle-rash, eswhen sitting, the pain extends into hip-joint on rising pecially just above knees; on neck, between scapule from a seat, with bruised pain in hip when walking and on back. Itching tetter on dorsum of ring finger; and on pressure, not > when sitting; burning, in on nates; on neck, with mousture Eruption of the size tibia. Pain after copious micturition, P at night, of pin-heads, with hollow tip, without moisture, on extending into groins, down tibia Sprained or para- forehead, neck, scapulæ, arms, hypogastrium, espelyzed pain in muscles in afternoon and evening. Pain cially on thighs and in hollows of knees, with itching, as from a blow on r tibia Drawing pain; as if in especially in warmth of bed, with burning after scratchbones Drawing in r. in evening, with pain in throat; ing, when not warm scarcely noticeable, whitish, promicramplike, down outer side of r. when sitting or nent on scratching, after scratching a red spot with

Pumples on up of nose; at root of nose; between eye-| scratching many atching vesicles containing water, I. ulcerated and coalesced and left a red spot.

Eruption like chicken-pox (in an infant) Red Erupton like chicken-pox (in an infant) Red (Linkenl.—General tendency to comess in folds of skin, putsules on I side of forthered, I temple, on mose and back of ears, between tube, ace (Sa). Small flat wars. Wars on middle of shin, with stinging when touched and on fingers, especially on tips and about nails. Horry warts, when healing covered with scurf. Boll behind ear, [Horry growth on up of nesses.] when healing covered with scurf. Boil behind ear, on back; on chin, near lower lip, with red areola, near anus, painful, discharging pus and blood Supful, between female thighs, on thigh, near scrotum, as heat and sweat, painful, on l side of chest and back, sleep in morning Difficult waking in morning which burst, with fever, heat, sweat and anxiety, on touched, afterwards drving into a scurf, corrosive V. of r. forearm, the itching only transiently > scratching Ulcer on tip of thumb, on heel, on leg, with Ulceration again of cutaneous wounds that had almost healed

Formication Crawling in thighs, legs and feet, in 1 calf, extending to knee; in soles, in ball of great

on nose, chin and throat, below ears, about mouth, girls, with emissions about breasts; on back, on arms, in hands, of palms; on dorsum of 1 hand; on last and middle joints of 1 and scrotum, < night in bed and in morning Itchbone, temples and ears, in middle of l scapula; on back, upper sternum, r. shoulder; l axilla, bend of constantly appear; I. in palms and after scratching with heat in face.

Shivering chill; at 7 P.M. in open air, > in room.

brows, near upper lip; beneath 1 corner of mouth; between first and second phalanges of l. index, and on r thumb, behind r thumb; on index, becoming after scratching burning itching pimples; I. on forea wart, tensive, on neck, under skin on r side of arms (sometimes with burning after scratching), with body, on chest, arm, back and bend of elbow, with itching pimples and vesicles; I on outer margin of stitching on bouch and sore pain on hard pressure, likee, then burning after scratching. Stacking itch-afterwards with pain and stinging when not touched ing over skin; on index, on r nates; on thigh tlehing P on Lenek; on forearms; P on various towards outer part, as from fless, on back, shoulders, parts, with corrosive itching, and after scratching arms and thighs, especially on dorsum of fingers. burning Transparent crystalline P, rounded at apex, Corrosive itching on face, with rush of blood to it, itching, on hands, the second day, with red arcola and with heat and redness, then many red pimples. filled with milky liquid, the third day discharging pus Burning itching near nose. Itching on lobule of ear and ulcerating, the fourth day some dessicated, others as from a tetter. Voluptuous itching of last joint of great toe.

Sleep .- Yawning and stretching of limbs: < night; Y. in forenoon and afternoon; excessive, from 11 AM. puration of 1 great toe-nail, with burrowing burning to 3 PM, after intermittent hiccough; excessive, all pain and proud flesh Soreness between thighs, pain- the evening, without sleepiness Sleepiness in morning, in afternoon, even when busy, with necessity to be if excornated, with itching and after rubbing smarting down; when walking, who sitting, but sleep was to the control of the co

Sleeplessness on account of dry heat, every nights calf, discharging water and healing without suppura- after midnight on account of general bruised pain; tion, burning, in face, exuding corrosive water when every night after 2 o'clock Woke at 4 o'clock every night (in winter) and could hardly ever sleep again on heels, with itching; itching, covering inner surface Falls asleep late on account of heat Frequent waking, with general sweat, which increased on waking Frequent starting up in fright from sleep, starting up in red, hard, inflamed areola, discharging more blood fight on going to sleep. Motions of arms and legs in than pus, of offensive odor, causing sleeplessness sleep. Uneusiness all night, after a short sleep she was awakened by anxiety and uneasiness, then necessity to sit up, with involuntary turning of head from one side to other, until, being exhausted, she fell asleep again (Rhus t, Sul); U at night, then sweat in morning; every night, with toe; on r. forcarm, - rubbing, between first and occasional crying in sleep. Whining, "come here, second phalanges of 1 ring finger, with twitching in come here," after midnight in sleep. Loud laughing

inner side of upper arm; in r heet, > scrawing, many and proper side of upper arm; in r heet, > scrawing, many and a side of the side of t scratch it enough, in toes, as if they had been frozen | Fretful, and vivid | Full of strife, with uneasy sleep.

Rehing over whole body, in various parts, on head, Sad, of dead acquaintances. Confused. Merry at forehead; above eyes, in face, up and wings of nose; first, then confused, historical. Lewd, of beautiful

Fever.-Chilliness, at 4 PM, with creeping in legs up into back and weariness, then sweat without heat fingers; between fingers, on nates and back of thighs, or thirst, the first half of the night, then heat, and on thighs; hips, in hollow of r knee, of patella, towards morning moist skin, after which the first rest legs; calves; dorsum of foot; on r heel, over whole and sleep; in sleep towards morning; after eating, body at night, with dry heat; on thighs, perineum also with hot face, in open air after dinner Sensitiveness to free air, to cold air, to a draught, which ing, > scratching, behind r ear, on eyebrows, I malar-causes pain Takes cold easily, with general chilliness from a slight draught Chilliness, with yawning C, then heat in forehead. C, then rising of heat in head, 1 elbow, 1 forearm, behind I ring and little fingers; with sweat in palms in a room Internal C every in bend of r knee, then on tibia, on r tibia Itching day, frequent internal C, with cold hands and feet over whole body, not > scratching, with redness like internal C about midnight, especially in arms and scarlet-rash and many vesicles I on back, with legs with cutting in back, then general sweat, with sweat. Itching on lower part of forearms, burning tingling and heaviness in head and necessity to lie after scratching, I soon reappears, and new vesicles until noon. C, alternating with sweat; C, alternating

Shivering always on waking at night, in a room: always on going into open air, with gooseflesh, general, as often as he lays down the I hand after motion, during pain in stomach Shivering chill, with goosechill, with external coldness, then in the room internal w unith in head

('hilliness of various parts. Whole I, side of body cold, and gone to sleep Coldness of r forearm and fingers, with stiffness C of hands, extending up 1 arm to elbow, of hands, of feet; of soles In spine between scapulæ, as from a wind Sensation as if cold water ran from r. clavicle across chest to toes Shivering over whole r side of body: S. from r temple through forehead, where it becomes a throbbing : from face over back to knee, in neck in evening, extending into brain, along back, in back in attacks, extending nearly all over abdomen; now in arm, now in leg, now general; sudden from face over chest to

Heat every day from 6 to 8 PM . II causing late falling asleep in evening, after a short walk in open air, with excitement, general, without moisture and without thirst, then gradual coolness, with yawning and stretching of arms H in flushes after walking, with discomfort Orgasm of blood Burning wherever she takes hold of herself, B in vertex, in r temple and side of forehead, on r malar-bone in evening, in middle of r scapula, on outer surface of 1 upper arm, transversely across forearm, close to wrist, in finger-tips; in soles; in a spot on r side of neck, with redness Heat in face after eating, and in eyes, in face after eating, with redness Internal II in head after dinner, I heat in head without external heat, in forehead and back, as if sweat would break out, sudden, in 1 thigh Sticking-burning in axilla Tearing burning in scalp in front of vertex in evening. Cool burning on malar-bone, frequently in front of vertex Crawling B in ball of great toe

Sweat, in morning in bed, waking him at 4 AM., in afternoon when walking, with weariness, at might; every night, at night, with uneasy sleep, profuse, when walking in open air, in attacks; general sour, at night, on back and abdomen after walking

#### Ceanothus

A tincture is prepared from the fresh leaves of Ceanothus Ameri-

Clinical.—Enlarged spleen, with pain in the whole I side Chronic hypertrophy and inflammation of spleen, painful at times, with extreme dyspince, has to fight for five that. Resustent pain in I hyperhondrium, profuse menses and yellow leucorrhoza. It has cured yellow leucorrhosa, with pain under I ribs.

### Cedron.

A tuncture is prepared from the dry-powdered needs of Simaba Cedron, Planchon

General Action -Too little is positively known to enable one to judge of its general sphere of action, but it seems to produce well-marked symptoms of intermittent neuralgia, and indeed of regularly recurring febrile attacks It has proved curative in marsh malaria characterized by severe pains recurring periodically It may be compared (remotely) with Arsenic.

Generalities - Neuralgic pains, then general numbness, with smarting and burning in nose Sharp pain in occiput, then in abdomen, then in lower limbs. Sharp flying pains in all parts on getting warm in bed, flish; and with urging to stool, which is soft, accom- keeping him awake most of the night (Merc, Sulph), punied by pinching in whole abdomen, then general in limbs the pains seemed to be in cartilages of joints, < first joint of great toe and streaking up bones, in abdomen the pain was < in region of ascending colon, liver and spleen, the pains of head were dull, except in occiput and in facial and optic nerves. Contused feeling Restlessness, and anguish, and nervousness Malaise. Weakness, of body and mind after waking. Dulness of senses Periodicity, often clocklike, us a characteristic of Cedron Aggravation in provers of voluptuous disposition and of nervous temperament, < in women.

> Clinical.-It is often found curative in acute malarial poising, with enlarged spleen and liver, general ansemia and drops It has cured puerperal convulsions recurring at regular interval beginning with severe pains in 1 temple, with albuminuria Hysterical spaams recurring regularly might and morning Recurring attacks of chorea in a woman after cotton

Weeping mood Mind -Excitement Dread of friends, especially in women Torpor, with uneasiness Symptoms mostly repeated in morning and < night

Head.-Bending backward, with pressure on occiput and parietal regions as if those parts would burst. Headache < open air , < deep in orbits, obliging him to shut his eyes, and extending to occiput Dulness in morning, with heaviness Distensive headache, < night Swollen feeling, < r side, and heavy at 11 AM., on rising from bed, could not see to light a candle, could not tell when it was lighted, did not know her acquaintances Shooting over 1. eye (Arum

tr). Pain above eyes as from a band
Temples—Arteries enlarged Pain; from T to T across eyes, passing from one side to the other; throbbing, extending around forehead. Pressure at r. causing dull pain in whole r. side of head, > towards noon Throbbing ; 10 A M , increasing to pain, extending around and over eyes, increasing to pain and extending over ears. Pulsating sensation, with twisting pain behind r. ear, changing to dull pain and extending to temples

Aching in vertex at 10 PM; 10 AM, on waking, on late waking after sound sleep Pressure at vertex, < when the shivering begins Sharp pain in occiput sharp jerking pain at 10 30 A.M. Pain in occiput and forehead Pressure in occuput in morning

Eyes .- Redness, with itching of inner and outer surfaces of lids; R and protrusion, with aching extending to forehead Smarting during fever, < closing them; S and burning, with lachrymation Alternate dryness and smarting, with moisture Swollen feeling Itching. Lachrymation; acrid Redness of white at 11 AM, with dry feeling in eye when exposed to air. Pupils dilated, and fixed Enlargement of Meibomian glands and conjunctiva Redness of lid, with pain on pressure. Twitching of levator palpebra superioris. L lid seems dried to ball, conjunctiva is inflamed and dry. Burning of lids. Vision misty Objects seem red; at night, yellowish during the day.

Clinical.—Ciliary neuralgia. Neuralgia of the supraorbital nerve and also in the whole r. side of the face, coming on every day, generally about 9 a.m., and lasting a few hours. Numerous cases of chilis and fever characterized by the regular recurrence of

supraorbital neuralgia are reported cured, also many cases of floating ribs and under r scapula; in r side; oppres-supraorbital neuralgia without maisrail symptoms. Severe paun in give, extending now and then to back, with neutration examing flow of scalding water from eyes and nose, the paun in back across forebed caused a crey feeling, coming saddeshy after head across forebed caused a crey feeling, coming saddeshy after Heart.—Throbbing Palpitation during fever, with working on black.

Ears .- Pain over. Hard hearing at night Buzzing towards noon Singing as of crickets.

Nose - Discharge of much glassy mucus, of much

clear, thin, acrid mucus.

Face -Puffy Red, cheeks red and burning at night, pale and cold in morning. Pressing or tearing them. Uneasy feeling in lumbar region, with sensapain in one or both cheeks, with shooting under orbits tion as if a drop of urine were in penis Lips dry

stomach with scraping and profuse, thin saliva, as good before screenes came on, when they were 's by if rate, and in fluxes, esophagus and stomach 'Dry' motion and cold 'Pains (when not februe concomings, with thick, vascid saliva, D, with visced saliva lants) > fraction. when talking Saliva sour at night, white and thick slimy, bad

Throat.-Prickling in fauces, extending down cesophagus, with tingling. Swallowing difficult

Stomach.-Appetite lost Thirst, at night and during febrile symptoms, for cold water at noon and for warm at night, for only warm drinks during fever no T during chill Aversion to cold water in evening Gulping up of bitter wind in morning on rising, in morning before rising, with pains in temples Nausea Distention and nausea, generally < rest, > walking and cating Sensation of a stone on. Rolling pain Heat and fulness

Abdomen .- Distention; towards evening, and hardness Flatulence in morning, with colic and fetid flatus Pain during dinner, flatulent, in morning, with fetid flatus, P. in small intestines, also with cramps Borborygmi in l side Sharp pain at noon, alternating in excum, liver and spleen, running from one to other. Statches in spleen and liver Pain in hepatic region on rising; griping-cutting in lower

Stool.—Ineffectual urging Loose, yellowish ish, mixed with fragments like clotted milk Copious,

with tenesmus. Constipation.

Urinary Organs .- Frequent ineffectual urging Frequent micturation of much pale urine. Discharge like gonorrhea; thin, gleety D, with formication over body. Feeling as it a drop of urine were in urethra or a constant dropping from it. Pain in urethra when not urinating, with burning Burning in urethra, and along ureters Urine profuse; and light-colored, with numb, uneasy feeling in urethra, scanty; scanty, and deep-colored; red; dark, with sediment; highcolored, with brankke sediment

Sexual Organs.-Erections in morning; all night, with frequent waking from dreams of pleasant social interviews with female acquaintances; E, with desire Excitement at daybreak, with discharge like leucorrheea, and swollen mamme, with pain.

Respiratory Organs.—Larynx constricted and tender Much clear, thin mucus in bronchi. Difficult respiration, with partial loss of voice.

Chest.—Darting-cutting under ribs.

Cedron.

hurried breathing and headache. Pulse rapid, in

morning, increased, firm, full Back.-Pain in morning on rising, and in loins; P under scapula and in pelvis Pain in kidneys; with profuse urine, smarting and burning in urethra, then profuse micturation of clear urine, with burning, and along ureters, as if boiling water were poured through

Extremities.—Lancinations in joints, < r. elbow Mouth -Pain in a decayed tooth. Tongue coated Sharp flying pains in all joints at 10 PM, < feet, < yellow, in morning on rising, at back, pricking in first great toe-joint Rheumatic pains in all joints yearns, in norming, after eating, P at 5 30 P m., pricking-tiching Rheumatic flying pains, < night, < feet and hands, at 5 P.m. Smarting, and in fauces Tingling as from some in elbows, more in knees and hips, most troubleshock of galvanic battery Burning, and in throat and some in first joint of great toes, pains > motion and

Upper Extremities .- Weariness in shoulders Cutafter talking, profuse, metallic tasting Taste metallic, ting in elbows Pain towards noon in elbows and of iron, causing acid salivation, sour, sickish, bitter, forearms, with cold sensation, extending to hands Brussed feeling in elbow and r forearm Numbness of r hand and forearm, and dead feeling.

Clinical.—Sudden acute pain in ball of r thumb, extending up arm to shoulder. 2d dil cured like magic.

Lower Extremities.—Lancinations in knees. Twitching of tendons of legs, tendo-achillis and r. foot. Contracting pain in legs as from contusion in evening Legs feel enlarged Numbness of r leg Sharp lame pain in r ankle Swelling of feet, with pain in all joints Pain in heel as if ulcerating in forenoon while walking

Clinical.—Sudden acute pain in ball of r. footcaused her to drop to the floor, afterwards pain extended to above knee

Skin.—Yellow.

Clinical. - In shingles the radiating pains have been relieved.

Sleep .- Yawning at 7 P M., with stretching Sleepness Profound sleep. Frequent waking Sleeplesness, and restlessness Rostless sleep. Waking dreams, confused D., D of quarrelling with dead sister and other dead friends, cried about it, woke with nightmare, with sensation of stone in stomach

Fever .- Chilliness towards 6 P M , then frontal headache extending into parietal regions, red eyes, itching of hds internally and externally, rapid pulse, coldness of hands and trp of nose, even during fever when the rest of face was red and hot, similar attack next day at 530 PM; at 6 PM, after dinner, with shivering in back, cold feet, burning hands, feeling in eyes as after much weeping, at 6 PM, with heat of face, pale hands, feet and tip of nose cold, at 9 PM; all the evening, with congestion of head, coldness of hands, feet and nose. Shivering; at 3 o'clock, with malaise and inclination to lie down, the S renewed by movement, coldness of hands, feet and nose, flushes of heat in face, towards 6 P M face constantly hot, lively expression, smarting in eyes, < closing them Cold feet forehead in morning, with empty feeling; back and legs at 630 PM. after dinner, pale hands, red face, Pain under heavy head.

Heat, 11 AM, rapid pulse; 6 PM., with itching of Oppression, on moving; in morning, with irritability. eyes, in evening, with full, strong pulse, quotidian, Feeling of impending illness Uneaesness, anxiety, tertian, towards 8 P M, preceded by depressed spirits, agonizing tossing about, with tearing in abdomen (Acon.): dulness of senses and headache at noon, cramps, then contracting and tearing pains in limbs, cold sensations then sensation of dry heat, then profuse sweat, full and quick pulse, with animated, red face, cold and pale in the apyrexia, thirst for warm drinks Flushes Div at night Flying in face towards evening, alternating with chills, with bloated appearance Sweat

Clinical. - Recurring chills, with left-sided headache, numb ness of the limbs, etc. In chills and fever the whole body feels numb with the headache

# Cereum Oxalate.

Triturations with sugar of milk are used for low dilutions

Clinical.—Vomiting of pregnancy Whooping cough, with nosebleed and vomiting Nervous reflex vomiting from intestinal or cerebral irritation, almost always spasmodic. Dysmenorrhea in fleshy, robust women, with scanty discharge, > thorough establishment of the menses. 5 grains every hour.

## Chamomilla.

A tincture is prepared from the whole fresh plant of Matricaria Chamomilla, Linn , when in flower

neuralgic pains are noteworthy (compare its botanical emotional sphere is, however, most characteristic and auggest

Allres -Puls , Sulph , Acon , Nat. m , also Arnica, Gnaphal and Tanacet

nothing, the child becomes stiff, bends backward, stamps on the nurse's arm, screams and throws everything off. Convulsions in children, now one leg, now the other is moved up and down, grasping for something, mouth drawn back and forth, eyes staring (Tanacet ) Twitching of limbs and eyelids, of limbs and head in morning nap Tossing open eyes Starting Stretching. The child will neither stand nor walk, and cries piteously; will always lie, does not wish to be carried

State hes in various parts, < joints, jumping from joints, along bones and in muscles, in latter with jerking and tearing, or drawing pains, in r then I leg, extending into ankles and dorsa of feet, then again in r shoulder, on hips or I half of head Tearing here and there, T in attacks in ovening Pains seem intolerable. Pains eventation; at night, > warm comvolume tolerable. Pains eventable. Pains

cannot remain in bed.

Weakness, in morning; during rest; when the pain in hands and feet, mouth dry, desire for cold water, shivering, palpitation, hurried breathing, weak pulse, in attacks, < limbs, sudden, while sitting and walking, < knees, with cracking of knees, faintlike, faintlike, after breakfast, paralytic, of painful parts, > walking, the pains < sitting or lying, < parts at rest or tensely drawn, for instance, in wrist when writing Faintness; and sickness, sinking about heart, sudden paralyzed feeling in legs, pain in all lembs as if beaten (compare Tanac). Paralyzed feeling in parts where pains had ceased; the paralytic feeling in any part is always accompanied by drawing or tearing pain, and the drawing or tearing pains rarely occur without the paralytic or numb sensation in the part (see Tanacet). Stiffness Aggravation on r side; of all symptoms by walking Amelioration when walking, during midday heat, by sweat

Climical.—Rheumatism and rheumatoid pains, the pains make the patient wild and walk about in distress. Convulsions in children brought on by axcitement, especially with one cheek red and the other pale, and hot sweat.

Mind .- Whining restlessness, the child wants this and that, but when given it he will not have it or pushes it away. Piteous moaning of a child because he cannot have what he wants. The child can only be quiet when carried on the arm. Moans on account of trifling, General Action .- It belongs to the catarrhal group, even imaginary insults; moans with heat of face Weepaffecting all mucous membranes Its rheumatoid or ing and wailing Talking strangely at night while awake and sitting up in bed Peevishness (Puls., Ant. relatives, Armica and Gnaphalium) Its action on the cr): about everything, with duspnera, about pains, especially those which involved joints and extended along serves to indicate the remedy in a greater number of bones, as paralytic and drawing pains; in morning on complaints than its general symptomatology might rising, with disinclination to mental labor, on appearance of menses, with obstinacy even to quarreling; after dinner, the hypochondriac whims and peevishness seem to him to depend upon studidity and heaviness Generalities .- Sitting stiff like a statue, noticing of head and constipation Impatience (Ign ); everything goes too stouty Interest et of being spoken to or interrupted, < after rising from steep, with sluggish pupils Reserved Tacitum, and earnest, reconciled to his fate, about which he is deeply affected (later action). Talks with aversion, in a short, abrupt way Cannot stop talking about old vexations. Quarrelsome Susabout, with heat and redness of cheeks, confused talk and pictous that he may have been insulted Inclined to scold Gloomy Anxiety (Acon ); in bed, with rapidly changing pupils; while urinating, without mechanical hindrance; with ineffectual urging to urinate, without much urine in bladder; and dissatisfaction with everything place to place (Puls), < knees and ankles, > motion; in that she undertakes, viresolution, with flushes of heat in face and cool sweat in palms, with uneasiness, with trembling and palpitation, as if he must go to stool Apprehension Dread of wind; of work (Conscientious scruples about everything)

body in one position, composed of itching and stuckmap of thought, in afternoon. Instantening in speaking stammering, mistakes in speaking Vaning, in spots, now in one part, now in another, < ishing of thought, in afternoon. Instantion. Ideas
scratching brussed pain in stormy weather Draw- fixed dater action). Stupefacton, with vertage; with ing pain an all bones, even in occiput, in head, now compression of brain. Comprehends nothing aright, in shoulder-joint and hip-joint, now in lower limbs; as if deaf or in a waking dream. Misunderstands in scapulæ, chest and hands, as from taking cold. questions, answers incorrectly, with a subdued voice, as if delirious Exhaustion; in evening. Indolence; after long sitting, while sitting erect; after long stoopin morning At night ti seems as of the heard voices of ing and some cough; (on stooping); (after lying down, absent persons. Mistakes a familiar person for a differ- with dim vision and heat in face); < when talking, ent (larger) one, while overpowered with sleep Unstaggering, in morning on rising, in attacks, with tendency
conscioueness in a child, frequent changes in face, distortion to faint, as if head were top-heavy, when walking after of eyes, contraction of facial muscles, rattling in chest, cough, eating, in evening, as it unable to collect his senses, uawning and stretching.

Clinteal.—The great indication for the use of Chamomilla is to be found in the inential condition of the patient, children are extremely reduced as and impairment, they want to be ptoted contained to the patient of the patient of the patient of the patient, extremely seasitive to pain, even the alightest twings intolerable, they are always complianing. It is not infrequently indicated in people who have been in the habit of taking opun, discipated in people who have been in the habit of taking opun, drug in a great variety of nearingas, painful discusse, hystorical symptoms, etc. even if indications other than the preceding are wanting, it, at least, changes the aspect of the case and makes it more amenable to treatment.

Head .- Wagging backward and forward. Inclination to bend backward Inability to hold erect, necessity < forehead and temples Pressure increasing and desparks

tomples, < r , after eating after sitting a long time dinning Compression, forenoon Painful pulsation after mental exertion, with vertice, even in sheep, in arteries towards noon, with compressive pain in r. after waking, < inental effort, especially the pressure temple in vertex extending to forehead and temples, with sensation as if temples were pressed by thumbs, on waking, < motion, earnest thought, reading, < in forehead, with inability to fix attention; < evening, with weak-ness of head, with pressure as from a finger, sometimes in temples, sometimes in lower part of forehead and in frontal eminences, with inclination to bend head backward; with pain in eyeballs and sensation in r half of head, < r temple, as from an angle pressing into head, mostly one-sided frontal, > dinner and eructations, with warmth of head and vertigo, throbheaviness and bruised sensation; confused, when sitting and reflecting, paroxysmal, in morning; periodical, stupefying, in afternoon, beginning with pressure upon vertex, then extending to forehead and temples Brain feels constricted by meninges; by dura mater. > appearance of heat in head and sweat

Confusion; 5 AM on waking, and stupefaction, morning on waking; morning after waking; in morning, with sticking and boring, < r. temple; afternoon, with pressure on eyes, afternoon, with paroxysmal pressure, < lying, > nosebleed, with abnormal sensations vertigo, < closing eyes Fulness Pulsation Heaviburrowing in temples, < r. Congestion, 5 AM; <

even to faintness

Forchead -Stitches, in r eminence, (Tearing while sitting or turning in bed, with sensation as if a lump were falling forward), paroxysmal T; sticking, extending into chest. Digging, and in r temple, changing to sensation of a sharp corner pressing inward Pressure, forenoon, above eyes, over r, eye towards noon, with pressure on r. ball, in protuberances, < sitting and studying, > walking; now r., now l. eminence, with digging, in sagittal suture, with aching and heaviness Pain; < moving head, in bones; over r, with pressure upon eyes and stitches in r temple, jerking, < eating Constriction as with a broad band Heaviness and dulness

Temples -Swelling of 1, with pain on touch. to bend far forward or far backward Statches, as if Statches in r, l, now r, now l, > cooling rain, with eyes would fall out Tearing at night Burrowing, pressure and rush of blood to head, boring, in r, with heaviness and digging in head.. Tearing in one; excreasing, < half of forehead and in r. temple, where there tending outward, with sticking. Digging; < r, with are stitches, which sometimes extend to occupit like electric pressure Pressure as with a finger, also < mental work, and m vertex, with sticking, > midday heat, with stitches in l. temple Pain, 1; 1 then heat in foresparks

Aching; in morning, > when fully awake, in even—statches in l. temple—Pain, l; l then heat in interpretation, into the head, with pain in it, uandering, always < at the belief, in afternoon, with heaviness and with statches in head, with pain in it, uandering, always < at the belief of the painting after sitting a long time | dimining | Compression, forenoon | Painting | Pai

Vertex -Statches extending to pharynx Pressure, forenoon, < r. side, extending to forehead and temples, extending over forehead and temples, < directing attention to it, and sudden stooping and mental exertion, extending to temples and occuput, with sensation as if head were pressed from all sides; extending to neighboring parts, < forehead and temples, < r side, with pressure often on r eyeball in region of superior oblique muscle, extending over head, the head seems pressed from all sides, < r temple, in upper part of brain, extending as a compression over skull Pain; bing, as if it would burst, on waking, consisting of in r side at noon; extending over forehead and temples. Biting

Sides -Statches in r., in r bone, in region of parietal eminences, in one half of brain, < r , in one half, as after taking cold. Pain, with warmth in head and vertigo Throbbing in attacks in one half of brain Drawing pain Cracking in I half of brain, with grating.

Occiput.—Statches, jerking in 1, pain in 1 Heaviness, and confusion Fulness

Scalp -Statches, < vertex, as if seated in bone

Eyes .- Swollen in morning and agglutinated, with puruin nose; with disinclination to mental labor, which lent mucus. Inflamed in morning and full of gum. aggravated the headache. Stupefaction; 7 PM, with Stitches Pressure. Heat, with feeling as if their surfaces were dry and rough, then lachrymation, then ness; morning on waking; 6 PM, with pressure and heat about eyes Lachrymation; of r. Sensation as if ball were drawn backward. Pupils contracted, and mental work, with pressure on vertex Rush of blood; immovable; dilated. Lids swollen, bluish-red, I then at noon during the heat, > in evening while walking | r, cannot open them, half-open in morning, eves in cool air, with pain, 3 P.M., > 7 P.M. by nosebleed, turned downward, pupils dilated, stupid drowsiness; with stitches; and to nose, with full sensation, and trembling of r lower; agglutination after sleep, inner to chest; and to chest, on earnest thinking, with surface and ball covered with yellowish, purulent stitches in r. chest. Vertigo (Tanac.); in morning; mucus and bloody fluid, pressure on lids brings out forenoon; after eating (Petrol); after coffee; on rising blood or pus, oozing of blood on screaming and coughing , dried pus in canthi and on margins ; canthi full swelling of cheek and salivation; jerking through of matter in morning , pain beneath upper on moving roots of hollow back, with digging, and with heaviglands Congestion in white of r inner canthus

through nasal canal into nose Pressure in orbital region, pressure in orbital region, sensation as if ball were compressed from all sides and obscuration of vision (Nat m) Sensitiveness to light Weakness in morning, by the light it seemed as if rays of light passed from the eyes to the flame Blackness before eyes Vision dim, with chilliness, obscured at side if vision is fixed upon a white object Flickering

Clinical.—Various forms of inflammation, ophthalmia neo-natorum (purulent ophthalmia), keratitis, especially of the pustular variety

Ears .- Stitches, < stooping, with all humor about trifles; from tragus into meatus, in region of r. tragus and spasmodic sensation, sometimes extending into auditory canal, above l; in meatus, in r meatus, from tragus into external meatus, with contraction, in r mastoid process Tearing; (in r lobule) Pressure in middle on stooping, as from a blow Sensation as if stopped, and as if a bird were rustling and scratching in them Dulness before ears in evening Intolerance of music Ringing in r, with statches in r. tragus, extending into meatus Roaring, afternoon; in r., with ringing, as from rushing of water

the patient frantic

Nose.—Ulceration of nostrils Pressive statches in bones Dryness, in morning and stoppage, tension and heaviness, and pain on border of I wing on touch, as if a pustule would form Heat, > bleeding, with dryness Fulness Stoppage, with heat in it; stoppage, with mucous discharge, with rush of blood to it, with sensation as if he would have noschleed Crawling; with lachrymation; in r nostril at 10 AM, as before coryza, in forenoon, with fulness. Irritation to sneeze, with crawling, dry heat, stopped sensation, feeling as if coryza would appear, also with pressure in forehead Sneezing; in evening Coryza, thin, fluent. Bleeding, in afternoon, from r nostril, with increase of inflammation of l wing Sensitiveness to all smells (Acon ). Offensive smell to beer

### linical.-Nasal catarrh, with mability to sleep

Face.—One cheek red (Acon ) in paroxysms Puffy, Inps crack (Nat m ) and peel (Puls.); crack in middle of lower (Nat c); scabby ulceration on borders, dry, dry at night and sticking together, without thirst Stitches in jaw, extending into inner ear; inr joint, extending into upper back teeth, pain on opening as it masseters were cramped, extending into teeth; heaviness, with burrowing in alveoli; heaviness of lower at 1 PM Weak feeling in muscles of mastication, with inclination to hold mouth open and with

forth, extending to eye, < drinking cold water, with at night).

eyes and on shaking head, sore feeling in outer canthi, ness of upper alveoli. Tearing evenings, < tea, with with denuded sore lips Dryness of Meibomian restlessness and heat in face, towards ear, with swelling of cheek. Digging in back, < lower, with press-Conjunctive swollen and dark red Statches in ure, in roots of lower back Boring in morning on orbital region; r, after waking, and in eyes, with pain waking, with digging, in roots of back, with digging, as if pressed with fingers, in upper and inner part, in roots, < hollow ones, momentarily > cold water, then <, with digging Aching in second and third back in afternoon, A after eating and drinking; while eating; after uarm food, in l. upper after warm food (Puls.); in diseased I upper back during breakfast; (in warm room), < after warm drink (Puls.), < coffee, < night, when they drive one to the borders of distraction, with thirst and redness of one cheek and hot sweat on head (Acon.), of l lower canine and incisor next to it, < touch of tongue, in l. upper hollow back, > dinner, < suppor, with swelling of cheek; as from exposure to cold air when sweating, as if something scratched the nerve, from 3 to 7 AM, then jerklike stitches, pressing-asunder, throbbing, in second and third r lower molars, < pressure, > cold water Drawing pain; after enting and drinking; in indefinite teeth, > eating, < night, with feeling as if teeth were too long; in lower, towards the front, grumbling Grumbling in upper, with crawling. Sensitiveness to touch; < hollow back; < hollow upper; in I canine and first molar of both laws Throbbing in roots of back, < r upper Sensation in upper back as if they were heavy and dragged downward Distended sensation

neatus Koaring, afternoon; in r, with ringing, as in roots of upper back, in morning, with heaviness Cumor risking of water

("Intelal.—Earsche, with screeces, swelling and heat, driving, with redness, easy bleeding and pain on pressure, with redness, easy bleeding and pain on pressure, sensation of swelling about some of the molars

Alveoli -Stitches Burrowing in some molars, with heaviness, seeming intolerable and making him peevish. Fulness and heaveness of first and second molars, with burrowing and boring in their roots and sensation as if the alveols formed hard, tense swelling Pain in r. upper; of upper second and molar; intermittent, of second and third upper molars, < r., extending into malar-bone, with feeling as if distended by wind Pressure, of second and third upper molars, extending to beneath eyes, at 6 PM, < lower, where it seemed to start from anterior foramen (mental foramen): of upper back Tensive pressing-asunder in upper, < second and third molars Throbbing and heat in A. and gum of upper back teeth at 9 A M., then about lower jaw, with boring and digging in roots of teeth, momentarily > cold water Heaviness; in upper, < r.; of lower, < in last molars

Tongue coated; yellow; durty white; with slime; blisters on and beneath it, with stinging, red, smarting on back and on palate, dry, with thirst for water, loss of appetite, flushes of heat, sweat of face and palpitation, then unnatural hunger Jerking from posterior end of hard palate to scalp Spasmodic drawing pain in palate towards fauces. Scraping-burning in back part towards noon Tickling in hard palate. Dryness in morning, with bitter-tasting mucus; in morning, then distention of abdomen and imperfect stool. salvation

Stitches in always glands Pressure in salivary Stitches in salivary glands Pressure in salivary Stitches in salivary glands seems plants. Stitches in salivary glands pressure in salivary stitches in salivary heaviness of lower alveol; intermittent, back and fat, to everything; sour; sour to bread; slimy; (putrid

Threat.-Spasmodic contraction of external ptervgold muscle; l. Sticking in parotid, r, with pressure, side himself with anxiety, moans and sweats. Indi-Pressure in parotid, with tension and salivation (Throbbing pain in submaxillary glands) Tough mucus, causing hawking Hawking of mucus and blood; offensive taste to what he hawks up. Stitches in tonsils; r.; with sensitiveness to touch. Pain, in sleep, with hardness, after eating, with tension; with l. side of fauces on swallowing, redness of velum and pain in fauces on pressure under angle of jaw : in back part. < moving throat and swallowing, burning pain in soft palate, with irritation to cough Pressure in pharynx, obliging frequent swallowing, P in soft sion of flatus which has the palate, with stitches Construction of pharynz, in drogen Emission of flatus morning and towards noon, afternoon, with stitches extending to base of skull; with pressure on hard palate, spasmodic Tension in soft palate, then spasmodic contraction in it; tension and pressure, with pressure upon uvula. Oppression

Soreness, with swelling of parotid, on swallowing, as from a plug Rawness Throbbing in back part Swollen sensation in tonsils, in morning, with difficult swallowing, with feeling of hardness and heaviness Food at supper seems to remain in pit, with fulness, nausea and eructations Uvula feels too long Tickling in soft palate at noon Feeling in resophagus Griping; after a glass of water, with rumbling. as if a ball filled with air were raised into throat by

contraction of esophagus, with anxiety

Stomach.-Appetite diminished; with pressure and ing; after morning coffee, with attacks of suffocation, 8 nence AM, after eating, after breakfast, with salivation, of abdomen, then by nausea

coffee Pressure after eating a little, at cardiac orifice in afternoon, not seldom extending to asophagus, < cardiac orifice, with spasmodic constriction; anxious cries about pain at pit as if it were pressed down, with

sweat: as from a stone

umbilical region, spasmodic, and above navel, rubbing spasmodic, and about navel, spasmodic, extending Statches above pubis, in r inguinal region, with along cesophagus to throat, with apprehension and sensation as if something would protrude, near r nausea after eating; extending into pharynx, with emission of odorless flatus; spasmodic, in lowest part

Clinical.—Various toothaches and neuralgies of the face, heaviness and tension, and with heartburn. Heart-Extremely valuable in the distress of teething children. hum Rurning in amorastrium with fulness. Coldburn. Burning, in epigastrium, with fulness. Cold-ness in epigastric region. Sinking at pit, he is begestion.

Clinical.—Gastralgia.

Abdomen.-Distention, in evening on going to hardness. Tympanitis in afternoon Rumbling, < below navel; with feeling as before diarrheea; with cutting as before diarrhoa, > pressure and rubbing; with pain and sensation as before diarrhea, > emis-

sion of flatus which has the odor of sulphuretted hy-

Sticking, and in anus, on walking, > pressure; while walking or breathing deeply, < in hepatic region, after dinner, with urging to stool, and stool, with urging to stool and passage of flatus, transversely across; before midnight, extending into chest, with thirst, into chest after starting as in fright, as from flatulence, extending into middle of chest Cutting rather than sticking, with salivation, C. before menses, with drawing in thighs, C in afternoon, extending downward into bladder, > emission of flatus and rubbing; on waking, extending deep into pelvis Pinching

Pain, in morning in bed, > doubling up; with rumbling, urging to stool, which consisted of dissolved faces, with rushing wind, the pain causing nausea and tension in stomach and nausea, which was > by sweat, < on face; intolerable at sunrise; intermittent, eating, lost, lost, but returned on eating Disgust with flatulence in hypochondria and stitches through chest; at food Shuddering when food is set before him. flatulent, flatulent, with motions of flatus as if it Aversion to animal food, (to broth) Unnatural would push through muscles, rumbing and grumhunger in evening. (Dearre for sauerkraut) Thirst, bling, pushing especially on abdominal rings, then emissin evening, with febrile heat and reciness of checks, ison of flatus, compressive; drawing Troubles as in unquenchable (Acon.) Eructations (Puls.), after constipation Tension, < above navel, with nausea. breakfast; after supper, with pain in abdomen, near Sensation as if hollow, with constant motion in it I anterior superior spinous process of ihum; of gas (with blue rings around eyes), when the attack occurs median like bud eggs (Sulph), sour, almost sour, atter in the evening it is associated with anxiety Coldeating, as after radishes, of burnt-lasting, salt fluid, ness, region of kindneys, extending over back, last-in afternoon, of food Hiccough. Nausea, in morn-ing between scapules, with stitches in r frontal emi-

Upper painfully distended in morning Nausea in with tension in stomach, faintlike, faintlike in pit of upper in morning on rising, causing anxiety, restlessstomach, > eating Vomiting, bilious, sour (sour ness and peevishness Griping-tearing in region of smell from mouth), of food, caused at first by fulness navel and lower down on index, with pain in small of back as if broken; cutting above navel after dinner. Pain Rumbling Stitches, in 1 side near pit; in pit above navel Gurgling in side extending into abdo-Griping in pit, inclined to extend to chest, in morn-men Sticking in r side, 1 while walking. Tearing ing on getting out of bed, pressure, warmth and in side as fiparts were rolled into a ball. Statches in bending double 'Pain; on r. side near pit, in jit on r. hypochondran, < walking and standing, in l on pressure; and beneath short robe, impeding breathing, < walkings, pressure and retracting abdomen. Tensive pain in hypochondriac region, with tension around brain and dry catarrh in chest Pressure in hypo-chondria and stomach after eating Pushing outward of flatus in hypochondria Sensation as if a hernia would protrude in hepatic region while walking; Constriction. Oppression; in pit, with pressure while sitting, > pressure and rubbing, below anterior Tension, and in esophagus, and in margin of liver while walking at noon, > pressure and

nausea from profuse sweetish saliva Drawing, with ilium after violent running, near ilium, < 1, when pain and heaviness as if distended by a hard body. walking, < after eating, > pressure or bending far Heaviness Fulness; after eating; while eating, with forward while walking. Cutting deep in pelvis, > per, near r and l anterior-superior spinous process Brused pain in lower muscles after breakfast Dragging towards ring as if a hernia would appear. Uneasiness along crest of ihum on motion, with pain

Clinical.—Flatulent color Colic, especially after anger, with red cheeks and hot perspiration. Indigestion produced by anver.

Rectum.—Sticking after stool Urging to stool in morning on rising, after eating Blind hæmorrhoids , tendency to , bleeding (Puls ) Itching pain in anus

Stool.-Duarrhea, nightly, with colic so that she must bend double, hot, smelling like rotten eggs; green, watery (Puls, Grat, Mag), painless, consisting of fieres and mucus, white, slimy, with colic, watery, also with colic, painful at night, with nausea, with pain and passage of wind Hard, and sluggish Constipation from inactivity of rectum Diminished Dark Light-colored, with griping Faces coated with mucus, with mucus between the fieces (Graph ) (Undigested ) Like those of a healthy baby, bile increased

Clinical.—Duarrhea, green, almy, mucous, chopped, white and sellow mucus, often of a changeable color, often undugested; often like chopped eggs and spinach, nearly always of foul odor, especially in children during teething or after taking cold, associa-ted with color, often with sorteness of the annual color, associa-ted with color, often with sorteness of the annual color.

Urinary Organs -Sticking in neck of bladder when not urmating Burning in neck of bladder when urmating Micturition in a weak stream, involuntary M Biting pain in urethra when urinating Urine increased

Sexual Organs .- Stitches in "bulbo-cavernous" muscles, itching, on margin of prepuce Itching of prepuce and glans Soreness on margin of prepuce Erections, in morning in bed; violent, violent in afternoon Itching of scrotum Desire (later action) Emissions nightly

Female - Smarting-burning in vagina. Acrid. watery discharge after dinner, yellow, biting leucorrhea Discharge of dark blood from a newly-born girl Drawing from anterior part of small of back, griping and pinching in uterus, then discharge of large clots of blood. Dragging towards uterus like labor pains, with frequent urging to urmate Profuse discharge of clotted blood, with labor pains in uterus and tearing in veins of legs. Metrorrhagia, even in old people Suppression of menses, with swelling of pit of stomach and pain as if it would be pressed down, swollen abdomen, labor pains and anasarca

Clinical .- A very valuable remedy for uterine hemorrhages Clinical.—A very valuable ramely for uterine hemorrhages, the flow is irregular, dark and clotted; sometimes there is con-stant county of dark, foul blood, with occasional bright gushes the result of agent. Bevere pains following labor, septenally if they extend down thighs, with great nervous exclement Threatening measurings from fis of anger During labor the patient is intolerant of the pain, the one is rigid and the pains extend into the thighs. Purperal convisions after anger, one sected into the thighs. check hot, the other pale. Suppression of milk from anger. Inflamed breasts

Respiratory Organs .- Tickling in afternoon, with irritation to hacking cough Larynx raw, and scraping, oppression in region, with constriction, tickling in morning, with hacking cough and expectoration of arresting breathing; flying, in cardiac region and exclear blood; irritation to cough, with sweetish mucus, tending, now shooting, now drawing, now r., now l., which rises from trachea into larynx, but is involun- down legs to dorsum of feet and ankles, then back to r. tarily swallowed, feeling as if a fluid would rise out shoulder or hip or I side of head. Nausea. Sinking of it, burning Hoarseness, on account of tough about. Rush of blood. Palputation.

of abdomen in morning. Pain above pubis after din- mucus in largnz, which is only detached by molent hawking; catarrhal, of trachea, with dryness of eyelids Trachea, whistling, wheezing and rattling when breathing, mucus, with rattling respiration; rawness in upper part; pressure unth projection to cough (Acon ).

Cough at night from virilation low in trachea, in a paraxysm at midnight, with which something seems to rise into throat, as if she would sufficate; on account of rattling mucus in upper part of trachea, with pain in place from which the mucus was detached (when the child is angry); dry; dry in sleep; dry on account of itching and tickling in trachea behind pit of throat Expectoration of blood after tickling in larynx and trachea Moaning and groaning Short breath after a short, rapid walk, with palpitation and small, hard, rapid pulse; and croaking, and deep, with heaviness of chest. Rapid breathing.

Clinical.—Catarrhal largettis, with hoarseness and rawnees may be a compared to the compared t

Chest.—Scirrhous hardness of mamme. Rattling in r in night on waking, > hawking of clear blood. Jerking in 1 pectoralis major Stitches, in r; in inner part of r , r , about nipple , in r , near sternum ; near r side of ensiform process, in r nipple, anteriorly in region of r fifth rib, also in evening, < deep breathing; in cartilages of r sixth and seventh ribs, in streaks along l ribs, above nipple and around it then above heart, and in anterior half of seventh and eighth ribs, above 1 nipple, below 1 nipple, in 1 lower part, anteriorly on 1 lower part, in cartilages of l sixth rib, to l. of middle of sternum, beneath ensiform cartilage, somewhat to l.; above heart, deep above heart during the day, < morning, in r half at 11 AM, r half in forenoon; beneath ribs and scapular when breathing, through chest on every respiration, from middle towards r side after every expiration. between l nipple and sternum on inspiration

Tearing in clavicle and neck. Pinching transversely across upper in evening Pain beneath sternum, under l'clavicle after long sitting; on r. side after long stooping, then in 1, then farther backward; beneath sternum, impeding breathing; drawing, in r or feeling as if repeatedly drawn inward, tensive, across chest on inspiration; burning, from beneath sternum to mouth Pressure above r nipple, below r clavicle, and sticking in small of back striction, on level with nipples; in upper part, which hurts on coughing Suffocative tightness, constriction of laryax, in region of pit of throat, irritation to cough (Puls, Sulph). Oppression; in morning, at 11 A.M., while sitting, pain while walking, as from flatus in upper abdomen, with pain, and with pain in stomach as in beginning of heartburn, then burning in spine. Contraction Internal soreness, as if bruised Irritation to cough beneath upper part of sternum, without cough Burning, with dulness of head, as if he did not know where he was, with anxiety. Rush of blood

Heart -Statches, above r ventricle, during motion,

Pulse.—Rapid; and irregular; and small and tense | other, in morning; D. and tearing, < along r. forearm Hard and full in morning on waking. At one time into wrist, with feeling in forearm as from pressure on strong, at another small and weak, also irregular as to nerves. Screness of all joints as if bruised and tired out frequency. Small and soft: small in morning and (Arn.), no power in hands and feet though unthout ordieasily compressible.

Neck.-Statches near ear. Pain behind I. ear. rheumatic pain in muscles.

muscles)

Back—Statches; forenoon, towards evening; on or dorsal surface of metacarpus or lower half of bones spiration; on 1 side. Tearing, drawing. Pain; of forearm and leg, < on their dorsal surface inspiration; on 1 side. Tearing, drawing. Pain; afternoon, 11 P.M., on long sitting; drawing. Brussed sensation in muscles of back and loms; B pain in mornimotion and going into open air, with heaviness and ing on waking; on lying down to sleep, with drawing with drawing pain in shoulders and ankles, and espealong nerves, extending into pelvis and parietes of abdomen; < stooping Fulness after eating, with in forenoon, with wandering tearing in r upper arm,

cucullaris muscle; jerking, in region of r scapula in would freeze evening Pain in r scapula while stooping, in r

in intercostal muscles

Lumbar Region --- Stitches: r Pain in afternoon Armi—blease and a second of the second of th broken, with dragging and drawing pains extending ligaments and periosteum, from shoulders to fingers, from hepatic region over abdomen deep into pelvis after midnight, < later in night, > lying on paintul Funed feeling, also after stooping, on lying down to are Paralytic pain along nerves to finger-tips, in sleep, with drawing along nerves extending into pelvis muscles, < fickors, and extending along nerves extending into pelvis muscles, < fickors, and extending along nerves into and paraster of abdomen, with drawing and pressure in the data, alternately in both arms, at one time in median, extending into walls of abdomen, extending with at another in ulnar or radial nerve Stiffness as if it drawing over walls of abdomen to inguinal region. would go to sleep when grasping anything Going to Drawing pain when stretching on walking Stiff pain sleep of 1; going to sleep on grasping anything firmly after sitting Weakness

Extremities.—Cracking of joints, < lower, with bruised of legs and hands Statches around joints, < shoulders bones would appear Tearing, > tossing about in pressure on ulnar nerve Paralytic drawing extending bed, in joints, < of arms; wandering; < arms and along nerves, with sticking legs, now in lower, now in upper half of fibula, then bones and < along outer side of radius, then pain in with drawing Pain in 1 above wrist, drawing, intearing jerks in shafts of bones or in tendons

stitches about joint seem intolerable and make him Spasmodic feeling in I flexors as if asleep peevish; paralytic D. pain in various joints, in elbows, Wrist—Stitches in vicinity; in I; from r to midpeevial; paralytic D. pain in various joints, in elbows, "Wrist.—Statches in vacuuty; in 1; from r to mid-wrists, knees, extending thence along bones, then die of forearm, with paralytic pain, drawing, extend-weakness. Drawing in articular ends of long bones, ing in part along netecarpal bones into hands, in part with digging; D. m joints, jumping from one to an- along inner surface of radius Pain, drawing.

nary weariness Brussed feeling; in joints at 7 P.M. < r wrist . even in bones, with statches in ulns and (Tensive stiffness of tibia, which seem to start from joints; preventing sleep Paralytic pains in volar surface of metatarsus

Weakness, sudden, of joints, in forenoon, < rest, > anxiety and tearing, afterwards extending to abdomen. I leg, back, temporal muscles, finally scated in l teeth; Contractive sensation in spine Statches in r on waking, with general weakness; with yawning and scapula; in region of r; between r. and spine, in r. sleepiness Numbness of hands and feet as if they

Upper Extremities -Stitches beneath r axilla. like acromion Bruised sensation in rhomboid muscles electric sparks in I shoulder, extending into muscles of scapulæ, B pain between scapulæ, < stooping, and of nape Pain in r shoulder joint in afternoon, and at

times in its vicinity,
Arm.—Statches through r. into shoulder; along Pricking, numb feeling, waking at night.

Upper Arm -Pain in r. and in shoulder-joint pain in joints Jerking on falling asleep. Trembling Brused pain in r biceps and brachialis, < pressure Elbow -Stitches in r , 1 , 1 at noon , on outer side and ankles , around joints, < r knee, in joints, extend- of l in afternoon , in r. in forenoon, with jorking-biting, ing into bones; in ankles, knees and wrists, extending and along ulnar side of forearm Pain in r, below outward and downward into long bones, deep in internal condyle, as if ulner nerve were compressed, joints, usually with paralytic feeling, in arms and legs, as after carrying arms bent, < extending arms. Drawfollowing the nerves, with weakness, paralytic, from ing and paralytic pains and in hands Paralytic feeling joints along long bones, > rising; wandering, in joints, in region of head of radius and of tendon of biceps, extending into long bones, with feeling as if pain in extending into middle of upper arm, in r, as from

Forearm -Statches on outer side of upper half of r : along tibia, now in metacarnal, now in metatarsal through middle of dorsal surface of r., along ulna, knees and elbows, along flexor surface, in tendons and ternally from elbow to finger-tips late in evening; in bellies of flexors, < stretching joints Drawing-bruised, in muscles, < l. Paralytic pain along r. radial nerve, < lower half, in ulna, extending to tip Pain; in knees and elbows, I forcarm and r. leg, of little finger; as from pressure upon radial nerves, in personeum, with paralytic weakness, wandering, < at also extending to middle of hands. Feeling as if too the beginning; in joints on motion, as if they were stiff short, and on bending hand backward pain in arteries and would break, rheumatic, in bends of knees and on flexor surface, < below styloid process Arteries elbows Drawing pain now in fibula, now in ulna, feel too short, < radial, with spasmodic pain, ulnar, extending from joint above; the drawing pains and with pain in arteries on bending hand backward.

feeling Pain in I, burning, in afternoon. Drawing heaviness statchang

Fingers -Stitches in r index, in third joint of r. surface of 1 little, in thumb, in first joint of r thumb. Going to sleep in morning

Lower Extremities .- Drawing and tension in joints.

knees Weakness, and heaviness

Thigh -Statches above r gluteus maximus, in r nates, deep in 1 nates, along 1, lower half of r, in above malleoli outer side below nates, on outer side of lower half of Gnaphalium )

Knee -Creaking on motion, with cracking. Giving I while sitting. way at 7 PM on walking Spasmodic contraction in of r, outer side of r, outer side of l, and in neighboring parts of thigh, near patella, deep under great toe patella, in l patella, in inner side of patella and in several places in joints, now 1, now r, now both, with pain in popliteal artery as if too short; on outer side of r in morning, in anterior surface of r on bending it Feeling on inner side of patella as if a blunt plug had been forced under it, < r side Drawlate in evening, spasmodic contracting, in r popliteal artery, as after a fatiguing march Feeling as if articular surfaces were separated, r, then l.; on walking Tension Feeling as if popliteal artery were too short while sitting Sensation in hollow as if an artery

side below I knee on walking, on outer side of r. ling calf, extending downward into leg Pain below head parts, I. of forehead, nates; sole. of fibula at 5 P M , as from pressure on ulnar nerve at elbow, extending downward, < lower half of r leg; without sleepiness, with gay activity, incomplete. On pain in peroneus tertius (?) as after ascending a moun- waking always found himself lying on r side, with tain, with pain along extensors of l. foot, then pain hand under head; on r. side, with legs drawn up or along nerve peroneus extending to middle of thigh, on r half of back; on back or r side. Sleepiness;

Hand.—Swelling of veins on dorsum Stitches in in metatarsal bone of l. great toe, which feels asleep hall of l. also at 10 Pm. on inner margin of l: in dor- and constriction above ankle Pressure below head sal surface of r, on dorsal surface of l, then r; on of fibula; as from pressure on a nerve; upon pero-dorsal surface, between l thumb and index, in meta-neal nerve below head of fibula; along peroneal carpal bone of thumb, in metacarpal bones, < r and nerve, with crawling Bruised pain in muscles; pero-< dorsal surface of fourth and fifth, with paralytic neal Feeling as of a broad bandage, < sitting, with Tension in calves. Paralytic pain on in metacarpal bones, < interesseous surface, with anterior and inner side, in peroneal muscles, with bruised feeling, P feeling beneath head of r fibula, extending downward. Pain as after an exhausting index, third phalanx of r index, in little, on dorsal climb, feeling as after a long march, > motion Necessity to stretch to get rested, Weakness, in muscles of about first joint of r thumb in afternoon, in flexor calves in morning; with inclination to stretch them. surface of second phalanx of r thumb; in first phalcave large in inclining; with inclination to street attein
any of r thumb, extending forward from upper joint ness of it and of knees, C, gone-to-eleep feeling in I.
Stucking-perking in first joint of r thumb Pain in calf Pricking in calf, with statches, wearness and
tip of I ring, sprained, in thumb and index on motion
heaviness in muscles

Heaviness in muscles of calves while sitting, with tingling-crawling Falling asleep while sitting, feeling as if they would fall asleep

Ankle -Stitches in 1 Tearing during rest Sprained sensation Constriction as of a band, of extensors

Foot-Sudden swelling of one and of one sole. r, also on bending leg, on outer side of 1 in evening, Spasmodic contraction of soles Stitches on outer with difficulty in walking, in forepart of lower half of margin of 1, in soles along metatarsal bones, 1 sole 1, upward in l. Tearing, and in legs Pain, on post along first and second metatarsal bones Tearing, terior surface of r when walking, on posterior part with intolerance of bed-covers Pain in middle of I of r while extending leg in walking, < inner side, in sole, in heel, as after long standing and as if os calcis hips, indescribable, on rising from a seat and when would push through skin Sprained pain in hones, lying if stretched out, in hip-joint as if dislocated, in in soles while lying Itahing pain internally in side evening on walking after sitting, bruised, bruised, on of heel Necessity to draw up on account of pain in anterior surface on walking, with weakness; tensive, in calves and knees, on stretching out they fell saleep r while bearing weight upon leg with knee bent, par Spasmodic sensation in muscless of soles Drawing in alytic, on outer aide of r Paralytic stiffness, with I sole Weakness; nightly paralytic, with drawing wearness like a bruise (Compare hip and thigh with Paralyzed sensation. Going to sleep, while sitting,

Toes -Spasmodic contraction, with tearing in limbs. muscles, as after a fatiguing walk Stitches; r., then Stitches in 1 second Bruised sensation in bellies of 1 , r., and in hip , r , and in 1 ankle , on inner side long flexors, as from a long walk. Sensation while sitting as if they would bend under and go to sleep, <

Skin.-Wrinkles in forehead above nose node beneath nupple, painful to touch, with at times drawing tearing Eruption, slightly elevated, on nape, with biting, compelling scratching. Red spots covered with miliary pimples (Arnica) Red rash on cheeks; and on forehead. 'Edematous, unhealthy, injuries tend to ing tearing extending to ankle Pain, tensive, in suppurate Pimples, red, on back, red, crowded into hollow on stretching, drawing, extending through leg a red spot on lumbar vertebrae and on side of abdomen, they itch, < night, with smarting and with shuddering about the spot, < evening Inflamed pustule on margin of ala nasi, pustules on face, itching on touch Ulcer surrounded by red arcola and itching. burning and biting pain in an ulcer at night, with crawling were swollen and painful Weakness and hypersexthesia to touch (Sulph); jerking and stuck-Leg—Gramp in colves; night in bed when stretch-ing pain in an U, (previously existing U became ing out feet, > bending knee Stutches below head of painful); (on foot, with rediness around it, swelling fibula, r, in middle of forepart of r. leg; on outer and bruised pain) Sticking, > scratching, with prick-Biting on various parts Itching of sweating

Sleep .- Yawning; in forenoon, with desire to stretch; < at lower part of interesseous ligament, with stitches during the day if he sits down, but inability to sleep if he lies down; while eating. Difficult and late waking; from back to abdomen, between scapulæ; in mornit-from an unpleasant and dreamy sleep. Late falling on waking till 9 o'clock, < lumbar vertebrae. Saleep on account of unpleasant thoughts. Sleepless—Heat, in morning offer offer, with secat, counting o ness and attacks of anxiety, with vivid fancies; S till bitter mucus, then bitter tasts, veckness in head and nausea 2 A.M. on account of painful weakness in lumbs, heat and from 9 A.M. till noon; at night, with sleeplessness; at restlessness. Frequent waking in sweat, which ceases on waking. Weeping and wailing Starting up, crying out, tossing about and talking. Talking unintelligibly, directing that obstacles be removed Moaning. Groaning, with hot, clammy sweat on forehead. Snoring inspirations, which are shorter than expirations, with open mouth and hot, clammy sweat on forehead Restless, with frequent waking and difficult falling asleep again Oppressive, his face looks fretful and sad Unrefreshing Dreams, towards morning, with emission, frightful; anxious; quarrelsome, vexatious; very dry; flushes of dry, over head and trunk; burnfantastic: vivid.

#### Clinical.—Sleepleseness in children.

Fever.—Chilliness; at 4 PM., during which he said things which he would not have said, with nausea in 1 foot, with sweat, then general sweat, burning in soles abdomen lasting till 11 p.m., then throbbing-sticking at night (Sulph), burning and itching in feet as after in forehead, < lying, in evening on lying down, with which sounds seem to come from a distance, nausea. uncasiness, tossing about, stupefaction of head and dead feeling in skin when scratched; in evening, at night sweat and thirst; on uncovering, on going to below temples, on face, neck and hands; on palms. sleep, (after eating, then heat in cheeks), over whole body, with heat of face, which comes out of eyes like fire: (with necessity to lie down, thirst during chill but not during heat, after heat sweat with sticking in I half of brain, next morning bitter taste), alternating with heat; (internal, without external coldness, except cold feet, with thirst, then heat and sweat, but if she puts an arm out of bed chill, and if she covers it in bed sweat, with tearing in forehead)

C ın varıous parts, alter-Chill on anterior part of body nating with heat, at one time hands cold at another warm, at one time forearm at another upper arm cold, at another warm, at one time forehead cold and cheeks hot, etc (Acon) Cold limbs, with heat of face and eyes and hot breath, cheeks, hand and feet, with heat on forehead, neck, chest, then heat and redness of r. cheek, in dorsal vertebræ, whence shivering extends over body, in region of kidneys, with attacks of shivering, creeping, in back at 11 A M , internal, in lumbar region, with general shivering, internal, in lumbar vertebra, extend-Hands, ing over abdomen, with shivering along spine with cold sweat on palms; hands, with paralytic stiffopen air, fingers, and they are inclined to full asleep, feet, evening on going to sleep.

Shwering in cold air, S. if he uncovers; with internal head, sides of nose and in upper jaw

Heat, in morning after coffee, with sweat, vomiting of night, with restlessness, at night, with unquenchable thirst, dry tongue and stupefaction, before midnight when lying on back trying to sleep, with sweat, even in lightly covered parts, those not rovered almost cold, dry; internal, sensation of external without external heat; external, with intolerance of bed-covers; flushes over whole body In head; with confusion, with heaviness, < occiput; head and face; rushing over head and face, in head and face, with rush of blood and feeling as if sweat would break out while the skin remained redness; in r cheek, rising into cheeks, in cheeks in evening, with flying shivering Of ears Of hands In freezing

Sweat, in morning; (in morning, with biting in skin); at night from 10 to 3, without sleep; on slightest motion, with weariness; sour, on covered parts, <

### Chelidonium.

A tincture is prepared from the fresh plant of Chelidonium Majus, Linn.

General Action.—The most prominent action of Chelidonium is upon the liver Symptoms of inflam-mation, of jaundice, of disturbed function of the bowels and kidneys and sympathetic affections of the right lung are numerous and well marked See also the symptoms in joints, skin, etc

Allies - Caulophyll, Podophyll, Mercur., Bry., China, Mag c, Bap, Phos, Lyc, Puls

Generalities.-Emaciation Recling as if she would fall forward, without vertigo. Trembling of whole body. Stretching. Twitching, now and then on various spots, in head, clavicle and limbs; of arms and legs, and in head on moving arm, on inner side of thigh, in feet and in back Rising in anxiety and tearing clothing from neck and chest Crying as soon as l leg is moved or l side is touched

Stitches here and there, in afternoon; in pit of ness in them, confusion of head and sensitiveness to stomach, then in back, then in I cheek-bone, then r, extending to temple; beneath r scapula, then in permeum and testicles, and again in r shoulder Tear-Shaking chill in afternoon, with flow of saliva from ing and sticking here and there, extending downward, mouth, bruised pain in back and side and pain in < in r log Pain < afternoon, when it is spasmodic. forchead, then heat at night, thirst and sleeplessness | Wandering pains in all parts, in upper limbs, in forc-Burning pain heat; with external heat; creeping over whole body, in spots on shoulders, trunk and arms Bruised pain extending into limbs, with increased urine, weak and on moving about, B as after a long march Rheuon moving about, B as after a long march Rheurapid pulse, then warmth in whole body, beginning in matic or bruised pain in morning on waking, at nape head, with shivering in body and external coldness, and anterior part of neck, in shoulders and arms, R. then sweat, on posterior part of body, of arms, of thighs pain now in r, now in 1 upper part of body, drawing and of back, in paroxysms, with external and internal dry R pain now here, now there, and in r upper half of heat, < forehead and face; in some parts, in face, then on body, in shoulders, arms and wrists Drawing pain arm, soth and suthout external codiness; on single parts from upper jaw to 1. nostril, 1, to ye, 1. meatus, term which are not cold, with sleepuness. In back; at 7 pie, 1 half of neck, 1 esepula and 1 ankle, in whole P.M., with bruised feeling in peroneal muscles : creeping | body, with fluent coryza | Drawing through whole body; over back and abdomen, alternating with heat; in thrills towards noon; in head, teeth, laws and shoulders.

F General sick feeling Affection as after a severe ill-|heaviness of occiput, which seems fastened to pillow

baless General sensation as m influenza Discomfort; if she attempts to rise, > rubbing soles growthout knowing what is the matter, necessity to lie down, inability to sleep and discontentment with everything. Excitement of whole body; from 10 to 11.30 PM Internal uneasiness, muscular U in evening, alternating with pains in head and chest Must be carried constantly

Horror of morement Inclination to he down (China) Weakness (China), in morning, in morning after unchest and shoulders) Amelioration from eructations, internal heaviness. from a light-colored, pasty stool

sition to make any effort (China)

is coming Frettulness, in afternoon, on waking, chest, as if tightly bound; confused, in morning faction

Anxiety, in morning, with uneasiness, on waking Intoxication desire to etuctate, at might about death and being a before menses; with nauses; with faithness; even to soldier, after rising, till evening; > open air, with falling forward on rising from bed, as if everything trembling, vertage and heat of head, at every slight, were turning in a circle on closing eyes, as if turning noise, with trembling of hands; with twitching of in a circle, with shivering in upper part of body and away Uneasiness, with willingness to die

Anger, outbreaks of, feeling as if she could beat to temples, < moving eyes. the children, and trembling from rage because she Apathy much Excitement Absence of mind Forgetful as to what she had done or was to do Unconsciousness at night on frequent waking, with over I eyebrow, extending over r., in middle, extend-

Clinical.-Low form of delirium, quiet in character, with the USESCENIA—Low form or desirum, quiet in character, with the peculiar pneumonia of the drug. There have been some curse of melancholia sesciated with enlarged liver and paradica. The mental condition as generally heavy, letharge, disinclined to mental effort; convulsions associated with disturbances of digestion. Patentia tolen feel as if they had committed a crune, or that they will go crazy, or they become very forgetful, etc

Head .- Trembling Inability to raise it in evening easy sleep; in morning on waking, also with sleepi- on lying down, and necessity to lift it with the hands ness; in afternoon, at 2 r.m., with indolence and Stacking, when coughing. Tearing; sticking, here yawning, at night, with pain in kidneys, after din- and there Aching, on waking after 4 AM; on ner, when walking, when walking in open air; when rising, also > breakfast; in forenoon on entering sitting, with sleepiness, with inability to sleep Indo-house, towards noon, in afternoon; towards evening, lence, > open air, with prostration and sleepiness; I, with with chilliness; in evening, at night, with pain in l. sleepines without vaying, of whole body, with uneasitemple; on rising; < afternoon, and extending to ness Faintness, in evening on undressing, with anx- occiput, > evening by a nap; > closing eyes; > nety in chest trembling and short cough; on rising rubbing soles, with throbbing in temples, with throbfrom bed Heaviness, after eating, with disinclina- bing in r temple synchronous with pulse, as if overtion for work and sleepiness Numbness, with drowsi-distended with blood, with twitches here and there ness, N in muscles of hepatic region and in 1 side of in it, as after intoxication, contractive, rheumatic neth, fuce and head, (and insensibility, as from apoplexy, with trembling) Symptoms generally return outward, < towards forehead, < open air, coughing, at noon after cating (except the chill, instead of which blowing nose or stooping, but not while eating Feelthere was internal heat, with internal burning between ing in morning as it surrounded by a band, with

Dulness from 3 to 3 30 PM, with rapid pulse Confusion, in afternoon, with vertigo, on waking from Clinical.—Great lethargy, debility, weariness and indispo- nap after dinner, with heat in head, < towards evening, with sensation of a lump in brain, < 1 side of forehead, extending to occupital protuberance; > after Mind-Weeping mood, about the present and shivering; with heavy pain about forchead; as after future, crying at night when taken up and carried, alcoholic stimulants Heaviness, in morning, on crying all night, < when taken hold of Hypo-waking, in brain, in middle; extending to r. side of chondriac mood Sadness, thinks she has ruined her head, whence rheumatic drawing extends into r side of health by the proving Fear at slightest noise, as if neck, then through arm into wrist, affecting injured he had not a good conscience, or tear that pneumonia fingers, and rheumatic drawing in flesh of r side of

with red spots alternately on both cheeks, about every Violent throbbing in arteries, with pain extending trifle, without knowing what is the matter Dissatis- over head from one ear to other and photophobia Rush of blood, and to throat and upper part of chest Vertigo, in morning after rising, with at 4 A M, at 6 P M, with trembling of limbs, in even-confusion; at 6 30 P M, after dinner; on sitting up in ing, at night, with fear of death, and with ineffectual bed (Bry), on rising, with nausea and salivation, lumbs; with uneasiness and palpitation, with oppres- unconsciousness, as from drunkenness, from 6 to 9 sion, with constriction of chest, trembling, sud- | PM, with nausea, warm sweat on face and internal den, with palpitation, in attacks, with nausea and and external heat of throat and chest, as if it moved retching, in attacks in room, with sensation as if forward while the occuput remained lying held firmly sweat would break out on forehead, as if she had by the neck, when raising head in night on waking committed a crime, on account of which she must run Waving sensation in brain, after drinking white beer, with heaviness in forehead and top of head extending

Forehead -Sticking; in middle; in r.; above 1 has no reason for doing it Quarrelsome mood eye; in bone above Leye, then in i side of occiput, Obstinacy. Silent mood Inclination to talk too above leye, with twitching of lids, under skin; itching, in middle, transversely across; between eyebrows, extending into r eye and I temple and above I. ear; Stupefaction, at might, with vertigo Difficulty in tearing, in 1 eminence. Tearing in afternoon; T. thinking, and it seemed as if she would lose her real above r eye, above l. eye, above l. eye, extending son. Confusion of ideas, as when half asleep, > to into eye and lid and root of nose; between brows, wards 3 o'clock, then pain in lumbar region till night which tends to press lids together, > eating; suddenly

ing over vertex, at noon after dinner, > pressure. | l side to foreleand; pinching, in r.; pinching, externexNeuralgic pain above eye (Nat. m), < reading in evenin l. Tearing in r. with stitches extending forwards
ing by artificial light, N, pain over leyelrow Achiclose to lear, extending forward. Pain; from morting; in morning, < root of nose; at 4 A.M., and in lng till noon; at 11 r u; at night; st might, wakur
cocquit; towards evening, and in occupit; towards her, with chillness, at 6 r w extending around to. evening, with sticking in 1 side of forehead; in r. side; over r. eye (Cedron), over l. eye (Bry.), in l. side from afternoon till going to sleep in evening, in upper part of bone, in direction of parietal bone in evening; in sinciput, > walking in open air. extending to orbits, which on moving eyes are painful as if sore : extending into nasal bones : over r. eve. extending to occiput; in I side extending to I temple, extending towards both temples, then to occuput also, side hard stool. Pain in r. side as from a blow. Pain as if Congestion of blood. brain would fall out in afternoon on stooping. Sensa-tion as if screwed together from both sides. Pum as from a band (Carbol ac ), after rising till towards noon: > closing eyes; lasting till noon, returning at 7 PM, and in temples, above eyes, about anterior lobes of Sensation above forchead and on occiput as if hair cerebrum Drawing pain over l eye Drawing beneath bones Dragging in cerebrum as if there were not room enough for it in the skull and it would press out through the ear, in which there is a noise as of a r side of occiput at 5 PM, > scratching.

P.M., periodical, dizzy, as if brain would fall out there
Temples—Twitches in Sticking in r in bed, ying on affected side, reappearing when he turns on other side, S in 1, with jerking pain; in 1. after a sensation as if blood suddlenly stagnated, twitching. Tearing, in r, < touch, in r, then 1, in r and in eye, then in 1 eye extending to 1 temple. Neurrigic pain in 1 eye extending to 1 temple. Neurrigic pain in r Pain, in evening: in home behavior. in r Pain, in evening; in bone behind ear (Caps), r, r parietal bone, then over r eye; < 1, in r, with stoppage of r nostril, in r, extending into r half of forehead; in r, extending to vertex, extending upward, head is confused Drawing. Tension in r, extending into r half of forehead Compression Throbbing; in arteries, with headache, synchronous with pulse at night in bed before sleep, with sensation as if blood were rushing to throat and top of chest

Vertex -Jerks in a spot, with sticking and pain on touch. Sticking, with boring and with twitching of of r at 5 r.m., > rubbing, in 1, rubbing, as after lids; intermittent S in 1, paroxysmal, < rapid walk-drinking liquor Lachrymation, in open air ing. Tearing transversely across Pain, anteriorly in bone after supper; extending back and forth to neck, whereby the shoulders are drawn upward, so severe that she could not think, and in I temple. Drawing pain to r. temple; occasionally to nape, with involuntary shrugging of shoulders, closure of eyes and when walking necessity to tread softly Bruised sensation, and contracted in occiput Confusion Pressure upon , extending to r. side of forehead and to l. side of occiput Dizzy heaviness in morning and sensation of a band around on r head; tensive H. in upper half of head, extending to occipital protuberance, with sensation as of a band about head. Vertigo in upper part of head, < vertex, < reflecting, with tension and with soreness to touch on vertex.

Parietal Bones.—Sticking in r ; in l. ; in upper part of l. in afternoon; paralytic, in l. Drawing pressure

forchead, in upper part, with sensation as if head would be drawn backward; with drawing pain in muscles of 1 side of occuput, extending towards neck. Pain in evening on touch as if broken loose from skull Drawing pain, with anxiety in chest, without appetite for dinner; on l. side and above 1 mastoid process, in r. side Drawing through l. Rheumatic symptoms when lying in bed with forehead raised Tension in a Heaviness; with drawings downward in nape and in temples, extending to neck Pain as from a (Bry.), at night, as if it could not be raised from pillow

Scalp -Hair falls out, on occiput Hair matted and dry for four inches above r. ear Pain in roots of hair, as if ulcerating, on combing. Sensitiveness, of vertex Soreness of upper part, with heat on top stood up Crawling on r side; > rubbing, in upper part of 1 at 2 P.M., not > scratching; > scratching. Itching on occiput, scratching, returning at 1 PM, on

Eyes .- Swelling in morning on waking, with aggluin posterior part of r bone; in squamous part of 1, in tination of lids Sticking in r; suddenly in 1, with sensation as if eye were torn out Tearing in l., and above it, intermittent, in 1 and in 1 temple Sensation of sand in them, in forenoon, with lachrymation; at throbbing, drawing, in 1; drawing, so that the whole 7 PM, > closing eyes Pain < lamplight Spasmodic pain in r Burning pain in l in morning on waking. on rising Pain as if lids were forced downward Pressure; in l.; in r., then l , < moving eyes, and in orbits, with sleepiness Heaviness Burning, in morning on waking, and in cheeks, on closing them . in r; in l., with sticking in inner canthus Itching,

> Dirty yellow color of whites (China) Balls painful , on moving eyes (Eup perp, Bap), in middle of 1, > evening on closing lids, with sensation as if so large that the upper lid could not cover it, in upper part, as they would be pressed inward, < 1, closing eyes. sore sensation on looking up , (tickling-itching) Pupils

Lids-Redness, of margins; of conjunctiva of lower, of margin of lower, with swelling. Dry mucus Agglutination, in morning, < 1; in morning, with foggy vision. Blinking Trembling of r upper Twitching; of 1 Clonic spasms, forcible closure on attempting to hold them open Closing when writing Sticking in 1 , inner side of 1 lower, in inner side of r; sudden, in r upper; in l. inner canthus, and burning, as from sand, with redness and inflammation, then weakness and lachrymation, itching, in 1 inner canthus; jerking, in r inner canthus, > rubbing Press-Occiput. - Sticking in r. side; drawing, extending from ure; on r. upper; in l. upper; in upper in morning;

emorning on moving lid or ball Swollen sensation. catarrh. Mfliculty in opening, as if upper were drawn downness Burning, in lower, in l upper, in margin of l rubning, and about evers, in the state of margins; of l nasal mucus. Illusions of smell, as of black soap. inner canthus, of l upper, > scratching, burning, in | Face.—Yellow (Fer, China, etc.), < nose and cheeks; morning on waking

Orbits painful just above 1 lid. P. < moving eves: pain above I cue which seems to press down upper lid; stupefying piessure in r., extending inward

points, then blackness Blinding spot before eyes, and rings, if he looks at it lackrymation Blackness before eyes, with sensation as if she would faint

Ears .- Whitish wax, like mush Sticking, in r external, in 1, in 1 meatus, in r. meatus, in r r meatus and in temporal bones, in r inner meatus, below I lobule, above r in evening, down behind r, from r into r teeth in afternoon, intermittent, in r inner meatus. Boring in r.

Pain , behind r ; above, < r ; above and beneath r., tickling in it Bruised pain behind I, in lobule of I, then burning in r lobule Drawing pain from 1 into 1 upper teeth, behind and above 1 when in bed Drawing in I and in I back teeth, in I meatus, from l meatus into l temple. Hammering sensation. Feeling as if too full Stopped sensatum, 1, with ringing before them Sensation as if a wind were streaming out of them, > putting finger into ear Heat in r meatus. Itching in 1; now in one, now in other meatus

Hearing vanishes when coughing, as if a hand were held over r ear Noises Ringing, in r.; before 1; in 1; in 1 when walking, with burning in cheeks Singing on closing eyes, with ringing. Whistling before cars Buzzing Humming Sounds as of distant as of a distant wind; before ears, as of a wind, before

1 like a wind, from 8 PM till going to bed

Mose — Tip swollen and red. Tip trembling and
twitching Sticking in tip. Tearing in nostrils, < 1 nostril, scratching, then in l. nostril and zygometic of mouth; in r., > in evening; in two last l. upper,

, Gight on waking. Rubbing against ball, of upper | arch and across l. temple, > scratching. Sensation of

Sneezing. Stopped corvas, in morning on waking; bard, lasting till towards noon Inclination to close, in morning, < warmth Fluent coryza; on rising and to be down, as after intoxicating drinks Heavi- from stooping, with cough, with much sneezing; with heat, with hawking up of mucus Mucous discharge. upper, in morning after rung, < 1, with pain in balls Watery discharge; in drops, < 1 nostril, with burnar if they would be pressed into head, after slight ing on outer margin of nostrils Bleeding of 1 nostril; rubbing, and about eves, in I lasting till sleep, stick-black blood from nose in morning on waking, with

the usual redness of the cheeks has a mixture of dark yellow; grayish-yellow. Redness, with flushes of heat; R. at 5 PM, with distended veins of hands, without external heat; of l. cheek; of cheeks, with heat. Red Vision dim, in morning on waking, < r eye; when spots on chin; on cheeks; on 1 cheek, on r. cheek, writing, with illusions Letters run together when gradually involving whole cheek, on I cheek, graduwriting, and can be seen more easily at a great ally becoming larger from 2 to 6 PM, on r. cheek, distance, when reading Flickering; before diarrhea; gradually becoming larger from 2 to 5 PM, with with vertigo, in a bright point during anxiety Glare burning Pallor. Suffering expression, Sunken before r eye so that she can hardly read. Glittering Sickly look; with sunken eyes surrounded by blue

Sticking in check-bone, in 1, with boring, alternating with pain in Lupper eye-tooth, prickling, in L Jerking in I malar-bone, as if it would be torn to pieces. Tearing from r cheek-bone to ears and around meatus and in upper part of forchead; in resternal ears, then to upper part of occupied along suture of partelal meatus; in I, with noise in it, in I, with difficult bone (Bry to temple) Paun in r cheek-bone and in carries, in I, extending to throat, in r, extending to upper part of occiput; in I cheek-bone, in I side in vertex, then into I car Tearing in I, behind r; in chilly, windy weather, < touch and from 6 to 8 rm, > magnetic passes, next day sensation as if swollen and ulcerated, but no perceptible swelling, in r cheekin middle, then on boring in with finger ringing; bone at 10 PM., extending to r ear Painful spot in cheek as if swollen and suppurating Swollen sensation in r cheek-bone (Mag c ) Drawing pain in r malar-bone. Pain in 1 cheek-bone as from a blow Burning pain in 1 meatus, in r meatus; above l, extending through in cheek-bones, extending into eyelids Pressive draw-I upper back teeth Painful pressing out of r, with ing in I bones Tension in checks between eyes and mouth, in I malar-bone when lying, with drawing.

Lips -Swollen in evening, with peeling of skin. Dry, hard and crusty, dry in morning Papular exanthema with red base, on upper hip and on r. cheek. Vesicle filled with limpid serum, in mucous membrane of lower Sticking in I. side of lower. Burning; of upper. Itching in r corner of mouth, > scratching

Jaws-Sticking through 1 upper Burrowing tearing in antrum maxillare Pain in upper, waking at night, in r upper in bed, in 1 side of both, extending to eve, near nose, and throbbing pain in temples. Burning pain in r. upper and lower, extending into cheek and r half of both lips, < in evening in bed, with intermittent statches back and forth Drawing cannonading Roaring; in r , with difficult hearing; pain in l upper and in cheek-bone, extending to eye, with heat in check Drawing through upper law and upper teeth

Mouth.—Teeth. Sticking in l. back, in r hollow

back, S, with boring, in r, with tearing, then in L Pam in bones, in the in cartilage; in root. Soreness Tearing here and there; T. in I. in afternoon extend-in nose. Tension in r side in afternoon Besting ing into I. mestus; in I. lower, < chewing. Jerkings; in the control of the total volud ulcenate (she formerly in upper incisors. Aching; in lupper; in lower; had an ulcerated tooth in this place) Stoppage, of in r. upper eye-tooth; in r upper in evening in bed; l nostril Dryness, in l nostril, with itching. Sen- at night; in l back at night; in l back, waking at sation as of a cold wind through it on inspiration. night; in all when speaking, and in both jaws, in l. Burning in nostrils; in l., in mucous membrane lower on touch, with looseness; in three last l. upper towards tip, as in cutarrh Crawling in tip Itching when chewing or pressing on gum; < towards evenof tip, I in I nostril; in I side, > scratching, in r. ing; in two last l. upper, < chewing, < every motion

with pain on touch; extending to r. temple; in upper, Sensation in pharynx of contractive cramp. Sensagexthen in r. side: in back and l. upper 1aw, extending again volving wholer side of face, jaws, hps and cheek, < warmth, momentarily > cold air or cold water; now l., Intermittent aching in l Periodic aching; < at night, and through two middle lower incisors, through lower middle incisors in morning; extending into eyes, in l upper incisors, extending into l upper and lower teeth. Dragging, Elongated sensation, < chewing, in l. lower, with loose feeling Heat

Gum—Boil, with thick yellow discharge, above leye-tooth, discharging blood Redness and swelling of I upper, and of I half of hard palate Bleeding in Diminished

forenoon Sensitiveness of l upper to touch.

Tongue.—Coated, yellow, with red margin showing imprint of teeth (Merc.); yellow; white, gray, rough White Slimy Sticking on 1 side of tip Sensitiveness Inability to stretch it out or to open mouth as wide as usual Dryness Burning, on tip, as after

vinegar. Difficulty in speaking Vesicles in mouth and lips Mucus, full of stringy Pain in palate, < motion of body, and in gum. Scratching, with burning, and in gullet and stomach Saliva tough and slimy; saliva sulphur-yellow Hot in throat breath, with dry mouth and line.

Taste -Bitter (Bry.); > when eating and drinking, spirituous; nauseating, sweetish-bitter, sourish or saltmorning; offensive, of blood, with blood-streaked mucus in throat Pasty (Bry). Insipid, and nauseous, as after elder-flower tea Bad to the dinner in

Clinical.—With the disturbances of digestion and of the function of the liver, the tongue is yellow and shows the print of the teeth around the margin. There are frequently bad taste, bad odor in the mouth and accumulation of tough mucus

Throat.-Skin yellow Stiffness in 1 side. Twitching, and in region of larynx. Mucus; thin, hawking of lumps Choking; and in region of larynx; as after suddenly swallowing too large a morsel; and in trachea, as after strong cigars or lager beer, < breathing in tonsils on empty swallowing, as from a fish- forehead and temples, as from a dull body, < exter-bone. Pain in night, < swallowing; in 1 side when nal pressure swallowing, > swallowing, conduction, in force against laid of palate while swallowing; in forepart, extending to temples. Soreness in morning on waking; in pit to temples. Soreness in morning on waking; in pit, > eructations, extending to clavaled pregion of larynx on swallowing food and drink, <

extending to eyes; at night, extending over I cheek, as if a body rose, forced her to swallow and went dous Sensation as if uvula had fallen into it "tto I meatus and I eye, waking towards midnight; in- morning, with involuntary snoring when awakt volving whole r. side of face, after going to sleep; in- Throbbing at night, and in top of chest, then griping ir hypogastrium. Bubbling or trembling motion above larynx without pain Sensation of dust in pit and in now r, alternating with sticking in 1 side of chest upper part of sternum, not > coughing. Dryness; on waking from midday nap, < empty swallowing; on destroying appetite, extending to 1 side of forehead, swallowing; of back part and of palate; with sensation temple and ear, with heat in forehead; < warm food, of dust in it, with constriction, obliging swallowing < r, preventing sleep at night, with frequent tearing Sensation on inspiration as if cold air were streaming in I ear and I arm. Drawing pain; in upper, in through nose into fauces Burning, in morning; in upper incisors; in I upper, in r, then I; in I back, guiltet, itching, below pit before sleep. Swallowing in back and in check-hone; through r upper back difficult (Exophagus feels swellen and contracted, with bubbling, choking and scraping

Stomach.—Appetite increased, morning and noon; for milk; longing for acids in morning, longing for vinegar and other sour things, and vinegar tastes less sour than usual. Diminished; for breakfast Lost; for supper Aversion to cheese: to cooked food

Thirst, in evening, for cold water; longing for wine. Aversion to coffee; to cold things at dinner, so that she would not drink though thirsty.

Eructations; in afternoon, at one time with heartburn, till evening; empty, tasting of juniper berries; tasting of breakfast, tasting of food, at 1 P M ; soursh or saltish-bitter or bitter, bitter in night, causing shivering, then bitter taste Hiccough Nausea, on attempting to eat broth , > eructations , > lying down ; > eating bread, with emptiness in stomach, with salıvatıon (Merc ), with heat of whole body, rising from stomach, with griping and warmth in epigastric region, Burning, to throat Dryness; in morning; at 4 PM, as if she would faint Vomiting; of mucus, of tough with thirst Watery sensation Salwation (Merc), mucus; of curdled milk during cough, of potatoes collection of bitter water, obliging constant expectoration eaten vesterday, with a sharp, sour taste and scraping

Distention of epigastric region Gurgling as if air bubbles burst and afforded relief. Sticking in pit at 530 PM, extending through body to back (Bism); ish, bitter Sour, metallic Sweetish, of blood in S in pit, in epigastric region; in r side, in 1 morning; offensive, of blood, with blood-streaked side near pit in afternoon when writing, during inspiration and on making body erect Cutting, at 1 PM. when yawning; in epigastric and umbilical regions, < pressure Pinching in and below pit, < touch Twinging now in r, now in l epigastric region after dinner, then tension in it Gnawing, > eating. Digging; in epigastric region, > eating Pain in epigastric region, in pit, in pit and opposite in back, < external pressure, > eructations, > emissions of flatus, > lying on I side with legs drawn up, together with eructations; in pit towards evening, with oppression of chest and difficult breathing, with gas in it; paroxysmal, spasmodic, in pit, spasmodic, in r side Sticking; on empty swallowing; in region of larynx; of pit, alternating with pain extending from nape to

empty swallowing; as from a cold Scraping. Raw-spiration. Spasmodic pressure on. Heaviness from ness; > swallowing. Irritation in morning on wak-drinking water, with pressure Cramplike throbbing ing; towards evening, with scraping in larynx exciting in pit, causing anxious respiration Ineffectual desire fits of cough; > swallowing. to cructate. Hollow sensation; with exhaustion when Constriction; internally and externally, above larges, walking. Coldness (Colch.); in pit, with distention, only the guillet was contracted. Compression; below chin. as if cramp of stomach would follow. Heartburn. lesm I side below ribs, on level with pit

souffigitational.—Generally the gastro disturbances are releved intramporarily by enting (Fulls), profess he drambs and hot don-ha mentures very ion useer relevant the vomiting isomporarily Gustro cutarth, with ansate, thickly-coated longue (Bry., Ant. c), 10 etc. Violent pain in region of stomach goes through to back 1 and r. shoulder-balked or over towards the liver.

Abdomen -- Distintion (Mag. c , Merc , Lyc.) , by gas Tension and hardness Rumbling, with colie; moving downward across umbilicus Gurgling Movings at 130 pm, with twinging here and there, M after stool, with sensation of a foul stomach Emission of flatus; in evening, at night, with stool Contraction of muscles, with pain about umbilious Increased peristaltic motion Trembling, with diarrhea

Sticking through Intestines feel as if torn out of body, on which account she lost her senses cutting space and an inestinal affections the pairs are worse on r. side and deter ading (Coloc): j spells, but > soft stool; in evengenerally are easied under this age of respects. ing so that she was doubled together, sudden, before moving about whole, the pain in I side extending into Drawing towards distanded sensation, extending to chest; drawing; Ineffectual urging; periodic, in atternon, every half through, contracter, with every cough Fulness Tenpurge, then a stool Coldness, in afternoon on drinking water, on drinking water of the winess.

abdomen Drawing pain in walls at night

10 PM (Lvc) region of liver and spleen, in liver (Lyc), about an inch from stomach, between 1 ribs and hip, between pit of stomach and umbilieus, and in sternum, with burning , in hepatic region (Bap , Merc , etc ), in margins of ribs, in afternoon, < pressure of clothes, in hepatic region on pressure (Phos), in hepatic region, extending downward and across umbilical region, as if constricted by a string, cramplike pain in hepatic region on lying down, spasmodic pain between pit of stomach and navel; burning pain below I short ribs Sense of distention in r (Phos ).

Umbilical Region - Spasmodic retraction, with nausea. Rumbling above navel, passing downward, before and offensive flatus. after diarrhea Painful collection of wind, > slimy navel Constriction transversely across as by a string Omitted. (Coloc.), in afternoon till 6, above navel, then griping in (Color.), in diferenom tell 6, above stated, then griping in shedomen and say watery shoots; C transarresig above stated, spasmodite C Burning in intestines; below stated by the state of the st

Hypogastrum -Griping Pinching in l. inguinal catarrh region. Aching deep in; above pubis; in l. iliac re- Urinary Organs.—Sticking in region of bladder.

(hig ning; in pit (Merc), in epigastric region (Colch); gion, above pubis in evening; in inguinal region preventing walking, also at 4 PM; in r. wall, < inspiration, cramplike, above pubis in afternoon, with frequent urang to urinate Drawing pain; tensive spasmodic, in inquinal regions, extending from upper and outer part downward and inward; spasmodic drawing pain downward in that and inguinal regions, extending into pelvic region, drawing spasmodic pain in inguinal region, preventing walking and causing difficulty in raising r

leg Spasmodic drawing in inguinal region. Drawing dragging in inguinal region Construction before passage of turbid urine. Pressure on crest of ilium, < 1 Tension in ilium, with pressure. T in iliac fosse

Clinical.-Enlargment of the liver, pain under angle of r shoulder-blade, or with jaundice, yellow tongue, bitter taste, etc. In jaundice, sometimes with clear urine, tongue white, stools dark,

Rectum.—Burning (Sulph) and cutting, with conduarhera Griping, in morning, then three thin striction of anus, alternating with itching in anus Rehing; stools, at night, with emission of much flatus, as and crawling (Sulph) Sensation as if protruding, before stool Digging, with nausea Twinging and with spasmodic constriction of anus and rectum Urging; on rising, then three precordial region, where it became sticking Pain, in watery stools in quick succession, then relief of colic atternoon, with coldness, with urging to stool, with in evening, frequent, then hard stool, with pressure

purge, unen a second of missing water on of missing water, on of missing water, on of missing water on of missing water on on back or satstool Spasmodic constriction after stool Swollen Hypochondria - Sticking in I , in liver, in liver at feeling during stool and soreness after stool Crawling Pain through, and in r. scapula; in Itching. Itching in perineum. Tension in perineum, with pressure Crawling in perincum

Stool.—Diarrhoea, with urging, then cutting in anus; slemy, frequent, in afternoon, frequent, in night; frequent, yellow, mucous, with blood at close; and insufficient; greenish, with cutting in rectum and higher up Watery; on rising, bright yellow, copious, with much mucus (Pod); and brown; and dark yellow; and frequent, frequent, copious, whitish, with nausea at night Pasty; and bright yellow (Aloe, Pod); and light gray, and dark brown, and frequent, mucus; with pain in intestines, then pinching in abdomen extending to back and chest, > emission of

Constipation Hard; with pain, and dark brown, diarrhon Sticking above navel, below navel, so that whitish-red; at first then easier to pass; and delayed. he must bend double, recurring when standing Cut. Nodular, difficult, with smarting in anus; N. difficult, ting, above navel Griping (Sulph), then cutting in with cutting in anus and rectum Like sheep-dung. abdomen and across : lumbar region, extending to back, Dark; dark yellow. Light-colored; and ribbon-shaped. G above navel Pinching, then discharge of flatus Whitish-red. Light red, painful. Mixed with blood; Twinging, with tension or contraction about stomach, followed by blood Slenderly-formed (Phos), pre-T below navel at 5:30 r.m., with coldness of body ceded by griping Increased Diminished; with itch-Twisting above navel Pain, in l, above navel, to ing in anus Difficult, with pain in rectum. Frel above navel, from 3 to 4 r m, above navel, extend-quent; the second after dinner. At unusual time, ing to l chest, spasmodic; burning, drawing, above Delayed, and difficult, and whiter than usual

with frequent urging to urinate Dragging in bladder; (Sang.); < open air, with spasm of glottis during ex-unth spasmodic trembling pains in inguinal region. Press piration, without expectoration and without previous scanty passage; sudden; continual, frequent; frequent, ineffectual Micturition in a vigorous stream; dribbling; delayed. Frequent micturition; but scanty each time; and copious, pale urine

Urethra.-Discharge of a drop of fluid. Sticking when urnating and on motion of body, with cutting S in tip, in meatus Cutting when urinating and lieved the spasmodic attacks, in short paroxysms. afterwards Pain when urinating, then pain in urethra Expectoration of mucus. and drawings in l. testicle. Burning, before micturition, during micturition; in orifice, near glans penis. nausea, > empty eructations, with difficult breathing Itching at orifice, with smarting as from urging to

urnate, which, however, does not exist

vessel, in afternoon, stams disper reliable-brown, red structed as by a foreign body in bronch. Necessity and turbul as soon as passed; lemon-sellou, turbul, red: to breathe deeply Longing for fresh air in order to dish; dark, foamy, of resmous odor, of acrid, sour; breathe more easily Inability to breathe deeply on odor. Urine pale, and scanty Sediment in urine account of statches. reddish, flocculent, grayish-yellow, flocculent, the vessel covered with reddish-yellow crystals of unc acid

Sexual Organs .- Pain Penis, sticking, pinching in a spot on r side, pain, pain and anxiety as after a violent erection, pressure in lower part and at orifice of urethra, dragging towards root, itching, frequent erections Scrotum covered with dry, red, cracked, thin scurf, red, hot and swollen; red, hot, with yellowish, fluid-like, flat blisters, painful to touch, vesicles flattened towards evening and raw, with raw, red, swollen and moist skin; itching, itching and crawling, with frequent desire to urinate Testicles, sticking, pain; pain in r; drawing pain, drawing pain in r, drawing tensive pain, and in spermatic cord; drawing, D in r, D from l to hip; D in l, with pain Spermatic cord, drawing pain along, drawing Itching of vulva Burning in vagina Leucorrhea,

three days, with pain

Respiratory Organs - Larvnx. Spasmodic movements of glottis before sleep, without cough Stickthroat. Pain; in region towards evening, on cough- 1 clavicle ing, in cartilage, with sensation as if throat were swollen externally in region of larynx; burning Con-extending straight through to back, motion and instriction Sensation as if pressed from without against spiration, the pain in back < bending backward, in asophagus, impeding swallowing but not breathing Swol-chest < bending forward and > eructations, with restlen feeling ( r. sale; at night, and in traches, with lessness Jerking in sternum, in 1 clavicle tackling in larynx and short dry cough after waking, Pan; and in bods, in 1; in 1, ribs; r., r, with oppression in larynx and traches, and feeling then 1, forepart, in upper part, in sternum, just as if the swelling hindered breathing; and choking gurgling in 1t

Hoarseness; in morning; with dry cough and expectoration of lumps of mucus Bronchial catarrh returned in evening. Heat in bronchi.

ure on bladder; with frequent and scanty micturition. irritation; as in incipient whooping cough; and short Urging to urmate; with cramplike pain in urethra; Racking, as in consumption, < morning, with much exwith groaning and pressing to urinate; all day, with pectoration from deep in lungs, difficult to loosen, the rattling in chest < changing position after waking. Hollow. Dry; in paroxysm at 4 P M., and short; and short, from irritation in larynx Short; at night waking her, also with pain in back and itching on occiput. With expectoration of mucus. Irritation to cough in evening, causing lachrymation; with dry cough, which re-

Asthmatic attack at 11 P.M. when uringting, then even in bed Dyspnea, at 2 o'clock, at 6 30 P.M., with full pulse Breath short, and difficult, with oppression Urine copious; and whitish, foamy, and pale, at 6 p m and anxiety of chest (Phos.); with constriction of chest; then twinging; at another time scanty. Urine dark during fever, and rapid. Heavy. Difficult; after yellow; and clear; turbid when passed, dark brownish-dinner, with sticking in I pectoral region extending red, like brown beer (Benz ac.), frothing at edge of backward, < walking. Rapid, > eructations Ob-

Clinical.—Cough loose and rathing, the expectoration raised with difficulty (Taxtax emetics). Frequently useful in the broading of the control of the contro

Chest.-Yellow color of skin Statches: here and there, beneath r. ribs; in r. ribs; in r side behind ribs, along margins of l ribs; in borders of ribs about pracordial region, below heart, in L; l, then r; r, 1 nipple, upper part, in 1 clavicle, below clavicle, in upper part of sternum; in lower part of I lung, in I at 4 A M , in side at 4 A M , preventing deep breathing in r. lower side at 2 PM on inspiration, < motion and cough, in r from 2 to 6 PM, < inspiration, obliging her to speak softly: in r ribs on inspiration, in region slimy, staining linen yellow; tenacious, slimy, whitish, of r. nipple when sitting, not < breathing, then in 1 side, staining linen yellow, after menses Menses profuse, in 1 when sitting, in r, < deep breathing, with stop-and too early; and too late, continually increasing for page of breath, in r side beneath breast, then extending into precordial region, anteriorly in lower part extending into intestines below umbilious, I extending to back, with burning, in I, extending towards scapula, ing; through, extending outward and inward into externally from l. to r side, on inspiration, jerking, in

Sticking jerking pain to r of lower part of sternum,

above pit of stomach; between ribs and l. hypochondrium, in morning, < till 9 A M; in morning, obliging her to sit upright < motion, in morning, > short and rapid breathing, and in back, in forepart in morning, preventing deep inspiration; in afternoon Cough; after waking and on rising, with sensation of on inspiration, < motion, between r. sixth and seventh dust under sternum: from tickling in larynx; from irri-ribs on bending to l; in sternum on every inspiration; tation in larynx. Parozymal; towards evening, from on inspiration, < short, dry cough; in ribs of r. and 1 scraping in larynx, < night, with pain behind sternum sides on bending to that side; when walking, but not < thereby; in r side, in region of seventh and eighth and small, compressible. Large, full Hard. Slow; ribs after sudden cessation of headache, inspiration and irregular.

breathing hypochondrium then a red spot, as of herpes. Drawing pain in after- occuput noon . D pain, and in pit of stomach , in muscles of chest. downward in r

injured feeling on inspiration, ribs on touch, < afternoon, when the cold sensation, pressure in stomach feeling in sides. and difficult breathing return, r lower half, < touch of clothes, 1 lung, coughing and snee.

Anxiety Uneasiness, making breathing difficult coughing and sneezing

Oppression, of 1 (Phos), 4 Am, 6 Pm, with cough and expectoration, evening in bed, waking after midnight, with dyspnæa, on expiration; when walking, as if clothes were too tight Constriction, as from a coat of mail, C below arms Compression in region of bodies of vertebræ, < stooping, not affecting respiration, afterwards felt after rapid walking, violent blowing of nose, sneezing or when stooping, and is more externally along spinous processes of dorsal vertebræ Pressure upon 1, on sternum, over fore-part in morning, with difficult breathing, P in morning on waking, cannot get air enough on inspiration. > several deep inspirations, upon sternum on waking at 4 AM, > sweat, on inspiration after dinner; beneath I clavicle, extending into throat, spasmodic, in a spot usth constriction in them. Tension, in sides; on fore-part, about base of inner side on deep breathing, in-motion of r. arm, extending after rising around r side of termittent, in evening, in muscles from upper part of chest and causing oppression of chest, the pains > after I towards throat Burning in lower part, heat rising dinner till 2 PM, then < till evening, about lower angle into larynx. Rush of blood, sensation of. Pulsation in morning on every inspiration; in I in evening, at base of r lung and in liver; under top of sternum below 1 on motion, and in 1 side of ribs, in r extend at 130 PM, isochronous with pulse ın r

Heart.-Sticking in pracordial region, with dry cough, in precordial region, with palpitation, anxiety and uneasiness, in region of heart, obliging short and quick inspirations Action imperceptible, also pulse Beats loud and strong Palpitation; afternoon, with tion, preventing motion evening in bed, periodic, at 11 PM

Neck. Swelling of 1 side and of 1 cheek, painful and motion, then pressure in brain again, behind stermun, < mspuration, deep-scated in r and in r shoulder, on touch. Cracking in vertebrae on motion, with pain num, computation, deep-scated in r and in r sounder, on touch. Cracking in vertebres on motion, what plant cold and sender supplies, not much < by moving in muscles of nape. Stacking in the stack, and stacking in the hmbs, wavelike, in 1, intermittent, beneath 1 ribs, in nape, < afternoon, and in 1 shoulder and 1, then below r Pam as from an abscess deep-scated in r. at 130 pressure, < turning head to one side or bending it PM, P as if ulcerated in ribs, preventing deep backward, at night in upper vertebre, < motion, ex-Bruised pain in 1, < motion, and in 1 tending to vertex in a spot in which are jerks and Burning pain in sternal region, sticking Throbbing pain extending to forehead and

Drawing pain in nape, intermittent, in neck, over C and back, in forepart, waking at midnight, with shoulder into wrist, < using arm, especially in writdyspinces, in sides, extending into abdomen; in fore-ing, rheumatic, in nape, < turning head to r or L part, extending to umbilicus, in lower part of sternium, Drawing in muscles; D in 1 side and in 1 meatus schending towards r side of spine, through muscles, and the state of the state of spine, through muscles, and the state of the state of spine, through muscles, and the state of the state lower part, with difficult breathing and compression of Constriction of muscles as by a band, C in muscles as if head were drawn backward Heaviness in nape; Soreness in r lowest ribs . in l. lung : behind sternum . in muscles of name : with tension, and in occiput Stiffness; behind upper part of sternum on coughing; r. ribs on of nape; of 1 side, of r muscles on waking, on moving touch, seventh and eighth ribs on touch, < r, with head, with pain on deep breathing, with cracking of reitebræ on moving neck, with paralyzed pain Paralyzed

Back .- Pain , afternoon, and in small of back , < rising from a seat and from stooping, when sitting bent, extending to shoulders, > becoming erect, wandering, as far as between shoulders, pain as after immoderate exertion, in morning when turning in bed. Bruised pain on motion Drawing pain, afternoon; extending into sides of chest, into torepart of chest and thence into walls of abdomen as far as navel. Drawing, on waking after 4 AM, evening, at might, preventing sleep, with headache Oppression extending around to ribs Tension, stooping, with pain and with drawing around to chest Stiffness, and between shoulders

Scapular - Sticking beneath r.: below 1 : between : between in afternoon when sitting, below r on every inspiration, from lower angle of I through chest Pinching cramplike pain on inner margin of r, preventing motion of arm. Pain beneath r.; in 1; below 1, in 1. behind sternum waling at night, extending into bronchi, near lower angle, on outer margin of 1, in spine Numbness ing through chest to sternum, with oppression, in r. suddenly extending into shoulder-joint, with inability to move arm because it causes a sensation as if the arm were broken, the pain extending to wrist, > in forenoon, with coldness and stiffness of arm, sudden pain in lower angle of 1 at 9 AM, < touch. Sprained sensa-tion, preventing motion Bruised pain extending anxiety, towards evening after sitting, during fatigue from r down back Drawing pain in 1.; on outer from unusual exertion, when walking in street and in margin of 1, in L extending into 1 chest; from L into upper arm, then painful drawing in dorsum of l. hand: Pulse.—Feverish Rapid, in evening; and full; between, extending to small of back Drawing on outer margin of 1; between, in afternoon; between, Paun in 1, as if he had lain too long upon it Drawtowards evening, < in r, and extending to r. side, ing pain in r, l.; from joint into fourth finger; from with pressure Oppression between. Tonsive pressure | 1 to fourth finger Drawings; in r.; l; paralytic, in

Sticking in middle, near spine Pain in vertebra: as if sore, < motion and pressure on spinal processes cease, then on r side of spine, then in r. tuber ischii.

region of kidneys in morning on rising, in I kidney on deep breathing, < 1 side, < walking; in region Paralytic sensation, in r of kidneys, < motion Tearing in lowest vertebrir, as if last vertebra in evening, on motion in bed, in 1, waking at night, in kidney region from bands of lytic, in l Paralysis of muscles on moving them clothes; in lowest vertebre on pressure, and in scapule, in sacrum, < motion, in kidneys, < lying on back, > lying on stomach , bending forward , in sacrum and tip of l region of kidneys, with sensitiveness to pressure; in kidneys, at times pulsating Sore pain in vertebrae, in lumbar and five lower vertebrae, < pressure and motion, some pain extending into the five lower r ribs towards evening Bruised pain on motion Drawing pain in vertebre, extending across hips down abdomen Pulsations Weakness, she cannot stand upright

Extremities.-Trembling. Jerkings in arms and legs. Sticking, now in arms, now in legs, S and drawing in 1 index, on lower side of 1 great toe, and I knee and r. elbow Uneasiness Lameness ness, after rising; with bruised sensation Paralytic Heaviness of 1 on raising it Numbness sensation; in arms and legs Paralytic drawing in joints of knees, hands and fect

Clinical.—Risemule graptons in upper links, pain in shoulders arms, tips of fingers, the whole dash a zero to touch, sweat without relief, all graptons associated with hepatic derangements. Rheumatic pains in high, thigh, set, c. f. side and r. dress, and ordens of ankles, with stiffness, feeling as if r. leg were parameters and searching pain in lower extremities. (Compared, Rheumatic and searching pain in lower extremities. (Compared, Rheumatic and searching pain in lower extremities. (Compared, Rheumatic and searching pain in lower extremities.) pare Caulophyllum).

Upper Extremities.—Trembling Sticking in 1 axilla when sitting Tearing in 1 axilla and farther forward towards nipple

in afternoon during rest; in l. joint, in r, extending dle to last joint Falling asleep of third and fourth into neck. Tearing; mr, in r. in afternoon Pan of each hand (compare finger symptoms with Caulo-in l as if it would be broken or strained. Pain; m phyllum) r.; in l.; in r. on moving arm; in r, < when arm is at Lower Extremities.—Tottering. Stumbling. Wan-rest; in l, < touching arm, and in l scapula; in l, dering pains in joints, < l, < rest Bruised feeling extending down outer side of arm; in L, extending Drawing pain in r Weariness Paralyzed and dead into deltoid; in afternoon, and in nape, extending to feeling.
wrists, < 1 side Albeumatic pain from 1 to elbow. Thigh.—Sticking; in r. hip; l. hip; on inner side Pain in r. as after taking cold. Bruised pain in r lof r; on inner side of l. Tearing. Pain in lower part;

r Paralytic pain in r; in I and in I. arm.

Arm—Twitching of r. Tearing in 1; in r.; in r., with loss of power in it. Pain, < 1; in I. deltoid and Pain as from a blow on 1 side of spine where ribs biceps in morning on motion; drawing through l. Paralytic drawing in 1 Weakness; intermittent, in r. Lumbar Region -Sticking in 1, < towards back; in Heaviness Numb and paralyzed feeling in r in morning. > rubbing, with internal and external coldness.

Upper Arm -Sticking in 1; anteriorly in r.; rheuthey would be separated, on bending forward, or if he bent matic, in 1 Tearing in 1. in muscles of r . in flesh backward, extending forward to near illum, even felt on below I shoulder in forenoon, in middle of r, as if in walking Pain in last vertebra; as if they would be marrow Pain above I elbow; on outer side of I above walking Pan in last vertebra, as if they would be marrow Pain above l.elbow; on outer side of l above braken; in vertebrae on motion. Labor pains in ver-elbow in morning on riang, in r, extending along the barrae, extending over hips and into abdomine Pain; inner side to fingers, above l elbow, then in r shoulin sacrum; in vertebræ, in last vertebræ; in kidneys, der, in l. side, in r forcarm, extending from one part in morning on motion; in last vertebræ at 8 p.m; in to another, on inner side of r., extending into forearm, then pain on inner side of L forearm; para-

> Elbow -Sticking in region on inner side of 1 arm Cramplike pain in 1, < bending. Burning pain at

Forearm -Swelling, and of hands. Round red a spot in liver and along bend of ribs, in line main- spots on palmar surface, with burning pain Sticking malis, in vertebre in morning, extending into chest; in r, above I wrist, through inner side of I.; extendin sacrum, from 6 to 10 rm, extending to below ing into I wrist Pain in r, P on touch; drawing, in scapular, spasmodic, an r kidney and in liter, < 4 to 9 1, rheumatic, in r Drawing in 1, extending thence pm, with sweat on forehead and hands, in last verteninto palm, in which there was twitching Relaxation bre, < motion, alternating with pain in scapular, in of muscles of r, with pain on motion and on grasping anything Paralytic sensation in l
Wrist —Trembling Sticking in r Tearing in car-

pal and metacarpal bones of r thumb, T from l to tups of two smaller fingers, > rubbing Pain in outer side of l, rheumatic, in r Stiffness of r, of l in evening Venns swollen Hand - Yellow color Trembling, when writing Sticking in l, tearing, in bones of r metacarpus, pressure Punching tearing on dorsum of r; paralytic T in metacarpal bones of l thumb and index and in their proximal joints on lower end of 1 ulna, with pain in skin on these Swollen feeling in 1 , > rubbing, with numbness, parplaces as if burnt, rheumatic S till 10 PM in l. hip, alyzed feeling and inability to bend it Drawing in l, Weak- D pain on dorsum of l Helplessness when writing.

Fingers -Distal phalanges of r yellow, cold and as if dead, with blue nails Trembling Twitching of I Cramp in 1, tonic C in flexor tendons after waking, so that the hand was difficult to open Sticking in l index; in third joint of r index, then in second joint; in r middle; in index and middle finger (which had been injured eight weeks previous by a blow), with heat Tearing in tips of r , frequently in distal phalanx of r little Pain in r little, in l index; in r thumb, as from a blow in second phalanx of 1 ring Drawing pain in 1 index; in 1 middle, in r fourth, on inner side of r fourth Drawing in joints of l Shoulder.—Jerking in r. Sticking; in r ; in r. joint thumb in forenoon, on l side of l middle, from mid-

Lower Extremities.-Tottering. Stumbling. Wan-

in middle of r, in rectus femoris, on touch, in r on | below r. outer malleolus. Tingling as after a long rising from a chair, in hip on walking, extending to walk knee, so that the whole himb felt out of joint; P in l soles. hip as if dislocated, < walking. Bruised pain in middle of r, above hollow of l knee, extending into calves, and fifth Pain in r, third; r, fourth and fifth; two < walking and touch Drawing pain in inner side of smaller l in evening in bed, as from a blow. Drawing r, in hips, in hips in afternoon, in l. hip, extending in I great to foot, in lower part of rectus femoris, extending 8kin. to look, in lower part of rectus tentors, extending sub-mark, as insultantia, constituent of the mode, mind knees, sometimes sub-patient, patient, and the property of the pro and knee Paralytic pain above knees, in middle of in their centres, R spots, mostly confluent, with painr, then in 1, then in 1 leg, then in 1 foot Pressure ple in middle, on whole face except forehead, in mornon upper part of 1 Swollen sensation above l, hip; ing. > evening, with burning on touch; red elevation midway between hip and knee. Weakness, when on I check, from 2 to 4 PM, after relief of pains in Falling asleep of anterior surface, with sticking and centre of forehead, with pimple in middle Redness smarting Paralysis of I when treading, and of knee

Knee -Bending under when walking and standing Trembling. Twitching. Sticking in I, in r popliteal rising. A red areola around a scab on nates reappears space, also when sitting Boring in r and in forepart and becomes dark red Scabs here and there on of ankle. Pain in r as if it would break. Pain . in r . in inner side of r., in r patella, m L, in hollow of l; in hollow when walking: in patella when walking, in near angle of mouth, sensitive to pressure; near r. l on extending leg: in r. < motion, sudden, in evening. < stepping. Pain as after a long march; in evening, < on posterior surface of patella, < when walking Pain in articular surfaces as if injured Soreness, < pressure, in lower articular strikes of 1, chending < 1, side, with pustules, like chicken-pox, with red knee Drawing in 1 in formant of 1 chending < 1. Drawing in 1 , in forepart of r , < bending ; extending to great too, to feet, with tearing; paralytic lip, red, on wings of nose, red, indolent, on shoulders Weariness, with bruised sensation. Heaviness, and in legs Stiffness, stiff sensation in 1, with burning

inner side of 1 in evening; through r tibia to back of yellow, burning V on r. wing of nose and I side of foot, drawing-down pain in 1 calf Drawing; in lower lip, next day yellow scurf in these places calves, in calves, extending to knees and thighs, partion in I., P. sensation till evening, with coldness

m outer mallcolus; in a corn on r , below r inner termittent, in frontal eminences. malleolus, in r heel, under l heel, in l instep at 3 inner ade of r tendo-achillis Drawing in dorsum of calves and tibus, dorsum of l foot; r. sole; r. ankle, 1 Shoes seemed too narrow, pain in heels as if but then 1; t. toes; here and there on face in afternoon, by shoes, also in r heel, c walking. Painful pressure! only when sitting; now here, now there, on face and

Paralyzed feeling; insensible to rubbing of

Toes -Sticking in great, r great, r. third; r. fourth

Skin.—Dark, as if sunburned, < on face. Red spot walking, r thigh and leg, with stiffness and coldness, cervical vertebra, with heat in it; inflamed red E in of I half of face, with burning, swelling and tension, as in erysipelas, involving 1 car, the redness > after cheeks

Pimples on face; on back and loins, on r. cheek angle of mouth, with red areola, on margin of l upper evelid, where a white vesicle forms, which after opening has a burning pain, in groups on face, < temporal areola, on r nates, indolent, on thick part of lower and arms, on thighs and nates

Pustules on forehead, on breasts, on cartilage of 1. Leg—Sweling in afternoon, < about malleon and upper cyclid, with pain on touch and on closing eyes; calles Twitching of calves Cramp of calves Statick, with red arcola, on I sate of neck, I, scapula and I. ing in I, in r blus, above ankle; in I, calf, extend-land, red, with white tips, on thighs, with corresive ing to foot, flying, in r Boring in bones of r, sticking, itching, on r cheek, similar to chicken-pox, stanging, in l tibia Pum below r patellu, below l patella, < nner in various places Furuncle about middle of r under and the state of t

Dryness of chest and neck, and as if contused. alytic. Tension; in r calf in evening, in calves when Sticking in afternoon, and in various parts of body, bent, with sticking. Difficulty in moving when walk- here and there in evening, here and there, with ing Lameness Weakness, when walking, when coldness, in hands and feet, now here, now there, sitting Heaviness, with stiffness. Paralytic sensa-i < on back, arms and legs Itching biting of r. cheek, after rubbing it appears in I cheek Pain above I Ankle.—Sticking in r. internal malleolus Pain in cycbrow on touch. Burning pain in check near ear; 1, r, r when sitting; 1, < walking Sprained pain, above I corner of mouth; in a spot below I clavicle; r, in tibio-tarsal joint, < when walking. Weari in spots above tendo-achillis, with sticking in middle ness, with bruised sensation (Stiffness as if sprained ) of them, the pain < scratching Tingling on arms; on Foot—Cramp of r sole, which, together with toes, is feet, with creeping. Crawling; on forehoad, in r bent under, the toes seem dead, the cramp > crasping hand, in last joints of r. toes; in perneum and pent call, < stepping. Sucking, in r., then in inner, then then on toes, tip of nose, then in perneum again; in-

Itching; over whole body; here and there, here PM on walking in open air, burning, on r metatarsal and there, < back, arms and legs, in various portions bones and bones of toes. Pan on dorsum of 1; below of upper part of body; of r. ear; in r. concha; face; r. mner mallcolus, under 1 heel on every step, abdomen; chest and along 1 ribs, back; coccyx, in and under r inner malleolus, in r., extending into 1 palm; on dorsum of r hand, near joint of third fintoes, as if dislocated, in lower part of L metatarsus as ger; second joint of L middle finger; ungual phalanx from a blow, bubbling, in dorsum of 1; drawing, in of r middle finger, in bend of joint; legs, r. leg; head, at 2 PM., seldom > scratching; on inner side of she sweats supper, and above upper lip. Itching > by rubbing, on ball of last phalanx of I middle finger when walking in open air Itching below ball of I foot, with sticking beneath little toe Sticking I on outer side of I arm above wrist Corrosive, on arms and legs Burning, in r cheek near ear, anteriorly, on 1 hipjoint; on hand that had been scratched by a thorn As if sweat would break out on hips when walking in cool air.

Clinical.—Yellow skin, jaundice. Violent itching, with jaundice Panful red pimples and pustules on various parts of the body Old spreading ulcers which are offensive

Sleep .- Yawning; in evening, with pain in throat as pit of stomach Steepiness; at 10 a m, in afternoon; at space, a feeling as if the place were laid bare. Creep-2 P m, in evening, when walking in open air, after din-ings in back; between shoulders. Shivering down ner. Desire to lie down after eating, with inability to back; in back, with beat in head, from rose from it the headache was worse. Sleeps more than usual Sleep from 7 to 9 PM, when sitting, 8 when sitting during the fever; sound, towards even-

ing if she sits quietly, stupefying.
Sleeplessness, till after 11 o'clock; till midnight Late falling asleep. Restless sleep, in forepart of night, was in a dissecting-room with a corpse which sprang limbs, without external heat from the table and seized my throat. Waking fre-W. early, with twitching in muscles, W suddenly,

music, so that he woke from the sound of kettle-drums, of great lice upon her shoulder and thinking long about whence they came. Anxious; of being a soldier, with weeping; of being killed alive; of dying, of a funeral and of a wedding, of part of 1 calf in afternoon when sitting, between corpses; of falling and bloody wounds

Fever.—Chill, in morning on waking, with cold in whole body, spreading from palms, not in feet, face check; at 4 colock, then heak < of head, with coldines; in evening, of head, < after beer, forehead, with of logs, at 4 r m, with general sick feeling, at 5 r m; in evening, of head, < after beer, forehead, with sevent on t, face, with red worlden face; hands, with teeth; at 8 r m, in evening; towards evening, with swelling, in head only internally; extending from 1. chattering of toeth, oold bands and feet, in head; at m er over 1 half of head, rising into head, with general 10 30 r m, in bed, with chattering of toeth, with head, warmth and distention of venus of hands In flushes cache, cramplistic constriction of chest and nausea, with in face, at 2 r m, in head at 6 r m, without external nausea and oppression of chest Sudden. Internal, heat Here and there in face as if blisters would < hands and feet, at 1 r m., I and external; but not appear. As from nettles in whole face except forestremal External; with heat, mostly in soles, where head, in evening.

Alternating with heat, towards evening, r. calf at 5 P.M., not > scratching; on 1 tibia at 6 30 with thirst for Weiss Buer. C at 2 P M as if dashed with r.m., then burning after scratching; of calves, < after-cold water, alternating with dry heat, < in face, with noon, and on tabic, back, forearms and sides, from constantly cold feet Shivering, from 10 o'clock till hips to lower part of arms, on ribs Itching > by noon, in afternoon, at 4 P.M., then heat, 6 P.M., with scratching, on l. frontal eminence; in middle of fore-chattering of teeth, then heat, < in head; in evening; head; on r. temple, above 1 eye; of outer ear; r in evening on lying down; in evening in bed, with side of neck; r nipple, then on zygoma, then I nip-gooseflesh but external warmth, then sweat lasting all ple, then above I temple, outer side of r upper arm; night; at night on waking, with trembling and heaviin palm and on r. thumb, but returning; outer side of ness in knees, before supper, after drinking water l leg, at base of l toes, on r. frontal eminence after in open air in summer; with nausea, with unchanged warmth, as if dashed with cold water

Coldness of face, with pale cheeks; below umbilical region; of back, limbs, upper arm, hands; tips of fingers, lower extremities, knees; legs; calves and soles; feet, feet, < 1; toes; hands in morning, feet towards evening, lower extremities in evening, with stiffness, preventing sleep; arms and legs, < towards evening, from spine along seventh and eighth ribs to sternum, < r side, of r. ear, with burning of 1, of tip of nose, with burning in tips of cars, of feet, then burning of them, in face, alternating with heat in it, in different limbs, alternating with heat, rising from neck into occuput, internal and in catarrh, after which the pain in forchead was re-external of r log, with swelling of veins of hands and heved, with stretching, with pain in sternum just above arms, on inner side of r calf, extending into popliteal sleep, with starting up from this slumber, and as he neck down back in afternoon; in hands, which are warmer than usual.

Heat In morning on waking, with anxiety; from 5 to 7 AM, with anxiety; in afternoon, with full pulse, every afternoon at the same hour, in evening in bed, without thirst, at night, with uneasiness; with oppression, with sensation as if hair stood on end, with before midnight and waking in sweat at 5 AM, dis-restlessness and weakness of legs Dry, at 4 PM, with turbed by symptoms in threat and irritation to cough, reput pulse and cold care; at night; D, with full and full of dreams Frequent crying out in uight; hard pulse External. Internal at 4 ps, with moist without waking. Frequent sudden stretching Shor: forchead, J, with internal burning between chest and ing, rapid, whistling respiration during a dream that I scapulæ; I at 1 PM, not external, except in lower

Heat in head, forehead; forepart of forehead; in quently, before midnight; with confusion of mind, skin of temple near l. eye, upper part of head, l We carly, with twitching in muscles, W suddenly, side of head, on scalp, cars; tips of cars, nose, tip with sweat during and after sleep
Dreams; Itvoly, unremembered, disconnected, fancies without sense or connection in evening in a half sleep, of the occupations of the day, of journeys, palms, in ball of r. thumb, nuscles of r thumb, 1 vivid, of a journey; voluptuous; of a procession with leg; soles, in face in morning, checks in morning, with redness, cheeks in morning, with circumscribed redness, face at 4 AM, at 9 AM above eyebrow, extending to temple, then to torehead and vertex, < Of being buried towards evening, with pressure deep in brain, in lower shoulders at 1 PM , in cheeks towards 4 PM ; at 5 PM Fever.-Chill, in morning on waking, with cold in whole body, spreading from palms, not in feet, face

Sweat, in morning, in morning sleep; towards morning in morning on waking, in morning on seems to point to its special action on the bladder, waking after anxious dreams, at 4 Am, 4 Am on and, perhaps, kidneys and liver also.

Waking, at night, < towards morning, on waking; on lying down, on appearance of pains, in axilles.—Uva ursi, Apocyn, Spiresa, Equiset, etc.

Pain in all bones. Weakness Faint feeling Melpalms; upper part of body from morning till after ancholy Nervous, cannot bear anything, hot, irritanoon, on forehead at night Dry skin, and cool

# Chenopodium Anthelminticum.

A tincture is prepared from the fresh herb, in flower,

General Action.-Attention is called to the cerebral symptoms, especially in connection with those of the ear Comparison is to be made with Santonine

Convulsions, with insensibility and foaming at mouth, on recovery no remembrance of taking the porson Convulsive movements of r. half of body. breathing heavy, stertorous, with a peculiar rattle, as if a ball were rolling loose in the traches, pulse small, weak, frequent, eyes insensible to light or external objects, extremities cold, any attempt at deglutition

threatened instant suffocation Disagreeable eructations, nausea, staggering, progressive deafness to the voice but great sensitiveness to the sounds of passing vehicles, each one of which sounded like the roaring of immense cannon right into his ear, the same sensitiveness to other sounds, for example, the tea-bell, also buzzing in ears, he would scarcely light a cigar before he would lay it down, so that the mantel-piece was strewn with cigars only slightly used, no disposition to engage in conversation, being placed in bed he showed resistance by striking at me, he began to groan, draw himself up and toss from side to side, soon became unconscious, paralyzed in r arm, next day impaired motion and sensation in r side, r eveball insensible to touch, during the third day twitchings and stiffness of r hmbs, on fourth day unilateral convulsion, copious involuntary micturition, the heavy breathing, with flopping of checks, of apoplexy, yellow, frothy regurgitation from mouth, which, like the evacuation from his skin, smelled of wormseed. at times so profuse that it embarrassed respiration. during an attack of dysphæa and while in a drenching sweat he was gently turned in bed, when there was a general opisthotonic convulsion, icterus, on the fifth day death in coma, with high temperature in axilla (These symptoms retained though turpentine was mixed with the Chenopodium, T F A)

Pains through breast, Neuralgia in head and eyes under r scapula and in r shoulder Slight dull pain a little lower than inferior angle of r scapula, but nearer the spine

Clinical.—Intense pain below lower angle of r. shoulder-blade, through to chest Aurasta have found in this drug a valu-able render for torpor of the auditory nerve, as well as for inflam-matory states of the middle and internal ear with the peculiar disturbances of hearing above noted

# Chimaphila.

A tinoture is prepared from the entire fresh plant of Chimaphila umbellata, Nutt.

General Action.-The clinical record of this drug

ble, restless, thinks diseased state of blood irritates the skin, as before eruption of ervsipelas, scarlet fever or measles, with itching Stupidity and sleepiness Partial unconsciousness, faint feeling, as if brain were paralyzed, mind gone Headache, with pain in bowels, sharp, with internal heat in head, unfitting him for exertion Desire to have head pressed

Heaviness of head, feeling as if he would fall down on Vertigo Pain in forchead and above it; over r eye; dull, heavy, over whole front and top of head Weight in brain along brow Burning in eyes, with sore teeling in lids Running from nose
Aching in hollow teeth Tongue feels stiff and
thick in the middle, cannot raise it Mouth dry Tongue feels stiff and

Gnawing hunger Nausca Burning in stomach Feels drunk, as if stomach were burnt up with liquor, as if it were hard, tough and dry. Hardness of abdomen, with swelling, pain, feeling as in dropsy of abdomen Pain in abdomen, then diarrhora Uneasiness m abomen Sharp pain in r. hypochondrium. Liver feels enlarged R side of abdomen feels sore and swollen Colic between pubes and navel

Urging to urinate, waking constantly Urine increased, of a greenish color

Clinical.-Catarrh of the bladder both acute and chronic, sugarry users, not consposition to engage in conversation, aphasia, at which he laughted heartily, whatever he did he repeated many times, he sat down at the wrong place at the tea-table, while grasping a piece of bread there was a spasm of r forearm and hand, fingers were firmly clenched and hand firmly flexed on forearm, he was assisted to his room, his walk being natural, when permeum when sitting

Excitement of sexual system Stinging in labia, as in boils Swollen sensation in labia Pain in vagina, as if labia were inflamed Pulse full and hard; F, then weak Neck feels too small and tired Fluttering sensation in kidney remon, sometimes in one side, sometimes in other, without pain or uneasiness. Needle-like pains in sacrum. Full sensation in extremities, as if distended Weakness of arms and legs Pain from axillæ to scapulæ Swollen sensation in axillæ Paralyzed feeling in r arm Pain in bones of index Needle-like pains in hip-bone Inflammation of skin, with itching, then desquamation, different from the vesication of cantharides, the cuticle being little raised with water, the inflammation extending farther around the part, and next day the blister was circumscribed by an eruption, which continued to increase, appearing like a ringworm. Drowsiness, with weak feeling in head General chill, with quivering of flesh Blood feels as it on fire; with dry skin, blood feels heated, with prickling. Hot flashes Burning of

#### China.

A tincture is made of the dried bark of Cinchons Calisava.

General Action.-For general physiol, action, see Chininum.

Allies .- Cedron, Ferr., Ars , Nat m., Nux v., Lyc., etc.

Generalities.—Dropsy. Erysipelatous swelling of all the evening, with staring eyes. Cheerfulness alter-hole body. Stretching. Jerkings. Trembling. nating with gloom. Many plans for the future; in whole body. Stitches when sitting, now in tibis, now in back, now evening, grand in chest. Pain all over, in joints, bones and periosteum, hees and thighs (Eupat. perf.). Pain in joints when st-ting and lying, with restlessness of limbs; P. as after fatigue from a journey or exhaustion from bleeding or profuse loss of semen. Tenewe drawing pain in almost all bones, now in one, now in another, > for a moment by lying, then more violent than ever (Cimicif). Bruised pain in all joints during morning nap, < the longer he lies, > motion and when fully awake, in joints of ribs, of limbs, shoulders and scapulæ, on touch or motion Rheumatic pains; wandering, alternating with pains in interior of body, without swelling or fever Drawing in bones

Sensitiveness of all nerves, with general weakness (Ars.), S, sight, smell, hearing and tuste too acute, internal sensibility offended and disposition unpleasantly affected; nerves affected by customary tobacco-smoking Dread of open air Uneasiness Lightness of all movements as if he had no body Oppression of all parts as if clothes were too tight, after a walk in open air. Heaviness Weight on joints in morning in bed, > rising; on joints when sitting. Aversion to mental or physical exertion Weakness (Ars , Fer , Nat m ), in morning , on wakafter supper, with sleepiness, on rising from a seat, < walking, in open air, with faintness about stomach and chest, but he has abundance of strength for with extreme vigor Inclination to rest, with mirth Inclination to be down Faintness Stiffness on remaining creet, with pallor and loss of consciousness, of joints on rising from midday nap Internal sensa-tion of impending disease Complaints from a slight draught of air. Aggravation after mental exertion (Ign , Nux v , Nat m.) Comfort in evening. Amelioration from hot tea

Clinical.—Ansema, with extreme debility from nursing or from loss of blood Rapid emacasilon, with indigestion, voracous appetite, undigested stools, copious night-wests Purpura hemorinague after nursing, with rearing in ears, cold, clammy skin, painless duarrhon, which may be bloody Leuccythemia.

with tossing about the bed. No desire to live Solicithinks he is hindered and tormented by every one Absence of the usual lively mood, with desire to be alone Anxiety, in morning on waking (Nux v.); about 8 PM and 2 AM he springs out of bed and wishes to take his own life, but is afraid to go near the open window or take a knife, with heat of body; on waking from frightful dreams Ill-humored; and easily angered; when excited (Nux v); at other times stupid, perplexed, embarrassed; < careses; with sighing. What formerly

Disinclination for mental labor (Nux v.); with sleepiness. Inability to arrange his thoughts, mistakes when writothers; mability to collect his senses if he wakes at

ing or speaking, reverses words, disturbed by the talking of night Slow flow of ideas Slow perception, with aversion to motion. Periodic stoppage of thought.

Clinical.—Sometimes at has been found useful in confused delirans in ansame persons or as a result of great loss of fluids. Rarely an approbands. Occasionally in melancholas during pregnancy or in chrone malars. These is generally distinction to any metal effort, general apatient condition and indifference to what goes on about him; low-spirited and gloomy, or extreme irritability, with weakness.

Head.—Sticking, < 1. frontal eminence Tearing in many places. < walking or motion of head, sticking. in many places, < moving head , jerking, in places, < motion and walk, > lyang. Aching, at night, alternating with frightful dreams; after dinner, lasting till bodtime, < in open air, with weariness, then coldness, now in one part of brain, now in another; deep in brain, < walking, with constriction, < r. side of forehead and in occiput, as if skull would burst, brain beats in waves against skull (Acon.), pulsating, with heat, coldness of hands and feet and repugnance to food ing , after dinner; after eating (Ars.), with sleepiness; (For ), as if brain were pressing together from both sides and out at forehead, < walking in open air, pressure towards forchead as if everything would be pressed out, strong pressure with hand (Nat m.), like a walking; with loss of senses, of joints, alternating jerking towards forehead, < till evening, when it disappeared, as if brain were kneaded together, with excitement, uneasiness, too rapid attention and overstrained fantasies, as if brain were sore, < touch, fixed attention, deep thought or talking, bruised, on walking in open air; burning, with hot sweat on forehead. stupefying, in morning on waking.

Confusion; with tensive pain in forehead and orbits; with emptiness of head and indolence of body, as from night-watching, in morning as after intoxication, with dry mouth; like dizziness from dancing, like catarrh. Stupefaction, with pressure in forehead Oppression, with sweat on forehead Heaviness, in morning on waking, with weariness in limbs, < turning eyes, with heat Mind.—Studen screaming and tossing about during in it and jerking pain in temples. Rising of blood, with cheerful mood. Pitcous, subdued whining and crying hot forehead and cold limbs (Ferr.) Brain seems pressed. out Weeping mood (Nat m.) Excutability (Nux v), by much blood Intoxication, with inclination to be with pusillanimity and intolerance of noise Despair, jolly Vertigo; rising into head at noon, at night on waking, so that he is afraid to sit upright, with inclination tude about trifles Discouragement. Discontented; and of head to sink backward, < motion and walking, > lying, with faintness and staggering, with nausea, then

Forchead -Sticking when sitting, S. and in one temple, between F. and l. temple, > touch, when he feels severe throbbing in temporal arteries, between F and r temple, with violent pulsation in temporal artery; above nose and on cheeks; in r. eminence, < touch; externally on 1 emmence, with vertigo and embarrassed; < caresses; with signing. "The state of the nausea in throat, burning, between F and vertex Jerking tearing in eminences Digging in 1 side when one. Quarrelsome (Nux v.) Disobedience. Want of over 1 orbit; above orbits in forenoon, < walking, > docility Despising everything Irresolute and dis-dinner; in middle in afternoon; when sitting, changing obliging. Absorbed in himself. Indifferent to ex- to tempts on bending backward; when waiting, then in ternal impressions and disinclined to talk. Laveliness tempts; extending over head; moving back and

China.

forth on touch, drawing, tensive, and in orbits; itchof visco and the counting about the eye are frequently assort
my, above orbits Continsion Fulness above eyes tensive the continuous frequently and the coccupit and even into the eye; the pains frequently and the coccupit and even into the eye; the pains frequently and the company of the continuous frequently and the company of the continuous frequently and the continuous frequently as a continuous frequently and the continuous

Temples -Sticking in r , l Tearing in l ; jerking, in r , as if bones would be pressed out Cutting, and in occiput, extending to orbits, < stooping and motion Hammering, extending towards T Aching, in evening , like dry coryza , jerking, extending to upper jaw Pressure on l , pressing together

Spasmodic pain in vertex, then bruised sensation in side of head. < motion Contractive pain in a circle in middle of vertex Digging in 1 side of head when sitting Headache in side to which he inclines himself. Throbbing pain in I parietal bone Jerking from

parietal bones along neck

Occuput -Tearing from r bone to r frontal eminence Aching, as if cerebellum would be pressed Drawing pain when sitting, painful drawing on r side, upon bone, drawing pain in 1, > bending whole forehead were drawn together, ending in temples as a throbbing, > walking, returning when sitting or standing, > pressure Dulness in lower part, as when waking Vertigo while sitting

Scalp -Stitches in 1 side Contractive pain on 1 side of occiput, as if drawn to one point. Continction on forchead as if it would be drawn together in centre Pain on upper part of head as if grasped Sensitiveness to touch. < at roots of hair Sticking itching.

Clinical.—The headache is generally intense, throbbing pain, with great sensitiveness of the head, it seems as if the skull would burst, this throbbing headache is usually worse in the temples, or it may be only in the temples, this temporal pulsation is often noticed as a precursor of malarial paroxysms, with the headaches the external head is usually extremely sensitive to the slightest touch. Violent ansemic headaches as a result of sexual excesses or after loss of blood, pulsating, even hammering, with flickering before eyes, > hard pressure, < slightest touch, sometimes a feeling as if the brain were moving back and forth and hitting against the sides of the skull.

Eyes .- Redness in afternoon, with burning pain and heat Purn on motion, with sensation of mechanical hindrance Biting in one, then other, with lachrymation, B as from salt, with necessity to rub them Sensation in night on waking as if swimming in water Painless pressure as from weakness and loss of sleep Sensation as in general weakness, as if sunken Lachrymation, with crawling pain in eyes and on inner surface of lids Pupils diluted, and almost immovable, with myopia, contracted

Lids -Gum in external canthi after sleep. Twitching of r upper, 1 upper, twitching, blinking, tremin I external canthus Pain, in external canthi Dry sensation between lids and ball, with rubbing pain on moving lids Tickling Itching on l.

Pressure on brows, more externally, < motion of frontal muscles Photophobia Darkness before eyes (this appeared as the headache suddenly disappeared during a sluggish stool, with tenesmus).

Climical.-Retinal asthenopia, with transient blindness or with flickering before the eyes (after sexual excesses) Hemeralopis Neuralgia about the eyes; citiary neuralgia, supraorbital
neuralgia (Ced.), the neuralgia < slightest touch. The weakness

Ears .- Sticking from middle upward through brain : here and there in parotids Tearing in lobules; in cartilage and external meatus (Pain in middle); in I on touch; drawing, behind ear, extending to mas-toid process. Tickling. Throbbing, then ringing. Hearing difficult. Deafness as if something were before the ear internally. Ringing (Cannab ind.); with pain in temples; in r, with tickling crawling as of an insect Roaring Ticking as of a distant watch

Clinical.—Ringing and roaring in the ears, loss of hearing. Frequent neuralgic pains in ears, < touch. Hearing extremely sensitive to noises. External ear very sensitive to touch, sometimes inflamed

Nose.—Redness and heat Stitches in cartilage of septum. Tearing in back Pain in root (Ign ) (after head backward. In articulation of O and atlas, oblig-heat of cheek had disappeared), extending to side Pressure ing him to bend head backward, to forehead as if across root, extending upward, and on eyebrow, > touch, with tension of skin of I wing of nose Sudden biting deep in 1 nostril in evening, < compression of nose, sticking on every inspiration, then itching externally on back of nose Sneczing; at beginning of fever, with coryza. Catarrh, with sensitiveness of nose and pimples on margin of nostrils and septum, which are painful to touch : fluent C, with sneezing and lackrymation; trickling from nose, watery discharge, with stoppage, attacks of stopped C. Bleeding, between 6 and 7 A M . after rising: after violent blowing

Clinical.—Smell very acute. Nosebleed in aniemic persons, with ringing in ears, or relieving headache

Face.—Red: and swollen: cheeks and lobules of ears Pule, and sunken, punched, suckly. Hippocratic (pointed nose, hollow eyes with blue rings), with indifference, insensibility. Earthy Changing color frequently. Sticking in 1 side; in r cheek, > pressure Pain in r side, picking, in zygoma and r. back tooth Pressure across, < near nose and cheek, with contraction of lids as if upper and lower lids were drawn towards each other Lip (cracked); in middle of lower when sneezing , (shrivelled) ; inner surface of lower sore and excornated, dry, without thirst, lower painful near l corner as from a corroding ulcer, sore sensation in r upper, near corner, as after much wiping in coryza Jaw, jerking, sticking in r side of lower, tearing in l side of lower; T in r before midnight, cuttingburning pain in upper when standing

Clinical.—Facial neuralgas. Occasionally useful in erysip-elas of the face, of the vesucular variety, with low delirium. Facial erysipelas in an infant, with hot, swollen extremities (Acon )

Mouth.—Teeth Looseness (Merc ), and pain on chewing Sticking extending outward in incisors; S in r upper back on inhaling cold air, with tearing. Jerking tearing in l upper back, drawing tearing upward and backward in upper, then faintness Digging in Hontal muscies Incopnoma Darkness Descriptions and support dack, > for a moment by buting teeth together and candle appeared in a blinding sulphur-yellow light, pressno upon them Pain; in crowns of r back when then all surroundings were for a shimmering rosy-red bling teeth together, throbbung; picking, in upper back, in lower incisors as if they had been knocked against something Drawing pain in I lower; D. pain in incisors in morning; in upper back in morning. with numbness, in open air and in draft; in l. upper back, with feeling as if gum or inner part of cheek were swollen Gum and lip swollen.

morning; yellow; dirty white crust; (yellowish, not sire to vomit. coated); whitish; painful swelling posteriorly on side; Thirst: in substances, studening in the country of the second of the country is an offensive odor from his throat. Scraping on pal- (Nux v.), to water, with longing for beer (Nux v.). ate Sensation as if he had smelled too strong vinegar, causing coagulation of mucus. Sensation as of an
also with cohe; bitter, also after eating; bitter, sourish, offensive exhalation. Drymess (Ars); of palate in after bread and butter; tasting of food; of badly evening after fever, with thirst. Contractive sensation tasting mucus, hot, then taste of China beginning at in salivary glands. Salivation (Merc); with nausea Offensive breath towards morning, > eating

obliging him to swallow saliva constantly Slimy (Merc.), which disgusts him with butter, bitter slimy. like the bark Sweetish; to tobacco-smoke, S, then sour Sour, to dered by fruit Salt, to food, then bitter; sweetish salt; bitter, salt to bread and butter Watery and Flat, qualmush after drinking Nauseous, at times bitter. < morning, with unpleasant taste to food. from tobacco-smoking, with biting Little to supper Lost when smoking tobacco; after smoking tobacco

Clinical.—Neuralgic toothache > clenching teeth tightly, it < slightly touching teeth, in ansunc persons. Chronic salivation, the effect of mercurial possoning.

Throat.—Submaxillary glands painful, < touch and motion of nock Choking in Y submaxillary gland, < smoked to satiety (Lyc) Weight Emptyes, such touch and motion of neck, with pinching Choking nausea. Nauseous anxiety when satting after a mod- and contraction in gulter Scheking in evening when jorde meal followed by a walk, together with funger breathing after lying down, > swallowing, in r side on swallowing, from a draught of air. Scraping, < on margin of larynx, as after rancid eructations or heartburn. Roughness Contractive sensation Swollen much food sensation internally and when swallowing stocking on I adde of tongue, with pain in that spot on tailing or breathing. Sensation as if food remained in upper part Sensation in juit as if it would become sore, of the food rise, with dynoma, set Dyspepas, with pain in the sensation when swallowing like a sore throat although sensation when swallowing like a sore throat although sensation when swallowing like a sore throat although sensation when swallowing in pharynx, and osephagus Dryness, with could breath swallow when the swallow is a supplied to the food rises, with dynoma, set Dyspepas, somethat satisfy with coldess in stonething for pageton and the proposed of the food rises, with dynoma, and dryspersul, harburn or swallowing; in the discontinuous control of the food rises, with dynoma, and dryspersul, harburn or swallowing; difficult on account of general protestion, set, the Adomen sensitive over the region of the liver, which is somstimes swellen (compare gastric symptons with Lev grotes). sensation internally and when swallowing sticking on narrow feeling Contraction of muscles of esophagus

Stomach.-Appette mcreased; at 8 A.M. without knowing what he wishes to eat; in afternoon; for various things but does not know exactly what; for sour cherries; ravenous, with nausea, ravenous, with insipid drinking, only while eating appetite and natural taste to flatus. Rattling. Commotion. food return, little appetite at noon; dinner is eaten offeneure (compare Carbo veg.) without relish: does not relish tobacco-smoking. Sticking when sitting, extending downward on inspi-

Tongue coated, < afternoon; on waking; white in | Anorexia; before and after noon, with ineffectual de-

Thirst: in evening after fever, with hunger, then after vesicle beneath, painful when tongue is moved; burn-ing stitches; sticking in tip; biting in middle as if sore through skin; after chill; (during chill); during sweat uvula. Bright blood suddenly came into mouth after hands and feet as if too hot; for cold water, with chill an agreeable surprise. Mucus in mouth; in morning and heat, < morning after waking, for wine; little; after waking and after exertion, and he believes there none when eating. Aversion to coffee (Nux v), to beer

root of tongue and spreading through mouth : mcomffensive breath towards morning, > eating plete, sourish, after milk; something half way between Taste bitter (Chel, Bry.), even to tobacco-smoke; B in E. and sobbing Nausea, when he hears not unpleasmorning (Nat m); when drinking coffee; to every- ant things spoken of, with aversion to labor, sleepithing, > after eating; to bread on swallowing, although it ness by day and yellow color of eyeballs, > eating, tasted good while chewing, to food, < wheat cakes; to with flushes of heat and organi of blood; in region beer and the beer mounts to the head; in throat, of pit of throat after eating Vomiting; at 11 15 A.M. principally of water, of sour taste, of penetrating odor,

Spasm in cardiac region. Sticking here and there, coffee; to black bread, as if stomach had been disor- and in abdomen; S in pit, in pit during inspiration, in pit extending to sternum; jerking Clawing. Soreness in pit mornings, with pain as from pressure on a sore place Pressure; after eating a little; after eating vegetables, then flatulence, then vomiting, then burning ex-N. as after cheese Acrid in posterior part of palate tending half way up chest, > while eating, in region, > rising from a seat; below pit as if everything were excoriated, then violent diarrheea Constriction in morning when lying on side, > lying on back Compression in pit, impeding respiration Oppression. Fulness; after eating; as full for a long time after a meal as when he had just eaten, the food seems to stick high up (Lyc). Sensation as if he had eaten, drunk and Coldness Agreeable warmth from region to navel, with tasteless eructation. (Indigestion), of supper Disordered by mill (Nit ac., Nux v., Sulph), by too

symptoms with Lyc)

Abdomen.—Distention; after eating; after a moderate supper (Lyc), with griping and here and there sharp pain, in morning without flatulence; until eructations, with colic and diarrhoa; as from flatulent food and much taste; hunger but want of appetits, food tastes natural yet drink. Fermentation from fruit (Ars, Bry, Puls.) is disagreeable in mouth; relishes supper, but is imme- (cherries) Flatulence Rumbling; between 6 and 10 diately satisfied (Lyc.); indifference to eating and P.M., with movement of flatus and acking, then emission of Emission of flatus;

336

ration, griping S. Cufting at noon, during and after obronic malarial poisoning) (compare Canothus, Cedron); the passage of whitish, turbud urine, with pressure, aboot, pains in the spleen are acute and sticking. General distention of ing in all directions before passage of flatus. Griping, familiar to the spleen are acute and sticking. General distention of ing in all directions before passage of flatus. Griping, familiar to which results from the acid dyspeptia brolves the towards evening when walking, after drinking, as famentation which results from the acid dyspeptia brolves the control of flatus. With pain on passage different sorts. Gall-stone colic (Dr. Thayer declares that China of flatus, with hunger and wearness. Pain like a different sorts. Gall-stone colic (Dr. Thayer declares that China pinching and drawing, < sitting Cold, colicky cramp, the attendant symptoms). Jaundice in nursing children, abdomen than diver charged and liver charged the state of the control of the

China.

pinching and drawing, < sitting Cold, colicky cramp, then diarrhora Sharp pain Colic before stool, before passage of flatus, during digestion, with thirst, flatulent , pain in evening when sitting, as before diarrhoea, spasmodic, composed of pressure and constriction, bruised, in muscles, contractive, in evening when sitting Contracted sensation, with rumbling in lower stool Heaviness Warmth

Sides -Crackling downward and backward in L. as if in ascending colon Drawing-jerking pain when soon after rising eating Drawing pain in r on walking. Pressure in sion of flatus). both sides as if stool should follow but could not.

Beating in r Upper -Rumbling. Swelling of liver (Chel, Merc., Lyc) Sticking in several parts in morning in bed in spleen (Cedron), on walking, in hepatic region, beneath ribs, in hepatic region on expiration, extend. in glans Sticking in perineum, < sitting. ing outward, below 1 ribs, extending outward, < inspiration; pinching, in 1 hypochondrium, pinching, below region of stomach in evening, as before diarrhora Cutting as if splcen were hardened Pinching. > bending double, alternating with nausea, urging to stool and shaking chill all over, then pressure in upper abdomen Intermitting pressure in hepatic region while standing, > bending forward, with pain on touch as if suppurating. Fulness after eating, the food remains long Constriction Internal coldness after every swallow of drink, renewed on every inspiration (compare Ars )

Umbilical Region -Sticking on l. side below umbilicus on walking rapully and afterwards, in r side above umbilicus. < touch, in l side and at same time below r nipple, extending inward. Tearing, below umbilicus. with rumbling, on r side, extending into hypogastrium, > bending backward. Cutting, with cold sweat on forehead, attacks of C Griping externally below r side of umbilious in evening when sitting. Punching in evening in bed, above umbilicus, noon and evening after moderate eating, < motion, > rest; above umbilious on rising after stooping, with conon sides below umbilicus after eating Contraction in r side below umbilious when sitting, as from an induration Heat.

Lower-Paintul distention Gurgling Increased penstaltic motion, with pressure Sticking in I , in region of kidney, in bend of groin, on mons veneris, < walking Tearing on I side near mons veneris Griping drawing back and forth above mons veneris as before diarrhea, when sitting, with short passages of flatus Pressure in l Pain during chill, in region of cacum when sitting, paroxysmal cramplike, in groin when standing, flatulent, with constriction and tension, the flatus endeavored in vain to expel itself, with tension under short ribs and anxiety, sore, in ring, with sensation as if a hernia would protrude through the ring Drawing in bend of groin when sitting, < tendon (of psoric muscle).

**Rectum.**—Sticking in lower part, < in sphincter; during stool, then sticking drawing. Tearing when in bed, with tearing jerks *Pressure*. Contractive pain, < sitting; spasmodic, extending through urethra to glans penis and through testicles, in evening Burn-Drawing, with conssion of flatus and hard, difficult ing pain after midday nap Crawling as from ascarides and discharge of many of them, C as from ascarides after stool. Urging to stool; in morning soon after rising, to thin stool, (meffectual, with emis-

> Anus.—Hæmorrhoids, painful, H bleeding. Sticking during a stool, mixed with blood, when not at stool, and in rectum Sensation of an acrid substance during stool Burning, with burning-itching Crawling. Crawling-croeping, and in urethra, with burning

> Stool .- After eating Diarrheen; with urging; with burning pain in anus, of undigested faces (Ferr) ulso passed in several pieces, then ineffectual urging; and nodular, yellow; (frequent, blackish), and frequent, with biting-burning pain in aniis, and colic before and after every stool Pappy, but difficult, then ineffectual urging with pain Hard. Difficult, painful, after urging with pain long urging Constipation; with accumulation of hard fieces in rectum, with accumulation of fieces in intestines, heat in head, and dizziness White, with dark urine. Bilious Two in morning Intermitted for two days.

> Clinical.-Painless diarrhoss, with bloated abdomen. stools containing undigested food, 'at night, with preast fermentation in bowels general desire for adds and relishes of various sorts Stools, sometimes involuntary, of cadaverous odor Darrheas from esting fruit. Diarrheas, recurring after meals (Crot tig.), Darrheas courarng in the course of debilisting diseases. Dysentery, rarely

Urinary Organs .- Pressure in bladder after frequent and almost meffectual efforts to urmate Micturition frequent, two calls at night; involuntary, in a feeble. striction Colicky spasms Colic, with shivering Pain slow stream Urethra, sticking when urnating, sen-Pressure sitiveness also when sitting and rising up, with stiffness of penis; burning in orifice; burning pain in orifice during and after micturition, burning-biting in forepart in evening, when urinating; bubbling sensation in region of bulb Urine dark; with brick-red sediment (Lyc), copious, increased, with burning in orifice of urethra; whitish, turbid, with white sediment; pale, depositing a cloud; pale, depositing a dirty yellow, flocculent sediment, scanty and dark, scanty, with brick-red sediment

Sexual Organs.—Swelling of spermatic cord, painful to touch, and of scrotum, < epididymis Sticking in frænum of glans, < touch, with tension Pain in glans before urinating; jerking pain between glans and prepuce when walking, itching of glans in evening, in bed. Sore sensation on margin of prepuce, < rubbing of clothes Frequent erections, at night. Scrotum hangs down; sticking itching of scrotum, itching Clinical.—Gastro-duodenal catarrh, especially with yellow turn hangs down; sticking itching of sorotum; itching tongue, oppressive headache at night, loathing of food and yet crawling on scrotum in evening in bed. Tearing in L canise hunger. Enlarged spleen, which is plantid (specially in testicle and in L side of prepuee in evening in bed; drawing pain in testicles. Desire increased, Emis-Istanding sions nightly: at 3 AM.

Metrorrhagia, with black clots Suppression of

Clinical.—Impotency resulting from sexual excesses, noctumal emissions, very feeblirsting, in general, frequently use-transit emissions, very feeblirsting, in general, frequently use-transit emissions, and the sexual emission of the sexual emissions of the sexual emissions of large quantities of blood, cold skin, fainting, convaleive jerks, sic Messtratanto no early and profuse, with dark closs, distention of abdomen, etc. Leucorrheas that comes on instead of the mense, bloody, feld, purplening great weakness, etc. Metrits Overnits from sexual excesses or following hemorrhages, all the parts are very securive to the slightest tooch. General ascense resulting from prolonged nursing Hæmorrhage from the lungs while nursing.

Respiratory Organs.—Tickling in evening provoking cough, which, however, he can suppress. Whistling cough in one impulse Hoarseness

wherehy nothing could be loosened, mornings, suffocative ing and evening) (Crawling in one breast) (a kind of whooping cough), at 2 and 4 a m, with Heart—Dilatation of r side Sticking in screaming on account of it after coughing a few times, times rattling expiration and with roughness of chest Inclination before dinner to breathe deeply

Clinical.—Asthmatic attacks Nervous cough, dry and hacking, with pain in splece, palpitation, intolerance of tight clothing, dsyspaces, etc. Bronchorrhees, with great prostration, simulating the last stage of phthiss, intolerance of the nightest pressure over chest, which is extremely sensitive, loud râles through the chest, and extreme debility. Homophysis, with anismia, cedema of the extremities. Phthisis from excessive low of fluids and vitality, night-sweats (compare Acet ac ).

thages of l third and fourth false rubs; in morning, in nape when standing, > stooping side at night, but during the day only on motion and Back.—Sticking in l side when sitting, throbbing touch; in side when sitting and reading, in a spot sticking Bruised pain on motion Sticking in midbelow last r ribs on pressure and on walking, above pro-die of spine, across r scapula and in 1 chest Tear-cordual region when at rest, < reading; in 1 on expiration, drawing tion when sitting, on I side near ensiform cartilage tearing in I scapula Pain in scapula as from dis-on expiration, and in pit of stomach; in side when location Contractive pain between S when standeating and drinking, and in back, with nausea, when ing. Jerking across sacrum, painful Sticking in walking rapidly, in sides, with heat, hard pulse and lumbar region, in region of r kidney, < bendstaring eyes; from sternum through to back, after ing drinking; below r. arm, in region of fourth rib, as if Aching in sacral region, extending down thighin pleura, > pressure and stooping, beneath last ribs with languor, distention of abdomen and ineffectual on inspiration, arresting breathing; compelling inspiration; outloard near r. nipple, outward in region of extending towards lumbar vertebree, tensive, in sacrum, sixth and seventh true ribs, without affecting respira- as from a heavy load or after long stooping; in small tion, rhythmical, outward; inward in sternum at of back as from cramp or as if bruised and crushed, attachment of ribs, without affecting respiration, with sudden crying out on motion. tickling, in 1, extending towards præcordial region tacking, in 1, extending towards precordual region | Tearing below last true ribs, on 1 side of ensiform | touch, pans shooting into head, etc. Many symptoms of tabes cartilage. Tearing drawing beneath last rib when | have been rehered (see under Extremitles).

Intermittent cutting across when sitting hent

Pain, in region of r fourth and fifth ribs; when coughing, with soreness in larynx, in side, impeding breathing, in side as if beaten; drawing across lower when sitting, causing anxiety, > standing and walking; drawing, behind sternum, in joints of ribs as if bruised, on inspiration, contractive, in middle of r side, so that he must expel the breath suddenly, contractive, beneath last ribs when walking, and a bruised sensation; tensive, in morning, < external muscles Pressure upon chest, on I side near ensiform cartilage. over anterior part at night when lying upon back, in sternum after eating, < sitting bent and raising arm. externally upon middle of sternum when upper part of body 15 bent and when standing, > pressure; externally and wheezing in trachea on breathing Collection of upon sternum when sitting bent, causing anxiety and mucus in larvnx, which he constantly loosens and insufficient inspiration; (sharp, with crawling in one which causes hoarseness; something is adherent to largnz, side), outward in region of last ribs, burning, inward, so that the voice is deep and rough Stitches in larynx, drawing, on r when sitting Oppression; in evening, with roughness Pain in trachea and sternum on sighing, with uneasiness, weak pulse and anxious, coughing Drawing in trachea below larynx, then impatient mood, at night, with whistling and rattling, and with wheezing and rales in trachea, in region of Cough caused by laughing (Phos., Stan); C after prt of stomach as if something were burrowing there. eating (Nux v, Ars), waking after midnight, with Agreeable fulness as from satiety, with sweetish saliva. sticking in both sides of chest at every paroxysm of Burning, extending from upper part to stomach, then cough; urritation to hacking, as from sulphin finnes, agreeable warmth (Throbbing in sternum in morn-

Sticking in precordial region after drinking Palvitation, waking at (coughing up bloody mucus) Suffocative attack as if 3 AM, < lying on 1 side, returning at 9 AM, < luryn c were full of mucus, < towards evening and at mutt motion, after dinner, < movement, > quiet, after on waking. Inspiration difficult and painful, expira-tion quick. Dyspnoa, < walking, with difficult, at blood to face, which was not and red, and with cold hands; with intermitting pulse, intermission of every ninth beat. then three or four rapid beats, with depressed pulse and cold skin, with anxiety, then chill

Pulse.-Rapid, and irregular, and hard, with flushes of heat alternating with chilliness of back, which is covered with cold sweat and cold sweat on forehead Full and hard Slow and weak Thin

and irregular

Neck.—Stacking, then stiffness: slow drawing stacking in anterior muscles when at rest Pain on motion; Chest.—Twitching here and there in muscles Stick- pain in nape as if glands were swollen, on turning head, in 1, in forepart beneath last ribs, without relation to extending after a walk to throat, < touch, when it is a respiration; between 1 seventh and eighth ribs; in car- bruised sensation Drawing pain, on r louer part of

Jerking tearing in 1 side of small of back

Extremities.—Cracking in joints. Trembling from Drawing pain in bones as if perioseum had been scraped a chill and creeping shivering over thighs in open, not, with a dull land creeping shivering over thighs in open, not, with a dull land. and soles sensation weakness (Phos), then had had supported by the mean control of the mean of asleen of those upon which he lies

more by touch than by motion Tearing in motion to a bruised pain in thigh, then < legs axilla and on anterior and inner border of scapula

when clenching hands Sticking in upper, > motion eral warmth, < forehead

Elbow -Tearing through 1, in 1, < motion Sticking in 1 Painful drawing in bend of L, on cronord process of ulna, touch, drawing pains in

bones to fingers in evening

Forearm —Tearing, > rubbing, with drawing back and torth, now r, now l, T in shafts of ulne, < touch Drawing pain, as if periosteum were scraped with a dull knife Falling asleep on bending, for example, on writing, with sticking in tips of fingers tearing in wrist and metacarpal bones

Hand -Swelling of I, with pain across dorsum on motion Trembling when widing Sticking in 1, in metacarpal bone of r index Tearing where metacarpal bones unite with bones of wrist, jerking T in would go to sleep and be numb (compare Coccul and ing pain on taking hold of anything, drawing pain in Weakness palm across roots of fingers. Swelling of knuckle of Foot—Hard swelling, spotted red; soft seelling of middle finger, with stiffness and pain on motion soles. Stacking in 1, (in sear on 1), tearing, in sole Thermy in hones of r dutal plalanges, younds, stacking when sitting and walking. Lerking tearing in metatar-T in distal joint of r thumb, jorking T in phalanges sel bones and toes, in metatarsal bones and phalanges of

asleep when sitting

ing on posterior part of r when standing extending of toes. Stacking crawing as afterfreezing, from great upward Jerking-tearing, on underive part of t, on an-toe to dorsum of foot in evening when sitting, > terror and under pair on touch. Paroxymal tearing islanding and walking. downward in tentors. Pressure in upper part of flesh 
Ciliatesi—Cocasionally useful in hip dosess, the effects of r. nates, on petric bure, when sitting, moreasing my priological oppuration, with sweat, diarrhes, see Chronic synopulselike humanner. Brunsech plan in posterior muscles
Amsarce of lower extremities, shway < towards night, with genwhen sitting Cramplike paralytic pann in r. on rising eral assents and general sensitiveness of the surface of the body to
after sitting some time and on walking, and in kneet, the slightest toock.

Twitching Jerking tearing, < touch, < launds standing; painful D in skin on inner side of L, pain-Sensible, but inventile trembling, with a cooling ful D. downward in shaft of femora in afternoon, < Luxity of all and trembling of hands; trembling sitting, tearing, in 1, nates when sitting, cramplike Heaviness, ay if lead were hanging to them (sticking), and in legs. Sensation in I when standif asleep, < in hollow of knee, < standing. Weak-Upper Extremities.—Propulate rechangelearing in long incss; as from heaviness and paralysis; of hip-point bones, < touch , paralytic tearing, extending into all and knee in morning, with unsteadiness, changing on .

Knee.-Hot swelling of r, with drawing-tearing, wak-Intermittent drawing pain on margin of r axilla, near ing at midnight. Trembling on rising from a seat, > toropart Paralytic jerking-tearing on top of shoulder, walking. Giving way, when walking, < ascending with sensitiveness to touch, the pain renewed by touch, even steps. Sticking in 1. Traing to thigh, with weakness, paralytic T in r, extending now to thigh, now to leg, < more Arm -Tearing if she stands by the window, with by touch thun by motion, with weakness; jerking T. on drawing Tension, and in hands Weakness noticed inner side of patella. Pain on bending, preventing sleep, with nodes in its skin, pain on side of patella Tearing in 1 upper, then in r., jerking tearing in when touched, jerking P, bruised, on motion, drawhumerus, towards upper and inner part, paralytic ing, in r in afternoon on rising from a seat and perking-T, extending from head of humerus along mustles on walking > sitting Drawing when sitting, and in and bones to phalanges, where it is painless, the pain < inguinal joint, jerklike, synchronous with pulse, in touch, with weakness of whole arm Paralytic part in head tendons of flexors of hollows, spasmodic, in hollow of of humerus, losing itself in hand as a tearing, with gen- r in evening when sitting, > standing and walking, extending into thigh (with pressure), as if leg would be drawn up

Leg -Painful cramp in I calf at night on stretching and bending up foot Sticking in tibia when walking . sudden, in upper part of calf when walking in open air Tearing in calf Bruised pain in bones on stepping, < touch, and it she feels of it shivering of foot and chilliness of it as if she put it into cold water pain in lower half as if periosteum were bruised and swollen, on standing, but on touch sore pain as if excor-Drawing sticking across wrist in evening Jerking lated Drawing pain on tibia in evening when sitting, > standing and walking; in r tibia near heel when sitting, then in foot, on inner part of I tibia, below patella, when stretching leg while sitting, > bending leg Sensation as if garters were too tight and leg

metacarpal bones and fingers, a touch, jerking T in Cedron) Burning tension above tendo-achillis Rostmetacarpal bone of r little finger Cramplike draw- lessness, obliging him to extend and draw them up

Jerking pain in l. little finger Drawing in thumb, toes, < touch, < joints, in tursal and metatarsal bones; middle and index fingers of I hand, extending upward at union of metatarsal and ankle bones. Sticking Lower Extremities.—Tottering Pain like a stick- tearing in sole, in region of heel, when sitting and ing and burning on several places. Painful drawing walking. Contractive pinching on outer side of r sole in long bones. Weakness when walking. Falling. Drawing pain in r. metatarsal bones. Drawing on dorsum when standing, with sore pain, > sitting, sticking, Thigh —Hard swelling, at times extending to begin- in heels, cramplike, on inner side of 1 when sitting ning of teet, becoming thinner in lower part, reddish shad painful to touch Jerking in middle of I. Stock-sitting in on posterior part of re when standing, extending of teet of the state of the state

Skin.—Turgor of veins Eruption in concha, (red | without his being able to come to his senses, of fall-milary, on forepart of throat). Boil on cheek, on ing from a height, with waking full of unessiness and pectoral muscles. Urticaria of face, forearms and inability to collect himself Confused, on falling asleep, hands, afterwards with vesicles like varicella. Watery on account of which he woke; C. and senseless; C. and vesicles behind ears (Ulcer discharges offensive ichor, senseless after midnight, with half conscious waking. Of with burning and aching in it, he cannot let the foot masty things on closing her eyes to sleep. Voluptuous, hang down and the foot is painful when standing); boring in U.; throbbing pain on moving part, (sticking throbbing pain, even during rest), sensitiveness, sticking-itching pain.

Sticking in various places Digging in a wound. Tugging as if a hair were pulled, < on abdomen Sensitiveness (Ars.), even of palms, on thighs, to rub-bing of clothes, as if rough and covered with pimples. and redness of face, with thirst Intermittent all day, Sensation on elbow as if infiltrated with blood. (Creep- < forchead, where there is cold sweat, thirst after the first ing on forehead ) Itching at night. I, with oozing of chill. I, with weakness of knees and tibise when walkblood on scratching, followed after scratching by ves-ing and standing, > sitting Internal; without exicles as from burning nettles, on arms, loins and chest, ternal; without external, then cutting in head extendwhen walking and sitting, > scratching; crawling, on ternal, < at times in marrow of bones of feet, which coccyx, > for a short time by rubbing, burning, under are colder than hands As from a cold wind, < walkin bed, with watery blisters, which disappear in cold over arms, loins and thighs air, biting, almost only on those parts on which he Shivering in morning, in morning and forenoon,

chilliness; without sleepiness Sleepiness during the or chilliness, with gooseflesh (Caps), on entering warm day, at 8 30 \*\* u, after dainer, after dinner; with pal-day, at 8 30 \*\* u, after dainer, after dinner; with pal-pitation; then wakefulness. Sleep during the day, S in open air, with goosefiesh, with when sitting; as soon as she site down during the day, old hands and duliness of mind, general, withwith nodding, but if she lies down she is wide awake out thirst (Ars., Phos.), also with internal chill (Ars.), at the slightest noise, with one eye open, the other general, less on limbs half-closed, with balls turned upward as in a dying Coldness, except of fa half-closed, with balls turned upward as in a dying Coldness, except of face, which was red, with sometimes person, on his back, head thrown backward, arms internal coldness on the warm forehead, C, except of face, stretched above head, with slow expiration and strong, which is warm, then coldness of forchead with inrapid pulse, sound, as of a drunken person, then in ternal warmth in rest of body Cold cheeks and feet, morning confusion of head as if he had not slept with cold sweat on forehead, internal heat of face, enough, with pressure in temples on shaking head

thoughts crowding upon each other, till midnight, chill Lambs internally and externally, with general with headache; after midnight, though sleepy, with internal and external heat and slight thirst for cold activity of thought and frequent changes in his posi- water. Arms and abdomen, with reduces and heat of tion, till 2 A M , except from 3 to 5 A M , on account cheeks and lobules of ears; arms, with nausea, then of thoughts crowding upon him, also with warmth to- cold limbs, with shivering and recurrent nausca wards morning, but inability to have less covering, **Hands**, < r; < 1, in morning, and feet, with shivering with restlessness. Falling asleep late, then unsound over thighs, walking, in evening, with hot cheeks, in sleep and exhaustion in morning on rising Frequent open air, with external chilliness as if dashed with cold waking; with sweat on scalp and forehead and chilli-water, and chattering of teeth, > in room except the ness over back. Early waking Shoring inspiration coldness of hands, alternately, with warm, internally, ability to collect himself, starting on falling asleep heat and distended vens, with redness and internal Uneasy sleep, interrupted by four or five erections, heat of cheeks with general sweat after waking in night; full of dreams and crying out, with uncovering, worrying dreams of arms when walking in open air. former occurrences, and in the morning he cannot get awake on account of confusion and stupidity in head, in morning out of sorts and unrefreshed

Dreams -Heavy, making him anxious after waking Anxious, whereupon he woke half conscious and re-

with emissions

Fever .- Chilliness , at 5 AM , with weakness of feet ; after dinner, then heat, < drinking, with pressure in abdomen Alternating with heat all the forenoon, in afternoon, together with weakness of lower limbs, all < walking in open air, with some thirst for cold water < evening, and after scratching pimples; on r sole ing into orbits, periodically, with shivering, and exkness and on inside of arms when warm and at night ing, seldom with shivering, it only comes when sitting,

lies. > scratching and lying on other side, biting, with cold hands, nausea and rapid pulse, at 5 PM during midday nap, almost only on those parts upon when walking in open air, > in room, with coldness, which he does not lie and which are turned upward then heat. < face. < motion and walking, then thirst. Sleep .- Yawning, with stretching of limbs; with (in evening on lying down), after every swallow of drink,

trunk and thighs Cold nose. Back, when walking Sleeplessness all night, with vivid disagreeable in open air, then heat in back with sweat, then again

Shivering above elbows and knees, over chest and

Heat in forenoon before a meal, then when walking in open air cold sensation on ankles and coldness of rest of body; in afternoon, with redness and heat of face, great hunger, burning of lips if they touch each other and burning sticking in skin about lips; towards mained frightened; that he is descending a precipice, evening, with rapid pulse; after midnight, with dry waking him and remaining vivid before his fancy, < hips but no thirst; with distended verse and easily closing eyes, and he cannot quiet himself. Frightful; dilating pupils, without theret; almost with inability just as he is falling asleep, waking him; waking him to uncover hands without difficulty. General, with stating in skin (Merc or), < on neck, with there for lumps; watery, blackin, immediately after dimers; old sealer, with swelling of vens of arms and hands, watery, brown, paniless fiscal stool, with mucus and without awat or thirst, from 5 to 7 P.M., < walking; blood, tensemus before and after the stool.

In open air, which caused sweat on forchead, with hunger preceding and listing into beginning of heat; afternoon. Statching in front of r lower part of chest, tion of hot water running down (a creeping of heat not affected by breathing, coming and going quickly over abdomen and down thighs), with red cheeks, in lower part of I lung, with pressure as from flatufor cold water Internal, with red cheeks, heat of as if heart stopped after 1 PM, beating imperceptible trunk and arms and moisture of forchead Internal Trembling of heart, with a rumbling noise, I was and external, with stuking in several places in skin and unable to distinguish the pulsations, this lasted an thirst for cold water, I and E, as from wine, with hour, then beating of heart and pulse (the latter imredness of face

Burning in various parts during the day, with 200 Pulse 200 crawling and itching. Heat of head towards morning, Momentary pain in joint of 1 great toe, in 1 little with oppre-sion of chect, of head, with swollen venus, finger and in region of 1 electation. Wearnness in of hands, of head and face, with congestion, swelling shoulder and elbow-joints. Three pain in biceps of 1 of veins. External our Face, at 3 r u, with red jarm. Sore aching in 1 forearm, in muscular mass. Skin not sensitive to air in morning after night-sweat

general, as soon as he is covered, with such sleepiness that hitle toe Sleep interrupted he cannot yet up, general, when walking in open air he cannot yet up, general, when walking in open air Cold Oily in morning Of body after walking in 3 AM, with three, attheut, section to see the set of the where he less upon cheek. In hair of head, when walking in open air On face and hands, on face in norming on riving, cold, on face, with three On maps and broken slightest motion.

Clinical. - Intermittent fever, without constitutional cachexia, creek general weakness and anemia, the paroyam is fully developed, the three stages of chill, fever and sweat are fully marked, proceding the chill there is volent think, often violent temporal headache, there is an interval between the chill and fever, but rarely any gastric disturbance, during the feverthere is generbut rarely any gustrat disturbance, during the fever there is gener-ally thirst, sometimes unnatural hunger, an interval between the fever and sweat, the sweat is profuse, debilitating, with thirst, during the apyrexia great debility, ringing in the ears feeling of emptiness in stomach, soreness over the spleen and liver, with many symptoms characteristic of the drug

## Chininum Arsenicum.

The arsenate of "Quinta" is triturated for use.

General Action and Allies .- See Chimmum sulph and Arsenic

Tired feeling Head feels too full or as if it would Belching, then urging to stool Nausea, during stool, the poison on the system.

with retching Burning in stomach Pressure behind Allies.—(See China) stomach, not > dinner, which was relished, in solar plexus extending towards back, where it changed to quent yawning Falling suddenly in the street, fall-pinching, spine sensitive to touch at this point. Emis-ing to the ground senseless Convulsions Twitchings som of flatus Chie, below unbilicus, with urging in evening Treibling. Wandering symptoms.

to stool. Internittent Sudden violent urging to stool. Neuralgia, > warmth, wandering N. Shocks or right of unbilicus. Sudden violent urging to stool.

stacking in skin (Merc cor ), < on neck, with thirst for lumps; watery, blackish, immediately after dinner:

cheeks and dry sticky lips, without thirst, on coming composed of supinator longus and brevis and flexor from open arr into a room that was not warm, and longus pollues, in flexors of 1 forearm, relatal side cheet, then shivering and chillings and general cold-near elbow, same pain below 1 knee, in first phalanx mess, one or other cheek and lobule of ear, with red-jof 1, then r thumb. Pain in first joint of 1 ring fineses, and before this disappears chill over body, then ger Palins dry and hot Wenriness of lower limbs, over lower limbs. (Anteriorly on upper part of thigh). Pain along from to lower two-thirds of 1 this, inter-Sweat, in morning sleep, at night, in sleep (Ferr), knee and in ealf, fleeting sore, in sole at root of 1

> there are cold sweat, prostration, great irritability, brown diarrhœa, etc

## Chininum Sulfuricum.

Pure sulphate of "Quinia" is triturated for use

General Action .- Quinine is, above all, a protoplasmic poison, devitalizing the blood and tissues, it particularly retards the climination of nitrogenous waste (urea and uric acid), and causes the retention and accumulation of effete products in the system (though, for a time the diminished waste gives a sense of "tone" to the system, the ultimate result is deplorable) It causes congestion of the brain, and, in large doses, abolishes the cerebral functions It is an irritant to scrous membranes and to the skin . it causes deafness and serous inflammation of the inter-Painful pressure in forchead and temples, nal ear, blindness, ischemia of the retina and optic Confused pain in forehead and occipital protuberance | neuritis; it produces stupor, delirium and even con-Dull, heavy aching in forehead and occiput, in cere-vulsions (Epilepsy is intensely aggravated by it.) bellum on motion Sudden throbbings in temporal Quinine, however, arrests the development of low arteries after 1 PM Tasto metallic, bitter Throat forms of vegetable life, and especially of the poison of dry Loss of appetite, with weak feeling Hiccough marsh malaria, but it rarely antidotes the effects of

Generalities.-Emaciation. Pandiculation, with fre-

Diarrhœa four times, urgent D., containing jellylike as I supraorbital nerve, r. ear, r elbow, r. knuckle,

etc. Twinges in various places in afternoon; in lower | > sitting upright. Pain, in morning on rising, < 1 side, half of r. scapula in afternoon, then in r. lower jaw, then confusion of head, then frontal pain, < at 5 p.m.; at then in upper, in malar region, frequently recurring in 9 A M, < 1 side, with vertigo, ringing in ears and weaksome places. Catching or sprained pains on sudden ness, towards noon, < till evening, and in temples, motion, e q, in outer fibres of deltoid tendon on rais with visible pulsation in temporal arteries, heat in ing arms, in tendons in front of 1 ankle when flexing head and ringing in ears, in atternoon, from 1 to 4 joint suddenly

the letter, at 5 par, with collares, at might, and dissense, about eyes comfort. Excitoment of arterial system, as from Temples—Twitching of nuscles above 1 zygoma in strong wine. Increase of physical powers Weak-afternoon Neuralgia shooting up 1. anterior when nees, in morning; in morning, on waking knth dul-sitting at the table, leaning to r Tearing in 1, win neess of head; on waking from afternoon nap, with dawing Pain, towards evening; in 1; in afternoon, from sleep; from sweat, after walking in open air

air, with activity Quietness Apathy Indolence bounding in artery in afternoon Disinchination for mental labor Thought difficult Parictals-Statch in I upper on rising suddenly,

opening mouth < 1 side, with pulsations in temples and excitement and r temporal ridge, again in r ear, then back to mode body, in afternoon, after a long walk in the brow, later a catch in middle of r sterno-mastod sun, in afternoon, extending to temples, > evening, in usele on turning head that way after midinglith Pain with vertigo and loss of memory, < towards evening, in 1 side of head in morning on writing with head in-with pulsation in head, as if it would be torn to clined to 1, extending to 1 side of fined and throat, r</p> fever

Fulness in forenoon when writing, with coldness of . Heaviness, in forenoon, putting cold hand on top, I protuberance in afternoon, becoming a steady ache, with fullness and dry heat, and with coldness of fingers | Scalp -- Dandruff, and in heard on chin, < 1 side. and feet; in evening, < top Confusion Empti-iness; in morning Stupefaction Throbbing on vertex and occuput, above edge of frontal hair, r and rising and bending over table, and in shoulders is sides, when writing, then below x xygoms, then on Rush of blood; towards evening Intoxicated sensa- r side of vertex, then I vertex, r side of chin, I posttion, though his mental powers were perfect; I sen-, mastod surface, I inner cyclrow, etc sation, preventing walking; changing to heaviness of head Whirling in head like a mill-wheel. Vertigo, at tense pulsation, vertigo, etc Vertigo, twitching of evolution. night, < sitting up in bed or getting up on his feet; on stooping, with palpitation, increasing to faintness

Pricking, with confusion of head. Tearing and draw-Restless. Dry, > walking in wind in evening, when ing. Neuralgia from r supraorbital foramen in a nar-there was lachrymation of r eye Easily tired when

PM.: 4 PM. between 5 and 6 PM. 7 PM. at last ex-Quivering sensation internally through body at the tending to occuput, on waking, after dinner, < towards middle, in afternoon, then eructations General sen- evening, < moving eyes or head, and in orbits Pulsitiveness Restlessness, in forenoon, after writing a sation in arteries at 4 PM, with heat of face and red-

dulness, with sleepiness and desire for solitude in extending to middle of forehead, in 1, extending to some dark corner. Old and "wooden" feelings, with cycbrow, obliging him to seek a cool place on the sofa deliberate motions and speech Faintness Heavi- to relieve the pain, drawing, to middle of forchead, ness, in forenoon, with drowsiness Amelioration in 1 T and supraorbital region in morning on rising. om sleep; from sweat, after walking in open air | > by a walk, returned on following days, sleep poor | Mind.—Disturbance, or rather emptiness | Insanity | on account of toothache on 1 side next night tooth-Excitement Feeling of impending evil in afternoon, ache on both sides, < by bringing teeth together and <br/>specific trust in the Almighty Despondency biting, with anxiety and sharp pain in 1 temporal and Anxiety, at night, with little sleep, at night, obliging supraorbital regions, < under 1 ear, where it extended him to leave the bed, as if he had committed a deeply inward, sometimes cutting in 1 external audihim to leave the bed, as if he had committed a deeply inward, sometimes cutting in i everina audi-cine Fretlinose Auger after sleep, even about a lory meatus, face puffed and red, pain in both temples draught on legs. Resolute in evening, but shrinking | walking, with tensive drawing in skin which made from taking nuch trouble about matters. Positive in work impossible, the toothache was transiently > by insisting on professional orders in forencon, but self- pricking gums and rinsing mouth with cold water, restrained and deblorate. Buoyancy, in evening lister this neuralgua appeared every night at an and Lavely mood returned at 9 PM, after a walk in open and lasted till 6 AM. Fulness of arteries in evening;

when writing Memory "muddled" Mistakes in in I upper, when standing holding head down, exwriting, "loft" for "right," and rice versa. Loss of tending to I side of root of nose. Neuralgia in I in power to name substances, mistakes in adding figures, evening, then in r vertex, in and behind I protuberperception of quantities impaired Vacancy of ideas ance in afternoon on going out, with the head down, Head.—Swelling in morning, with difficulty in in r side of head in evening on walking in open air, Chronic disturbance of brain lasting some time in r upper temple Pain in r side Aching, in morning on rising, < stooping or moving, of head when writing, extending as neuralgia to r at 3 AM, > rising, with pain in occiput; in forenoon, outer brow, then to mastoid process, returning to brow pieces, heat of face, vertigo, at times ringing and roar-| mastoid process, then to vertex, then to occiput, then ing in ears, > sweat on walking in open air, with shifting to brows (varying with the position of head), now in temples, extending over coronal suture

Occiput -Shock across lower in evening on holding feet and inner calves, < 1, sudden, in forenoon after head suddenly to r Pain, waking at 3 AM, rising, writing, when leaning it to the left, < 1 side and top threatening of pain in 1 in evening. Dull twinges in

Eves.—Surrounded by gray rings Red, with swell-Forehead.—Sticking; boring, in I centre in evening | ing of lids and appearance of pimples | Lustreless row line to vertex, at night when bent forward reading, reading Sleepy feeling in afternoon when sitting.

Heaviness in forenoon, and in forehead. Retrobullar nostril, in evening when sitting in shirt-sleeves; at optic-neritis, with sudden loss of vision Lachryma- night when resting back against cool wall; on walking oblications, with studied loght, I in open air Disc in open air; s getting feet cold. Hemorrhage.

orbital nerve in forenoon, in r supraorbital nerve in evening in street-car, then in 1 in 1 supraorbital nerve, near foramen, in evening when writing, from r to lamboidal suture in evening when sitting; in r outer at 11 30 P W , in outer half of r. after midnight . alternately in each at night, in r supraorbital nerve, near foramen, when sitting in church; from r outer to lamboidal suture when standing Twinges about r. outer in afternoon Flashings in branches of 1 infraorbital nerve in afternoon Pain in r outer subra-1 30 AM, in outer half of 1 orbit, above it, below it, in evening when sitting, and in eyeball

Vision lost, with pain in forehead as if head would burst, dim Photophobia, with lachrymation in full glare Bright lights and sparks

### Clinical.-Intermittent strabismus

Ears .- Sticking in 1 in forenoon, r. at noon, r in par, in r at 11 30 rm, also in r submaxillary, then in Rough feeling in morning. Soreness of sockets, with I glands Tingling Feeling as if stuffed with cotton inflammation of gums

Ringing, < 1 , with sensation as if plugged up , inzing, in r extending over head, after coffee, intermittent Resonance in r in morning Roaring, causness, in l Hearing lost Hearing difficult Intolerance of noise

Nose.-Sore pimple on r side, at end of nasal writing) Tingling anteriorly in nostrils in evening Dry Titillation in r upper nostril in afternoon, then motion of tongue. sucering, then snuffling and flow of water Sensation r. side Fluent coryza in r side

running over it smaller than usual Disc papery Sickly expression; and hollow-eved. Edema and white Ball pale Dirty color to the white of the of limbs, with erythematous rash, and feeling as if arms would burst Twitching of Lavgomatic muscles. Pain below I zygoma between 1 and 2 Am. about l lower, in evening, of I outer canthus Closure of malar-bone in evening; in I infraorbital and superior lids from weakness when writing Feeling as if some- maxillary nerves, cold air, with boring, at times lids from wokhnes when writing reeming as some inaximary nerves, color air, with ooring as times thing pressed lids down, making vision nafistantet. Brow—Stacking in 1. in evening, at 1 inner in even suddenly above 1 sygoma when writing with head bent to 1, mg when writing. Neurilagia in r inner, deep in r. index timporal ridge; varying from 1 supra-ygomatic outer, in r inner in morning on bending forward, in region to ear, throat, upper molars, in evening when r outer in morning on raising brows, extending up side inding in street-car, with head inclined reading, > of head, then twinge in outer end of l, in l. supra-holding head up Rheumatic (or neuralgic) pain in zvgoma, malar and nasal bones, extending to side of head, in afternoon, from cool wind on r side of face, with tingling in nose, as before sneezing. Dull twinge above root of r zygoma in afternoon

Cracking in joints of jaw, every time mouth is opened Cutting in I lower jaw in night Neuralgia. in r joint of jaw in morning; in I lower jaw in a cool room Lans livid, and cool. Eruption on lower hp. l, then r side

Mouth.—Teeth Clenched after midnight Tartar orbital region in morning, in I infraorbital nerve at increased, soft T on upper front, after removal of which soreness of gum on touch of hp, the secretion about upper molars seems to putrese and irritate. sticking in incisors in afternoon, < 1, in I upper second and third molars in evening Cutting down-ward and outward from I lower amalgam-filled molar. Neuralgia in last 1 upper molars in atternoon, extending to zygoma, in molars in afternoon, extending into I jaw, in lower and in ear; in I, molars filled with evening, I on retracting chin, involving throat, in amalgam, extending to jaws, in I upper molars filled I. meatus in afternoon after going down-stairs Pain with amalgam, in afternoon, then in middle upper and above r ear and mastoid process in evening, in r be- lower molars Aching; between amalgain-filled tween 1 and 2 Au, suddenly in 1 when walking, in molars, < cold air, > application of warm hand. open air Tension in parotids, with flow of saliva, in Pressure as from a knife-blade, in first I lower molar, afternoon, in r when walking after supper, after a downward and forward into l jaw, in afternoon.

Tongue -Coated yollow, and dry; at root, except termittent, sudden, in r like a bell in E, when walk- tip, which is red; with slimy yellowish froth; with ing in open air, causing deafness. Hissing Buz- slimy fur, yellow posteriorly, yellowish white; coated with white mucus White; in centre, pale on margins, with vellow coat at root Pale, covered with ing deafness. Sensation as if a horse railroad had its tenacious mucus. Flabby in morning, and whitish, course through the brain, < on alternate days. Deaf-Twitching of middle of r, lingualis muscle in afternoon, of end of 1 lingualis in afternoon when writing. Articulation impaired. Speech difficult, lost

Mouth -Cavity pale. Full of mucus at night, with hone Twitching in afternoon Neuralgia at end of hunger, tenacious coat of mucus on back part of 1 bone in evening (head held obliquely down in palate in afternoon, causing efforts to swallow it. Salivation Offensive breath Expired air when sitting, in l side after support on going from one cool. Tasto bitter, to bread, bad on rising, with room to another, with sneezing and flow from r side bad breath, pasty; brassy after breakfast; acrid, >

Throat.—Swelling, impeding respiration and causing of coryal, with sneeding Stoppage when in a green-hourseness Sudden starting from sleep at 2 am, house after riding in wind. Moisture in evening, < throat swollen, inspiration difficult, necessity to rise, difficult coughing up of mucus, respiration > cough-Sneezing in morning when dressing, with discharge ing, with sweat, < back and legs, general heat, respiof mucus, at noon when waiting on doorsteps, after-ration became rattling and gasping. Catarrial noon on entering house, at 2 P m when standing in clogging of upper pharynx in mening; of upper part a cool shady alley, then blowing of mucus from r. in afternoon, the mucus detached by repeated swallowing Tough mucus: at night, waking and obliging rhoes. Tense. Rumbling: with tension, sensitivevelum palatı in afternoon.

afternoon; at 2 PM., with eructations; at 2 PM, with at first mushy, at noon, < sudden standing up, > per, then nausea; for acid food, ravenous at night; at 2 r w, with emission of flatus ravenous after eating, changing to nausea; canine, satiated by a small quantity of food, which took from region of gall-bladder to r rectus muscle, mov-away all appetite for the next meal Diminished ing from edge of liver to outside of and below r nipaway all appetite for the next meal Diminished ing from edge of liver to outside of and below it in the form of the first though the appetite was jie, in evening on entering house; subcutaneous cut-not increased. Lost, with sensation of fasting, lost ting S in I hypochondrum in afternoon. Suppuration breakfast, with increased hunger, lost, but draw there essention in region of liver. Pain in region of ing in stomach as from need of food, lost, but sense. "phen, > pressure; in liver region before going to bed; in ton indicating that one has some loss to make up. (I increased in morning, > pressure of hand Crampy retracting stomach. A version to food; to beer and decling in I rectus, in I horder of I upper rectus at I change, of sting; in I horder of upper I. in afternoon, in evening, < morning, < night.

supper, at midnight when sitting, tasting of supper, Discomfort in upper after 2 r m, with tension and dis-at 130 A m when crouching, tasting of supper, with tention of abdomen towards evening, with pain on and uneasiness in stomach, E of ingesta in evening above umbilicus in afternoon when sitting, extending when sitting bent, of half-digested matters at 1 AM to sigmoid flexure and rectum Cramp to 1 of and when sitting, causing me to loosen the clothes, pyrosis, above umbilicus when sitting in street-car Rasping like hiccough, at 1 AM on starting out of the room, pain from umbilicus up to chest before copious men-with sticking in r lumber region Hiccough and struction, with dragging towards genitals Pain in l. with sticking in r lumbar region retching

Nausea, in morning, > eructation; during a meal, pain in small intestines, with cutting, then diarrheea with vomiting, with weakness and shivering, sudden, forcing her to bed, sudden, after moderate eating of pork and vegetables, with vomiting, heartburn, con-outer groin in afternoon when sitting threatening, when walking after eating, > loosening towards genitals waistband Vomiting, of insipid taste in atternoon Colon—Comm

blicus, < pressure Pressure offer eating, then cutting in Pinching in transverse and I in afternoon walkupper and middle addomen; P from the slightest food, with ling in the house and when in street-car. Pain in
return of the usual symptoms. Fulness, in afternoon, transverse and 1, in afternoon, in transverse in
cerications, in epigastrum. Oppression when afternoon, going to rectum as if for stool, in r supesiting, evening by loosening wast-bands and eruce. For angle in evening when training, in transverse and 1. side, with emissions of offensive flatus Pulling, when sitting after motion and in crophagus All the symptoms of a continued Rectum —Commotion in evening, when sitting. fast. Emptiness, > drinking cold water and eating, Itching Tenesmus, with griping in abdomen, with with drowsiness

Sudden gnawing at 1030 PM, before supper, on ascending stairs, then crampy gastralgia, > standing of bright blood Sticking in 1 side of inner sphincter up straight, then shuddering of head, reructations in afternoon, to r of anus in evening when walking, Cardialgia Pyrosis in evening Heat, starting from with itching, sudden crampy or cutting stitch in inner cardiac orifice and extending to abdomen and some sphincter when standing Uneasiness > by gently times to chest. Heartburn, at midnight when stand-forcing down rectum Itching in perineum.
ing bent over table, after eating dry bread Coldness Stool.—Liquid, frequent Dissolved, dark brown ing bent over table, after eating dry bread Coldness after ice-cream, > loosening clothes, with uneasiness Pappy, frothy, frequent, with much wind First half jelly-

him to cough it up Pan < swallowing, < moving ness to pressure and discharge of flatus Commotion neck; > evening; till night, with rough voice, in as before diarrhoea, then emission of flatus. Emission both sides, afterwards extending into larynx, > of flatus; on rising, then irritability around anus; towards evening, with sensitiveness to pressure Con- offensive, offensive, in evening; offensive, on moving striction Sensation as if something had lodged about after midnight, offensive, after micturition. Scraping in afternoon, with irritation to cough and Flatus goes into rectum with a shock, when leaning slimy expectoration difficult to loosen. Dryness back in chair, then presses on anus and escapes, then Irritation to cough Tickling Itching of r side of similar movements in l. colon and intermittent twinges of colic, the colic > emission of flatus Tearing Pain Stomach.—Appetite great; at 9 AM after eating, in during the day, on rising, > stool of cadaverous odor, drowsmess when m'street-car; m evening, after sup- emission of offensive flatus; with diarrhea; sudden,

Hypochondrum -Sticking in I side below short ribs; rectus in evening.

Eructations, bitter; tasting of food, tasting of Cutting in upper, < pressure of hand, transversely breakfast, tasting of tea taken at supper, tasting of across upper and umbilical regions, with twisting. flatus and yawning, tasting of supper, with fulness pressure, and oppression of chest Pain to l. of and side in evening when sitting bent to l Wandering

Hypogastrium -Subcutaneous cutting stitch in l. striction of stomach and distention of abdomen, inguinal region in morning when standing. Dragging

Colon -- Commotion in 1 in evening, including 1. Pain, in epigastric region, extending towards um- lumbar region Sticking in transverse, in evening tations; in epigastrium, waking towards morning, sigmoid in evening, semission of flatus, in trans-turning over, in epigastrium and hypochondrium, verse when sitting Giumbling, colicky, in l at noon

a difficult, small, soft stool, meffectual

Anus - Harmorrhoidal trouble increased Discharge

Indigestion from eating two apples late at night like, with much wind Diarrhoea, with pain across Acidity, with distress in epigastrium Trembling abdomen, with drawing and cutting in abdomen; light-colored; slow in coming away, with much wind. Abdomen. - Distention; in afternoon; before diar-Soft, but impeded by painful contraction of inner sphincter, which feels like a firm rim Mushy at first, ling, with anginose condition Cough, with expectoravellow, clear mucus Profuse; rather hard Scanty after postponement hard, with a peculiar sensation from r hand to shoulder Omitted, and abdomen distended

Urinary Organs.—H. marchage Catarrhal inflammation of bladder Flow of residue of unne after replacement of clothing Micturition slow, with turbid urine Urging to urinate, early in morning, in afternoon when walking about the room, with colic in transverse colon, frequent, without increased secretion Constrictive biting in orifice of urethra at 9 p M after urmating

pale, and bloody, and bright-colored, and high-colored, turbid Scanty, cloudy, contained urates Respiration increased Oppressed and scunty, with sediment, with sediment of yellow-irregular Slow, and irregular Sighing prisms, with four-sided pointed ends, the crystals en- and attempting to swallow at the same time veloped in tough mucus Turbid, with chocolateacid increased

adherent, of strong odor Red Gravelly Brickmanular, with glittering transparent colorless crystals ored, right-angled prisms, with rhomboidal fragments. and fragments of three-sided pointed pyramids, sediacid, consisting almost wholly of phosphates

Sexual Organs .- Eruption Itching on 1 side of scrotum in afternoon Aching in r spermatic cord in afternoon, with relaxation of scrotum Relaxation of r testis in evening, with aching Function decreased, lost Emission in morning without sensation, at night without waking Uterine harmorrhage Abortion Labor pains

Scraping soreness in larynx and trachea when swallow necessity to loosen bands of clothing ing in morning on rising, > coughing up mucus, anxiety Praccordial uneasiness Pal

then like diarrhoea, preceded by offensive flatus With tion of mucus, in morning, once the mucus struck Constination. Hard: and the roof of the mouth, in forenoon, in afternoon crumbling, at first, then liquid, at first, then thin when walking in open air, in evening when standing in open air, with threatened irritability in 1 bronchi: Sluggish and scanty Difficult, and painful, but not at night, with necessity to sit up in bed to get his breath, after midnight, with swallowing of mucus, when walking in open air; cough > expectoration from very low down, cough, with gelatinous expectoration from lowest part of bronchi Loose cough Short cough in afternoon, with swallowing of mucus.

Expectoration of mucus from r side of glottis in morning, afterwards from posterior part, E in forenoon of opaque, white globose mass of mucus, another of extoliated epithelium, these surrounded by three times their quantity of transparent secretion stretching out Urine - Copious, preceded by distention of upper between fingers to more than an inch, of lumps of and lower abdomen and by oppressed respiration, and thick sea-green mucus, which sank in water, in morn-

Respiration increased Oppressed in steam-cars O. Jumentous Frothy Dark, of strong odor and acid, as from a hoop about chest Short Superficial and ish-red crystals, with powdery vellowish-white sedi- weary inspiration in evening when eating, then loud ment Of strong odor Watery, does not redden lit sighing, heaving, groaming expiration Arrested by mus-paper As clear as water, containing four-sided contraction of throat on rising suddenly from a seat

Chest.—Hæmorrhage from lungs (probably) Stickcolored sediment. Uric acid decreased. Phosphoric ing in 1, in r., in r half in afternoon, extending to nd increased shoulder, impeding respiration, bending forward, Sediment—Light-colored, mealy Yellowish-white, in 1, preventing deep respiration. Pain below sternum, almost sticking, < deep breathing or sudden motion. dust Fatty, with slimy flakes in urine Straw-yellow, Pain in r , in morning on rising, > noon , in 1 half at 7 PM, extending to back, < deep inspiration and Like candied sugar, consisting of urate and purpur-torcibly throwing I arm backward, - leaning upon I ate of ammonia, with phosphates Of brown granules, forearm with body bent forward (as when writing), kidney-shaped, one of which showed bright concen on rising, in I. clavicle, transversely through chest tric layers Of crystals; orange-colored; orange-col- at night, from racking cough Crampy feeling at ends of r false ribs in morning on bending forward to brown, starlike, rhomboidal and pillar-like, prisms urinate; at angles of r true ribs in afternoon, outside of and below r nipple when in street-car Oppicssion ment rose-red, of rhomboidal flat crystals, with here Feeling behind middle of sternum (esophagus?) as it and there double pyramids, with only traces of uric food stuck, feeling as of something indigestible behind lower sternum in evening, > eructations, feeling to l of sternum in morning as of spasmodic condition of esophagus from indigestion Tickling in 1 in evening

> Clinical.-Pneumonia, with great oppression, weakness, deafness and whizzing in ears, or rushing like a storm in ears, or ringing of bells, must lie on the back (Sang)

Heart.-Sticking in region of apex Pressure in Respiratory Organs.—('ontractive feeling in a weak precordial region, with passage of flatus Tension in spot on 1 side of hyolaryngeal space in morning precordial region, < 1 side below short ribs, with Præcordial Palpitation, in which caused rawness in I bronchus and I lung, after morning on waking, lying on I side, lying on heart; wards the cough caused rending in fauces. Tickling in morning caused by indignation, lying on heart; in larynx; in evening, with cough and expectoration in afternoon when roused suddenly, had to lie on of mucus, after midnight, at bifurcation of trachea heart and support it with the hand, when lying on r in evening, with cough and raising and swallowing of side, > lying on abdomen Action accelerated in fore-mucus Hoarseness at 4 P w , H > swallowing mucus noon. Strong beating at 10 Am, after excitement Loss of voice

Cough towards morning, caused by a painful spot in throat, at 1230 a v, with tickling in windpipe, in evening when diessing, with sticking in upper lafter going up-stairs; through much of chest on being lung (?) and rheumatic pain in 1. trapezius, near pos- awakened from a nap, > lying still; in forenoon when terior edge of scapula, when in open air without sitting after an incomplete stool, extending to head; overcoat, when sitting in street-car, < towards morn- after breakfast, sitting at stool with elbows on knees.

felt through chest, down back to sacrum and through humid, windy day, > warmth Rheumatic feeling in Feeble movements

mittent; and small and irritable. Slow; in morning in afternoon, from muscular effort; in one or other and afternoon, and strong, afterwards rapid and weak; deltoid when arm was in malposition, extending half and scarcely preceptible Scarcely perceptible Small, way down outer arm Rheumatic pain in 1 at noon. almost imperceptible

tending to l ear dorsal vertebree to pressure; of dorsal vertebree, of ulmar nerve from below l axilla to below elbow, in first and second dorsal vertebree, third dorsal vertaffernoon when writing Bruised feeling Lack of tebræ pun on touch, with oppression of chest (Phos ), control over muscles in afternoon pain in second and . first, on pressure in after- Upper Arm -Twinge in superficial nerves, in inner noon, dorsal vertebra more painful to pressure and outer aspects in evening when writing Pain in during the chill than the cervical or lumbar vertebrae ir outer in evening Sticking around lower angle of r scapula Rhoumatic Elbow —Pain in front of, in afternoon when pulling feeling at inner border of 1 scapula, in 1 upper and a door. Sprained feeling at biceps tendon on forcibly inner scapular muscles in afternoon after sitting in a flexing r forearm draught, at 1 inner scapular border at midnight when Forearm —Twitching of 1 ulnar flexor, of tendons writing, > supporting arm

border of r scapula in afternoon lumbar region

Clinical.—In spinal irritation, with great sensitiveness of the spine in the region of the first dorsal vertebra, the pain extending towards the head and apt to recur periodically

Extremities .- Livid and cool Trembling, and con-Weakness; of arms and legs

chair)

Shoulder.—Cracking of joints on rausing arms of fluid passed thence to the shoulder Refused their Cramp in anterior half of I. deltout after I A M, before service, also the arms of going to bed, on some motions of arm Sticking above "Fingers—Lavid. Nails unusually tough After

r deltoid at 2 20 A w (after sleeping). > change of Pulse -Rapid, and full, and irregular and inter- position, in tendons of both deltoids and of l. biceps

Arm —Swollen and covered with pustules, also Neck.—Swelling along r steino-cleido-mastoid mus-hands Neuralgia in tendon of I bicens at noon on cle Sprained feeling in upper r. sterno-mastoid mus- | holding forearm flexed and pronated, hand on edge of cle in afternoon in street-car on suddenly turning head table. Rheumatic pain in r (outer origin of brachiato r, with sticking in r ear. Crampy feeling in 1 lis anticus), rheumatic threatening in r arm when sterno-mastoid muscle in morning, then in I levator sitting with arm in malposition in afternoon, then in anguli scapulæ Rheumatic feeling from cool wind, ex- course of musculo-spiral nerve to back of forcarm and hand when resting palm on car-seat, and in ulnar Back.—Pain Sensitiveness of last cervical and first nerve adjoining pisiform bone Pain in middle third

Crampy feeling at inner; in front of r ulna Cramp in flexors of l in morning on feeling for levator anguli scapulæ Sticking in Lumbar Region -Pleurosthotonic cramp in l on dorsum of r lower, in nerves, in dorsum of r at noon exertion Subcutaneous stacking in r when walking, on putting hand behind me; in dorsum of r in after-lator when straightening himself; running up 1 side | noon when holding a weight, in dorsum of r in even-Pain, in middle of 1 costo-pelvic muscular region in ling when sitting Neuralgia in dorsum of r, over afternoon, in afternoon when walking, after raw, condi-'bolly of supmator longus, in forenoon; in r ulna in mented oysters, in 1 in afternoon when walking, then morning when writing, in afternoon in dorsal branches in r, then when sitting in 1 again; in 1 kidney region of radial nerves, then suddenly in digital nerves of adin afternoon when sitting bent to r side, in l in even-pacent sides of middle phalanges of first and second l ing, in l lower in evening when writing, in l about lingers. Neuralgico-rheumatic sensations in dorsum lower end of kidney after dinner when sitting bent of r in afternoon when walking, extending as a hard forward in street-car, then indications of pain on reache to middle of ulna. Rheumatic pain in reulna in side, when sitting bent up in street-car, in I kidney morning on waking the arm being uncovered, > warm on bending over table, in I when walking, in I sponge-bath, in extensor tendons of r in afternoon kidney, by positions, etc., which cause compression when riding in cool wind, > motion Carrying medi-Crampy pain in 1 renal region in evening Crampy cinc-case in r hand in afternoon, compression of ulnar lumbago when standing in street without overcoat, a neive against body, pain to termini of nerve in little external support and adjusting position. Uncasiness finger, pain in lower end of 1 ulna in evening when in 1 Feeling in forenoon, not having defecated, as holding paper to write on, pain on inner edge of r. if a firm mass pressed against sacrum, hips and lower ulna when writing, then in its upper dorsum, then anteriorly in same, < when ulnar neive is on the stretch, > relaxing it or removing compression

Wrist -Sticking in dorsum of r in forenoon when writing Rheumatic pain around r carpus in afternoon after writing

Hand -Fulness of veins in evening Seem puffy trol over them much hampered; even on slight exertion, when closing them Sticking in I. between bases of with numbness, with coldness Tearings and draw- first and second metacarpal bones in forenoon after ings in hands and feet. Neuralgic twinges in r index vigorous use of hands, in r palm between first and and r. little toe in afternoon on using them Bruised second metacarpus in evening Neuralgia in space between first and second r metacarpus after midnight. Upper Extremities.—Stocking in r axillary folds extending along digital nerve, inner aspect of first (Rheumatico-neuralgic ache in r posterior axil-phalanx of first finger Crampy, then rheumatic pain lary fold in afternoon when pressing scapulæ against in r third knuckle and above it, in afternoon when writing Sensation in r during every stool as if drops

going to bed, on some inducing of arm sucking above. Fingless—Levil, and surfaces, we will be a surface of the condition of t

in 1 index when holding papers in 1 hand and writ-i down to attachments of internal lateral ligament when ing on them Pain in r. finger and thumb Soreness walking, then under inside of l instep, of flexor tenof last joint of r little to pressure, with swelling and dons under l inner, when standing, the same in front redness, proximal palmar portion of last phalanx of of malleolus when walking; intermittent, under and r. thumb sensitive to pressure, as in incipient felon

Lower Extremities -When walking the tendons achillis' seem to catch and pain "Wooden feeling" in even Foot—Trembling, with aching in malleoh Vertaing when walking Inability to walk Disposition cal statch back of r. heel Cramp in outer part of hollow to aid walking by gravitation in afternoon, walking of r Crampy feeling in hollow of I, inside Crampy bent forward to supplement muscular mertia, especially aching in hollow of 1, in inner muscles, < sitting, > in calves

on walking, in r gluteus medius on walking Stitch-like catching in anterior superior part of 1 gluteus calcancal spaces in afternoon when walking, then in r. maximus in afternoon on walking Cutting across when standing Strained pain in hollow of r in lower half of I rectus femoris at every step in afternoon after jumping from car, transversely in inner in street-car. Dull twinge at inner side of 1 insten and lower part of r rectus temoris in forenoon when Soreness like a "stone-bruise" anteriorly in ball of 1. at stool, (rampy, across, in afternoon on entering causing limping. Insteps hurt by boots at 10 PM house and in lower half of rectus muscle, then on Swollen feeling in r in evening when putting on walking out in I thigh on same level. Crampy pain in lower border of r gluteus maximus in evening to the constraint of t leaning far forward, along inner border of I rectus | 8km.—Soft Retains the folds when pinched femoris when walking Rheumatic feeling behind r Eruptions, purpuric Wheals, with local redness bed, . l, almost a stiff feeling Loss of power

Knee -Trembling Sticking in upper part of l in r upper lid. evening Feeling as if bones at inner half of r did side of r in afternoon Weakness, in afternoon on and gastric disturbances walking

inner part of r tibia in evening Pricking in r inner and front of chest calf in afternoon when resting 1 knee on r

about I, inner malleolus when walking, and in tendo-

standing; in outer muscles of r sole in morning when Thigh -Sticking behind I trochanter in afternoon sitting, in muscles of outer part of r sole in evening

trochanter in afternoon when walking, in lower half over neck, chest and arms Erythema of face and of r vastus externus in afternoon when walking, in limbs, with swelling of r arm Rash, with cedema, part of l gluteus maximus on standing bent over. then desquamation; R as vivid as scarlatina, with Myalgia along exterior aspect of r rectus femoris, on itching, then exfoliation. Urticaria over whole body; standing bent forward with r foot advanced Tension U, with puffiness of eyelids, face and sometimes of in rectus muscles in evening on walking, > standing limbs, which does not appear to be drispsteal. Flat, still. Rigid feeling in rectus muscles on walking, then lymphy, tiching phylies in patches on dorsa of hands, similar sensation posterory. Hips feel old, inert. cratial side. Sore pumple to I of bridge of nose; and stiff in morning on walking Tired feeling in in beard on r upper part of chin, with watery disupper front, in afternoon on walking, in I rectus charge Pimples over whole body, with a discharge femoris in evening when sitting, when walking, and thicker than serum, but thinner than pus, with itchknees are ready to give way, in hips before going to ling, then squamous scabs Pustules resembling an itchlike crust Offensive suppuration Furuncle on

Vesicular exanthema, with itching, redness and not fit when walking, increasing to a drawing at inner swelling of skin, first on genitals and thighs, then on part of popliteal space and up inner hamstring face, hands and arms, moist but usually drying with muscles, with awkward gait, he shook the limb to a fine crust, sometimes causing cracks and ending in relieve the tension Contractive sensation down inner desquamation of thick scales, with febrile symptoms

Pricking at night, then sweat, < of face; sudden Leg -The disease at first confined to neck, face pricking on back, chest and thighs in evening when and arms, afterwards covered the legs, one of which walking in open air, then sweat on chest and back. was swollen and covered with a scaly cruption, like a liching on chest, back and arms, in sides of chin and kind of elephantasus. Neuralga in lower half of 1, on head, etc., in morning; of alar crease of nose in in course of anterior tibial nerve, in morning; in front afternoon; of anterior wall of concha of 1 car in evenof lower end of r hbula in evening. Twinges in ling, > scratching, which yields whitish scales, in middle of r tibul nerve, anteriorly, in evening external meatus of each ear, with crawling; on r side Rheumatic feeling about lower head of r fibula in of back about midnight, voluntary friction by elothafternoon on rising from a seat. Aching over lower ing caused chilly creeping round from back to sides

Sleep.—Yawning, towards evening; in evening in Ankle -Sticking in I posterior tibial artery, near the street Sleepiness; during the day; in forenoon malleolus, in forencon, below r. inner malleolus in when standing, at noon when sitting, with downward morning on rising, below r inner malleolus when pressure in forehead extending to upper eyelids, in walking Feeling as if injured Sprained feeling afternoon when conversing, the lids seem to contract about 1, in front of 1 in afternoon during forced spasmodically, < glare on white wall, in afternoon in flexion when sitting, then in both sides of astragulus car and church; in evening in close railroad car; in

street-car, and after getting out laggy gait, in warm, down I side of face in afternoon, towards evening; rooms when conversing, during conversation before towards evening when writing, at 4 PM in flushes, and after dinner, like a warmth about eyes and down with thirst, as after coffee, dry H. of face and hands to throat in afternoon when sitting Dozing in chair at 1 30 A M when writing Extending down to exterbefore dinner. Sleep profound but unrefreshing Dit- nal chest, subjectively, in afternoon Feeling as if ficult waking

few hours in the morning. Frequent waking, towards nape and down back in evening, with general sweat. daylight, sleep almost semi-conscious Early waking Of hands in forenoon when sitting writing from an uneasy sleep Restless sleep, with much dreams. Crying in sleep at midnight, waking him, as dorsal, axillary and perincal regions, in sleep with necessity to get out of bed.

Dreams: frightful, with restless sleep: indistinct, in morning, vivid towards morning

Fever.—Chill, in forenoon, at 11 AM, with pallor of face, pain in forehead and temples and ringing in inder respects we much lack Chia. Infermitted fover is conseare, in afternoon, in afternoon when at work, towards evening, with rapid pulse, dry mouth and thirst with accelerated pulse. Shaking, then fever; at 3 that he shaking then fever; at 3 that in which increase the cursos property of preventing in a measure the development of the property of preventing in a measure the development of the state of face from 6 30 to 9 PM, chill with trembling of limbs, then in bed heat with yawning and sneezing, then sweat Alternating with effervescence of blood causing pulsation.

Chill from occiput over trapezius muscle and to upper arms in afternoon in open air, creeping, in 1, 9 For homeopathic use 1 part of Chloral hydrate is dissolved in side of occuput in afternoon, then in 1 Creeping over 1 parts of Alcohol. trapezius in forcuoon, then from spines of scapulæ to shoulders, then on taking off hat in the house from well as a depressant of the heart, it also causes vasotrapezius over occiput to vertex and behind cars, motor paralysis, feeble and slow respiration and mus-croejung over trapezius in afternoon, with soreness in cular weakness. It produces a decided crythema, r lower bicuspid. In back, with pain in one of the particularly aggravated by alcoholic stimulants, ecchy-middle dorsal vertebra, in scapular and mainmary moses, and destruction of tassic in consequence. regions, in sacrum on lying down before breakfast, and in l leg In limbs, in afternoon, and in hands, feet, sleeves, with sneezing, tingling of nose and snuffling, uncertain, evincing a state bordering on idiocy sneezing, then of anterior half of foot

Heat; in afternoon, < forehead, then in face; towards evening when quiet then sweat, when walking, with tingling or stinging on front of thighs Dry,

sweat would break out about neck and face in even-Sleeplessness, from heat and thirst; except for a ing, from r scapula to I face and hand, forehead and

Sweat, in morning sleep, in evening when in a cough; full of dreams, interrupted by wonderful crowd, in evening on parts pressed by the clothing,

> Clinical,-Intermittent fever, the paroxysms recurring with great regularity at the same hour, especially indicated by the extreme sensitiveness of the dorsal vertebre, with pain on pressure,

### Chloralum.

General Action .- Chloral is a powerful hypnotic, as

Affinities — Op, Bell, Nux v, the Carbons, Plumb Generalities.—Uncertainty of movement, with tenchin, nose and ears Creeping over 1 shoulder, scap dency to fall forward Almost jumping and springing, ula and I side of neck on moving arms, then after he changed from one bed to another Agility Appearsitting down in a warm room warinth about face, shoul- ance as if intoxicated, by brandy Resemblance to ders and downward and backward, becoming general, a living skeleton, a maudlin, semi-narcotized condiwith throbbing of heart and of arteries to feet and tion, when aroused by loud and repeated questionings hands Of 1 arm in evening when writing in shirt- her answers were incoherent, her manner wild and stoppage alternating with sneezing. Of 1 hand in blood contained garnet-colored amorphous particles, a afternoon when writing, of backs of hands and fingers number of dark red globules (double the diameter of in afternoon Of fingers in morning, and of toes and white corpuscles, and many smaller), some of these soles Of knees; in forenoon if uncovered by wrap-per, < 1 Of feet in forenoon in a draught of air, with toms, with numbness and burning Muscular pains, sneezing; 1 in forenoon when sitting; 1 at noon, at < upper limbs Pains as sometimes from chronic noon when sitting, < 1, 1. in afternoon, with flushing, alcoholism, < about joints, encircling the limb, finger, in afternoon, and of hands, < 1 foot and tendo-achil- etc., just above or below the joint, < moist and cold lis; in afternoon when writing, in afternoon, then of weather Restlessness Weakness, and limbs ex-kness and above boots, < 1 Of soles, < 1, with tended, head low, and at times aspect of impending Lipothymia Inaptitude for exertion dissolution Anasthesia

Mind.—Dehrum, hurled a hot-water bottle at an imaginary figure which stood at the foot of the bed during a sleepless night Of skin, towards evening menacing her, wandering about in the upper stories Intermittent fever in the cycle of an ordinary tertian of the building Delirium tremens Muttering and Symptoms resembling scarlet fever, chill, with practalking about dead friends, M of a religious character; cordial anxiety, nausea, vomiting, headache, fever, then unable to resist uttering what he knew to be nonsense. erythema on face, spreading over body, with burning, though conscious of everything going on around him Pleasant excitation, with rapid pulse. itching and with orderns of face, injection of conjunct (Stram) Pleasant excitation, with rapid pulse, tive, the color > for a moment by pressure, angina in Excitability as from champagne, with pleasant feeling, posterior wall of pharynx, prostration, then desqua-mation ter and witty remarks. Talkative. Listless, peevish, Heat in head, then sweat; with a strong rapid pulse, childish, begging for chloral Perversion of moral then sweat; of forehead, with pain in it. Of face, sense. Morose, deceitful and imbecile in intellect, memory and will cholia; and irresolution

Confusion, feeling now as if in one county, now as croup Fetid breath if in another, with anxiety to get home Almost iduotic Memory impaired Insensibility, with bling that of scripte fever. Spasm involving epiglottis quiet but incoherent talking, with scieums now and and almost strangling him (atarrhal soreness, with pallor, dilated pupils, 1 leg spasmodically stretched, r | ing at 7 A M , with sensitiveness, rawness and burning relaxed

morning on waking lasting all day, sudden notion till he strangled and coughed Partial peralpase of Disconfort Duliness Fulness at 8 A.M., and con-compliage (Op.), with nervous districtination to bursting, and in neck dirink, and interfering with nutrition, partial paraly-Heaviness Intoxication, on waking, feeling as if he had been intoxicated by wine (Glon, Nux v, Valer). Stomach and Abdomen.—Longing

Pain in forchead, extending to occuput, over r down in eyes, < 1 side, with constriction of eyes over eyes. < over l eye, with nausca and sour cructafor breakfast Feeling as if a hot band were drawn from temple to temple, directly over eyes, with sensa-tion of a burning ring around each eye Pain about cerebellum after any alcoholic stimulant, with red face and suffused eyes (Nux v) Weight and soreness in occiput and over eyes, inside skull, . moving about and lying down, slightly - in open air Hair woolly, with a dry and fluffy feel

Clinical.—Has cured morning frontal headaches, with great sensitiveness to motion, laughing, etc., and better in open air

Eyes .- Bloodshot and watering , B and as if starting from sockets Staring wildly Glistening Inflammation and photophobia, I, with weakness and burning lachrymation Lachrymation Capillary conges-Disc transparent, like white wax, tion of l disc retina pale, the central artery and vein and their branches dark and prominent Haziness of fundus Throbbing pain in 1 ball at 11 20 AM. < leaning

Pupils dilated, with sensitiveness to light Pupils contracted, and insensible to light, C, < r, then dilated, then alternations of myosis and mydriasis Pupils elliptical, then almost angular contraction of 1 at first directed downward and outward, afterwards outward and upward, and at the same time dull notches in an outward direction in middle of r Pupils more sensitive to light Conjunctiva congested; or yellow. and lids red and swollen Ptosis Lads closed and difficult to open Vision dem; lost Diplopia, then muser volitantes Colored objects look white

Clinical....Retinal asthenopia, with circles of light, black spots, etc (Coca')

#### Ears —Tinnitus aurium

below eyes Rush of blood, with heat Jaws firmly and thready Blosed Lips and mucous membrane of mouth excoriated, afterwards lips covered with crusts

Mouth.-Gums spongy Mouth.—Gums spongy Tongue coated, white Extremites.—Jactitation Tingling, and weight as Tongue blistered and ulcerated. T dry, brown if asleep. Blood settles under finger-nails and purple

Terror, with weakness Melan- | if partially drunk Mucous membrane livid. Frothy mucus flowed from mouth, and it seemed filled with Stupelaction Inability to concentrate thought a membranous substance, not unlike membranous

Throat.-Pharyngeal congestion, with rash resemthen, restlessness, retching, foaming at the mouth, pain in fauces Sensation of a cold in head on wakin throat and posterior nares Burning in fauces and Head.—Bent upon chest Aching; on waking, in stomach Swallowing difficult, the act not beginning

Stomach and Abdomen.-Longing for food Little appetite for dinner Appetite lost; capricious Thirst . in morning on waking, with dryness of tongue and supraorbital ridge, movement, over eyes, running fauces, headache, vertigo, nausea and nervous sensibility Eructations, > eating, sour E of food Nau-Heavy pain over eyes, < 1, during supper Fulness sea. > supper, but returning in evening, with oppression of stomach, without inclination to vomit. Retchtions of liquid, supposed to be what had been eaten ing Vomiting (Nux v) Pain in pit of stomach, in epigastrium on waking, in stomach and abdomen, with difficult breathing, sharp, in epigastric region Epigastric tenderness Burning in stomach Sinking at stomach-pit, with oppression Colic

### ('linical.-Seasickness

Stool.—Diarrheea, twice in afternoon, containing gelatinous matter. Soft, with pain in rectum, soft, light-vellowish, with sharp pain in rectum Constipation Pale and hard Frequent

Urmary and Sexual Organs .- Copious macturation in bed without knowing it (Op ) Frequent and profuse mictuition, frequent in afternoon and night albuminous Seminal emissions at night, copious. Menses reappeared in seven or eight days

Respiratory Organs.—Redness and swelling of epiglottis and of false vocal cords Sufforating sensation and oppression of chest in front and at its base. Dyspnea, increasing to asphyxia, with swelling of face, paralysis of facial muscles and all the signs of cerebral effusion Respiration stertorous, and slow (Op) Panting. Gasping. Respiration rapid; and shallow and stertorous Respiration intermittent (Plumb) R. deep, at times imperceptible

Clinical.—Asthmatic attacks, with sleeple-sness, delirium,

Chest.—Oppression after eating, < ascending stairs, interfering with speech Pain,

Heart and Pulse.—Heart's sounds indistinct Cardiac debility Action increased and arterial tension. Heart's action rapid but feeble Failure of 1 ventricle Strong pulsation in arteries after a glass of beer, with swollen red face Pulse rapid, and bounding, and hard, tense, and weak and wavy; and weak, irregular in force and rhythm and frequently intermittent Face —Pale, and anxious, and hippocratic, veins (Dig) Pulse weak; and slow and intermittent; sunken Purple Dusky Red, and anxious Cheeks could hardly be felt in carotids. Pulse of r arm (she and lips livid Wistful and haggard Swollen, < had lain on that side) not perceptible, that of l. small

> Neck.—Veins full A "singing sensation" comes from nape or medulla oblongata.

Tongue thick, speech indistinct Speech broken as spots appear on side on which she had lain. Stagger-

ing. Lower limbs, acute wandering pains, < in calves . | Fever,-Coldness Cool skin. Cold limbs. Fever. crampy pains, < through knees and ankles; Sweat, in beads on forehead; cold weakness.

Leg -- Cramp: and inability to co-ordinate movements of lower limbs Giving away suddenly in morning on rising, inability to stand or walk, then nervous depression, general weakness, vacuity of mind and inability to concentrate the attention. Pain in calves, at times running down into feet, with sense of ing on putting feet to the ground Feeling as if asleep symptoms may be compared with Iodine Weakness and want of co-ordinative power Paralysis Generalities.—Old appearance Loss of fat Quanfrom knees downward on waking at 10 a.m., P of motity of chlorides in blood increased, while the carbontion and sensation

Skin.—Red blotches on arms, legs and face, then over now impetiginous, now moist, now scaly eczema and cise in open air agreed with him ichthyoses, desquamation in great sheaths, then fallover shoulders and arm-pits Redness on chest and persons when he sees their names shoulders, next day extending over whole trunk and quamation, and fissures over sacrum and near joints of jaw, < over cheek-bones, and shading in different fever directions, ears of same color and red blotches over neck and chest down to centre of sternum, all > paroxysm of sneeding, with contraction of pupils, injector of conjunctive and excitement of circulation | Pressure in occipital protuberance, with burning tion of conjunctive and excitement of circulation | Eyes - Protruding | Lachrymation | on wall Redness of face, forehead and whole head to neck Smooth scarlet eruption over whole body

Diffuse inflammatory redness Erythematous redness over head and neck, with twitching of facial muscles Scarlatinal rash over whole body, with fever and been deaf for forty years) tenderness of skin, then desquamation Erythema of head and neck, with dark areola. < wine, beer or smrits. with polyutation, the hyperiemia disappearing last from forehead. Erythema of head in spots, then more diffuse, the vessels being dilated, in pronounced forms Coryza in evening, next morning violent sneezing, C extending to trunk and becoming general, following in evening, < lying, sudden dropping of corrosive by preference the larger trunk nerves Petechial and water, with lachrymation and dryness of tongue, tration, as in scurvy, with abscesses and deep ulcers Erysipelatous inflammation of fingers, with desquamation of skin and ulceration around borders of nails Erysipelatous eruption on face, face so swollen that she could not see Papular rush on arms, with red bases Nettle-rash; on arms and legs Anusthesia. Anusthena, Bloated. Itching preventing sleep at night

Clinical.—Has been prescribed for erythema and urticaria.

out of bed, sat on the edge of it, semi-conscious (Bell ) the tongue and causes dryness in mouth

of skin

## Chlorum.

A solution, freshly prepared, of Chlorine Gas in cold water, is

General Action -From the few observations hitherto fulness in skin and throbbing, then steady legache made, it would seem that spasm of the glottis is the Feeling "as if in a mash," "as if he could not clearly marked feature of the action of the drug on the distinguish between one part and another," in morn-organs of respiration Compare Bronnie, other

ates and other salts were lessened Consumption Sensation at 3 A M , as before severe sickness Inclinasolute body, gradually codescand, all they resulted meads to not to led down, during the headach Distinction. Red spots becoming confluent, with fever and rapid ton to rise in morning, and ill humor Revtlessness pulse, then swelling of face, checks, lies and cars, with Nervous sensibility Sensibility diminished. Exer-

Mind -Anxiety, he could not speak Fear of ing of hair and nails of all fingers and toes, with this becoming insane, with loss of memory, everything skin disease watery diarrhoa and then similar affect seems confused [Irritability, in morning] The diffition of conjunctiva and bronchi, abscesses on arms, culty in recalling names is worse, and of recollecting

Head .- Aching during coryza , A , < after dinner ; limbs, hvid spots and red patches alternating, after-threatened, in 1 side before the shuddering, < after wards the spots on chest and abdomen were yellowish, dinner, at 2 r m, with necessity to lie down, > walkwith white patches between them, then general design back and forth, a lighter attack next day at the same hour Crawling shuddering at 11 AM, < at Scarlet color of face from roots of hair down to ramus the back, < sitting with the back to the sun, then Disagreeable sensation when shuddering. Vertigo and stupefaction Painful wearing sensation in vertex and down I side, with inclination to be down

> Eyes —Protruding Lachrymation, on waking; during coryza Dim during fever. Fantastic images suddenly floated before the eyes and disappeared with lightning-like rapidity

> Ears.-Ringing in r (and dulness in l, which had

Nose.—Sticking Burning pain, with tension and dryness, and in eyes Eroded sensation in corners Dryness, with irritation in windpipe to cough, and pressure on chest Sneezing Stoppage of I nostril purpuric eruptions, which may run into a species of palate and fauces, without thirst, but cold water is pyamic condition, with ulceration of gums and pros- agreeable, with stoppage of nose while it flows, C, with headache and fever, with copious yellow discharge Discharge of mucus, of corroding water; dropping of water from 1 nostril, flow from r nostril, his l, is always stopped Smell lost

Face -Pale, often greenish Heightened color.

Mouth -Sensation of fulness in teeth Tongue dry and red Articulation difficult Increased vaseularity and minute ulcerations in mouth and throat Sleep.—Gaping Sleepiness, in evening, retired Mouth, fauces and assophagus sore, as if the tongue early, unrefreshed on waking in morning, S. but re-had been burnt, as if he had eaten vegetable acids, mained awake till 1 A.M. Prolonged sleep. Deep or as if his teeth had been injured by acids. Much sleep, from 1 to 5 P.M., with loud snoring, with red mucus Dryness Salivation. Saliva altered in quanface, fulness of veins of neck, deep respiration and tity and character, and Taste febrile in morning, rapid pulse. Snoring Woke with a scream, jumped > rinsing mouth, not good to tobacco, smoking bites

Throat.—Choking sensation Soreness from uvula to bronch, S., and in chest, with hoarseness Inability to swallow

Stomach.—Appetite less evenings Desire for wine Vomiting Acidity Inflamincreased Nausea mation Warmth Sensitiveness of engastrium to

Abdomen and Stool.—Bile altered , increased Colic Weakness of abdomen mornings. Diarrhoa: in

morning, twice in forenoon.

Urinary and Sexual Organs.-Frequent desire to ing properties, loses the power to redden litmuspaper Sudden unpotence, even sexual aversion

Respiratory Organs.-Spasms of glottis, of vocal cords Irritation of epiglottis, of larnynx and bronchi Construction, with sufficiation Inflammation, and of lungs, of bronchial mucous membrane damp air

Clinical.—Some brilliant cures of laryngismus stridulous have been cured by the internal administration of a dilute solution of Chlorine Gas

Cough, irritation to Violent Spasmodic, Paroxysms evenings as if he would have a cough, as if the pharvnx were raw or becoming so Whistlingin region of r bronchus. In exhausting fits, with expectoration With spitting of blood. With expectoration of thick, white, frothy mucus Constant. with sensation as if bronchi were filled with thick. tenacious mucus, no relief from expectoration, with sweat on forehead, it seemed as if the effort to raise the mucus would empty the stomach, yet no nausea is treme dryness of the tongue felt Expectoration, of mucus

Sudden dyspnosa from spasm of vocal cords, with staring eyes, blue face, cold sweat covering body, pulse small and soft, temperature sinking; D, with sensation of a band around lower third of chest Suffocation, in paroxysms, often followed by catarrh, with violent cough, sensation of cramp in muscular fibres of brouchi, increased mucus, often with spitting of blood Inspiration comparatively free but crowing, with obstructed expiration, livid face, convulsions of limbs and partial coma, inspiration unimpeded, but expiration impossible from closure of rima glottidis, inspiration crowing, the lungs becoming inflated to a painful degree, it seemed as if air might pass through walls of chest more readily than by buryar, face turged and livid, partial coma, inspiration easy but insufficient, with short, rattling-crackling rate, expuntion difficult, prolonged, insufficient, with prolonged, loud, whostling rates (a combination of many sounds), and each pulsation of heart gives a crescendo diminuendo effect to them, inspiration difficult and attended with rales Whistling rales, which are quite loud on forced expiration Anxious respiration Respiration and heart's action increased

Chest -- Hamoptysis, and consumption lungs and air-passages Sensation in lower and inner third of r lung as if ruptured, a feeling as if the air eyes sunken. Lips dry and disposed to crack. escaped into the pleural cavity at each inspiration, at each inspiration a rale at the quasi-ruptured place Soreness internally, > cough

Pulse.-Frequent Diminished.

Neck and Spine. Jerking of muscles, drawing head backward

Extremities.—Stiffness Weakness of lower

Skin.—Chus anserma, and dry, yellow and shrivelled Red and painful, becoming swollen and thickened as in facial crysipelas, with bruised sensation, then itching and desquamation. Accumulation of blood in capillaries, with heat Determination of blood, with papilla close together, which suppurate and vesicate or desquamate, < on back, loins, breast, urinate, but the urine is passed only in moderate abdomen and arms. Tetters. Inflammation and ulquantities. Urine increased. Urine possesses bleach-ceration. Desquamation. Urticaria febrilis. Nettleceration Desquamation Urticaria febrilis Nettlerash, white wheals in clusters, surrounded by diffuse redness Minute vesicles all over skin, on the shoulders their bases nearly touch, then red and livid spots Stinging, then Sensitiveness Smarting Sticking symptoms as from cantharides, then soreness and bruised sensation, then itching and cuticle coming off Bronchial catarrh Warmth Loss of voice, from in thick scales, as in psoriasis Stinging as of nettles Stinging as of insects, with sweat, rush of blood to skin, sometimes pimples or vesicles, intermittent S as of insects here and there, on arm, back, abdomen and lower limbs Itching , with increased sensibility.

Sleep .- Late falling asleep after every excitement,

the following days early sleepiness

Fever.—Shivering, in evening in a warm room Cold shudders over anterior surface of arms from 10 wheeling Dry, with at each cough soreness in a spot or 11 AM to 2 PM, and over back and thighs, with dimness before eyes, then fever Heat, when cating and afterwards, with irritability while drinking wine and coffee, of skin Sweat, in sleep at night, critical

Clinical.—In typhus the diluted Chlorine water has been given, especially when the tongue was extremely dry, it seems to relieve the profound prostration, the subsultus tendinum and ex-

## Chromicum Acidum.

A solution of pure Chromic Acid in distilled water (1 to 9) may be diluted for use

Generalities.—Pain, < draught of air, < 1 side, < cold water Amelioration from quick walking

Heaviness, dulness, stupidity Weakness.

Mind.—Confusion Memory affected so that when writing he was at a loss to make several letters

Head .- Pain over l eye Heavy pain along coronal suture from 10 AM till 4 PM, extending backward over parietal region Throbbing in forepart, with fulness, with emptiness in chest, soreness on pressure and cold feet Fulness; at night, with lightness at heart and vertigo on descending stairs, in vertex and frontal region at 5 AM, on waking Lightness like vertigo at 10 P.M., with heat in face. Vertigo at 10 AM when walking, inclining him to the right

Eyes.—Sore and feeling heavy, as if inflamed. Pain at noon from r ball into interior of brain, with sore-

ness of orb to touch. Vision diminished

Ears. Nose and Face. Sudden intermittent feeling Contraction Oppression, not > in open air; O of of water in r. ear, disappearing suddenly Sensation lungs, < l Affection of lungs, < r Inflammation of when eating as if expired air smelt putrid, almost causing nausea Features contracted, face leaden,

> Mouth .- Toothache in l lower jaw in morning after the usual rinsing with cold water; repeated, < r. lower, with violent beating of corresponding artery :

sudden, in I, sound teeth in night, < lower, with vio-ling lent beating of corresponding arteries; intermittent, in knocking Paralyzed sensation in r. leg at 10 A M r. at 10 P.M in bed, extending into forehead, with uneasiness, teeth seemed too long, with relief of pain ing, with uneasiness in limbs between head, I. scapula and shoulder, then uneasiness in limbs, next morning r. teeth felt too long and cold water caused pain.

Throat .- Tough mucus, with inclination to sugllow it. as it could not be easily hawked up; white mucus, <

morning, causing hawking

Stomach.—No appetite for breakfast Nausea from 2 till 4 p.m. after dinner: after a simple supper, with sensation as if stool would follow; < when stomach is empty. Vomiting profuse, first of contents of stomach, then of much bile, then of blood, frequent the stream and the water on him freeze V. of food, then of bile, with sweat, much retching, the nausea which precedes each vomiting - quick feet at noon, even when walking walking, between the attacks of vomiting pressure and waranig, octovects the strategies of vomitting pressure and fulness in stomach so that the must loosen the clothest, Epithelonia of torgus. Watery diarrhoss, with vertigo. Four-ness in stomach. Remuser of the contract of t ness in stomach Burning pain

Abdomen -Cutting in hypogastrum and ascending colon at 6 P M . profuse diarrhora Pain in I hypochondrium; in colon in morning on waking, > rising, with rumbling Uneasiness in morning in bed, as before diarrhoa, > rising , in lower, waking at 4 A M , with soreness to touch, < along colon, with nausea, eructations and retching, throwing off white mucus

Anus and Stool.-Hæmorrhoids internal and bleeding, painful, externally on 1 side of anus Harmor- Cupr rhoidal discharge during stool, with weakness in small of back Diarrhea, watery, with nausea and vertigo Frement ropious stools Small stool of mucus and knotty faces

Urinary Organs .- Strangury in morning on waking

after a dream of it

ness of chest Sudden statch in region of heart lips and bloody froth from mouth full, slow, irregular in frequency

gion at 9 Am.; at 4 PM, and weakness

tending to hip-joint Rheumatic feeling in r. knee in spasms, compare Enanthe, Cupr, Absinth, etc. afternoon and evening. Hitching in l. knee on walk- Swollen sensation in whole body when in bed and

Weakness of l. knee at 8 p.m. when walking, with

Skin .- Prickling and itching here and there, > even-

Sleep.—Sleepiness in evening; in the daytime, but if he lies down mability to sleep. Late falling asleep, restlessness during the night and anxious dreams ing at 5 AM . and restlessness; waking at early dawn and mability to sleep again though sleepy and not excited Night restless, with swollen sensation in eyeballs, which continued after waking Dreams unpleasant, unremembered, distressing, that he is about to be put to death by poison and at the same time is innocent of crime, of crossing a stream on horseback.

Fever .- Coldness, in name at 10 AM; of feet; of

### Cicuta Virosa.

A tuncture is prepared of the fresh root of Cicuta Virosa, L

General Action -The Cicutæ are most prominently convulsants, producing the most terrific convulsions,

with loss of consciousness Allies -- CEnanthe, Conium, Absinth, Hydrocy ac,

Generalities.—Veins very prominent Lying as if dead, with elenched jaws Falling to the ground, unconscious, and rolling about, on stooping it seems as if he would fall forward ('atalepsy, limbs hung down relaxed as if dead, without breathing Tetanus Convulsions, with wonderful distortions of Chest, Heart and Pulse.—Pam m 1 lung, with limbs, head turned backward, back bent as in opisthothrobbing. Rawness or soreness in chest, with hack- tonos, frightful distortions, with unconsciousness, spasms ing cough Pulsation through chest at noon Weak- of all the muscles, spasms, with dark redness of face, blue Epilepsy, with suclling Stricture in region of heart at 10 AM Throbbing of stomach, as from spasm of duphiagm Hiccough, from region of heart to I eye and I side of head at 10 screaming, redness of face, trismus, unconsciousness A W, with fulness in frontal region Pulse rapid; and and distortion of limbs; with wonderful convulsions of limbs, head and upper part of body, and clenched Week and Back.-Stiffness of muscles on I side of jaws, with wonderful distortions of limbs, upper part neck at 10 AM Pain deep-scated in 1 shoulder, of body and head, blue face, interrupted breath and scapula and I side of nape up to occiput, with stiff- froth from mouth, afterwards unconsciousness, freness, < rising from lying or turning head to 1 or back- quent E at night Restlessness, tossing about, the ward, and draught of air, > standing and walking, at pallor of face changed to cyanosis, twitching of face, times the pain extended into I, olegranon, to muscles of muscles of eyes and neck a peculiar scream, finally on chest below I. shoulder and spine, all muscles con- tetanus of whole body, head hored into pillow, the nected with scapula painful to touch, use of 1 arm spine forming a concave are backward, froth before impeded, on drawing a long breath a stitch in chest mouth, teeth clenched, limbs drawn up towards abdonear I shoulder, on coughing pain over whole I upper men, unconsciousness, insensibility, micturition in a chest, deep coughing was impossible, pressure on full stream, breath stopped at the height of the conchest, the pain moved from I. scapula to pelvis, lum-vulsions, no action of heart during the spasin bar region sensitive. Shooting from small of back into Fell to the ground, urinated with great force, violent 1 hip-bone at 3 r.m; from lumbar vertebræ to crest convulsions, mouth could not be opened, gnashed the of r illum at 6 P.M when sitting Pain in lumbar re-teeth, distorted his eyes, blood spurted from the ears and much swelling was felt in pracordial region. Extremities.—Pain on top of l shoulder as from Tonic spasms so that the fingers could not be straightfatigue from 10 AM till noon. Growing pain anteri- ened, neither could the limbs be bent or straightorly in middle of l brachium, and lameness as from a ened Twitchings, on back, forehead and l toes blow. Arms easily fall asleep. Pam in elbows Cramplike stiffness of whole body, with coldness Drawing pain anteriorly in upper half of l femur, ex- Rigidity in a child, and sleeplessness (Symptoms of

of back, on rising Faintness

Clinical.—Convulsions from various causes, injuries, after opium, chorea-like, epileptiform, tetanic, puerperal, from worms, oronan cancerate, epigeprioria, tetanic pier peral, from worms, from indigestion, with invenability, staring eyes, with jerking of eychell, muscles of the face and whole body, face red, hot, sweaty, or with the convulsions violent opisthotonos, tetanic rigidity of the whole body, eyes fixed at one point, and frothing at the mouth, with sussmodic breathing, sussmis brought on by the slightest far, etc.

Mind,—Delirium, singing, dancing grotesquely, shouting (Hyose), after an unusual sleep heat of body, she sprang out of bed, laughed, did foolish things, drank much wine, jumped about, clapped her hands and grew red in the face Constantly screaming the name of his sister. It seemed as if he were a child and objects were as attractive to him as toys to a child Belief that he was not living under ordinary relations. everything seemed strange and almost fearful, it seemed as if he had awakened from a fever and saw all kinds of visions, without physical sick feeling. Weeping, moaning and houling Laughing and biting

Ecotement and apprehenmon about the juture Anxiety, much affected by sad stories, (A at noon, and sweat on on attempting to turn her head loss of consciousness face, trembling of hands and faintness at heart) Fear, and blackness before eyes Pressure on reading; P, with stitches in 1 side of head from fright at every with sensitiveness to light, at times gray spots before opening of the door and at every word Belief that he eyes Pupils dilated and insensible (Bell , Hyosc , etc ) would die Sadness Occupied with tormenting contracted, contracted, then dilated, sometimes contracted, ideas of human conditions Misanthrophy; he went sometimes dilated Sticking in lids, in 1 Tearing in into solitude and reflected upon people's errors and r lids. Pressure upon lids. Pressure in r inner canabout himself Likes to be alone, is disinclined to thus, > pressing lids together Twitching of orbicuspeak and is irresolute work and morose Indifferent and doubtful if he in bone beneath 1 brow, extending towards temple really were in the condition in which he found him- and zygoma self Stupetaction Loss of ideas. Mental torpor Unconsciousness Confusion of ideas and rapid change of thoughts, often of a depressing nature, confusion of the present with the past

Clinical.—Dehrum, with fining gestures, red face, confounds the present with the past. Melancholia, with indifference. Sad-ness and concussion of brain. Great apprehension, very mistrust-ful. Hallucinations, with convulsions after typhoid fever

Head .- Jerking. Sinking gradually when sitting quietly, while her eyes stare at the same point, then a kind of internal jerk with sudden return to consciousness, then similar insensibility, wherefrom she was aroused from time to time by internal shivering Sticking Pain, > passage of flatus, > sitting upright, in places deep in brain, in morning on waking, as it brain were loose, and shaking on walking, compressive, from both sides Anxiety Heaviness; in morning after rising Dulness, with shaking chill, swallowing Difficult hearing (Con) stiffness of neck and sensation as if muscles were too Roaring; before ears, < in the house. suring learning Intoxication, intoxicated feeling when sitting standing and walking Vertgo, Desines of old people, with sadden detonations in ears, especially and incling in the ground, on walking, as in the would feel toward to the Least on walking, as in the would feel in the world feel toward to the Least on walking, as if he would fall forward to the left

beneath I emmence, in I bone, in sinciput, in places from r nostril, bleeding from r on touch in sinciput, beneath bones, with fulness, and in r toughet, then in I; stagetying pour activability, rest, hammering, in afternoon. Pulsation in sinciput, with Muscular movements. Pressure beneath r malarwith pressure deep in brain.

frequent starting as if he would fall out of bed. Weal- Tearing in 1 temple. Pain in r temple, between ness, after standing a short time, < in knees and in muscles skin and bone Strong pulsation in temporal arteries. Tearing beneath bones on r side of head; in bones of l side, with internal pulsation and confusion deep in brain, backward through 1 side, < towards top of skull Pressure beneath I bones, one-sided P, rather external Tearing in bones of r side of occiput. Pam in O like a pressure and as with coryza Sensation in O when sitting as on lying down after a fatiguing walk, extending through back and along posterior surface of legs Heaviness in O ; deep in O Distention of skin of sinciput Eruption, and on face

Clinical .-- Vertigo, with gustralgia, vomiting, with muscular contingent.—Vertigo, with gustraigns, vomiting, with muscular spams and tendency to convulsions. Sudden violent shocks through head and whole body, with jerking, premonitory of spanns. Suppurating eruptions and pustules larger than the head of a pin, which became confluent, with infiltration, etc. Basilar meningitis Cerebro-spinal meningitis, with convulsions, cases. Effects of concussion of the brain, especially convulsions

Eyes.—Protruding Starmg, whereby everything looked like black cloth; with a gray fog before eyes without ability to help it and without entire control of senses, she must be much excited to answer correctly, Suspicious Disinclined to laris beneath lower lid Stitches along brows Pain

Sensitiveness to light. Everything seems very distinct and brighter than usual Everything seems shining When attempting to stand objects seem now to approach, now to recede Objects seem to move everything blinds her. objects seem to move from side to side, seem to move in a circle, < sitting Everything runs together on fixing vision Objects seem double at one time (Con, Gels ), and black, at another time she hears with difficulty. Vision obscured, by black points when reading and afterwards Vision of bright spots, and stripes, bright point floating before r. eye, mingled with dark streaks and specks. Blinded by the white snow, and on looking at a dark wall a gray curtain seems to cover the l part of vision

Climical,-Commencing strabismus, periodic, spasmodic, or after convulsions

Ears.—Flow of blood Sore pain behind 1, as from when sitting, and stupefaction Fulness Confusion a bruise; bruised pain behind r Bursting in r on Ringing; in 1

he would fall forward to the left
Forchead —Sticking in bone. Tearing in upper stopped. Stopped, with much mucus in it. Yellow part, beneath bones, extending to vertex Pain, discharge Sneezing without coryza Bright blood

heat and violent action of heart Confusion, in sin- bone Lockjaw, with froth from mouth. Burningciput Heaviness, in sinciput, in sinciput, and heat; itching vesicle on vermilion border of 1 side of upper Mouth.—Gnashing of teeth. Pain in lower teeth. Whitish sore on margin of tongue, unth pain on touch Tongue immovable. Dumbness. Five or any words articulated without hesitation, then jerking backward of head and jerking of arms so that he draws backward and swallows a syllable and articulates almost as in hiccough. Dryness. Froth Flow of water tinged with blood Salivation.

Climical.—Eruptions about corners of the mouth, beginning like honey-colored crusts, with burning and uthing, the crusts extended to the chin, became thick and "fatty," sometimes with swolen glands.

Threat.—Stocking Scraping, burning, extending into epigastric region. Feeling as if gown together, with bruised pain externally, < moving or taking hold of it, with eructations in afternoon. Sensation in throat and cheet as if something as large as a fist lodged and were pressing throat saunder, impeding respiration, worse when sitting than when walking. Dryness Irritation Inability to swallow.

Clinical.—Spasm of osophagus from worms, the child cannot swallow, strangling on attempting to swallow

Stomach.—Appetto great, less evenings, lost, at moon, at first mouthful, lost on account of dryness in mouth, with incomplete base to food. Longing for cod, he seedlowed it Thirst; for cold water in afternoon. Desire for whie increased Did not reliable his breakfast, it filled up his abdomen as if he had eaten too much Waterbrash, with nauses and general heat Eructations of bitter yellow fluid in afternoon, while stooping in open air, causing burning in throat Hiccough; loud Nausea, in morning, with sticking-tearing headache, when eating, with sticking in forchead Vomiting, copious; difficult, then relief, of blood

Gastratas Sticking in pit, and burning Sudden tearing in opigaster region Scraping Shock in region of pit as with a finger, causing staring, then return to his senses Pressure in pit after eating, compelling deep breathing, with inclination to cructate Burning Burning pressure. Sensation as if hot water were in it. Anxiety in rift; with tightness and constant desire to go out and cool himself Throbbing in pit, which was reused in the mes of a fish to sense of sight.

Clinical.—Desire for unnatural things, like coal. Violent hiccough, with loud sound and with spasnis of the chest

Abdomen — Distention Flatulence. Rembleng and rouring. Emission of flatus Tearing deep in A., <br/>c pressure Pain, on pressure, after eating, with steepiness Suck feeling in morning, afternoon, then sticking in r. sade of head extending from r eve and nose to occiput, then running from nose and discharge of yellow mucus. Chilliness. Heat Sudden stitches from navel to neck of bladder. Hypogastrum distended and painful Cutting in H after esting. Sensation in r. groin when sitting as if an ulcer would break through. Sore pain in r. pelvic region, in margin of illum, a pulsating drawing sensation.

Rectam.—Protruson with thin stool Sensation as of a liquid stool. Sudden urging, with bruised pain in small of back and general loss of strength, sudden stool, then urging, with frequent desire to urnate Itching just above anus, after walking, when standing still and during stool, and after rubbing pain as if burnt, the pain causing shuddering

Anus.—Sensation on r side as from hæmorrhoids, whereby the orifice is contracted, with annoyance during stool Burning, with soft stool.

Stool.—Diarrhoa, at 2 and 5 A.M., with wresistible urging to wrinate; brown; slimy, frequent, with urging and conjous urine. Frequent, of black asafestida-like mucus, in small portions, with urging at 2 P.M. Con-

stipation In single hard lumps urethra; in navicular fossa Ticking in navioular fossa and frequent erections. Urging to urnate; frequent Involuntary mictarition (Cupr.) Frequent M. Spurting of urne Retention of urne (Nux. y.) Difficult micturition at

night Urine copious, scanty and dark

Sexual Organs—Sore drawing pain beneath penis,
extending to glans, compelling him to urinate Erection without desire Testicles drawn up against
abdomen Sudden pressure in skin of r testicle.
Emission without voluptuous dreams; in morning;

three E in the night Menstruation delayed Respiratory Organs.—Pressure below laryinx when sitting Hoarseness much expectoration. Want of breath Oppressor temperatura Respiration sterotous; and frequent; and uneven, interrupted by incoough. Respiration deep, when sitting, deep and difficult Slow, difficult K.

Feeble and rattling R Scarcely perceptible R Chest.—Stucking beneath last I false ribs on inspiration and expiration. > standing and walking Tugging about pit of stomach Pain in r pectoral muscles, in r pectoral and intercostal muscles, not affecting respiration Pressure on lower end of stermin as after a blow, when walking slower end of stermin as after a blow, when walking, with a sore sensation stat stee outdle scarcety breather Heat Heat

Clinical.—Spasms of pectoral muscles, sometimes with violent biccough or with great difficulty in breathing

Heart and Pulse.—Stecking in præcordnal region and burning pain Pain in præcordnal region Sudden sonsation when walking as if heart stopped Heart's action intermittent Pulse rapid, slow and full, slow and small, small and soft, imperceptible at radius.

**Clinical.**—Palpitation, sometimes the heart felt as if it stopped beating.

Meck—Swollen A kind of cramp in muscles, if he looks around he cannot bring the head back again, the muscles do not yield, and when he attempts to force them it hurts very much Tearing in muscles of r side Drawing pain in 1 side Tension in muscles; sore, in 1 on bending head backward

Clinical.—Spasms and cramps in muscles of the nape of neck and spannedic drawing backward of head

Back—Bent backward like an arch (Chanuth, Cupr, Abs, Nux v, etc) Painful stiffness on stopping Stacking in muscles on rescapula, in muscles in region of eleventh and twelfth dorsal vertebre, < deep inspiration Shock in dorsal vertebre Sensation as if there were an ulcer on recapula Pain ommer surface of scopular, in dorsal muscles Painful tension above recapula Pain in lumbar muscles Tranng-graph in occup

Clinical.—Neuralgia of the coccyx during menstruation.

ctc ), throwing himself to the distance of two feet Tremand dorsal surface of hand at base of r fingers Alternating painful pressure in various muscles, < legs, with prickling in toes Bruised sensation in heat streaming through them and difficult motion. Weakness of arms and leas after slight exertion; of legs when sitting and standing, less in arms, > walking; now in r shoulder now in one or other knee or in ankle Paralysis, sensation benumbed but not lost, incomplete paralysis of arms

Upper Extremities -Shoulder Twitching in 1 Tearing in muscles of l Cracking sensation in joint.

Sore pain in 1 joint as from a blow

jerked ness, and of fingers, of 1 arm, with sticking tearing Numb teeling and weak motions

Tearing in inner side of lower part of r upper arm Pressure in muscles of 1 upper arm Painful weakness in muscles of lower part of lupper arm, suddenly in muscles of r upper arm when writing Pain in I elbow, with heaviness Sticking tearing in muscles of r torearm when writing, > rest Sore pain in I forearm, as from a bruise Pain in ulnar side of l wrist Sensation of cracking in wrist Veins of hands distended Drawing on dorsal surface of l. hand, at base of fingers Pulsation on hand when supporting oneself on a chair Aads blue (Nux v ). Twitching together of r thumb and fingers Drawing in tendons of dorsal surface of 1 fingers Deadness of fingers (going to sleep, numbress, coldness)

when walking Pressure in various muscles Painful stillness Numbness and portage thigh Burning sticking in 1 hip-bone Tearing in thighs when walking, with heaviness, T in thighs after using from a seat, with aching in knees as if deep-seated stiffness Pressure on r trochanter major Drawing in muscles on inner surface of r thigh Tension in fascia of anterior upper and outer part of I thigh when walking, and in hollow of r knee and to its side Painful pressure in r knee Bruised sensation in knees Feeling in knees when sitting as after

a long walk

Leg -Trembling of l Tearing in r peroneal muscles, in lower part of extensor of 1, suddenly in lower part of r calf, extending to tendo-achillis Pressure. i i calves, in 1 calf Bruised sensation and heaviness alternately through each, becoming seated in knee Jerklike drawing on posterior and lower part of r, extending into heel Compression in all muscles of 1 when walking, as if the whole leg were contracted Tension in calves, in lower part; in 1 on walking. sitting, also in knees Stiffness in r calf

Tearing about 1 malleoli Soles turned inward bling Tossing about Tearing in extensor of l. fore- when walking Sticking in r sole, in 1 sole, with arm and at base of three last r toes Pain in I knee, tingling; in heels when sitting. Tearing in sides of r l external malleolus, r forearm, radial side of r wrist tendo-achillis; in l sole, deep in inner margin of l. sole, in tendon on back of l foot, in tendon on back of I foot when standing and walking Sudden pulling in r sole. Drawing on back of r. foot, rather totorearms and legs, alternately in arms and legs, with wards inner side; in tendons on back of 1 foot; in tendons on back of r foot and in 1 sole Stiffness of tendo-achillis when walking slowly, with painful pressure in muscles of posterior part of 1 thigh. Twitches in 1 toes Sticking in corns when sitting Tearing in 1 toes, on inner side of r. great toe Drawing-jerking pains in toes Prickling in I great

Skin.-Elevations over face (and on hands), with burning pain on touch, afterwards confluent, dark red, Arm —Jerking and sticking, and in fingers (lower then desquamation, E on hands, even on balls of fingers, limbs and head), J in l, so that the whole body is in which there is burning pain on touch, afterwards conjerked Tearing in 1 as far as tingers Pain in fluent, dark red, moist, (swelling on inside of 1 elbow muscles of r., beneath r Diawings in 1 Tension as it an ulcer would form, and on motion pain as from Heaviness on raising it, with sticking in shoulder, so pressure on an ulcer) Red spot on back of I hand, that she cannot raise the arm to the head without more in the direction of meticarpal bone of thumb; crying aloud, and cannot move the fingers Weak-cluster of red spots on back of I hand, smooth, > pressure Black spots Most of chest darker than the rest of the body Eruption on cars Painful pustules below and in front of cars Red vesule on r scapula, painful to touch, V, with red arcola on back of 1 hand, between first and second fingers, itching V on back of r band.

Drawing beneath skin on outer side of r thigh. beneath skin just above l tendo-achillis Formication on forehead, beneath skin on back of r foot, beneath skin of l upper arm: beneath skin of thighs and legs when sitting, and < soles, as if the leg would go to sleep, in soles, with pressure in various places in legs, Itching over whole body; on r side of in l toes chest, with heat, burning, burning, on r thigh, .. scratching

Sleep.—Yawning Sleepiness, in morning, so that the eyes closed, if she looks long at one place, with feeling as if the head were pressed down, she does not recognize letters, with staring eyes Sleeplessness Frequent waking, with general sweat every time, from which he, however, feels refreshed; trequent W at night, with sensation as it he had slept enough, W every quarter beaten, the pain in thighs < when walking, like a of an hour, with painful heaviness in head Dreams world but unremembered, vivid, of the events of the previous day, confused, full of disquietude, voluptuous, with emissions and drawing pain in navicular fossa

Fever .- Coldness Shivering , through back ; through back from 2 to 3 30 PM Coldness of surface Coldness of ears, of limbs, of arms and feet, with stiffness, streaming through legs, < r, with tearing in toes, creeping down thighs, then coldness in arms (the coldness seems to come more from the chest), then greater inclination to stare at one point, creeping through legs and arms, with alternations of heaviness.

and lightness in those parts.

Heat, - by the accustomed smoking, with special heat in chest. In head, with heaviness, in sinciput, with heaviness, in forchead, with heaviness, puffy skin and throbbing in temporal arteries, from low Prickling in muscles Prickling pulsation in r ealf down in occiput to crown, deep in occiput to vertex Rejusal to carry him and staggering Weakness, sudden, and to one side of head (always deep in head) About mil on rising, painful, streaming through both when eyes Internally and externally in ears. In face, with redness, in flushes, < towards upper part.

About nipple Over back in flushes, creeping over back into head and feet, when sitting, as from hot noon and part of the afternoon, especially in occuput water, and in upper arm and sensation of hot water in chest then pain in muscles on posterior part of r thigh In legs. Of skin, with dryness Sweat on abdomen at maht.

## Cimicifuga.

A tincture is prepared from the fresh root of the black-snake root, Cimicifuga racemosa, Ell. (Actea racem, L.)

General Action.-It seems to exert a marked action on the spinal nerves especially at the upper part, symptoms of meningeal irritation and inflammation, neuritis, neuralgia, muscular spasms and tremors, etc Clinically it has been found to control a large variety of troubles of the uterus and ovaries, neuralgias and even inflammations.

Allies - Aconite, Ranunculus, Pæonia, Clematis, China, Gels., Silicea

Generalities.—Tremors over whole body (Arg n, Gels, Stram). Nervous shuddering through upper and back part of body. Je king after going to bed, obliging change of position, beginning in side on which he was lying as a perceptible twitching in I foot Continual stretching and vawning Bruised feeling (Arn, Sil) ness of whole body, with stiffness, as after hard labor Lameness in morning, with many unenviable technics Feeling as after a "spree" General feeling of intoxica-Peculiar tingling in muscles, then aching in limbs, from above downward Feeling of illness. > by supper, with weakness and trembling, believes the condition to be but one remove from manua-a-potu

Restlessness; in forenoon, in afternoon, at night; latter part of the night, nervous, in afternoon, with indisposition to fix the attention on any subject, in all parts, hardly amounting to pain, < r side Nervous all day, full of work and doing it fast. Sensation as from severe muscular exertion, < small of back Desire to lie down and close the eyes Weakness, in morning, with trembling, caused by great discharge of clear urme, with trembling, sinking feeling and nausea, nervous, in afternoon Aggravation on l side. A by motion

Clinical.—Reflex neuralgas in various parts of the body, especially in women, dependent on ovarian and uterine troubles Muscular rheumatism affecting the fleshy parts of the muscles, motion, but great restlessness Chorea, especially in muscles of la

Mind .- A sort of delirium, with inclination to run over the subject on which he was reading. Symptoms as in delirium tremens Grieved, troubled and sighing, next day tremulous joy, playfulness and clear intel-lect Miserable, dejected feeling; in afternoon, and dul-Anxiety.

ness Anxiety.

Clinical.—Delirum, with excessive residences, twitching of tendons, starting up suddenly Delirum, wild imaginings of rat, etc. (Stram), with crasy feeling about head, talking continually, changing the subject and moving about. Persperal mans, ahe is very suppection, kilding of a great variety of things, constantly, changing the subject was considered. Instantly in the form of melanchola, are represently, constantly changing the subject. Delirium tremens, as frightened, trembles, cannot remain in one place. Persperal medianchola, with deeplessness, sighing and mouning all the white. The two market characteristics of the delirum or insulty of these results in one place, and when talking constantly changes the subject.

Head .- Pain, in morning on getting up; in fore-(Gels, Sil), extending to vertex; at 10 AM, < forehead, extending over vertex to occiput, in evening. on waking, with vertigo, flushed face, dilated pupils and rapid pulse . indoors, especially in occiput, < afternoon and evening, > 9 P.M after walking in open air; always > in open air; partly > by throwing head backward , with heat in head and face , with sleepiness and coldness, then warmth , paroxysmal, in forehead, occiput, vertex, ctc., > open air, heavy, at 9 Av, < 1. temple Heaviness Dulness, as after a "spree and of eyelids, with heaviness, as from a cold Fulness, in brain. Feeling as if too large, brain feels too large for the cranium Vertigo, with fulness and aching in vertex and empaired vision; with half-intoxicated feeling

Forchead -Pressure outward and upward in upper part of cerebrum as if there were not room enough. Shooting over 1 eve. Boring over 1 superciliary ridge Pain, over eyes, over r eye, over l eye, > open air deep in before breakfast : in afternoon waking at 2 A W. extending to temples, with coldness of forehead. at 6 AM extending over vertex to occuput, with heaviness, at 10 P M, and between eyeball and orbital plate of frontal bone, with dryness in pharynx, in front part of head and in eyes, with heat in face and sweat, occasional, over r eye, intermittent, in 1 side after a hearty dinner, also after sleep, < when walking in open air, over 1 eye, extending along base of brain to

Temple —Cutting in r Pain in 1, pain as if head would burst, pain in r, extending in burning lines to forehead, afterwards with fulness, drowsiness and heat Occasional compression

Vertex -Tearing in centre. Pain in afternoon and erening, paroxysmal, < morning, and in occiput, and soreness, finally passing to forehead, lasting all night and preventing sleep Fulness in evening , F in upper part of brain, and dulness

Shooting about sides of head Pain in 1 side Fulness in 1 side Soreness in occuput caused by the pam through the whole brain, < motion Pain in occiput

Clinical.-In general the headaches affect the base of the CIMPLEAS.—In general the headaches affect the case of the occiputor the headaches begin at that point, frequently they are extremely violent and shoot up to vertex or down spine, and bending the head forward seems to pull upon the spine, sometimes it seems as if a bolk would be driven from the not k to the vertex with every best of the heart, sometimes the whole neck is very lame from distress on moving the head. There headaches of Cimicifuga may be neuralgic, associated in women with uterine disturbances, or they may be associated with symptoms of inflam-mation of the meninges of the brain and spine. Neuralgic headaches, feeling as if the top of the head would fly off

Eyes .- Congestion during the headache Aching, at 10 A.M., extending to certex, as if nerves were excited to too much action Swollen feeling. Heaviness as from a cold Pupils dilated Pain in balls (Ran b. r), in forenoon, in evening on going up-stairs, in r at night in bed, in centre and between ball and orbital plate of frontal bone, < morning, occasional, at night, extending from r through to r side of occiput, slightly affecting ear Lids inflamed, and stinging Swelling of r lid, and heat in it. Pain in r. lid in afternoon on closing it Vision dim, distorted, V of black specks Increase of myopia

Clinical.—Ciliary neuralgis, eyebalis feel enlarged and the pain shoots into the head, sometimes associated with photophobia and extreme asthenopia.

r wing of nose Stinging in nose in evening Sneez-ness, full sensation at 10 PM, caused by flatulence condition and sensitiveness to cold air as if the base of the brain were bare and every inhalation brought deep inspiration; sickening P. in duodenum. Rumcold air in contact with it Roaring in ears Coryza, with sore throat and gradual extension of the disease to the bronchial mucous membrane, and hacking cough, fluent (', with tickling in nares, exciting sneezing, profuse, greenish, sanguineous C

Face. - Redness, and of eves Pain, more in lower law, articulation of law and in lower teeth Feeling of lateral expansion and pressure outward in malar-bones and forehead at 10 AM Upper lip swollen and inflamed, skin cracked and came off. Ulcer on inner surface of lower hp Laps dry, and sore Pain in l jaw, in r upper jaw and in teeth

Clinical.-Facial neuralgia, either of rheumatic origin or associated with uterine disturbances, pain > at night, reappears next day

Mouth -Thick muchs on teeth Uneasiness in teeth in afternoon, a desire to chew or pick at them Swelling of back part of tongue, and of fauces Redness and inflammation of palate and uvula Dryness, in morning Salivation Thick saliva, sticking Offensive breath Taste unto mouth and throat pleasant, bitter

Throat - Thick, viscid mucus Roughness and scraping, R, with dryness and thirst Rawness, with difficulty in swallowing, hoarseness, which is < towards night Soreness, on swallowing, on swallowing and on pressure, < on I side, with dryness, in evening on swallowing, with full sensation high up in throat Fulness of pharynx, with inclination to swallow, of throat and vertex, with stiffness of neck Sensation as far as ton of sternum as if partly filled Constriction of pharynx, with increased mucus Dryness of pharvnx, at 4 PM; at night and inclination to swallow Empty aching along esophagus in afternoon

Stomach.-Appetite lost Repugnance to food at supper Desire for tobacco lessened Thirst, but no desire to drink Eructations, violent. Nausea, in women, with vomiting and much gastric irritation.

Feeling as if too much had been caten, in forenoon Uneasmess, in epigastrium, with oppression Oppression Tremor, after breakfast Burning

Clinical.—Nausea and efforts to vomit, in uterine affections or with spinal irritation. Nausea and vomiting caused by pressure on the spine and cervical region, with palpitation, suppression of menses

Abdomen.—Flatulence Nausea through A, then loose stool, with sharp pain in abdomen and downward pressure in rectum Pain, in morning, with thin light brown diarrhosa, wandering, heavy, peri-

Ears and Nose .- Pain in ears Stitch to outside of jodic, > stool, with inclination to bend forward. Ful-Dry, stuffed condition of nose, then open, moist Soreness of muscles on full inspiration. Pain in hepatic region; in 1 hypochondrium, < motion and bling below umbilions at 10 PM Cutting in umbili-Griping from U down. cal region, in afternoon Griping-twisting in U region, < towards l Pain below U, with weight and pain in lumbar and sacral

Hypogastrium,-Rumbling; at 10 AM Fulnose Cutting, waking at 3 AM, with uneasiness in it and urging to stool, stool thin, partly undigested, uneasiness in abdomen all the forenoon, with desire for stool, next morning waking at 3, with thin, undigested stool, pain low down in bowels, diarrhora once in four or five hours Pain in evening, with fulness in abdomen and sensation as before diarrhea: P. in l iliac region

Rectum and Stool .- Urging to stool, inclined to diarrhea Disposition to diarrhea, after rising; in evening Scanty diarrhoea, with tenesmus Copious papescent stool, with general indisposition; two, in morning Constipation; alternating with disposition to diarrhæa Hard and dry stool

Urmary Organs.-Sticking in urethra in morning. Frequent micturition, with increased urine, after retention of urine Increased urine, and pale Scanty and high-colored urine. Copious urea Specific gravity decreased at first, afterwards it rose, after standing the urine was acid, cloudy, contained fibrinous casts of uniferous tubes (!), with minute lozengeshaped crystals of unc acid adhering to their sides Sediment of uric acid like vellow sand, in the nucleated form of crystals, with the obtuse angles rounded so as to make an elliptical figure, while above this floated a cloud of mucus and urate of ammonia, and above this floated yellowish sand, which seemed to be gradually settling to the bottom, the urine appearing like a mixture of ginger and water

Sexual Organs.-Pain in testicles, with tenderness Pain in r spermatic cord, and retraction, drawing pain along r spermatic cord Bruised feeling in vagina Bearing down pain during menstruation Menorthagia Suppression of menses

women, with vomiting and much gastre irritation, with general tremors, with weak, trembling feeling; then freer expectoration, relaxation of surface, nervous tremors and vertuge. Violent reteching Darting pan in epigastrum after a light supper Pan and heat, in epigastrum after a light supper Pan and heat, the whole allimentary canal pan in epigastrum in before breakfast, extending to 1 hypochondrium, with empties of the supper Pan and heat, the pan before breakfast, extending to 1 hypochondrium, with empties Pinniness, in epigastrum in forenoon, in epigastrum in forenoon, in epigastrum in program, and the supper pan after a supplies that the supplies of the supp

Respiratory Organs .- Tickling in larynx causing dry cough, in evening, causing short dry cough; T. < speak-ing, causing inclination to cough Hoarseness, after rising; < towards night Contraction of bronchial tubes after full inspiration, impeding expiration. Hacking cough Respiration quick on waking. R. difficult after slight exertion, with general ill feeling

Clinical. - Nervous cough excited by every attempt to speak. Chest -Lancinations along cartilages of false ribs. <

inspiration; < long inspiration, occurring after wak-| Trembling of fingers when writing Second 1 finger ing at 3 A.M. and in bed between 10 and 11 PM Pain; lame, and cannot be flexed in l : in r lung, from apex to base, to r. of stefnum, < inspiration Soreness Prickling in mamme (female) during the day, with cold chills

Clinical -- Neuralgia of the diaphragm. Pleurodynia on either side; in women with uterine trouble, in the l inframammary region

Heart and Pulse.-Stitches at heart, with slight twitching or pulsation of external muscles in that region Catching pain on bending forward, and when sitting still at dinner and after dinner. Pain in region of H, then palputation. Palputation and faintness Pulse quick; and weak, and small, and full, hard, urregular. Irregular Feeble pulse, in morning, with weakness and trembling, with general lassitude, with heat and smarting of face Slow pulse, and intermitting at every third or fourth beat.

Clinical.—Angina pectoris, numbries of 1 arm, irregular trembling pulse, tremulous motions of the heart. In women catching pain about the heart preventing respiration, with palpi-tation and faintness.

Neck.—Rheumatic pains in muscles of N. and back. with stiffness and contraction (China, Dulc, Clem), heavy rheumatic pains in upper posterior part Cramping in muscles of l then r side, on moving

head. Staffness, in evening

Back.—Trembling and weakness Pain, > pressure, wandering, during menstruation, and around through hips, inside, as of boils, and in small of back and in limbs Stitches below r scapula and spine Drawing-tensive pain at points of spinous processes of three upper dorsal vertebree (Chin, Sulph), in morning on bending neck forward. Drawing pain in a single muscle between r scapula and spine Pain below l scapula, behind r, in region of lower dorsal and upper lumbar vertebra, occasionally in scapula and shoulders

Small of Back -Aching both sides of spine in morning, heavy A extending towards sacrum, heavy, in region of r kidney, < motion, weak, trembling A Weight, in lumbar and sacral region, and pain, sometimes extending all around the body, somewhat below crest of ilium. Lame, tired feeling extending from region of kidneys to sacrum. > rest. < motion

Clinical-Spinal irritation, the cervical and upper dorsal vertebræ particularly sensitive to pressure

Extremities .- Twitching of fingers and toes (China) in knee, extending to ankle; in shoulder passing and dry down arm, with numbness as if a nerve had been Tired Feeling in joints in morning on motion as itching after hard labor, stiffness

and forearms, inability to grasp anything firmly.

Lower Extremities.—Pain in muscles. < in anterior

part of thighs, on walking out into open air, as from great fatigue Weakness. Jerking in muscles of l thigh, < in region of inferior third. Constriction of 1 sartorius muscle Rheumatic pain in r knee; in l leg Lameness in r leg, < bending forward, soreness and stiffness, moving forward to inside of ankle Sharp wandering pains in l. ankle and scapula. Pain in l tendo-achillis when walking in open air, and a shortening sensation Soreness in region of tendo-achillis towards evening, < walking, with aching and stiffness Feel ing in foot as if it had been compressed Stinging in l great toe in afternoon, on lower surface, then on upper. Pain in r great toe Burning pain in second joint of r great toe, extending up limb, from 8 to 9 PM, same the next evening, but not extending up the limb

Skin .- Red papillar, becoming a diffused redness Eruption like mosquito-bites, < hands and wrists Pustules on back of hand; back of 1 Inflamed and bleeding ulcer near centre of each cheek ltching on back of hand and wrist, on back of hand, with redness, also in afternoon, < evening, I on back of l hand and wrist in evening, < back of thumb, then red papulæ, becoming, after slight irritation, a diffused redness, the redness could be reproduced by slight irritation

Sleep -Yawning Sleepiness, in afternoon, after dinner, in forepart of the evening, but restless sleep after 3 A M , in ovening, with creeping chills upon back, then frequent waking in night and desire to throw off the bed-clothes, although the thermometer was below zero Falling asleep on attempting to read Sleeplessness Restless sleep, after sleeping well for three or four hours, and dreams of being in trouble, from 3 to 5 AM, and unrefreshing, with disposition to fold the arms over the head Imperfect sleep, waking at midnight. Frequent waking at night Trouble-Dreams of accidents, seeing limbs some dreams broken, great suffering, etc

Fever.-Chill; in bed before rising, in forenoon, afternoon, with prickling in female mamma, with pricklings in breasts Occasional Sensitiveness to cold air General internal nervous chilly feeling, less over back Cold arms and feet, hands and feet back, in afternoon, I thigh and leg, as from a cold breeze, surface in morning after waking, whole surface at 3 AM, with cold sweat and lancina-Trembling, scarcely able to walk Pain, in 1 external tions along cartilages of 1 false ribs, < long inspiramalleolus and I forearm . in r. arm, elbow, wrist, and tions, surface of body and of face and hands cool

Symptoms of catarrhal fever Heat in front part compressed, then in forearm, sometimes causing a of head, hot and dry forehead H in cheeks in cramping sensation, similar pains in legs, < in upper flashes, II in 1 side of face, with general lassitude, part of thigh, about hip-joint and inguinal region. of face, with slight inclination to sweat, and full, rapid Rheumatic pains all day Drawing rhoumatic pains pulse, in region of kidneys, with pain and weariin muscles of arms and legs Pains as of boils Un ness, of feet, then weakness of knees Hot and dry eastness, almost an ache; restless, drawing sensations skin Burning in skin in morning after rising, with

Disposition to sweat at night, at 3 AM, beginning Upper Extremities.—Pain deep in muscles of r while asleep, > soon after waking, the first week with shoulder, extending to wrist; in muscles from shoulders of surface, afterwards with heat Sweat, to wrists Laming pain in I elbow anteriorly Lame-ness of l. wrist. Weakness and trembling of hands pregnancy Cold S., on hands and feet

#### Cina.

A tracture is prepared from the dried flowers of Artemiaia Cina Berg (wormseed).

General Action .- From our present knowledge this drug acts similarly to Absinth and other allied plants. producing increased reflex irritability and spasms Its symptoms particularly simulate worm affections or peculiar forms of indigestion.

Allies - Absinth, Chenopod, Cham, Arn, China, Nux v , Ign , Calc c , Ferrum.

Generalities.—The child raises herself suddenly before coughing, looks wildly about, becomes stiff, loses consciousness, as if she would have epilepsy, then coughs. Conculsions, epileptic-like, with consciousness: with distortions of limbs in all directions, except that fingers and toes were unaffected, head and trunk were drawn now backward, now forward, now to one side, while arms and legs were thrown about, then shocks through whole body, with motion downward, like stumping of feet, jerking of head upward and backward, the shocks were felt by the hand, < lower part of chest and upper abdomen, face pale, then livid, at last blue, eveballs turned convulsively upward, then directed staringly forward, pupil insensible, tongue at times contracted to a cylinder and spasmodically protruded Paralytic jerking in various parts. . in himbs Spasmodic stretching at 4 PM., then trembling, with blue lips and weeping complaints hot abdomen about pain in chest, neck and limbs Trembling, with shivering when you ning Tossing about even when awake (in a child) (Convulsive symptoms to be compared with Absinth , Chenopod , etc )

Sticking here and there in body; here and there on trunk when sitting, < on abdomen . S sometimes like a squeezing, sometimes like a pressure, sometimes like a blow or jerk, sometimes like an itching, now here, now there, in body, now in limbs, arms, feet, toes, now in side or buck, now in naval bones, < on posterior part of crest of ilium, on hip, the places pain on pressure as if brussed, cramplike contractive S in muscles, now of r, now of l thigh, now in muscles of r, now of 1 upper arm, now down small of back, when sitting, > walking in open air Tearing, in part cutting, in limbs, head and laws; tensive T in scapulæ, after eating, < touch, and in upper arm, head and nape Uneasiness; at night, tossing about on account of discomfort Weak, and pale; in morning on rising, and nauscated Aggravation morning and evening, A after eating.

Mind -Delrium and crying out Talking nonsense Cannot be quieted by any persuasions; proof against all caresses (Nux v) Piteous cries if one attempted to touch or lead him Lachrymose and complaining (in a child) Earnest and sensitive, offended at the slightest joke (Nux v) Refuses everything, even the things of which he is usually fond Indifferent Grunting, croaking and groaning in afternoon Anxiety and anguish about heart when walking in open air, as if he had committed a crime Unconscious and frothing at the mouth

Clinical.—Great mental excitement, children wake in fright and scream and tremble Children become very fretful, cannot be pleased, and though very weak when sick they are very cross and obstinate and strike everybody (Nux v , Sulph )

malar-bone Aching, in morning, with affection of eyes, basc.). Periodic, wandering tensive-tearing in malar-

< reading and reflecting; with general discomfort; internal stupefying, on walking in open air, < in sinciput, then also in occiput, as if screwed in, with numbness; drawing, after eating, < reading and mental labor. Vertigo; on rising from bed, > linng down, with black-

ness before eyes, faminess and tottering.

Forchoad —Sticking above orbital margin extending deep into brain, in bone above r temple, extending deep into head and threatening to stupely him Paralytic tearing in 1, then r eminence, with stupefaction of head Pain in evening, pressing downward externally, as if upper bones were pressed together from both sides, stupefying, externally, when sitting, and in temples, at last involving whole head Pressure in bone, with internal beating as of waves; drawing P. in 1 side of sinciput Drawing from l eminence to root of nose, causing confusion of head

Tearing in 1 temporal region, > moving head; tensive T. in r temple Pressing-out pain in temples after sneezing. Cramplike drawing in temples, pressure Intermattent weight in middle of vertex, as if brain were pressed down (Calc ph ), > pressure Drawing tearing in whole I, side of head Pressing-out pain in r parietal bone on waking, and in r. side of forehead A spot on r parietal bone feels numb and asleen

Clinical.-Cerebral symptoms of meningeal irritability, especially in those suffering from worms, particularly with swollen,

Eyes .- Sickly look about, with pallor of face Pain during reading and mental labor Pressure internally. Dryness when reading, with drawing pain on exerting them Weakness in morning, upper lids so weak all the forenoon that he could scarcely open them Pupils (Inner canthi agglutinated in ddated . contracted morning after rising) Burning pain in outer canthus, with itching on margin of upper lid (Burning in lids in evening by the light, < inner canthus) Dryness of lids in evening by the light, with sensation of sand in them Crawling in lids Tickling itching in r inner canthus, in 1 outer canthus Pulsation of superciliary muscles, a kind of convulsion Pressure on lower margin of orbit, < pressure Vision dim when reading, > rubbing eyes, in evening. Blue seems green, carmine-red fawn-colored, madder-red bronze, and white seems yellow (Santonine).

Clinical.-Asthenopia, vision becomes blurred on attempting to read Strabismus from worms

Ears and Nose .- Sticking below mastered process, like a pinching, and on pressure a bruised feeling. Cramplike perking in external ear. The child bores into the nose until the blood comes (compare Arum trı) sneezing Burning deep in L nostril as if blood would come or as after snuffing up brandy Burning aching on septum of l nostril, as if one had picked off a scab. < external touch Fluent coryza; in forenoon, then</p> stoppage of nose in evening Nose constantly full of loose mucus in morning, necessity to blow it frequently. Purulent discharge from nose

Cinical.—The child constantly picks its nose, is very restless, cries and wets the bed.

Face.-Pale and cold. White and bluish about the Head — Leaning to one side (in a child) Sticking mouth. Red Bluish, puffy Pain in malar-bones as in brain, < 1 side of vertex Tearing, extending into if seized by pincers and pressed together, < pressure (Ver359

renewed by strong pressure, then cramplike or paralytic pain Sticking in I lower jaw, < pressure; in r ramus. < pressure. Jerking pain in 1 lower inw.

\*\*CARRECTEAL.\*\*—Twitching of muscles of the face and about the eyes, especially with disordered stonach and bowels Pallor around nose and mouth particularly marked, with worms, ometunes one cheek is hot and the other pale, sometimes the whole face is burning hot; the symptomy vary rapidly (Johan) Neurilgia of the malar-bone as if pinched with pincers, < pressure (Verbacc.)

Mouth and Throat - (Round worms come through the child's mouth ) Toothache from cold drinks and inspiration of air; T as from soreness Dryness of mouth, and rawness, < palate, with uneasy qualmishness Pain in submaxillary glands Mucus in back of throat and in larynx in morning, causing hawking and hacking Inability to swallow

Stomach —Great hunger soon after a meal (China, Calc c, Nux v). Desires many and different things. No appetite. Thirst Empty eructations in morning fasting Eructations tasting of food after eating of a bitter, acrid fluid after eating Frequent hiccough Nausea, with emptiness in head; N in pit of stomach, with creeping shivers Vomiting of mucus only, of food, then general chill, then heat, with great thirst; violent; repeated, violent, of vellow water Sticking in 1 side beneath pit, < pressure, > deep inspiration Twisting, digging in epigastric region, as from a bruise Pain in pit, impeding respiration (Pressure at night)

Clinical.—Unnatural honger, the child wants a great variety of things, refuses ordinary food Vomiting of mucus

Abdomen -Crackling of flatus and maudible motions Griping, cutting, > stool Pain, alternating with headache, labor-like, as before menstruation Emptiness, with silent passage of flatus Heat becoming a griping Pinching or complete pressure transversely across, in region of put of stomach, after eating Intermittent sticking in 1 side when sitting; suddenly in I side near navel towards evening, < inspiration and always associated with statches on inner side of scapula. Twisting about navel and pain on pressure upon navel Boring above navel, > pressure Pain ration at navel after eating and on pressure; pain in region as from pressure inward of navel or as from a blow, afterwards < inspiration Cutting in ilium in morning. Pulsation internally above mons veneris

Clinical.—Distended, hard, sore Abdomen swollen, hot, very sore above the navel, where there is a great deal of colic, sometimes > pressure (Pod )

Rectum and Stool.—Single stitches in lower part on passage of flatus. Watery diarrheea

Clinical-Diarrhea of white mucus in little pieces like popcorn Passes worms, both round and thread-worms.

Urinary and Sexual Organs .- Frequent urging to urinate and much urme Turbid urine Saffron-vellow urine, containing flakes of mucus Hæmorrhage from uterus (in a girl of ten years)

Clinical. -- Involuntary micturition (Ferr ) Frequent desire to urmate all day.

Respiratory Organs .- Mucus hangs in larynx in morning after rising, soon collecting again after expertoration Loud whistling whooping on inspiration, not on expiration Tickling irritation to cough in trachea be- on top of 1 Pinching on top of shoulder Tensive

bone, < pressure. Cramplike jerking in malar-bone, neath sternum, with whitish mucous expectoration Dryness of trachea in morning, a catarrhal sensation

Cina.

Cough, then the child cries au | au | A gurging going downward is heard, she is asknous, eatches her breath, and w nale Hoarse, backing C. in morning after ris-INF. the vertation thereto (as from dust) renewed by inspiration, hoarse, hacking, in shocks in evening; molent, paroxysmal; in morning, so violent in order to loosen the mucus that tears came into his eyes, hollow, in morning after rising, in violent shocks against upper part of air-passages, with difficult loosening of mucus Disposition to cough caused by deep breathing Expectoration of mucus from larynx

Respiration short, with omission of some inspirations. Short, rattling; on walking in open air, as from much mucus in chest. Dyspnæs when standing. with anxiety and sweat on chest. Difficult, loud R

Clinical.—Capillary bronchitis in children, screams when approached (Arn.), swallows after coughing, screams and talks in sleep. Whooping cough.

Chest.-Stitches, beneath I clavicle, near sternum, on deep inspiration, with pain on pressure, on one of the cartilages of the ribs, near sternum, < pressure, > inspiration, jerking, in r side, between sixth and eighth ribs, not affected by respiration; sudden jerking, in 1, between fifth and sixth ribs; boring, in middle of r side below ribs, > pressure, intermittent prickling, burning, in side, on one of the true ribs punching, in 1 Pinching in 1, between second and third ribs, in 1, < inspiration, on sternum when running, on clavicle, like the pressure of a dull point

Digging beneath upper part of sternum, cramplike, beneath sternum, as if chest would be pressed asunder. Feeling as it it would burst out at both sides when sneezing, then pain, < r side Pressing-out pain alternately in 1 chest and in small of back, the latter seems as from much stooping, < expiration Aching anteriorly under sternum, beneath upper part of sternum during morning cough, then, after difficult loosening of something, soreness and burning, sudden oppressive, in l Sternum seems to press on lungs Cramplike contraction in 1 half Tightness on inspi-

Heart and Pulse -Trembling of heart Pulse small, contracted.

Neck and Back -Boring sticking in r cervical muscles, rhythmical with beat of pulse, moving neck Paralytic sensation in nape Sticking in middle of spine. > motion Tearing sticking in middle of spine. in upper part of spine, extending to r scapula Drawing tearing down spine Spine feels as if broken when lying on back, in evening when lying on side Sticking on outer margin of r scapula Aching in scapulæ if he moves them Brused pain in small of back Pain in loins as if he had stood long (Arn ) Pain in loins and spine as if weary, on bending backward or to one side Pain in lumbar region after cating, as from a band just above hip Paralytic drawing in loins.

Extremities -Twitching Convulsions Cramplike tearing in muscles now of r., now of l. leg, now of r. now of 1 forearm, walking in open air Paralytic pain in arms and legs Sensitiveness on motion and touch

Upper Extremities.—Sticking in front of 1 shoulder.

tearing in arms, with paralytic pain, and on taking hold of them bruised pain that it must hang down . P drawing pain through r arm, < hanging down or resting on anything, < on right. Tossing about in sleep, with lamentations and cries anything hard Paralytic sensation in r arm, like a about coles. Sleepless. Waking with weeping comstiffness of the joints, so that he cannot move it

Upper Arm—Drawing tearing in r, > pressure quent waking from unpleasant of Pinching in r, > motion, boring, in l Paralytic Dreams anxious, tiresome, absurd drawing from upper part down to middle. < motion. elbow

Elbow -Tearing in r when at rest Intermittent paralytic pain externally in bend, like a jerking

Forearm -Paralytic jerking downward on lower tearing in r Contractive tearing like a cramp in muscles of l, close to wrist, > motion Drawing digging in l Cramplike pain in muscles on bending, bain on violent stretching of arm in morning after rising, < from elbow downward, and in wrists on bending hands back and forth when arms are outstretched

Wrist -Pinching boring in r Feeling as if dislocated Drawing pain

Hand -Intermittent cramplike contraction Jerkin hollow of l , < stretching out hand

Fingers - Cramplike jerking, sudden jerking inward of r Spasmodic contraction inward of r middie, with cramplike pain Cramplike pain in muscles of outer side of l little, < motion Bruised pain in ball of thumb on pressure and on moving metacarpus of thumb towards hollow of hand Drawings, paralytic, m ring Burning pain in proximal joint of middle Crawling in tip of thumb as if asleep, C in last joint

of thumb almost as after being asleep.

Lower Extremities.—Thigh Tearing in 1 hip and nates, drawing, in anterior side of r thigh, > violent motion Boring outward below gluteals when sitting, pressure and motion Pain in great trochanter when walking as if he had fallen upon it. Pain in

nates when sitting, as if wearied by long sitting Cramplike pain in anterior muscles of I when standing Paralytic pain in 1 not far from knee Knee -Intermittent sticking; single stitches in

patella

Leg —Spasmodic stretching (in a child) Paralytic twitching in forepart, between tibia and fibula mittent sticking as with a fork in 1 tibia, just below knee Tearing in middle of l. calf when sitting Digging in I tibia below knee Cramplike pain in muscles, now of r, now of l, on walking in open air, > standing and sitting.

Foot -Spasmodic motion of 1, at last immobility, abduction far from body (in a child) Twitchingtearing in interior of l Sticking in ball of r Tear-

ing sticking in 1 heel when sitting

Toes —Cutting in 1 as if loosened from the feet Skin -Miliary rash Red itching pimples. Boil surrounded by an induration, on cheek. Burning sticking here and there, > scratching. Prickling, itching crawling, > scratching Itching tickling on border of r hand near thumb and index. Itching here and there at night, I on back of I hand, > scratching; voluptuous, in front of anus

Sleep .- Yawning. Sleepiness all day , in afternoon ; Paralytic pain in arm, so overpowering, in evening; when sitting, he must lie drawing pain through r down. Sleeps when erect with head leaned backward or to plaints, groaning, hiccough and restless motions. Frequent waking from unpleasant or busy dreams.

Fever -Chill; daily at the same hour, then heat, withand bruised pain on pressure Bruised pain above out thirst (Ign.) Shireing over whole body, with hot cheeks, without thirst (Iun ) . S creeping over trunk, so that at trembled; over upper part of body, extending to head, as if the hair would stand up, creeping over thigh. Cold cheeks. Cold face, with warm hands surface, at the point where it begins Drawing Cold hands in morning and creeping chills Cool skin

Heat, in evening and night; every afternoon, then increased sweat and deep sleep, daily at the same hour, with short breath; daily in afternoon, from 1 PM. onward, then several attacks of chill with thirst, coldness in hands and feet, then heat of the pale face, < heat of hands and feet, with cutting colic; with vomiting and diarrhoa, (with redness of face, then sweat, without thirst) H. mostly in head during fever, with yellow color of face and blue rings around eyes Rising H. any sticking, now l, now r Sticking in 1, extending to and redness of cheeks after steep, without thirst (Ign, little finger, in upper end of metacarpal bone of ring Cham); H over face, with reduces of cheeks and thirst for tinger, and on pressure bruised pain Jerking tearing rold drinks H. creeping over knees, with sensation as if a glowing coal were near the knee Internal H, with heat and redness of face

Sweat, cold on forehead, nose and hands Dry skin

# Cinnabaris.

The pure Mercuric sulphide (Cinnabar) is triturated for use

General Action and Allies.—See Mercurius

Generalities .- Nervous thrill through the whole frame, < in joints Excitement of nervous system Sensation as before typhoid fever Sensation of having taken cold Discomfort after eating as if the body were distended, oppression across chest and abdomen Restlessness Weakness, in morning, in morning after restless sleep and many dreams, on going to bed, with confusion of mind; on any extraordinary mental or physical exertion, so that he must be down, with palpitation, which was < lying on 1 side or with head low, pain in head from front to back and down spinal cord to below scapulæ, if the exertion was continued there followed nausea, vomiting, diarrheea and pain in r hypochondrium. Heaviness, with sleepiness during the day Aggravation in forenoon, evening; of pains and fever in evening and cold, at night in bed, of all symptoms except sweat Amelioration in afternoon and evening, in open air and after dinner; after eating and sleep, of pains generally by continuous rest, warm bathing, galvanism and heat

Mind.—Illusion, he considers himself well Sense of elevation on walking in open air Exhilaration, with fulness extending from all sides of chest towards stomach and heart, with or followed by similar sensations in all joints Cross and sullen in afternoon. Dissatisfied with himself, and every one else Irritable; about noon, and nervous Troubled by every noise. Nervous, uneasy, desirous of improving spiritually, but disconsolate Melancholy, cynical Indisposed to mental labor Difficult to fix the attention. > in open air .

out in front and front to back. Aching; < sleep, in as from a sharp stick in lower lid. eyes; > external pressure; deep in centre, stupefying. noon: > open air, with pressure as after taking cold. and pain in region of benevolence, with heaviness and with strong pulsations in temporal arteries Heaviness, and dulness, can scarcely lift it from the pillow Dulness in evening, < in forehead just over eyes Weariness as from long mental application Congested sensation, < in forehead Sensation as of rush of blood; < morning, with vertigo and weakness Vertigo, with lightness of head, V, with weakness in head and staggering when walking, V on rising at 7 A M., > breakfast, with pain in forehead and soreness in eveballa

Forehead -Shooting, with heaviness Sharp pain < r orbital region; in supraorbital region, shooting to ear and side of neck, < warm room and moving eyes and scalp Aching, in sinciput, in organ of tune; region of causality, in morning after waking, < lying on 1 side and back, > lying on r side and pressing head into pillow, also > rising and washing, and in crown, in r. in afternoon, < evening, over sleep, causing vertigo Rushing sound and deafness eyes in afternoon, < evening and on motion, all night, with coldness of it, > warm hand, heavy; throbbing, on waking, > pressing head on pillow. Fulness and pressure

Temples —Shooting in upper part of 1, along ridge, in evening, flashes of pain backward in r (organ of mirthfulness) Pain in r. Fulness and weight across, < motion, with sometimes throbbing over r temple Beating burning Throbbing

Vertex -Sore pain at 9 A.M., lasting all day, extending to organ of veneration, with sensitiveness to touch and sometimes throbbing Drawing pain extending to occiput, inclining to r, before going to bed

Parietals -Sticking over secretive region, becoming a numb pain, extending to r temple (time and locality), with warmth on r side, pain extending from r temple to 1, across os frontis, mild in forehead, but violent in organs of time and locality, night and day and on rising in morning Darting through sides and temples, near outer edge of r orbit, more frequent on r. side, the pain going from temples to occuput Pain in r side, in 1 side at 11 40 o'clock and in temple and supraorbital ridge Throbbing pain in organ of conscientiousness in morning on waking, extending to forchead over eve

Occiput.-Shooting from 1 side to forehead. Pain; Fulness after rising, > in l (organ of amativeness) at noon, with pressure, and in nape Rush of blood, with itching and heat extending to ears, and behind I ear three hard lumps

Scalp -Protrusion only during the day Sore to touch. Skull sensitive to touch, even the hairs pain Eyes.—Surrounded by hvid circles Red, painful, feeling as of sand in them, conjunctive of lower lid air. Sensation of a cold breeze in afternoon when ness of epigastric region. Emptiness two hours after sitting in the house. Weak about noon and sleepy; a hearty breakfast relat rising into throat and head weak sensation in I Watery sensation in I. Lachry. I tright in bod, > sitting up. Sensation as if secre-

Head .- Occasional darting inwardly through; from | mation; and dulness, with sticking in 1 inner canthus

Lids-Sticking about punctum lachrymale, next < thinking, reading and pressure Fulness; in fore- day a transparent vesicle, sore-to touch, on inner edge of hid near where the pain had been. Shooting in r inner canthus, with burning stching Pain from r lachrumul duct around eue to temple : from 1. inner canthus across brows. Drawing from r inner canthus across malar-bone to car Puffed teeling on looking up to the wall, as if muscles were too short Itching, of inner canthus, outer canthus from 9 to 12 o'clock, with stiffness of upper lids, 'inner and outer canthi, with sticking

Clinical.—Inflammatory affections of the eyes, blepharitis, kerato-iritis, ulcers of the cornes, etc, inflammations mostly superficial or characterized by severe pain in the bones of the orbit, especially by a pain running from the inner to the outer canthus, in the bone

Ears .- Aching, in I meatus, with fulness Soreness from r into middle of posterior cervical region, as if glands were affected, < evening. Sensation as of a foreign body; of water in l Noises after eating Roaring after dinner and in evening before

Nose.—Itching pimples at r nostril and dark blood from nose after blowing Sensation on bridge as if touched with a metal Uneasy creeping and pressive sensution about ossa nasi, as from heavy speciacles (compare Kali bi) Epistaxis Coryza Discharge of much mucus (Merc), flow of mucus from r nostral Symptoms of a cold, with much mucus in dirty yellow lumps from posterior nares and lameness in thighs

Clinical.—Nasal catarrh, subacute and chronic, with pain about the root of the nose, extending into the bones on each side

Face.-Flushing of 1 cheek. Pain in 1 side and in teeth, sores on maide of lower lip, towards the l Mouth. - Aching soreness of teeth Pain in r molar Tongue white, white fur; white fur in moining, sore spot on tip, sore on r side of tip, and one on each lip, soreness on 1 side of root on swallowing, with roughness and stiffness through the night, itching spot on I side Pricking in mouth and fauces Mouth and throat dry, must rinse the mouth every time he wakes, with heat in them and sticking posteriorly under tongue Peculiar drawing in M after rising on roof, soreness of roof Salvation Great fetor Taste metallic after tea; M from 8 A v till 2 P M, modified by continual tendency to hawk and spit, with salivation and much mucus, bitter M, T as of tobacco, coffee; T bad, with mucus in mouth and ptyalism
Throat.—Sore Contractive pain on swallowing

saliva. Dry at 8 A M, on waking

Clinical.--Angma faucium, with accumulation of stringy mucus passing through posterior nares into throat (Nit. ac, etc)

Stomach.—Appetite great, capricious; impaired in injected and covered with small granulations (In-morning, lost, aversion to food Thirst, on waking flammation of r, itching, pressure and sticking in at 8 A M. Empty cructation Nausea; with uneasiinner canthus and in lower lid, lachrymation on look-ness in stomach; with occasional throbbing in l. ing at anything, with fluent coryza) Sensation as if hypochondrium, with bitter and sour vomiting The something were in them Numb pressing pain Ach-mucus thrown up tastes like old tallow mixed with ing soreness, evening Sensitiveness to cold open coffee Soreness, with tightness in temples Tendersurfaces, as well as from salivary glands

from epigastrie to pubic region Intermittent shooting Griping, > two soft stools Pain, before stool. Soreness Uneasy, indescribable feeling Sensation in evening as before durrhera. Flashes of heat, with which often feels numb, wandering pain in forenoon. flatulence

Hvnochondrium -Swelling of r, with heat in it Pain, in r, sharp P in front of l, < moving and in open air, soon extending round lower border of ribs behind, and to I kidney, where it is dull and oppressive, soon afterwards in front of r. II . extending round to back and I kidney, where it is dull, then the dull pain is felt alternately in each kidney, the pain in hypochondria bending forward Burning pain in liver and soreness, with at times suppression of bile, B pain in r lobe of liver, with soreness and heaviness there Throbbing, in region of spleen

Rumbling below transverse colon Hot feeling below transverse colon. Constriction in umbilical Pain in hypogastrium after eating to occiput, in vertebræ as if dislocated. him to turn boiled cabbage, with diarrhosa and flatulence

rectum after dinner, with aching Bleeding piles Itching in anus, < night in hed Two stools daily, hard and copious, or sudden diarrhoa, consisting of side of same vertebree white or dark passages

Urmary Organs.—Soreness of urethra on urmating Urging to urinate Urine increased, and later reddish Turbid urine

Sexual Organs -Red spots on penis, as if pimples would form, on each side of glans, secreting much lardaceous matter Redness of prepuce, with swelling and itching pain (Warts on prepuce, bleeding on touch ) Penis swollen Jerking in penis Tearing statches in glans Itching pain in fossa behind penis, and pus of a nauseous sweetish odor oozes Itching of corona glandis, > by rubbing, then <, with much pus, burning sticking-itching in evening, > by rubbing, then returning more violent Violent erection in evening, in bed. Excitement on least provocation Loss of desire Leucorrhaea, the discharge of which caused pressure in ragina

Clinical.—Indurated buboes, condylomata on prepuce, which leed easily Enlarged testicle resulting from gonorrhoea, chronic bleed easily gonorrhœa

night, expectoration at first clear, then opaque, arm. afterwards gray, pushke, occasionally blood-streaked cation on swallowing

side running near ensiform cartilage diagonally finger

tions were flowing from S and from all mucous through to chest; from cartilage of seventh rib at its junction with the sternum, to r. hypochondrium under Abdomen — Distention, with desire to have every-inferior border of tenth rib, from 4 to 5 PM.; under thing loose about it Rumbling, with pain passing lower end of sternum, extending to I. side under short ribs; extending from region of short ribs to r. kidney and I hypochondrium, in upper part of r lung and in cardiac region, extending into l. arm,

> Soreness under r breast, near last true rib, < drawing breath; in a spot on r, on one rib, when touched, with occasionally sore pain in and around it, in-ternally over heart, extending along I arm on taking a long breath. Pulselike throbbing here and there beneath short ribs, < walking, > sitting and lying, with sticking Warmth under sternum

> Heart and Pulse .- Cutting at H , impeding breath-Pain at H , < lying on 1 side Palpitation during frightful dreams Pulse rapid; in evening, and intermittent, strong, then tremulously weak; slow, then rapid . lowered in forenoon and irregular.

Neck.—Muscles of nape seem contracted Pain on r side below sterno-cleido-mastoid muscle on turning region at 11 Au Soreness in U region, obliging head, in nape when head is thrown back, extending

Back -Tearing in side, < night on motion in bed, Rectum, Anus and Stool.—Weight in lower part of | > warmth of stove, with sensation as if everything would separate Pain down to loins, < drawing a long breath, P. in lower dorsal spine Sticking in two in afternoon, the last with straining. Diarrhora region of 1 side of fifth and sixth dorsal vertebre in at night Constination Stools hard and too large, evening, next day the same pain occasionally on r

Lumbar Region -Sticking in region of I kidney. waking at 4 A M, then tossing about and sleeplessness Sensation of a raw spot in centre of urethra, waking at Sharp pain in region of kidneys as if a nail had been driven in on each side of vertebre Pain, and in legs; frequent micturition, with sediment at first whitish, P in morning, and in limbs, in kidneys, I kidney Aching and drawing pain from kidneys to sacrum and in thighs and legs, > drawing up legs Bruised pain Sore feeling, extending around both sides over ossa illia, < pressure.

Extremities .- Aching; in bones of forearms and legs, in all joints, with lameness Lame feeling in all, < mornings, with fatigue Weakness in morning Paralytic sensation, with general heaviness and sleepi-Numbness of arms, knees and legs at 8 P.M., with heavy aching

Upper Extremities.- Lame sensation in r. shoulderjoint in evening Œdema of r arm Statches in arm. Tearing in arm when writing, > warmth of the stove, with sensation as if everything would separate. Pain along 1 arm, < in little finger, third finger and thumb, on supinating forearm the pain is worse at elbow, it feels as if the crazy bone were struck Respiratory Organs.—Œdema of opiglottis Irrita- Heavy deep-scated pain in r humerus, beginning at tion of larynx Hoarseness, in morning, and loss of centre, extending to elbow and along radius to its voice, (in evening, with crouplike cough) Cough, lower end, causing lameness and difficulty in moving

Cracking in elbow and shoulder at the least twitch. sputa, smelling very offensive in morning, (C in sin- Pain in l. arm-joint on turning and straightening arm gle dry shocks on lying down, > sitting up) Suffo- and when writing Numb feeling in elbows as if ulnar nerve were compressed. Numbness of 1 forearm from Chest.—Sticking beneath sternum Pain beneath elbow to end of little finger, > using arm Occasional sternum, on l chest, in middle of l breast, in front, shooting and prickling pain in two l. middle fingers, in upper part of lungs, in a spot on seventh rib of > firm pressure upon thumb Darting pain from each side, < l , occasionally in 1 side between cartifirst phalanx of r ring finger to middle of forearm and lages of fifth and sixth ribs, from seventh rib on r from lower end of l radius to elbow Pain in r. little

Lower Extremities. — Lameness and statches on head, in head, from front to back, < over r. eye and walking, < nnner sade of knee. Drawing in all temple, front of head hot; glow through legs, then muscles, on under surface. Tired feeling in joints, > aching above L clow and occasional darting pain in rising and walking. Shooting on posterior side of r lower limbs, then copious, sticky, stinking sweat, as thigh, from hip-joint to middle of femur, on straining thick as mucus. Sweat at noon, between thighs, < at stool. Pain in thighs; in r. hip, then l., with tired about noon, offensive, corrosive, between thighs when Drawing pain in thighs from hip-joints walking Cool sweat. nearly down to condyles, < motion, with lameness on getting up and attempting to walk, > walking a short

Sticking in back part of l. knee in forenoon, in r knee in afternoon, with creeping in bone above and below it Pain in knees; < at noon on walking, in I knee, near inner side of tibia Numbness of knees Painful jerking in leg, waking in evening Sore feeling in ankle, with heat and itching over whole leg Pain in tendo-achillis and os calcis after walking Pressive sensation in foot as if it would go to sleep

(Rheumatic pain in great toe)

Skin.-Redness like chronic eruption. Eruption on nape; on inner and lower part of thigh, with itching Scurvy tetter exedens on r. middle finger and palm (The margins of ulcers become painful and tense.) Itching during the day, at night, < on inside of thighs, I side of face, r palm, on inside of thighs and legs, < knees, < at night; inner side of knee, night and morning before getting up, with pricking, in various parts when walking in open air, sticking I on forepart of throat, forepart of chest, with swollen cervical glands, then round red spots with hard pimples, with itching and burning, . scratching, at last the spots are painful

Sleep.—Sleepiness; during the day, during the day, but restlessness at night; at 11 AM when listening to a lecture, in warm room, with weakness, on going to bed, but inability to sleep on account of nervous sensation, which caused tossing about; with nightly sleeplessness, hears the clock strike every hour, with

heaviness over eyes

Sleeplessness, during the day, till 2 AM, for over an hour after retiring, tossing about, nervous and Sabin, etc.) vexed, forepart of the night, then tossing about, with anxious, unremembered dreams, and restlessness from constant flow of ideas, changing from one subject to another, S., but in the morning he feels strengthened Restless; and dreamy sleep, seemed to dream before getting to sleep, R sleep, with continual dreaming and waking, with vivid unremembered dreams Waking suddenly as from a dream, after midnight, and he has no breath, like a nightmare Waking and starting up several times without a purpose. Unrefreshed on waking at 8 A.M

Dreams, with restlessness and talking in sleep Many, with frequent waking Vivid but unremembered', V, sensual; V of the lectures, < the anatomical, V. of studies and business. Anxious Troublesome. That there is a lump in his throat and r

Fever -Coldness; in a spot above and between supraorbital regions, sensation as if pressed by a cold metallic body, with heat within the cranium beneath the spot; in joints, with shivering and drawing in arms and legs; cold hands; C hands and feet mornings, but heat of them nights, with heat of skin in rim of r socket, with headache on that side. evening, and heat at night in bed, fetid sweat between thighs at night

## Cinnamomum.

A tincture is made of Cinnamon bark (Laurus Cinnamomum, L.).

Excitement of vascular system and respiratory or-She imagines that the I side of the brain is shrunken; I side of head seems smaller, she thinks that the I side of the face is smaller; I eye seems smaller, 1 leg feels shorter, < when walking Numbness all over, I side. Amelioration of symptoms after breakfast Crossness Headache. Head stupefied Eyes sunken Sunken, sickly look to face Nosebleed in frequent attacks Blisters all over mouth Tongue dry after eating, without thirst Soreness of mouth and tongue, preventing eating Rawness and soreness of mouth and tongue returned after rinsing mouth with cold water Loss of appetite in evening

Feeling as if everything in abdomen were suppurating Abdomen sore to touch Tension in abdomen in morning, in both ovarian regions, as if a thread were drawn in that direction Bright red and clear harmorrhage from bowels, < after physical exection Diarrhœa Urine increased Bearing down in genitals. Scanty yellow discharge from vagina Menstruction early, profuse and prolonged, so that soon she was but comparatively few days in the month free from the hamorrhage, at times the flow would be unattended by other symptoms, again she would be quite hysterical Backache Fingers seem swollen Sleepiness, no desire for anything, drowsiness in morning, with heaviness

Clinical.—Uterine hemorrhages; post partim hemorrhagias, hemorrhages from the bowels, menorrhagia, menses early and profise, bright red, hemoptysis (compare Millefol, Eng.,

#### Cistus.

A tincture is prepared from the fresh plant of Custus Cana-

Generalities and Mind - Trembling with the fever Bad effects from vexation Aggravation from mental excitement Amelioration after discharging mucus from throat Cheerfulness after supper, till bedtime

Clinical.—Has been used for swollen glands in general, which become inflamed, indurated or ulcerated Herpetic eruptions, scrofulous ophthalmia, oftensive discharges All the cases are extremely sensitive to cold

Head .-- Aching, < town ds evening, and lasting all night, oppressive, all day; A in sinciput after being kept waiting for dinner, > after eating Pressure above eyes Weight above eyes Aching in r side, with piercing pain in eye

Eyes,-Stitches in l Feeling as if something were passing around in it, with stitches Pressure in glabella. Spasmodic piercing pain in middle of upper

Ears. Nose and Face -Inner swelling in ears; with discharge Discharge from ears of water and bad-Heat; at night; occasionally, with fulness in fore-smelling pus Swelling of parotid glands Tip of

Burning in 1 nostril Sneezing, without cold in head Facial muscles feel as if they would be drawn to one side

Mouth -Twitching stitching in a decayed 1 upper Gums scorbutic, swollen, separating from teeth, bleeding easily, putrid, disgusting Tongue sore, as if raw Tongue and roof of mouth dry

Breath impure

Throat.—Swelling of glands Hawking of mucus; of mucus which is lodged at head of windpipe Inflammation and dryness, without dry feeling, with hawking, .. moining, of tough, gumlike, thick, tasteless mucus Tearing when coughing Stitches whenever mentally agitated, causing cough Pain on inhaling cold air, sore, in morning, with dryness of tongue Feeling of sand Feeling of softness. Dryness, < at night, > eating, with heat. Tickling, with soreness Periodical itching

Clinical.—It has been used for sore throat, mostly subnoute, with mtolerable dryness, < cold air, > swallowing liquids, great swelling of uvula and tonsis Sore throat, with a small dry spot, has to rise at night to sip water, feeling as if it were glazed with strips of tough mucus

Stomach.—(Inclination for acid food ) (Desire for cheese ) Thirst with the fever Eructation, with feeling as if it would relieve, cool E Nausea Pain after eating Cold feeling before and after cating

Abdomen.-Puffed up, with flatulency in evening Flatulence towards evening, at night, with discomfort Emissions of flatus, in evening, as when air-bubbles rise in water Internal coldness Much tlatulence in hypochondria, with pain Stitches in l hypochondrium Bruised feeling under hypochondria in morning, with flatulence

Stool and Sexual Organs .-- Urging to stool, stool pappy Diarrhea, in morning, after fruit, after drinking coffee, thin, till daybreak, squirting, grayishvellow, then three more discharges before noon. (thin, hot) Itching of scrotum

Clinical.—Diarrhea from coffee, thin, yellow, urgent, < early in morning Dysentery

Respiratory Organs -Itching in larvax at night, with scratching, and with anxious dreams Pain in windpipe Cough, < mental anguish. Expectoration as a preventive against yellow fever of bitter mucus

Clinical. The windpipe feels narrow, has to open the window to breathe fresh air, < lying down, a kind of asthmatic

Chest .- Pressure on Pain, and in throat; P., and Fulness Rawness, extending into throat, in upper part, extending into throat

('linical.-Induration of the mammary gland

Back and Extremities.—Burning bruised pain in os muscular parts of hands and lower limbs, with trembling feeling in them and with pain in wrists, fingers and knees.

nose painful L side of nose painfully inflamed and | finger, so as to draw up the finger. Sensitiveness to touch on r arm and dorsum of hand. Sprained pain in wrist, drawing, scraping. Pain in hand; in r. in evening, and in l. shoulder, in r H in afternoon, so that he cannot use it. Drawing trembling feelings in H Tearing in finger-joints Pain in r. fingers Sensitiveness of finger-tips when writing; in joints to cold, the pain < cold

Lower Extremities - Drawing, trembling feeling Pain in 1 buttock as from a blow or shock, extending down inside of femur, distinctly felt in knee, with spasmodic drawing together of calf Pain in r thigh while walking Pain in knees, in evening, when walking and sitting, and in r thigh Piercing pain in r great toe in evening

### Clinical.-Has cured white swelling of the knee.

Skin.—Swelling, beginning at ear and extending half way up cheek Inflamed spot below r scapula. extending round to front of body, with soreness to touch, then burning pimples, then rheumatic pain extending to I hip and into groin, the pain < nuction Eruptions like zoster on back Vesicular erysipelas in face Formication evenings after lying down, >. rising and opening window, with anxious, difficult breathing, both returning on lying down again. Itching all over body; on outside of throat near larvnx; of abdomen and umbilicus, on back

Sleep -Restlessness at night; with pain from flatulency, he could move the wind with his hands and

hear it Anxious dreams

Fever.-Chill, then heat, with trembling and with quick swelling and redness of glands below ear and in throat Coolness especially in throat; on forehead in nose Cold feet Heat, with thirst; in facial bones, in face in flushes. Moisture of skin in a warm room, with internal and external coolness in forehead

#### Citric Acid.

Pure Citric acid is triturated with sugar of milk for use

Allies -- Organic acids generally, which as a class produce conditions of malnutrition and anemia

A case of scurvy was brought on by its excessive use

Clinical.-Seemed beneficial in a number of cases of diphtheria Checks excessive menstruation

## Clematis.

A tencture is prepared from the fresh plant of Clematis erecta, I..

General Action.-A remedy full of pains, swelling of glands, inflammations, etc; remarkably similar to several of its botanical allies

Allies.-Puls, Aconit, Cimicif, Ran b., Berb, Rhod cocrygs Pain m all joints Bruised pain in all lumbs, as from fatigue Drawing in joints, especially in golymphatic, glands, < r inguinal glands. Twitien is knees and fingers, with tearing, in oliuntary D in jing of all fleshy parts Jorking as of electric shocks in whole body, with fright from a sensation as if he suddenly fell Trembling after lying down, < r side, eructation would relieve the pain Piercing drawing then no sensation in any part, no will power, no power pain in arm, extending periodically to tip of little to think, then weariness in all parts, with sticking beatground, walking painful and unsteady

Sticking in joints, forearms, thighs and genitals, then itching spots, and after scratching urticaria Numerous pains in various parts, lasting till falling asleep at 2 AM. Wandering pains, mostly pressive, worse when sitting than when walking (Puls., Cimicif.), in legs, skull, r. scapula, forepart of r. shoulder-joint, toes, knees, l lower jaw, tarsal bones Bruised sensation, wandering, in joints, skull and other parts. Drawing in various parts, < feet Drawing pains in teeth, nasal bones, in small of back, toes and tibire Heaviness Discomfort. Inclination for open air (Puls ). No desire to go out Restlessness and dry heat, obliging him to rise at 4 AM , R. in evening, with oppression Tossing about in bed, with anxiety and sweat on forehead Sensitiveness to external impressions, they cause irritability and anxiety, S of painful parts to touch Sensation in body in morning as after emission, or as if one had been suppressed

Disinclination to exertion, rising from bed difficult No desire for his accustomed evening walk Weakness, in morning; in morning, with sweat; in morning on waking from unrefreshing sleep, with sleepimust he down, with questioned pulsations in bloodmust he down, with questioned pulsations in blooding head erect or turning it, in on earlying head forward,
vessels, when called he was not bright and fell into a > carrying it backward, with tottering on walking in
slumber; with eracking of knees, with stiffness of joen air, > open air, with tottering on walking in
joints (Cimich) and cracking in them on motion, gast unsteady and rapid, as in slight intoxication
trembling Aggravation on walking, after black Aggravation by the accustomed cigar. coffee; after a restless night, > open air (Puls)

Clinical.—It is a very valuable remedy for a rheumatic constitution, especially in a patient who occasionally suffers from herpetic eruptions, whose herpetic cruptions sometimes become putillar, especially about the occupit, eczema impetignoides.

Mind.—Raving in evening during exacerbations Seemed oppressed by grief or insults or shadow of ting, with heaviness of head, drawing, in 1 side impending misfortune (Cimicif.). Uneasy as if an Drawing in bones Pressure on eminences Tension evil would befall him. Dread of misfortune Discontented. Anxious Sad, > nap, with thoughts lead were in it. Confusion, with emptiness and ten-of suicide. Loss of "moral strength" so that he shed dency to vertigo tears, then sleep (Puls.) Morose; in morning, on waking from afternoon sleep Tacitum, > evening Angry, fretful, avoiding every one, shunning his usually agreeable occupations, dreaded being alone, tired of living, full of thoughts of death, with fear last trembling and weeping till he was exhausted Indifferent, quiet, almost without thought

Excitement Exhilaration, with desire for mental work, sweat and itching, then exhaustion, anxiety, de-Lively mood from 10 AM to 4 P.M., then sudden disin- here and there clination for work morose mood and lassitude in limbs. Excited, lively, stronger and more disposed to Painful pimple under skin of occuput Pressure read and think than usual, then mentally exhausted Sensitiveness in circumscribed spots over forepart, and condition generally like intoxication Desire for afterwards with itching and fine scurf Itching on I mental work and power of thinking increased, then side of vertex; on forepart.

ing pain in head extending outward and sensation as sweat when sitting quietly, with mental exhaustion if it would burst, feet felt heavy and fastened to the and heaviness of whole body. Aversion to mental work. Distraction Confusion in morning, with bruised feeling; in morning, with prostration. Lost in thought without knowing what he was thinking about. Memory weak

Clinical.-It has been used for the effects of homesickness with restless, dreamy sleep and vibratory sensations throughout the body

Head .- Obliged to carry it forward and hanging down. Aching, in morning on waking, with sleepiness; after walking in open air, < night on closing eyes in bed, with raging, digging and vertigo, all > 3 A M at the open window, then, on the outbreak of sweat, sleep, increasing from morning till 2 PM. < occiput, causing nausea and vertigo, > sweat (with cold body and face), as if it would burst, in evening, as from a band about it; tensive, after eating, < forehead and temples, drawing, with pressure in sides of vertex

Sensation as if skull were too small for the brain. Screwed-together sensation Raging and beating, < forehead, preventing reading and writing Hammering in evening when lying Shocks in brain, extending forward Dulness Emptiness. Confusion, in morning; in morning on waking, in morning on risness; in morning on waking, as if he had danced all ing, with heaviness, > open air, as after intoxicating might, at noon, with little appetite; in evening, in drinks, as from coryza, > 1.30 PM Stupidity. evening when with many people, then clammy sweat, Heaviness, in morning, in morning on rising, and in on rising, on waking; on walking, and chost easily chest, with deep expiration, with sinking down, with oppressed; after half an hour's exercise in open air, external heat Congestion Almost intoxicated conafter stool, after eating, with sleepiness so that he dition Vertigo, till 2 PM, with sleepiness, on hold-

> Forehead -Tearing in frontal and parietal bones Aching, in morning, < 10 Am, < pressure, > evening, > pressure, < cold, on l. side extending into orbit, in eminences, in eminences in morning, in one side, in sinciput, with external heat, tensive, in forepart of brain, worse when walking than when sit-Heaviness in sinciput, and fulness Sensation as if

> Temple -Pain Boring in l Burrowing in r and frontal and zygomatic regions, with pressure Tension. Pulsation in I in evening in bed, preventing reading. Heaviness in r, with pressure in it

Pain in vertex Frequent sudden tearing, now in that it would be speedy, but longing for the repose of r, now in 1 side of head Burrowing in r half of death, then apprehension, weeping, homesickness, at brain when walking; in sides of head, extending to occiput Tensive pain in r side of head, rather in bones than in brain Drawing in side, < turning head Pain in occiput, as after moderate use of spirituous drinks, daily after midnight, waking several times. pression of spirits, fretfulness and loss of desire for extending to nape and forward, sometimes with a feelmental work Busy and lively mood from 10 AM. to ing as after lying in an uncomfortable position 2 P.M., then sleepiness and disinclination to work Tearing in skull Boring in skull Pressure in skull,

Scalp,-Itching crusts and stitches (Ran bulb)

Clinical.—Eruption like eccems on occuput, itching < in one, now in another I upper. Jerking drawing warmth of the bed, with stinging, crawling and ticking | noin < smoking to become so firm pressure with a cloth.

Eyes - Staring Red, and glittering, hot and dry Yellow color of the white Inflammation of (Acon) white, with lachrymation Pressure, on optic nerves Burning, as if fire streamed out of them (Acon, Rhod) Biting burning pain (Acon ) Biting , < closing, then on opening them photophobia Sensitiveness to air (Acon ). Drimess, and heat, compelling him to close the lids (Acon) Itching Sensation of a real before them Lachrymation (Puls, Acon) Pupils contracted Pain in middle of l ball (Cimicit )

Yellowish crust in inner canthus Inflammation of inner, canthus, with weak vision Sticking in inner canthus, l Burning in lids Burning pain in r upper lid, in lunner canthus Biting on margins of lids. Itching in r inner canthus, next day extending to 1 inner, with burning Pressure in orbits on moving eyes Blackness before eyes. Vision indistinct : in r Flickering Letters run together when writing, at times double vision and flickering; letters run together when reading, with frequent blackness before eyes Illusions in l'in evening

Clinical.—Especially useful in inflammation of the iris from Classicess.—Expectanty useful in innamination of the iris from cold, with pressing pain, great photophoba, lachrymation and heat in eyes and great senativeness to cold air; also useful in pustular conjunctivitis. Chronic syphilitic iritis, aggravation at night, with adhesions (Iod., Aur.)

Ears.—Biting sticking in r Burning pain in exter-nal, with internal and external heat of it, B pain in 1 external Drawing in region of r ear, cheek and side of neck towards evening, with stitches Difficult hearing, at 730 AM, in morning, with ringing in 1 Ringing before cars, periodical ringing in r Roaring, < r

Nose.—Tip red and swollen and at root a red, pain-Dry and hot (Acon ), dry in morning Stoppage Sneezing in morning, repeated S., with increase of nasal discharge, violent, after breakfast, then clear water from 1 nostril, frequent violent, in morning, with watery discharge Mucus streaked with blood Fluent coryza, with frequent sneezing (Puls)

Face.-Yellow; and sickly Red Sudden flush, with yellowish redness of cheeks Swelling of r cheek in morning, with sensitiveness to touch Weary look. Drawing stitches in 1 side of upper jaw, rhythmical with pulse, extending upward Painful pimples on upper lip Itching vesicles just beneath vermilion border of lower lip, discharging water, then covered with a tough skin, itching somewhat (compare Ranunculus) Burning cutting stitch through I side of lower hp

Mouth -Teeth Sticking in carious, with throbbing Jerking sticking in 1 upper, sticking extending upward into whole I side of face, a drawing and jerking pain, rhythmical with pulse, with jerklike twinges into drawing jerking-tearing in I lower canine at 7 PM, with sticking, soon extending through whole jaw him. backward and upward, > cold water in mouth. Jerk-

pain, < smoking tobacco, > firm pressure with a cloth. Burrowing in r back in evening

Toothache in hollow teeth; toothache during the day, < as soon as he lies down in bed, > lying quietly; in hollow, at 10 PM., after reading in bed, sleepless till 1 o'clock; at night, next day clongated sensation, gum loose, swollen and pale, the pain extending on both sides to eye-teeth and preventing chewing; all night, driving him to despair, with tossing about, weakness in limbs and anxious sweat, so that he cannot endure the covers, in last hollow molar, < getting bread into it, in hollow, transiently > cold water, also > expiration which causes a stitch as if something pressed upward into the tooth, unfitting him for work, especially for thinking, extending over temple to vertex Sensation in last upper hollow molar as if it would ache Elongated feeling in hollow, with pain on touch and running of much water from mouth (Compare facepains with Aconite)

Gum -Tearing jerking pain where l. upper wisdom tooth was drawn seven years ago, waking at 11 PM, lasting till 2 o'clock, and again at 4 o'clock, extending to zygoma and temple Sore pain, < chewing hard food; I lower back, < when cating Sensitive on chewing, and teeth

Tongue -- Coated, on waking, white Vesicles on surface and r. margin, with wartlike elevations on lower surface and sides of freenum Boring sticking at root Dry, in morning on waking, on waking, and rough; and rough and acid Speech weak

Painful cracks across r arch of palate and on r margin of tongue, next day those on tongue were surrounded by hard margins Aphthæ in mouth Sticking in r arch of palate, impeding motion of tongue Tension in soft palate Dry mouth Mouth cold, < inspiration of cold air Bloody saliva Taste sour on tip of tongue, < touching incisors and when stomach is empty, bitter T; pasty, flat, like melon-seeds, bad, to cigar

Throat.-Swelling of thyroid gland, in r upper trapezius, just under jaw, with salivation, of submaxillary glands, of submaxillary glands, with tension and throbbing, as if they would suppurate, with pain on touch and causing pain in teeth, of submaxillary glands, < in r triangle of r side of neck, painful, < motion of head Sticking, < on swallowing Burning, with redness, vesicles and ulcers Rawness, with hoarseness and constant spitting of watery saliva Dryness Uvula sensitive Uvula feels too long.

Clinical.-Violent toothache in back teeth, transiently holding cold water in the mouth or drawing in cold air, greatly < at night on lying down, warmth of bed and tobacco; with the toothache there are often free salivation and soreness of guins, teeth feel too long (compare with Merc )

Stomach.—Appetite increased, for dinner; towards ear and pain in eye on moving it, jerking stitches, evening; ravenous towards 2 PM, then discomfort extending across cheek-bone to ear, a drawing jerking after eating, with hurried eating; then diminished; in ear, extending to eye, which is painful so that he tittle for supper, lost, lost at breakfast, lost at noon; cannot endure motion or light, and eyeball is painful lost at noon on account of weakness. Does not relish to touch. Tearing jerking in all upper Sudden the accustomed tobacco. Thirst, in afternoon; in evening; with longing for ice, which does not refresh

Eructations; empty; tasting like melon-seeds ing pain in r upper hollow molar, > rinsing mouth Nausea; towards 11 A.M.; when smoking; after with cold water Jerking sticking-drawing pain now smoking, causing weakness of lower limbs, so that

Distention, and of abdomen. Pain; after dinner, in oppgastric region after dinner Pressure on after dinner: P. in enigastric region, with tension over abdomen Constriction, then also in abdomen, which was tense and hard, then difficult vomiting of a bitter fluid more watery than slimy, with streaks of pale blood. Oppression Tensive sensation in epigastric Heaviness in pit Satisty, relishes the dinner, but immediately feels that he has eaten too much

Faintness, with yawning. Coldness.

Abdomen.—Distention, with rumbling. Rumbling in afternoon; R, as if empty, extending into her-nia Flatulence Emission of flatus Sticking up nia Fistuience Emission vi naus Sudanis, up ornicci (Urethra—Mucous discharge Sticking, in orifice, Tutting contractive pain Griping Drawing pain, in navicular fossa dumbilical region, < pressure Fulless in after-ing, > atting and at night in bed; in evening noon, F and tension; F, and T at 4 F M, < till 9 Painful to touch. Construction, micturition only in Part Tension in muscles on attempting to walk in diops (Canth.) Burning on urmaning, B, < beginthe room, < coughing; painful T in parietes, <

kidney region on walking

in spleen, < pressure, with tensive sensation in fundus urinate, with hot tickling in orifice, after micturition of stomach, with tension, impeding respiration, itching tickling, which after half an hour gave way to periodical, in liver and spleen, intermittent, in hepatic the former condition, to be renewed after micturition, region, < certain motions and positions Pain in thus alternating till 1 AM Burning pain in orifice on hepatic region, < pressure, alternately in region of passing the last drops of urine Coldness Tickling, liver and spicen on certain motions Bruised pain in | < navicular fossa Itching in navicular fossa liver when touched, and on stooping (Acon )

Hypogastrium -Swelling of inguinal glands, < r , when at rest after continued walking, swelling of L. peculiar odor, saturated, offensive. Hot, and satuglands, with sensutreness on walking, the r glands become rated, smelling of violets more swollen, with pricking pain in them, < walking and Russia leather Milky, with floating flocks of mucus in bed, afterwards with tension in them, < ualking, S in and thick froth Deposit of many crystals of urate of r. mgumal region, painful to touch Periodical sticking soda in inguinal region, intermittent burning S in I inguinal ring, with swelling of glands Pain, then diarrhora, P extending into penis; in i inguinal glands; in I inguinal region Jerking pain in inguinal glands. Pressing-out pain in r ring, as it a hernia would protrude Dragging towards r inguinal canal, with protrusion of a hernia (which he had always had) Sensitiveness of inguinal region (Ran b) Prickling in r. inguinal glands Sensation in ring and on urinating Stitches at base of penis Burning anguinal glands as if a suelling would form Tension in pain in penis on emission during cotton Burning, I inguinal glands , in inguinal region when ualking, with irritable sensation during emission Erections freseeling of plands, afterwards especially I glands quent, strong E, with sticking in urethra, long-conswellen; T in I inguinal region, extending into thighs, tinued E, with aversion to cotton Swelling of r. pain.

Climical.-Swelling of inguinal glands, which are sore on walking and are painful at night (Merc)

Rectum and Anus .- Burning in rectum, and in genitals; during and after stool; sudden, then urging to stool Urging to stool, which was pasty and accompanied by flatulence, U after cating, stool profuse and thin, with burning in anus; ineffectual U Hæmorrhoids swollen and covered with mucus Itch-

they seem to totter, with general sick feeling Vomition diarrhosa Solid, after much urging; with exertion; inc from amoking the accustomed clears.

and scanty. Knotty and scanty. Blood with the stool. Stool every three days. Twice daily Omitted.

Urinary Organs.-Sticking in bladder. Frequent tense pain in prostate during the day Urging to urinate: frequent, at night, then burning in orifice of urethra, frequent, with slight discharge, urine clear, reddish Inability to evacuate all the urine at once, it frequently stops, the remainder trickles, during the stoppage there is jerklike tearing in forepart of urethra. Micturition slow and in a thin stream (Puls); as if urethra were constructed, then burning in urethra and tickling, itching and sticking in orifice. Frequent micturation, at night; then prickling burning in orifice

ning to urinate, with biting and with sticking on urinating touch Contractive cutting in r abdominal and (Cannab), and when not urinating irritation in torepart of penis, in navicular fossa (Petros) in Hypochondria -Sticking, in l, in liver and spleen, morning on urinating, anteriorly, then urging to

Urine - Copious, and red, and turbid, then diminished. Scanty, and dark red, and thickish, of Red dark. Odor hke

Clinical.—Inflammation of the neck of the bladder, great pain on beginning to urinate, feeling as if the urethra were con-tracted, has to strain to pass a few drops, dribbling after micturition Stricture

Sexual Organs.-Pressing Formication Burning sticking in framum preputii after a warm bath, with soreness, and in orifice of urethra, with burning pain < on walking; T in inguinal glands and rings, with half of scrotum (Puls), which is thickened and hangs down with r testicle Scrotum drawn up Scrotum feels as if contracted by cold Prickling in scrotum, and itching

> Sensitiveness of r. spermatic cord, with drawing up of r. testicle. Pain in r spermatic cord Paintul drawing in spermatic cord on unnating, extending into abdomen Drawing pain in l. S cord Tension in r. S. cord

Testicles -Swelling (Rhod , Puls ). Hanging down heavy, sensitive Sensitive; in morning in bed, and ing of her northolds in evening, with discharge of in spermatic cord, on walking, enlarged and hanging mucus: I of anus. Burning in anus during stool down, <1 Praching, with pain on slightest touch (Spo.). and swelling of hæmorrhoids; B after stool, with Bruised pain on touch (Rhod ), with drawing and tension in inguinal region, I thigh and scrotum, in which there is Stool.—Diarrhoea, copious; frequent Pasty, with pinching when touched and on walking Drawing-upward burning in rectum; and increased Constipation; then pain, and in spermatic cords (Berb.). Pain in morning in bed, and in spermatic cords Pressure in r, then in | body backward, and below knee. both Intermittent burrowing in r, then in both and muscles. Sensitiveness of glands Heaviness in 1 at 11 A M

Excitement, when talking with women Desire, more of a mental nature, without erections or emissions Dread of desire, even during an erection, as if satisfied to excess Emissions at night and during midday nao

Menses profuse, and early, early, lasting two days, on second day about noon griping below umbilicus, then pasty stool and emission of much flatus, after two days return of menses.

Climical.—Inflammation of testicles, pain greatly < at night by warmth of bed, with the swollen testicles there are numerous by warmth of bed, with the swollen testicles there are numerous symptoms of distress in urinating, see above Orchits from sup-pressed genorrhea Carresive leucorrheas and shooting pains in the breasts, when urinating Indurations and tumors in mam-niary glands (scirrhus?), very painful to touch

Respiratory Organs.-Tickling in larynx and irritation to cough Dryness of trachea, < sinoking, motion and in open air, with burning Cough during the accustomed tobacco-smoking, violent C, with respilation sometimes rapid, sometimes slow, dry, rough, backing, leaving burning along inner surface of sternum and sticking in lungs, irritation to C, irritable C, with scanty expectoration; with mucous expectoration Expectoration frequent, mucous E Înclination to sigh Expiration weak Breath almost arrested at 1 PM on slowly ascending a little hill, with heat in chest and sensation as if he would spit blood, which afterwards was only a white frothy saliva, the same next day after walking over an uneven road

Chest.-Hardened gland below nipple, painful on touch Sticking shocks in 1 chest and 1 side of abdomen, so that he must cry out Sticking in lungs, in r chest during inspiration and expiration; < respiration, < inspiration, in r, < inspiration, in 1 intercostal muscles, with cramplike sensation, sudden, in 1. beneath ribs, so that he must hold his breath, bend to I and press against the place Sticking, jerking, contractive purching in 1 intercostal muscles at 7 PM Tearing externally above heart Drawing, tearing, prickling over l

involuntary crying, the pain < violent motion up- tion ward or backward of l arm, pressing l scapula against air

striction of C, with pains in lungs, making him un-thumb easy Oppression, in evening, with deep respiration and heavier Ranunculus)

Heart.-Sticking outward in precordial region Intermittent oppression now at base, now at apex, till 2 A w, when he fell asleep exhausted Palpitation preventing lying on l side Pulse rapid, and strong and full, and full and irregular, and small and soft

Neck .- Tearing in nape, with drawing Drawing in and knees side, with pain on touch and turning head or bending Knee -Tearing, in r, with sticking, and in ankle;

Tension in glands glands (previously indurated)

Back.-Brused feeling, and in arms and thighs. Sticking behind and beneath tip of r scapula, impeding respiration Pain in 1 scapula, < raising arm; between scapulæ and in lower part of chest

Lumbar Region.—Sticking in r when not breathing. Sticking constriction alternating with burning, itching drawing pain, and in shoulders and upper arms, more in bellies of muscles. Pain in 1 kidney. Pressure, stooping, with tension, and in kidneys, frequent P extending higher Drawing pain in vertebre, extending around lower part of chest. Bruised pain. and in kidneys; above kidneys, extending to gluteals and thighs, < motion and touch, especially stooping. Heaviness, with painful swelling of hemorrhoids. Painful weariness.

Extremities.—Stretching even on rising Sticking in palms and soles Tearing in l arm and l. ankle; in bones of leg and in l. elbow Boring in joints, with pain and weakness Pain in joints of hands and feet; in joints, making motion difficult, rheumatic, in knees, ankles, elbows and wrists Sensation in ankles, toes knees, shoulders, elbows and upper arms as if twisted or drawn asunder Drawing and tension; in joints Drawing in joints of hands and knees, in wrist and tarsal joints, tearing, in r arm and knee, both ankles and r toes Sensitiveness of ankles and wrists ness. < morning. > motion in open air, with bruised sensation Heaviness, during the day, in morning on waking, on walking and ascending stairs

Upper Extremities.—Pain in r axilla Drawing pain from shoulder to elbow. Weariness in muscles of shoulders and upper arms, afterwards involving pectoral muscles Bruised pain in arms, after eating. Heaviness of r arm, with pressure through it Twitching of r upper arm. Tearing in 1 upper arm in evening Burrowing in 1 upper arm, < shoulder, hindering motion Oppressive pain in upper arm.

Tensive sticking in elbows and wrists Pain in bend of elbow on stretching out upper arm Bruised pain on outer side of l elbow, < pressure and motion Pain in r intercostal muscles. P in chest not Pressure and boring in r. elbow and above and below affected by breathing, in upper part of I half on in- it. Sudden sticking below I elbow. Drawing stitches spiration, in 1 upper part, < inspiration, extending in 1 forearm. Tearing in 1 forearm Pressure on deep breathing through whole 1 side of chest to in r forearm. Drawing pain on r side of forearm, the scapula, preventing full inspiration and causing extending from elbow downward, with impeded mo-Drawing sticking in wrist on walking in open Rheumatic pains in metacarpal bones and anything, bending body to 1 and walking in open air, fingers Hands feel too thick, dry and hot Steking struing quietly and breathing superficially Teneve in joints of r thumb Tearing in r finger-joints, c pain across, c at 10 rs to a cramplike paul. Con-judden or rapid motion Drawing tearing in r

Lower Extremities.—Drawing downward towards in precordial region Heaviness Sensitiveness of soles. Heaviness even in bed, H in evening after breasts, with sticking at times and on touch sensation waking, with weakness in them Tearing in r. thigh as it they would suppurate, and sensation as if fuller when sitting and lying; in hip-joint, with sticking; (Compare intercostal pains with intermittent T in I hip-joint and in bones of small of back Pain in hip, on anterior surface of thigh. Burning tensive pain posteriorly in thigh Sticking drawing in r hip and hip-joint, extending into r. inguinal region. Drawing and tension in r thigh, sometimes extending in painful jerks deep into penis. All muscles in gluteal region affected. Weariness of thighs

in r. patella, waking, seating itself after rising in r. leg. | the stching pain changing to burning, with fine scurf < tibia Drawing like a tearing after walking, and in thigh. Pain in r. on walking, P, with heaviness as if asleep, preventing walking, ending with circumscribed sweat; rheumatic, in 1 outer and in hollow, with difficult walking. Weak and knocking together

after walking. Stiffness of r.

Leg -Dark red soft swellings near inner margin of r tibia, the uppermost showing fluctuation at the centre Decrease of size. Periodical cramp, compelling rubbing Sticking in I calf when sitting Drawing tearing, now in r., now in l, extending along tibia to ankle. Boring in I tibia in morning after rising and frequently through the day. Burrowing in tibia Pain in I; in tibia during the day, in r tibia, < walk-Bruised sensation; in calves, in calves after eat-Weariness, and in back on Drawing in bones slight motion of arms Heaviness and weariness. with swellings on legs and on calves, prominent and closely anastomosing cutaneous veins, with varicosities between them. Heaviness, with pain and tottering gait

Tensive sticking in region of r. mallcolus. Sticking tearing on inner side of r ankle Boring in mallcoli, B. in l. ankle Pressure in ankles and ankle-bones Pulselike sticking in sole in evening after going to sleep and at 3 A.w Pam in r heel, in afternoon Bruised pain in ball of r heel, in feet and legs, as after fatigue Drawing and tension on walking, in foot (on which there is an ulcer) Weakness of feet, on walking. Crawling in forepart of r sole as from being asleep Burrowing in ball of r great toe Sore pain towards inner side of l great toe, < rest Press-

ure in 1 toes

Skin.—Redness, vesicles and ulcers Pimples on and pain on touch; itching, above r eyebrow, red, on I thigh, surrounded by red areola, some of the glands of I thigh suppurate and discharge thin pus tules painful to touch above eyebrows, at root of nose, on chin and tip of nose; about loins Suppuration of cutaneous glands in face and limbs. Boil on thigh Vesicles removed by shaving, again filling with clear serum; itching V on nape; itching V on thighs, with warmth.

Sticking on washing, lightning-like S here and Pulselike stinging thrusts in a wound in evening after going to sleep and at 3 AM Prickling in many parts, with itching; P beneath skin (like formication), with dryness, then towards noon moisture and softness. Burning cutting in 1 side of forehead, < when skin is drawn smooth. Throbbing pain in an ulcer in morning. Crawling and throbbing in ulcers, with stinging in their margins on touch Burning pain in I cheek. Sensitiveness of nerves to cool temperature and rubbing with clothes.

Burning-itching pain in r cheek and on wing of where there were several vesicles filled with lymph, it; sudden H streaming outward through head, face

and itching.

Clinical.—Ecsema on various parts, said to be worse during the increasing moon, with corrosive secretion, itching always < warmth of bed at night. The ecsema is prone to appear on the occuput, sometimes most (during the increasing moon), sometimes dry (during the waning moon) Eczematous eruption following suppressed gonorrhesa Chronic eczema of hands

Sleep .- Yawning , when sitting, with sleepiness , > open air, with sleepiness Sleepiness, in morning on waking, at noon, with weariness, every afternoon; in evening, but late and difficult falling asleep, after dinner, after dinner, without ability to sleep; after eating Irresistible sleepiness from 2 to 5 PM; after cating, after supper Sleep after eating more than usual at noon Must go to bed early, but fell asleep only after long tossing about, with internal heat and headache, then confused dreams till 3 AM, when he awoke with a sudden start and could not sleep again. Difficult waking in morning from a semi-slumber. Unrefreshed in morning on waking, with sweat, sleepiness and intolerance of being uncovered on account of coldness

Sleeplessness, in evening, all night, with closed eves, fatigue and internal dry heat, with sleepiness and tossing from side to side till midnight Waking carly, at 3 AM, having slept enough, though he went to bed at 12 o'clock Waking twice at night, frequent W by confused dreams, with difficult motion and dry heat Uneasy sleep, full of dreams; with groaning, disturbed by desire to urinate and by dryness and pain in mouth, with heavy dreams, frequent waking and starting from sleep, with constant waking from anxious dreams and sensation as if bed and ground were moving , jerking of body now to r., torehead, painful, painful, < forehead, with sticking now to 1 by electric shocks Frequent starting from sleep, then anxiety and sweat, < on forehead Tossing about from midnight till 2 A M, towards morning Pus- light sleep, with confused, anxious dreams

confusion of head in morning on waking Lewd, ger, from fire, for instance That he was arrested and wrongfully accused of a crime Frightful, with tossing about so that unconsciously his head exchanged places with his feet, with frequent waking and dry

Fever.-Cold in evening. Cool cheeks Shivering after slight uncovering, S, with creepings of heat and coldness, < back, across shoulders after 6 PM on walking in open air, then heat, across shoulders and back at 7 30 PM

Heat in morning, every day, beginning between 3 and 4 PW, with headache, thirst, rapid pulse, scanty and dark urine, uneasy night, > copious sweat at night and emission of urine loaded with chlorides, towards evening, in evening, with anxiety in chest, on urinose, waking him, a circumscribed redness, with ele-nating, of whole body after a glass of liquor, with vations, towards evening vesicles on lower lip, corners confusion of head, of whole body, with fulness and of mouth and wings of nose, with burning Itching heat of face, of whole body, then general coldness over whole body; in various parts, < those covered while the head remained hot. In flushes, with red with hair; on back, chest and outer part of lower cheeks Orgasm of blood, towards evening, with sexwhat max; on ouch, comes and outer part of nowel blooms of the company of the com and ears, which last were burning hot Of nose, with | put. Itching of scalp at night; of scalp and in beard fluid discharge Of cheeks, with redness. In face; under chin, with burning when scratched. with circumscribed redness of cheeks, external heat in symptoms with Acouste)

Sweat during sleep, at night, on slightest motion. Sudden, on affected parts at 230 PM, giving general relief On head, giving relief, and at the same time on small of back but without relief Sour-smelling Of a peculiar odor towards morning Transpiration

suppressed

## Cobaltum.

## The pure precipitated metal is triturated for use

Generalities .- Lying in sleep on I side, with head with late filling asleep, then lewd dreams, and waking at 4 A w . with emission Weakness , in evening, with aching in knees, with disposition to he down, and flushes of heat along legs Suffering < by all mental excitement General relief after discharging mucus from throat Remarkable feeling of being unusually

look one in the face Low spirits, thinking too little tion, with frequent swallowing of himself Exhibaration Vivacity; with rapid flow Desire for study of thought aversion to mental exercise and necessity to lie down

Head -Aching on waking and during the day; < in a room, two mornings till 10 o'clock and again in afternoon, in morning when rising, in morning, with beating and sore aching all over; all forenoon, at noon, especially in occiput, at noon, with nausea and 1 to 8 PM, mostly in forehead, caused by unrefreshing sleep from dreams, < bending forward, especially forenoon, . motion, with pain in temples, D, especially in forehead and temples, in morning, with fulness and bruised pain Feeling as if it grew large during stool, with dizziness and weakness, headache continues after the stool Sensation when stepping as it brain went up and down

diarrhoea would set in, but it did not

Pain in vertex when rising from a seat, with prick-taste and nausea ling pain in stomach Top of head feels as if it would come off at every jar Pain in occiput, in eating after dinner, after dinner, with pain in abdo-norming, from morning till 3 r.m., < open air; begin-men, < pressure, and with uneasimese; in S. and in ning at noon Sore jumples in edge of hair on coci-labdomen, with sensation as before diarrhous; as from

Eyes.—Dartings at 2.30 P.M on entering bright sunsmall of back, extending from centre to persphery, as light; when writing, with a feeling when opening lids from a warm most bandage. In back, extending up- as if strings were holding them together and were ward on I side, across lowest 11bs to scapula; in small snapping, on going into out-door light. Pain when of back, involving whole r side of back and r coming into the light, when writing Smarting in shoulder, over back and chest in flushes, on back light, when writing smarting in and chest, < region of sternum, with itching. Of corner of l eye as from hot water, with pain in yestex hands and feet at 3 AM , 10 soles (Compare febrile Burning, especially in upper lids. Lachrymation in cold air, with pain in eyes, L. in open air, with water from nose Pain in upper lid as soon as he looks at anything steadily, with smarting Smarting in lids; in evening, as soon as he begins to use them; on inner side of upper Musco volitantes, with dim vision, and while reading blurring of letters.

Ears, Nose and Lips .-- Aching in l ear; in evening, beating in l. in evening, in l (like a slight humming) Humming in l. ear Stitches in l angle of nose, with burning on scratching Feeling as of a cold in head, headache, with thin nasal discharge and sneezing Nose feels obstructed with mucus N feels dry and filled with dry scales, with itching, especially of I noson arm (usually sleeps on r side) Aching when sitting in 1 mostril in evening. Sensitiveness ting, A in bones. General screness in morning, with at end of nasal cartilage on pressure. Putrid, sickish bruised pain and indisposition to move Restlessness, smell before nose Peeling of lips, with soreness and

easy bleeding

Mouth .- Pam in a hollow tooth, with feeling as if too long, P in first I lower molar (hollow), < inhaling cold air, with swelling of gums, tenderness around it and feeling as if it would ulcerate, paroxysmal, in a hollow T. Tongue coated white; with cracks across midell dle, white mucus, with flat mucous taste, white Mind.—Condemned, mean feeling, as if guilty of Sore on 1 side of mouth, opposite stomach tooth some deed of which others knew, as if he could not Pricking in root, extending through to lear Saliva-Taste flat, with rising of sour water, which had an acrid feeling in Indisposition for throat; nauscous, in morning, and mucous Bad T mental or physical labor Dulness, with weakness, in morning, with belching of wind. Sweet T, of mucus, with expectoration of thick, white, frothy mucus, with lumps in it

Throat.-Drawing pain in I submaxillary gland Filled with white mucus, with mucus in morning. Soreness in morning when hawking, when hawking, as if raw Sensation of something sticking in it, causlanguor, in afternoon, on walking, increasing from ing him to hawk. Rising of heat, as if from stomach Dryness in morning on rising; with soreness on swallowing, feeling as if something dry had collected in it, in occupit, open air, especially in forehead, with with soreness and rawness. Discomfort, with pain on sensation of undigested food in stomach. Dulness in empty swallowing and gaping. Hawking of mucus in morning in lumps, afterwards thinner, H and spitting of thick white mucus

Stomach.-Appetite lost, for supper; diminished Eructations of wind, of sour water, of sour bitter water; of bitter water an hour after dinner; of bitter water, with pain in stomach, then dryness of throat. Pam in forchead, after rising, < stooping, in F of hot bitter water in afternoon. Hiccough after dinand in back part of eyes, in F, with fulness in ner; till 6 r.w., renewed after supper, with shooting stomach as if filled with air Tearing in r temple, in forchead till midnight. Nausea, with pain in forche near orbit, in forenoon Pain in temples, in I during head. Sourness, at 11 PM, with bursting headache, the morning, with languor, nauses and sensation as if and after supper necessity to he down, at midnight watery diarrhoes with tenesmus, then till sleep sour

Pain; in morning after rising, with headache; after

Cons

wind; as from hunger, before dinner, partially > by | sional burning pains and disposition to keep jaws eating. Soreness in region in morning on inspiring tightly closed deeply, in pit caused by constant hiccough. Sense of fulness and hardness, as if filled with wind.

Abdomen.-Rumbling, with feeling as if diarrhoa would come on Cutting before stool. Pain at 4 AM, > after a watery stool, having had no stool for two days; on waking at 5 A.M., then watery stool, with tenesmus, in evening and at night, during stool; as from fulness, after a light dinner. Strange but not unpleasant sensation, as after diarrhea. Stitching from liver region to thigh at 3 P.M Pain in l hypochondrium. with sour cructations Sharp pain in region of spleen, < deep inspiration Feeling in 1 side above spleen as if it would drop down, < walking, > sitting still. Pain in umbilical region an hour after eating, < contracting walls of abdomen. Feeling of emptiness at umbilicus Pain in hypogastrium, in evening, in 1 groin and in small of back.

Rectum and Anus .- Burning in R during stool and long afterwards Pressing in R , towards anus, < tall stool. Urging to stool while walking, < standing an hour another stool Stinging during and after

Stool .- Large, than, with tenesmus and pain in lower part of abdomen as if the bowels would protrude, with pain in sphincter ani continuing after stool and tenesmus Diarrhora, with tenesmus and colic Soft, with stinging during and afterwards Small and hard, at 9 A M, small, soft and painless at 9 P M, having had none for two days, with scratching in rectum, and lumpy. Small, with tenesmus Scanty

Twice a day. Urmary Organs .- Frequent micturition and in small quantities, with flocculent sedunent and pungent smell, with necessity to urinate at night, urine yellow Pain in urethra, with emissions; P in urethra while standing, with bruised feeling in back and loins towards latter part of day Burning in urethra during micturition Smarting in end of urethra during micturicoffee, < forenoon, with copious pale urine Urine scanty, and light-colored, and more saturated Greasy pellicle on urine; with yellow flocculent sediment Deep red urine, with a flocculent red sediment Sediment of yellow-red flocks

Sexual Organs.-Pain in r testicle, > after micturition at 10 AM Emissions without elections, emission during evening nap, lying on his back, with a vivid dream; E at night, with headache, in sleep, with partial erections. Impotence Desire in morning

Respiratory Organs and Chest.—Statching in front of

larynx in forenoon, next day at 9 30 A M, with general warm sensation flushes of heat and sweat Cough, with soreness of throat and rawness when hawking, hacking C., with expectoration of blood, which according to the sensation comes from the larynx

in open air, of frothy white mucus about 9 AM, mucous membranes produces complete anæsthesia. with lumps in it; of thick, tough mucus mixed with blood in morning, with scratching as it something tition and cold water, with scratching, rawness, occa- sleeplessness Becoming old early and imbecility in

Sighing Deep stitches in lower part of chest on inspiring deeply, mostly on 1 side

Back .- Pain while sitting, > walking or lying, on sitling down after rising; < all the morning; < sitting, with seminal emissions; as if he could not straighten himself: on either side of dorsal spine similar to that felt in chest when it is said "the food has lodged between scapulæ and in lumbar region Pain in small of B, at 6 PM, with headache, in evening, after dinner, with pain in and below knees; always while sitting , while sitting, < rising, walking or lying, partially > lying, not by standing

Clinical.-Backache in lumbar region following seminal emissions, with weakness in legs, etc.

Extremities.—Trembling, especially legs Jerks when falling asleep Stitches here and there in arms. legs, etc Bruised pain in morning, especially in joints, B. pain in all, in afternoon Weakness; from walking Aching in wrists, with occasional statches still, with cutting, stool profuse, watery, spouting, in Brussed pain in 1 hip, in region of trochanter, in morning, < motion, > rest. Aching anteriorly in middle of thighs (in muscles), in knees and lower lunbs; in knees, with itching on external side. Weak-ness of knees, after exercise Tired feeling in legs

Skin .- Yellow-brown spots on abdomen, about genitals Pimples on back of 1 ear, near top, painless, on nose, on shoulders, pit of stomach and buttocks, bleeding easily when scratched Vesicles on r side of neck, containing watery lymph, sore to touch, with inflamed base, leaving tenderness. Itching on I side of nose, on shoulders; general I when getting warm in

Sleep .- Yawning after dinner, with languor tressing drowsmess in evening Can do with less sleep Difficult falling asleep, disturbed by lewd dreams and frequent copious emissions, with partial erections Frequent waking with fright Waking with a widepart of day Burning in uredn't duling micro and successful and a successfu of having the back part of the hair cut Lewd dieams, with pollutions, waking at 6 AM, with pain in end of urethra

Fever -- Chilliness from 11 to 12 AM, general C, with vawning General warm sensation, with flushes of heat and sweat; fever from 12 to 2 PM, with sweat Sour sweat of feet, with an odor like sole leather, like what he had years before, reappears and is most between toes

#### Coca.

A tincture is prepared from the dried leaves of Erythroxylon

General Action.—In moderate doses it acts as a gen-Expectoration of mucus in morning, < open air; of eral stimulant, like its allies tea and coffee, but its white mucus in morning, with bubbles of air in it, < remote effects are disastrous. Its alkaloid applied to

Generalities.—Emacration General consumption Weight increased one-eighth of a pound Waste of had lodged in throat, inducing swallowing, of thick, tissues prevented Gidematous swelling, then ascretes tough mucus mixed with blood, in morning, with ful- Jaundice, with headache, weakness, can take little ness and pain in larynx, < pressure, empty deglu- food, emaciation, then leuchæmia, a leaden hue and old age Tottering gait, with trembling of lips, dis-| heavy next day, with aching shoulders connected speech and apathy

Hurried and impatient movements walking Involuntary rapid walking with head bent in morning, > washing and drinking coffee, at 5 or torward, vertigo and dread of falling (> bouillon) | 6 PM in the house, with vertigo in forehead, sleepi-Great hubbless when climbing a mountain, without respirations, want of appetite and low spirits. Intoxication; tory troubles (Kali chlor) Great vigor and endurance like that of Cannabis Vertigo, at 7 PM., after dinin soile of slight non ishment and light sleep Bouyancy ner, with dulness in forehead, on moving in open air, on walking in a chilling fog Freedom of chest and when walking, with sensation as if the body were whole body, with vigor and desire to walk rapidly and a long distance, though it is warm and sunny Nervous excitement, as from a mixture of coffee and brandy, unpleasant E Aptitude for work increases Power of nuscles increased Peculiar comfort, with pleasant warmth starting from stomach

Restlessness Endeavors to get into the open air bed incressantly, sometimes afraid of losing my balance exhibitation; in sinciput, < over r eye, just above and fancy myself carried off into space, I walk the eyes, just above eyes, < elevating head and turning room with great strides and feel as if I could run a up eyes Beating over eyes Pressing asunder deep long time, feel buoyant and flexible all over, then in I side on coughing or on pressing at stool Sensaheaviness of head, drowsiness and desire for rest and tion as if a band were stretched from one temple to quiet, with disinclination, not mability to move

Discomfort walk after breakfast, in afternoon, in evening, after of letters on reading and heaviness of eyes a moderate walk. No desire for work, nor skill at it. Temples—Shooting in r; in a straight walking or manual labor

Mind.—Madness Hallucinations Fancies now beautiful, joyful, now frightful Imagination excited. with increased desire for bodily exercise, trembling of Excitement, pleasant, then sleeplessness Animated and contented Elated Sensation of tion Apathy Passion for solitude strength, so that he sprang upon the table without side overthrowing the things there Changeable mood, mostly morose, irresolute, false, suspicious, malicious Wayward Irritable Sad, in evening, and weary Apprehension, with palpitation Faculties blunted Slow in finding words to express himself Averse to concentration of thought Lazy at 9 P M and sleepy Desire for work from 7 to 10 AM, then frontal headache

> eating, then returning,

Dulness, dull feeling in brain; as after intoxica-Agility in tion. Fulness at 4 P.M., as from wine Confusion, drawn to r , on rapidly ascending steep steps, then diarrhea, when sitting still and afterwards when rising from a seat, > rest and wine

Coca

Forehead -Boring over r eve Aching, in morning, 9 a.m., > walking a mile, returning on entering house, with heaviness of eyelids, in afternoon in the house, sometimes in r. half, sometimes in I. some-Tosung about in bed, the child often puts the arms times in the whole forehead. (in afternoon on walking under the head, indistinct speech Turning about in in hot open air, < at every step). > at sunset, then the other Fulness, although sitting near an open Weakness; in morning, > during a window, towards 9 PM, with pain, with swimming

Temples -Shooting in r ; in a straight line to ver-Numbness, with feeling of screnity and tex, sharp on rising and all day on looking up, leaving desire to make no motions, then sleep with strange, a sore feeling, pain through this place on coughing quickly changing dreams, which could last all day, Pain in r as if a nail were driven into it Pain over l.; without lassitude or restlessness Aggravation by in l., headache in afternoon when walking in rain, rest Amelioration in open air, riding on horseback, now in r temple, now in forchead, > standing still, (at 12 50 PM on quick walking in hot sun, > standing Clinical.—Mountain sickness, useful in a variety of complaints araning from climbing mountains, weak heart, dryspones, slaking head from side to side, pain in remple, fainting file, ed. Useful for old popple who get out of breath ceasity Angina pectors from climbing (Kali chlor). Nervous extension, with relicious experience, in the contraction of the property of the property of the contraction of the property still, after entering the house pain in crown, then on 930 PM

Sides -Constriction Sudden pain over anterior part of r at 950 PM on blowing nose.

Occiput -Pain, (at 6 10 PM at every step on runhands and legs, shivering in back and inability to ning from hot weather, then when walking), headache in fresh air changed to occupit, as if it were held Lively and in- from ear to ear in a vise; in lowest part on vawning clined for mental work Felt something like expecta- Drawings extending to temples, on attempting to read after midday nap. Vertigo at 730 PM when head isolation from the world, with inclination to feats of was bent forward in writing, extending forward on l

> Climical.—Peculiar shocks, which come from the occiput, with vertigo, so that he staggers about the street. Nervous sick headaches.

Eyes.—Brilliant Dull, and hollow, surrounded by violet-brown rings Staring, fixed upon the ground, with automatic motions of hands and groaning Discharge of mucus Pain Lachrymation of r in Head.—Aching; at 10 A M, > walking in open air, morning, with redness of conjunctiva and lids at inner returning on going in-doors; at 1 PW, in-doors; in canthus. Pupils dilated Widens pupils and lessens afternoon, evening, (in-doors in afternoon, then sensitiveness to light Lids heavy; upper lids disposed after beginning to walk in open air pain in upper part to fall without sleepiness Vision disturbed. Photophoof forchead from heat of weather); after rising, < 7 bia; with dilated pupils Blackness on ascending stairs. PM, < over r eve, with burning of eyes, > dinner; Flickering Letters swim Flickering black points at at sunset, with shiver- 4 PM when reading. White spots on reading so that ing, (as if catarrhal) in afternoon, with cold feet and the book seemed mottled white; white spots on going urging to stool Symptoms as after exhaustion Pillows out after eating, with glittering, tortuous lines and felt hard to head and neck, though sleepy, turning all with great weakness. Vision of colors and floating of night and dreams of great activity, awoke tired and sparks from before downward. Fiery points flit be272 Core

lightning, in evening It seems as if he were writing bread Herring-like to butter. Burnt to water

bell, does not hear a knocking at the door, and when one speaks it seems as if the voice came from a great distance. Roaring

#### Clinical.-Chronic deafness, with noises in the head

swollen and stuffed, as in incipient catarrh Heat for food though the epigastric region was distended internally in nostrils in evening in-doors, as from Morbid hunger, even to swallowing human excre-catching cold Heat and irritation, as from catarrh in ments. Irregular appetite, the aversion to all food is r. nostril in morning in bed, before and after rising, often suddenly followed by insatiable craving, espe-< l. nostril. Irritation, as from taking cold in even- cially animal food Little need of nourishment, even during, awakened at 9 PM by running from nose. Sneeding, after rising and in evening, in-doors Mucus increased, in morning, in-doors in morning, with heat in nose Flow of clear water and occasional sneezing, without real coryza; F of clear water from 6 AM. till 5 PM, when in a draught, with occasional sneezing and sore feeling in l nostril, of clear water, with specks of blood on blowing nose

Face. Pallor Burning redness of 1 cheek, then hue Animated expression Pain in r malar-bone Soreness of I lower law, just above submaxillary gland, < talking and chewing solid food on that side Black spots in corners of mouth Lips pale, and gums, with green, blunted teeth Swelling inside r lower lip, then one inside I cheek, nearly opposite first upper molar, painful on eating, then flattened on two sides with a thin border, red, with whitish tip 10 45 A.M

impeding swallowing, at times with tickling, causing agreeable heat cough. Dryness; on waking; and of hips, > break-

fore eyes; downward. Flames similar to distant heat- tongue in morning; at 9 PM.; > supper; > ginger-

with two pens

Threat.—Hawking up transparent tumps of muccos,

Ears.—Excess of wax in r. Aching in r. middle at

morning Uvula long and red Uvula swollen and

morning Uvula long and red Uvula swollen Pain 1 PM. in-doors; at 7 20 P.M.; in church; and in r. swallowing difficult, in morning on waking Pain mastoid process. Sensation as if something in them Scraping, with swollen uvula, causing hawking and caused deafness, but everything is heard as usual, expectoration of mucus. Soreness from cough, at During loud reading in the room sensation as if the back on rising; in morning at back, with obstruction, tympana were pressed outward by the tones or as if not > hawking and coughing, with hoarseness, on r. the tones first entered the ears through a thicker side of uvula on swallowing, with a swollen sensation Pulsation in forenoon, and dull roaring; Swollen sensation in morning on swallowing Feelaudible P Hearing painfully acute in evening ing as if mucus were at back of pharynx, not < by Singing in 1 Cracking on empty swallowing Ring-coughing or hawking Irritation to cough Tickling ing; distant, repeated in evening, of a middle-toned at l side of pharynx at 845 дм, on talking, in pharynx on talking, or soreness, at back of pharynx, towards I side, on talking; at back on rising Dryness, and heat

Stomach.-Appetite increased, sudden voracious especially for animal food, great, dinner was eaten at 11 AM with appetite, but less was eaten than on the Nose.—Sensation at midnight on going to bed as if preceding day when he had no special hunger, longing ing heavy work, with remarkable ingor Great satisfy for a long time Little appetite, especially for meat No appetite, with weak digestion, nervous irritation and headache, for dinner, in spite of which much is eaten with relish Aversion to food Thirst; at 8 P M; for brandy.

Eructations; after his usual coffee, after dinner, with heaviness in stomach and constant desire to ciuctate. empty, every quarter of an hour, loud, shmy, of the dinner Hiccough after sandwiches at noon, after a of r, with white spots in centre of latter Yellow topid shower-bath taken after supper, > lying down tinge about corners of mouth A kind of chlorosis, in bed Nausca, after breakfast, sick feeling before the bilious color first noticed gives way to a leaden supper, > by it, with disorders of stomach which may be compared to seasickness Violent vomiting of slimy water at 6 P M

Distention returning after dinner and lasting till evening, with gulping and constant desire to eructate Pricking about cardiac end at 7 PM when sitting indoors Gnawing, hungry sensation at pit Pain about cardiac end on walking, would have amounted to a cutting, > standing at 4 PM, returning during a Burning on 1 upper lip where the moustache grows, at walk Painful contracted sensation, with pain in 1 side like a splenetic stitch Dyspepsia Increase of Mouth—Teeth stanned bright yellow; greenish and digestive powers Emphases, in morning before stumpy Pam in a hollow tooth Tongue coated rising 830 a.m., renewed by breakfast, after rising, Appearance towards r. side of tip of tongue of a vees-!> before breakfast; after rising, s breakfast, cle that had broken, with a red circle around it, which he had not much appetite, after breakfast; the place feels sore, as scalded by tea, when eating, after a long walk Fulness, and heaviness, in touching it, and at other times, then sore as from a epigastric and mesogastric regions Uneasiness of sore place Offensive blackish froth around corners digestive organs Comfort in enigastrium, somewhat of mouth. Swollen sensation in arches of palate, as from a glass of wine, radiating over whole body, an

Abdomen - Distention, in evening; tense, tympanfast Burning, night and morning, and of palate, and in throat, with thirst, with fulness, and in stome with emptiness Constant urging of flatus without ach. Coolness in mucous membrane of M and emission Emission of flatus, with urging to stool, throat, verging on numbness Salivation; bitterish, E. of flatus, with the smell of burnt gunpowder at 8 AM Pain renewed after a cup of chocolate. P < coffee Taste had; in morning, and not the usual appetite; 5 P.M. after cold beer; > emission of flatus, with rumdrinking cold water. Slimy Bitter in morning; | bling Emptiness Pain in region of liver, with gallon waking, then unusual flow of water from nose, stones. Cutting-drawing digging in small intestines
Salt at tip of tongue. Salt, anteriorly on r side of | in morning, < D A.M., Isstang till 11 o'clock, > rapid

walking and eating something, but returning, excessive in icium and ilium. - pressure in gastric region Gurgling in thum, extending to ascending and descending colon

Clinical.-Violent palpitation caused by incarcerated flatus, which rises with violence and great noise, as if it would split the osophagus (Thea.)

Rectum .- Urging to stool, all day, with sulphuretted hydrogen flatus, waking at night, stool copious, solid, then diarrhoa, then evacuation of scanty, clear, in it, then hard scanty stool, with sensation as if sphincter were paralyzed; ineffectual, waking at midnight No desire for stool at usual time in morning, no stool all day, but awakened at 11 PM by urging, then abundant firm stool

Stool -Thin, then continued urging; and copious, having more smell; with urging, more smell than usual and soreness in anus during its passage; and difficult, smelling more, with sensation of looseness in bowels as before diarrhoa and with griping, copious diarrhoea, with frequent copious micturition, urinating three times at night A teaspoonful of mushy diar-Constination Hard, delayed, knotty, Last part like walnuts Irregular, dryer than usual, partly in lumps and modorous Dark Gradually lost their stercoral odor but had the odor of Coca With urging Scanty, and dark and in small pieces, and dark, and after dinner another scanty one, and difficult, at first in small pieces, with straining in r spermatic cord Frequent Delayed, and difficult, though soft enough and well formed, rectum seemed dry during evacuation

Clinical.-Chronic atonic constipation, with dyspaces, palpitation, eructations of gas, which are offensive

Urinary Organs.—Sticking in female urethra before Frequent desire, with increased urine after midnight, towards morn-Micturition at night. Urine scanty, and dark ing or early in morning brown Urine dark Thin Acid, smelling like sweat Film on its surface, indescent in certain lights, quadrupled. Pulse rapid, and strong, till night, and with fissures mapping it out, and a pale flocculent sediment floating at the bottom. Turbid when passed. with dusky red, adherent sediment, and after standing rent sediment and flocculent precipitate Urine passed at night soon formed a cloud, which by morning gathbottom of the vessel Urine passed at night has a pale orange, flocculent sediment, chiefly collected in one spot Increase of phosphoric acid Abundance of octahedral crystals of oxalate of lime, of all sizes Decrease of urea, of chloride of sodium, of sulphuric acid and of free acid

Sexual Organs .- Weakness beginning as an indefinite sick feeling Emission at night, with voluptaous dreams, sleep restless and broken Menses delayed, profuse at night, in quites, waking from sound sleep, with pain in lower abdomen

Respiratory Organs -- Irritation in larvnx in afternoon when sitting quietly in the room, exciting cough. Tickling in larynx when smoking, causing short dry cough Tickling in larynx and traches at 2 Pm. and or stretching out the arm, so that he could scarcely irritation to cough Hoarse, in morning, in even-use it or take hold of anything with l. hand. Pain

Cough in morning, C. in-doors; from tickling at back of throat, tickling, causing tingling, paroxysmal, at 4 PM when walking in hot sun; paroxysmal, in evening, in cool wind, then frequent cough, usually preceded by tickling at back of pharynx, sometimes followed by soreness there and loosening of mucus. with fluent corvza in r nostril, dry, in evening in bed, as from catarrh of air-passages, in morning, with expectoration of tenacious thick, whitish-yellow mucus, as in chronic cutarrh, with dryness of mouth and throat and thirst; at 11 PM, with expectoration, which was swalwatery mucus, with small brownish flocks swimming lowed, at 820 PM, loosening mucus from back of pharynx, which was swallowed, coughing up green mucus

Groaning (in a child) in evening when writing, with irregular and difficult breathing. Dyspnœa, a pressure on whole chest and constant desire to take a deep breath. Difficult breathing continuing even in bed, with palpitation and not unpleasant weariness Short breath on ascending a height, with oppression No want of breath on climbing a hill

Clinical.—Nervous dyspness, with weak heart. Asthma, with nervous exhaustion, restlessness and sleeplessness. Weakness of vocal cords, with hoarse voice, < after talking

Chest.—Stitches near sternum, about r fourth rib; S under l clavicle at noon, under r clavicle at 4 PM, in I lung, between third and sixth ribs, < deep inspiration Pain below clavicles, beneath first and second false ribs of 1 side when walking sion in region of short ribs Oppression afternoon, and of stomach and abdomen upper lobes of lungs Heaviness in forenoon when walking, with dyspncea, sometimes painful pressure on chest, H in evening when walking slowly, with short breath, continuing when sitting still after walking, with constant need to take a deep breath and sensation as if lungs were too much distended, on walking or ascending steps, obliging him to take a deep breath frequently Heat in r about middle of sternum indoors at 1 PM and afterwards

Heart and Pulse.—Palpitation. Heart's beats nearly weak, with peculiar noise in ears Pulse slow, and small, with increased tension

Neck and Back -Pain at upper part of nape on an oily-looking film on surface Yellowish-red, adhe bending neck down forward Sprained pain in muscles of I side of nape at 10 PM on bending head backward or forward Sudden sharp pain in r. lumbar reered into bits like crumbs of bread, swimming at the gion in morning, during forcible expiration when standing.

Extremities.—Pain, > outbreak of boils Warm indistinct pain in l. shoulder-joint at 12.30 PM Pain about insertion of deltoid in morning on moving r arm by that muscle, in arm about insertion of r. deltoid at 4 PM on raising or lowering arm after having raised it, occasionally in l deltoid Sprained pain in l. deltold at 10 PM on raising or lowering arm and during the night when lying on r. side; suddenly in lower part of r deltoid in morning on lowering arms, often on holding arms clasped above head and afterwards on raising or lowering arm by that muscle; suddenly in r deltoid at 9 A M. on using it.

Pain in bones of 1 forearm as if broken, < raising ing, with tickling in upper part of traches and cough in muscles of forearm and along border of radius as from a blow, on moving it and on pressing on it Lame pain on borders of hand

Fingers.—Painful lameness of r fourth and fifth, < stretching fingers or grasping anything, without external pain, next day this lameness was more in abductor the twenty-four without overfatigue Slept later than of little finger and consisted of pressure with pain of little finger and consisted of pressure with pain unual in morning Slept after dinner; at 1 P.M., and deep in flesh, as after a blow or great exertion. Dead-sleepy till 4 P.M. Long in recovering herself when ness of r. little, in morning and on waking from siesta. of l. little, on waking, with enlarged sensation

Lower Extremities.—Staggering: to l. Sudden pain in r. buttock at 5 P M. on walking in open air, preventwalking; S on r. hip, running towards bowels, occato foot, after getting warm in bed, lasting till sleep

on walking during the day, afterwards at 4 PM or back, after many dreams, in the midst of a dream; while lying on back with leg extended, suddenly in or inclined to 1 side. Rose more than an hour before 1, afterwards in evening when sitting with knees bent, the usual time, then read, then slept in the chair next morning when stepping with I foot on descend-

Weak, trembling sensation in legs

warm weather, and later on walking or sitting heavy Feet fatagued

from people with thin skin and fair complexion Ecchymoses on contiguous sides of first phalanges of r palmar aspect of first phalanx of l. little finger, near pressure and sometimes when walking, in loose skin between I, thigh and scrotum posteriorly Pimples in hollows of knees; red, on inner surface of thighs, itching at night Circumscribed erythema Exanthema resembling herpes, around eyelids Swelling on r cheek, close to ala nasi, hard, resembling one he had on permeum, movable in the integuments, afterwards on pressure discharge of pus and blood from a hole just below it. Nettle-rash on several parts or limited to lips, causing scabs, bleeding and insupportable pains.

(where he had a glandular suppuration several years ago, from cold and fever), at 8 or 9 P M., when writing, with smarting and tenderness to touch Tingling in hands in evening and morning during expiration. after deep inspiration, when very warm, > when cooler, < in l. palm, once in palm and back of r hand and once down r palm towards fingers Itching at junction of r. thigh muscles with gluteas maximus at 2.20 PM, renewed after scratching, on front of throat at 8 and 10 P.M., not > scratching, with feeling as if inclined to one side, at angle of forty-five degrees, rash were coming out; fearful, on scratched spots

Sleep -Yawning; all the forenoon without weari-Sleepiness; at 4 PM.; at 530 P.M., > coffee; after to be counted, face congested and whitish-gray, lips

dinner, early in evening but wide awake in bed, with heat and throbbing of temporal arteries till midnight; when sitting reading or studying, then wakefulness till 4 AM; but can do with only four hours sleep in awakened in the night, and staring with widely-dilated pupils

Sleeplessness; in evening; till 2 AM, with pressive pain in eyes when working, then quiet sleep, till 2 ing movement. Sticking on r hip, with weakness in A M, with shivering, vertigo, fever, rush of ideas and anxiety, then sweat and quiet sleep, with flow of sionally in muscles at back of I inner side, above ideas, passed the night in reading and writing and knee, at 5 P.M Pain in 1 thigh from hip-joint to felt no fatigue nor hunger in the morning Sudden jerkknee. Bruised pain in region of r. hip-joint when walk- ing in the usual afternoon nap, and waking. Sleep ing. Aching anteriorly in r knee, shooting down tibia disturbed, with frequent waking unpleasant dreams and constant sweat Restless sleep, with dreams of Cramp in r. calf in night, with pain on pressure and being hurried, R, with frequent waking. Waking on

Dreams, many, heavy, with sweat, active, troubled; ing stairs Occasional pain in 1 calf as after cramp, on incoherent, unremembered. That something was adwalking, descending stairs or using muscles of calf herent to fauces at posterior nares, which he was trying to detach, woke at 8 A.M. in the effort, and there Sudden painless feeling in r ankle as if it had given was mucus to detach, then smarting soreness, at 3 way or become loose, at 1 45 PM, on lifting r leg when AM that he was trying to remove mucus from pharynx running gently. Sudden weakness of 1 ankle as if it by hawking, on waking found himself trying to do so, had given way, at 4 PM. on running gently in open but could not succeed by coughing or hawking, with air Pain in I instep on walking as if dislocated hoarseness Vivid, partly suggested by what he had Strained sensation in I instep in morning on rising in lately read, V, of fighting, suggested by reading the Feet "Fire Worshipers" a few days ago, V., that the medicine had loosened the teeth and a piece of the Skin.—Yellow, and tense. Leaden Hamorrhage law, V, that he held a large beetle by the upper part of the body in the agony of death, firmly grasped between index and thumb, and wondered at the power ring and little fingers, on r palm and on ulnar side of it exercised to get loose and bite him. That he saw a recently-deceased friend hanging dead by his legs for the base, and on radial side of first phalanx of r little hours. Of fighting with six or seven black generals finger, some of them > washing Lump tender on who garroted him, binding him with ropes, causing great agony of mind

#### Clinical.-Insomna, inclined to sleep, but cannot

Fever -- Chilliness, at 10 PM when sitting with a window behind my back open, then shivering, the S continuing in open air. > quick motion in open air at night, with headache on r side and in occiput and less on r side of forehead, and vertigo, in head, of hmbs Fever, with heat of skin, fever in afternoon, > wine, with prostration, heat up back in flashes and burning across abdomen in flashes Sweat, in Soreness in l. groin and region of abdominal ring evening, unpleasant. Secretion of skin diminished.

## Cocaine.

An alkaloid (C<sub>1</sub>, H<sub>11</sub>NO<sub>4</sub>) obtained from the leaves of Ery-roxylon (Coca, Lam Solutions in Alcohol may be diluted for inthroxylon Coca, Lam ternal administration

#### Allies -Theine

Generalities .- The body has a pendulum-like motion laterally, with closed eyes and toes together Body resting on his elbow, head on his breast, lids tightly closed, mouth half open, pupils not larger than a ness; after supper; when sitting, with sleepiness. pin's head, breathing slow, pulse feeble, fluttering, not be aroused by shaking and pinching diminished from want of co-ordination

Twitch-\*Pleasant tremors shooting through body ing of various muscles, T of face (after having a late and there was slight paresis of accommodation, tooth pulled), then faintness, everything turned black, mydriasis lasted some hours after anæsthesia disapthe voice of the dentist sounded as if in the distance, peared lips and face so numb that she tried some time before

Amelioration from the vomiting of clear mucus

Mind.—Talkative, repeats the same idea over and over, because words fail to express the delightful sen- Cyanosis, and puffiness of face Flushes in tace, breath seems stimulating Constant desire to under- affected take vast feats of strength, feels like haranguing, gesticulations and strides around the room are irresistible, feels as if nothing he could see or hear would feeling in mouth depress him Feeling "very good, similar to that bitter, lost after a big drink of whisky," on walking about the room feels light, face flushed, after walking the feeling of exhibaration passes off, after half a grain more he teels "glorious all over the body, with stimulating waves running through the limbs," says he is intoxicated Cerebral activity, mounting at intervals into of urine ceased, also sexual function the region of delirium, the latter tendency subservient to a powerful effort of the will, the reflective faculties seemed stimulated Apathy Semi-comatose condition, from which she could be aroused easily, but answered questions with difficulty

Pupils dilated, < r, at intervals, contracted If she could speak, my coldness, general numbness, with the drug reaches the upper lid Grafe's symptom is weight on thest, gasping, sensation as if every breath often marked, the lid halting on looking down Pallor would be the last, mability to swallow, then feeling as of inner surface of lid on which the Cocaine had been if sailing around the room a little way from the floor dropped. Peculiar stiffness of lids (from application (gum did not bleed until then), feet and limbs cold to ball) and diminished sensibility of eye increasing and numb as far as knees and feeling as it asleep, gait to insensibility, pupil widely dilated, Jæger No 1 could like a drunken man's, feet remained cold all day, with not be read inside of five and a half inches with this headache, remained weak several days Convulsive eye, while with the other No 1 print could be easily Convulsions, with difficult breathing, read at four inches, and on looking steadily with both unconsciousness and livid face, then rising in frenzy eyes at an object a few feet off there was an indistinct and striking about violently, the gasping suggestive of second image to the left but in close contact, and the obstruction about larynx, after the paroxysm of pain dot-and-line test with vertical displacement by prisms m I arm, tetanic (")

In arm, sweat Hyperresthesia Anaesthesia (local); and eye being "cocainized,"), in one case the slanting was anaemia, afterwards swelling and hyperresthesia more perceptible in near vision, in the other case in distant vision Amaurosis

Ears and Face.-Ringing in ears Deafness Pallor sation, afterwards is sober, but feels foolish Every coming and going, and clammy skin. Facial muscles

> Mouth and Throat.—Tongue dry and anamic; T numb Speech incoherent Dryness, dry, leathery Burning pain in palate. Taste ces dry Warmth in pharynx Fauces dry Deglutation and articulation difficult

> Stomach.—Loss of appetite Nausca Retching Vomiting Cramps, on eating Gripings Pressure ın epigastrium Warmth Vacant feeling

> Stool and Urinary Organs.-Constipation Secretion Burning on micturition (from injection into urethra).

> Respiratory Organs.—Dyspnœa Respiration rapid Breathing very easy, and principally thoracic, very superficial, with frequent inclination to sigh posed to sigh and unable to draw a deep breath

Heart and Pulse.—Suffocative feeling in cardiac region Heart's action retarded; slightly increased, Agreeable lightness, ideas flowed with facility and the beat was felt and blood rushed to head, then dulness and roaring in head and noises in ears, confusion ness, in resisting which there were oppression of head of thought, impairment of volition, general uneasiness, and confusion of thought Vertigo on waking, V, twitching in fingers and toes, with numbress, nausea with dark vision, sinking sensation and weakness, then and pressure in epigastrium, after the acme of the semi-contatose condition, from which she was easily paroxysm face pale and covered with cold sweat. Pulse rapid, and stronger, while the breath was heat, skin hot and dry, radial pulse rapid and scarcely slower, but deeper and fuller; and weak. Pulse in-

Extremities.—Fleshy parts of arms and legs insenthough the temperature was above the normal, chat-sible to pinching, etc. Heaviness Tingling in hands, tering of teeth, then drowsiness, eyes closed, muscles with numbness; T. in fingers, r, with numbness. of face affected, weakness, mainlify to support the Hands and lips blue Tremors of fingers when outstretched. Prickings in finger-tips Cramps in legs Eyes. -Sunken Panophthalmitis from local use and feet, dorsal aspect of r. foot. Legs weak. Lost during operation, the superior part of the conjunctive the use of legs Queer feeling, extending from toes

local application, cornea and conjunctive soon became | Sleep.—Sleepiness; giving way to a feeling of great

walking. Sleep for thirteen hours.

Fever,-Coldness Hands cold and clammy. Subjective heat. Rise of temperature; with cold shivers and chattering of teeth. Skin hot and dry Sweat. then prostration, shivering, feeling of impending death . cold : on face or neck : clammy, on forehead

## Coccinella.

A tincture is prepared by digesting the live insects, Coccinella Septempunctata (L.), (the common "lady-bug"), in Alcohol

Tensive pressure in head Vertigo. Tearing sticking in one side of forepart of head Aching in temples and occiput as if brain would become enlarged or distended. Redness of cheeks, < r, with heat Rushes of blood to face like flushes of heat Tearing rhythmical with pulse, extending from r upper law to lobule of ear Jerking and tearing in one and tearing in the other teeth, with stitches extending towards occiput and warmth through the whole head Pulselike jerking in molars. Throbbing pain in upper molars Knitting pain in molars Pain in molars as if hollow and as if air were forced into them. Drawing in upper molars, extending towards r ear, when sitting, rhythmical D in teeth when eating Paroxysmal drawing or tearing, as if a tooth would be torn out. in teeth, with backing in them Cold sensation in all teeth, pleasant, in one tooth on touch of finger Gum swollen Tobacco bites the tongue severely Coldness in mouth

Clinical, —Neuralgue headaches, beginning in forehead over r eye, which is very sensitive to touch (red), neuralgue of teeth, etc. Effects of cold in the region of the kinders, pain in loins. Hiccough and burning in stomach, but particularly pain in region of kinders (compare with Dorphora and Canth)

### Cocculus.

A tincture is made from the dried fruit of Anamirta Cocculus.

General Action.-It produces violent convulsions and loss of control over muscles, excessive vertigo and nausea Paralysis of muscles

Allies .- Rhus tox. Zinc . Nux v . Plumb . Phos . Arg nit.

Generalities.—Starts easily Inclination to tremble Fell to the ground, trembled, vomited and became Convulsions, tetanic, clonic, in upper limbs, then general, with frothing at the mouth, tonic and clonic, with severe contortions and shocks of limbs and danger of suffocation, trismus, biting of the protruding tongue, bloody foam from mouth and nose at every expiration, tetanic stiffness of whole body alternating with convulsive shocks, with cold sweat, dilated pupils, fixed look, unconsciousness, convulsive shocks when the skin was pinched

Epileptic attack, intoxicated feeling on sitting down. then staring without answering questions, then fell unconscious, bent himself together with unintelligible cries, passed urine involuntarily, general convulsions, the outstretched hands clenched, with paroxysmal choking in throat, mouth half open as if he would vomit, bubbling foam at the mouth, hands cold, face covered with cold sweat and spasmodically distorted, eyes glassy, protruding, then he stood up, but did not

Wakeful feeling, with weakness of legs in | those who spoke, endeavored to strike the bystanders, face expressed rage, then groaning and grunting, after recovery aversion to all nourishment Twitching of various parts of muscles (Zinc.), < lower limbs, as after a long walk. Hamorrhages (Compare convulsions with Cicuta and Nux v.).

Sticking in cold swollen glands, at least on touch, with heat, S in parts previously inflamed, if touched with fingers, burning S here and there (Toaring in hard swollen glands) Drawing pain in limbs and abdominal muscles, as from taking cold Paralytic drawing in side of neck and in other places, at times almost like an intermittent paralytic pressure Alternation of diarrhœa, vomiting, sopor and delirium.

Indolence, with taciturnity, also in morning after waking Inclination to lie down Avoids the open Woakness, gen-Restless Want of vital energy eral, several days at 9 A M . with heaviness of limbs, so that she must sleep, from sightest exertion, with exhaust-ing sneed, from sightest loss of sleep; when walking, < sitting, attacks of paralytic, with pain in back (Rhus t), so that it is difficult to stand firmly (Rhus t). Faintness, on motion, with distortions of fitcial muscles Hemiplegia on l. side Immobility. Aggravation from cold air (Rhus t), from coffee (Nux v), smoking tobacco (Nux v.), drinking, eating, sleeping and speaking aggravate head symptoms.

Clinical,-General tendency to paralysis, heaviness and Cilinical.—General tendency to paralysus, heavmoses and singushness of the whole body, numbers, sometimes trembling and perking of various groups of medics, at times unconquerable extremities and numbiness, chores, the pations is exhausted hysteris, espocially menstrusi, complaints of numbiness and weakness of the extremities, particularly useful in complaints resulting according to the complaints of numbiness of the extremities, particularly useful in complaints resulting according to the complaints of numbiness of the extremities, particularly useful in complaints sensiting according to the complaints of the complaints of the complaints according to the complaints of the complaints of the complaints according with the ympromis of weakness of paralysis. General bad effects of prolonged months, according to the complaints of the ness of extremities, aching in thighs, falling asleep of limbs, weak, empty feeling in chest or abdomen.

Mind -Mania, irrenstible inclination to sing and trala Weeping Despair Sad, as if he had suffered an in-Sensitive, everything offends him (Nux v) Offended at trifles, often to weeping, with contraction of pupils, after weeping loss of appetite. Angry; and peevish, after a few hours lively and jocose Dissatis-fied with himself Earnest, then breaking into complaints, earnest, little concerned as to his own health, anxious about others' sickness Thoughts directed to an unpleasant object, absorbed in herself Dread of every surprice Fear Hypochondriac, < afternoon Anxiety, sudden; as if she had committed a crime, in morning, about the incurability of a slight complaint, like a dream, preventing sleep Discouraged Intolerance of interruption or noise No desire to do anything and pleasure in nothing Time passes too rapidly Memory lost (Anac ) Sits in deep thought Stupidly dumb Stupefied when awake, as from sleep Unconscious

C'Intend.—Te se especially adapted to cases which present a mertal condition of signatury after of comprehension or cannot think of works with which to express themselves, the mird feedbeammled, especially with vertigo, names, etc. Mental dereaments resulting from suppression of menses. Melancholy, is wrapped in profound sadness, with apprehension, dense to escape,

Head .- Convulsive trembling (Cicuta v). Aching, answer questions, showed his teeth and bellowed at with nausea; A. < cold air; as if bound up; as if brain through whole, so forehead, in forenoon, reading rather benumbing than painful Tearing digging in and reflecting, until there is loss of ideas: P down- lower law ward in whole, < forehead, < walking Aching composed of constriction, burning, tearing, digging and boring Much affected by thinking Confusion. boring Much affected by thinking eating and drinking; C. and stupefaction; C in morning, with humming in it as after a debauch. Dulness, they would fall out A decayed, loose tooth feels and confusion, reading, so that he must read a passage elongated and the gum about it is swollen Pain in several times in order to understand it; with cold hollow tooth only on chewing, as if loose, no pain on sweat on forehead and hands and aversion to food biting teeth together when not eating. Biting in back Heaviness, with confusion, as after intoxication, sen-teeth as after using much salt, causing a pleasant sensation as it something heavy were lying on it (Pain- sation on biting together (Gum sensitive and sore.) ful shaking of brain when walking, moving head or Tongue coated white, and dry at edges Tongue dry, with speaking) Verlige; on rising up in bed (lbr, rhos), a yellowsh cost, substantial and the protrudes it far Tongue toxication, with dulies in forcheads at fa board were found in unique set if beaton if he protrudes it far Tongue toxication, with dulies in forcheads at fa board were found in more than 100 to 100 across forehead; when sitting, as from intoxication

wavelike, in 1 half.

Statches in I temple, crawling S. in temples deep into brain Pain in vertex Stitches in r side less and seems unsalted of brain Shuddering in I side of occiput as if hair would stand on end

with constant nauses and vertigo (Petrol) Sick headaches, especially brought on by reading in cars and carriages (Petrol,

Eyes —Turned upward Surrounded by blue rings to their fullest extent, and again contracted as the without thirst Paralysis (Rhus t) spasm returned, the spasm produced by touching lids

torcible yawning Hard hearing in r

air Coryza (Blows bloody mucus from nose)

Clinical.-Paralysis of facial nerve, involving the lids of one eve and side of face (Caust., Rhus t ).

Mouth.-Incisors seemed raised up and heavy as if

Filled with aphthæ, becoming gangrenous, so that Forehead -Sticking above r eye; intermittent bor- the soft parts of mouth were destroyed and the teeth ing S in r side Headache as if the eyes would be torn out; fell out. (Contraction when speaking, and she must awhing as if sensition as if there were a small throbbing peach growing in Internitient pain in Irom, it. Burning in palate. Dryness in night, withl eminence consisting of raging, throbbing, sticking, out thirst; D sensation, with frothy saliva and thirst. afterwards extending as a crawling to r frontal emi- Sensation as if water collected in it Salivation Menence Aching in sinciput. Compression in r half; tallie taste, with loss of appetite (Nux v), M. at root of tongue Bitter taste, at root of tongue, to tobacco when smoking Coppery T Salt T anteriorly on r side of Cramplike pain in 1 temporal muscle Pain in tem-tongue, > gingerbread. Sour T. after eating, S on ples as if head were screwed in Inward-pressure in coughing Shiny T though food has a natural taste I temple, in r, as if a dull instrument slowly pressed Nauseous T T as if he had fasted long Food taste-

Throat.-Swollen glands beneath chin, beneath lower jaw, and hard, with nodes on forcarm, which are painful on passing hand over them, S of parotid Clinical.—Vertigo as if intoxicated is an almost constant of occupits symptoms, generally associated with a teleng of superfaction of head and numboes and untertaines of extremities. Sick beside-bes, pain, especially seated in occupit, seate if something arrested the breathing, construction of glottis Scraping, > swallowing Sensitiveness, food seems as sharp as if excessively salted and peppered Pain in tonsils worse on swallowing saliva than on swallowing food; P in upper part of pharynx, with sensation of Swelling of one and of half of nose in morning after swelling at root of tongue, which makes swallowing headach through the night) Stitches from within painful Heat, and in stomach, afterwards extending outward Brussel pain at inghl, with mability to open over abdomen, H in evening, extending into palate, buls (Rhus t) Pain, with mability to open lids at with shivering about head. Dryness; in upper and night, P as from dust Pupils contracted, to their back part, as if it and the tongue were rough; in smallest diameter, then as the spasm abated dilated fauces and esophagus, < swallowing, with roughness,

Stomach.-Aversion to food (Nux v , Rhus t ), even the Lads dry. Pressure in outer margin of orbit Dim smell of food causes it (Colch.), but hunger, averse to Dark spots and objects like flies float before eating and drinking, to sour things, bread tastes sour. the eyes Vision of a black object that receded from Appetite lost, food has no taste, A lost for breakfast, her, turning with her, but she saw everything clearly he feels full. Hunger in pit of stomach, little > Ears -Sensation alternately in ears as if closed and eating Thirst, < eating, T for cold drinks, especially deaf (Heat in r outer and middle, in morning in beer; unquenchable Eructations; bitter (Nux v ); putrid bed ) Sound of rushing water, with difficult hearing (Nux v), in forenoon, empty; empty, leaving bitter Rushing as when listening at a tube ('racking on taste in mouth and throat; of musty air, tasting of food; sharp scraping, < evening; incomplete, ineffectual, Mose.—Swelling of r half Pain in anterior angle instead of which there is hiccough. Hiccough (Nux v); of nostril, < touch, in I nostril as from an ulcer inclination to Nausea; in morning so that she can Sneezing Inability to sneeze when walking in open scarcely rise (Nux v); in afternoon after every drink, mostly in mouth; when riding in a wagon (compare Face.—Earthy, and painful expression a cold room, with heat in face (yanosis Expression tun; on eating; with headache and bruised sensation rigid and irritable Cramp in malar-bone, in masseter in abdomen; as from overloading stomach. Vomitmidnight, with bitter and sour taste in throat, and attacks of suffocation).

Gurgling beneath pit Pricking beneath pit, with gnawing. Griping Pinching Constrictive pain, preventing sleep Squeezing in pit when walking, and tension Pain in pit, beneath S., after eating, in S. after eating; several hours after a meal, or at night in bed, and in pit and hypochondria, on attempting on touch, in pit, impeding breathing. Bruised pain other day Putrid. Frequent, small; (frequent and in pit on eructation. Sensation as if a worm were pale) moving in it Sensation as if he had not eaten for a long time and the hunger had passed away. Burning, and in abdomen. < about navel.

Clinical.-Nausea and even vomiting are almost constant CLIBECTES.—Nauses and even vomiting are almost constant concommitant of a Cocculus condition. Nauses and vomiting from riding in the ears. Extreme aversion to food, with persuasting lightly qualmish, bitter tasks, metallic tasks, putrict tasks partial results of the constant of the con

Abdomen .- Distention; by flatulence, waking about midnight, causing oppressive pain here and there, some flatus passed without remarkable relief, new flatus collected for hours, > lying on one side and the other; with heat and pain Emission of hot flatus before diarrhoea Flatus presses upward, moves here and there after supper, and is passed with difficulty Statches through to lower part of back, morning in bed, S in several parts on stooping Tearing Cutting when walking after dinner, with chilly sensation and vertigo Pinching. Drawing pain Constrictive pam, with pressure towards female genitals, nausca in pit of stomach and inclination to waterbrash Empty teeling, as if she had no intestines Burning (Compare flatulence with Nux v., Carbo v, Cham, Lyc and Plumb.).

Griping in upper (epigastrium), taking away the breath. Pinching construction in upper, after eating, extending to I side of abdomen and chest Pain in upper, beneath last fue ribs of r sude, < bending forward, let detention and dymenorrica and suppressed meastration, coughing or inspiration. Bruned pain in hypochondria Statches in r side, l. side, intermittent, in 1 minoses, remote symptoms, vertiga, names, familient colie, and remove of extremities, etc. Suppression of mense, with purelient guidance and familient addomen. side near navel Twinges in r side above navel Pinching in 1 muscles. Drawing pain from r to 1 without inclination to vomit.

Hypogastrium.—Rumbling Stitches in r inguinal region. Cutting, extending to upper, > standing Painful inclination to inguinal herma, rising from a sore pain. Internal feeling in groins as if stuffed, < stepping forward, when it seems as if the thickness pushed forward and everything would fall out. Paralytic pain in r ring as if something would force its way through (Nux v), when sitting, > rising. Drawing pain in groins as before menstruation

Clinteal.—Fixitent cole only slightly sevenating gas stude come at might, ascendict with feeling of emptines, names, vertigo, etc. Gastralgas from suppression of menses. Excessive flaustent distention of abdomen and dymemorrhica. A valuable remedy in hernias, both umbilical and inguinal, is particularly indicated when the abdominal muscles are weak and it seems as if a herma would easily take place. Flatulent colu in preg-

Rectum and Anus.-Urging to stool, with offensive

ing; during the accustomed smoking; frequent, fre-time, then frequent, sudden diarrhosa, in small porquent, of greenish fluid; (of food and mucus towards tions, with emission of flatus, U after stool, causing faintness, desire for stool, but the stool is delayed by want of peristaltic motion in upper abdomen : meffectual U, with constipation for three days, then hard, difficult stool (Plumb.) Crawling and itching in rectum, as from ascarides Contractive pain in anus (Plumb ) in afternoon, preventing sitting Burning itching in anus.

Stool — Thin Flund, frequent, whitish-yellow. Soft. to eructate, almost a stitching in put on eructation, (Slimy) Constipation Hard, difficult, only every

Clinical.—Diarrhees brought on by riding in cars or carriage, < drinking cold water, with flatulent distention, colic, feeling as of sharp stones rubbing together in abdomen, numbress of legs, ver-

Urinary Organs.—Sticking in urethra. Pain in urethra on urging to urinate Tensive pain in orifice of urethra when not urmating Sticking-itching in forepart of urethra Frequent urging to urinate, with discharge of watery urine) (Retention of urine for ten minutes) Urine watery Urine red, without sediment

Sexual Organs.-Relaxation in night, with retraction of prepuce behind glans Sensitiveness Sticking in end of prepuce, in one testicle Itching of scrotum. Itching-burning of scrotum Bruised pain in testicles, Drawing pain in testicles Excitement, with < touch desire. Emissions at night

Menstruction too early, with distention of abdomen and cutting-contracting pain in abdomen on every mo-tion and every breath (Cham, Nux v), with contraction of rectum (Nux v). M too early, with distention of abdomen and pain in upper abdomen on every motion and when sitting, as from sharp pressure of a stone, with pain on touch as from an internal ulcer (Metrorrhagia) Leucorrhopa

Clinical.—Menses too profuse, gushing, very exhausting, with menstrual colic as from sharp stones rubbing together, flatu-

Respiratory Organs .- Tough mucus hangs in larynx side Nausea extending from r side towards navel, and obliges hacking and hawking Irritation to cough high up in larynx, I to cough posteriorly in larvnx m evening in bed, the cough always in two paroxysms. Cough every fourth night, waking at 12 and 2 o'clock. with dryness of mouth, and on coughing sensation as seat. R. ring dilated, a hernia inclines to protrude, and if the glottis were not wide enough, C, with great ex-sore pain. Internal feding in grows as if stuffed, < step-ertion on account of oppression of chest, which only appears on coughing Suffocative sensation provoking cough Dyspnœa Whistling-snoring, threatening suffocation, < inspiration, slow breathing alternates with suppressed breathing, with face distended as in apoplexy Breathing quick, and difficult Short breath

> Clinical.-Dyspnes as from construction of stomach and hysteria

Chest.—Rumbling in 1 side as from emptiness, < walking. Sticking in r , in l., in nipples , in l , near pit of stomach, in evening, through I into back when walking, in sternum when walking; internally when sitting, rhythmical with pulse; paroxysmal, in l. on diarrhoea; U. to stool and to pass flatus at the same inspiration; intermittent, in r. false ribs, in front.

in sternum, in middle of sternum as from pressure with a blunt instrument Pressure on chest on eructating, sudden P, against sternum as with a fist Drawing pain in r side on bending body to r while sitting or standing, in side towards back when talklying, then Tensue construction in r., impeding breathing Oppiession, upper part of sternum, impeding breathing Affected by reading aloud (Raw and sore)

Heart and Pulse,-Palputation Pulse rapid Pulse small, and hard

Neck -Paintul cracking of vertebra on moving head Sticking in nape on moving head forward or backward S externally in r side, pulsating, externally in I Stiff pain in muscles on moving neck and on yawning (Zinc, Cimic) Weakness of muscles, with heaviness of head, necessity to lay head now here, now there, else the

gether, motion Pain on standing as if fatigued or strained Pain when sitting, < 1 side Drawing pain

Stiffness on moving shoulders, with pain

Sticking in scapulae, extending from r to 1 Tearing between scapula in evening before lying down, and in spine Pressure in scapulæ and nape Intermittent paralytic pain beneath I scapula during rest Drawing pain below 1 scapula when standing and lying, < morning Sharp pressure in loins and region of kidnevs in morning in bed. > rising Parabetic pain in small of back, with spasmodic drawing across hips, prerenting walking, with anxiety and fear Bruised pain in bones of small of back

Clinical.-Great weakness of cervical and dorsal muscles, then severe paralysis, in spinal irritation, with great hyperse thesis of all senses

Extremities — Trembling; < evening, with chilliness Cracking in joints, when walking Burrowing in bones A slight noise shoots through all limbs Pain on motion as if they would be crushed or broken Pain in muscles on touch, P internally, < touch and pressure Drawing pain in l Seem paralyzed alytic drawing, constant and paroxysmal, here and there in bones Paralytic feeling in arms and legs, she could scarcely rise from her seat (Arg n, Phos), with loss of appetite Paralytic and stiff, with drawing pains in bones and back Paralytic immobility, with drawing pains in Painful stiffness of all joints, now in hands and fingers, now in knees and ankles Feet and hands alternately asleep.

Clinical.—Paralysis of extremities, with numbres, symptoms preceded by convulsive movements of groups of muscles

Upper Extremities -Sticking in shoulder-joint and muscles of upper arm during rest. Pain in shoulderjoint, consisting of a broken, tearing and sticking sensation, > motion, with heaviness and dread of moving arm, and in elbow, shafts of bones and between them Drawing pain in shoulder-joint and Foot.—Swelling in evening. Boring, Tearing, shafts of bones on raising arm after eating, with bruised Tearing jerks in a corn in evening during rest, with

Arm -Convulsions, with closing of thumb in fist.

Pain in middle of sternum, with anxiety, then sticking on attempting to raise it heaviness and tired feeling. Paralytic pain on violent motion, as if bones were broken Asleep and a crawling sensation (Rhus t), feel asleep and paralyzed during and after a meal. Paralysis when writing, can scarcely hold his pen

Upper Arm - Jerking in muscles of l.: pulselike. ing, walking or stooping, < for a few minutes when visible J just above elbows Sticking in r; like shocks on outer side, below its head Digging (wavelike drawing) in shaft of I humerus, bruised pain Pain as if broken on raising it Drawing in upper part of humerus, with bruised pain Humeri above elbow seem beaten and paralyzed on motion

Sticking in I elbow Sudden paralytic pain in bend of r. elbow Sticking in outer side of l. forearm, extending into little finger Pain in r forearm. Pain in radius as if dislocated. Intermitting, almost tearing, paralytic pressure in anterior muscles of forearm,

rest Forearm asleep and sensation as if the hand were swollen (Rhus t), constrictive pain in muscles and cold fingers Trembling of hands when eating, < the where the spunful, > learning backward cold fingers Trembling of hands when eating, < the Back—Trembling Tearning Borning Pain in spine hopher it is raised Redness of 1 hand, with drawing as fit would break Piercing pain in all joints of in hitle finger Cramplike pain on outer acid of r higher it is raised Redness of I hand, with drawing vertebrae as if sprained or spasmodically drawn to- hand and in the four fingers, with heat of hand Now one hand, now the other insensible and asleep. Cramplike contraction of finger Painful paralytic jerking through fingers Cramplike sticking from behind forward in r index Cramplike pain in r little finger when writing Tearing, boring, drawing pain in

Lower Extremities - Paralytic immobility Jerking in muscles about r hip-joint Cracking in 1 hip-joint on turning thigh, < walking, with pain (Trembling of thighs when kneeling ) Twinging in r nates when sitting, then shocks Sticking on outer part of 1 hipjoint, in I hip-joint on walking, in r femur when walking, pulsating, on outer side of I thigh when sitting, causing involuntary motion Pain in thighs on raising them, as if broken. Bruised pain in thighs if he raises the leg while sitting; on beginning to walk after sitting, in inner side of l if he walks in a circle to the left, intermittent, in middle of 1; with a paralyzed feeling Painless constriction of thigh, descending into muscle below hollow of knee, with sensation as if thigh would become stiff Intermittent paralytic pain in I hip-joint Paralytic drawing in thighs, with weakness of knees as if they would bend under him Paralytic feeling in 1 thigh, < rest Intermittent paralytic stiff sensation piercing I leg from middle of thigh downward. Numbress of thigh extending over knee

Knees crack on motion Sticking in knee: 1 . outer part when walking. Drawing tearing in patella. Drawing pain in knee on rising after sitting. Knees threaten to sink from weakness, he totters when walking and threatens to fall to one side. Cramp of calves at night when bending knees. Tensive pain in calves on motion Constriction on outer side of 1 leg, more numb than painful Sensation below 1 knee as if too tightly bound with the garter. Wavelike paralytic pain down outer side of 1 leg. Sprained pain in ankle on motion

tearings. Bruised pain in bone of heel; on dorsum of foot on bending up foot and on touch. Drawing Pain as if beaten in the one on which he lies Parpain. Falling asleep when sitting (Secale c); of l. oxysmal burning pain in l Pain when eating, and when walking after sitting, and sticking as from pins. Tearing in great toe even during rest. Corrosive pain | quent shivering, then flushes of heat in head; S. over in toes. Pain in metatarsal joint of great toe as if a lower parts; recurrent S, < through lower limbs; S. chilblain or boil would form, with pain on touch

Drawing pain in r. toes
Skin.—Red spots on chest, sides of neck, behind ears. Eruption resembling scarlatina on body and arms Pimple beneath shoulder, itching under bedclothes; red miliary P. on face, back and chest, itch-coldness in shoulders C of back, here and there as ing when warm; hard, on limbs, wrists and backs of if touched with ice; creeping over back. Hands seem fingers, with itching burning pain, itching, and red cold when held to the face, but seem warm to each areola Pustules above nose, on temples and chest other Cold feet, but hot cheeks Intolerance of both and between scapulæ; below r. corner of mouth, with cold and warm air; of open air, with heat and redness red areola, painful, tense to touch. Boil on inner side of cheeks of thigh Vesicle at night on side of hand where Heat. little finger ends, discharging next day

Sticking externally in skin and muscles of face, from pit of stomach to throat, sometimes on tibia and without thirst or sweat beneath shoulders, and after scratching occupy of Sweat, on body from evening till morning, with on calf and ankle; here and there, < inner part of Dry skin thighs, with burning, as from nettles, and pimples, with stinging on touch; biting, as after profuse sweat, on undressing, piercing tickling, in ball of thumb, not > scratching.

Climical.-Abscesses at root of the toe-nail, as from a hot iron, with Cocculus symptoms.

Sleep.—Yawning constantly in bed, with stretching, Y towards evening; forcible, interrupted, with inability to take a full breath Sleepiness, in moining, and constant yawning; but must open his eyes as soon as he closes them on account of a frightful sensation in his brain like that produced by the most dreadful dreams Sleeps late in morning Sleeps with one arm under the head; (upon the stomach) Sonor

Sleepiness from thoughts of the business of the day for an hour and sleepless after 1 AM Waking as if he feared ghosts. Frequent waking, and starting up, with heat, as in fright Night restless, with sticking and biting here and there Cried out anxiously in sleep, called her mother and sisters, anxious rapid breathing, clutched about the bed, struck out with the hands, stant motion of head, < towards the left

Dreams vivid, frightful, vivid, unremembered That he had done something wrong. That his knees were swollen and painful Of dying and death

Fever.-Coldness; in evening, in open air, with Drawing spasmodic pain in r calf, shoulder, foot, etc. colic, general, with bluish hands, of whole body,

across breasts; in back in evening. Chills alternating with heat; now in one hand, now in the other; the heat rising from feet through whole body, with sensation as if blood rushed into face, but she was pale then coldness creeping from head to feet. Internal

Heat, in flashes, internal, with rapid pulse, (external, without internal, and without thirst). H. in forehead, and sticky sweat on it H. of face, with redness S in 1 side of epigastric region, > rubbing, on 1 of it and thirst, of cheeks, with redness of them, but knee when sitting, so that he must move the leg at intolerance of open air, in cheeks, in flushes, in face, every stitch, itching, in l axilla, as from a flea, burn-in flushes after drinking. Of hands at 6 P.M., with ing itching, here and there, as from fleas. Crawling sensation of general dry heat and sleeplessness till 4 below r shoulder, extending to fingers, with throbbing A M, then shivering and cold hands all day Of feet, and burning Itching of ankles, on back in evening with swelling and corrosive itching Frequent thrill on undressing, with red pumples, in various parts at as when one warms himself by a fire in cold weather night, then pain after scratching, at night, sometimes then heat and weakness so that he must lie down, all

scrum; < in evening on undressing, under the cold sweat on face, in morning, < on chest and feather-bed, changing to tickling after scratching, in affected parts, on hands. Cold, on forchead and hollow of I knee when walking, > standing still, and hands, now on one hand, now on the other; on feet.

> Clinical.—Intermittent fever, chill associated with fatalest cole, naises, diagnst at the small of food, vertige, et; chill, frequently partial, with coldense of lower extremities and heat of head, the chill imaging sevents to be made with the least and the feither segments to be made the child of the c Clinical.-Intermittent fever, chill associated with flatulent

#### Coccus Cacti.

A tincture is made of the dried insects, Coccinella Indica (Coccus (acti, L.), Cochineal.

General Action.-The most marked (verified) action of this substance is on the fauces and larynx, great irritability, with profuse secretion of ropy mucus, and on the urmary organs

Allies -Iodine, Kalı bi , Kalı 10d , Canth

Generalities.-Sticking alternately in finger-tips, temples and soles Tearing or drawing sticking, < warm bed, in evening and night at rest, sometimes with open distorted eyes, without being awake, con- from slight exercise of certain muscles, for example, holding a book caused them in upper arm. Sticking tearing here and there in muscles, < r hip-joint, < rising or sudden motion Drawings and tearings here and there. < neck, between shoulders and in forearms.

Fulness of whole body, with heaviness, as if stuffed. with glowing of cheeks, (gradually increasing, with Swollen sensation in whole body when half awake at little or no thirst, with warm forehead, cold cheeks, might, sensation as if the body were adherent to a cold nose and hands, then heat with anxiety as if he woolen sack, everything he touched seemed thicker could not breathe, nausea and thirst, then cold sweat, than natural Sudden sensation as if something were < on head and hands, with continued anxiety) In distending within me, with sticking in rectum (?) ternal, so that he trembled, but not external, in even-lafter the distended feeling increased warmth extended ing, with longing for stimulating nourishment Shak- over the whole abdomen. A of headache, symptoms of chest and cough after a drive

mind Talkative Excitement after beer, > walking, with heat and sensation as if pulses beat violently Apprehensive, in evening Anxious and uneasy lively Gloomy Less active than usual

Head .- Stitches through brain. Aching, in morning on waking, frequently returning; in forenoon, < violent motion of it; in evening, from his accustomed beer, < stepping hard, in brain, < at bridge of nose, with such weakness that she must sit down frequently worst extended to I side of neck and clavicular region, during a hurried walk, in morning after waking, as last 1 lower molar and 1 side of occiput. Biting from drinking too much, > rising; as from a disordered sticking in 1 antitragus; in r meatus and r temple stomach, consisting of fulness, with heat and stupe- Drawing tearing above and behind I then roaring Painful fulness Swollen sensation Confu- in it Drawing twinging in 1 sion, in morning, with vertigo, in evening; in even-r parotid, then in submaxillary glands and salivation, ing when walking. < in vertex. in evening and last-suddenly in r Eustachian tube before dinner. < turning into the night, with pain in veitex and burning in ling head to right and on swallowing, suddenly > warm skin of forehead; after breakfast, as after drinking too soup Tensive pain in mastoid process; in bones much, as before violent coryya, > in open air, dizzy above and behind I car, < masterd process, with sali-C. dizzy C in morning on waking Intoxicated vation obscuration, in morning on waking Rush of blood, sticking, with roaring in 1, on convex surface of in forenoon on entering warm room after a walk I concha, < touch; cramplike, in r Vertigo, after eating, as after intoxication

at breakfast, which was eaten without remarkable ward, before midnight in bed, when most severe it exappetite, above r eye in morning on waking; above tends into 1 ear, 1 occipital region and nape, last 1 arch of nose and in frontal sinuses, in r side, some lower molar and along sterno-cleido-mastoid muscle times extending to occiput, indefinite, after supper, < shaking or turning head or moving hands Confusion the parts as if suppurating Rhythmical throbbing in in morning on rising, with heaviness and dulness, C, ear upon which he was lying with pain extending across I eminence, involving a small part of 1 half of forehead, parietal bone and in 1 so that hearing is indistinct, S feeling in extertemple, extending to zygomatic part of r jaw, leaving nal passages on snapping fingers in front of r, inin all those parts tearing or cutting

Temples -Sticking, in l , > during pressure. Pain. as if too narrow

Pressure in vertex in morning on waking, with burning pain Confusion of vertex Sensitiveness of ver-Sticking near r coronal suture Paroxysmal burrowing in posterior part of r parietal bone in morning in bed

Occuput -Statches as from the bate of a leech, waking and causing scratching Boring in l. towards ear Pressing pain extending to I cheek and side of nose, with sensation as if scalp were swollen Pressure in it at 6 PM in a warm room, with warmth in it Sensation as if a hot constricting band extended from one with cotton mastoid process to the other, at last affecting the whole scalp, and it seemed as if the bones were drawn closer Crusts on outer margin of nostrils and closer together Indefinite drawing and pressing, and in temples and r eve

Crawling pain in morning

Eyes.—Inclination to stare Tearing from I. into forehead in evening after lying down Raging pain in r, extending along squamous bone, on its inner side to the occiput, it seems as if a fluid were injected paroxysmally into a small bloodyessel Pressure upon 1, < inner canthus. Sensation of a foreign body between lids and balls Smarting as if a hair were Mind.—Joyous Lively in evening, L and clear in between ball and lid; morning on waking Burning in Talkative Excitement after beer, > walking, in evening Consistent tears, < open air Pressure in l. ball Agglutination of lids Jerking of l. lower lid Margins of lids feel swollen Burning in margins of Irritable, morning and evening, then in evening lids Pain in orbital regions, in superciliary ridges Vision weak

Ears .- Sticking in l., in r; then aching in r upper back teeth; deep in front of 1, between antitragus and zygoma, above and behind 1, increasing to burrowing congestion that seldom remitted, and when Pain in region of Drawing pain in r , at times becoming Drawings, in r meatus in evening Throbbing pain in 1, in I mas-Forehead —Tearing in bones Burrowing Pain, told process, at times increasing to a burrowing outto I claviculo-pectoral region, and on touch pain in

Stoppage, with pressure in meatus, stopped feeling ternal S feeling in 1, < lying upon ear, with sensation as if fluid wax were pushing outward, tensive pain in in r, in l after rising, lasting all day, frequently ex- 1 mastoid process, extending to 1 clavicle and last tending to 1 eye, extending towards vertex, > wash- lower molar Tickling from external canal through ing with cold water, throbbing and pressive, often inner car to mouth, with voluptuous itching, in I alternating with heat and redness of face Sensation meatus, with itching, afterwards becoming a pressure in concha Itching in 1, with roaring, in 1 external meatus; in r external meatus; in r external concha and external meatus, < going from cold air into a warm room

Ringing in 1, with bruised sensation about 1 external car, < mastoid process, the pain extending down l side of neck to clavicular and pectoral regions Cracking in 1 on empty swallowing, in 1 on spitting, and sensation as if wax would flow from it Roaring in 1, periodical; seething, in 1; as of a storm in a forest Impaired hearing; as if ears were stopped

Nose.-Redness of nostrils, with soreness in them Yellowish pulverulent substance on margin of nostrils Dryness; and of throat, > water; of posterior nares, so that he drew Scalp -Painful elevation on vertex Feeling as if water through nostrils, then blew out hard masses of mucus. Stopped: sensation, but watery discharge. Itching internally, then violent sneezing. Sneezing, lic(Iod); M, < smoking; M at tip of tongue Sweetin evening, with cough and expectoration; violent, ish; and bitter, aromatic; and offensive, resinous, < violent, in morning, with discharge of mucus; in at root of tongue, after a glass of water. Bitter; and violent paroxysms, with burning in mucous mem-nauseous; offensive, bitter, sour, at root of tongue and brane of nose and on margins of wings Coryza, with entrance to fauces in forencon; sharp, bitter, sour, sticking in temples and rawness and soreness of throat Much mucus; thin, white

Face.—Crawling in malar-bones; in 1, extending across back of nose to r cheek . extending across back of nose to l. cheek in evening; in l. side of face and nose corresponding to plexus anserinus, with drawing, resembling prosopalgia. Pain in l articulation of jaw on chewing, with cracking in it on empty swallowing lower lip feels contracted. Sensation in lower lip as stuck behind larynx, the sensation of crumbs frealternating with pulsating beats of heart

was broken a year before), with sensitiveness to touch Jerking pain in 1 lower canine after smoking, J toothcanine, with sensation of a cold wind on teeth, increasrang next day, < majiration or holding a pipe between leading a down, and constant hawking of mucus teeth, noxt day tech very partial on biting them Smatton as if words were douguted, cassing constant firmly together. Drawing in 1, in r lawet, in r lower howking incisors; in l. back, in forenoon, sudden, sudden, in incisors and in r meatus auditorius. Sensation as if a lateral incisor were grasped by a cold finger and for-cibly drawn upward Sore pain in I teeth and gum waking him when lying on I side, > changing the position, with sensitiveness to touch Sensitiveness of lower, with sensation as if too long, S. to cold things,

Gums bleed longer than usual after removing old sticking in gum of r anterior incisor, with dryness of mouth and frequent stching in I external meatus auditorius. Soreness in toothless places in lower law Heaviness in l. upper law as if teeth were pressed out of their sockets

Tongue.-White coat Vesicles Biting anteriorly as from pepper Biting sticking in I side of tip, with salivation Dryness; in morning on waking, with a brown coat, with roughness

Redness of arches of palate, of velum palati and fauces, with pustules on r arch of palate Sticking and burning in palate and tongue Scraping in arches of palate Pain in soft palate, < talking or swallowing Tensive pain in arches of palate on swallowing, > water. Tension in arches of palate Rawness Sensitiveness of mouth and fauces, so that rinsing mouth caused cough and vomiting of thick masses of mucus Irritability of arches of palate, so that loud talking and brushing of the teeth caused cough and vomiting Tickling irritation in palate to vomit in morning, increasing to vomiting of mucus on rinsing mouth with cold water Burning. Dryness; of palate; behind arches of palate, of M. and throat in morning on waking, > cold water, with heat in them and stiffness of tongue M. and fauces feel as if covered with velvet. Constant desire to sput, and metallic taste (Iod.). Salivation. Hot breath. Odor as from a disordered stomach. Sourish odor.

Taste - Metallic, with salivation (Iod.): sweetish metaltowards root of tongue, provoking vomiting. Pasty in morning Nauseous, flat. Unpleasant to coffee and water Food at dinner distasteful.

Throat.-Redness; of pharvnx, with difficult swallowing, of r tonsil, with swelling Swelling of r tonsil Tonsils pale and distended Hawking of Hawking of mucus, in afternoon, with tickling of larynx, then paroxysms of cough Scraping sticking and construc-Longish bluish-red spot on upper lip. Cracks in lips, tion Sensation as if a hair stuck in it, causing hawk-which seem covered with meal Dry lips Skin of ing of various-colored mucus Sensation as if a crumb if drawn from both sides towards the middle, often quently descends towards stomach and then rises again Scraping, from morning till noon, > after dinner, Mouth. Teeth. Tearing in a r. hollow molar inter- with expectoration of nucus, causing paraxysms of cough, rupting the morning sleep. Burrowing in r upper with expectoration of mucus; causing nausea Rawness, nosterior molars in morning on waking Pain in last > at night in warmth of bed, with roughness and i lower; in hollow roots of third I upper molar (which hoarseness, with scraping, as after highly-seasoned food, causing violent cough, causing frequent hawking of mucus Roughness, in morning Constricache in morning after waking, < 1 upper incisors and tion ('hoking, with constriction beginning in stomach and extending to throat. Sensation as if a thread

Pressive sensation; in pharynx, < empty swallowing Almost a burning pain from smoking Soreness, without difficulty in swallowing Feeling of beginning inflammation Burning; on soft palate, in cesophagus, in fauces every morning, on soft palate in morning on waking, when smoking, and on hps, somewhat > cold water, like heartburn, and on to cold air, to cold water; to cold water in morning palate Sensation as it a piece of ice had slipped down Peculiar coolness extending up resophagus to roots, and the cavities ache for some time Biting mouth Dryness; of posterior wall of pharynx, with much mucus on uvula, with painful tension on r side on swallowing, < palate, with scraping, disturbing sleep, waking him, > cold water, of pharynx, causing cough, as if full of dust, < till evening, when it was accompanied by burning in such of palate

Tickling, on uvula extending over velum palata, < cold water, when there was irritation to cough, uvula, soft palate and posterior wall of pharynx, in morning, preventing lying, causing violent paroxysms of dry cough, only after warm drinks the mucus was expectorated in large loose masses, then through the forenoon hawking and expectorating of loose mucus. in fauces as with a feather, T irritation to vomit Frequent swallowing, with sensation as if a ball were sticking in the throat Inability to drink water Swallowing difficult in evening, with swollen sensation in larynx and difficult speech Sensation on swallowing liquids as if they were forced down by a spasm. Aggravation of symptoms in warmth, especially in bed (Iod , Merc )

Clinical.—Coryza, mflammation of fauces, with accumulation of thick viscid mucus, which is expectorated with the greatest difficulty, even with retching and vomiting (Kali bi.)

Stomach.-Appetite at 6 PM., an unusual time, even after eating Ravenous; for supper; soon passing away. Great for dinner, which was eaten withfood Variable Little at noon Satisty soon after dinner; S from water, with aversion to drinking Lost, with increased thirst; at breakfast, but afterwards ravenous hunger, at noon Aversion to food into I side of chest, with jerking stitches, burning, and drink No relish for smoking

Thirst, in evening, in evening, with longing for beer, after a glass of which there were headache and weakness so that he could not sleep until midnight. after cating, then chilliness from much cold water, < morning, seating Aversion to coffee and water

Eructations, tasteless, loud, spasmodic, empty, in evening Nausea, in morning; in morning on waking, from constant rising towards stomach, < after a lihum. violent paroxysm of cough, which brings tears to the eves. : weak wine, with empty eructations, with cramp in stomach, and hunger, in paroxysms, with rabid hunger Retching, in morning on waking, with nausea and salivation

Distention, after rising, with retching rising to throat, flatulent, after eating, with pressure upward and choking as far as fauces, and sensation as if vomiting would relieve it Sticking in afternoon on lying down, obliging sitting up, S in fundus, then in corcal region, in pit at every inspiration, > expiration, and griping. Intermittent griping extending to cecal region Pinching Gnawing after drinking Cramp Pain, in epigastric region, in pit and I attacks, with beginning nausea. Pressure as from indigestion. P as if overloaded, after a light dinner. extending to fauces, lasting till sleep, as after mineral water, with nausea, then heat of stomach, repeated for hours, then sensation as from drinking too much water, which lasted all the forenoon

Heaviness, as if a stone were in it Sensitiveness to pressure, in pit, to touch in epigastric region Burning Heartburn in afternoon, with tensive pain in throat, H at night, two hours after eating, when walking after smoking, after wine, with pressure in stomach, with eructations of almost corrosive fluid Sensation as if region of stomach and ilium were bathed in warm water Sensation as if a cold air blew into it Coldness and discomfort Discomfort. breakfast, with inflated teeling in abdomen Emptiness Weakness

Abdomen.—Distention, in morning, after dinner, as if he had eaten too much, flatulent Flatulence, after dinner, after dinner, with discomfort in whole body Gurgling Rumbling, after eating, prevent-ing midday nap, when walking about the room by short passages of flatus; < lying on 1 side, with pain in loins Noises and movements of flatus, > short passages of flatus Emission of flatus, odor-less Sticking here and there, extending more towards, hypochondriac region (apparently to bladder) Cutting Pinching after dinner Griping in morning on waking, then diarrhoea, G in morning, then liquid stools repeated three times during the day, on waking, > stool, after eating, after dinner, then liquid stool, with pasty stool; with ineffectual urging to stool, with headache Pain, then pasty stool, with shivering, P, as if many spots were ulcerating. Sensitiveness to pressure Warmth

out relish and with speedy satiety, the food though Sticking in region of spleen; in l H., extending to l. light caused discomfort and pressure in stomach and side of chest in forenoon, when walking; periodically eructations, stomach somewhat > by uprisings of in spleen, gradually changing to fulness and benumbed aching in I. hypochondrium Pain in l. as from incarcerated flatus, extending to l. side of back and lumbar vertsbræ. Burning drawing in region of spleen, extending drawing in l., waking at night, > application of warm hand Burrowing, tensive, dragging and drawing pain, and in pubic and inguinal regions Dragging. and in pubic region, with discharge from vagina. Fulness in region of bladder.

Umbilicus.—Cutting, < motion. Griping in region ; then soft stool. Digging about. Pain, and deep in cocal region, in region, at times extending towards

Hypogastrium.--Audible movement towards genitals, then sticking from bladder along urethra to glans when sitting. Sticking in I groin, in r flank extending from border of false ribs to r side of back, < pressure, > passage of flatus, drawing S extending from I. flank along I hip Cutting, with passage of much odorless flatus. Griping above pelvic region as from incarcerated flatus. > emission Sticking drawing and dragging pain in inguinal, hypochondriac and pubic regions Dragging downward, as during menstruction, with frequent micturition Sensitiveness of tuber ischii when sitting long or on pressure

Rectum:-Sticking, with every stool; < walking, with exertion to stool, jerking and boring S, constantly hypochondrium, with sensation of a ball in it, in jumping to neck of bladder and along ureters to kidnevs Burning pain after stool Urging to stool, then hard feces; U as it to diarrhoea, then pasty stool, with much flatulence Ineffectual urging; frequently, then three stools relieving the pain in lumbar and sacral regions

Anus.-Much moisture in fissure between A and nates Sticking extending through urethra, Twinges after moderate exercise Burning Crawling, Itch-

Stool -Diarrhea Soft and frequent, and comous. soft, mingled with hard lumps Constipation, then after eating profuse pasty stool, with much flatulence. Hard, and scanty Fæces enveloped in mucus, with straining, with burning and protrusion of hemorrhoids. Delayed, difficult and clayey. Like kneaded clay, with straining, then spasmodic pain in rectum just at lower end of sacrum. Irregular Copious, pasty, C. after walking Omitted.

Urinary Organs.—Bladder Cutting in region, with heat in face Twisting pain in neck Constant alternation of cramp, heat and coldness in region Pain in region, waking him at night, with ineffectual urging to urinate Pressure on , and constant urging, > after micturition Heaviness, < in forepart, towards urethra, with constant urging to urinate and frequent discharge of normal color, acid in forenoon Tension and fulness without leading to micturition, the tension remaining after micturition Painful drawing in region of l'ureter.

Urging to urinate; in morning, but necessity to wait long before the urine passed, also waking twice at night Frequent urging, suddenly; with urine as clear as water. Frequent meffectual urging at night. Strangury in evening Spurting micturition. Strong stream of pale urine. Frequent micturition; in after-Hypochondria -Rumbling beneath r. short ribs noon; < at midnight and 4 P.M., of copious urine; of saturated urine; of pale, odorless urine; of urine as | Scraping and irritation to cough; S. in larynx and clear as water, but it seems heavy and as thick as oil trachea; in larynz, causing paroxyems of cough and ex-Infrequent micturition. Watts long for the stream of pectoration of balls of mucus. Rawness in trachea, obliging urine Retention of urine until there is great urging, coughing. Pain in larynx after speaking a short time, when a little is passed slowly and painfully, sometimes sticking jerking on urinating extending into the sore pudenda.

Urethra .- Sticking in forepart of glans at 11 P.M , in orifice, with tickling, in region of navicular fossa, with pain; in forepart, < in glans, with jerking. Pain on urmating as from obstruction. Burning pain on urinating, with sensation of a stone in urethra Burnarguing micturition, B, > micturition, with at vocal organs, even after speaking, without carrier, rangue of times prickling at its ordice, the latter during the day hourseness and labored breathing (Phos.) Hourseness, before much micturition. Tickling in forepart before in morning; in morning, with violent hawking of micturition, as if dull needles were suddenly forced into it. Itching in orifice, in evening; in evening, tepid water or taking warm fluids, with paroxysms of with biting

Urine -Copious, and as clear as water, then in afternoon dark urine with sticking along urethra, < near glans. Scanty; at night, and red; and dark, putrid odor At first straw-yellow, afterwards lemonyellow, afterwards light brown, then reddish-brown and finally red Acrid, burning Thick and hot Acid. Began to decompose in half an hour Turbid. Contained mucus forming in part flakes, clouds and threads, mixed largely with the sediment Brick-red sand after standing long, brick-red sediment easily mixing with the fluid on shaking the vessel.

Clinical.—Urmary calculi, with violent colic, hamaturia, large deposit of uric acid and of urates, pains lancinating, extending from kidneys into bladder.

Sexual Organs.—Pustule in middle of pens Throbbing in glans, with tickling in urethra Heat in glans and I testicle Itching of glans, and of prepuce, with biting Biting stitches in prepuce Erections towards morning greater than usual, and emission, frequent erections Itching of scrotum in morning on rising Drawing sticking in r testicle, extending into inguinal Desire, in morning, with erections, in morning, with lascivious actions, without erections, at night, and voluptuous dreams, on waking Emission in morning; at 5 A M.; at night, without dreams, at night, with diminished desire.

Pudenda swollen, < towards the front, and sensitiveness, with cramp, which contracts the orifice of the urethra so that the urme flows slowly over the sore parts, often with burning, with frequent painful thin discharge, which does not seem to be leucorrhoa, next day the swelling was hard and hot Shooting in pudenda like electric shocks Sudden burning in pudenda, with throbbing and sensitiveness Swollen sensation in pudenda Discharge of mucus from vagina preceded by drawing-dragging in inguinal and public regions and region of bladder. Menses too early, profuse, black and thick; too early and too long, with towards the close tension, then constriction in abdomen rising towards stomach, as if she would vomit water (which sensation usually occurred at the beginning).

Climical.—Menorrhagia, discharge of large dark clota, with dysurm. Intermittent menstruation, flows only in evening or night when lying down.

traches.

and rawness. Roughness during and after speaking. Sensation as if crumb stuck behind larynx, obliging constant Choking. Tickling in larynx, waking at 11.30 P.M., causing cough, with expectoration of much tenacious mucus (Calc. acet °); T., then hacking tenacious mucus (Calc. acet°); T., then hacking cough. Burning after cough, B behind larynx as from a corrosive fluid Irritation in larvnx to cough in evening and disturbing sleep at night. Fatigue of in morning; in morning, with violent hawking of tenacious mucus, in morning, > rinsing mouth with cough and hawking of mucus; in afternoon; evening, at first, after not speaking for some time. husky and deep on going into open air

Cough, waking at 1 AM, then sleeplessness, partly very ammoniacal and concentrated Dark, turbid, of from the cough, partly from a burning soreness in lungs, partly from headache, then uneasy sleep from 6 to 7 AM, the headache > waking; after dinner from the ordinary smoking; in hot room, preventing speaking, from irritation in bronchi and larynx, which made the soft palate so painful that swallowing was difficult, < 10 to 11 A.M; < evening, with soreness and subsequent burning in chest, > evening Violent, from brushing teeth, then vomiting of and night Paroxysmal, in forenoon, frequent P. in slimy fluid warmth of bed, lasting from 2 to 230, leaving aching in throat as if fatigued, with heat and sore burning, short, frequent, as from tickling in larynx and pharynx Painful, fatiguing, on waking, from irritation in larvnx and traches

> Dry cough; in morning, in morning, causing vomiting of mucus, waking at night; from the accustomed smoking, at night from tickling in air-passages, in morning looser, with easy expectoration; with pain, < apices of lungs, D and violent in morning after waking; D, racking and painful; short and D., short and D in forenoon from irritation in traches; D, rarely loosening yellow mucus of nauseating sweetish taste, at times D, at times expectoration of thick mucus Barking, dear, dry, waking at 6 A M , afterwards

> with expectoration of murus, the hanking of which provoked vomiting (K bi), with sore throat and frontal head-ache, the cough and heat in throat > by rinsing mouth with cold water and drinking a few swallows. the heat in throat returned after a cup of warm milk.

the cough returned on entering a hot room Cough, with expectoration, towards evening

night, of much viscid albuminous muous (K bi); tenacious E at 6 A.M., through the day and at 3 PM. (an hour after eating), > vomiting, E of lumpy mucus; mucous E; easy, slimy E, mingled with tenacious threads; yellow E, difficult E of greenish-yellow sweet mucus Paroxysmal cough before going to bed, with easy expectoration of globules of mucus; P cough, with expectoration of greenish lumps (K 10d), P cough, with expectoration of round masses of grayish Climical.—Menorrhagia, discharge of large dark clota with mucus; P. cough, with grayish, gelatinous, lumpy mucus; parazysm of ticking cough, ending with expectation of mucus. Cough, with tickling about brureation of bronchi, caused by a feeling as if a plug of mucus Sticking in larynx; with hoarseness, were moving in chest, in spite of profuse expectoration

larynx, with dry sensation in mouth, extending into fauces, of whitish-gray masses; tough and sweet, next day lumpy and grayish-blue and looser, yellow, with a tange of red, tasting sourish-sweet, thick, thick and nauseous

Breathing difficult. in afternoon, < towards evening by periodical sticking in 1 upper chest; when walking Dyspnoa, with oppression of lower part of chest Short and oppressed breathing after rising. Inspiration deep when walking, > by yawning.

Clinical.-Laryngitis with most violent cough, difficult ex-CHINECES.—Varyingiss with mose violent cough, diment expectoration of very tensacious mucus. Suffocative catarrh of the bronchi, with tough white mucus which strangles, cough c first waking Whooping cough, with vomiting of ropy albummous mucus, < morning, the attacks ending with vomiting of this ropy

Chest -Sticking in upper part, in lower part, in r. l then r , now l , now r , lungs feel as if affected by S behind sternum, in lower part of r lung in morning after rising, < deep inspiration, in 1 lower chest in forenoon when walking in the street, and in the evening, r lower lung at 4 PM on deep inspiration, in a spot in middle of first I false rib in the street, > when quiet in the room . in walls on uncovering abdo-I true ribs, also when sewing, < walking and ascend- irregular beating after diviner, causing anxiety. ing, in region of 1 mipple, > paying attention to it, at midnight, and shaking of whole body, recurring between 1 fifth and seventh ribs, > deep inspiration, with constantly decreasing severity, causing anxiety returning on expiration, in a spot in ribs and pracordial region, with pain in the spot as if suppurating, in I extending forward towards sternum, with pain on chest, deeply piercing, near 1. clavicle, then ulcerative pains, similar to commencing tuberculosis, biting, on margin of I false ribs between stomach and flank (deeply-seated)

Pinching in middle Pain, in lungs on sneezing Bruised pain in region of 1 clavicle in morning on waking, in region of l clavicle on moving head or l lying to sprained pain in 1 shoulder. Drawing pain kidneys in region of 1 clavicle, < lying upon 1 shoulder. Lumb if too narrow, < drinking beer Oppression; in forenoon when speaking, on ascending a hill, with soreness of apices of lungs, a feeling as if he had run too violently; > warm breakfast; paroxysmal, with external soreness

of mucus Fatiguing cough, then expectoration of apices of lungs when walking in warm weather, with chilliness, after the heat, with pressure and tension Expectoration alternating with dry hacking Ex- and with throbbing, < in apices of lungs; beneath pectoration of mucus, easy, lumpy, yellow, sour; clavicles, with much affection of air-passages; in apex yellow, lumpy after slight hawking; greenish-yellow, of 1. lung, with at times pulsation that constantly and sweat, of white lumps of the size of peas from alternated with contraction of lower lip (like a cramp in skin), in lungs, becoming at times sticking or boring and sometimes seated in pleura and pericardium, at another time deep in lungs and heart, with stronger beats of heart, becoming burning, frequently changing its seat, but affecting most the heart and apices of lungs, with irritation to breathe deeply and to cough Sensitiveness about 1, nipple.

Pulsations in lungs, now in heart, now in middle of chest, now in apices of lungs, consisting of several beats in rapid succession, then after five to ten minutes appearing in another place Heat beneath sternum, in lungs when walking, < precordial region and r lower chest, deep, < precordial region, between fifth and seventh ribs, 1 then r, with sticking, in lungs, with feeling as if the expired air were warmer than usual. Increased vigor of organs.

Heart .- Sticking through it in morning, with throbalong sternum, near I nipple, in region of bend of bing, which seemed to be audible but was not per-fitth and sixth ribs, between sixth and seventh ribs, ceptible to hand. Burrowing on rising and when driving, > leaving the carriage Soreness from morning till noon Pressure in præcordial region Pain in precordial region at night, with palpitation, indefinite P at heart interrupted by beating of the pulse, throbbing, towards evening, with at times pulsations on its upper surface Sensation when walking as if an artery were pulsating rapidly on its upper surface men, < epigastric region, in greatest curvature of last Sensation as it something were forced towards it Rapid. ing steps but not by deep breathing, > rest, in a spot tuous action when lying after dinner Palpitation in 1. < walking, not by breathing, in 1. < rapid walk- waking at night, sudden P as from a fright, waking

Pulse.-Rapid; and tremulous Neck -Sticking in nape, in 1 cervical muscles on turning head Pain between second and third verte-

Tension in 1 muscles in morning on waking, > bræ rising

Back.-Pain, with sensation as if several places were hard. Drawing Sticking in scapulæ; between S extending in rays, in region of l scapula, extending into 1 elbow, < moving arm, with sticking in 1 side. Tearing from r scapula across outer surface of r arm or lying on I shoulder, with sprained pain, in upper arm Pressure between S, after a while extendregion of I clavicle, < moving arm and changing when ing to small of back and becoming scated in region of

Lumbar Region -Sticking ending in cocal region : Tensive pain in region of clavicte, 1, < day and mov-ing 1 arm; in 1 upper chest Pressure in evening, in region of kidney, in evening in bed, then stlechned ulcreative pain in precordual region; P beneath making him jump Dragging pain; in ascend region, towards stomach, with burning, P upon extending downward and forward towards bladder chest, with hoarseness, with weakness and bruised sen- Twisting pain in 1 side of spine, whether in kidneys sation, in middle of sternum extending to scapulæ; or uterus (?) Pain, in sacrum, in region of kidneys; painful, in middle of sternum in forenoon when walk- region of r. kidney, in afternoon, in evening and < ing, extending backward, with a similar pain between night; in kidneys in evening, when eating; in kidscapule extending forward Suffocative sensation, as neys, < r., < pressure or motion of upper part of body, > towards evening, next day alternating with drawing pain from kidneys to bladder, > frequent emission of flatus. Bruised pain in l.; and in sacral and hip regions, in I. sacro-iliac region in morning on waking. Oppressive pain in region of kidneys. Soreness beneath sternum, with pressure, S in Drawing pain; in r. kidney, extending along ureter to

bladder, waking at 5 A.M.; spasmodic, in region of Drawing, with dragging, and in joints and hips. Tension in muscles; T. extending towards rectum, with drawing. Soreness in region of kidneys, gradually ex-tending to bladder, < into sphincter, with frequent urging to urmate and increased dark urine. Sensitiveness of tuber ischii on long sitting and on pressure.

Extremities.—Sticking now beneath nail of l. great toe, now in tips of fingers and beneath nails of thumbs and of r. index. Tearing; here and there in long ing. Spasmodic drawing in r calf. Sore sensation bones; in knees and elbow, along anterior inner surface of r. thigh, then in outer side of r. upper arm, then painful drawing in metacarpal bone of r. thumb and sticking in r. inner malleolus. Tensive pain, now in I. shoulder, now in I fingers and in r hip, > evensensation in legs and I. shoulder, waking at night.

Upper Extremities.—Shoulder small of back, extending in evening to forearm Pain tion Weariness of feet in evening after a short walk, at night. > lving on it and pressing firmly against the of feet, < sitting quietly in the house, > going out. bed. Drawing in r extending to forearm and index. with tearing; D. in 1, gradually changing to heavingsh Sticking on lower surface of I. great and in its ness and in evening changing to painful paralysis, as tip, beneath nail of I great, at 4 AM Tearing in I from taking cold in a draught when heated Tension in great Pain in l. great, < evening, so that he could r, with drawing and tearing. Heaviness like a press-not step upon that foot, then chilliness, which lasted ure on r, extending down back to region of kidneys; after going to bed, in great, with swelling and redtensive H . and in lower part of nane

Sticking in middle of r. upper arm at night. Sticking tearing in fleshy part of L upper arm, in anterior and inner surface, drawing tearing in anterior surface of muscles of r upper arm during rest Drawing in r deltoid, making motion of upper arm difficult, < raising it Sticking in tip of l. albow; in muscles of bend of r. elbow during rest; as from a leech in bend of l. Scraping in elbows. Pain near l. elbow nose Burning drawing in condyles and joint of l. elbow, waking at night

Tearing in tendinous expansion of forearms Drawing pain in muscles of r forearm. Paralytic pain in r wrist. Biting sticking on back of r hand . Tearing in r. little finger, < motion. Sudden drawing in l

or pressed. Lower Extremities. - Bruised pain. < calves Wearigluteal muscle to outer and posterior side during rest. throbbing sticking in thighs in forenoon D anteriorly above r. knee.

Knee.—Sticking in r. patella, in evening, as from ing along I. tendo-achillis and in back of r foot; in legs and I fingers, in afternoon knee, with tearing Sudden sticking tensive pain in Sleep.—Inclination to yawn and stretch, with ten-

Leg -Sticking near r. ankle after eating: throbbing kidneys, streaming out from both sides, in afternoon S. in legs; tearing, along muscles of r calf. Stickwhen sitting, to be compared to the cramplike pain ing tearing on inner side of r. tibia Scraping in after an injury to the testicles, > emission of flatus. tibise. Pain; in r; along large vessels and nerves; in lower half of 1 tibia in forenoon when sitting, extending upward and downward, in tendo-achillis on walking, < in street, obliged to turn the foot outward and stop, < next day, < ascending steps, the tendon sensitive to pressure, afterwards cracking in tendon on moving foot up and down and inability to stretch foot completely Burning pain in r. Drawing pain in I tendo-achillis when stretching foot while walkon r tibia Weakness in evening and night.

Sticking in I inner malleolus Bruised pain in malleoli on bending foot, and on inner surface of heel Sticking in I sole near toes Pain in forepart of l. foot on walking, it seemed as if the mobility of the Weakness; in morning after rising. Paralytic joints were impeded by swelling of articular surfaces. Pain in soles, mostly burning, < forepart, even after Tearing, and in a moderate walk, becoming after sitting a hot sensa-

> Toes -Cramp of r , three last r on lying down at ness, preventing walking, almost like gouty inflammation, in a corn on r. little, so that he limited. Sudden drawing in r. great

Skin .- Redness of face and hands, with distention . and throbbing of vessels; red spots here and there, and itching pimples Pimples on r. side of forehead; on tip of nose and to right of sternum; on malleoli, on back, with discharge on pressure Boils on l. wing of

Biting sticking on r pectoral muscles and r groin in various places, scalp, concha, r side of neck and throat, on margin of rami of jaws, near nipples, in back, pit of stomach, axillæ, inguinal regions, all > by leaving the warm bed Pricking on anterior surface of thigh when walking, sensation as if warmth were thumb. Swelling of l. thumb, with pain when moved streaming through skin, P on internal surface of thigh, as on taking sparks from an electrical machine, alternating with heat in chest, with palpitation ness, < calves Tearing sticking in anterior inner Biting in various places before sleep, above malleoli, muscles of thigh; in 1 sciatic nerve, extending from extending in afternoon to knee, then returning to other places Sticking biting on various parts, in Bruised region of r clavicle; in spots on abdominal walls, pain belind r trochantor, > walking. Aching in with sensation as if 'teches were drawing at these things as after a long walk. Drawing pain on upper spots, afterwards similar sensation at r nipple and on and outer side of 1 thigh during rest. Drawing down prepuse. Helping biting now in r, now I antitrathighs and calves, with weariness in calves; sudden gus, Itching biting-drawing in inguinal and pubic region, on prepuce and penis, back, feet and toes, on and between toes. Itching; I upper arm; extenan electric spark; in margin of l., as from an electric sor surface of limbs, abdomen and back; lower limbs; spark; deeply pierong S in hollow of knee, extend-legs, fold beneath l great toe; r leg, with burning,

bend of r. in afternoon when walking, < stretching sive pain in small of back Sleepiness; in morning foot. Pain in side of l. patella; in r patella, < on its after a good night's sleep, in afternoon, evening, inner margin, < motion and pressure, so that in the after eating, then general prostration Sleeplessness, evening walking was impossible, in the night kness from internal heat; for an hour and a half after midand toes were swollen and hot to touch, the pain was night; with restlessness; sleep only after midnight, pressive and prevented motion.

tation as from fright. Restless sleep on account of previous vexations, disturbed by pains, interrupted by cough, throbbing headache and throbbing of heart, with sexual desire without complete erections Disturbed by noises in abdomen, < lying on r side. Groaning in sleep Frequent waking; with excitement as from coffee Early waking; with inclination to vawn and stretch

Dreams -Many, of many people and full of care. Of many men, large palaces, churches and frolicking with girls Vivid, and fretful, of syphilitic formations Unremembered Affectionate, with reminis-

cences of his youthful loves

Fever.-Chil; all day, when lying at 10 AM, then headache and cough from rawness in air-passages, in afternoon, in afternoon, with thirst, in evening, in chest; > open air. Creeping over whole body Shiver- Itching of head extending over whole body, ing, between 3 and 5 P.M., 9 PM, with rapid pulse, after dinner, on going to bed, < back, with thirst, then dry heat of head and redness of face, with chilliness of rest of body, then the dry heat became general and lasted till midnight, then sweat on upper part of body till 5 AM, before sleep, with heat in head, then general dry heat, > sweat, in attacks, across scapula extending down arm, after dinner, > moving in open air, with sensation as if the skin would be loosened from the flesh Coldness of occuput as it in a draught, C. of limbs, of back, creeping along spine, frequently in skin on r shoulder and across r side of back; of feet in morning, with sweat on upper part of body .

Heat, towards evening; in evening in bed; in evening in bed, as if there were a tumult in the whole body: on entering room, with confusion of head, which increased tall evening to a moderate headache, > open air, at night, then sweat Dry, at 3 AM, with uneasiness Hot and dry skin, the heat > in morning by cold water Heat on vertex, in 1 car, with ringing; in cheeks in morning on waking, in cheeks at 5 PM, prickling, in cheeks in evening without redness, in chest, abdomen and thighs, with prickling in thighs on walking Burning in legs, in r, with itching, in soles

Sweat, in morning, on rapid walking, with weakness; at night on back, sacrum and coccyx; on r leg, in morning on legs and feet

### Codeinum.

Pure Coders (one of the alkaloids of Opium) is prepared for use by trituration

General Action.—This alkaloid, similar in a general way to Morphia, seems to possess convulsant properties in a higher degree than the other alkaloids of

Generalities.—Trembling of whole body Convulsive motions, of different parts, of muscles of chest, neck, arms and legs, then (in one case) soreness of the parts and weakness Inflammation if placed in contact with the cellular tissues Circulation and respiration rapid, then depressed Prickling in various parts, with numbness Restlessness Constant inclination to sit and close eyes. Weakness. Nervous sensibility increased, then depressed. Heaviness Sensation and power of motion impaired Paralysis, < lower limbs; region. Fulness and oppression of cheat. state of mixed P and spasm, both tonic and clonic.

Mind.—Delirious at night, Bewildered Excited as after spirituous drinks. Gay. Exhilarated. Depressed spirits and headache; D., with sleepine frightful dreams, and on waking in morning dull headache. Tranquil. Listless. Increased capacity. Stupor; in afternoon and evening, with disinclination for exertion. Sluggish association of ideas. Inability to concentrate mind, or to remain quiet in the house.

Head .- Aching in morning after rising, < l. side; in morning, > noon; with dry lips. Confusion; and heat. Strong pulsations, and in carotids. Vertigo; in afternoon; on blowing nose; on blowing nose, with sparks before eyes wherever he looks; as if the room went round with him; objects appear to turn around on closing eyes Pressure in temporal and frontal regions. Pulsating pain in r. temple in afterevening, with dull throbbing in heart and soreness in noon. Neuralgic pain in occupit extending to nape.

> Eyes and Ears.—Eyes injected, sclerotic injected. Eyes glassy and immovable. Burning in eyes, < l. Pupils dilated; contracted Vision weak; did not see the letters distinctly on beginning to write; failed suddenly. V. of floating sparks on stooping. Stop-

page of ears Ringing in ears.

Clinical.—Twitching of evelids (Agar., Croc.)

Nose and Face .- Nasal discharge, with irritation of Schneiderian membrane Loss of smell. Face animated, rosy and gay, or dull and stupid Terrified look Pallor Lips dry.

Mouth and Throat.-Dryness of anterior part of tongue and hard palate, of mouth, with thirst for beer. Inability to speak Salivation Tickling in throat in

afternoon and evening.

Stomach.—Loss of appetite Thirst, with desire for bitter substances Eructations. Nausea. Violent retching on attempting to move Vomiting. Pain; paroxysms of neuralgic, and in abdomen, acute, and in chest, extending through to back, between shoulders, < r side of spine Tenderness, with violent pulsations of heart and arteries

Abdomen and Stool .-- A. distended with flatus. Peristaltic action diminished Pain in transverse colon, > gentle pressure, P in A, with pulsations and rapid circulation and respiration Tenderness of A in morning extending to epigastrium and lungs, of hypogastrium in morning. Uncommon sense of tonicity in A Purging. Constipation, tenderness of bowels, < transverse and descending colon, and flatu-

Urinary and Sexual Organs .- Diminished power of retention of urine and semi-paralysis of neck of bladder Urine increased and light-colored, then scanty. Lascivious thoughts, causing frequent erections, day and night, excitement at night, with pollutions. Sexual power increased, then diminished,

Clinical,-Diabetes.

Respiratory Organs and Chest.—Tickling in larynx causing cough Voice deduced to a whisper. Cough in morning, with soreness and sticking, short and irritating C, < night; C, with copious mucous and sometimes purulent expectoration. Sticking in l lung on breathing. Sharp pain in r. lung on inspiration. Pails in chest and shoulder on motion. Sore feeling an sternal

## Climical.-Dry, tessing cough, with phthisis.

Heart and Pulse.—Drawing pain around H., with loud and full beats of it, causing uneasiness. Uneasiness about H. Painful pulsations of H on attempting to study or write. Fluttering of H. and oppression in its region, with great desire to walk in the open air Pulse rapid; and full and strong, slow; small; small and weak; scarcely perceptible at wrist.

Neck and Back.—Convulsions of muscles of neck;

of nape. Painful twitchings of muscles of neck. Painful pulsations in 1 side of neck. Sharp pain below l. scapula on inspiration. Drawing pain below scapula on inspiration. Acute pain in kidney region

Heaviness and fatigue of lumbar muscles

Extremities.—Paralytic weakness of arms and legs. Numbness of hands and feet; of hands and arms Twitching of arms Pain in deltoids, r.; 1 in morning on dressing, > rest Pulsating pain in 1 upper arm Feeling in upper arm as after a blow Jerking pain in arm on attempting to remove the handkerchief from breast pocket. Twitching of lower Weakness of lower. Paralytic sensations of lower. Knees give way when walking Sudden pain in l. knee preventing walking and cessing suddenly. Sprained pain in morning; S feeling compelling him to stop abruptly when walking Painful pulsations in soles, < resting them against a hard object

Skin.—Eczema. Soreness after neuralgıa. Sensitiveness to touch Sensation as if a fly were crawling on chest, not > rubbing or scratching. Itching, over whole body; on face and head, gradually extending

over body, with heat.

Sleep -Sleepiness, with heaviness and gaping; with inability to sleep. Sleeplessness. Frequent waking. with the covers thrown off. Sleep unrefreshing Dreams; unpleasant, of dead persons, etc., pleasant, ridiculous

Fever.-Cold skin; and moist; and clammy Cold limbs. Agreeable warmth. General warmth, with itching, < between shoulders. Heat in head Sweat in large beads on forehead.

### Coffee Crude.

A tincture is prepared (in a special manner) from the unroasted beans of Coffie Arabica, L.

General Action.—A general stimulant of cerebral activity

Allies -Opium, Nux v, Hyosc, Plat., Zinc

Generalities.—Excitement, with lightness of all movements. Lightness of head and of all movements, increased sense of health and vigor. Pain in whole body so that he had little rest. Affected by walking in open air, it forces water from his eyes and he becomes weary. Aversion to open air. Disinclination for business (Nux v.). Inclination to he down and close the eyes without ability or desire to sleep. Mental and physical exhaustion (Op.). Weariness on ascending steps. Dulness of internal ensibility on account of supernatural speculations Aggravation when walking in open air

Climical.—Neuralgias of various parts of the body, face, abdomen, extremities, etc., always with great nervous excitability, intolerance of pain. Bad effects of stimulants, alcohol, tea, etc.

Lively; in evening; lively fances, full of plans for the future, charmed with the beauties of nature of which he reads. Ill humor. > open air, with sadness and crying aloud; and disinclination to speak; he could throw everything away from him . full of care, lachrymose mood. Sad on walking in open air, lachrymose, disinclined to all business Anxiety and unsteadiness; A, with trembling and inability to hold the pen still Vivid flow of ideas. Unusual activity of mind and body till midnight (Op in part), then sleep. Disappearance of thoughts for a moment Inattention and loss of memory. Inability to think clearly. Does not know what he is reading or has read, without being conscious of foreign thoughts, when he does not read he is beset by a thousand thoughts and remembers the most remote events

Citatenal.—Delumus transens, with transling of hands, fear, thinks that he is not at thome, realisations, cite Extreme active of mind, the patient is aleepless, great flow of thought, with great acuteness of all senses Mental excitability resulting from pleasurable emotions Recurring attacks of weeping, with hysterical excitability, tremulousness, etc.

Head.—Feeling as if the brain were torn or crushed when walking in open air, > in room. Aching, < eating. > open air, soon returning in the room; A as if brain were too full and crushed, after midday nap. < occiput, drawing, caused by reflection, with pressure in upper part of forehead. Tension in brain in morning on waking, he avoided opening eyes, it seems on stooping as if the brain fell forward and pressed against temples and forehead. Confusion, duzy Heaviness, with heat in face; H' and dizziness, with general anxiety, she believes she will fall Rush of blood, < talking; rush of blood, with anxious heat and redness of face Vertigo on stooping, with blackness before eyes

On reading, brain feels torn and crushed at frontal eminence, then behind frontal bone Compressive pain in forehead in evening Confusion in forehead, < walking in open air, changing in r temple into sticking-drawing pain Pain in temples when walking in cold air, extending to occiput, > sitting in the house, again first <, then > going into open air. Pain in upper part of vertex Crackling heard and felt in vertex when sitting still Crackling in region of ear, rhythmical with pulse Pain as if a nail were driven into one of the parietal bones (Ign nearly) Rheumatic drawing in l. side of occiput. Itching of scalp

Clinical.—Extremely violent neuralgic headaches, it seems as if the brain were being torn to pieces, the patient is unable to bear the pain; it seems as if a nail were being driven into the head, etc.

Eyes and Ears .- Boring in r eye, with dim vision. Hardened mucus in canthi in forenoon In the open air he sees more clearly than before Music sounds too loud and shrill, he can bear only the lowest tones of the instrument.

Nose and Pace.-Pain in anterior angle of 1 nostril; almost burning sore P in I nostril. Warmth in L. nostril like a coryza, < hawking. Sneezing; in even-ing in bed and on waking. Stoppage of nose. Stopped coryza, with scanty discharge. Fluent coryza indersneed rain. Bad effects of atlantants, alcohol, tea, etc.

evenings, with sneezing. Frequent, sudden, watery

Mind.—Irrational talking during the heat, with
discharge from nose. Nosebleed; in morning on

open eyes, wishing this or that brought to her, rising and at 6 xxx, with heaviness of head and ill humor Cheeks red and hot (in an infant); with uneasy sleep Drawing in 1 malar-bone, alternating with tearing in a tooth

Mouth -Sticking jerking from above downward into nerves of roots of teeth Pain in a back tooth when biting on it, in front teeth on touch and on scanty. Urine blood-red chewing, as if loose Drawing in a hollow I upper back tooth as after taking cold, (D pain across l. upper back teeth, > biting jaws together). Tongue dry in forepart and burning, without thirst Mouth dry in morning in bed, without thirst. Pain at margin of arches of palate, < by swallowing Salivation. Taste bitter, in morning, in mouth all day, but food does not taste bitter, to water, excessively B to bitter things T as after hazel-nuts T as after sweet potency and sluggish desire. almonds T. especially pleasant to tobacco Good. but too strong T, to food and tobacco, so that he cannot eat much or smoke much

Clinical. - Neuralgic toothache with intolerance of the pain, only by holding ice-water in the mouth (Pul.).

Throat.-Soreness, swelling of arches of palate. which seems like an accumulation of tough mucus Sensation of catarrh in back part in morning after rising, flow of mucus from nose without sensation of catarrh in nose or frontal sinuses. Heat rises into

Stomach.—Great hunger before dinner and hasty eating Appetite diminished, the suppor tasted good, but he was Aversion to food, drink and tobacco. with nausea and salt taste in mouth, although food has no unusual taste Aversion to coffee. Thirst, without dryness of tongue or heat, T at night, frequent waking to drink Short eructations of air, E tasting of food from noon till evening. Hiccough Nausea, in morning, at 5 PW, with weakness, from 8 to 9 P M, like a faintness and vertigo, with necessity to sit and lie down, weariness of limbs and chilliness, while eating palatable food, in upper part of throat Vomiting Easy contraction of gastric and abdominal muscles Sticking in pit, with pressure, then painless loosen the clothes, P in epigastric region when eating bread after a moderate meal, and afterwards. Tension, and in hypochondria Unpleasant sensation beneath stomach, then distention and pain

Abdomen.-Fulness after supper, with griping; F. after walking in open air Fermentation and passage of much flatus, fermentation, then repeated vomiting, then waterbrash Movings, as if necessitating a stool Frequent and easy passage of flatus, then difficult, scanty, short, interrupted emission of flatus and constant urging to pass it; frequent, profuse, almost odor-less F Pain and diarrhea, P as if it would burst, P as from incarcerated flatus, (cramplike pain, and in abdomen, with outward manifestation of labor pains, complaints as if intestines would be cut to pieces, with convulsions, body bent up, feet drawn up towards her head, frightful cries, grinding of teeth, became cold extending into rings, as if a hernia would protrude

the first consistent, the second liquid hard.

Urinary Organs.-Pressure upon bladder, obliging him to urinate Frequent urging in morning, but mic-turition scanty and in drops. Frequent micturition. Burning tearing in forepart of urethra. Urine copious; about midnight, with relaxation of genitals. Urine

Sexual Organs.-Relaxed, and desire diminished. Erections and emissions Itching in forepart of penis, voluptuous I on tip of penis in morning; I on r. side of scrotum. Sore pain on scrotum on slightest rubbing of clothes Relaxation of scrotum, with excitement of inner genitals, yet with cold fantasies. Digging-smarting in one testicle Nightly emissions. Desire, then general dry heat without emission. Im-

Clinical.—Uterine hemorrhage, extreme sensitiveness of genitals, flow dark, clotted (Plat.). Useful in after-pains, which are extremely difficult to tolerate.

Respiratory Organs, -Roughness in larynx in morning on waking, with hourseness (Nux v). Irritation to cough about midnight He must restrain the cough, eyes obscured, faint and feeling as if he were whirling around. Cough in evening in bed and on waking; short, frequent, scraping C Dry cough (in a child) in Hacking cough freevening after falling asleep quently, as from pritation of throat, H cough in sudden paroxysms, as from spasmodic constriction in larynx, which seemed covered with dry mucus.

Clinical. -- Nervous cough, with anxiety, sleeplessness

Chest.-Pain in side on coughing, almost like sticking Oppression , (after disappearance of heat of face). with necessity to take short breaths, the chest raised visibly by respiration. Warmth, and in abdomen

Heart.-Clinical.-Palpitation caused by excitement, surprise, etc.

Back .- Trembling, with warmth in back and between shoulders Pain in small of: when walking: paralytic, in small of, when sitting and standing

Extremities.- Lightness Sticking-jerking through distention of pit Pressure in pit, she was obliged to one or another. Bruised pain in all joints in morning in bed, > rising, < those that had been bent. Weakness after 4 PM. the knees knock together, warmth internally and externally, with chilliness Tearing in l. arm, < motion Spasmodic drawing up arms after holding them bent, almost twitches. Weakness of arms and of whole body Rheumatic brussed pain in 1 upper arm Trembling of hands if he trues to hold anything (Zinc). Cramplike contraction of one or another finger, in the morning he cannot straighten the little finger. Drawing in soft parts of fingers or tearing downward Pain in a burnt finger that had been painless before the drug was taken. Numbness of fingers.

Lower Extremities.—Bruised pain in nates, from ischium to thigh, when sitting and walking, obliging him to limp Sore feeling on inner side of thigh from slightest rubbing of woolen clothes Knees tremble and stiff, piteous cries, holding her breath). Sticking when descending steps. Cramp of calf on drawing extending out at ring, as in inguinal hernia, jerking up knee. Jerking on r tibia, with corroding and S m sides with every expiration. Painful pressure smarting and with bruised sensation and heat of m sides in morning, temporarily > emission of flatus, femur. Pain in legs after every walk, obliging her to he down. Drawing pain beneath r knee. Jerking-Stool.—Urging to stool, stool soft, but difficult Two, sticking beneath r inner malleolus on stepping upon Frequent, heel or bending foot backward or toucling part. Feet tremble. Cramp of sole on putting out the foothalf way up thighs. Sticking in balls of great toes at expression

The itching of the eruption changed into burning.

Sleep .- Yawning. Weary with sleep. Overpowered with sleep, he dreaded apoplexy Sound sleep Sleepless on account of mental and physical excitement faintness. Aversion to open air, which aggravates symp-(Hyosc.) Sleep till 3 A M., then only dozing and on waking he did not come to his senses (Nux v). Sleepless from 2 to 7 A.M., with colic-like incarceration of flatus body and sweat under nose Little sleep. Uncasy, so that he was lying turned about in bed Talking immediately on falling asleep Waking with a start from fright. Dreams long, vivid. Light D. His fancy is occupied with one thought when slumbering from sound sleep.

Clinical.—A most valuable remedy for sleeplessness with nervous excitability, extreme sensitiveness to external impressions and flow of ideas, the patient cannot sleep on account of mental activity.

Fever.-Chilliness; in bed at 5 A.M and at 1 PM; emotion, < moving body, with warm skin, and on day obscure recollection of what had occurred, plan</p> over whole body, cold creepings down back, then or connected answers were not obtainable, it was diffiredness and heat of face, with cold hands, which are hot on inner surface while externally they are cold: then heat Sensitiveness to cold Open air seemed very cutting Shivering, with redness and heat of one cheek, internal S, even in chest, with chilliness and with heat in head and sweat in face, without thirst Chill, with heat, on both cheeks C in back, with shivering, but usual warmth of rest of body; C in back with sensation of heat, especially warmth in midwould break out Cold hands, then C feet; C feet after 4 PM, with headache and rush of blood to head. > in open air.

Heat in morning in bed, but dislike to being uncovered : general H at 3 P M., with redness of face and thirst, then general sweat, thirst during the first hours of the sweat; general, at 8 P M., externally perceptible, with dryness of mouth, shivering in back and down posterior part of body, then hands and feet cold, then in bed at one time heat then coldness till after midnight, m morning headache as if beaten, so that every step is painful, H. in evening after lying down, every thing seems too close, and at night sweat, < back; H with red face. General dry heat waking at night and obliging her to turn around, with hot breath, but without thirst or dryness of mouth. H. in face, with red cheeks; after eating, dry H. of face Hot feet

Sweat towards morning; S. of hands when writing; of feet, with soreness of toes.

### Coffea Tosta.

The effects of a hot infusion of roasted coffee having been observed, a fluid extract should be used as the basis of the pharmaceutical preparations

Generalities. - Increase of solid constituents of Aggravation of myopia blood : of fat in serum and of fibrin in blood Hæmorrhages from nose, lungs, uterus and rectum. She felt in ears. Kinging. . Sounds of pounding or ring-

Weariness of feet after walking in open air, extending | walks uneasily up and down the room, with an anxious Trembling; and muscular shiverings Jerking (secondary effect). Reflex contractions in Skin.—Eruption and itching over the whole body. nearly every part alternately. Painful cramps in thighs, legs, feet, walls of chest and muscles of hyoid region at night Restless. Feels strong enough to do anything Weak Peculiar sensation, somewhat like toms (secondary effect) Left side generally affected. Amelioration from moderate outdoor exercise.

Mind .- Delirium tremens; (after a rheumatic attack, under ribs, which causes anxiety and heat over whole with great weakness) Excitement, agreeable, with sweat, agreeable, causing wakefulness Loquacity.

Fear. Timidity and fear of sudden death, causing trembling. Anxiety Love for family. Veneration for Frequent waking towards morning, frequent W. as Supreme Being Desire to perform good deeds inten-

Imagination and memory stimulated Power of which he cannot free himself and which prevents judgment increased. Attention more alive. Impelled to push things, wants to keep going ahead and doing something Brain clear and very active activity, vivacity of thought, versatility and ardor of desire, more favorable to the exaggerated expression of ideas previously formed than to the quiet examination of new conceptions. Mental energy taken away cult to engage her attention, she repeated incessantly the same phrases in the most dolorous tone Somewhat unconscious

Head.—Aching, < noon and evening, twice a week, usually lasting two days, commencing with neck beginning to grow stiff always on l side, spreading over l side of head and down over outside of humerus, across bicens, diagonally to elbow, > quiet, rubbing with ice or cold compresses and transiently by lying down, < dle of back and across lower abdomen, as if sweat jar in moving, with tight feeling in head and pressure outward in occipit behind I, ear, throbbing up and down in 1 occipital region, when headache is severe 1 side of breast is red and mottled in fine points, white and red, skin on 1 side red-hot, moist and swollen, irritable mood, intolerance of noise, must have perfect rest, after the headache weak feeling in head and inability for mental labor. Rush of blood Vertigo < thinking, partially > change of position, with burning in stomach and faint feeling (secondary effects) Sensation as if everything in head were going in slow circles, now in one direction, now in another, with noises ın ears

> Neuralgia in supraorbital nerve, extending through eye into malar-bone, first r, then extending to 1, < r., > mental distraction and by sleep, pain at first dull, Heaviness over eyes (secondary becoming sharp effect) Sensation as if a piece of lead were nailed to parietal bones, < motion of head Stinging in locality of amativeness on 1 side Numbness in occiput, with aching and throbbing

> Eyes .- Surrounded by blue rings Conjunctiva of lids slightly red, < towards margin, and C of bulb slightly red in canthi and corners. Pupils enlarged but sensitive Sensation of a fog. Intolerance of candle-light, it seems surrounded by a dim broad halo, causing pressure in brows. Musce volitantes.

Ears.—Every step and every loud word is painfully

ing in the distance Roaring, buzzing and singing the tracings are taken a few moments after an infusion

Face .- Pale, and anxious; waxy. Puffy, as if dropsical, waxy, pale vellow Flushed Lips and tongue the opposite. pale and dry

Mouth and Throat -Pain in r. lower teeth (sound), druing him nearly crazy, > cold water in mouth, returning as soon as the water became warm Tongue dry Spas-

modic contraction of throat

Stomach -Loss of appetite Aversion to food, she trium Tension so that she must loosen her clothes. Distress in epigastrium and 1 chest, < cold water and but he looks at all with supernatural indifference. cold food (secondary effect). Heaviness in cardiac region (secondary effect) Sinking and emptiness

and hard, < region of bladder, which was sensitive to pepper taken internally produces warmth and makes touch Rumbling, causing warmth, painful, forcing him fearless (secondary effect) Shivering (on account her to bend up and press with hands Sticking of easy sweat) from least exposure to cold air (secondary Warmth and coldness moving about alternately Pain effect) Shivering in lumbar region Cold forehead;

blood every morning with the regular stool Pruritus in face, with scarcely noticeable redness. Sweat, am Frequent diarrhea Copious stools, later con-cool, cold, clammy, < palms (secondary effect) Frequent stools, with tenesmus Stool omitted

Urinary Organs .- Ineffectual urging Micturition frequent, copious, sp gr 1014; frequent, of scanty pale urine Ischuria, with burning and pressure in region of bladder Milky discharge (probably prostatic) at close of micturition, with smarting or burning at orifice of urethra, then cutting in sphincter vesice or region of prostate (secondary effect) Tickling in urethra Urine increased and colorless, increased, with diminished sp gr , U increased, but urea, phosphoric acid and sodium chloride diminished, and urea and phosphoric acid diminished, sodium chloride increased Solid constituents of urine, except earthy phosphates, diminished Urea diminished, it was not a diuretic though there was frequent micturition

Genital Organs -Power lost, weakened in men Spasmodic sensation deep in uterine region, it seemed as if something tried to press outward and could not because it caused spasms Menstruation increased

and prolonged Pruritus vulvæ.

Respiration.—Asthma, with oppression of chest Dyspnœa, with quick breathing Rattling Painful, short, rapid Complained of want of air, and compression of chest and clung convulsively to the furniture or persons, but sank down powerless. Diminution of expired water, of expired carbonic acid

Chest.—Construction

Heart.—Pracordial symptoms Increased, vigor of action Palpitation, and the impulse seems almost to raise chest Diminished action Fluttering.

Pulse.—Rapid, and tense, and full, and together with heart losing one beat to every four Slow. Variable, often almost imperceptible, sometimes intermittent (secondary effect) Decreases according to the tracings, with diminished extent of oscillation nale, L. and consequent increase of arternal tension, but when General Action.—It produces violent inflammation

of black coffee, especially when well reasted and of a strong aromatic odor, the peculiarities are directly

Coffeinum.

Extremities .- Trembling; of arms and legs Chorea-

like movements; < hands. Gast tottering Skin .- Itching

Sleep.—Restless on account of unpleasant and confused dreams. On going to sleep starting up in fright, with groans and fear of falling or of impending danger can take only small quantities of water. Nausea, with (secondary effect) Sleeplessness; from rush of all faintness, N, with ineffectual retching Vomiting kinds of thoughts; with ecstatic excitement, intermitwith difficulty Fulness in epiquitrium and partial loss tent, with dreams Vivid dreams of magnificence, of appetite (secondary offects) Tyinpanitic distention Dream that the sky is spanned with rainbows from of epigastric region, very sensitive to touch, less so to horizon to zenith, visions of enchantment, beautiful pressure ('ramp, with nausea Anxiety in epigas-landscapes, view of Paradise, later dreams of the death of friends, which do not abate the exhibaration,

Fever. — Cold feeling Shaking chills ascending from fingers and toes to nape and thence to vertex, Abdomen - Painful tympanitic distention. Swollen with general shaking and chattering of teeth Cayenne ın hypochondria, just below spicen Hepatic region C skin and limbs, feet and hands (secondary effect) sensitive Ebullition in hypochondria. Orgasm of blood Heat, in flushes alternating with Anus and Stool.—Hemorrhoids Discharge of bright cold currents down back, in cheeks, with hot flushes

### Coffeinum.

An alkaloid found in coffee, Then, Guarana, etc., but usually pre-pared from tea leaves There is some reason to believe that the alkaloids of coffee and tea, though chemically similar, are physiologically different.

Trembling. Uneasiness: and inability to keep Faintness. Collapse; and pulse hardly perceptible, irregular, 120, skin cold and clammy Numbress Delirium Excitement; so that he was unable to fix his mind, of nervous and vascular systems Confusion of ideas Visions Head, aching, heavy and confused, marked pulsation in arteries of H. and temples Peculiar intoxicated condition. Vertigo Vision of sparks Roaring in ears. Features expressive of anxiety Grating of teeth Tongue dry, Burning in throat and gullet Constriction of throat and neck every fifteen minutes

Thirst Nausea. Vomiting, with relief of all symptoms, V of digested matters and violent purging, on leaving the closet he could hardly walk. Pain and tenderness in stomach and abdomen. Abdominal pulsation Constant urging to urmate, with scanty discharge Increase of urine, with decrease of urea phosphoric acid and sodium chloride, with decrease of urea and phosphoric acid and increase of sodium chloride Urea increased; decreased. Frections. Oppression of chest. Pracordial anxiety. Palpitation. Pulse rapid; and full, hard, and irregular, often intermittent. Trembling of limbs. Sleep very sound at last Sleepless

## Colchicum.

A tincture is prepared from the fresh bulbs of Colchicum autum-

of the gastro-intestinal canal, with profound depres- and raving at times. Beside himself at external impression of the heart and of the temperature. It produces sums, for example, a bright light, strong odors, contact, also acute inflammation of the kidneys. It is specially rudeness of others. Complained there was something interesting to note that it produces symptoms of the in the bed, generally a piece of soap. Carphologia. acute manifestations of gout, quite apart from any direct modifications of the excretion of urea or uric acid. Exhilaration Sadness; with weariness, painfulness Its relief of acute gout seems to be purely a homeopathic action.

Allres - Verat. alb, Merc. cor, Arnica, Rhus t. China

Generalities. - Solid constituents of defibrinated blood diminished, also the absolute amount of bloodblood dimmshed, also the absolute amount of blood-corpuscles and of plasma. Appearance of being in Weakness Consecusiness of logical connection de-the advanced stage of typhoid fover. Stretching Stoyed, and perception impared by slightest interrup-Trembling. Convulsions; of 1 side and muscles of thom. Memory wask; so that he forgets the word he face; involving neck and face, pare clenched, forth was about to speak Unconsciousness.

Read.—Falls backward. Moved from side to side. flexed, fingers and toes flexed, eyes convulsively rotated, Sticking in brain Tearing, < in forehead Pinching 1. hand, which kept hold of penis, trembled, C. became here and there Burrowing, < on r side and vertex more frequent, extended to muscles of neck, laws clenched, frothing at the mouth, r arm could not be extended, the 1 could not be flexed, feet were drawn upward, soles formed a half circle and toes were spas-modically drawn inward. Tearing jerks, < 1 side, suddenly through one half of body.

Statches above eyes, in shoulders, elbows and wrists Tearings here and there Cutting or pinching in spots, now in r anterior and lower part of chest, now deep in hepatic region, now in region of spleen Pinching and crawling in some toes, in ball of r foot, in fingers, cars and in spots of skin of face, in evening, as after freezing or change of weather Drawing, jerking and tearing in incisors, facial muscles and other muscles here and sometimes with iridescent borders and there. Tearing tension here and there, for example, seem intolerable, in evening. Anguish and agitation Symptoms similar to rheumatic fever; rheumatic pain in whole body in evening, < in back, upper arms and shoulders Tremulous sensation in whole body as from fasting, in afternoon, < after dinner Sensitiveness to slightest touch (Arn, China, Bell, etc)

Confused sensations Malaise, with formication Much affected by work, < reading or writing Dis-Muscles seem paralyzed, < in the room after a copious stool limbs; paralysis of r. side, with only slight sensation, oration from rubbing; A. for a short time after every tal suture. Pain in vertex Oppression of vertex attack of vomiting; after stools, except pains in pelvic Tearing in l. half of head, extending to vert organs, which become worse.

Climical.—There are always extreme prostration and ten-dency to collapse, with internal coldness (Verst.).

Excitement, with disinclination to mental activity. and sensitiveness of whole body, so that he could scarcely refrain from weeping Apprehension Anxi-Irritability etv. causing sighing Indifference. Great flow of thoughts at night disturbing sleep. Absent-minded Inability to write connectedly; to think

Aching, in evening, night, on entering room after walking in open air, > sleep, feeling in morning after rising as if the previous pain would return, < shaking head, after washing pain in outer posterior part, < towards evening; deep, extending across through head, between ears and posteriorly. Feeling as if tightly bound. Confusion, in morning, in morning, like vertigo Emptiness Seems thick Congestion Perceptible pulsation Vertigo, on rising, even to falling, when sitting after walking, with stupefac-tion of head; with confusion in middle of forehead; on looking fixedly at an object, objects appear to whirl and change color, they generally appear yellow

Forehead -Sticking above r eye, in brain beneath below pit of stomach, in ribs of 1 side, below axilla, coronal suture, deeply piercing, above 1 brow, with in r popliteal space "Aching all over" Sufferings occasional feeling as if drawn upward Pinching above eyes Boring, < over r. eye Neuralgic pain in r eminence, > pressure and cold, with dull pain in r. occipital protuberance. Aching, r then l., above eyes; above r eye; near coronal suture, and in eye; in a spot on r side in morning on waking, on washing, above 1 eye after eating, > open aur, < in the room, in bone over 1 eye on every motion, < afternoon and by noise, in the same place next day, < comfort; prickling. Restlessness (Rhus t.); in morning motion of head, next day in r side of occupits, bending, constantly turning head from 1 to r, could not ing head backward or raising eyes, next day pain at lea on 1 side Dismelination to work. No inclination [6 rm above 1 cyc extending over 1 side of head, > to leave the bed Exhaustion (China, Rhus t, Verat., supper, next day in 1 side of occuput extending to 1 etc.). Weakness; all day, > in evening; in morning, eye and into face, < above brows and extending into in morning on waking; in morning on rising; in even-dorsum of nose, in middle, with hyperæsthesia of ing; on ascending steps; after stool, with indolence, cranial nerves, extending towards occuput towards sleepiness, prostration of limbs; when sitting quietly, evening, becoming a drawing pain Oppressive pain > moving (Rhus t.), especially in open air, returning above eyes in afternoon Pressure as if everything on sitting down, with nausea in throat and confusion would be pressed outward Tearing tension in a spot in head; with restlessness (Rhus t); with par- on 1, as if an abscess would form Constriction alyzed feeling, < in arms; sudden W. Faintness; above eyes Confusion; < walking in the wind, >

Sticking in r temple, < evening Tearing in r. the toes on slightest touch drawn towards sole Agravation from mental exertion; from coffee; of all temple, jerking T. in temples Paintul drawing in I. gravation from mental exertion; from coffee; of all temple. Pain un. temple in evening, when quint pains at beginning of night and at daybreak Ameli-in bed Bornag in skull of vertox, moving along sagit-

Tearing in l. half of head, extending to vertex crawling boring T in a spot on r. upper part of head, then in 1 side, drawing T. in 1 half of head, mostly beginning in l. eyeball and extending towards occ Mind .- Delirium ; at night ; in evening. Muttering put. Pain in r. parietal emmence ; in a spot on upper r. side of head Drawing in upper part of 1 side extend- Bluish.

side of O Pain in occiput, in r, then in upper part of sinciput, > warmth and rest in bed, deep in cerein head posteriorly and superiorly Heaviness in O, < motion or bending forward Hair falls out Tearings in scalp Feeling as if scalp were drawn forward to top of skull Crawling in forehead

Clinical. - Intense neuralgic headaches, with frequent ineffectual efforts to sneeze, the pains are usually throbbing and shooting. < waking in morning.

Eyes.—Red and watery, pupils dilated. Conjunctiva inflamed and congested Sunken Surrounded by dark rings Dim Staring Distorted Rolling convul-Tearing in and around r Pain, in r Biting in r. < external canthus, with lachrymation and feeling as if hids were agglutinated Heaviness as if he had not slept enough, with injected vessels Dryness Lachrymation in open air Pupils contracted, l. dilated, uneasy Drawing digging deep in balls Pain in l ball. Compression in r ball. Ulceration of Meibomian glands of 1 lower lid, with swelling of lid and irritability of nerves generally Lids in constant motion Twitching of r upper lid Redness and burning of margins of lids, as in blepharitis Drawing (similar to twitching) in I lower lid, towards inner Pressure in brows Vision very acute. Flickering before eyes. Blackness before eyes on attempting to stand Hallucinations, fatiguing

Clinical.—Kerato-iritis, with pus in anterior chamber of eye Occasional attacks of rheumatic inflammation of iris (see Clema-tis), illerations of cornes and opacities of cornes (The symp-toms of destructive inflammation within the eyeball observed but once, in a boy, have been omitted )

Ears .- Sticking, in 1, twinging S in 1. Tearing in r meatus, behind r, in region of articulation of jaw, with pain on touch Pinching Digging in r Pain, then sticking deep in them, P. behind r. as if a gland were swollen. Waving sensation in r Stopped feeling in T; S feeling if he takes a few steps, with roaring in them ltching deep in them, with dryness, boring does not reach the itching painful spot. Roar-Tinnitus aurium Distressing noises. Noises cause disagreeable sensations, with starting. Hearing acute : difficult.

Clinical.-It has been used for discharges from ears after

Nose.—Pinching in upper part Sore pain in r nostril, in septum, < touch and on moving nose. Pressure in bones; and facial bones, in nostrils, with tear-Weight in bones Sensation in mucous membrane as in beginning coryza. Nostrils dry and blackish Crawling; in tip, with sneezing, with warmth, as in nosebleed. Sneezing. Bleeding in evening Coryza, fluent, with discharge of much tough mucus Catarrh, and in fauces Smell very acute, the odor of a freshly-poached egg makes him almost faint Smell as of smoked ham

Clinical.—Extremely acute smell, especially for the odors of cooking, the smell of food being prepared causes naises and disgust for food, indeed all strong odors are oppressive; this symptom occurs in the course of many diseases, gout, dysentery, etc.

and eyelids purple; cheeks, lips, r. eyelids purple. if chewing old linen.

Bluish-white. Pale; and Hippocratic. sunken, cheeks and chin alternately pale and red. Tearing in a spot on r side of occiput; in spot on l. Sunken, about mouth and in front of ears. Drawn; and pinched, the lips, nose and lobes of ears blue. Anxious, and haggard Suffering expression Stickbellum from slightest literary occupation. Confusion ing in 1 cheek Tearing in 1 side, extending to ear and head, with tension. Pain near r temple, near r. articulation of law, or twinges in ear Bruised pain in I cheek Jerking-drawing pain in muscles extending into bones Sensation in cheeks as if drawn asunder; sensation in bones as if widely drawn asunder, with drawing terkings in them

Lips cracked Lips appeared as if they had been seared with a hot iron Round ulcer on vermilion margin of lips Hydroa on upper lip Lips pale; and tender, and cracking of lower on motion of mouth. Lips bluish; and dry, also tongue Cutting tearing in vermilion border of l upper lip. Sudden sticking in l. lower jaw; sticking pressure beneath 1 lower law. Tearing in r laws, with sensation as if teeth were too long. Pinching in r articulation of jaw. Drawing in r upper jaw, extending to margin of orbit, alternating with irritation in throat Tension in articulation of jaw, so that he must lay aside the cigar. Masseter muscles seem increased in breadth, allowing him to open the mouth only a little, and pain

Mouth.-Teeth Sordes Grinding r Tearing in roots of 1 lower Pain in 1 lower back; (in decayed T when chewing). Drawing pain on taking anything cold after something warm, D. in lower incisors, with cold sensation in them Soreness from pain, S so that he could not bite on them Grumbling in upper back Seem too long Blunt feeling, with pain, especially drawing extending from tips of upper teeth into jaw-bone Follicular inflammation of gum about a r incisor Follicular ulcer in commissure of upper hp and gum, with burning pain. Tearing in r lower gum, in gum of l. lower incisors; in r : in the gap of a r upper tooth Pain in gums

Tongue -White Pale blue and cold Yellow Red, covered with mucus; bright red, coated only at root Coated; in morning, white, white patches on under part, white, with velvety sensation, yellow; brown Dry, on dorsum, and brownish, and brown in centre, red along edges. Sticking in middle; S. and burning. Tearing posteriorly in I side Sharp pain about root on moving it and on swallowing. Burning, prickling, on margin. Enlarged feeling, as if stretched out across teeth. Biting, and in throat. Cold; and breath Heavy; then stiff, then insensible, and difficult to find the right word and to articulate it when found Speech difficult.

Working her mouth and spitting, as if trying to spit out a hair. Mucous membranes secrete a viscid substance Greenish mucus involuntarily thrown out when sneezing Scraping in mouth, with pasty taste and great hunger. Scraping crawling in posterior part of palate as in coryza Agreeable prickling as after champagne, with salivation Dryness. Heat. Blunted sensibility, especially of root of tongue. Salivation; of agreeable taste; watery; watery, with nausea, fulness and discomfort in abdomen; watery, with dryness in throat; bad-tasting, flat-tasting, causing nausea Saliva salt, piquant-tasting. Taste bitter; and Face.—Red Cheeks red; and hot Cheeks, lips to water. Strongly-tasting food causes a sensation as Threat.—Perceptible pulsation in carotids. Draw-water. Of green fluid. Of whitish-gray fluid. Of a ing in external half of r side. Much green-quart of thick whitish substance in morning, of tenaish mucus. Frequent hawking of scanty mucus clous greenish matter at 11 A M., soon repeated, V of Inflammation Tearing far back, < 1 side. Pinch- brandy and water at 3 P.M. Of viscid, tasteless fluid. ing posteriorly as in beginning angina, with dryness Of mucus in throat and impeded swallowing. Uvula painful Spasmo and red Scraping. Rawness in morning and hoarseness. Constriction; of pharynx. Crawling provoking cough and hawking of mucus; C, with loosening of thin mucus, which must be frequently expectorated, biting C. in back. Fulness at night disturbing sleep Burning in pharynx; and along œsophagus, in uvula, then profuse pale urine. Dryness; with redness of uvula and arches of palate; posteriorly, very painful on swallowing, as in beginning of quinsy; scraptill on awalloving, as in organizing of quiney source region; gratiently extending over ascument, arising, seraping, with tickling cough. Swalloving diffi-ng, seraping, with tickling cough. Swalloving diffi-cult, with pain along esophagus; S. painful. Sense-tio bend double Soreness Sensitiveness of epigas-tion at beginning of esophagus on swallowing as of a tire region to pressure. Construction, in epigastric reround swelling.

Stomach .- Great appetite (China); at noon; in afternoon, evening; for dinner; gnawing, almost a throb-bing in stomach, Af for different limes, but as soon as to pressure of clothes Desire to hiccough Dis-table of the control of the con ders from nausea and cannot cut. A diminished, for gested food Tension. Burning in epigastrum; with breakfast, but great at noon A. lost; lost for break-drawing; in stomach, with pain; before stool; in fast; lost at noon. Aversion to food and drink epigastric region, with fulness; in S, with heaviness; Thirst; in afternoon; unquenchable; for cold drinks,

with pain in stomach and bowels

Eructations; with burning in stomach; empty; empty in forenoon; of water. Hiccough Nausea, in morning Crawling, on becoming erect, as in vomiting Weakon waking, with rumbling in abdomen, painful contractions, gripings and urging and sensation of loose breakfast bowels, at times during dinner; after dinner, at which he could eat but little, after eating, if he swallows the saliva; on becoming erect, on motion of head, with faintness, < raising oneself in bed, and vomiting of bitter bilious fluid; > small swallows of cold water, which she desires constantly, in throat caused by pressure below, in throat as after vomiting Retching, long, then violent vomiting of a large painful on slightest pressure Distention, after supmass of yellowish, bitter mucus, leaving a bitter bil-10us taste in throat

Vomiting, with watery diarrheea (Verat a), symptoms of cholera morbus; attack similar to cholera, with constant rice-water vomiting and similar stools, which were forcible and accompanied by tenesmus Violent, unless he bent himself up and lay still, violent, with trembling and cramps; with diarrhoa, violent, of all food eaten three hours before, violent, of a contents of stomach, of yellowish-green fluid, so Enteritis violent that he could not retain the slightest food or food mingled with a bitter brown powder, then of water, partly hitter, partly flat-tasting mucus

Spasmodic contraction on touch. Rumbling and moving Gastritis, Gastralgia, Tearing on beginning to vomit and purge Cramp, and in abdomen and legs Pinching in epigastrium. Pain, in morning, in evening when walking, after a light meal; in epigastrium, in epigastric region, with swollen feeling in stomach without real swelling, with intolerance of pressure, extending into 1 side of abdomen; in region, extending over abdomen, with tenderness; in region, gradually extending over abdomen, with gion Oppression in pit; with pressure; in epigastric region Fulness, in epigastric region, < when warmith in S at night, B extending upward along Heartburn Coldness (Verat ) Uneasiness sternum Discomfort, extending to spine, in epigastric region. ness in pit, with oppression. Faintness, even after

Climical.—One of the most characteristic indications for Colchicum is carving for various things, but when they are brought to him, especially if he smells then, he is seized with extreme aversion and becomes nauscated, and may even vomit. It is indicated in the most violent attacks of gastraigns, with retching and vomining of Good and bile, from the represent of goot.

Abdomen -Bile increased Sunken Doughy and per; after eating, > copious thin stool; and tension and hardness, and in rectum, as if she had eaten too much, < light food Tympanitis Rumbling; then soft stool, after stool, then hunger, with urging to stool. Movings as before diarrhea Emission of flatus; offensive, forcible, much offensive, offensive, in evening; of odorless Painful flatulence Cramps in muscles and in flexors of limbs.

Sticking transversely through, S, < r side, beneath brown substance; violent, of greenish water, then of liver, inguinal region and in pit of stomach Cutting. Enteritis Pinching, then soft stool. Tormina. Griping; with unsatisfactory stool, then pasty stool. drink Frightful on motion, > lying on r side, F of Gnawing Pain; at night, and frequent vomiting; food minuled with a bitter brown powder, then of water, after rising, with diarrheea, before thin stool; > rub-Constant bing, then tasteless eructations and passage of flatus; Frequent, but scanty; F of colorless and inodorous temporarily > watery stools; < colon, with lumbar fluid; F of bile, with griping in abdomen, then but pain and pressure about pelvis, stools at first of usual terness in mouth and throat. Copious and easy, then appearance, then soft, yellowish, of pitchlike stickiappetite. Of food immediately, of the breakfast; of ness, fetid, causing heat of anus, then pain, then food and pale greenish mucus, of undigested food tenesmus, later they diminish in frequency, become and a yellow liquid, then diarrhera; of food eaten the watery and colorless; with vomiting and diarrhera; night before, then of much thick, yellow bilc, then extending to chest, with anxiety and heat, < head; thinner and less yellow, at last of pale straw color as from incarcerated flatus. Spasmodic constriction containing many white shreds. Of drinks tinged with before vomiting Tenderness, with intermittent pain, bile. Of bile; then like nee-water; of tenacious bile of verything taken into stomach. Thin and slimy as before coll . Unessiness; with movings and unting Of profuse vellow fluid. Of much yellowish-green to stool. Burning here and there becoming griping. Chilliness, < stomach, with pain and weakness. | sore biting in anus. Crawling and jerking

Upper-Sticking in r hypochondrium; in spleen in evening Tearing in I hypochondrium, cutting, in hepatic region, cutting, in r. upper Cutting cramplike pain in evening, extending to navel beneath pit of stomach. > eructations Tension, extending to r hypochondrium, T transversely across hypochondria Warmth in middle, and fulness; when walking

Sticking in umbilical region, here and there below U region. Pinching in I side of A. and near r. hip Sharp pressing-outward pain above and to 1 of navel. Pressure in thin intestines, on 1 side of navel; in 1 side of navel as from incarcerated flatus, with sensitiveness to pressure. Pain in umbilical region before and at beginning of noon meal, with flatulence Internal soreness between I hip and ribs, even on touch Burning below umbilicus, with dragging towards

small of back.

Lower -Rumbling in transverse colon. Sticking in l part of transverse colon Tearing to l of r hip Cutting in r, then in upper I side, but not in intestines Sudden pain, with slimy, watery, almost involuntary stools Pressure in ilium to I of navel: in region of transverse colon, with discomfort Dragging in descending colon, with moving Irritation of pelvic organs; I as from diarrhœa, and in anus, and urging to stool, with aching in abdomen Warmth just above anus, with sensation of a live worm there, itching and burning on the corresponding spot on skin, sensitiveness to slight touch, but not to hard touch, > scratching, with redness

Clinical.—In typhitus, in extreme distention of abdomen, with rey coldness in stomach, colic, occasional attacks of nausea and vomiting. Ascites with the characteristic gastric symptoms.

Rectum.—Prolapsus. Throbbing Throbbing smarting Sensation of diarrhosa, preceded by cutting, without thin stool Tenesmus; with only a little feeces at first, then transparent, bilious, membranous muous, with relief of colic; > frequent passage of flatus; urging to stool, which is unsatisfactory, after stool, with passage of flatus; with scanty faces, urging, then painful stool, as if sphincter would be torn asunder. then difficult, soft stool, then pain in small of back; sudden urging, with copious stool and griping, afterwards much motion in colon, then six copious, watery, yellow stools, frequent urging, with hard stool or none, with pain in anus Ineffectual urging; though the fæges were felt in rectum; frequent, preceded by

Anus.—Spasms of sphincter, with chilliness running up back, then urging to stool, and insufficient stool Sticking, and anteriorly in urethra and in 1 hip. Sticking tearand anteriory in drettra and in 1 np. Sateking cear-ing. Pain, in sphincter, as if it would be torn, with hard stool Sensation as in diarrhees, copious, not thin stools, then in rectum sensation of diarrhees and Sudden

Delisation in morning, and in chest, like a great rush itching Burning intermittent; with prickling. of blood to chest Weak sensation becoming hunger |

Stool.—Contained many white shreds. Dysentery, Paralysis of intestines and change of inflammation to gaugement. and frequent, with tensenus. Watery, and gaugement. quent, with griping; and frequent and large, with griping at each discharge; and frequent, copious, colored with bile, and painless; and copious, yellowish and offensive, containing pieces of white membrane; and Pinching in l., extending to region of hip, > eructa-tions Pain in morning on waking; on pressure, flakes, without faces; like rice-water, copious, frothy, as from incarcerated flatus anteriorly beneath r short slimy, compared to clean scape ids; and frothy, painribs, in spleen on pressure, as from the pressure less, and slimy, brownish-black, of a turpentine look, of a fold, preventing sleep on account of mability to putrid, as if mixed with fresh bile or blood; and lie on 1 side according to custom Pressing-out pain shmy, greenish-black, smelling like fresh bile or fresh blood that has stood some minutes in a water-bath. Thin, profuse, dark brown, T, yellow and bloody; T, yellow, copious, preceded and followed by pain, rumbling and motions in abdomen, then ineffectual tenesmus; T, yellow; T, yellow, forcible, with discomfort, almost pain in abdomen during and after Pasty, and profuse, after dunner, with flatulence, then emission of offensive flatus Slimy, with tenes-

> Constipation; with full sensation in rectum, then scanty stool Hard stool, scanty and sluggish Copious; and offensive Scanty, difficult, not hard Difficult, but not hard Easy Involuntary; at night; and black, offensive; and involuntary micturation Bloody Frequent, at night, alternating with vomit-Offensive, containing lumps looking like sponge.

> Clinical.—Dysenter, grate tenemus, dampers pellylike or bloody, mucous or changeable m character, but with great tenemus, with or without stool, with tympanitie, olor, installity to stretch out the logs, at times the dysenter-ordenings are reddsh, mucous, little scrapings of intestines, consultimes there is even protrusion of the lower borels (Pod.) Especially inducted in autumnal dysentery (compare Aloes and Mercurind

Urinary Organs.-Strangury. Urging to urinate. Symptoms as from Cantharides, often muddy sediment, consisting of epithelium of vesical mucous membrane Frequent micturition, day and night, every half hour, of diabetic urine, of deep yellow, copious urine Retention of urine Cutting in urethra on micturition, C in forepart Drawing pain in urethra. Drawing in urethra, posteriorly, with tearing. Tickling in navicular fossa after urinating. Burning in urethra, then profuse discharge of pale urine, B. on urinating, with contraction of neck of bladder, B. as if sore, on urinating; crawling B in morning after urinating, with sensation as if more urine would pass, and burning when passing a few

Urine -Copious; with urging, and hot; and pale, and dark, and golden, clear, then with white floating clouds, and turbid Scanty, and red and burning. Dark; dark brown. Bloody, with strangury then clear and yellow, T., mucous Like lime-water, the turbidity caused by urate of ammonia.

Clinical.—Nephritis with extreme pain in the region of the kidneys, in some cases < stretching out legs, as from pressure on the kidneys, in some cases < stretching out legs, as from pressure on the kidneys, in the abdominal cavity, surne bloody of dark albuminous, is some cases there are symptoms of inflammation of the neck of bladder, with terrible pain after urinaling (Chath). Inflamed kidneys, with gain in back and accuma, hot, burning urine, constant chillmens and cold extremities, with coldesse in someshift.

Sexual Organs.-Tearing in glans; in l. spermatic

cord. Effections and exhausting emissions. Pain in Oppression; extending into I side of chest, obliging deep I testicle as if crushed, when stepping on I foot. Great inspiration; in P. region; in P. region, with trembling of desire; at night; after existing. Menses to early; M. Mear Fubing and angle them lying on I side, with oppresthat had just appeared disappeared.

Respiratory Organs .- Pain in larynx, with croupous expectoration from it; in muscles somewhat to l., inexpectoration from it; in muscles somewhat to l., in- on waking, on going to sleep; periodic, with oppression ternally and externally above larynx. Scraping in of heart Dull, irregular, suppressed beats, with indescribachest, with cough. House; and husky voice, with perceptible pulsation in abdomen. Impulse not felt, pain in speaking. Voice hollow and deep Voice and even heard with difficulty, a blowing sound, like a heart lost, as in choice Cough and deep respiration; severe heard at a great distance, or through a stone such, both C. at regular intervals; almost voluntary coughing up sounds lapsing into one. of starchlike lumps of mucus; (C. alternating with coryza.) Bloody sputa Difficult breathing; and short; and anxiety. Dyspnœa; and contraction of chest Rapid breathing; and heavy, almost stertorous Desire to take frequent deep inspirations. Respiration irregular; intermittent. Moaning and clutching at heart

Clinical.—Dyspnes, with edema of extremities, chronic troubles with the kidness and heart.

Chest .- Twitching of r. pectoral muscles Increase of carbonic acid from lungs Sticking in r; near r. arm, in r lower side, in lung; beneath I clavicle, in ceptible. Small, and tense l upper part; in l, near eighth rib; in l. in morning thready and tremulous in bed on and after exertion; in I on coughing and on inspiration, in muscles on moving chest, deep in side on complete expiration, not on inspiration, afterwards only on insurration; here and there, not affecting respiration; < breathing, with cutting. from anterior wall to posterior wall, S outward in r . burning, externally on r Sticking, rheumatic pain ın r wall.

Tearing near r. axilla, becoming soreness, even on touch and motion; sticking, deep in r, where it is difficult to say whether it is more in the back, whence it extends, or more in chest; cutting, across Cutting in , not affecting respiration; C. in l. lower forepart, on blowing nose; in r., almost taking away the breath, then in chest, not deep and not affecting the less sensitive parts, pinching, here and there, in l. anterior and lower part. Pinching Boring in 1, < 10 PM, with difficult breathing and anxiety; drawing B from middle of sternum to l. mpple, > deep inspiration, the pain less severe in r side of chest, it afterwards extended over whole chest and caused constriction as from a weight

Pain; around r. side, preventing writing; on sitting a long time, extending to scapulæ. Intermittent pressure in r, now upper, now lower Sore pain deep in a spot in region of l nipple, < inspiration, > rising ing from bed Anxiety, < 1 Sternum and spine feel as ing if screwed together, the pressure beginning on sternum Oppression, when walking, alternating; anxious Constriction; with necessity to breathe deeply; with stacking and borng through chest, < beneath l. nipple; sudden C. in r., causing starting Spasmodic compression of l., with difficult respiration. Tension Fulness; with pulsations in abdomen. Orgasm, < evening after eating, with sensation as if something alive were working in it.

Heart.—Trembling in precordial region, with sticking Sticking; in precordial region Tearing in P region. Pressure in P. region; in afternoon; after coffee, > walking, with oppression and sensation as if he would in joints of fingers, toes, wrists and ankles; in shoulder-have apoplexy. Anxiety in P. region, provoking sighing. joints and knees during rest, with uneasiness; rheumatic,

sion, as from stagnation of blood. Sensitiveness of P region to pressure. Palpitation; in afternoon; at night; Tickling in larynx. Crawling in trachea and able sensation in chest. Scarcely perceptible beat, with

Climical.—Chronic or subscute pericarditis, with exudation of water in percendium, with severe pun about heart, oppression and these cases the heart's action if weak and indicate, the pulse may even be threadlike; in many cases there is chronic feeling of rey coldness at jut of stomach

Pulse .- Rapid , and small ; and weak , weak ; and irregular, and weak, thready; and contracted, spasmodic; and large, hard, full; and strong. Slow, during the nausea, and weak; and thready, and weak, afterwards rapid. Weak, stritable, at times rapid, at times slow Weak, small and arregular Intermatent; scarcely per-Imperceptible, then

Neck.-Visible throbbing of arteries, < sitting still. Pain in nape; beneath ear, near joint of jaw, with soreness to touch, in neck and occiput, and stiffness, drawing P, from nape across occuput to ears; tensive P. in r muscles externally and on swallowing. Rheumatism in nane. < r. tranezius. < wrong movement of neck Stiffness of nape and occuput, and pain. < moving head Paralysis of muscles, so that when the child was raised the head fell backward, with the mouth wide open

Back .- Sticking in dorsal muscles; S. between and beneath scapulæ, on superior l angle of r scapula. Tearing to l. of spine, behind r axilla. Pain; acute, along back and to heels; between shoulders, tensive, in tip of l scapula, towards spine, < motion of arm. Rheumatic pain in 1 scapula and in nape, mostly tensive and pressive, < turning neck to l or far backward; periodic R pain, more in scapulæ than in

Lumbar Region -Sticking, and in coccyx; burning, in sacrum Sticking tearing. Pinching and in urmary passages, with constant desire to urinate Pain: on both side of vertebræ, deep in sacrum in afternoon; in sacrum, waking frequently at night; in a spot in sacrum, as if suppurating, < touch, brused, in morn-Drawing pain, when lying quietly, > by mov-Drawing on waking, D, < motion. Tension in region of kidneys Heaviness, with sensation as if

rectum were stuffed Extremities .- L elbow and knee swollen, hot, painful, while r side was partially paralyzed and almost insensible Twitching Toes and fingers painfully flexed. Trembling increasing to convulsive movements, a similar attack afterwards ending in two attacks of vomiting, T., becoming convulsive, with flow of whitish froth from mouth, becoming similar to opisthotonos, repeated after a quiet sleep from 11 to 2 at night. Drawing, now sticking, now jerking, < morning, now in muscles of shoulder, now in r. hip. Pain; legs; in morning Numbness of hands and feet, then prickling as if they had been asleep Paralysis of r ness under thumb-nails foot and l. arm. Joints stiff and feverish.

Climical. - Gouty disthesis, soreness of the flesh, of the joints, extreme irritability, intolerance of touch, with gastric symptoms extreme irritability, intolerance of touch, with gustric symptoms Armolar rheumatem, with tearing perking pansa, cardiac complications, patter graphous Shifting rheumatism, pansa < lowered might, the pattern from Shifting rheumatism, pansa < lowered to particular and fined of the pansa person of the particular and fined of the pansa person of the particular and fined to the pansa person which the feet are affected they become swollen, ordematous, it is difficult to lift the feet Rheumatism or gout in heel, which is extremely sore, with earing pains. Inflammation of the joint of great too, with scute pans as from sharp sticking, cannot hear to have it touched or to have any one come near him (Arn).

shoulder Pain in shoulder-joint, in 1 shoulder. < lying on 1 side

Arm —Tearing, with paralyzed sensation; cutting T in l Pain Paralytic pain so that he cannot hold the lightest thing firmly. Weakness of r at noon L felt lame and weak Heaviness Numbness; with pain and at times sensation as if she had no hands. hands and feet warm, legs and arms cold Paralyzed feeling in l Paralysis of r arm and hand, with thumb drawn inward and the fingers spasmodically closed over it Pressure, above l elbow, < moving and raising it, preventing his putting on his coat alone. > rest ing leg to step over a high object and at night Burning pain on inner side, near l. axilla Bubbling sensation on outer side of 1 upper arm

outer side of muscles, on outer side of l., as if in fascia; surface of l, extending into some of the fingers; on tibie, like a chilliness in bones, not > warmin, extensor surface, extending into fingers, as from electric shocks; intermittent, on extensor surface, as if some nerves were torn. Pain; with sensitiveness to touch Numbness

Elbow and Wrist -Sticking at night, S in l. elbow

Hand.—Spasmodic contraction so that the fingers were stretched out and the ball of thumb turned into heel; in feet as if lame; drawing, in l. sole, drawing, palm Trembling, of r, almost preventing writing.

Trembling, of r, almost preventing writing. Tearing in metacarpal bones of r. middle and ring finof little finger, sticking, in lower part of r Pain in l

Fingers - Nails blue; and tips Spasmodically I great as if the nail would enter the flesh flexed, but in constant motion Third and fourth

rheumatic, in metacarpal joint of l thumb. Numb-

Colchicum.

Lower Extremities.-Tottering gait, partly on account of weakness and partly on account of sudden sticking-tearing lerks through periosteum, with sensation of paralysis and actual paralysis They seem to have lost their power on attempting to walk.

Thigh -Abducted. Snapping in 1 hip. Sticking in hips, < l., tearing, from l. hip-joint to leg. Tearing in upper part of l., high up on inner side of r; in region of hip; in middle of l in evening in bed; above l. knee in evening in bed, deep in nates towards anus, extending towards hip; in r hip-joint, extending to knee; drawing, in ligaments of l hip, < night; Upper Extremities.—Tearing, now in r axilla, now jerking, in upper part of r Pinching in like cramp, in l Pain as after a blow in a spot beneath and as if asleep, P on and above r. hip. Pain in like in a single part of the pain as if asleep, P on and above r. hip. Pain in hips almost in r axilla. Bubbling sensation in l axilla, and loins. Pressure upon femons, c in middle. even perceptible externally Sucking in r shoulder Drawing pain in hip-hone on moving about at night, Tearing in r shoulder and forearm; in r shoulder in hip when sitting, > motion, in I femur, at time joint, antenorly in I shoulder-joint Pinching on I. Worse, as from fatigue or the growing pain; sudden sticking, beneath 1 nates, extending into perincum Drawing deep in muscles, in r hip-joint, paralytic, in r in evening in bed. Sensation as of something living in I hip Stiffness of l., making walking difficult

Knee - Snapping on l surface of r Sticking, in l; and in ankles Tearing in l Pain: in l, in inner side of r.; in r in evening in bed, with lame sensation; in bend of r during a long walk, extending down calf Broken feeling (weariness) on ascending stairs Weakness so that they give way, < by rais-

Leg.-Cramp, of calves Tearing below patella; posteriorly beneath patella, in I side of I calf, in lower part of r calf, pinching, at insertion of r tendo-Forearm —Tearing near wrist, in r forearm, < on achillis; tensive, on I lower half of I tibia Pain; in calves and feet; in forepart, as from chilliness, < tibia, in flexor surface of l, extending to elbow; in extensor with coldness of legs, even in bed; in forepart of forepart of tibia, as if the bone were chilled or like growing pain. Drawing in lower part of r calf; in both calves and in r metatarsus. Heaviness extending into feet

Tearing in I tarsal joints Pressure in r. external in I elbow, then sensitiveness to touch. Tearing on malleolus at 8 P.M., as from fatigue. Cramp of feet; inner side of elbows, extending to upper arms, jerk-like, from r. elbow into wrist, then from wrist into foot, on back of 1, in r. heel, near sole; in a spot in fingers Sticking on volar side of wrist, with heat, I. forepart of r foot, hear sole, in I. sole, in a spot in then r Tearing in r wrist Pain in r wrist. curvature of r. foot, between ball of great toe and

Toes.-Jerking in metatarsal joints Sticking in l. gers, on back of r hand, in r and beneath last phalanx big Boring sticking across top of r great. Tearing on inner side of metatarsal joints, sticking, in ball of metacarpus, < between third and fourth fingers, on r. great, near its lower side. Sticking drawing in r. motion, < flexion of hand Drawing extending into fingers Weakness in r. middle toes, < lower surfaces of toes. Pain in

Skin .- Pale. Scarlet. Livid, dry and hot. Erupdrawn inward Cramps; < second Sticking on tion. (Wartlike pimples on nape) Pityriasis on volar surface of tiets, in 1 thumb, in mescarpel inner surface of 1 thigh and on corresponding part of joint of r thumb Tearing in 1 little; in joints of r. secrotum. Pustules on face and lower limbs, resemfingers; beneath nail of l. index; in middle phalanges bling poisoned wounds. Sticking, so that it jerks

through the whole body: jerking S as from flea-bites. > scratching Crawling on inner surface of r. great, second and third toes, as if asleep. Itching over whole body; in various parts; on hands; on face, with eruption; on ulnar side of forearm, with redness; over whole body, as from nettles; sticking, here and there; burning, here and there, after scratching redness, and the itching changes to another place; burning-sticking, here and there, driven to another part by scratching.

Climical.—Generally indicated in sequelse of eruptive dis-cases, scarlet fever, typhoid fever, etc., suppression of urine, accu-mulation of water in thorax, abdomen and extremities

Sleep .- Yawning, after dinner, with rumbling in abdomen, then copious stool Sleepiness, during the day; in afternoon; in evening; after supper, till and grinding of teeth

ious, towards morning, with erections.

7 PM; in afternoon; in afternoon, after dinner; in and asleep Weakness, in morning, with faintness; afternoon, in open air: in evening, with chattering of with sleepiness teeth on going to bed, > by lying still, but threatened to return on motion, at night, with heat of head, in emergence of I supraorbital nerve. Forehead, aching the room, in the room, then vertigo; and pulseless at while sitting, with tearing in knees, passing down inwrist, respiration slight, nose, feet and hands cold, side of legs to feet; A, with frequent flying pains in stiff and blue, blue under eyes and about mouth, then legs; with frequent rheumanc pains in arms, hands unconsciousness. Alternating with heat. Progressive and legs; with frequent rheumanc pains in arms, hands therefore the progressive paint of the progressive paints of the pro Shivering; in back, down back, through limbs | Nose, Face and Tongue. — Dryness of nostrils, with Creeping chill in scalp | Cold forehead, nose, cheeks frequent sharp pains in r temple and aching distress and soles, limbs; fingers, fingers, and numb, hands in stomach and howels. Face yellow around eyes in and feet, knies; feet, in afternoon; feet, limbs, hands morning. Neuralgia in superior maxillary bone in and arms, while the rest of the body had a clammy open air Tongue coated vellow along centre and feel, but was below the normal temperature, skin, base in morning, with rough, bitter taste skin of hands and legs, even in bed, whole body cold and clammy

soporous condition Passing into headache. In sions of flatus Cutting while sitting Orgasm of blood. Dry, at flushes in afternoon.

over abdomen. Clammy on forehead. Suppressed. gastrium, at 10 a.m. small stool of mucus and blood.

Clinical.—Occasionally indicated in typhoid fever, tympani-tis, coldness in stomach, cold breath, nauses and vomiting, cold sweat, albumnous urine. Effects of sudden suppression of perspi-ration in gastralgis, etc.

## Collinsonia.

A tracture is prepared from the fresh root of Collinsonia Cana-

General Action .- From our scanty information it seems to act upon the "hemorrhoidal sphere" similarly to Aloes, Sulphur, etc.

Generalities. - Warmth spreading along internal mucous surfaces of lips, deepening into a feeling of largeness, with sensation of needles darting back and forth, the same numbness or needle-like darting to and fro in face, cheeks, forehead, hairy parts under chin, midnight, then waking with oppression in stomach, from ear to ear, while inner surface of lips and whole then wide awake for two hours; with disinclination buccal cavity were excited, the face seemed to grow to work and confusion of head; soporous condition broader and broader, with exhilaration of mind, then r in a child, lying on its back, with half-open eyes and forearm to finger-tips felt numb, a weary heaviness, then loud, rapid respiration. Deep sleep, with vivid dreams I arm and fingers; balls of thumbs more numb than fingers, nausea, lips seemed growing larger and mouth Sleeplessness, from sticking jerks, sometimes only seemed to stand open like a huge catfish's, hips dry, In skim, sometimes deep in soft parts of head and face mouth tingling and burning, face flushing and prick-Late falling asleep Restless sleep; in afternoon, on ing, whole head "growing," forearms to finger-tips the sofa, only slightly refreshing, and exhausting; asleep, hands feel broad and heavy, desire to be with with anxious dreams; with heavy dreams. Unre-freshing S in afternoon. Frequent waking in fright, growing bigger while straining to get boots on, stagwith the idea that there were mice in the bed. Many jeering, faintness, symptoms < swallowing hot things, dreams; D in a half-waking condition Confused, in the cool open air feet and limbs felt strangely light, always of the same objects Heavy, full of solicitude loss of personal identity in lower limbs, then a glow Of snakes Anxious, and erections at night. Lasciv- from umbilicus to toes, sense of increasing largeness and numbness from hip to hip, while r thigh was thus Fever. - General coldness (Verat. a); all day, > at affected the l was skipped, calves seemed elephantine

Stomach.-Nausea, while sitting, with intermittent cutting in hypogastrium, with distress in stomach Heat at night, H, with gastric disturbances and and bowels, with cutting in hypogastrium and emis-

Abdomen .- Pam at umbilicus at 10 PM. Distress night. Hot skin, and dry, dry and lead-colored at umbilicus, with eructations of air. Pain in hypo-H in bed like rush of blood through skin of chest gastrium in morning, with desire for stool Cutting and head. In anterior part of head, in face, ex- in hypogastrium twice on waking in the night, and ternally on r. side of nape; externally on r. side, near with urging to stool at 4 A M, first part of stool hard pit of stomach; in small of back, extending into rec- and lumpy, last part running out as thin as milk, with tum, on side, in small of back, when sitting, with pain in hypogastrium, straining, nausea and faintness, throbbing; in palms. In flushes in head; in face; pain continued fifteen minutes, then copious watery in hands and feet; up spine, in a warm room.

Swest, at night; towards morning; on waking gastruum and desire for stool, stool of bile, mucus and after midnight. Easy on waking, E and profuse yellow matter, with tensemus, then cutting in howels, Sour; at night. Clammy, with blue spots on skin, < along spine; C. and cold, as in cholera. On face, on to set down and causing faintness, stool of yellow faced man-neck. Cold on forchead; on arms and legs, with heat ter, mucus and blood, with tensemies, then cutting in hypopreceded and followed by cutting in hypogastrium, at 12 ing, with tired feeling. Internal oppression towards M stool of bilious matter, mucus and blood, with same evening. symptoms as last, then dull distress in hypochonbilious matter, mucus streaked with blood, and tensemus, then intermittent cutting in hypogastrium all afternoon and evening

Climical.—It has been prescribed in ascites, both from cardia, trouble and especially from henatic disease

Rectum .- Clinical. Hemorrhoid, sharp sticking in rectum, consupation, etc. Hamorrhoids, bleeding almost mo cally with sensation of sharp sticks in rectum, general aggravation late at night

Stool.—Light-colored, lumpy, with straining, then aching in anus and hypogastrium Papescent at 7 p m., preceded by pain in small intestines Mushy at 8 A M, then no stool for three days Constipation for two days, with languor Omitted In form of balls.

Clinical.-Most obstinate constipation, with protruding

Urine.—High-colored and scanty Urinated several times

Genital Organs.—Climical. Dysmenorrhos, with hamor-rhould trouble; membranous dysmenorrhos. Prursus of vulva and prolapsus uter, hamorrhoud, constipation, etc. In all these pelvic troubles Collissonas remards us of Aloss, though obstanate constipation is the rule with Coll, looseness of the bowle with Aloes Pruritus during pregnancy, swelling and dark redness of genitals, cannot even sit down

Lung.—Gurgling suddenly low down in 1 while (Bry.). lying, then desire to cough, which was restrained as he had had hamoptysis from that side, the breathing and pulse varying while lying on l. side, the pulse under the finger would withdraw and then return with increased volume.

## Colocynthis.

A tracture is made of the dried fruit (deprived of its rind and seed) of Cucumis colocynthis, L. (Citrullus colo, Shrader).

General Action.-A violent hydragogue cathartic. producing also terrible colic It also causes violent lid pains in nearly all the nerves of the body, almost always relieved by pressure

Allies.—Bry., Magnesia, Cupr, Diosc, Berb., Puls Generalities.—Increased secretion of mucus clination to painful cramp in muscles of all parts (Cupr) other, wandering P < sitting. Paroxysmal pressure and ciput and temples, with pain in eyeballs drawing in posterior joint of r. great toe, in ankles, Heaviness Dulness in morning, < in frontal re-knees and bones of l. pelvis, < walking Drawing gion, returning in forenoon when walking; D, with

Colocynthia

Sensitiveness to damp weather. Pulsation in whole drium, then at 2 P M. cutting in hypogastrium, with stool of body, < in back and l. side of chest; in whole body when lying still. Discomfort in evening, < in lower limbs, with weakness; D, he demands much. Uneasiness in afternoon, < digestive organs. gloomy, listless, almost pusillanimous. Weakness: in afternoon; at 5 PM, with shivering, thirst and rapid pulse; in evening, in evening before sleep and waking next morning, > moving about; in evening when walking; on going out, when at rest; from slight exertion in walking, with sweat which made his limbs weak, but if he stood still the air, though not raw, struck through him like a cold creeping; from watery diarrhosa, with pallor; general W, with brussed sensation in small of back. Faintness , > holding hands before eyes; with external coldness

Some pains appear only when walking, for example, the painful drawing in muscles of calves and thighs, preventing motion Symptoms appear in groups, < evening and rest Aggravation when sitting; symptoms more severe in evening than in morning. Amelioration when sitting; when walking, but symptoms are always felt in evening after considerable exertion and are connected with weariness in lower limbs; A. from black coffee after dinner.

Climical.—It is a valuable neuralgic remedy, not simply for colic but for neuralgic pains in various parts of the body, the pains are usually sharp cutting or boring, nearly always > pressure

Mind .-- He could not find his way about the room and it was difficult to get rid of the idea that he was not in his own room Anxiety Disinchination to talk.

Morose, offended at everything. Irritable; he asks for
many things Impatient Despondent Absentminded Confused by the beer drunk in the evening. Could not pursue any train of thought Not inclined to search after and grasp objects of interest. Indolent in morning, woke late and disliked to get up Memory weak

Head.—Tearing digging through brain, < moving upper Tearing in brain, < moving lids, becoming a pressure outward in forehead Aching; in morning in bed, daily from 8 AM till afternoon, with pains in knees and foot, then soft stool, in evening, < bending forward, with pain in eyes (Bry), < stooping or turning head, < forehead, with incapacity for mental Spanis Steing in various parts; with drawings, exertion < after beer; as from a draught of sir, > tiching, burning, burning, burning, burning, burning, burning, burning, burning, burning, burning bu m different parts, < posterior joint of r middle finger laris Tearing drawing-pressing in different parts, and r'great toe Anguish Pains frequently repeated especially boring behind r car and on r side of head. Pains jump from one part to another Drawing when walking, with boring. Sensitiveness as (Puls), and change quickly from one kind to an-if compressed, < bending forward, > open air, < sin-

pain on outside of r thigh, with pain in l. upper molars vertigo and colic Stupefied feeling after dinner. Drawing in posterior joint of I. thumb, r great toe, in Confusion; in afternoon, with pressure in orbits; after r. knee and on l. side of neck, < turning head; eating, < dinner, > towards evening; with dulness in I trochanter in forenoon, then drawing pressing in a safer a debauch; with heaviness and feeling as if a quetatrave, then drawing in teeth, after rising, catarrh were coming on. Intoxicated feeling after a quetkly changing its location, in legs, ankles, shoul-bottle of Bavarian beer. Vertiege; in evening; when ders, torehead, muscles of thighs, in wrists and walking rapidly after breakfast; suddenly in evening knees; sticking, now here, now there, in morning on sitting down, with darkness before eyes; intimations after waking. Sensation of general contusion, < walk- of V. and nausea; almost giddy after dinner.

Forehead .- Sudden sticking towards nose; sticking | ering before r. eye in the shape of a circle, with rays, externally in morning after rising; S. above r eye, at 10 AM, after writing A bright white light at side with itching of scalp Tauring, r side, l side; in of and below r eye, > turning eyes rapidly sideways.

eyening; in different parts in morning. Boring; r.

Clinical.—It has been found useful as a pallistive of the side, r. side, with drawing, l. side, above nose; in day and evening, with tearing; tearing, during a walk, B., pressure and above eyes, with pressure. Boring-burning pain on r. side Pain, in l. side; in nervus frontalis sinister; and in eyeballs; in forenoon when walking, < stooping and lying on back; along sagittal suture. < moving or shaking head and on stooping, at 1 PM in the arch which defines the lateral and superior boundaries of 1 sinus, sometimes vibrating; and at root of nose, as before catarrh, throbbing P, > sitting up and moving head, but confusion of head all the forenoon Drawing pain, in l. side Drawing, in r Heuriness in sinciput, with stupefaction; H. in forehead towards evening, with pressure; in I side on waking after midnight, while lying on r side Confusion, r side, in sinciput.

Temples -Boring sticking in r, > touch Tearing, in r , in r. and above it : in r , with pressure Boring . in r, in 1 at 2 PM, in 1 as from a plug, in evening Digging in l. Screwing Pain, early, in l in afternoon, > sitting, < standing and walking, but especially when urmating, in r, < stepping, with gloomy mood first <, then > open air, tensive, in r Pressing and drawing pain in r Pressing in I, with throbbing, becoming cutting, with similar sensation about I shoulderpoint: P. towards nose, with dryness of latter Vertigo on suddenly turning head, as if arising in 1 temple, it seems as if he would fall, with tottering of knees

Pinching in upper part of brain Tearing in r side of vertex. Pain in vertex and l. eye, as of a nervous pressure Tearing in 1 side of head, towards forehead Boring in different parts of r side One-sided drawing pain Confusion of L side, with pressing burning pain in l'orbit, temple, nose, dorsum of nose and upper tecth. it seems as if eye and nose were swelling; C in r side, lateral occipital protuberances; in occiput, < inferior lateral protuberances, with tension Boring in skull, < r side Roots of hair painful Burning pain in skin above eyes. Drawing in scalp Vertex sore as if the hair were pulled upward, > towards evening; with drawing pain in occiput Itching, on 1 side, with crawling Biting burning on 1 side of scalp

Climical,-Violent neuralgic headaches, cutting or boring, > firm pressure

Eyes .- Smarting, with parn in balls Dryness in evening. Sticking as with knives in r ball, extending to root of nose Cutting in a ball Pain in balls, < stooping; P. in ball, extending upward and outward, in evening, < rubbing, with hardness, as from a pressure downward upon balls. Burning pain in r ball. Itching of r ball. Sticking in I conjunctive palpebralid during rest. Smarting of lids. Pressing in r lid nauseous T, more in throat than in mouth Burning of r. upper lid , sticking, on edge of l upper

Clinical.—It has been found useful as a pallistive of the pain of glaucoma and iritis, the pain extending into head, >

Ears.-Itching sticking extending from Eustachian tube to tympanum. > boring in with finger Cutting sticking in lower fossa of r external. > boring in with finger Boring in r ; behind r. Twinges in r Pressure behind 1. Drawing above r, behind l painful behind l Crawling within, > boring in with the finger. Obstruction before l Ringing, in r Roaring, < l, with throbbing; R, with every sound, rhythmical, in 1, with obstruction, the R changing to ringing

Nose .- Throbbing burrowing from 1 side to root Feeling as in incipient catarrh Itching in 1 nostril in evening, with irritation as in corvea. Sneezing. with dryness of nose Fluent coruza; in morning, with frequent sneezing, (constant dropping from nose, < in open air)

Face -Twitching of muscles of chin during rest of the parts Muscles relaxed and pale, and eyes sunken. Tearing in cheeks Construction in I malar-bone, extending unto l'eye, with pressing Pain in l cheek, r. malar-bone and eye Burrowing burning pain in cheek, < rest Painful drawing Tension in 1 side, extending to ear and into head, with tearing Prickling as if an eruption would appear in region of r check-bone Sticking in upper jaw Boring in r lower jaw, in lower at 10 AM, in r joint in evening Drawing in lower jaw. Pustule on 1 corner of mouth (Bleeding of a liversnot on upper lip) Burning of under lip, with swollen feeling Burning pain in r corner of mouth

('linical.—Facial neuralgıs about eye, < l side, great soreness and yet relief from pressure (Magnesia m)

Mouth. - Painful looseness of a lower incisor Toothache in r teeth, l, all upper, a hollow tooth; upper hollow, in lower teeth as if nerves were torn or stretched, twitching from 1 lower molars to 1 elbow, sticking throbbing, in r lower back teeth, as from beating with a wire Drawing toothache in lower incisors, in all teeth in afternoon, D, with tearing, in r upper teeth, with swellen feeling in upper lip Incisors sensitive Teeth feel as if on edge in evening and next day Heat in roots of r. lower teeth, with swollen feeling

Tongue red . coated white, with rawness as from too much smoking, rough as if sandy, sticking in tip when sitting, scalded sensation Burning on anterior surface of tongue; on tip of T, on apex at the beginning of every exacerbation of symptoms Biting in middle of tip as if sore Border of tongue sensitive when eating Scraping in palate Biting in r cheek and on side of tongue Burning, < hard palate. Salivation Taste bitter, after drinking beer, to beer rum, then inflammation, then ulceration Twitching at noon, and disgusting, T metallic, astringent, on of r upper. Stye on l. Burning cutting in r lower upper part of tip of tongue, insipid T after dinner;

Throat -- Constant hawking, H up of salt mucus; lid, bitting, beneath upper hid, prickling, in r inner of bitter mucus. Angina Stucking as from a bristle canthus. L lid lay thick and heavy upon ball, which on upper part of arch of palate; biting S in fauces, felt squeezed anteriorly and superiorly. Heaviness of > swallowing Scraping, and on hard palate, with lids without sleepiness. Sticking in 1 orbit, with draw-burning; in region of uvula, with redness of whole ing and aching. Pressing in orbits towards root of throat and difficult swallowing Pain. Rawness. nose. Vision obscured, of r. eye in morning Flick- Roughness, in pharynx and soft palate, > afternoon. had to swallow over a lump Sensation of a ball as lence, with tension lade to swallow over a lump of enseaton of a base sence, what tensors large as a first using in pharynx, with oppressed sensation Dryness, and of hard palate, as if the part of the state of the state

cating, with nausea

winter, nowly include activations. Linking traction between motion that round goods, washing a monthly thous, in morning, on rising up; with burning in with tenesmus, then normal stool. the G > black pharyax, causing pulpitation and spass in throat, coffee, but returning in forence with rumbling and with desire to retak and voint Hiccough Nauseac, incoment, ending above money veners. towards noon, after eating, with malaise, as from in-after moving about in forenoon, > towards noon, G. < digestion, till sleep at night, returning in morning on after dinner, with boring, obliging him to sit down or he waking, with scraping in throat, the N > a glass of and bend forward, tenesmus, copious, pappy, offensive water, rising from stomach serous fluid, V of food without nausea, profuse V

> eructations, C at night, rising along resophagus proper food into throat

gastrium Coldness Dyspepsia

Abdomen.—Distention and pain (Magnes c), to-mal, obliging him to bend forward, > soft stool wards noon, when walking, after supper, with heaviner, > after stool, with movements in hypogastrium; noisy, after copious diarrhoea in morning, noisy, when walking, causing rectum to Upper Abdomen.—Flatulent distention, > emission vibrate, long, rapid and smooth discharges of bubbles of flatus, with pulsation in small of back. Rumbling

with burning Sensation of a foreign body, as if he profuse discharge Incarcerated flatus (Diosc.). Flatu-

Stomach.—Cunme hunger, especially for bread and towards public region, so severe below navel that facial beer, then heartburn in throat; at noon Appetite muscles were distorted and eyes drawn together; as if diminished, at noon, for dinner Appetite lost, in squeezed between stones, and threatened to burst outward, evening Aversion to food towards evening before at times with rush of blood to head and face and sweat Thust, unquenchable Desire on them, which on relief of pain seemed blown upon to drink without thirst, the mouth is watery, drink by a cool wind, threatening of P., < forenoon, with 18 relished, but there is a flat taste after every drink insipidity Griping; < below navel, obliging him to Eructations, on rising from stool, mostly empty, been over, y-appy stool, «walking; » then stool, volent, violent after eating, sobbing; sour, bitter; with discharge of fatus upward and downward; so that of the breakfast, of bilious substances, of a bitter, he could not be nor at, and could only ask born over, > white, frothy liquid after breakfast. Empty eructar volent motion and rolling about; waking in morning, Vomiting of a yellow, bitter, stools, then watery, scanty and almost inodorous stools, the colic > black coffee at 4 PM, < supper, then with Rumbling Griping in epigastric region after every confusion of head and ailing in sinceput, < bending meal, < towards evening, G in E region, with more forward Cutting; in afternoon, > evening in warmth ments, then soft stool, paroxysmal G in stumach from of bed, with tenesmus, after eating; after dinner and beer (after 11 AM), > dinner Pinching in pit, pre- supper; from flatus which cannot be passed, with venting sleep, with constriction of stomach, and sensitiveness sticking, waking him , like an electric shock through whole of S so that it could bear no covering, P in epigastric A to anus, towards noon Cramplike pain, preventing region Intermittent compression in epigastrium, chunging sitting quietly, lying or walking, with empty urging to pinching, with confusion of sinciput Cramp at night, after eating Pain as from taking cold or from im-

Pain; in morning on waking, with tenesmus, at Pain, in pit, 1 epigastrium, after dinner, in epi-noon and evening after eating, in evening, with heat gastric region, < eating, with hunger, which was not in stomach, the pain > 9 r m by diarrhea, at night; repeated eating, with flatulence and headache, at night, with discharge of flatus, when walking a few with headache and diarrhora, always with pains in steps, when walking at noon, > standing still, after tace and teeth, in pit, with constriction in larynx, eating a potato, with sudden stool, when lying, with obliging frequent swallowing, in pit, with sticking, rumbling, urging to stool and general shivering, beobliging rapid breathing, it seems as if the lungs fore and during a light-yellow, fluid stool, in integucould not be sufficiently inflated, burning, even when ments, < walking, > diarrhea, diarrhea, with eating, spasmodic, rising into throat, in morning, con- uneasiness, > a cup of coffee, but then he must go to tractive, in pit at 10 PM, during a walk after supper stool, > by smoking, which left a sensation in abdo-Pressure as from a stone Sore feeling in pit Full men as if he had taken cold, with urging to stool, which feeling in epigastric region in forenoon. Sensation of a was subject to control, with feeling of guawing diarball in S and pharynx Emptiness Heat, in epi-rhoca; with general uncasiness, and shivering in cheeks, which seems to rise from abdomen , paroxys-

Flatulent pain after midnight from sudden incarcerness, with tension and sensitiveness to touch, the ated flatus here and there Bruised pain combined pain by two watery stools, D., with tension Col-with pressure Tensive pain, > pressure, T. pain as lapsed. Cooking as of frogs Rumbling; early in bed, if intestines were gathered into a ball, had fallen down towards 9 A W , in forenoon, with griping , after din- and were lying like a heavy weight in hypogastrium, ner, with deep-scated pulsations, with excitement as it seems as if the anterior parieties of A were wanting before charring a, but discharge of only fetid flatus, as and the intestines were in danger of falling out. from bursting of bubbles. Gurgling, then light-yel- Pressure outward in r side Sensitioness, in afterlow, fluid stool Movements, towards noon, then two noon, with griping and commotion, with constipation. brown, almost unterry, pamless stools, in evening, then Construction of viscera, > pressure (Magnes, m.) Heat, rising towards ing, < rescal region, > then stool, in afternoon, as if he had chest, pleasant warmth ending in griping, > walking, fasted, in various parts as from the breaking of bub- with sweat on chest and abdomen Emptiness. < eatbles Duscharge of flatus, offensive; offensive after den- ing, stooping forward when sitting and in evening; as

of modorous gas, ineffectual desire to pass flatus, then in I. hypochondriac and umbilical regions, with cut-

sacrum; in hepatic region, causing a restless might; bling and inflated sensation, going off with a statch beneath last ribs. Cutting; on inspiration, as from towards I public region, G in I groin Boring in I. flatulence. Griping; with two pappy stools Pinch-groin close to pelvie bones Pain after dinner, > dising after taking anything, < towards evening Sud-charge of fetid flatus and a stool; P. in public region; den thrust forward through hepatic region and then in in grown as if a herma would protrude and on pressure pain a straight line through head. Pain towards noon after as if a hernia were going inward, in afternoon. Bruised violent exercise; P rose towards chest and became pain, < walking and sitting bent over. Constriction constrictive, < a shock, hawking or the like, in r about pubic region Dragging from both sides to hypochondrium, at arch of diaphragm, oppressing middle of hypogastrium, as from flatus which will not respiration Throbbing in l. hypochondrium, at arch pass, but provokes emission of serum. Drawing pain of diaphragm. Drawing in I hypochondrium

head and temples. Sticking in a spot obliging him to superior spine of thum in evening, changing next day bend up, < lifting, S on r. side beneath navel, then on into drawing, extending from spine of thum to inguinal l. side of navel, only when walking on a level, > stand-region and upper third of inner surface of thigh ing still and even on violent agitation (as in descending stairs); twitching S extending towards loins and spine. Burrowing tearing, < expiration or loud laughter Cutting after eating, with tenesmus. Griping; < eating fruit, < stool, with cutting and general chill; < dinner, < pressure, with sensitiveness of abdominal integuments; with discharge of flatus, below navel, (drawing hither and thither), changing into cutting as if a chisel were thrust deep into upper abdomen, passing swollen hamorrhoids, when sitting, walking and at en a curve backward ento pelves, then cutting upward stool Tickling after a pappy stool Urging to stool; again, at 4 PM, at 4 30 the cutting in the hypoquistrium with sensation in anus and lower part of rectum as if was forward and upward, < forcible discharge of flutus and weakened by diarrhea, U to a copious, yellowish-brown, by stranning and consequent expulsion of a long train of slip-partly thin, sourish, offensive stool, then transient relief of pery bubbles of wind, with scanty bland mucus, returning at rolic, then two abundant stools in quick succession, first intervals, finally after 5 p m a painful expulsive pressure, puppy, then fluid with ulcerative pain in bouels, > by bend-then envoluntary thin bland stool of feeces and much muchs, and forward, < upright position, midden, then copious, then relief of all pain in abdomen. Pinching; with cut-pappy stool, then graping, coldness in abdomen, sleepi-ting Gnawing, < morning fasting Repeated sonsu-ness and distinction to distinction to distinct study, frequent, which was ton below navel when walking as after taking cold, under control. Indiffected sirging, frequent, then stool with urging to stool as if the sphincter had no resisting power, stools thin, orange-colored and pappy, afterthen free protracted stool, the sphincter standing wide unsatisfactory durrhance, but panness stool Sensation open Acule pann, < walkering. Pan emanating from a free standing wide unsatisfactory durrhance, but panness stool Sensation open Acule pann, < wellering. Pan emanating from a free unsate of participation open from the participation open from the participation of the participation open from the participation of the participation open from the participation of the participation open from the par urine, with the difficulties in the head , in spot below navel, extending after the night-sweat through tum whole abdomen Brused pain in a spot, < walking, > 80 eructations. Constriction; waking at 3 AM, in evening, after dinner. Compression at times, < towards morning, with sensation of a ball, increasing to a twisting or cutting pain Sensitiveness Sense of inflation, after dinner (Mag. c), with compression in throat and

nausea. Bubbling in a spot below navel Lower Abdomen -Gurgling in groin Movements

ting. Sticking in hepatic region; after dinner, and in when walking, < every step. Griping, with rumin both groins, going all around pelvis Tensive pain Umbilical Region -Swelling, with confusion in fore- in r groin, < pressure Tension in region of l unterior

Clinical.—Colic of the most violent character, < hard pressure, sometimes with ansees and vomiting, sometimes with disarbuse, sometimes with disarbuse, sometimes with disarbuse, sometimes with disarbuse, sometimes of gaze, transitions of gaze to an other strend mine chest and pelvis, and may be caused by suppressed perspiration, as from drinking low state when bestel, or it may be brought on by flux of anger; the patient always doubles up with the colic (compare Duce, Magnessa, etc.)

Rectum -Statches Pain in lower part, as from in single stony pieces

Anus.—Hemorrhoids, painful, blind Discharge wards drawing-cutting darting repeatedly from behind of blood, daily, with sticking and burning in small of back forward and upward in a curve to navel, < urg- and in anus Moisture, and at perineum Oozing of ing to stool, which ran out in a watery stream and moisture in afternoon instead of the expected flatus contained undigested soup, the sphincter seemed par-lyzed, then ineffectual urging, which when repressed burning Itching sticking, and in rectum Pressing by voluntary muscles caused tension in lowest abdo- as before stool, but escape of only dissolving mucus, minal parietes and pressure at inferior angle of r | P, > escape of slightest quantity of wind or mucus scapula, with tensive pain extending thence forward, Sensitiveness around A, with frequent urging to an pain and moisture, B and jerking in anus and rec-

Stool -Fluid; after eating, with discharge of flutus, with colic all the afternoon, > warmth of bed, with tenesmus, with griping, then tenesmus, and frequent, frequent, mucous, painless, and slimy, then bihous, at last bloody, and feculent at first, later almost of pure blood, with tenesmus and passage of pieces of mucous membrane, and light yellow in morning, F and dark green at 6 PM, and rapidly discharged after dinnier, > a soft stool Sticking in puber region; after gentle pressure and passage of slippery flatus at in r. flank; in I groin; deep in I groun, in flank; internoon, almost F, frequent, vellowish, semi-fluid, with rupting respiration; single B, now in r., now in I groun, a storm of flatus, their considerable flatus, half apparently connected with ovaries. Cutting, so that watery, half solid Dysentery; with passage of blood. he must wask bent over, with general weakness, with burning pain in sacral region. Thin, frolly, soft-which makes walking difficult, with dread of work; ron-yellow, musty, smiling almost lite form? blotting-paper after dinner, forcing him to a fluid stool, smarting, Daarhoes; after dinner; with tenemus; with nausea replicits, with discharge of much mucus; frequent; yellow, warmth in vagina after dinner, greenish-yellow, with feeling as if he had taken cold Solt, frequent, brown, soft, frequent, Dramenorshoza, with mixed with lumpy faces and flatulency, soft, lightcolored, mixed with hard knots, soft, dark green, soft, slippery, with tensive pressure over forehead, at 11 AM, and again in afternoon, then pressure alternately upon bladder and anus, soft, scanty, viscid, every three days Pappy after dinner, with shivering over head and back, P after eating, then burning at anus, with burning at anus, then intermittent

griping and feeling of having taken cold in umbilical

region, and rumbling in bowels, and frequent, and

trequent, with discharge of flatus, frequent, yellow,

painless, with much mucus, then burning in anus Constipation Hard, only occurring once in two or three dups, H as if he were passing stones, and dark, small (Bry), dark green, and unsatisfactory in morning and after dinner, hard, lumpy, with much flatus Partly dry and knotty, partly diarrheric Consistent, brown, often blackish-brown Bloody Scanty, mixed with mucus, S. slimy, tenacious A second tion, sudden dry, during the day, with aussea and stool after dinner Several small stools Sluggah, retching Dyspinea at mghi, with slow breath, proceuring every other day. Delayed, and afther duar- volung cough. Bleathing range rhour or hard and unsatisfactory.

Clinical.-Darrhors as the result of anger, or from fruit, with colic, the evacuation preceded by the characteristic colic of those as an important indication. Dysontery, bloody and mucous, stools always after eating or drinking, preceded by colic.

Urinary Organs .- Sticking in bladder; alternating with sticking in rectum, > discharge of flatus den pressure upon bladder, which was full, suddenly > rapid expulsion of flatus, which drove before it some mucus, these flutulent attacks often alternated with other symptoms Frequent urging to urinate, with scanty emission; with coprous, clear, watery urine, in forenoon, urging, with pressure in pubic region, ineffectual U Frequent micturition, and copious, of clear, watery urine Urine retained, with painful retraction of testes and

Sticking along urethra. Sticklike tearing through urethra Pain in tip, as if crushed, after urinating Prickling in orifice in urethra after urinating Burning in urethra after urinating, on passage of last drops Urine like brown beer (Bry), becoming turbed as soon as cold, with copious sediment Urine of faint fleshcolor, depositing a light brown, flocky, unequal, translucent sediment, with hard, solid, reddish crystals, adherent to the vessel, the urine passed during the day lighter-colored than towards evening, night and morning Comous, in evening and night, and yellow Scanty, and clear, dark orange-colored, sp gr increased, reaction duminished, epithelium increased, Dark wine-colored, with transparent cloud.

Clinical.-Pains from kidney calculus (comp. Berberis).

from tip of glans towards I. flank Prickling in end (Bry.); S on I side, painful on motion. Frequent erections Painful twinges in r. Back-Sticking Drawing in dorsal mu iles. Stick-

without ability to vomit, then flatulence and weakness; ling of labise during pregnancy, with dragging and

Citatenal.—Suppressed series with the characteristan colic Dynanosches, with volume jain, > had pressure, Oarsta tumor. Cysis in the broad ligament. Many cases of cystic tumors in the ovaries or broad ligament have been cured by Coloc, sepecially if the tumors are round and small, associated with pain the beautiful control of the color of th

Respiratory Organs.-Scraping in a spot in larynx provoking cough. Constriction of larynx, > open air. Sensitiveness of larynx towards evening, with hoarseness. Tickling in larynx, with dry cough; T. in larynx, < night, waking him, with short, dry cough Dryness of air-passages, then fatigue Cough: less frequent during the day and as the articular pains increase; frequent teasing, day and night, hacking, in evening on smoking. Tickling cough at night, and during the day; in evening and night without expectoration, during the day, with choking and vomituri-

Chest. - Whistling in morning on inspiration. Twitching in region of I fifth and sixth ribs: in r intercostal muscles, > becoming erect Sticking in 1 , under l pectoralis, here and there and under ribs. in r in forenoon, in 1 towards evening, cutting short the breath. S on inspiration and pressure on expiration, backward in r in afternoon Griping in r. intercostal muscles Pain in places towards evening, and in hepatic region and over heart, impeding respira-Tensive and pressing pain in both sides where diaphragm is attached Frequent pressure in afternoon, with oppression and with sticking in chest and Pressure in middle of sternum as if something were lying upon lungs Oppression, in evening, before midnight, preventing sleep, after cating, on inspiration, with sticking, of r side on breathing, with sticking, of r. ribs, on arch of diaphragm, arresting breath Constriction, < walking, with sticking, C., then sticking in 1 upper part, < walking Compression on sides, < stooping forward, when sitting and in evening Tension in chest and forehead before a soft and smoothly-passed stool Bruised pain in spots anteriorly. Burning in a spot on r side towards 11 o'clock

Heart and Pulse.-Sticking in cardiac region on going to bed Oppression towards 8 PM Palpitation . when sitting. Pulse rapid and small, slow and full.

Neck .- Tearing in 1 side of name Draining pain in . l. muscles, < motion; D pain in nape even luring rest, acid, "uropham" and uric acid increased, chlorides then painful stiffness of neck, < on moving head; in Deep 1 large muscles, on motion it extends backward and disappears; as if nerves were torn and stretched, or as it bruised, extending from r side across scapulæ. Drawing in nape; D and boring in all inuscles of Sexual Organs - Prepuce always drawn back and neck, on different parts of occupit and of r. side of constructed behind glains at night. Impotence, the head, < evening. Pressure in l. side of napit as in Theu-forcskin drawn behind glains, without aversion. Tear-matism, < turning. Weight, extending towards occiing in glans Prickling sticking like an electric spark pital protuberance. Shiffness of nape on moving head

testicle Drawing pain in I testicle. Desire increased, ing beneath r. scapula on inspiration; tensive, between diminished. Pollution two nights in succession. Swell-scapulæ, < walking, so that he must walk bent over. Drawing pain in region of r. scapula as if nerves and bruised pain Paralytic pressing in l. Swollen senvessels were tense. Drawings in scapulae. Sore pain in sation Pulsation in l Weakness l scapula during rest. Stitches in sacrum, tensive, in r. low on inspiration, < lying on back Periodic cutting ing in 1 Pressing in joints. from region of I kidney to abdomen, spasmodically twitching pain in periostem, in region of insertion drawing thigh up to abdomen so that he must bend of r deltoid, extending through shoulder to upper over Pain in small of back; as after a forced march, teeth and to temples and vertex, then sore pain in and in lower limbs, in region of l sacro-tiac articu- muscular parts of arm on pressure Prickling burnlation, with crawling in whole l. side as if asleep; in ing pain in r on motion Drawing in r., < dinner, sucrum,  $\cdot$  movement; above hips with nausea and  $\cdot$  > walking in open air chillness. Pressing inward in r loin when sitting, Elbon.—Steking in r, and in forearm; itching S with throbbing Brussel pean in small of B and in bend of r during rest Tearing in r, with burning in lower lambs in evening; B pain in sacrum; in lower pain Boring Pressure Drawing in r, 1 Weakpart of back, with pressure in pit of stomach Weari- ness ness in small of B. Heaviness in small of B

bled a hedgehog. Twitching of different parts of Occasional pains in r in morning Drawing pain in muscles Drawing sticking in joints of feet all day, 1, persisting at elbow Tensive pain in r Pressing with pain in extensions of wine and office, with borting in lower limbs, in drawing Stiffness of r, with pain in extensions afternoon upper limbs similarly affected Tearing in Falling asleep of r
joints of arms and legs, < rest, > night Boring in Wrist—Boring. Drawing pain when sitting Pressjoints of arms and uses, tess, uses and ing, and in forearm for the and ing, and in forearm for a with nresume in muscles of himbs. Hand—Starting in r metacorpus at 7 PM, when fingers at 9 PM, with pressing, in muscles of limbs in joints of fingers and feet

Rheumatic pains, and in joints, sometimes in joints, hand and wrist, then in r elbow Stiff feeling sometimes in bones of limbs. Drawing towards even Fingers—Sticking in joints Drawing tearing in ing; D in external condyle of r femur, in elbow, fingers joints of l Drawing pain in ball of r thumb, as if in and in I arm down to finger-points, tearing drawing noon Burning pain in one point in r middle pressing in different joints Pressing drawing pain, a knees, feet and shoulder-joints Bruised feeling, in towards evening and when sitting Heatiness of a genial warmth

· joints of hands, fingers and shoulders

ing pain in long bones during rest, eblow head of humerus sand across wrist, where it seems as if in morning Burning pain in hips and humerus sand across wrist, where it seems as if in morning Burning pain in muscless of r, making periosteum on raising arm Intermittent paralytic dwalking difficult Draweng pains ur r as far as knee;

Upper Arm -Sticking in humer in evening Tear-Throbbing, finally

Forearm -Drawing sticking in periosteum Boring Extremities.—Contraction of all so that he resem- and pressing, and in wrists Crampy pain in I

and buttocks, with burning pain; in finger-joints, writing, hindering opening of the hand and stretching of shoulders, knees, shin-bones and ankles, with draw-fingers, repeated at 8 PM when reading and afterwards ing; drawing B in wrist, fingers, knees and muscles at different times Tearing in joints of l Pain in joints, of thighs, in morning after rising and in evening in palmar joints, cramplike, in palms, so that the Pain in joints, P in 1 little finger about 6 PM, < fingers were difficult to open, < during rest, contowards middle, then in all r toe-joints except those tractive pain in r hand, < until a similar pain of great too; when sitting, in knees, wrists and occurred in malar-bone, the pain in hand then spread thighs. In joints of hands and feet after rising. In over forearm as the facial pain decreased and grew joints of fingers and toes, < during rest, migrating, milder, when the facial pain and colic occurred Drawing in hands and fingers, with pinching; in r

and toes, on motion, . knees, in different parts when a tendon, disappearing at the tip Drawing, in ball walking, in joints, > motion, < fingers and toes, in of thumb Pressure in r. Tensue pain in thumb, all joints < sitting, with pressing, training, in thighs, impeding its motion Bruised pain in r middle, at

Lower Extremities .- Pain till noon and when tired sensation, < towards evening when sitting, < walking, P > drinking beer Boring in joints, <

knees, arms and shoulder-joints when sitting Some Thigh - Cramp on middle of l Drawing twitching in of the joints feel as if compressed by rings Construction of l hip, with throbbing, and in r lom over crest of tion in dorsum and ankle of I foot and in r upper arm thum, towards buttock Sticking in muscles above Disagreeable feeling in all on mental exertion Weak-knees, on inner side of I, from ischiatic tuberosity ness of joints, W in limbs on walking in open air, towards knee, in forenoon when walking, in flesh, with heaviness and trembling of legs, < r, so that with drawing; in region of r hip, suddenly appearing sweat broke out over the whole body; from diffusion and disappearing when walking, > sitting, but instead of S there was weight in lumbo-dorsal region, - lying on l Upper Extremities .- Drawing and pressing pain in side, with heat and sensibility of the part, > on rising joints of hands, fingers and shoulders Axillary and southern, when he sticking returned, the pana > night glands swollen and painful. Drawing in l axillary in warmth of bed, but it woke him at 4 A M, when it was muscles extending down arm, with burning, then in throbbing and borne, the trouble lay in the sacral r shoulder. Tearing in shoulders Borng in shoulders point of the plexus der; in r. Pressing in shoulders when sitting Drawing in a shoulders in afternoon Drawing in r major towards the impoint, down posterior part of shoulders in afternoon Drawing in r major towards the impoint, down posterior part of and pain in snoutcers in accretion. Jeaning in this most obea populas (compared fapilitims) shoulder; at night in bod, in r joint, with tearing thigh into fosse populas (compared fapilitims) all day; in shoulders and joints of hands, with Stucking tearing when sitting and standing Boring boring. Tension in r shoulder on waking, < using, in muscles; in apost in muscles of I when stuting, in r hip-joint Pressure in middle of l ; P in muscles; Arm.-Intermittent sticking now here, now there above knees when walking; in muscles when sitting. Pain in l. Sprained pain behind r scapula Draw- Pain in r upper uhen walking, as if psoas muscle uere too D pain in muscles Drawing in inner side of l as far

Knee.—Sticking, in I, in r patella when walking, continuing to walk; in hollow on motion, at last itching S Boring in 1, then r, in r at 6 PM., pain, and in calves Pain, and in ankles, frequent P pain when walking, as it bound Drawing pain, nately in r and l Tension in l on rising from bed, sleep in evening when sitting with stiffness; T in 1 patella in evening, < next day, Toes -Sticking in tips and below nails of 1, in tips ing, > walking, with tearing in 1

around middle of 1, as from a narrow ribbon Ten- r. Stiffness of l. great. sive pain in tibiæ when sitting Drawing, and in ankles, in tibia, in tendo-achillis, in tendo-achillis when sitting, in legs when walking and sitting, in r when sitting, on tibia, < 1, < sitting, and in calves, with burning pressure in l. eye Weakness Asleep.

in its periphery, gradually passing into constriction, preventing sleep at night, then discharge of pusand then the same feeling on dorsum of first joint of r great toe, then under nail of 1 great toe.

Ankle -Sticking, and in dorsum of r foot and in l step, > rest Drawing in r., towards inner malleolus. uneasiness so that the limbs must be moved constantly.

Foot -- Increased in size, so that the boots were too as flink, in I sale of I all the afternoon; in T and small in the instep. Trembling; as from fright, with call, in muscles of T and calves when walking, so shaking chill Sticking along external border of L that flexure of lower limbs was painful; in muscles, sole, itching-boring, in dorsum of r, < during rest, with burning, cramplike, along inside of r at 7 Tearing on dorsa; on dorsum of l; in periostcum of Pu when walking Drawing tension in r. Clucking heel, in r metatarsus, towards great toe-joint in evenin I buttock Stiffness of hip-joint Weariness, < ing, in r. sole, < during rest Sticking cutting in r. secending stairs Gnawing in inner ball of I in evening Cramplike pain on dorsum of r, in scaphoid and internal cuneiform bones, as if in periosteum, with soft, pale, painless, when sitting, with pressing, with drawing Cramp circumscribed swelling like alimphatic tumor, on r edge of tarsus, lasting six months, the same pain in I foot and In r in evening, in l, impeding walking Bruised sometimes in second joint of great toe, without swell-sensation when sitting, and when walking Paralytic ing. Painful pressure on dorsum of r., < 1 side towards great toe, > walking, with falling asleep of r. leg. when sitting, when sitting, with bruised sensation Twitching pain in dorsa towards tibus when walking and general malaise. Drawing and pressing, and in in street. Drawing aching in l Drawing in soles. and general manage. Drawing and presents, and it is street. Drawing the strength of the shins, in I knee as if pinched; intermittent D in Heaviness in morning in bod, ' rising and walking, with 'Falling askep of l, then r., of l, even during rest; tension and empty feeling. D in I popitised space on them stooping in evening, and these, of l, with swellgetting out of bed, as if tendons were too short, in ing and heat, gradually extending to whole leg, with r in torenoon, then in r thigh, D and stiffness alter-itching and tickling, sensation as if I would go to

so that walking was painful, with heat and swelling of r, with boring Tearing under nail of l. great Bor-and pulsation in the swelling Pulsation in 1 pop- ing in r, in ball of great, in joints of r great. Cramp liteal space Wearmess, < sitting; when sitting at pain in r second, extending towards sole, sudden C. 9 A V, extending into legs and ankles Stiffness in I. pain in r great in evening, extending towards sole, when sitting, walking Heaviness of both in even then swelling of whole r foot, < sole, in night and next day, with pain when stepping on it or making Leg - Crump, in muscles near tibia towards morn-ing, < by bending knee Sticking in 1, drawing, on ness alternately in r second toe and both knees. outer side when sitting, itching, in r, even on motion, Sprained pain in I in evening on ascending steps. itching, in r tibia, during rest Tearing in sides Pressure in posterior joint of r great, in evening when of tendo-achillis, in I tibia and ankle, on waking at moving about, P on r great, < during rest; in some, midnight Boring above ankles when sitting; B on im afternoon, and in calves, in posterior joint of L tendo-achillis Pain in the hitherto painless varices, great, as if the boot were too tight, > walking, with Throbbing pain in upper inner part of r when sitting throbbing and with heaviness of feet, < forenoon, and and walking, extending to posterior side of thigh sensation in feet when sitting, < 1, as if falling asleep. towards ischium Bruised sensation Pressing to- Intermittent pain in r second, and in knees Drawgether in r. when sitting Cramplike squeezing ing extending to dorsum of foot and to ankles . D. in

# Clinical.—Sciatica, pain extremely violent, tearing, abooting, boring, < heat, pressure and by flexing leg on abdomen

Skin .- Desquamation over whole body Pimple on sticking D along l tibia into ankle-bones, in evening, 1 cheek, with biting on touch, and after scratching watery oozing, white pimples on face, < between eye Calf—Twittehing in r, > motion Comp in l; C, and ear, on forehead and chin, with twinging, and cotton Stekeng itching, in r Tearmy in la after when stouched bring. Boil on face, then one on as hed, T at times when stung and standing Cut-back, on l. side of neck, with burning pain, and one ting on inner side of 1 during rest Boring pinching on lower angle of 1 scapula; on ulnar side of both in muscles Pressing Drawing when standing, with hands. Ulcers, with itching and burning Vesicle pressing, cramplike D. in r Feeling as if asleep longi- filled with pus on l. upper arm, with red-hot border, tudinally along outer side of r, as if in tract of a nerve, with pain on motion, then with drawing in whole arm. then increased in extent, as if the nerve were swollen the pain sometimes extending to axilla and fingers,

Sticking on calves, on dorsum of hand. Prickling on different parts, with crawling. Crawling on 1 side of chest and abdomen. Itching on various parts; Affile—Checking, and it dorsum of r 100t such many in the creating the continuous points, and great too, tearing, about r inner malleolus. Boring (causing rectlessness, on various spots, c I aide of when walking and stiting, when walking, with draw-independent of the continuous of the continuous of the continuous cont and sleepleesness; (I. of whole body, < chest and ab- | A. Confusion. Heaviness in morning, H., with endomen in morning, as after profuse sweat). Tickling larged feeling. Catarrhal symptoms, with soreness of tiching in 1 gluteal muscles when sitting, tickling I | eyes from 4 or 5 pm. through the evening, and lachryon r. arm, > scratching, on thigh, face, shoulders, ination Symptoms worse near stove and when stoop-

inclination to mental labor, with inclination to he 412 pm, in forehead in afternoon, and on moving down and during sleep uneasiness of limbs, | legs | head sense of fulness, rigidity and lameness of muscles Sleeps on his back, with one hand under the occiput of neck. Heaviness in forehead and eyes and the other arm over the head Sleeplessness, all night, thoughts and plans about his occupation keep PM, and in r orbital bones; in r at 11 30 PM, while him quiet and dispassionate. Restless at night Rest lying on r side, then pain and sense of fulness in r side less sleep, before midnight, with voluptuous dream of face, in r bone, beginning in temporal ridge at 4 and a pollution, during which he awoke, after mid-PM and extending to occiput, with pain in whole night, with vivid, troublesome dreams; with horrible, base of brain on moving head and in mastoideus and exciting dreams; with vivid, senseless dreams, with trapezius muscles; sharp, at 235 PM passing down r. vivid dreams, frequent waking from pain in umbilical temporal ridge and external angular process, then region, interrupted by vivid dreams, sweat every time sharp pain in r supraorbital ridge, close to supraorbital on waking. Frequent waking Interrupted by vivid notch. dreams and frequent calls to unnate Heavy, full of difficult thought. Vivid, anxious D., vivid, with fre- of scalp, mostly in superior l. parietal region quent waking, always on his back. Voluptuous Eyes.—Look dull and glassy, vessels congested, lids dreams, when lying on back, with emissions without red, swollen and inflamed Pain in r at 3 or 4 PM, erections: with intractable erections without emissions, with emissions

Fever.—Chilliness; in whole body, in whole body, then heat Shivering through whole body in morning after rising, with cold hands, heat of face and rest of body, without thirst, S after eating, < upper arms Cold limbs, knees, hands and tips of fingers in morning after rising, with warm face, hands in evening, with warm feet, upper arms in evening Internal coldness, but not external, in knees, m soles. C alternating with heat and intermittent sweat

Heat, < upper part of body; on waking in night, < lower limbs Internal and external In flushes, without thirst, F. < in face, with sweat on forehead In head, in r ear, nape, in 1 foot and along tibia eyes, L < in open air when walking, in skin of calves, < r ; in pin-scratches on fingers, also in face and head

Sweat over whole body towards morning. S at night. general S. on walking, with weakness, over face, and chest, of urmous odor on head, hands, legs and feet, at night

## Comocladia.

A tincture is made of the fresh bark of Comocladia dentata,

General Action.—Almost exactly similar to Rhus tox., Anacardum, Ailanthus and other botanical allies

Generalities.—Swelling of whole body, then redness all over like scarlet fever (Rhus t), afterwards color of nally in r at 1 rm, with fulness Ringing, with skin like a mulatto's Aching in both sides and upper arms, in forenoon, < r side General malaise, fever and headache Weakness in afternoon, with heat and perspiration on face and neck Symptoms < 1. side. Symptoms disappear when moving in open air (Rhus

Mind. - Cheerfulness in morning; in forenoon. Combative, vindictive disposition, with contempt for opponents. (Self-complacent thoughts and contempt base of r antrum of highmore at 10 30 Pm., then at base of l Sensation as if skin were drawn up from for others?)

flanks and on tip of glans penis, with urging to urmate. Img, > open air. Aching in os fronts and nin orbital meg. > Aching in os fronts and nin orbital meg. > open air. Aching in orbital meg.

Temples -- Pain, in r., in r at 1 PM, in r. at 6

Intermittent pain in r side Constriction in sides. dreams. Many and various dreams Dreams full of Sharp pain in occiput, extending down neck Itching

> with feeling as if larger and more protruded than 1; P, < near a store, with lachrymation when stooping, and with soreness of eyeballs, < r , from postenor part of r through head to occipital protuberance, with soreness of eyeball, lachrymation and feeling as if the eye were as large as two eyes, next morning sore feeling in eye Freling heavy, larger, painful, pressing out of head, as from a pressure on top of eyeballs moving them downward and outward (Rhus t) Symptoms < 1 towards and during evening, 8 < r. during the day; < moving head, reading, looking at a lighted candle and bright objects Symptoms > sitting quietly be-fore a wood fire on the hearth Lachrymation from looking at a lighted candle, with increase of pain in

Balls -Intermittent pain from posterior part of both through head to below occupital protuberance, with pressure on superior surface of balls, seeming to move eyes downward and outward Soreness in evening; on legs in morning on waking, greasy, on forehead of r at 6 AM, . moving eye, aching, from 4 or 5 PM. till 10, < evening, by candle-light and by motion, sometimes causing vertigo, and stooping or motion caused flow of tears Feeling worse on moving them Lids—Inflammation of Meibonnan glands of r

upper Statches upward in 1 external canthus about 8 30 рм Itching at r. external canthus, then at lower border of l eye

Clinical.-Ciliary neuralgia from asthenopia and pain from other causes, especially if the eye feels large and protruding

Ears .- Pain extending to lower law Heat intervertigo

Nose -Itching internally and externally over all that part inferior to bridge, until going to sleep at night, momentarily > by rubbing

Face. Swollen, with eyes projecting from their sockets and ability to see only a faint glimmer of light with the L (Rhus t.), S around eyes at 6 A M, much puffed below superior tarsal cartilage in afternoon. Aching at Head .- Aching, stupefying, throbbing; indescribable face and about nose, causing vertigo

tion at 5 10 PM after light exercise in open air, leav-bling of flatus, extending over abdomen, in r side, exing a sense of fulness, then aching in r articulation tending down course of rectus muscle, at 3.40 pm; ending in sharp pain, in r articulation, involving wandering, in r side at 10 p.m. Pains around umbiliending in sharp pain, in r articulation, involving whole r side of head, at 5 22 PM on entering a warm room after a walk in open air

Lins -Dry and chapped, and often bleeding Sensation as of a scabby cruption on median line of lower, close to vertulion border. Corrosive burning on I

side of lower at 10 AM while at rest

1 PM, after dinner, in rupper, at 530 PM, < cold uneasiness and emission of odorless flatus into the socket again, the pain shooting into temple, dons in r at 430 PM

Aching in lower incisors at 3 PM while reading, Scrotum.—Numb tensive passing to r cuspid and bicuspid teeth, A. in lower to inner condule of thigh teeth Swelling of the gum of a carrous tooth. Cutting prepuce, tingling I at might in gum of first l lower molar at 1 PM Aching in gum and root of r middle lower molar (which is hollow at 715 rm, after walking in open air, producing a dry, and loose) till going to sleep at 930 rm, holding r hacking cough, then itching in 1 side of trachea, side of face to the fire, sore, in gum of r upper causing dry, hacking cough "Cough at night in bed, molars at 5 30 PW, while at rest in a warm room

from stomach

scapula, about 11 PM, while lying on 1 side, > lying the pain returning at 7 25 and 9 20 on r side Acrid, rancid sensation at 3 30 PM, while walking in open air

discharge of flatus, in various parts, sometimes while at rest mounting to axilla, in attacks, < r side, and < siteasiness, with pain

Stinging in hypochondrium at 11 a.m. Aching in L.

Jaw -- Aching in ramus of r at 9 A M , in 1 articula-iside at floating ribs at 7 15 A.M; in 1, side and rumcus at 8.30 P M , extending to epigastrium Sore pain extending across umbilious at 930 PM, affecting respiration, with bubbling in abdomen as of wind, and with emission of hot flatus Pain in r ilio-cocal region, coming on like a thrust

Hypogastrium -Bubbling at 6 25 A M , while sitting Mouth - Molar Aching in body of last r lower, at after a walk in open air Pain at night, with gurgling, ar, and in gum, sore pulsating, in body of r upper pain; at 4 30 r m, with emission of flatus, then pain in middle, at 6 30 r m, > holding r side of face to the abdomen, at 6 r m flatulent pain in abdomen, prestore, in ar upper middle (the molar below its car-ceding and during diarrhoa, then weakness and perous), at 12 M and becoming twitching, that is, a spirition on face and neck. Shifting pains at 9 rM in sensation as if the tooth were drawn out of the socket, bed. Throbbing in posterior side of abdome, putting the nerve on the stretch, and suddenly pressed between spleen and kulneys, from twitching of ten-

Stool and Urine .- Stool loose, and urgent, with lasting till 3 r m, < holding cold water in mouth, > | Stool and Urine.—Stool loose, and urgent, with pressure of hand and holding affected side close to aching at anus Stool omitted Urine covered with hot stove, with elongated sensation Loose sensation a pellicle and containing a cloud of mucus suspended in it, next day urine scanty

Scrotum.-Numb tensive pain at 10 PM, extending Itching; when sitting and incisors at 4 30 PM, leaving them sensitive to pressure standing, about noon, and on lower part of penis, exof upper teeth Intermittent aching in bodies of all tending to prostate gland, and on inner surface of

> Respiratory Organs.—Itching in r side of trachea from irritation

Tongue - Dryness at night, and of mouth, like a Chest .- Stitches just below apex of heart, bechip, with burning and swelling of lower lip, which neath sternum, < towards r side, inward in cartilages remains chapped Burning, in forenoon, with red-of sixth and seventh ribs, at 1050 am, while walkness and dryness, especially of anterior part Burnt ing in open air Prickling in costal cartilages of eighth, feeling, and smoother and redder at tip than usual | ninth and tenth r ribs | Aching in anterior wall dur-Throat.—Attacks of inflammation Hawking up of ing the day, in r anterior wall, near axilla, at 3 40 Roughness, with scraping. Difficulty in PM, in r anterior wall at 5 PM, extending through empty deglutition Sense of expansion in esophagus to scapula, at posterior aspect of middle of sternum at 330 Fu while at rest, as of air slowly ascending at 315 FM, in lower third of sternum at 11 PM, while lying on 1 side, in 1 mamma, above nipple, at Stomach.—Appetite for dinner less than usual, no 3 30 P M, while sitting in-doors, sometimes like a throb-A for dinner Eructations, with relief, frequent, at bing sore pain, sometimes as from pressure of the edge 9 A V , of air at 11 AM , of air at 430 PM , of air of a kmfe, > walking and deep inspiration, < expiratasting of the drug at 1015 AM, while at rest, of sour tion, with bruised feeling in ribs beneath when pressed acrid water at 25 p.m.; acrid, producing momentary by the hand, a return of the pain at 5 p.m., after sup-strangulation, at 10 10 A m, after walking in open air per, after leaving the mamma it passes down the side Ilicotogia at 3 p.m., then gaping. Nauses Statches as low as the spleen, at 6 30 a return of the pain in in every direction in pit while lying on 1 side at night Inspiration Pain in epigastrium at 10 pm, as from passing down r side of chest and inner side of r upper flatus Expansive distress in epigastric region, like arm, then to elbow, down forearm and along dorsal sur-heartburn, extending through posterior border of 1 faces of second and third fingers, then pain in 1 carpus,

Sharp pain in upper part, apparently in pleura, at night in bed, on deep inspiration Pulsating raw pain Abdomen.-Flatulence, with noisy eructations and near sternal border of I mamma, seemingly in cartidischarge of flatus Discharge of flatus, with desire lage of fifth rib, at 5 PM Sore aching in anterior for stool, of odorless flatus while walking in open air wall while in bed Sore spot below 1 ribs at 7.30 after breakfast Full feeling, with pain Pain in PM, then worse below r ribs Soreness in I lung. as evening, P · eating, with distention, rumbling and during convaloscence from pneumonia, at 5 30 P M.

Drawing in r anterior wall soon after 3 50 P.M ; at ting in-doors Tensive feeling, as from flatus Un- 1.30 P.M. while writing, and in r arm, passing down arm to elbow. Drawing crampy sensation at outer border of r. mamma, extending to axilla and arm, at 2.30 P.M; in r anterior wall of chest and axilla at horseback. Drawing crampy sensation in muscles of 3 25 P.M., extending to fingers and ending in jerking r at 3 45 PM, then in r elbow. of little finger Feeling of fulness and tightness across lower part of chest and upper part of abdomen, as if arm at 9 30 P.M ; in r. at 3 40 P.M., beginning in belly nothing could move, with swelling, and with difficulty of flexor carpi radialis, extending through arm, with of breathing, the last < morning in bed, > moving sensitiveness of arm to pressure Pulsating pain in about and in open air.

exercise Pulse accelerated every day at 9 AM Arte-

rial excitement at night Back.-Scapula. Pain under lower part of 1 at coccyx Aching in dorsal region at 10 PM , in coccyx elbow while in bed. Pulsating pain in periosteum of l pubic

upper arm at 6 PM, in dorsum of r foot, then in upper arm Crampy aching in r. wrist at 9 45 PM plantar region of r foot, shifting rapidly from place to Hand—Trembling of 1 and of forearm Sudden place.

lying on I side, with aching, then pulsating deep pain region of thumb and index Drawing pain in dorsal in r. gluteal region, just above tuber ischii, scemingly aspect of metacarpal region of r thumb at 3 30 PM in periosteum, then sharp pain above crest of r ilium, Drawing crampy pain in middle of r palm, extending then return of the pain in r gluteal region, then sharp to tips of fingers (not thumb), as if fingers would be pain above crest of l ilium, then drawing and aching drawn towards palm Painful weakness of r, espein r foot, then in anterior muscles of r forearm, then cially the two last fingers are inclined to numbness pulsating, deep pain in r gluteal region, sensitiveness when writing Numbness of 1 at 9 30 pm, with pain to pressure, then drawing and aching in anterior mus- in dorsum of first phalanx of r index, shooting to cles of 1 forearm, drawing in outer side of 1 foot, ex- joint of first and second phalanges of index tending to plantar aspect, as if the foot would cramp. Fingers—Stinging on dorsum of first phalanx of r then drawing and aching in 1 leg, lame aching and second, at 4 15 PM. Pain in palmar surface of last drawing in r. forearm, near elbow, then return of the phalanx of third, at 3 and 7 pm, in r little while readpain near r. tuber ischu, then aching in r leg, then ing Crampy sensation in first phalanges of r, at 3 47 pulsating deep pain in r thigh, at inner border of sartorius muscle.

Upper Extremities .-- Axilla Drawing or cramplike pain in r Heavy drawing pain in 1, extending towards shoulder, with sensation as if shoulder would be drawn towards neck Sudden drawing at 4 15 ring finger, then in first phalanx of r index P.M., while at rest, moving down inner side of arm to elbow, with aching.

Sharp pain through r shoulder to scapula, at 3 08 PM while at rest Trembling of l arm and l shoulder when reclining and supporting body with I hand Aching in muscles of r arm while in bed R arm ischii at 10 AM while standing before a stove more painful, but in 1 more tremulous sensation (and loss of power?) Pain at internal condule of r arm time and while arm is resting on a support drawing 5 PM, with sensitiveness to pressure at inner side of 1 upper arm

P.M.; in muscles of r. at 7 P.M. while riding on teum on pressure)

Sticking in r elbow at 2 45 PM Aching in 1 foreinteresseous tissue of palmar aspect of 1 forearm, near Heart and Pulse.—Palputation in morning on slight wrist, at 430 PM, extending to little finger, where it becomes a drawing crampy pain, then a drawing sensation, extending up forearm from wrist

Numb tensive pain in forearm at 6 P.M. with rheu-3.50 PM; crampy, below r at 9 45 PM, sore, at r at matic stiffness of shoulders and elbows Drawing in 9.50 p.m; sharp broad, from lower angle of r to r forearm at 3.45 pm, extending to metacarpus locality of serrations of serratus magnus muscles, at Numbness of forearm, especially along ulnar nerve to 2 35 rm, then pulsating pain at posterior aspect of end of last two fingers, and pricking when resting on

Carpus -Pain suddenly piercing palmar surface of bone at 3 40 PM, generally > walking, sometimes felt 1 at 9 25 PM, after a walk in open air, traversing dorwhen walking, with sensitiveness to pressure Pul-sum of first and second fingers, becoming a drawing sating pain in 1 sacro-iliac articulation at 2 18 p m, in pain in its progress to metacarpo-phalangeal joints of r at 3 05 p m, leaving a lameness, which is felt when those fingers, then involving all the r metacarpo-phawalking Intermittent pressing-outward pain at I langeal joints, drawing the fingers closer together and sacro-iliac articulation at 3 20 PM, walking, with the thumb towards the palm, and the whole hand is sensitiveness to pressure, then lameness and soreness numb, looks and feels swollen, with heat in it, the Extremities.—Aching in r. ankle at 11 30 PM, then drawing > continued motion Drawing pain through in r forearm, then deep pulsating pain in r gluteal re-gion near tuber ischii Drawing in muscles of r sensation in 1 at 6 rm, then in antenor muscles of r

dancing pain in r metacarpus at 1 30 PM while writ-Drawing in upper part of r forcarm at 11 PM, while ing, ending in lane aching and drawing in metacarpal

> PM, increasing to aching, > motion of fingers, drawing () sensation in first phalanx of r ring, and sensation as if the finger would be flexed on palm, this drawing seemed to move towards metacarpo-phalangeal joint, appearing next day in first phalanx of r

Lower Extremities.—Twitching of tendons of r buttock at 8 30 PM Aching in outer hamstring of r leg in afternoon, with drawing, A in upper and posterior part of 1 thigh at 2 35 PM while writing; along outer side of r thigh at 3 27 PM, while at rest, near r tuber

Pulsating pain in neck of r femur, in capsular ligament, at 4 10 p. v. > walking, returning during rest; at 4 30 P.M, while standing in open air, at the same pulsating P in gluteal region, near r. tuber ischin, at deep pain in posterior and upper part of thigh at 4 50 Upper Arm .- Pain extending from a little above PM, at mner border of r. ilio-femoral ligament, at 1 elbow down posterior part of arm, dorsum of hand, to PM., > walking. Lame aching at inner side, just above ends of fingers, > exercising arm, with numbness of r. knec, at 9.50 r M., then wiry or threadlike pain in r arm while holding anything with hand Lame pain instep. (Tensive pain in anterior and lower part of in r. at 2.30 p.m., while at rest. Drawing in r at 7.15 thighs at 8 p.m., < r, with bruised feeling in periosspace, then smarting as if burnt Intermittent press-ing-outward pain in r at 12 30 Am, in bed, > motion. and scaly Inflammation of the part, with deep, Lame pain in r at 3 PM Crampy aching in l at 9 20 hard-edged ulcers, which discharge a thick, fetid, PM, while sitting in a warm room, not > motion Drawing pain in r at 350 PM, extending into anterior muscles of thigh

Leg -- Aching in r at 12 M , above r ankle at 9 P M , while sitting, > walking, returning on sitting down, at r eyebrow, on face, on face, most about mouth, interinitient, in r tibin at 9 rm. Pulsating pain in on abdomen, on scrotum, on extremities, on dorsum head of r tibia at 3.20 rm., > motion, in head of r to of 1 hand, on l. scapula and inner side of thighs; on tibia at 5 30 PM, while at rest, with sensitiveness of upper part of calves; on various parts of lower extibia to pressure, pulsating, near upper and outer side i temities in forepart of day, and in evening; below r. of r fibula at 6 30 pm, then in r thigh Numb achielbow at 7.30 pm, > rubbing, with sensation as if it ing passing down outer side of r to foot at 250 PM., would return if I ceased rubbing; of palm, > getting then aching and drawing in outer hamstring Crampy lameness in r leg, just above instep, at 3 30 PM, while side of 1 thigh at 10 AM, then above r. eye, then on the leg is resting on a table, > walking, then while at scalp, at 10 15 at inner border of 1 gastrochemius, > rest drawing crampy sensation in hollow of r foot, passing up outer ankle and along outer border of gastrochemius muscle to knee. > walking, returning while downward from r commissure of mouth, then I. on sitting with feet resting on floor, passing slowly from outer ankle to knee, then in tibia, where it becomes a numb aching, then in tarsus, where it causes drawing aching, as if foot would cramp, > continued motion

Ankle -Pain passing upward over 1 inner, at 430 PM, while at rest in a warm room Sudden lameness in 1 at 830 AM, while walking in open air, with loss

Foot -Threadlike pain below r outer ankle at 4 30 Pu, ending in aching Drawing crainpy sensation at dorsum of r, in region of external cuneiform bone, at 545 PM (while at rest in a warm room, the air being moist), spreading outward and over cuboid bone and over metatarsal bone of little toe, then moving to region of anterior ligament, where it becomes a bruised aching, extending to external malleolus, sometimes up tibia and fibula, causing a full feeling in those bones, with lameness when walking, next day at 3 PM, while at rest, return of the aching in r ankle

while at rest, then sensation as of warm air, like an aura, ascending half way to knee, the numbness and drawing then concentrated at instep, and again the aura ascended slowly to knee, at same time aching in tibia and fibula, with heat and fulness in leg, then the numb drawing moved over dorsum of foot to toes, where it ended in prickling, > motion, returning when motion ceased

Toes-Sticking in metatarsal joint of great, at plantar aspect Drawing in r great, at 6 PM, as if it would cramp

Skin.—Pale redness on lower part of r hypochondrium, down to crest of r ilium, and extending twothirds across abdomen, with papilla, next morning sumlar appearance (though less marked) on 1 side. Red and white streaks (the former broader) on back and r half of abdomen, outer part of r thigh, and as high as scapula, at 9 PM, the redness > pressure, but returning immediately Burning eruptions occagionally

Pimples (some of them white at apex) on back back; red, hard, on 1 side of sacrum, with pain on sation as of a pimple over r antrum. Burning on touch, round, dull, red, on r scapula, anterior and face and arms, especially about eyes, warmth with pain-

Knee-Stitches in every direction in l. popliteal but more numerous on 1, and on outer and upper purulent, greenish-vellow matter, the parts becoming in appearance similar to raw, decayed meat, while the surrounding skin is covered with shining scales

Itching on various parts, in afternoon; in evening; up and moving around, with warmth in it; on inner rubbing, then tingling I on r. side of upper lip, then crawling itching on r malar region, then I, moving palmar aspect of r. carpus, moving towards palm, then on r angle of law.

Stinging itching on r scapula at 2 45 PM, between metacarpal bones of r thumb and index at 3 30 P.M. and itching on lower part of l. scapula, with sensation as if there were pumples there, then on r. scapula. Biting-corrosive itching on r forearm, over belly of palmars longus muscle at 11 40 A M, then itching near r angle of jaw, then itching on posterior aspect of r forearm, then on dorsal aspect of first phalanx of r index Burning itching on whole body, on r ear and surrounding tissue, extending into whiskers Itching of nose, burning in open air, < in warm Burning tingling itching on lower extremities

Tingling itching on lower part of sternum, then on whole chest; on ankle, along lower extremities, changing its position, > scratching, on various parts, mostly extremities. < the longer it lasts. > rubbing, scratching, in open air and on motion, < warmth and rest, in Instep—Pain in r.; crampy, in r. at 12 30 a m., forepart of the day worse on upper extremities, in the motion Numb drawing in 1, extending to knee, after part worse on lower extremities; on 1 side of scrotum at 8 PM, while sitting, shifting to inner side and lower half of 1 thigh, then on inner side below knee, then on upper extremities, the I first, then on r lower extremity, the itching changing places rapidly, > rubbing or scratching, < warmth and rest, for the most part proceeding from above downward, especially on lower limbs, and generally of a tingling character.

#### Clinical.-In ervsipelss of face.

Sleep.-Night restless till 2 A M., no sleep, with heat of hands and head, full, heavy and accelerated pulse, cold feet and hands Dreamy and refreshing, seeming more like a clairvoyant state, after midnight dream of birds singing, which woke me and caused me to listen. Light, dreamy and refreshing, after midnight dream of entering a beautiful garden, from which I passed into a low woodland, if the eastern border of which was a sluggish, broad, shallow stream of water, and to cross dryshod required some exercise of mind.

Fever.-Heat, over superior maxillary bone at 10 part of neck, shoulders, scapula and lower down on A.M., while at rest, with sense of fulness, and with sense upper half of 1 forearm, in same region of r. arm, ful weakness, extending from shoulders to hands, and remaining there, more in palm and wrist, afterwards | ing m open air, and affected by the air; with desire tips. < r., with aching.

### Conjum.

A tincture is made of the entire fresh plant of Conium macu-

General Action.-It produces paralysis of voluntary motion, then of respiration The brain is benumbed. vertigo, dilated pupils, and even convulsions follow

Allies.-Phos., Gels., Lyc., Hyosc., Curare, Arg nit Generalities.—Concealed caries, especially in middle of long bones, with burning gnawing Haste in all his actions Clumsy movements Walking about as his actions Cumps movements we making above so if half asleep Lay as one intoxicated, could not speak nor raise himself. Tembing (Gols), < of arms, switch throbbing motion of whole body Starting at most speak nor lawys paneful Useful for wesk-with throbbing motion of whole body Starting at most speak against the desease. Paralytic above of overy sound, jerklike S, as in fright Constant toss-over sound, jerklike S, as in fright Constant toss-over the second of (Hyosc.). Convulsions; with danger of suffication, contractions of other muscles, < extensors of back and flexors of limbs, with motion of thumb and index as if unwinding a skein of thread Epilepsy, distorform attack, with contraction of all muscles Hyster-

ical attack, with spasmodic motions

through various parts; wandering, in arms, legs and teeth Cutting around glands Paroxysm, < after ing in region of kidneys Cramplike pain in various parts, chest, laws, etc Pain in affected parts became intolerable Pain in a place injured several years Bruised sensation Contractive sensation in inner parts, with salivation Fulness in chest, head and hypochondria, mornings on waking Easily overstrained Liability to take cold; even in the room when sitting after a walk, during which he had perspired. Uneasiness, of blood in the whole body Pulsation in whole body Feeling as if the whole body were inclined to the right

Disinclination to work Standing is very irksity to lie down Weakness, morning and evening; stant mirth humor, sleavings in bed, and sickness, with ill Apathy. Disnicination for business humor, sleavings and pain in stomach, on waking Inability to sustain mental effort (Phos, Op.) Signature. humor, sleepiness and pain in stomach, on waking over eyes and giddeness, after a walk, with paralyzed hension and desire to be alone. Loss of memory (Anac

pain in r hand grows severe and extends to elbow, > to lie down; with chilliness, palpitation and head-getting up and moving around. Burning in finger-ache, with chilliness, so that he must be down, next day occuput felt as if pierced by a knife at every beat of the pulse, and palpitation, heart throbbing violently at times, at times beating rapidly, at times wavering, of head and whole body, with loss of appetite; tremulous weakness after stool (Arg n... Ars ), > open air. Funtness Heaviness, in afternoon, with unsteadiness Dulness of all senses Stiffness, movement of limbs, neck, etc., caused unpleasant sensation Paralysis, of all muscles (Gels), those of deglutation being the first, and those of respiration the last to fail Aggravation at night, waking him; A. during rest, when sitting, in the house Amelioration at night

Mind -Delirium, running wildly about the house, with uneasmess and wild fancies, of upper part of knocking against the walls, during which he at first body, with paralysis of lower limbs, of facial muscles, took to walking about, with studidity, they threw so that there was a frightful expression, with frequent themselves into the water, thinking they were geese, and partly paralytic, with much pain, violent, interrupted by crying out from pain, mirthful, going as if unwinding a skein of thread Epilepsy, distor-out of the house, intermittent, in a man who had tion of eyes, flow of blood from ears, jaws could not been somewhat addicted to the use of liquors, he saw be opened, meffectual retching, singultus Epilepti- all sorts of animals dancing upon the bed and "picked straws," partly dehrious and partly foolish. Fantasies in morning Illusion at night that some Sticking in whole body, in swollen glands, now in one had come in at the door Vision of her brother cardiac region, now in hands, head and legs, with and child who had died, she saw persons in the tearings, smarting S about swollen glands, tearing room, she knew that it was an illusion and tried to now here, now there, as if to the bones Tearings get it out of her mind, but saw them coming in at the

Superstitious Aversion to being near people and to eating, beginning with yawning, sticking in sternum the tulk of those passing him, inclination to seize hold of and pressure in pit of stomach, even on touch, and abuse them Dread of the approach of men, yet whence it extended to the back and became a stick-dread of being alone Everything makes an unpleasant sensation upon him Fretfulness, in morning after eating, with confusion in forehead and anxiety: every day from 5 to 6 PM, as if a great guilt weighed upon him, with paralyzed feeling in all limbs and indifference; time passes too slowly Discontent Easily aroused to anger Anxiety; with palpitation and nosebleed; impelling them from place to place, waking at night, then long wakefulness Fear, at night after waking; after midnight when half awake, of thieves Sadness, without speaking Hypochondriac and indifferent mood when walking in open air Lachrymose mood: when alone in the house, on giving way to it some Every step was irksome on returning from a it changed to hiccough, then flickering before eyes walk, with ill humor and impatience for the time and indistinct vision, so that she must steady herself when he could rest in solitude Nervous prostra- in walking, then exhaustion of limbs and headache; tion Relaxation of muscles and limbs, then difficulty in and faint-hearted, and smiling Frequent thoughts walking and inability to control movements, necessor of death Hurried mood Lively excitement Con-Tendency to laugh, with loss of energy; morning on waking, > rising, morning after wak- tendency to laugh as if coming from r hypochondrium ing, as after a fever; morning fasting, with aver- and stomach, during exhaustion Without sympathy.

from midday nap; after eating; on walking (Ars., pefaction, difficulty in understanding what he is reading. Phos.), with tendency to fall forward on knees, heaviness Mistakes in speaking. Sunk in deep thought, approfeeling and fretful, hypochondriac mood; from walk- Hyosc.); after waking from midnight sleep. Coma

at beginning of general paralysis, or collapse, or a con- | then in occiput, with heat in occiput, then in forehead dition between come and collapse, with foam from and cheeks Drawing pain above brows; in brain mouth, with unconsciousness and difficult breathing Unconsciousness, eyelids firmly closed, pupils dilated, respiration weak, pulse small, rapid, skin cold, spasmodic movements of upper limbs and facial muscles

Clinical.-Melancholy, quiet, sad, picks his fingers, makes short answers, or this condition alternates with excessive gayety short anawers, or in: continon atternates with excessive gayery Hypochondriasus, especially resulting from excessive venery Averse to people, yet dislikes to be alone Melanchola resulting from suppression of menses, aversion to members of her own family General mental weakness, inability to get the mind fixed on his business or to stand any prolonged mental effort.

Head .- Inability to keep it erect (Tabac ) Sticking, on coughing Aching in morning on waking, as if forehead, P on, with feeling as if one would fall. brain were too full and would burst, A in morning as if Nipping at every step, without pain head were beaten or as if it would be pressed asunder ing, on walking in open air, even in morning, lasting till breakfast, on entering house after a walk, with rub the forehead, on stepping, she felt every step in skull One side of head numb and cold the head, with diminished appetite; with nausea

Drawing on going into open air, > closing eyes; D > after cating, with going to sleep of brain Tension on sitting bent after every meal, with compression from temples, necessity to rest forehead on table Cerebral oppression ure Fulness, at breakfast, from a ligature around neck, with vertigo Stupefaction, with sleepiness Dulness wint vertuge Stulpener union, on wakture from sound aleep, with heaveness Heaveness, of brain, and pressure deep in it. Intoxication, from the despites spring up the vertuge is sometimes accompanied by partial parally ure deep in it. Intoxication, from the despitest spring years of the medical of the even or objects seem to be unitardy. dency to, with sensation as if eyes were swollen and side of the head protruding, so that everything turns in a circle, as if turning in a circle, on rising from a seat, as if head would burst, on rising after stooping; sudden, with Wild and piercing look such weakness of legs that he must lie down

plexy pantially statered by moses and by speaking Pani, evening Irritability Discomfort on the brushed in various places, externally, in sinciput, r side them frequently to clear apparent obstructions from and in 1 side of occiput and in 1 parietal eminence; lids

just behind forehead, wandering, and in r. temple. Throbbing Confusion in region of brows and root of

nose Heaviness; in sinciput. Temples -Tearing in r, and in r ear, through temples in morning, when eating, after eating, with pressure in forehead Pressure Pain from one to

the other Drawing pain in bones, D pain on touch

Drawing in r muscles, < walking Vertex - Pain and heaviness, and in occiput. Squeezing pain, then it went to sides of jaws, then to below l breast, with choking feeling and inability to draw a breath Pressure deep in; P on, then around

Parietals -Sticking in bones, in forehead and cer-Aching in morning on waking, as in epidemic fever, vical muscles, with vertigo, tearing S from I bone to as if brain were torn, < towards occiput. Aching, at frontal region. Sensation in r half of brain as of a large night in bed, with nausea, on waking, with weakness foreign body. Pain in r half of brain, extending back-from broken rest, and diarrhoea during the early ward. Bruised pain in side of head, < by moving morning, from scanty but frequent stools, with urg-eyes towards affected side, with sensation of something heavy pressing downward Pulsation in r side of head in evening in bed Confusion in I half of head pressure in r eye, on going into open air, he must as from coldness or as if the brain did not fill the

Occuput -Tearing in 1 on walking, T and in nape and vomiting of mucus, with musca volitantes, diplo- and especially in orbits, with nausea so that she must pna, languor and sleepiness, extending to jaws and lie in bed thence to 1 side of chest, with sticking.

| Pan as if pieced with a kinfe at every beat of the pulse | Pressure on 1 side; as with a plug in r side. Fulness and confusion Intermittent heaviness

> Boring tearing in various parts of skull, with press-Falling of hair Sharp pressure in a spot on scalp Itchinge

using drink Mertigo, an anomalay on range (Jyr. Phos.); present the influenced the error of the second process of the second process

Eyes .- Red Staring Protruding Weak look Trembling look, as if eyes Apo-trembled Movements as if pressed outward Mucus in morning Drawing pain, with redness Pressure, Forehead —Sticking, outcard, at noon; extending | < reading; P if she closes them to sleep in evening, out of, in morning after rising, extending out of, as from a grain of sand, < in forenoon, with inclination to lie down, jerklike, flammation and redness of white and bitting larbrymating the house Digging and griping, as it from the ton Burning; towards evening, with pressure in stomach, with such sensitiveness of brain that it was orbits, heat shooting through them in afternoon and

and in eyes, with burning lachrymation as from salt Lachrymation Pupils dilated, alternately D. and water in eyes, above eyes, extending into eyes, exter- contracted Yellow whites. Pressure and sticking in nally, causing stupefaction, alternately severe and r conjunctiva bulbi, in inner canthus, with fine vessels slight, in sinciput, then heaviness, then the same sen-closely aggregated at inner margin of cornea. In-sation in occiput. Pain on shaking head as if flamed lids and styes and frequent blinking. Lids something were loose, extending to occiput Pain in drooping, almost ptosis (Gels.), with difficulty in upper part as from external contraction, > stooping walking. Lids drawn together in morning Twitchor learning it on hand, with chilliness, vertigo and fret ing of upper lid; I lid. Inability to open lids; ful loss of memory Pressive aching outward over difficulty in opening (Gels.). Sticking in margins of eyes. Pain as from a stone on upper part of bone, lids and in canthi; in inner canthus, with agglutina-Pressure as from a band, then in occiput; above eyes, tron of lids in morning; itching, in inner canthus, not > by rubbing. Lids seem pressed down, and Buzzing. Surring at noon when walking in the street, sleepeness. Pressure as from sand in external canthi, with darkness before the eyes, nearly unconscious, Burning on inner surface of lids. Biting in inner can-thus, with lachrymation. Itching of margins of lids Contractive power of muscle orbicularis weakened Pain across evebrows and misty vision Pain in orbits. < with the headache: P. in bones above r. eve late in evening, and in nose and malar-bone

Vision — Weak; with dazzling, vertigo and general debility, < arms and legs, so that he staggered. Fatigue from reading Sensitiveness to light. Sluggishness of adaptation, dim vision when an uneven object was put in motion, causing vertigo Double; with sensation as if squinting; and the images slowly receding from each other to the apparent distance of six inches, here they generally became stationary, but at times alternately approached and receded from each other, and triple, with rings before eyes. On looking at near print the lines moved up and down Flickering on moving eyes, with sudden vertigo, nausea and staggering, all > closing eyes, then general paresis, and even when eves were shut any motion involving the balance of the body was attended with uncertainty and falling short of the desired effect and fresh rush of the seasickness, all > shutting eyes and sitting still with every muscle relaxed Confused on raising eyes Swelling on malar-bone and upper gum, with tensive from the object on which they had been fixed to a pain. Risus sardonicus Twitching of I cheek distant one, with vertigo, then heaviness of lids Imperfect, > sleep Greater short-sightedness than through r side about malar-bone, through r cheek, usual breakfast-table, with vertigo, and flickering, with ward through jaw, tearing, in front of ear in evening, bright points quickly moving in the distance and Pain at night Feeling of a cobweb on r cheek bright points quickly moving in the distance and Pain at night Feeling of a colweb on r cheek light feeling in head Lost; after sleeping in heat of Drawing on zygoma, with tearing, D on r. zygoma; sun, or objects tinged with all colors Of black points painless, through chin towards ears and to head Of sparks, on walking in open air Clouds and light ing of jaw Stiffness of r masseter muscles spots Bright spots on walking in open air White mus, and next day aching soreness in jaws spots, with glittering stars, on looking at different cyanotic, cruption on hips after slight fever, vesicles things in the room. Fiery zigzags moving through on vermillon border of upper, with smarting, sticking each other, on closing eyes at night. Of a thread in lips and tongue, drawing pain in an old wart on floating before eyes.

Clinical. -- Valuable for partial or complete paralysis of the ocular muscles, especially of the internal rectus, the attempt to fix the eyes upon any object becomes painful and may even cause fix the eyes upon any object becomes partful and may even cause vortuge, bence many symptoms, of letters running together, vanish-ing of vanon, etc. This drug is very valiable in numerous forms of excordious ophthalmus, an a general was undested by extreme photophobia, greater than the apparent inflammation would war-rant. There is general aggravation at might on bying down, espe-cially of utleres of the corrier. Appearing material to old people, it is no proved beneficial in cutarrate when the above symptoms were it has proved beneficial in cutarrate when the above symptoms were

Ears.—Rlood-red wax Sticking, behind, < mastold process, then dull pain at this place, pinching, on drinking. Sharp shocks shooting out of, < swallowing. Sudden sharp pressure, almost like twinges Pain as if middle would be torn asunder. Pain in external, partly drawing, partly tearing Drawings within l. Throbbing of blood. Itching in outer

with some strong beats of heart, passing off quickly.

Clinical.—Much wax abcumulates and hardens in the ear, with greater or less loss of hearing, or the hearing may be extremely senattive with the head symptoms

Nose .- Tip thick, red, hot, painful, < i side, painblister, full of pus Twitching, at root Sticking in skin of lower part of septum Sticking sore pain in septum on pressure, as if a pimple were there Tearing in bones. Stuffed Itching in nose, sticking, in r. side, as from a foreign body Itching crawling in nose. Burning on nostrils Frequent sneezing, without coryza. Bleeding, at night, then vertigo in morning on rising, when sneezing Dropping of water Blowing out of watery fluid Frequent discharge of mucus. Acute smell Tarry smell at back of nose, which he also

Clinical.—The patient is inclined to pick at his nose, which bleeds easily and becomes sore (in melancholia) It has been pre-scribed for polyous of the nose.

Face.—Blue: and turgid with blood Lavid Red. looking like erysipelas. Pale, in morning, and sickly. pression calm, but like a figure of wax Sticking Dim, on walking in open air, < rising from extending to corner of mouth, in chin, extending upand stripes Of a large dark spot with white margins after drinking Pressure in masseter muscles Fallswimming before r eye Of a transparent vapor upper, dry lips and tongue, itching of upper, burning of lips and tongue, burning on inner surface of lower, burning and redness of upper, I then r side

Mouth.—Teeth Looseness of back Boring sticking between l on moving jaw Drawing boring in l. back Jerking and gnawing Aching, on chewing, as if loose (tearing?), on eating, extending to ear, eye and check-bone Sensation as it lower incisors were pushed up Drawings in hollow T from cold food (not cold drenks), extending through temples, D through r. lower T into malar-bone Bleeding of gum, of back Swollen, bluish-red gum Painful burning of

Tongue red, mottled, T covered on upper surface and large part of lower surface with dirty mucus, and dry; sticking on tip, S on tip, with biting, S in l. side of tip, with burning, boring at night, pain, stiff, swollen, painful, feeling as if sticking to roof of mouth, and mability to move it, dry; dry and reddish Stopped feeling before ears on blowing nose Intolerance burning on, and in hands, burning at tip Speech of noise. Sensitive hearing, so that noise frightened difficult Inability to articulate Burning on inner Bubbling and humming, in r Ringing, in r, surface of 1 cheek, with biting Dry mouth; with with dull hearing. Roaring in r; in 1, < eating, with sour sensation. Salivation, sour after eating. Tuste difficult hearing; like a wind, < dinner, lasting till bitter in throat, and mouth, bitter-sour T. after breaksleep, and on exerting head when sitting, < in bed, fast, sour; sour after eating, salt, < hawking up even at night on waking. Noise in r as of a water- mucus; metallic on tip of tongue, coppery, with senfall. Notices as if blood were rushing through brain sation as if tip of tongue had just been touched with

chest Frequent hawking of mucus Sticking, < empty swallowing Shooting drawing pain in tonsils latter dry sensation in fauces. Itching, with irritation and in small of back to hacking cough Tickling when sitting, with provocation to dry cough Obhged to swallow much if she waking at night, then deep in r side of chest when

had eaten to satisfy Longing for salt and salt things, after chilliness, with headache and nausea; C before for acuts Appetite diminished, for food and tobacco-sinoking Appetite lost; with weakness in stomach thea, deep, in I side as it so bunch would pro-fared; over alternoon; unquenchable, for coffee trude Gipping, before decharge of leacornhea, as in Eructations, < towards evening Empty E, < in diarrhoea Shocks against muscles, as from a child in morning Sour E after eating, sour in evening, S, pregnancy Pair, in morning after eating, with fulwith burning in stomach Offensive E E tasting of ness of stomach and chest all day, when laughing, food Incomplete E after breakfast, I, then pain in when coughing, in sides when coughing Drawing stomach Hiccough, on beginning supper Nausea; bruised pain Drawing pain when walking Drawin morning, > stool, in evening, with weakness, so ing after drinking. Tension in r side on deep breaththat speaking is disagreeable, on trying to rise, after ing, T. in abdomen, with jerking contraction, extendevery meal; atter eating, then hiccough, with the usual ing towards chest, with griping. Oppression Burntaste and good appetts, after dinner, with pain in ing pressure Weariness of muscles after breakfast, nape, vertex and forchead, with vertigo, with satiety Upper—Venous vessels of liver and sinuses of dura after eating. Retching, meffectual Vomiting; wolent, profuse, of mucus in afternoon, with headache, nausea and then eructations

Flatulent distention Sticking in pit, in epigastric lying and turning in bed "Pressure, then best, P' as eighth and mith ribs, then sticking appropriate require, gradually extending to I side of abdomen, Umblical Region—Sticking upward in muscles on with nauses, in pt, extending to threat, as q i a ball rose! I sade below nave! Tearing in a spot below nave! ness in pit on leaning backward, with choking of pain after eating respiration and speech Soreness and rawness Unand bad taste Indigestion at the least excess.

copper, bad when eating and on swallowing, pecular to food; of coryza from posterior nares to mouth

Throat.—Spasin Drawing in muscles of T. and

Abdomen. - Swelling; of mesenteric glands, in after-Pain. Soreness on swallowing. Scraping, with cough noon; after midday nap, in evening, after eating, at night Constriction, on bowing, with choking, a with hardness of abdomen and protrusion of navel, sensation as if neck-band were too tight, so that she which made sleep uneasy, flatulent, after milk, like must grasp the throat, with blackness before the eyes flatulent colic in evening, with coldness of one foot, and dark redness of face Fulness Catarrhal ob-Rumbling, which passed into griping or pressure in struction in T and head in morning on waking. epigastrium Gurgling; I side. Flatus passed easily; Feeling as if something were coming up to choke her F emitted with stool, with dragging and cutting in Sensation as if a large body were in it Constant de-rectum, violent emissions of much, emission of cold, sire to hawk Dryness; in fauces, with constriction offensive Flatulence after eating, which then passed on larynx, alternating with salivation, with the with noise and relief Trembling Pulselike jerks,

goes into the wind Inability to swallow, water Difficulty in swallowing (Op.) Heat in guilde in Stomach—Appetite increased, with nausea as ifshe morning Sacking digning in I Cutting in morning Sacking digning in I Cutting in morning ball of 1 great toe, which continued on waking in morning Sticking digging in 1 Cutting in morning

mater gorged Distention after eating, with pressure in stomach, which causes anxious respiration Sharp drawing jerking under r. ribs Sticking in hepatic region (Lyc), in I hypochondrium, beneath margins region towards evening Interimittent sore tearing of ribs on r. side, in morning on waking, < motion, from epigastric region into sides of abdomen, as if in 1 hypochondrium in morning in bed, > rising, everything were torn out of abdomen, mornings Sud- with oppressed breathing, beneath border of 1 ribs den thrusts deep in pit Sudden cutting on eating a when sitting, in hepatic region before menstruction, light meal Cramplike pain Spasmodic pinching night when lying, and especially on inspiration, Griping between I and 2 AM, with constriction, G intermettent, in hepatic region, in hepatic region, imwhich contracts chest, with griping in back and eruc-beding respiration. Teaming in hepater region Fain tations, waking here, G, then becoming dull in intes-tines Contractive pain, with coldness in it and in drum, extending to side of lower abdomen. Conback, waking her in inorning Gastralgia in evening struction of hypochondria as from a band (Lyc). Sharp Drawing pain in pit in morning after rising and after drawing in anterior lobe of liver Feeling as from stool, extending to throst, with short, difficult respira- fright, caused by the noise of opening a door, a feeling tion Pain in pit as if suppurating mornings when as before diarrheea Pulsation on I side, between

(Ign), in pit, as if something moved about, even in Deep cutting; C to 1 of navel. Pinching in muscles morning, then sticking in side of chest. Fulness in above navel on bending forward Bruised pain after pit, < inspiration and motion, with sticking Tight- supper Drawing pain in morning after rising, D.

Lower.-Cramp Sticking; in groin on rising from easiness in pit, with haste in all his actions and diffi- a chair; in r. groin when walking Tearing above consists property and the second and this property in the second and this property of the control of the second and this property of the second and the seco the fingers became pale and dead Acidity, with flat len, and on touch pain as if suppurating. Contractive pain after appearance of menses, > walking in open 415

air; C pain like after-pains, with urging to stool. Distending pain in a place where there is a herma. Con-stricted spot in colon. Dragging towards the place of a previous inguinal hernia, without protrusion of a prepuce. Sticking in glans Cutting in hernia; D. outward in the place of a hernia, D. out ward in r groin. Drawing pain when sitting after in of penis. Iching of penis prepue and ginner Drawing pressing towards upper, in morning rubbing Pamful stiffness of penis in e sleep Many erections at might Drawing.

Clinical.—Hard swellings of the liver have been cured (note the sticking, tearing pains in the hepatic region) Enlarged mes-enteric glands and tumors in the abdomen have been treated succonsulty (note the great sensitiveness of the abdomen, the swelling and the character of the pain, knifelike)

Rectum.—Sticking Heat, and in anus, in lower part of R., in R. during stool. Itching after itching in chest and abdomen. Urging, with diarrhoea three times; frequent U., with scanty soft faces, then still more distended abdomen, frequent, with scanty stools, constant, with two thin stools, ineffectual, constant, meffectual Straining at stool

Anus .- Sticking when not at stool. Dragging towards A and abdomen, towards A and sacrum Heat Itching, and on nates, permeum and near scrotum, so that he must frequently rise.

Steel —Diarrhea Walery, frequent, with many empty eructations and copious urine, W, mixed with hard parts, with colic and loud emissions of flatus, and frequent, with undigested portions, with griping in stomach, extending through abdomen, and urgent, then sweat Soft Pasty, twice daily, with burning in rectum Constipation Solid, every second day, with pressure, Involevery second day, the first part with pressure untary in sleep (Phos, Hyosc) Undigested age of offensive mucus Passage morning stool. Scanty Frequent Passage of blood with the

Climical.-Chronic diarrhox of old people, with tremulous weakness, discharges sometimes involuntary, specially indicated by the symptom that the flow of urine is intermittent. In obsti rhoes, the stool followed by tremulous weakness

Urmary Organs,-Lancinations in neck of bladder Pressure upon bladder, cramplike, in neck after urinating, < walking, with sticking Frequent urging, with scanty urine every time; constant U like labor pains, with burning pain at neck of bladder and along urcthra, and frequent, scanty micturition Frequent micturition at night, frequent M without ability to retain urine Painful M Strangury, biting, after micturition. Ischuria Discharge of a few drops after micturation, they cannot be retained nor forcibly expelled. Involuntary mucturition Drubbling after mu-turition Necessity to urmate at 2 AM several nights Could not urinate.

Urethra - Discharge of pus preceded by itching of mucus from male U, even after urmating ing: in orifice: extending to orifice, at times increasing with every beat of the heart, perking, in posterior part. Cutting during micturition, in orifice Burning; in morning after urmating, when urmating, with tickling. Pain on passing urine, which is mixed with tenacious turbid mucus.

Urine.—Frequent hæmaturia, with dyspnæa. A few drops of bright red blood with first part of urine Red. Turbid, with red sediment; and frothy. Copious. Scanty, dark, frothy, depositing a red sediment.

Clinical.—Partial paralysis of blade and starts, though urinating better when stan

Sexual Organs -Increased sweat. through penis when not urmating Com, matic cord: 1 Scrotum seems swoller through middle of scrotum, between test ward to above root of penis. Sticking on or I testicle, then burning Griping in testicle. ing, with tearing Pain in l testicle, in testicle erections, drawing, in l Testes heavy an Desire, desire without erections (Phos), at costus attended by spasmodic respirations and like odor from axilla, then exhaustion, no D 1 sion even when frolicking with a woman (Phos) without dreams at night (Phos ); E. at night, three nig in succession, then awakening of desire prostatic fluid at every excitement, without voluntum

thoughts, with uching of prepuce, D on pressing at stool Female—Cutting between labix during micturition Sticking in pudenda Itching in pudenda, < after menstruction, and in vagina, and on rubbing it pressing downward in uterus Itching deep in ragina (Kreo) Leucorrhan, ten days after menstruation, with color before duscharge, with weakness and paralyzed sensation in small of back before the discharge, then weakness, of white, arrid, burning mucus (Phos, Kreo), thick, milky, with contractwe, laborlike colic coming from both sides; profuse; profuse, then hoarseness, with cough and expectoration bloody mucus instead of L. False pains for several days before delivery, preventing sleep and exhausting her Pressure upon uterus during micturition, with cutting Menses suppressed, which had scarcely appeared, then drawing pain down back into sacrum M delayed, M on seventcenth day, discharge of brownish blood instead of menstruation Tearing in mons veneris when sitting Papules on mons veneris, painful on touch

Clinical.-Useful in the bad effects following excessive venery, sexual weakness or impotence, flow of prostate fluid with constructed stool or on the slightest motion. Enlarged testic is, which are very hard, especially following injuries. I talko has been found useful for the sexual nervousness of strong, healthy men found useful for the sexual nervousness of strong, healthy men who are unable to have an orection. In both seves useful for the effects of suppressed sexual appetite, for instance, collapse, hyste ras, melancholia, etc. Uterine polypi. Uterine hemorrhages, with pain in the uterine region running down thigha, etc. Dismenorrhoa, menstruation too scanty and too early memorrhos, meastrustion too scanty and too early Numerous accompaniments of the menses, gastric or mential symptoms Cancer of uterus Puritus of the vagina and pudends following the menses, excessive by presentencia of the Spirital Graphs of the Canada Ca mary glands preceding the menses, viz swelling, sharp pain, aggravation of the tumors at the menstrual period

Respiratory Organs.-Dry spot in larynx, where there is crawling with almost constant irritation to dry cough. Scraping in larger, with irritation to cough, and dry cough in evening, S in larynx during the day, with tickling and dry cough. Tickling in larynx, with dry cough. Hoarse. Cough at night, C. almost only on first lying down, during the day

t sit up and cough it out, after which | num were pressed inward, sudden, when sitting, until afterwards, when it comes up with Itching interiorly ough, with corvea; loose, without ability to

cative attack as if mucus collected in throat, can be accurated in middle conference in unions, in a superstanting of the conference of the six is something collected in upper part of best of heart, or insing, anxious, on being awakened x Dyspinca Difficult respiration, on stoop-ing evening in bed, and slow, with pain in clesst, \*\*Rubes—Rapid, from excitement, and tense, and nething rose in larynx and threatened to suffocate er, and noisy Groaning. Short respiration Slow espiration, with pain in chest Subdued respiration

Clinical.—Very valuable for tormenting night cough of old people, it is usually dry, they can a speciente a little only after last, and the state of Occasionally whooping cough

Chest.—Hardness of r. breast, with pain on touch and nightly sticking in it. (Inflammation of mamsternum Rattling in evening on lying down, then and in lumbar region; beneath r scapula on ever on every inspiration when walking, > hard pressure; above heart on deep inspiration, then on every moair, in nipples and vicinity in bed, and on inner surface of 1 cheek, in both sides, < lying on front of chest, < mspiration and when sitting, behind bling Tearing in one or another in evening in bed; sternum, extending to axillæ; in 1 side on cough- T. in all, almost as from a sprain Cutting in flesh ing, waking her and then causing uneasy sleep, sudden, between r .nipple and sternum when sitting, <

towards middle Sharp thrusts through sternum to spine when sitting Tearing, through whole in evening when lying on one side, with drawing and with oppressed breathing and pressure upon upper part of sternum, which on inspiration takes away the breath, cramplike, in r Cutting on both sides, < inspiration Scraping, with crawling and irritation to dry, almost constant cough Pam, in female breasts; under l breast; in ribs; in r side of (' and abdomen, < inspiration, in various parts, not < by respiration, behind sternum and desire to breathe deeply, behind sternum when sitting, not < inspiration, and in 1 side of chest; on sternum, now with tearing, now with sticking about

slight inspiration, throbbing, in 1 upper part, more

sc); < lying, shocks in the beginning in C and to l of sternum. Bruised pain in forepart at, constant, before going to bed, forcible and in back, on inner surface of sternum. Oppresi dyspinea, whooping, every night, son on sternum after eating, with external pressure; expectoration of bloody mucus; short, O of r. upper part, with sensation of incarcreated de dy deep inspiration, dry, dry, in flatts y, from acid and salt things; as from tick-idle of sternum, with and without expecting in sternum. Clothes he like a weight on C. and hereby something is loosened, but cannot be shoulders. Stiffness of sternum on physical exertion.

Heart.-Frequent shocks Anxiety: with rapid rything Yellowish expectoration tasting like action Pressure in precordial region at times, as if H would be pressed down, with oppressed breathing Palpitation, after drinking, after stool, with intermittent

t chest could not be sufficiently distended, as if weak Slow; and weak, and small, hard; and small, soft, and large and between these, but without regularity, several small rapid beats Small and hard, small and weak Soft and feeble Lowered, and the temperature Lost, sometimes losing a beat

Neck.—Apparent thickening Sticking in muscles of nape, with pressure, S in muscles of r side of nape. Tensive pain in nape during rest, with dryness in throat Drawings in nape on walking in open air; in r side of neck during rest, extending to shoulder-joint; throbbing, on nape, extending to r shoulder

Back.-Cramp, with drawing and aching. Sprained pain in 1 side Crawling in spine as if asleep Sticking between scapular, and in lumbar region, region of mary scirrhus) Atrophy of mammae Caries of short ribs and in hypochondria Pain between scapulae much cough on sitting up. Tremor at base of clavicle motion of arms. Painful tension in muscles beneath and in muscles across chest, just above steinum scapulæ during rest, < raising arms Drawing pain in Sticking in I. mamma (compare Sil, which follows r scapula Drawings beneath r scapula, Sticking in well?); beneath ribs; beneath 1 axilla, behind car small of B. when standing, with drawings through lumbar tilages of eighth and ninth ribs, between cartilages vertebræ, S in lumbar muscles, with painful stiffness of I ninth and tenth ribs, in side, about r nipple on moving back when sitting Pain in small of B; r . l and beneath margin of l ribs . on bending backward, on walking then nausca and exhaustion, in tion, beneath ribs of l. side when sitting, obliging ischia on rising from a seat. Drawing through lumhim to press on them, in r side on walking in open bar vertebre when standing Lumbar region feels disjointed on exercising

Extremities.—Swelling of knees and elbows. Trembelow I thumb-nail and on r great toe, with burning. Pressure in joints of arms, legs, fingers and toes, with tearing Pain in joints of hands, feet, fingers and toes in humerus and femur in morning, compelling him to sleep, in joints after exposure to cold and wet, with swelling and numbress, weary, in joints. Bruised sensation in all, in arms and legs, in joints during rest, > motion Dragging sensation. Drawings, in l elbow and r heel, r fingers, r. great toe, and in evening anteriorly on r lower leg, and in l. toes in evening in bed. Sensation of grasping in joints of arms and legs

Gritty sensation in joints when moved, with partial loss of power, mability to raise her hands to head or extend her legs Buzzing, with tingling All affected before menstruation, with weeping mood, restlessness and anxious solicitude about trifles. Heaviness in breasts and nipples, with frequent oppression and lower and feeling as if she could not move them, the shortness of breath, upon sternum, with difficult same in arms, with weakness in limbs distinct from breathing when standing, with cough, as if ster- the sensation of paralysis, the latter affecting the

whole body. Difficulty in using, so that he cannot walk | open air. Tearing in forepart of thigh when walking Inability to move arms or legs. Dropped an inkstand Cramplike pain in anterior muscles of r. thigh on and could not walk. Numbness of fingers and toes, walking in open air Pinching over l. hip. Sprained with coldness; N of lower, with inability to move pain in r hip in evening on walking. Drawing in r. them, then similar state of upper, and with the numb them, then summa sease of appearance with the summa sease rest, entire ton extending over whole body Asleep. Paralysis, to trembting with unconsciousness; P of lover, then of upper, or the of hamstring. reverse; temporary, once or twice loss of sensation

Upper Extremities.—Sticking in r. axilla; 1; in 1 along inner side of upper arm Tickling in axillar excites no motion of arms. Arms when lifted fall like mert masses and are immovable. Drawing pain

if bound. Weakness of arms, r

Upper Arm.—Sticking on inner side and in axillar Tearing through them in evening in bed, T during r patella rest, alternating with sticking, transiently > motion Drawing on inner side of r., in posterior surface of l. Firstlytic drawing pain during rest Fan as from fatigue in soft parts of outer and upper parts of r, so inch, that it is difficult to raise it. Wearness in lower part [add]. Tearng on this in or this in commitment of the design of the desig of biceps brachi, with disposition to flex and extend in tibue on walking in open air. Bruised pain in

Elbow -- Cracking, < evening. Sticking in 1, 8, with heaviness Tearing on walking in open air Cutting outward in bend of I during rest Pressure

Bruised pain in r : 1

Forearm -Sticking on dorsal surface of r, with sensitiveness to touch Cramplike pain in muscles, < resting arm Pressing in flexor tendon above | wrist, P deep in 1, extending to fingers Bruised pain in r tibia, in muscles of r as far as toes, in 1, with extensor muscles of r; on outer side of 1, < touch | tearing and uncasiness, in r calf, on inner side of 1 Drawing in l , on lower part of r , in extensors of r , calf and on back of r foot, in L calf and in back of in muscles on outer and inner side of l , < during foot, in lower part of l calf and in sole Weakness, rest, with pressing

Cracking in wrist, < evening Sticking in wrist, sleep when sitting at articulation of metacarpal joint of I thumb with wrist, as if sprained, < bending it inward Paralytic ing him, at last extending into calves, > sitting, <

< of palm

Fingers—Nails yellow Twitching in ball of 1 Foot—Swelling, with burning pain, painful 8 little, in ball of 1 thumb, which draws the thumb Trembling in morning on rising Sticking in r heel upper arm. Burning pain on flexor surface of index, upper part of thigh then a hard lump Drawings, in I thumb, in first phalanx of l. little, with stiff feeling, sharp, in one or other. Numbness Numb prickling, gradually extending to elbows, causing stiffness of muscles and morning when standing and sitting, burning, in making it difficult to move forearm and hand.

ing; and dragging his legs after him, with tendency of knees to fall forward Sensation when walking as Drawing, in 1; in lower surface of 1 great. Prickling, if his steps were impeded, but he walked very rapidly \$1...—Whole body blue; and covered with cold Weakness. Stickling near trochanter, deep at sweat. Yallow apods on fingers. Inflammation of of 1. thigh when sitting, in hamstring on walking in on face, back and rest of body, with itching like creep-

gluteal muscles, < on walking; D in r. thigh during rest, > motion Weakness of r thigh on walking, even to trembling Hip-joints almost immovable Paralysis

Knee -Crackling (in patella?) on becoming erect. Sticking, in outer tendon of flexor muscle of hollow when walking in open air Tearing about; about patella when sitting Pain on stepping, l., rheumatic P : spramed, in r : bruised or broken feeling in l up and down arm, < on moving it Pain in r arm as patella when walking and standing in open air, with general anxious heat on exertion in walking, paralytte, in hollow, as in dropsy of knee Drawing beneath r patella Weakness, on ascending stars, after ascending stars Stiffness in tendons under L, on

beginning to walk, with pain

tibize A place that had been bruised and remained painful became blue and mottled, with cutting on motion and bruised feeling on walking or on touch. Pressure in r calf Tensive stiff pain in calves Oppression in anterior surface of r in bed, extending to foot, with weakness, then the same in 1 lower, > by walking Tingling pressure on tibiae on stretching out limbs when sitting. Drawing on outer side of r , in < of knees, with heaviness and trembling Going to

Ankle -Sticking in r malleoli day and night, wakdrawing pain in wrist during rest Boring in palm walking Tearing from noon till evening, < sitting at the point where the line around ball of I thumb and walking, T in external malleolus in open air, meets that of the third finger Deadness of 1 hand, extending along leg Pain, bruised, in 1, with ten-

sion and stiff feeling on moving it

and metacarpal bone back and forth, visible under the on walking and standing, burning and throbbing S skin when the thumb is forcibly kept straight. Cramp in bend of foot. Tearing on dorsum in evening in in r third prevents writing easily Spasmodically bed, T in inner side extending up leg, in open air, stiff and cramped on cutting with shears Sticking in in soles on walking Burning pain beneath heel on tips, beneath nails, beneath r nails; in metacarpal stepping, with redness and swelling Crawling pain joints during rest Cutting shocks in metacarpal joint in soles when stepping upon them, but statches when of thumb. Pain under nail of r index as if it were walking. Sharp drawing beneath heel. Heavy clogtorn and nail pushed up Pan in r fourth, with stiff ging sensation in heels Numbness, of heels when feeling, then pressure on upper and outer part of l sitting, with prickling Numb prickling creeping to

Toes -Sticking under nail of 1 great, when sitting, in tip of 1 great, with burning, pulsating, in little, with pain on walking Tearing in ball of great in Lower Extremities.—Recting (Gels), when stand- of 1 Pain in tips as if suppurating Burning pain beneath, when sitting Pressure in ball of r great.

superior attachment of gluteus maximus; in muscles whole body, with pain and burning Fine eruption

ing under skin Petechie Ervsipelatous tumor in | mglt Waking early : at midnight, with sweat; anxneck Pumple in an old liver spot on cheek, on torelious half-waking from a sound sleep. Sleep interrupted head, with tensive drawing pain; on forehead, with Uncovers his arms in sleep. Twitching in arms and tensive pain, which during and after itching becomes tearing in their vicinity, painful on touch on fore-eyes are open, staring and turned here and there head, also on chest. Pustule in fold near r. wing of Weeping in S. Growling in sleep at night. nose, on feet Ulcers with inflammation around finger-nails and throbbing, suppurating, burning pain, margins of U became black, with discharge of offensive ichor, cold gangrene in a portion of an U Vesicles filled with colored fluid, with bright red areola. V, with bright arcola near knuckle of 1 little finger; on back of r hand, between thumb and index, with red areola and itching, which is < after scratching, itching, on back of ball of 1 thumb

Sticking on 1 zygoma, itching, on posterior surface of thigh, < when sitting, itching, as from fleas, here and there in rapid succession, always singly, itchingdorsum of hands Crawling in affected parts, on back of nose, posterior surface of thigh, in toes, under skin of r cheek, extending to corner of mouth, in glands, with agreeable itching, itching, on tip of nose and in nostrils, itching, in forearm, only transiently > rubbing

Itching; here and there in all parts, on r half of body, around I eye, on nose, about chin, on abdomen, small of back, hmbs, in various places on wrist, on flexor surface of r wrist, ball of I hand, backs of fingers, of 1 thumb and little finger, in tossa between nates, thighs and arms, r patella, backs of toes and fingers; hairy parts, < scrotum, then erection without desire or other cause, on pit of stomach when walking, on soles, with itching pimples, on legs and feet and 1 palm, with sticking, sides of third and fourth fingers, transiently > rubbing, on back of balls of thumbs, next day vesicles, on forepart of r leg, then burning sore pain, then redness, next day the burning had extended and was < touch, then a bright C limbs , limbs, with heat in head red spot, with burning in it and sensitiveness in and around it, of breasts, on rubbing redness, roughness and burning, agreeable, but violent, in supples, sticking, on chest, transiently > by scratching, sticking, in cheek and r side of face, > repeated scratching; corroding, on forehead, transiently > rubbing, corroding, on r half of body in evening in bed, < lying loss of appetite, diarrhoea and vomiting Dry H upon it, always beginning with sticking, > scratching, of whole body before menstruation, without thirst but reappearing in another place, with uneasiness in Sudden H, with vertigo and pain, which spread over

Clinical.-The skin is very frequently pale vellow Papular eruptions, with burning and itching

day, he cannot keep awake when reading, during the day, with mability to sleep, feeling in morning as if mg on waking, with weariness; in afternoon, with him, he desires to sit alone with closed eyes

Sleeplessness, on account of uneasiness and heat,

hands at night in sleep preceded by ill humor, the

Dreams -Frightful at night and towards morning , F and easily remembered Anxious before menstruation A. and hostile, and full of threatening dangers. and vivid Full of vexation and fighting. Full of shame. Of wretched diseases Of physical mutilation Of dead people and of the death of those living. Horrid, from which he woke in fright about 3 or 4 AM, with distended feeling in stomach. > lying on it, nervous feeling and palpitation, like nightmare Nightmare Bad, frequently interrupting sleep Vivid, voluptuous

Confused, with uneasy sleep

Fever.-Chilliness, in morning, with headache and biting burning, here and there Smarting of face as nausca, in morning, with dizzy constriction of brain, it sore, after washing and drying Painful tension be indifference and depression; waking him at 4 AM, hind ears and on mustoid process. Sensitiveness on with bruised pain in head and scapule on turning body, with pain in abdominal muscles of epigastric region on deep inspiration, which took away his breath, after midday nap, from 3 to 5 PM, at end of evening meal, with every stool, with sadness, with cold hands, hot face and nausea, with trembling in all limbs, so that he must constantly go into the sun. Internal, with numbness extending from thigh to foot, 1, waking at 5 am. (almost without thirst), with cold hands and soles and hot face, lasting eight hours, then heat in face and weakness every day at 8 AM, on motion, in afternoon, with coldness, then after five or six hours creeping of heat over all limbs, when the confusion of head and the indifference with sadness disappeared, and the most active participation in every occurrence took place in back, usually about 10 AM, with cold hands and blue nails, sometimes the coldness extends up into arins, itching, from nape to head Cold skin, coldness through back, with cold hands and blue nails,

Heat; through whole body, with thirst; daily, at night in bed, necessity to pass the night upon the sota, the child desires to go to bed early, is then very hot and sweats, with uneasy sleep, trembling, short, rattling, snoring respiration, after a cup of tea with two spoonfuls of wine, and sweat, with sweat, thirst, whole head In flushes, in atternoon, without thirst Orgasm of blood, with jerking in heart Tertian bil-Catarrhal fever, with inflammation of 10us fever. options, with burning and itching

Sleep.—Frequent yawning. Sleepiness, during the

of appetite Insternal H, can, with roll and loss of appetite Insternal H, can, with rollings, with

y, he cannot keep swake when reading, during the

out thirst. Internal and external H after sleep. and E, with dry sticky lips, aversion to drink, insipid he had not slept enough, in morning on rising, morn-saliva, noise, bright objects and every motion affect necessity to be down and sleep, in evening, and disin-skin scems greater than it is More internal than exclination for occupation Inability to rouse himself ternal, in face and sinciput. H in head; occiput, at the usual time and sleepiness for a long time after | then in forehead and cheeks; in skin of r. temple, wards Slumbering all day and prostration Dozing then in side of tip of I. thumb-nail, skin on r. side of even when walking in open air Stupid, too sound forehead; on upper part of leconcha, down back in morning on waking; of head, with confusion and heaviness; of face, with rush of blood to head and with tossing about the bed.\* Falls asleep only after mid-sensation of coryza in nose; hot flashes in occiput,

then in forehead, frequently repeated when sitting and reading H, with sensitiveness on scalp, above r

Sweat; over whole body in morning on waking, inclination to S. in morning on and after waking, even on the cold legs; in evening when sitting, with heat of face, at night; on waking at midnight, after midday on dozing when sitting, < forehead, with redness of whole body, without remarkable heat Interhead, on hands, on permeum, on legs at night Offensive, in axilla.

Clinical.—Sweat immediately on falling saleen.

## Convallaria.

A tincture is made of the entire fresh plant of Convallaria Majalia, L.

General Action .- In large doses it causes irregularity of heart's action, vomiting and collapse, in somewhat smaller doses it diminishes the rate of the pulse and promotes the flow of urine In small doses it acts as a cardiac tonic and dissipates dropsical effusions of cardiac origin.

Ally - Digitalia

head from the pillow in morning, nausea > vomitdinner; in open air

letters

gradually passing away after supper, < r temple, with sleepiness; as from too sound sleep, in morning, > lying down again, also < motion; heavy, < vertex, heavy, after a short walk, < motion Dulness, and heaviness. Feels weak Vertigo

Forehead -Pricking as from nettles at times during the day, < warmth Aching in morning on waking, with soreness of eyeballs on motion, dizziness; A on jarring head; in F. and nape when walking, < jar or ascending a hill; headache beginning in F , in fronto-

Vertex.—Pain; extending to temples at 8 P M , > walking in open air Dulness in r side

Eyes -Dark lines under them Smarting of r. at noon Pain every fifteen minutes from r. over top of frontal emmence; above l. knee; on back of forearm, head and down r side of neck, heavy l' nn r. eye and temple. Heaviness, wanted to keep the lids closed. temple. Heaviness, wanted to keep the lids closed, but if I closed them while walking I staggered Dry feeling from walking in morning till 10 AM, with sensation as if inner part of lids were rough. Upper lids feel heavy on looking up All letters looked alike when night; on eating and drinking; as soon as the eyes reading Saw gray spots about three inches square in are closed, even on beginning to sleep, and during the different parts of the room on entering the house after

Ears and Nose.—Pulsating pain in I car, with heat mittent Cold, alternately on different parts, C, like in it, sharp pulsating pain in r. middle ear, and when death-sweat, on forehead and hair Sweat on fore- swallowing the r tympanum seemed to bulge, > pressing on temporal artery in front of ear inner edge of I nostril, with feeling as if the flesh had been torn Epistaxis at 2 AM., waking me

Face.-Pinched, and sallow. Of a smoked color after exercising enough to cause free perspiration

Laps covered with sore hydros, < l. side.

Mouth and Throat.-Grating on teeth in morning on waking Tongue coated yellow at base, tip and sides dotted red, tip feels sore, as if scalded Collection of dotted red, tip feels sore, as if scalded tough, clammy mucus in mouth Taste coppery Suffocating sensation in throat, at 6 PM, with dry-

Stomach - Appetite diminished, lost Could not eat breakfast Food does not seem clean or fit to eat Thirst, < evening Frequent drinking of large quantities Desire for lemonade or something acid Generalities.—Feeling as if I had taken cold Gen-Eructations of fat all the afternoon, of fat after dineral sick feeling Sensation as if she were getting ner, of gas tasting of food, after supper, tasting of fat internally and filling up. Restlessness Tired, food eaten four hours before, after eating cucumbers, bruised feeling all over body Weakness, in morning tasting of the cucumbers Nausea, with cold sweat alter rising, in evening, during the labolite pains, about wast (Vent), after excessing for about ton with sleepiness, with staggering, and feeling as it re-immutes immediately after cating, with faint feeling covering from a long soknesse. Faint upon having land youting twee of mucus which looked and tasted the gums lightly touched with the point of a knafe, like the slime from oysters Vomiting. Weak feel-faint, dizzy feeling, like morning sickness, on raising ling in region after dinner.

Abdomen.-Pain, at 630 PM when eating, causing ing a clear substance tasting like phlegm. Aggrava- me to hold my breath, < beginning to eat, < sitting tion from 2 to 5 PM Amchoration from eating, after up straight or leaning back, causes sleepiness, paroxysmal, causing desire for stool, > stool, four stools Mind.—Depression Grieve very easily. Irritable of natural consistency between 2 and 5 PM, grumfeeling when asked a question Nervous feeling, with bling, as if bowels would move, sensation as if flatus trembling of hand Do not feel like talking No would surely pass, but can retain it Soreness, < desire to get up in the morning Time passed very coughing or being in a warm room, > open air or ex-slowly. Intellect dull. Wandering from the subject creasing; S on pressure, clothes feel tight. Sensation when reading, sees small words before the beginning as if filling up, causing dyspnoa, desire to breathe of sentences, and the letter P is substituted for other deeply when sitting down, abdomen distended, but sensation as if larger than it really was Uneasiness, Head -Aching on ascending stairs, < ascending a and on going into open air pain, < walking, U., then hill; < hawking; < stepping heavily or jarring head, colic, causing desire for stool, stool scanty, with tenes-Weak feeling

Pain in r side going to l , P in hypochondria on deep inspiration or gaping, in region of gall-bladder on deep breathing or raising arms. Gurgling in umbilical region Umbilical pain in 1 part after a short walk, in r side, which comes quickly and passes off slowly, extending to I groin during dinner.

Hypogastrium -Pain in morning before rising, stool, P every time he woke all night till after 5 30 AM; < r side, with fulness and with desire for stool, temporal region, < r Meavy aching, over eyes, with the pain continued after the stool, > stool, with fulness, > stool, with dulness in head; in I iliac region, · micturition, intermittent, when eating Sore pain on coughing and breathing deeply; S pain in middle

at 7 Pw after eating, it came on gradually and passed all the afternoon, < between 5 and 6 PM., S when eating, with intermittent pain Brused sensation in smelling like decayed meat, relieving the colic, tenestimes in afternoon

Sacro-iliae Synchondrosis - Laborlike pains, with went to sleep between the pains, a laborlike pains, < sleepiness, as if tired, also pains ran down leg, < Beating not as hard as normal metion, string up straight or learning back, pain beto be sufficiently as the straight of learning back, pain beto string up straight or learning back, pain beto straight the straight of learning back, pain beto straight the straig if a feetus at eight months were kicking, < being on the feet Sensation as if a large cord extended to inguinal region and this cord were pulled down by the pelvic organs, . r side, sensation as if uterus descended and retroverted, the fundus of the uterus pressing on rectum caused pain in anus and rectum, sensition as if rectum were full of gas, not > passing

Clinical.—In pelvic congestion, with sore aching pain in lower part of abdomen, especially after miscarriages or operations. Feeling as if uterus had descended and pressed upon rectum, causing cutting in return and anus, dull aching soreness in lumbar region, great prostration, pain > | jung on back

Rectum and Anus -Sore, burning sensation in anus during stool Tensemus during stool, with inactivity of rectum Ineffectual desire, with soreness of anus as if raw, on straining

Stool.-Thin, and brown, offensive, with tensemus and heat at anus after stool, and offensive, twice a day, each one preceded by uneasiness in engastrium Offensive Scanty, after prolonged tensemus, which continues after the stool Twice a day

Urmary Organs.—After micturition, aching in bladder as if over-distended, with aching and lame feeling ney, leaving soreness, sore, in lumbar region from 5 in lack after lying down — Frequent desire, but only to 10 a m a little urine was passed, which seemed scalding hot, but left no smarting Frequent micturition, urine light brown, after standing over night it smells like tiesh fish, slight mucous sediment Urine dark; and strong-smelling, and offensive, acid Copious urine, and light-colored Urine contained an excess of earthy phosphates; and sugar

Sexual Organs.-Itching at orifice of vagina, extending to meatus of urethra, then gradually all over labia, with hyperamia, almost unbearable at 8 P M , < slightest motion of legs, > cold water

Respiratory Organs .- Paroxysms of hot suffocating sensation, with general perspiration. Dyspnæa on ascending a hill Breath short when walking

Clinical.—Dyspace with pulmonary status and hydrothorax, cheved so that she could lie flat on her back, it also caused pro-

Chest.-Stinging beneath sternum, at about third off suddenly, < sitting up straight, causing me to rib, radiating in all directions for a circumference of hold my breath, passing into a dull ache. Soreness about four inches, at 8 P.M Sudden transient shooting in I nipple, leaving soreness Sharp pain in nipple, in 1 side, with every breath, in r. nipple, leaving sorer side on laughing or coughing Uneasiness, with ness Intermittent pain in r. nipple, beginning slowly colic, then urging to stool stool rather thin, light, each time, increasing to a sharp pain, then gradually passing off Sensation as if milk were coming into r mus after the stool, these symptoms occurred four breast, then statches which centre in nipple, from 3 to 4 P M

Heart.-Sounds feeble, with animum murmur over bearing down extending across pelvis, < at sides, < jugular veins Pain in pracordial region, in region sitting down, especially sitting straight or leaning of spex. Discomfort in region in afternoon. Uneasy back, standing or leaning forward while sitting, feeling. Fluttering when exercising, then redness of face and sensation as if heart stopped beating and r side, extending down inner side of r thigh, with started up again suddenly, causing faint, sick feeling

faint, sick feeling, with hunger, when lying on back dyspices, on seconding stairs or walking, in a woman without the pains were relieved, but there was a sensation as jorganic disease. Heart irregular, urine suppressed, drops, of the control work months were backing of home on loss, mirral desease, after Cowari the heart's action was regular, and the dropsy disappeared

> Pulse. - Rapid, when standing, and soft, and weak, and temperature high Slow when lying, rapid on moving about the room Changeable, in frequency (Dig) Full, compressible and intermit-tent, < motion, > lying (Dig); F, compressible and imperceptible, with hand extended above head. Weak and easily compressed, W, and when holding my arm above my head it was imperceptible, hand turned pale, became numb and soon went to sleep Dicrotic when hand was extended above head

> Back .- Aching after leaning over, with lame and weak feeling in dorsal region, A as if bruised or broken, lame, A under lower angle of r scapula, under point of l scapula on lifting arm, sudden, under lower angle of r scapula, passing off gradually, > bending shoulders backward, constant vawning after the pain, sore, between lower angles of scapulæ, afterwards it extended up and down spine Pain in lumbar region, as if muscles were bruised, across region of kid-neys from 2 till 4 PM; < in r loin, after a short walk, motion, deep breathing or sitting up straight, sharp, in post-sacral region, sharp, in region of r kid-

> Extremities.-Pain in wrists and ankles, < after sleep, afterwards extending about four inches up legs Rheumatic pain in l. elbow after going to bed, < motion. Trembling of hands A small aneurism on l index, after pricking it it bled profusely and was difficult to stop, the bleeding caused a faint feeling Cramp on inner side of r thigh, it would come quickly and go away gradually, when riding, > straightening leg and pressing foot against something, C in 1 calf when walking, below r knee when sitting, > standing, returning on sitting down. Knees felt sore when walking Legs ache; < r, and below knee Feet numb on first bearing weight on them, then they seemed as if filled with needles (or as if asleep). Aching of r. great toe.

> Sleep -Sleepiness, after breakfast, with dulness at 2 Pm. after entering a warm room; between 3 and

5 P.M., also with weakness; at 6 P.M. when sitting; aggravation of headache, urine scanty, dark and smell-after dinner, when sitting; with laziness. Woke be-ing like cows' urine, appetite poor, sleapiness, at 7 P.M. tween 12 and 1 A M, was restless for two hours, with chills running down spine from a draught of air or drink burning all over body; woke at 2 A M., was restless for of cold water, water felt cold all the way down cosophsome time, and after a short sleep woke again very agus, sensation as for bubbles of air passing through restless; woke between 2 and 3 A.M. and was restless water from symphysis pubis to r. side of hypogastrum, the remainder of the night Restless sleep, towards pain across umbilical region

morning Troublous dreams.

Skin. — Rough when washing after perspiring Blotches like mosquito-bites on anterior part of thigh and foot, and sides of back, on body, with itching on undressing, so that she scratched the skin off, the itching continued after getting into bed Feels sore over whole body on waking and after rising Itching on

anterior part of thigh

felt a little cold, with nervous feeling so that hands which it has special affinity; it is also diuretic and trembled, C all night, with waking twice, before rising laxative. It produces an urticaria-like eruption on pain in forehead and temples, < r. side, · motion, the skin, or, at times, an eruption like pemphigus chills running along back on moving any part, nausea, on getting out of bed shaking chill all over body, ends of fingers pale, the rest of the hand mottled purple terical symptoms. Uncusiness, then chill, then heat and and white, hips purple and sore, overed with hydron, coroniverbel lentender patches, with utching and prekhair sensitive to touch, chill > heat of stove or warm ju like measles, but untions characterished symposes, then coverings, water tasted bitter, no appetite, tongue felt mottled appearance, no desquamation Pulling in all as if scalded when drinking warm coffee, thick, muscles, cerening and night. Pulsations here and clammy saliva, aching in lumbar region and legs, there. Weakness; with anxious sadness. Sensitivenausea, mability to sleep, at 10 30 AM chilly from a ness to coldness and dampness, S so that noise draught of air or when lying on a cold sofa, at 2 PM high makes him tremble and angers him temperature, C from 8 to 9 AM, beginning in back, diminished soon extending all over body, > warm wraps, chill < | Mind.—Disgust with life, but fear of death Disnu back, when walking in the street chattering of teeth,
like for his usual employment. Sadness in morning
fear from 9 to 11 30 A M, then slight sweat, not much. Sin morning during menstruation, with pain in lons
headache during chill or fever, C between shoulders! and nervous excitement, percoducal, in afternoon,
running down back to legs, at 1 P M, at dinner, when
with weeping, coldness of limbs and hot flushes in sitting in a draught of chilly and damp air, ends of fin-face Bursting into tears at the sound of a mano ticed the more the harder it rains, touching any part from least contradiction. teriorly in pharynx when inspiring, > for a moment which vexed, then discouraged him by hacking cough, dulness and sleeniness, with desire Head.—Aching; in forenoon, with nausea Heavito go to bed, at 2 20 PM, fever beginning in a spot be-iness, < occuput, > pressing it against coat-collar tween scapulæ, then extending to r side of head, then Rush of blood to head and face during and after all over head and down back, the fever passes away eating Vertigo, with aching; V in forenoon when in the reverse order from which it came, sensation as riding on horseback, in attacks when sitting, work-it bladder were overdistended, but micturition scanty, ling, walking, < standing and when motionless Pressstool followed by tenesinus, not much thirst during ure at forehead. Sticking in temples and behind chill or fever, at 4 P M slight sweat

until 11 a w, with heavy aching in forchead, aching gentle pressure. Brussed pain in reinple in even-in lumbar region as if back had been pounded, I went ing and might, > pressing against pillow. Pulsating to hed but could not sleep, aching in legs, difficulty in sicking in vertex Borng in 1 side, with coldness of hearing, ears seemed stopped, could feel the heart the part, weeping and meaning (in a man disposed to beating throughout chost, general chiliness on moving hypochondriasis) Sticking in r occipital protuberany part, the headache < motion, but > after moving | ance, in 1 O protuberance in morning, with occasional around and talking, at 11 AM sweat, tever returned at shocks in head, deep-scated pulsating S in occiput 4.30 P.M., with headache, < jarring or moving head, Pain in occiput Falling of hair Sensitiveness of thirst during the first part of the fever, trembling of scalp, and even of hair. hands or legs during the fever, < draught of air, coppery | Eyes .- Redness of 1 taste, rapid pulse, heat in chest and hypochondria, agglutinated in morning Involuntary contraction of weak, empty feeling in pharynx extending to stomach, orbicularis muscle in morning Spasm of r upper

Warm sweat all over body

## Copaiva.

A tineture is prepared by dissolving 1 part of the balsam, from Copaifera Langedorffii, Desf. in 99 parts of alcohol

General Action.-It is an irritant to all mucous Fever.-Temperature lowered. Chill whenever I membranes, particularly to the urinary tract, for

Allies -Canth , Apis

Generalities - Spasmodic paroxysms and other hys-

gers pale and cold, C > heavy wraps and sitting in a Anxiety about his health Peevishness, with ebulliroom where there was no draught at 2 P w the C is no- tion of blood, heat of head and trembling of limbs Absurd recriminations with anything cold will cause a C. to begin between about long-past triles. Masanthropy Unit for scapille and pass down legs, acting at anus, with de-study, head empty, ideas confused, and pain in for-sire for stool, but only flatus passes, raw feeling pos- lead when, arrung against it. Defective memory,

ears, sudden S in temples in morning on washing Fever without thirst; towards night, F from 8 15 face with cool water Tearing in temples, < 1, >

Pupils contracted dyspuces, with desire to breathe deeply, backache, lid, with pain in eye Formication in canthi. Sensi-tired after walking, with aching in lega and back and tiveness to light. Vision obscured Objects look 422 Consiva.

points hover before eyes.

charge Formication Hearing sensitive, < to sharp sheep-dung Whitish, sour, with discharge of ascasounds, so that the report of a pistol caused pain, not rides from the detonation of the powder, but from the shaped, then pasty, at last mucous and mixed with impact of the ball against a metallic disk Painful blood (Canth ) reverberation of every sound, > walking Hum-

of nose and itching in eyes Face bloated Face of nose and itching in eyes Face bloated Face Urinary Organs.—Pain in bladder Burning in neck pale and sickly Tearing in 1 check Red, humid of bladder and in wrethra (Canth.) Pressure on blad-

Laps and tongue red

coldness sides and tip red and smarting Tenacious phlegm, sweetish Foul breath in morning Taste bitter; T too salt to all food

ot tonsils, < r Pain, in pharynx Constriction. Sensation of a foreign body in pharynx Heat, with

stinging

Stomach.—Hunger in evening on going to bed, excessive H, then loss of appetite Appetite lost

Loathing of food all day Thirst, with diminished

(Canth) Copious, and smelling of the balsam, and

acid, smelling of violets

Had a strong olor of Copappetite Eructations, after eating; butter, sour, alian, frothed much, dark yellow, and Bitter-tasting, foul, tasting of ingesta. Hiccough after eating Nau-klbuminuria (Canth)
see, in morning, with diarrhoes Vomiting and weakness of stomach, V and cardialgia Spasmi digit if tollows goorhee, has to make a great effort to para a Epigastric region tensive and painful to touch tro-enteritis Paroxysmal sticking Pain during menstruction Burning pain Pressure at pit, even before breakfast Beating at pit after eating, then palpitation and obnubilation on leaving the table Faintness, without real appetite Digestion retarded and painfully increased by sensitiveness and pains in epigastrium Heat

Abdomen.-Rumbling, with flatulence and threatening of colic Emission of letid flatus in morning in and thigh Burning in skin of scrotum Swelling of bed and after rising Griping Pinching Cutting, after a cup of cufe an last (as usual), then diarrhoa Colic, and looseness Coldness Sticking in hypochon- without erections dria Pressive, at times pulsating pain in hepatic region Swelling of lower Swelling of inguinal red spots Sticking in vagina and neck of uterus glands, with sensitiveness. Inguinal glands painful Leucorrhea after menstruation, acrid L, milky L to touch. Pressure in lower as from a stone. Beat. Spasms of uterus. Pulling pains in suspensory ligaings in lower

Rectum and Anus -Spasms of R Sticking in R Urging to stool, frequent ineffectual Bleeding piles Oozing of serous or purulent fluid Burning itching in anns

Stool.-Two haud Thin, frequent, without pain or urging, with increased mucus Diarrhoea; in mornmg, with exudation from skin, frightful; involuning, with exudation from skin, frightful; involuntary, frequent at night, with spasms of stomach, pressed generative. Generative in describing in recoldness of lumbs and cramp in calves, whitish, < gion of r ovary.

paler when seen with 1 than with r eye Black the stool, alternating with constipation Soft, freounts hover before eyes.

Bars.—Sticking in 1 at might, then purulent dissipation. Ory and formed at first, ending in diarrhoza. Like Insufficient Copious Frequent, at first

Clinical.- (atarrh of the intestines, mucus comes away in ming Roaring

Kosa and Face.—Frequent sneezing Stoppage of with oile and children means comes way in morning, mose mornings Coryas, with headache, pain at root female stank content and blood (Canta, Capa.).

tetter on upper lip, with swelling and pain on touch | der, with frequent meffectual urging and micturition by drops Constant urging, frequent urging after Mouth.—Teeth loose, unpleasant smell from T , urmating Micturation frequent and copious, at night, gnawing in carious, cold air or cold drinks, with and urine light, frequent mostly in small quantities, throbbing pain, clongated feeling, on edge, sense of Micturition by drops (Canth) Micturition painful; Executang pain in guins, palate and with milky, acrid discharge (Canth) Retention of Thingue coated white, green at base, T at urine

Urethra-Inflammation and swelling, with pains which is constantly reproduced in M and throat along penis, I, with retention of urine, phlegmasia of Dryness, anght and in morning Salivation, bladder of prostate, and rectum. I of urinary evening, night and morning, sudden, intermittent, passages and adjacent parts. Discharge was inversely as that of skin; D of mucus; purulent blennorrhagia; profuse milky D Pain at orifice as if wounded, pul-Threat.—Parotid glands sensitive, submaxillary sating pain in U when not urinating the orifice gap-glands swollen, with bruised pain in latter Swelling ing, tunnid, inflated Drawings Burning on urinating, B and itching in U and vagina. Itching before and after micturation, with biting Tickling in orifice

g and
CHINICEL.—Catarrh of the bladder, with great dywiria, especially if it follows genorrhees, has to make a great effort to pass a
mention of the state of the state of the state of the state of the urmaing, swelling of the orisice of the uresthra. Constant dehefore size to urnate Hematiria. Urne smelle of rolete, especially in gonorrhea, discharge yellow and purulent

> Sexual Organs — Excoration of glans and prepuce Tickling of glans — Itching at tip of glans — Excessive erections, with lascivious thoughts and desires, violent E night and morning, with or without lascivious thoughts, no E Redness and oozing between scrotum l testicle, with sensitiveness to touch. Heavy pain in

> Female-Itching of vulva Burning of vulva and ments of uterus, dragging on uterus and bladder, pressure on U as if prolapsus would set in, drawings in uterus, orifice of urethra and vagina Throbbing in ovarian region with pain, T in r ovarian region when standing Menses too early; menses reappear after they had ceased for several days Menses pale and scanty Metrorrhagia

morning, with coldness and drawing tearing in abdomen, obliging him to bend double, before and after Dryness and roughness of larynx Tightness of

larynx during menses, with hoarseness in morn-| Eruption resembling roseola, but the spots are larger tion slow

Clinical.—Bronchial catarrh, with profuse purulent expecto ration. Catarrh of larynx, dryness, painful cough, hoarseness in morning.

Chest.—Sticking in r. Pressure on sternum. Burning Fulness, obliging sighing. Distress when working in a stooping position, as when digging, with labored breathing

Heart and Pulse.-Frequent and feeble pulsations of heart Palpitation, during work Pulse frequent,

Neck and Back.-Rheumatic pain in nape and l scapule Lumbar pains, spasmodic

Extremities.—Trembling , during rest he lies at night Pullings in forearms Pain in 1 wrist Trembling of hands Stiffness of fingers

ankle, P. in r ankle when walking, in I when walking Swelling of feet, of I foot Pain on dorsum of foot during the cold stage Sprained pain in feet on beginning to walk, > walking

Skin.—Irregular, itching, yellow spots on r cheek brace Frequent waking Early waking and mathity in morning and evening Hamorrhage and red spots to sleep again Dreams frightful or lastitious on whole body, - on face Erythema (Vespa), rosy "pumiceous," as if bitten by insects Confluent scarlet elevations on hands and feet Red blotches over whole body, < on face, large red blotches, with constipution and fever (Apis) Red itching spots on l elbow; at sternal region and r axilla Red miliary eruption, vertigo and nausea, the E may be slow in developing and locate upon wrists, hands, knees, ankles and feet, at other times it develops rapidly and covers the whole skin and is accompanied by febrile phenomena, it is characterized by red spots, disappearing under pressure, the spots round or with uneven edges and separated by healthy skin, or they unite and form large red spots, with itching, if the medicine is continued the spots become papules, in rare cases the region becomes

ing and dry cough morning and evening. Hoarse and more elevated, confluent on parts of chest and ness, < morning, with excoriating pain in larynx arms, and look like petechiæ Redness and swelling on talking. Voice loses its compass, the higher of face, with thirst, nausea vomiting, anorexia and notes cause excording pain, which finally makes restleaness, then arms and legs, and finally whole their rendering impossible. Bronchal mucous mem-body, red and swollen, face dusky yellowsh-red, brane excited Cough from tickling in larynx, tra- cedema, < about eyelids, which could not be opened, ches and bronchi, dry C. morning and evening; sticky discharge at margins of lids, elevations on face rough C, with difficult expectoration of greemish and neck like measles, < next the hair and at lower mucus. C. with profuse whitish expectoration, some-parts of neck, over whole body dark red smooth times saltish, sometimes flat and nauseous. Respirational eruption studded with points of a deeper color, hands and feet somewhat resembling face, throat inflamed and dusky red, with cedema of uvula, no difficulty in swallowing, sleeplessness, tossing about all night, thick, vellowish-white fur on tongue, no stool for two days, heat, pulse rapid, small, thready, vertigo, sore throat, meffectual retching after food Elevations as from wasp-stings, confluent on ears and backs of hands becoming after a few days brownish-yellow like liver spots, with mealy desquamation on ears, even after four weeks burning spots could be seen Furfuraceous tetter on 1 concha, with burning pain on touch

Nettle-rash, or like scarlet fever, first on face, < on forehead, then on backs of hands, finally in other ade of neck Stiffness of back, > walking Burning parts, with burning of skin, also with sore throat pain in dorsal spine Sticking in 1 scapula, between (without swelling), then sweat, no fever or thirst, scapulic, cutting short the respiration Pulling in elevations like bug-bite, confluent on ears and backs of hands, then the spots become brown without Sticking in desquamation, except on ears Red itching pimples 1 axilla, extending into chest Axillary glands sensi- on upper part of forehead, on hairy scalp, above ears tive to touch Pain in I shoulder at night, next and on occiput Boils on pubis Pustules like the evening in r elbow, acute, in l. shoulder-joint, l' of itch between fingers and on forearms Eruptive dislocation in r shoulder Numbness of arm on which fever, with heat and headache, purple cruption like variola, in twelve hours it spreads, sinks down and each pustule becomes depressed, soon forms a pe-Lower Extremities —Uneasiness Cramplike pain technal blotch, which becomes confluent with adja-hips, < r Bruised pain in r hip when lying on it, cent blotches Modified pemphigus over whole body, in hips, < r Bruised pain in r hip when lying on it, cent blotches Modified pemphigus over whole body, in r hip on walking and on touch Rheumatic pains beginning at flexure of joints, the bulke aborted where (as from fatigue) in I hip and knee during menstrua- the skin was thin, the discharge excessive, offensive, tion, with spasms of uterus Constrictive pain in hol-viscid, then general desquamation White miliary low of femur before the griping Cracking of knees vesicles on a red base on I wing and tip of nose on stretching legs. Pain in knees, I, when walking. Itching of cheeks, here and there, in nostrils and on Numbness of legs when sitting Pam anteriorly in r chin (Compare skin symptoms with Apis and Vespa)

Clinical.-Urticaria, dry, hot, biting, with violent stching

Sleep.—Drowsiness in daytime (Apis) Restless sleep Sleeplessness and restlessness all night after an em-

Fever—Shivening in morning, and in afternoon heat and thirst—Cold hands, fect from morning till noon; feet, knees and thighs at night, feet and knees during menses Heat, in face in morning on waking, in flushes in face and head after eating, with sweat in hollow of hands, anxiety and indigestion Sweat, in sometimes confluent, preceded by headache, vertigo morning, sour at might, with the odor of Copaiba and loathing Red miliary E, preceded by cardialgia, Scheation as it sweat would break out, which afterwards took place in bed

### Corallium Rubrum.

A trituration is made of the red coral, Corallium rubrum, Lam.

Allies - Coccus cacti, Dros, Merc. Mind and Head .- Full of pains, he uses bad language and curses Peevish Head feels very large. H tumefied, painful and impeded in its movements feels empty Immediate stupefaction from wine.

seems to rise to H and face on stooping Dizzness latter with relaxed penis and without dreams after enting, as if intoxicated Pressing-out pain at forchead, obliging him to move the head from side to side, but it is not > thereby nor by sitting, but transiently > almost complete uncovering of the hot body Pain in forehead so that she cannot keep the eyes onen. > walking and moving about in open air Pressure at F sinuses, > open air, with increased secretion of nasal mucus. P in forchead and temples, whereby the sinciput seems flattened Pain in temporal muscles on swallowing Pain in parietal bones as if forced usunder. < by stooping Sensation as of a wind through skull on rapid motion or on shaking head

Eyes -Redness in evening, with pressure as from sand Pain in las if hot and dry Sore pain on moving balls or lids Pain as if pressed into orbits Burning in candle-light, heat on closing lids, with sensation as it swimming in tears. Drawing pain in external wall of l orbit, extending along nervus malaris to

beneuth cheek-bone (compare Cinnab )

Ears and Nose .- Hearing less distinct than usual Painful swelling in r nostril and on inner side of wing of nose, with pain in nasal bones as if pressed asunder, the pain extending partly into frontal sinuses, partly towards eyes and to temples, with thirst, r side of nose swollen, hot and pulsating, disturbing night's rest Dryness of nose and throat Frequent sneezing, preceded by tickling in nose Epistaxis at night, E now from r, now from l nostril Stopped coryza, could get no air through I nostril, stopped C, then dropping of mucus like melted tallow (Profuse secretion of mucus through posterior narcs, obliging constant hawking)

Clinical.—Painful ulcer in r nostril, sensation as if nose were present asunder Profuse nasal cutarrh, the inspired air feels cold

Face, Mouth and Throat.—Brused parn in I zygoma, < by touch Spramed pain in I joint of jaw on drawing jaw for downward and on biting and yawning Lips cracked, painful On pressing on fossa canina ulcerative pain in corresponding teeth L teeth feel blunted and as if too near each other, or as if a tough substance were sticking between them. Taste of food like sawdust, like straw to farmaceous food, sweet to beer L submaxillary glands swollen and painful, < on swallowing or bending head forward (Merc) Throat hand to her face Symptoms of heat and cold, dry, sore on swallowing

Clinical.—Hawking of profuse mucus, throat very sensitive, especially to air (Merc ).

Stomach, Abdomen, Stool and Urine.-Longing for Thirst, acids, for salted meat Appetite lost during chill, with normal temperature of skin and pain in forehead Nausea, with dry tongue, N , < sitting up, with headache Pressure in pit of stomach, secretions < coughing, swallowing and deep inspiration Rumbling in abdomen Constitution for six days, then a large, pasty stool Burning micturition Urine claycolored, with similar sediment

and unior surface of prepace secrete a yellowish-green ideas, towards night, with increase of stupid, sleepy offensive matter, with sensitiveness, reduces and swelling sensation. Forgetful of little things. (compare Merc) Swelling of prepuce, with sore pain in the border where it rubs against the clothing. Fain the border where it rubs against the clothing. Fain the properties of general galaxy and the properties of the properties

Confusion of H as after intoxication All the blood night and another next afternoon during a nap, the

Clinical.—Ulterations on glans penis and prepute, with sensitiveness and exudation of thin offensive moisture Venereal ulcers, very sensitive, bleeding easily.

Respiratory Organs - Feeling as if cold air were streaming through air-passages in morning on deep insinration, with provocation to cough and with difficult hawking of bronchial mucus Expectoration of yellow purulent mucus During cough pain in cavities of pleura as from a stone pressing downward and causing pain beneath sternum, extending thence to scapula

Clinteni.—Mest volent spannolic cough (whooping cough), often preceded by sensation of monthering, followed by exhaustion clintening, the stacks are extremely violent, the patient becomes purple in the face, followed by exhaustion or vomiting of quantities of tough mucus. Indicated in whooping cough by the extreme violence of the paroxysms, even with expectoration of blood.

Neck. Back and Extremities -Stiffness of cervical muscles. Pain in scapular, < coughing pain in small of back Pain in sacral region, as from pressure with a dull instrument. Weariness of extremities in evening after exercise in open air Pain as if head of the humerus would be forced out of the joint, I, then r, then both together Pain at insertion of deltoid and in middle of r forearm, as if pressed with the ends of the fingers Pain in wrists as after much rapid writing Sudden shooting through r tibia Tearing in r tibia when walking, with tickling in hollow of knee so that knees crack Pain in knee. tibia and ankle as after a fatiguing walk

Skin, Sleep and Fever.-Flat spots, coral-red, then dark red, then copper-red, on palms and some fingers Pamful pumple on hp close to orifice of r nostril Frequent excessive yawning, with pain in joints of Sleepiness so that she fell asleep when stand-Sleeplessness till midnight; with tossing about and coldness if uncovered, but heat if covered Tossing about and uncovering in sleep. Uneasy, dreamy sleep Starting up from anxious dreams as soon as she falls asleep. Chilliness in hot parts on uncover-ing. Cold feet after eating, with het forehead and cheeks Internal and external heat, with full, hard pulse Dry heat, without thirst Heat of face, < bending forward, dry H of face in morning, with cold shuddering creeping over her on putting her artificial heat

### Cornus Circinata.

A tincture is made of the fresh bark of Cornus circinata. L'Her General Action. - Not sufficiently known, but seems to exert a marked action on the liver and intestinal

Allies -Cinchona, Alstonia, Chel

Generalities and Mind. Weakness: in morning on waking; in morning on rusing, with apathy. Indolence lored, with similar sediment

Sexual Organs.—Sweat Red flat ulcer on glans and on work Depression of spirits Poevishness. Indifferunner surface of prepure, with yellowish discharge Glans ence. Inability to concentrate thoughts. Confusion of

**Read.**—Shooting through the whole brain Aching, and tenemus; and dark, with tenemus and burning undeep in brain, under centre of skull, on waking at 6 anus; and bitous, offenses, five hours later another less xxx with distention and pain in abdomen, urging to loose and tess offenses; and scany, with burning pain in the stool tenesmus and burning at anus. Confusion ; in morning on rising. Lightness. Congestion of blood to H and face. Giddiness : on shaking head or stoop-

Pain in forehead, and vertex, with rumbling in abdomen, over r brow, over r supraorbital ridge. Pulsations from front to back part of head Pain in temples and vertex: in T. in afternoon and evening Throbbing pain in temples, and sides of head, gradually passing off in afternoon and night; in vertex Heavy confused feeling in vertex, with drowsiness Pain in occiput, deep-seated, pulsatory, and in sides of frequently during the night head, drawing, and in nape Drawing sensation from occidut to nose Scalp sore Aggravation of an habitual scurfy eruption

Eyes.—Sunken Surrounded by dark circles. Dull and heavy, as after a debauch Contracting feeling around them Heavy sensation around them junctiva yellow Balls painful; B. sore, dull feeling over them Lids heavy

Clinical. -- Scrofulous ophthalms and herpes of the consunctiva, with chronic distribus.

Nose and Mouth .- Prickling in nasal cavity Symptoms of corvza in morning. Face sallow, yellow Dull and sickly expression

throat Tongue furred; white, yellowish bad, bitter, pungent, clanimy, insipid

Clinical.-Nursing sore mouth. Aphthous stomatitis of

to food, and to drink; to meat and bread Destre for sour drinks Eructations, empty, bitter Nausea, abdomen Pain in pit during dinner, with distention of him, with profuse perspiration abdomen from wind, both > immediately after dinner by loose, windy, dark, bilious stool Occasional drawing pains extending to hypogastrium Gnawing, faint feeling. Fulness and oppression, and in abdomen. Burning, and in abdomen Heavy pulsation Empty feeling Faint sensation, and in abdomen Weakness

Abdomen .- Rumbling. Offensive flatus Constant working, as if all the contents were in motion Griping, with distention , G at 2 r M , with ineffectual urging to stool; with rumbling, the G < in umbilical region, occasional Pain Uneasiness, with vague pains, with fulness. Pain in umbilical region Rumbling in hypogastrum; at 11 AM, with griping and offensive flatus Weight in hypogastrium.

Clinical, -Chronic inflammation of liver, jaundice, face yellow, sunken,

stool, pains more acute during the stool, which was rectum; and scanty, with offensive flatus and burning at thin, dark green, offensive, with tenesmus and offensive anus, also with tenesmus; and scanty, with tenesmus, gripflatus; tensive Heavy pam; < walking, stooping or img in umblical region, rumbling and offensue flatus, and shaking head Heaviness Fulness, in brain in sense, such pressing pam in rectum, snarting at anus after morning on rising, > copious, thin, bilious stool, after the discharge, duly feding in head, drovenness and lossitude. Scanty, bilious, slimy, with flatus and tenesmus, during and after the stool burning pain at anus and a short distance within rectum Scanty, with burning at anus, S and dark, with burning pain at anus; and hard, with pressing in rectum Dark, copious, with pressing down in rectum

Clinical.—Diarrhea, dark, bilious, very ofensive, with sallow complexion and sunken face. Dysentery, with burning in anus and rectum and great debility. It is to be compared with Chelidonium in its hepatic symptoms and diarrhea.

Urmary and Genital Organs .- Urme scanty and red , and passed often. Strong and persistent erections

Chest.-Statches, and in back, in C and under r scapula, intermittent griping, from centre (apparently in muscles), down to hypogastrium Bruised feeling in morning on rising, and in back Choking sensation in upper part. Dragging down each side

Heart,-Accelerated pulsation Back and Extremities .- Pains in back, and knees,

in small of back, in lower part of back and abdomen. sore, in lumbar region, < bending forward Legs weak, on walking or ascending stairs, and trembling Skin.—Scarlet rash on breast, with itching. Prickling on arms and legs Itching all over body, on different parts, on head and legs and nasal mucous membrane, legs, thighs and around labia, scalp, legs and Mouth.—Smarting, and in throat Dryness, and in feet, < rubbing or scratching, burning after scratch-Taste ing, in paroxysnis, on back, legs and feet, generally in evening

Clinical. - Vencular eruptions.

Sleep .- Sleepmess, by day; at 1 PM , > strong Stomach.—Appetite impaired; small; lost Aversion coffee, with headache, with stupid feeling; with disinclination to make any effort Sound sleep, with frightful dreams, S and prolonged, but unrefreshing at 10 AM., at 1 PM Flatulent distention of S and Restless sleep Dreams unpleasant, frightful, waking

> Fever. Coldness, then flusher of heat, and sweat, U and flushes of heat in alternation, followed by cold sweat Cold hands and feet, but hot head Flushes of heut, then sweat; to head and face Heat of head and face. in morning on roung, on verter, face and hands, also feet, face in morning on rising, without redness of checks Sweat on slight exertion, clammy S, then chilliness

### Cornus Florida.

A tincture is made of the fresh bark of Cornus florida, L.

Headache Face flushed Nausca Heat in stom-Pulse accelerated and bounding, and tense, and full, strong, and tull, afterwards soft, but full, and irregular, afterwards slower and smaller Pulse full, afterwards slower and smaller,

Bectum and Stool.—Urging to stool; at 5 A.M., with boors, the stool is at 5 A.M., with the stool is at 5 A.M., with the stool is at 5 A.M., with classes, the stool is at 5 A.M., with a stool is a stool is at 5 A.M., with a stool is a stool is at 5 A.M., with a stool is a stool is a stool in the story exist, and especially has durpressing-down pain in redum; L., large, dark, with graping is the stool is a stool in the stool is a stool in the stool is at 5 A.M., with a stool is a stool in the story exist, and especially has durpressing-down pain in redum; L., large, dark, with graping is a stool in the stool is a stool in the stool is a stool in the stool in the stool is a stool in the stool

### Crocus.

A tincture is made of Saffron, the dried stigmas of Crocus estivus L

General Action.—It seems to produce marked hysterical symptoms, with tendency to harmorrhages of dark blood

Allies -Plat., Ign , Zinc

Generalities.—Distended veins, with internal heat but not much increase of temperature. Lying as if Anxious trembling of whole body in apoplexy Spasms every evening, with delirium, alternating with tender mood, wildness and outbreaks of rage, with inclination to bite Sensation of something living and numping about in pit of stomach, abdomen, arms and other parts. Uncasiness of blood, with palpitation Weakness in ciening after a moderate meal, > literary occupation, with sleepiness, pressure on egelids and feeling as if they were swellen, W in morning, > open air, < in the house, with yawning, with indolence and sleepiness, with sensation as if general sweat would break out and desire to sit or lie, even to sinking down, with sensation as if general sweat would break out, and rapid pulse, of whole body, hands and feet Faintness Aggravation in morning Amelioration in open air

Hysteria and nervous prostration, with the peculiar abdominal symptoms or chorea-like twitchings, etc

Mind.—Silly dementia sudden repentance at having injured others evening, anger at the behavior of her relatives and friends and sides of head and she is at the point of breaking into a passion, but at this moment she feels calm, the next moment this administration of the columness sating, sometimes in one side, sometimes in the other, the pain inseems a weakness, then regation with herself and greater volves the eye anger than ever Joy alternating with sadness, with inclination to bite

Inclination to sing, incoluntary singrag if she hears a without dim vision. Crawling in brows single note sing, then she must laugh at herself, but soon. Lids — Twitching (Plat.), with sensation as if something or objects though they were distinctly visible. Senses opened after much rubbing and pressing.

easily lost, with blackness before eyes. Disinclination

for every work

Head.—Sticking, with stopped coryza and in r eye and a l hollow tooth, with dimness before l. eye and feeling as of a cold wind in it Aching; rising from stomach, on moving, with sensation as if brain fell back and forth Stupidity, with painful confusion of occuput Intoxicated feeling, with confused vision and warmth of face Vertigo, in night after rising, with staggering and general heat; with confusion of head, with confusion of head and pain

in eves Forehead -Thrusts extending deep into brain above l eminence, then painful confusion, > pressure (Ign.) Pain; above eyes, < r, < towards evening, with burning and pressure, compelling rubbing; beneath I eminence as if a dull point were pressing inward, then intermittent paroxysms of the same pain, drawing P in a line down middle, painful drawing, with nausea Painful cramplike drawing from 1 eminence to 1 side of bony parts of nose Tension in I eminence Confusion, tensive, as if intoxicated, then in whole head. Stupefaction of forepart of head as if drunken and reeling, > open air

Sudden thrust in r temple, extending deep into brain. Pressure on vertex in morning after waking, with heaviness of whole head so that he could scarcely Clinical.-Chorea, with repeated novebleed of the Crocus hold it up Pain on r side, in 1 side, in 1 side, extending into r temple as a contractive drawing pain, then to ear and throat, where it is < swallowing, inter-Anger at everything and mittent drawing pain in r side like a painful vessel Vehement, rather externally, extending forward. Rhythmical peevish, quarrelsome, an hour later talkative, lively, laugh pulsation in whole I half of head and face Drawing sug, singing (compare Plat) . Vucillating mood towards pressure in r half of occiput Hair falls from temples

Eyes .- Weak, glassy, with sleepiness Feeling of pallor Affectionate mood alternating with rage and biting smoke Pain, with sore burning after reading, with Peevishness alternating with dimness so that he must frequently wink Freling as if she desire to embrace others. Ill humor at what would had wept much, with corresponding expression of face usually make her laugh, so that she loses conscious- Burning Dryness. Feeling as if smaller than usual ness, then astonishment at the outbreak, I at the Feeling as if water were coming into eyes, > open air. slightest thing, then she does not know what she is Running of much water from the dim eyes when doing, with anxiety and general trembling Sadness, reading letters Pupils dilated, then contracted Stick-with anxiety and unasiness, sudden S so that he could ing at one point in r ball in morning. Pain in balls, not fix his mind upon an interesting lecture (Alter with great running of water, then dimness of eyes, P nating moods, see Plat, Ign, Zinc, etc.) in balls as after looking through too powerful glasses,

ungs again in spite of her determination to stop (Tarent), must be wiped from i eye, T of upper, with atching, quiet repetition of a lively melody, even when out of sudden T, with crawling in 1 brow and sensation as if humor Gayetv, bordering on delirum, with pallor, something were in the eye which he must wipe away headache and obscuration of vision, and witty, jocose Frequent necessity to wink and wipe eyes as if a film of and talkative mood (Tarent) Laughter, immoderate, mucus vere over them (Euphras). Individuo to press as if he would die, sardonic, with attacks of morbid them tightly together. Drawing together, with running sollity, and joking with prostration and dilated of water from eyes. Stacking in I lower Burning purple. Longing for he knows not what, with appre-pinching beneath I lower. Sore sensation in evening hension along his properties of the properties Forgetfulness; and absence of mind, does not recoging I in I upper in evening Heaviness of upper, mize an old acquaintance. Loss of ideas on attempting with dim vision. Inability to open on waking at to write down anything It suddenly seems as if thoughts night, as from a weight, if she forcibly opens them would vanish Confusion . Mistakes about the time tension and pressure, and they are only incompletely

Abdomen.-Rumbling in morning in bed, R on vawning Moving in whole when standing, with griping and intermittent urging to stool Sensation internally in sides as if something living were jumping about (compare Thuja), with nausea and shivering. Shocks in I side at night when fully awake, like the Ear, Nose and Face. Cramplike pain in and behind movements of a child at the end of pregnancy Gripr ear Cramplike drawing in concha and auditory ing jerking after an ordinary drink of water Sticking canals Distant ringing in l car in evening in bed, > in side, arcesting breathing. Aching, in a child, he forcibly fixing his thoughts away from it. Roaring bends forward. Pain as from taking cold, drawing and noises in cars, R as from a storm of wind. Voc. P as if menses would appear, P as from pressure on tent energing, S at 7 r.m., then shaking extending from a sorre spot, now I, now r said. Fulness and pressure back to feet, < posterior half of body Epistanis of in A. and chest as if she had eaten too much and too tenacious, thick, black blood, with drops of cold sweat on rapidly, though not after eating Distended sensa-

Mouth.—Throbbing pain as it blood were pumped Painless pinching as from a broad, hard body in r. too quickly through the first l upper incisor, extend-hypochondrium, on every inspiration. Drawing in ing to all I upper teeth (all decayed), < by any one upper, then in region of uterus. Griping in a spot to walking across the room or by opening mouth, > quiet, | I of navel, G above navel in morning Sensation as if something living were moving about deep in lower ache lasting all day, being bad for an hour, generally (Thuja) towards evening Bubbling in lower Pressalternating with watery diarrhoea, the latter usually ure in public region as in menstruation Heaviness in

Anus.—Sticking extending through sacral region ing forward. Tongue coated white, moist, with promi- and into I inguinal region, where it remains as an nent papille, coated white and dry in morning, clean aching, < inspiration; S on r side above A, intermitafter breakfast Speech refuses its service when angry tent S near l side of A Cringing. Crawling as of thread-

Stool and Urine -Blood with the stool Stool tinged with the drug Stool earlier than usual, but difficult pear, very painful on talking or touching tongue Desire to urinate, waking at night, with bruised pain Heat Salivation, with biting as from salt on tip of and numbness in I humerus, upon which he was tongue, with sweetish salt taste Offensive, sickly breath lying, sweat on lower part of body, and on rising ver-Offensive, sweetish-sour taste in morning after rising, tigo, staggering, sensation as of a cold wind upon the rinsing mouth Sweetish taste in back of throat sweaty parts and feeling as if cold sweat trickled down

Sexual Organs.-Sudden intermittent sticking exwhich makes the voice rough and scrapy Feeling on tending up into r hypochondrium, piercing farther each time Itching on r side of scrotum in evening Desire Sensation as it menses would appear, with colic Sensation during inspiration as of sulphur fumes and pressure towards genitals Metrorrhagia on slightest movement. Fatal hemorrhage from uterus, espe-

Respiratory Organs -Hoarseness in morning, with Sticking in trachea, < posteriorly Cough, attack of exhausting dry, > laying hand on pit of stomach; Theret for cold dranks in afternoon Eructations, empty, paroxysm of dry C as from irritation in trachea, C in morning fasting. Nausea; > open air, with weak- with easy expectoration of large masses of mucus. ness in pit of stomach: in chest and throat; and dis- Rattling inspiration, then mucus in throat and hoarseness, the mucus > hawking Dyannea

Chest.—Sticking in l , r ; beneath heart, < inspiration , ness, even to sinking. m sides, rather externally, afterwards extending farther forward and becoming burning, not affecting respira- as if in periosteum , lower part and in pit of stomach, with nausea. Jumping as of something living in r lower part, beneath ribs Shocks beneath r short ribs, near pit of stomach, and on inspiration soreness as if the pain were caused by breathing, jerklike S in I side, as if they would take away the breath Jerking pain internally in I side, as if drawn at intervals towards the back by a thread Oppression, impeding yawning Heaviness frequently obliging deep breathing

Heart.—Drawing in procordial region, extending to stomach, like colic Emptiness in pracordial region Palpitation, with anxiety at heart, with in r index weakness extending through whole body to soles, as if painful, on I frontal eminence

the body were sinking down Neck and Back.—External swelling of neck Painful stiffness of neck Tearing in small of back, < breathing Pain in small of back on motion in bed.

in morning and at night Extremities.-Cracking in joints, with pain on motion Weakness, with bruised sensation on motion,

hip-joint Falling asleep of an arm hand and foot morning in bed Shocks in a spot on back of Cracking in joint on sudden motion, with pain as it arm for a distant place, but cannot reach it would be dislocated Pain on motion as if humerus were arm outward

tion, < forearms Falling asleep, at night in sleep, wind extending up arm and of hands, the crawling pain wakens her, with im-mobility, and of hands Sudden tearing in r elbow whereby benumbing warmth spreads over hand.

Hand -Pain in r Tensive drawing in I metacarpal joints. Sticking in I index Sudden burningcrawling motion in finger-tips, as if asleep, on entering house after a walk in raw air, with sensation as if bound so that the blood could not circulate freely, the sensation > bending fingers into a fist

when sitting, as after a violent fall Cracking in r orrhages, etc hip-joint on stretching thigh and on moving it forward Aching on lower surface of thigh after long sitting Carbo veg Wearmess of thighs, < sitting, of femora in evening, > ful tingling extending from above downward

Choking ful tension on sitting down, on rising it becomes a during inspiration from tickling in upper part of pain as if dry and as if they would creak on motion traches.

Intermittent painful drawing in the bent knee. Weari-

Leg -Intermittent pain in a spot above malleolus, Brused sensation . in calves, as tion or motion. Aching in the whole, sudden, in if he would stamble over his own legs. Smarting in calves, then tearing Sensation of paralysis on walk-

ing and standing, < knees and ankles.

Tensive drawing in 1 ankle Smarting of I. sole when sitting Aching of soles after standing, A of soles as after a long walk, with necessity to move then; Burning and crawling in feet, < soles, as after walking in tight shoes Weakness of feet, < standing and walking: even when sitting, with heaviness as after a long walk, of feet and calves as if she had walked too far, < walking Sticking in ball of I great toe

Skin -Scarlet redness of whole body. Suppuration Warmth about heart, > frequent yawning, with anxi-of an old indurated bruise on finger, with pain and ety and oppression of breath and inclination to breathe soreness Crawling here and there, > scratching, C Itching on several parts, intermittent

Sleep.—Yawning, with chilliness, burning of lids and thirst for cold drinks, without drinking much, after supper, frequent Y, excessive Y, with sleepiness Sleepmess, after dinner, with creeping chills Waking early and thinking that it is late, waking early and then more wide awake than usual Frequent waking , with uneasy sleep and vivid dreams Singing in sleep Laughing in a dream Confused and Upper Extremities. Shoulder Twitching on top in frightful dreams of what had been spoken or done during the day, of fires and the like Dream that she hurries

Fever .- Chilliness; all the afternoon, with thirst, lying loovely in joint and would be easily dislocated; feel- at 9 PM, increasing to a shaking chill, with pale face ing in 1 joint as if humerus were lying loosely in it and cold hands. Sudden cooling sensation on 1 parand would be easily dislocated Bruised sensation letal bone as if a drop of water fell upon it from a Tensive aching in joint, with cracking in it on moving height Coldness in back, I side, as if he had been dashed with cold water, creeping along back, across Arm - Pain in 1, with sensation of paralysis Bruised shoulders and then down arms, with gooseskin and sensation on motion Heaviness and bruised sensa- frequent yawning Cooling of hands, sensation of a

Heat towards evening, < in head, with redness of face and thirst, without dryness of mouth Internal H., with Pun in r forearm, extending obliquely to thumb; P. prickling in skin as if sweat would break out, but almost m forearm, m a spot near l. elbow, whereby the elbow cold temperature H creeping rapidly over body, H is spasmodically thrown upward. Intermittent draw-so that it seems to crawl in the skin Organic of blood ing in forearm, so that every intermission causes bur- as if everything were moving in the body, without rowing in a spot, < resting forearm on anything, much noticeable heat. Heat of face in morning after waking; H. of face without marked redness

### Crotalus Horridus.

The venom of the rattlesnake is received on sugar of milk and triturated

General Action .- It produces a general disorganiza-Lower Extremities. Sudden shuddering in nates tion of the blood, with himmatogenous jaundice, himmatog

Allies -The serpent poisons, also Canth., Phos.,

Generalities.-Lying on back, with limbs flexed during motion, < after motion, > by rest, with pain- and head hanging slightly towards r shoulder. Turning about much in bed Motionless, eyes and ears Knoe —Cracking, even when standing. Noise on inaccessible to any impressions. Bleeding from all stooping, with pain Tearing extending to mallcoll, orifices, suddenly, from east, nose, guns and beneath where it continues aching and drawing book and forth, neate General droppy. Suedling of whole body; < so that she must often move the feet at night. Pain-head; yearly, with fever and macules. General trembling. Nervous agitation. Twitching Convul- vomiting of bile, constipation and necessity to he sions, in morning, with trembling of limbs (compare snake venoms and Phosphorus l).

down; with nauses, with sopor; before eyes, even to falling, with dilated pupils, earthy paleness of face

Pricking all over body. Pain, universal, P. in and blue rings around eyes, sudden, when writing uscles and joints; in wounded part after recovery, Forehead.—Stinging above 1 eye Tearing in brain muscles and joints; in wounded part after recovery, or twitchings in it, pains alternating rapidly with each other, burning pain in trunk, < touch, with sensi-sion Pain, in front part of head; above eyes, in r side bility, burning P in trunk, < lower part, < touch and under r orbit, over 1 eye in morning on waking; Soreness Bruised pain in morning after waking, is > towards evening, above r. eye, with nausea and scarcely able to rise; in all bones in morning on vertigo, above eyes, suth oppression; then nausea, waking, > rising Restlessness Weakings, tired by grasping, over back part of 1 orbital plate, pullsative, alight exertion (Phos), by standing, in morning, in behind 1 orbit, heavy, across middle, a sleep, in morning, with disinclination to rising and to taking whole front part of brain, as if congested, also in his usual cold bath, and the muscles refuse their service, morning on waking, < under surface of 1 frontal lobe, apprehension, sudden Faintness, with impercepti- gested feeling in front of brain. Tension of mobile pulse and nausea. Paralysis of one side. Symp- and in nape. Confusion in front part of brain. toms chiefly in bones

Clinical.—Palsy has been relieved Chronic rheumatism Tetanus was cured by the injection of the poison, though the patient was greatly prostrated thereby General exhaustion, with mumbness of extremities, vertice, cold hands and feet, backs of hands mottled Purpura haemorrhagica

Mind.—Delirium, at night, with plaintive and feeble moans, with swollen face and besotted expresion, pupils dilated, vision lost, asked frequently if it was not raining hard, though the night was calm and Berlin he was moved to tears Ecstasy Buoyancy occupation Peevishness and relaxation, Annoyed by the least noise Depression Melancholy was quickly changed into gay anticipations, then general dropsy Misanthropic and indifferent mood, with sudden weakness, headache, heartache and excessive the mediate headache repension of the depression of the desired from the decident of the decident weakness, headache, heartache and excessive them headache in depthers and frequent headache in depthers and weakness Occupial headache recurring several times a day His relieved the extensive headache. The depthers and weakness Occupial headache recurring several times a day His relieved the extensive headache disputations headache recurring several times a day His relieved the extensive headache in depthers and frequent headache in depthers and frequent headache in dymenory and dymenory and the decident headache in the section of the decident headache in the section headache in depthers and frequent headache in dymenory and the decident headache in depthers and frequent headache in dymenory and the decident headache in depthers and frequent headache in dymenory and the decident headache in depthers and frequent headache in dymenory and the decident headache in the decident headache in depthers and frequent headache in dymenory and the decident headache in depthers and frequent headache in dymenory and the decident headache in depthers and frequent headache in depthers and frequent headache in dymenory and the decident headache hea by the least noise Depression Melancholy was properly inability to think, comprehend or remember distinctly Mistakes in writing, inability to spell correctly, though thinking of the proper letters

Memory weak Speech confused 4 nected, skin cold, pulse rapul, incoherent answers Senses lost

Clinical.—Incipient senile dementia, forgetful of figures, names and places, or he imagines himself surrounded by fees or hideous animals, antipathy to his family Delirium of typhus and delirium tremens.

Head .-- Aching, before going to sleep, < undressing, > sleep, from rush of blood and constipation, with melancholy, gradually increasing and decreasing; extending into eyes, extending into I teeth, paroxysmal, < above r eye, with vertigo and nausea on moving; neuralgic, and in neck Singing, as after taking chloroform. Confusion Lightness, with pressure in temples, < 1, which makes him bite the teeth together Heaviness Rush of blood; with convulsions Feeling in morning on waking as it brain were contracted and fell about on moving head, with sencontracted and reasons on morning near, measurements and grasping pain, synchronous with pulse Feeling of intoxication Vertigo, when sitting, resting head and keeping quiet, but recurring on slightest movement, with heaviness of head, as if the corvical nuncles were too weak to support it, both vertigo pand heaviness > lyung down, V. > walking in open before the pand, Hemorrhage is the ratus, speculity in light discussion, with pain above eyes and in temples, < r , nauses, the contract of the pand in the

above root of nose, < coughing and sneezing, with confuwith head hanging upon his chest, trembling, as from with sharp pain in centre of I occiput Full, congested feeling in front of brain Tension of muscles.

Muscular twitches in temples Sticking in temples , 1, and in 1 side of head, pain in temple, 1 Drawing pinching in r temple Painless pulsations in temples Pain in vertex in afternoon, tall night, for three days. then in forenoon, with heat and flushing of face, Downward-pulling in a spot in r side of vertex Drawing pain from vertex into r eye in evening Shaking and wavering in 1 upper part of head, < ascending steps or walking rapidly Feeling as if there would be a violent pain in r side of head Alternaclear Excitement and loquacity, E, for example, tions of different kinds of pains in 1 side, drawing, when reading Humboldt's lecture to naturalists in pressure, pinching, tension and bruised pains, extending into orbits and teeth Clawing pain in I side of Anxiety, with restless heat Apprehension Dread cerebellum Pain in occiput, as from a blow, < lying of selecting remedies, which is usually an agreeable down again after rising (felt years previously) Falling of all the hair Itching; with much dandruff

Eyes - Yellow (Phos., Vip) Red and watery Looking as if shooting from the sockets Sunken Muddy and heavy, in morning Dry. Lachrymation, < damp weather, with momentary loss of vision. Conjunctive injected Pain in ball on moving eye like a pressure and as if eye were too dry internally Pupils contracted Half open and staring Dark redness of 1 upper lid, with dryness and burning within eyes and redness of canthi. Lids swollen. Lids almost closed, closed, upper hid and superior recta being paralyzed, pupils slightly dilated and insensible to light, vision apparently lost, eyes looking straight forward, but when the lids are forcibly opened the eyes were directed outward to escape the light Quivering of I lower lid Itching of canthi Heavy pain in back of orbit and at 1 brow Pressure deep in orbits, behind ears and in nasal bones, obliging him to bite the teeth together Vision dim, < for distant and double Vision lost, objects, when reading, and double when reading, in r. eye, with paralysis of levator muscle, injection of conjunctiva, < r, red zone around corner, < r, pupils contracted, aqueous humor cloudy. vision in 1 as through a film, 1 pupil grayish

Ears.—Brused feeling in lobules Drawing behind | cesophagus, extending to stomach, with pressure in pit r and down neck, in r, with pain in 1 side of head of stomach and paralyzed feeling in I law Tickling deep in r and paralyzed feeling in 1 jaw Tickling deep in r | Clinical.—Diphtheria, fauces swollen and dark red, fright-meatus, hot tickling as from wax Stoppage, in r | ful headache Diphtheria, with oozing of blood from anus, mouth, and drawing in both ears, painful in r, with heat and etc Chronic spasm of cesophagus, cannot swallow any solid subsensation as if wax would run into mouth Dull hear-

Clinical.-Otorrhoa with scarlatina, offensive and bloody,

Nose .- Drawing-downward pain on r side, near canthus, then changing to bruised pain Stinging about nostrils Corvea Frequent sneezing and much catarrhal irritation, violent 8, with sticking in chest near r shoulder-joint, then pain in sternum

### Clinical. Syphilitic ozena

Face. Yellow Leaden-colored Dark Red colored Swollen, in morning, and black Drawn Convulsed in both together Jaws, spasmodic contraction, mucus like the white of egg stained yellow; green; cramp, locked, pain in lower and in direction of submaxillary nerve, bruised pain in lower, and in teeth every half hour, yellowish-green and fetid; bitter Laps swollen Trembling of lips, with weakness and bile, blood faintness, of lower, near I corner of mouth Laps covered with foam Dryness of lips and throat with- in pit; in epigastrium Pressure, with discomfort in out thirst

Clinical.—Eryspelas Acne Papular eruption on the chin, associated with delayed menstruction.

Mouth.-Teeth loose Shooting downward, almost like a blow, in an upper back tooth, sudden S up and down in r lower back teeth Toothache Teeth and naws seem bruised Inclination to press the tongue against the lower incisors, with crumbling of them on the inside Gums bleed (Lach Carbo v) white G , swollen , painful, with red margins around the teeth Tongue swollen; and mouth mflamed, and out of mouth, so that it closes the throat, and brown with indistinct articulation Tongue brown Tred and sore T coated, white T dry Loss of speech, from constriction of tongue and throat, and motionand sore T coated, white T dry Loss of speech, from construction of tongue and throat, and motionloss, with trenbling pulse Pain in salivary glands and in different branches of nerves of face and teeth ricking of palate and faces. Salivation obliging to worst the whole content speech seed to the property of the pro him to swallow Taste bitter Taste sourish after the usual breakfast There was no taste of salt in a glass of salt and water

Clinical.—Granding of teeth at night, so terrible that she has broken her molars, on waking face distorted, drawn towards the left (in an epileptic family), with delayed scanty menstruation

Throat.—Swelling of parts under law and about throat Angina tonsillaris Pricking in fauces when reading, with constriction Neuralgic drawing in waking at night. faurces, I stide about root of tongue, waking at 2 A M
and almost producing choking Sore pain about cannot be at the tooch of her dothe, periphilits with high fever,
utula on swallowing, sudden soreness in evening,
much utula on swallowing, sudden soreness in evening,
much sudden S in the might, as of swelling of utula
and velum, with dryness of mouth
Fooling as if
upper lid, immediate relief from Crot 6th. The liver is pain
velum was stiff and too long and as if fauces were
lined with mucus, afterwards mucus must be hawked
lined statement of the lowed, dark, fluid, containal cosing, with fances, < 1 side about root of tongue, waking at 2 A M up or swallowed Painful rawness Constriction. Tickling in pharynx Dryness , and thirst Frequent swallowing of saliva, with compression of throat with- mucus from the anus. Diarrhoea; in afternoon, with out dyspnœa Difficult swallowing; of liquids. Mu- nausea, anxiety and thirst; then constipation and

Stomach.—Appetite bad; lost Craving for stimulants, < wine Thirst, during the fever, unquenchable Eructations tasting of food, rancid E all the afternoon, of sour acrid fluid after eating white bread. Nausea; > vomiting; with mability to vomit; with sensation as if something rose in resophagus and remained in upper part of chest, with coldness, with cold skin; with rigors, pulse rapid, threadlike, with syncope on becoming upright; paroxysmal, till noon, Systems or weeting uprair; paralysisis, in near setting, walking or standing. Vomiting; on least cand black Pale delto return amything, V of food, work V of food; of Drawing pains in everything but jelles, brandy and coffee, undigested bones, first in r maxilla and zygoma, then in I, then food mixed with a greenish fluid, then thick viscid

Sticking in pit Pain, after breakfast and dinner, S and region of pit, as if he had eaten too much, a sensation as before fainting Intolerance of clothing in epigastric region and beneath hypochondria (Lach) Soreness in morning on rising; < food, S. in epigastrium, extending upward under sternum Throbbing in pit, with rancid sensation in stomach Quivering sensation in epigastrium, with nausea Weight, and on chest The breakfast hes heavy all day. Burning pain in epigastrium, > stool Heartburn all day, < afternoon, with feeling as it esophagus were full of rancid food and eructations tasting of food: H at 4 PM, lasting all the evening, after the usual light sup-T red per Faint, sinking sensation in epigastrium

Abdomen.-Swelling Flatulency. Inflammation of viscera Burning pain, with sensitiveness, < touch Pain in I side like cuttings through spleen after violent running, < deep inspiration Burning pain in umbilical region. Pain in middle, beneath umbilicus, as if too full. Inguinal glands on one side enlarged, I Pain in course of colon; at 11.30 AM. Burning pain in hypogastrium extending to sacrum,

Rectum and Stool.-Tenesmus. Passed blood with cus in esophagus Scraping rancid sensation in hard stools; frequent, with pain in rectum; frequent, watery, with colic and tenesmus. Pasty stool Con- amounting to faintness. stipation Bloody S. Frequent S. two in evening. Involuntary S , in morning, of dark bilious color.

Clinical. - Diarrhoa during bilious, remittent and other adv-

Urinary Organs .- Strangury (Canth ) Involuntary micturition; every few minutes. Micturition frequent Feeble action. Palpitation, with sensation as if the heart and copious, copious, afterwards small quantities of pale urine Micturition rare and urine scanty and high-colored Hæmorrhage from wreth a Urune looks ing, and small, R, then slow, small, compressible; R like that in jaundice Urine increased, and reddishvellow; scanty and red

Clinical.—Inflamed kidney, dark bloody urine Hæmor-rhage from the kidney after scarlet fever Hæmaturia with bronchitis (Phos.) Hæmaturia with disorganization of blood in low fever

Sexual Organs.-Cutting in glans Erections at night Excitement, during the day, with apparent distolic interval Intermittent shooting, rather burning pain from L side of uterus, passing to region of transfrom both sides towards centre, thence passing up I side of trunk to face and temple as a cutting, intermittent, neuralgic pain Menstruation too soon, free, preceded by weight in head and ears, accompanied by pains in abdomen and back and cold feet, lasting longer than usual and going off after two days, with frontal headache, which lasts from 10 PM till 1 AM

Clinical.—Dysmenorrhoza preceded by pain in uterine re-gion extending down thighs, which continued for two days during the flow, during the flow aching in region of heart, extending through i. arm, cold feet, etc.

Respiratory Organs .- Pain in larvnx extending into teeth Larynx painful to touch Paroxysmal bruised pain in larynx, shooting into chin and at times into lower teeth, sharper in larynx than in chin Voice weak, and hourse Tickling in trachea provoking dry cough, afterwards tickling without cough Cough, with sticking in side and bloody expectoration, dry C at mght, with tackling in throat, C, with expectora-tion of bloody mucus Spitting of blood (Phos). Ex-pectoration of florid color Every appearance of Said his blood was suffocating him Dysphoea, with symptoms of inflammation of lungs and intestines. Difficult respiration (Phos ), in evening in bed, with tightness of chest Easily out of breath on ascending a hill Respiration labored; and rapid, and slow Singultus Stertor

Clinical.—Whooping cough, with great debility, cardiac weakness, blueness of face, after the attack gets its color slowly, or when the face is puffy, nosebleed, etc.

Chest.-The milk of the mother became deadly poison to her 5-months' child Sticking in r side. near sternum, in r side on sneezing, in forepart, exl. arm; beneath l arm, extending into l side of chest, with great pain on deep inspiration; with vomiting of green fluid; in lower part or at pit of stomach, with stricture; sudden P above l. nipple, as from a blow

with colic extending downward from umbilicus; flammation of lungs and bowels; when sitting, almost

Heart.-Sudden digging Pain Soreness as if in pericardium Tenderness in morning when lying on Weak sensation about; and on exertion ande rapid beats. Rapid beating on slight exertion, with deep-seated aching at point of l. scapula. Irregular action; and trembling and scarcely perceptible tumbled about

Pulse.-Rapid, weak, and intermittent, R. in evenand hard, then weak and slow Slow and small Strong and full after formation of an abscess Hard. then weak Irregular. Low Weak alternating with rapid Tremulous, and scarcely perceptible Almost imperceptible and thread-like next morning Imperceptible; at wrist, at wrist, but action of heart rapid and feeble, with remarkable shortness of systo-

Neck and Back.-Gouty drawing on 1 side of nape, extending to shoulder Visible twitching of lumbar verse colon and there shooting or cutting across, as if muscles Inflammation of r side towards lumbar region, with pain and extravasation of blood Pain in kidneys

> Clinical.-Softening of the spinal cord has been arrested (Phos).

> Extremities -Swelling and pain Convulsive movements Tearing yearly or at times Rheumatic pain in wrists, elbows and ankles Numb pain in toes and anterior part of fingers, as after cramp Heaviness of arms and legs, as if the bones were made of heavy wood. Painful paralytic sensation in boncs of fingers, arms and legs when sitting in evening Paralysis. < upper, particularly below elbows, meffectual attempts to stand, as soon as he got on his elbows and knees or into a kneeling position he fell back helplessly on his

> Upper Extremities .- Glands in axilla swollen and tender Paroxysmal bruised pain in bones of shoulder, extending backward, < bending arm backward Tensive pain in shoulder, extending to neck, < on moving arm, drawing tensive pain in r shoulder, extending up neck, as if some one were pulling on a tendon extending from shoulder to neck and drawn tense under skin, < moving arm, especially backward, and by pressure

Arm -Swelling and heaviness; S, with discoloration, with inflammation and gangrene morning when moved, drawing pain in bones of r. extending into thumb and little finger Numbness in morning R could not be used with freedom (from bite on 1 hand) Bruised, cramplike sensation in both upper Pain above r clbow, in r clbow, < by touch and moving arm up and down, with throbbing. bruised pain in ribs beneath r. arm Swelling and tending into bones of 1 shoulder. Pleurisy, with pain of forearm and hands; S of forearms, of 1, exremittent fever Pain; 1 then r side; below r, then tending up arm, of r, only to elbow, with pain, < 1 Drawing pain in r wrist, waking in morning

Hand -Swelling (of the bitten H ), and of the fingers, fingers semi-flexed on palm and rigid, the hand flexed on forcarm and forearm on arm, all livid, Soreness, with cough in morning, along cartilages of black and blue and cold Cold swelling of H and ribs in epigastrium; sore pain in bones, in the middle, arm, with pain on pressure Contraction of some somewhat to r side, < touch but not on deep inspira- flexors Trembling (Phos); during rest Pain in 1 tion, with sticking. Oppression, with evident in- palm as from a bee-sting, but more spasmodic, < mov-

Fingers -Swollen and insensible Shooting into 1 ring, with pulsation Brused pain through metatarsal joints of r , in two last phalanges of 1 little, with pulsation in tip Pain in I ring, and in last phalanges of r. little and of 1 middle, as when a very cold hand times in bones, < r index Drawing pains in bones mottled of 1 thumb

Clinical.—Symptoms of paralysis of l. hand, it feels dead when sewing, also I leg

a tendon were drawn from sole through femur and the arm and hand, then an abscess forms, which becomes foot were thereby drawn up Insensibility Sticking gangrenous backward across r hip-bone. < motion cles were tender, afterwards as if suppurating, < restto foot

from 1 to sole down leg, < standing on r. foot, in r patella and tibia cold. on walking, then pain in hand and jaw, sudden, in r in hollow of r, between tendons

Leg -(Bitten) became the color of the snake, the tlesh decayed and fell off in pieces Dropsical Distended and threatened mortification, the skin on inside Lower part and foot so swollen as to rupture skin from toe to ankle, and black Cramp, in place calf, disposition to, in morning Pain in r. tibia, sore, tended, in all about eighty at one time in 1 calf, < touch, burning (in bitten leg), with swelling and heat—Bubbling in calves, with pains in bones and tingling

Bruised pain in malleoli on walking, B pain in tendon behind I malleolus, < moving foot and touch Swelling of feet, every evening, and ugly ulcers Shooting from the bitten foot up inside of leg to knee Sticking in r sole, with burning and with heaviness of foot Pain in I foot; in foot on stepping; sore, in sole, in sole, in front of heel, as from stepping on something sharp with the bare foot, pinching drawing P in heels, < bones, extending to malleoli Cramplike sensation beneath I little toe, as if some one turned alternately in all parts, < on scapular it around Wearmess of toes

ing middle finger, in the last joint of which the pain pain, green, yellow and bluish spots after the swellis first felt. Paralytic weakness of r and of fingers, ling had ceased. Whole arm livid as if putrefaction had begun Black spots Jet black elevation on r. hip (after bite on 1 ring finger), with soreness, afterwards the discoloration extended to level of umbilicus, around body and down to limbs, gradually disappearing from above downward, leaving toes last R side of is suddenly brought near the fire Paralytic pain at neck and body down to lone inflamed, painful and

Swelling of hand, forearm, arm and shoulder, with a dark ecchymosed line from root of finger almost to shoulder-joint, the inside of the bitten finger, as far as the second joint, covered with blisters filled with dark Lower Extremities.—Tottering Feeling in r as if fluid blood Swollen, hot, tense, painful, with cold

Glands of axilla sore and painful (after a bite on l pain in head of femur, with throbbing perceptible to index), with restlessness and sleeplessness, next mornthe hand I am in thighs, < 1, as if deep-scated mus-ing a line of inflammation along arm to axilla, on attempting to walk nausea and vomiting, the pain > resting thigh on edge of chair and on walking Bruised ing arm on an inclined plane, then soreness of back, pain in thighs as after skating too much, < walking then the swelling extended down side of hip, on removal and touch. Sore pain in thighs, < touch and walking Tensive drawing bone pain from 1 hip to loot, sanguineous fluid, without smell, the nail loose, the red
with bubbling sensation in calf. Weary and cramplike line following the lymphatics was filled with yellow pain in temora, extending to abdomen and backward, serum, then palmar surface of the first and second as after much skating, it seemed as if the flesh would joints of the finger was gangrenous, the granulations be drawn up, which aggravated the pain Sudden rough and appearing as if sprinkled with othre, then the drawing in I hip, in evening on walking, extending nail was removed, a slough formed and on coming away left the bone exposed, this afterwards exfoliated Knee -Drawing pain as if through marrow of bone and had to be removed, the finger was left deformed Coutlike drawings through r and and its circulation imperfect, the finger susceptible to

Eruptions of various kinds Soft lumps under skin when walking and sitting still Rheumatic drawing in forepart of shoulder-joint, above axilla, with sticking, < bending arm backward Pimples, red, small, with large ones on and between scapulæ Hard itching tubercles in the skin of calves, < 1, gradually coming to the surface and scaling with the scratching shining, black on outside, with black and yellow spots Pustule near 1 wing of nose, with tensive pains extending into cheek, then reduess and hardness in this Boils on arm as far as the swelling had ex-

Vesicles, on the swollen arm, passing into ulcers, with a red spot under each vesicle, with red areola, Weariness, aching Feeling as if the whole r were on inner side of arm, beneath shoulder and near only half alive, and, on stretching the muscles, which elbow, (at the place of the bite), on being opened the he is involuntarily inclined to do, shivering through water that filled it scalded the parts it passed over, upper part of body, with shaking of head and tension over metacarpal bone of r thumb every three months, of torchead and muscles of nape Going to sleep after with contraction of flexors and inability to extend riding one over the other; going to sleep when sitting, the hand, the first time with beating pain, filled with dark, bloody serum Abscess on outer side of elbow, with discharge of reddish-brown matter and membranous parts of cellular tissue, with diarrhoea and chills, then extension of the ulceration, then gangrene near shoulder. Gangrene of butten part, extending over body Ulcers, on r thigh Old scars break out again

Oozing of blood in the form of sweat Tension Itching, whole body in morning on waking; about bend of arm; on middle joints of all fingers; sticking,

Shna.—Yellow color of whole body; in spots; Y and dark spots reappearing, with swelling of hands and geogrees, in patients with very low vitality. Felons. Pustular foet the next year at the same time. Blue and yellow spots next year, with swelling, yearly with fever and spots next year, with swelling, yearly with fever and

extremities, and very languid circuistion. Petechial spots over the whole body, especially the lower extremities, with funtness, irregular attoo of heart, dissumes. Eryspels after vaccination, the putule filled with dark lymph, the whole extremity became inflamed, thus extended even to the trusk, eryption even on the lower extremities. After vaccination, postular eryptions on back was extremited after the vaccination, postular eryptions on back was extremited after vaccination. septicemia from dissecting wounds. Gangrenous inflammation of skin and cellular tissues. Abscesses, pustules, boils, carbuncles, etc, the parts look bluish and unhealthy, with great prostration, etc Ervsipelatous inflammations following bites of insects

Sleep.-Yawning Sleepiness, at noon; early in evening; in evening, with heaviness, with cold skin Coma Lethargic state, requiring to be spoken to in a loud tone. Starting in sleep Sleeplessness Dreams, many, not unpleasant; D that he was traveling in all parts of the world; anxious, of strife and anger, that he had fallen out with his father, who would not recognize his son because he had embraced homeopathy; of horrid places on earth only, often of hawk cut into pieces, and frequently his feet would rather play than attend to his business Fretfulness grow into two hickories

Fever -Coldness, with rapid pulse and nausea Shivering; with diarrhoea, in head; creeping over scalp, so that the hair stands up Cold skin, with rapid, weak pulse, with nausea; with hot swelling of arm Coldness of limbs, in morning; with insensi-

bility; of hands and feet, of fingers

Heat, even in cases where the pulse sank, with thirst, hiccough, vomiting of bile, palpitation, weak, rapid pulse and exhaustion Dry, and exhausting, with dry tongue and thirst Fever resembling yellowfever in its initiatory stage, nothing was wanting, expression of countenance, pain in loins, headache, symptoms of gums Burning in the wound, extending over body, even to top of head Heat of cars, in towards forely, with sensation as if wax were running down of appetite throat Heat of feet; in 1 anterior foot, and gnawing, with drawing in bones of r arm, extending into thumb and little finger; of palms, with itching and general flushes of heat

Sweat, cold; and viscous. S. in axille stained a reddish-orange. Dry skin, in palms, with stiffness and heat

"Ellisteal.—Extractly valuable in forces of a malgrant type, expectedly unabgrant scatching, and an all fewer with of present a humorrhage or putrescent character. Malgrant scatching for the property of the contract of the property of the Clinical.-Extremely valuable in fevers of a malignant type,

# Croton Tiglium.

One part of Croton Oil (expressed from the seeds of Croton tig-lium, L.) is dissolved in 99 parts of alcohol, and diluted for use. (Much of the commercial "croton oil" is obtained from the seeds 'Jatropha cureas.)

General Action.-A powerful drastic purge. When applied to the skin it produces an eruption of small pustules with inflamed areolæ

Allies - Jatropha, Gamboge

Generalities.—Sudden emaciation Generally lying quietly on belly, but occasionally tossing about Tossing about convulsively Trembling of whole body Sticking, with sweat on forehead Nauseating pain. < Mulaise; < bread and butter, she must he Discomfort after dinner. Dulness of whole đown Uneasmess Lay in a lethargic state, somebody times drawing himself up as if in pain Collapse Faintness, during and after vomiting Disinclination Weakness, in morning on waking, for every exertion with weakness of limbs, in morning on rising, with trembling of hands and feet; after stool, with pain in abdomen, with nausea; with ill humor

Anxiety. Dissatisfaction Dis-Mind -Sadness rolling amongst rocks, sometimes that he was a white inclination to speak Disinclination to work, would

Thought difficult Memory lost

Head .- Jerkings, sticking. Sticking extending to vertex Aching, when walking, > taking off his hat, < the middle of the day and a few hours after dinner; as from a disordered stomach; burning Confusion on rising, in morning on waking, with heaviness and dulness, all night, on going into open air, till supper, with vertigo, < bread and beer, with pain, throb-bing, tension and pressure outward in sinciput, < r side, with pressure downward from vertex, so that sometimes sticking extends below ear, with impaired hearing in r. ear, with dulness and pressure in forehead, with heaviness of head and crawling in eyes, with pain, then general heat and sweat, with pressure towards forehead and nausca, with vomiting and loss Fulness Heaviness Feeling as after intoxicants. Vertigo; in the room, with vanishing of vision; < open air, with nausea, pallor and weakness, < r side, with pressure in r eye, and falling down insensible; with roaring in cars and inability to stand from fear of falling, so that she could scarcely remain sitting, < looking up, threatened, when walking in open air

Forehead -Sticking in brain above r eye, in sinciput, on walking Pain; r side and temple; I half of sinciput, > keeping quiet, with tearing extending to r temple, where it remains as a sticking, confusing P. in anterior and upper part of head. Tensive pain in sinciput, with pressure and sticking, T pain above r. orbit, with pressure in r side of occiput Dragging in sinciput. Fulness and pressure Confusion, in sinciput, with pressure and heaviness sinciput

Sticking in I temple Pain in temples, twinging, in I, as if burnt Tearing towards vertex Pain in occiput Confusion of 1 half of occiput, as if held tight Confusion in occiput Crawling on occiput.

Prickling in scalp of vertex

Eves.—Brilliant Inflammation (local effects), of one and side of face Sticking in middle of 1, then indications of it in r , S. in l ball. Pain, then swelling of eye and side of face (local effect) Heaviness and weakness Luchrymation, with running of water from nose Pupils dilated Redness of l. conjunctiva Red swelling of a gland in r lower lid Twitching of lids Jerking sticking in r external canthus, with contraction and twitching of whole eye Cramplike pain

in r lids, < towards external canthus Itching of r | down cesophagus Tickling of r tonsil; where hard lower lid, of 1 upper Fog before r eye, then weak-now of it Vision dim, as from smoke in the room Vision impaired, with starng, glittening eyes Vision of stending up T, with pressure in pharyux Burning, easily vanishes

Clinical.—Postules and vesteles on the eyeball. Ciliary neuralgus, and feeling as if a string were pulling the eyeballs both to the lead. The pustules and ulcers in the eye are character-ized by excessive photophobus, superviliary psin, and often by emption about the eyes, on the lists and face.

Ears.—Sticking beneath 1 Twinging in 1, spas-modic deep within l Dragging towards orifices of both. with twisting Roaring

Nose .- Red eruption on r side of septuni, with pain in morning when washing, then an elevated crust, which desquamated, the epidermis continued red and tender and again desquamated Drawing pain extending through to root and thence into brain Drvness. and of throat Burning, and in mouth, in r nostril, obliging him to rub it Irritation, and of conjunctiva Respiration through nose stopped Mucus. Coryza, with slight discharge Smell in the room as after an offensive stool.

with vesicles, also eyelids Expression of distress, of of water Hiccough and yawning debility; of confusion, with brilliant staring eyes Lips swollen and sore (local effects), vesicles (local effects), burning in angle, with swelling on outward tension in corner.

Mouth -Tearing in r lower eye-tooth Sore pain in last l lower molar on chewing Swelling on l inner alveolar margin of gum, painful, on inner side of r root and on soft palate and posterior wall of pharynx, ish water, of oily smell and sweetish-bitter oily taste burning and contraction, and in throat; tickling pain Vomiting; especially in women, then diarrhoa, at up, feeling at up as if electrically sensitive, with of bile; of bitter inucus; of light and glairy matter, sweetish bitter taste; feeling as if too large and numb, without change in its appearance

Pustules, with burning in mouth and throat Vesicles on hard palate Swelling of palate Inflammation of M, lips and pharynx Burning scraping extending low down into resophagus Burning, and in late, then burning; sometimes burning, sometimes scraping, scraping-burning, with salivation, acridburning, and in throat

Threat -Swelling of submaxillary glands, with pain on touch, S of tonsils, with pain on external pressure Redness and soreness, R and smarting; R. of uvula with elongation Hawking of mucus tasting like vinegar Jerking and shooting through T. Sensation of a morsel which he was unable to swallow. Pain. Rawness Scraping, < expiration, > cold water, with then tickling in larynx; causing frequent hawking;

in pharynx, > drinking water, in fauces, > inspiration, < expiration, and in esophagus; sometimes extending to pit of stomach; with contraction, and in tongue Burning pain Dryness, with irritation in pharynx. Inclination to swallow, with pain as if a ball were pressing out of 1 side of cesophagus, > by cold water, frequent inclination to swallow, which causes pain as if a ball were pressing through l. wall of cesophagus Swallowing difficult Pain in cesophagus. Prickling at entrance of cesophagus Burning extending up osophagus, above entrance, with acrid taste at back of mouth

Stomach.-Hunger, with rumbling in abdomen; unnatural H , great, after the pains had ceased; H Appetite diminished; at lunch, without appetite. and repletion after eating a little A lost, with dull feeling, yet he eats his usual allowance at lunch Loathing of his usual breakfast Thirst, slight Aversion to beer Eructations, with nausea and Face.—Pale and sunken, P and cold Jaundice-weakness; empty, < afternoon, empty, then nauses, colored Cyanotic Swollen, and ted and covered sharp sour, acrid and burning, bilious in evening,

Nausea, after milk, after every drink, with cructations; with sour salivation, with salivation and chill, with anxiety and oppression, and pressure in epigasborder, dry and cracked, dry in evening, and tense, tric region, with inflation of abdomen and borborygmi in epigastric region, so that he lost hearing and vision; disturbing sleep after midnight, then sudden vomiting of copious sour, strong-smelling fluid, then diarrhosa with sensation as if fluid were swashing upper gum Easy bleeding of gum in morning on about in abdomen Retching, with vomiting of food washing Tongue swollen and numb, T white, show- and water, with vomiting, rumbling in abdomen and ing impress of teeth, coated white; furred and dry, diarrhee, spasmodic, by pressing against the red, smooth, glistening and dry in centre, eruption on washstand, violent, with difficult vomiting of yellow-

> of much strongly-smelling fluid, of water, mucus and food, after eating Violent vomiting; and copious, of matter containing streaks of a white, shiny, emulsion-like substance, mixed with clear glairy fluid, and frequent, sudden, of whitish-yellow, frothy houid

Rumbling, with heaviness on chest. Gastro-enterthroat, gradually and successively increasing on palate, itis. Cramp, and in upper abdomen Cutting beuvula, isthmus faucium, pharynx, tongue and lips neath stomach Severe turning, then cutting below Tase flat; and nausoous, flat and nausoous to water, region; with anxiety; with tacking, nauses and which causes empiness, pasty, as after almonds, spasmodic motions as if one would womit, with disletter, sweetish, then bitter and burning; like choco- comfort in abdomen: in S. and chest and with disletter than the composition of the choco- comfort in abdomen: in S. and chest and with disletter than the choco- comfort in abdomen: in S. and chest and with disletter than the choco- comfort in abdomen: in S. and chest and with disletter than the choco- comfort in abdomen: in S. and chest and with disletter than the choco- comfort in abdomen in S. and chest and with disletter than the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and with the choco- comfort in abdomen in S. and chest and c Burnt feeling Dryness, with scraping in throat; with stomach, then tearing in r side near ilium Burning in epigastric region, with fulness, in epigastric region, with constriction; changing into nausea, with saliva-tion Epigastric region sensitive to touch. Scraping, then nausea, burning S, extending into S and along intestinal tract

Constriction, in upper part. Oppression at midnight, with fulness, then nausea, then easy vomiting of the supper, then sweat on face and comfort, after half an hour bitter vomiting, then good sleep till morning Tension in epigastric region; in region of S and upper warmth at back of mouth; in fauces, then burning, abdomen, with pressure, anxiety and oppression Weight and heat in epigastrium as after strong spirits, hurning Scraping tingling. Acrid sensation, and then the heat radiates in every direction, then extends

to cardia, > barley-water. Repletion; impeding res-Indigestion Emptiness. Sinking, with weak-Relaxed sensation, with pain on pressure. Burning; and in bowels, in pit. Heartburn; after dinner, with nausea. Epigastrium felt hot and tense.

Abdomen.—Distention, < sitting, with tension, tenesmus and emission of offensive flatus; with griping, with griping above umbilious, with tension and rumbling; flatulent, with heaviness Swashing as of water. Gurgling, < l side Rumbling, on l. side, on rising and when writing, with emission of offensive flatus. after supper, > emission of flatus, with pain and feeling as before diarrheea. Movements, with griping Flatulence; then urging, stool sudden, thin, small, with flatus (Jat.); with intermittent pain Emission of much flatus in evening; easy E when walking, with

urging to stool, difficult, noisy E; offensive Urging

to pass flatus when sitting. Cutting, and about umbilicus, C., with emission of fetid flatus, then frequent diarrhoxa, then a stool, at first pultaceous, then liquid mingled with mucus and bile, then three greenish-yellow diarrhene stools Tearing when eating Twinging, < in colon, with cutting, spasmodic, when walking, and about umbilicus Griping after dinner, G, < touch, with pressure to wards anus. Pain; in morning after rising, with much offensive flatus, during stool, then pain in rectum, after eating; when walking, < dinner, > gruel, in walls, especially deep, < pressure or deep inspiration, with tenesmus, with loud emission of offensive flatus, flatulent, in evening, flatulent, disturbing sleep, > noisy emission of flatus Sensation as before diarrhœa Soreness, on coughing, < pressure Heaviness and confusion, with retracted parietes Uneasiness, with griping and twinging He felt the medicine working downward, causing gurgling, and as it approached the umbilious twinging Congestion rising to head, with warmth of skin and sweat Burning, creeping warmth in parietes, febrile excitement across Coldness

Upper -Rumbling, with gurgling and griping, then emission of offensive flatus Sticking in spleen in evening Griping Dragging, movements and retractions, and in umbilical region, then stool; spasmodic D, < sitting, then tensive pain. Pain in region of spleen Tensive pain Tension between umbilicus and pit of stomach Throbbing in region of splecing

Heaviness

Umbilical Region - Gurgling, with vermicular movements Painful movements, with increased pain on touch or pressure. Sticking, > two pasty stools, tory Somi-fluid, semi-solid, dirty S to 1 of umbilicus Tearing after dinner. Cutting, half solid, after the morning stool so that she could scarcely breathe, extending to stomach, causing her to bend double, extending thence to 1 side of abdomen, as if two knives were cutting towards each other, > two stools, then a watery stool Twinging on going out, with tension and pressure upward to epigrastric region and sudden nausea, T above umbilicus, with pressure Twisting, then tearing in 1 side of abdomen Pain, below umbilicus in evening, with distention of abdomen, hypochondriac regions Frequent, the first feculent, usen urging to ston; on touch, with rumbling and the others yellow and green, with sweat, < forchead gurding, on pressure on ambituous pain is felt down to Copious, with rumbling in abdomen, C., microus, irreans, where there is constant protrusion; speamedle, mant, with occur. sitting bent over. Gripping; extending to I. side of abdomen, with pinching. Tension when lying, with movement and pressure towards anus.

Lower-Sticking in cacum. Tearing in transverse colon; from I groin up to r nipple Griping in transverse colon before every stool Pinching and cutting in thick intestines Pain, and in bladder, above posterior superior spine of 1 ilium, undefined. in l inguinal region, tensive, in inguinal regions.

Climical.-Gurgling and swashing, as if there were nothing but water in the intestin

Rectum.—Feeling as before purging Tenesmus, after lunch, scanty stool, mixed with mucus Urging in morning in bed, on rising soft, light-brown stool, then soreness of anus; U. and stool soft, dark brown, offensive, with spasmodic griping; constant U., then sudden pasty, dirty green, offensive, forcible stool : U with fulness in abdomen and rectum, stool scanty and difficult, sudden U, he was unable to reach the closet, but was obliged to sit long; frequent, ineffect-

Anus.—Swelling, extending to anus, with burning Pain, as if a plug were forced outward. Dragging as before diarrhaa Pulsation, sticking and burning Sore pain after moving about, with burning. Painful soreness after stool, with feeling as if rectum were swollen and would protrude, urging to stool, compression of abdomen, causing pain, extending into genitals and ending in glans as a sticking, so that he was anxious and oppressed, sweat on forehead, nausea, vanishing of sight and hearing, the pain < bending over, > quiet, on walking sore pain on outer part of anus, then prostration, ill humor and loss of appetite. Scraping after stool. Scratching on I pos-terior wall during thin stool. Constriction on walking, with sticking at times. Itching Burning, during pasty stool, so that he can scarcely sit.

Stool .- Watery, and yellowish, forcible (Jat), and painless, with emission of flatus, and frequent, frequent, shooting away (Jat . Gamb , etc.) , and choleraic, copious, every few minutes, at first facal stool, then watery, with sticking in abdomen. Diarrheea, with urging, with colic, frequent, frequent scanty, frequent yellowish, light yellow, with sweat, crawling in occiput, pressure upon larynx, < 1 side, grayishbrown, evacuated at three different times and forcibly, with tenesmus, then prostration and cohe, involuntary, with streaks of white, shiny, emulsion-like substance mixed with much clear, glairy fluid Pasty, light brown, after urging, then rumbling and gurgling in l side of abdomen, after an hour a second soft, mucous, urgent, gravish-green and duty brown, forcible stool Soft; slimy, frequent, with tenesmus, delayed, sluggish, unsatisfactory Semi-fluid, semi-solid, dirty brown Half soft,

Constipation Crumbly, difficult Nodular, mixed with white points (larvae of worms), the second contains long white thread-worms, the other nine stools offensive and bilious, or slimy, and at last watery Tenacious. Large Scanty, Dirty yellow, clayey by efforts of abdominal muscles, without peristaltic action of bowels. Slimy, with tenesmus With pinching With rumbling and pain in epigastric and

Clinical.—A very valuable remedy in diarrhosa, with the general character of sudden expulsion and great aggravation from taking anything into the stomach, stool occurs immediately after

eating or drinking generally very watery and yellow, passed with gush, sometimes associated with nauses and romiting, sometimes which passed with nauses and romiting, sometimes him to stretch and yawn.

Urinary Organs.-Burning in urethra on urinating Urging to urmate, immediately after micturition Frequent micturition Copious urine, and yellow, and turbed Pale frothy U Foaming U. in morning Turbid Brown U . soon becoming turbid, and a copious brown sediment Fiery red at night and in morning, with only pellicle and flocculent turbid sediment; almost blood-red after standing through the night, with a thick nucous sediment Pale orange vellow U after standing over night, with turbid sediment. which is at first flocculent Pale U, with white sediment Cloudy sediment, which gradually disappears. and brownish crystals float where the clouds had been and adhere to the walls of the glass

Sexual Organs.-Inflammation of inner surface of prepare with irritation and some secretion. Pain in nems, with redness of glans and sticking coming out of urethra Burning in glans when urinating Constant painful erections No erection in morning, contrary to custom Retraction of 1 testicle, relaxation of r Drawing in 1 spermatic cord, hindering walk-

tum Phlyctanae on scrotum, with pustules on penis, forearm penis partly denuded, pain at end of penis on urinating, urine dark (local effects) Itching of scrotum Corrosive itching of scrotum and glans; of scrotum, < walking, with redness, of scrotum, and a moist, offensive spot on thigh, then desquamation of these places, of scrotum, disturbing sleep, > rubbing, which caused Menstruction too soon and scanty. erections

#### Clinical. - Valuable in eczems of scrotum and penis

larynx, with tickling and irritation, rattling of M in pain in r knee (Tearing in knee, with crawling.) move Mucus in traches, provoking cough Speech extending to forepart of foot Heaviness or anxies in low Youce hoarse Youce hollow, with constant evening, with pressure Cramp of 1 sole and inner hawking Cough and frequent hawking, constant C, side of foot. Briting in 1 foot when sitting, 3. in 1 C in morning, with expectoration, in evening, with sole, with tearing Sticking in 1 heel when sitting, as white mucous expectoration and oppression of chest; if sprained, on margin of l. foot Sprained pain in with difficult yellowish expectoration and spitting of I foot Rheumatic tearing in I foot. Nervous weakblood Expectoration of much tenacious, sour-tasting ness of feet Feet failed him on ascending stairs.

Bensation as if he could not get air enough Sticking in lower part of great too, I then r When into air-cells. Dyspnœa, < ascending stairs Diffi- walking sticking and tearing as if sprained, < in cult respiration; and anxious; with constriction of metatarsal bone of l. great toe, so that he could not chest. Short breath after stool, S and hurried. Slow step fairly upon it. Rheumatic tearing in r great

respiration, and powerless

Castin—Catarrh Stocking in L, through middle of line flesh, with sticking in r great toe, where the nail enters the flesh, with sticking in r great toe, where the nail enters to the flesh, with sticking in figure in the flesh, with sticking in figure in the flesh, with sticking in r great toe. The flesh of the flesh is the flesh, with sticking in r great toe. The flesh of the flesh is the flesh, with sticking in r great toe. The flesh of the flesh is the flesh is the flesh is the flesh in the flesh in the flesh is the flesh in the flesh is the flesh in the flesh is the flesh in the tion Oppression, in evening, on deep inspiration, with offensive exudation, painfully sere on touch or walking, with anxiety Feeling of mucus in lungs, which could which also causes biting. not be removed by hawking, with difficult breathing

Clinical.—Nipples very sore, with excruciating pain running through to scapule on nursing

Heart and Pulse.—Sticking in procordial region; on expiration Jerking in I side Palpitation, in after-noon, after dinner, < lying Pulse rapid, and weak; and small Pulse full Pulse feeble P. small; and weak, then strong and full

Neck and Back.-Sticking between nape and occiput. Pain in muscles of l. side of nape on nodding Pressure and drawing in cervical vertobre Tension in r side of neck. Stacking in I renal region, in afternoon, impeding breathing. Pain in small of back; in back and lumbar region, in the space between lumbar ver-

tebre, false ribs and ilium

Extremities .- Trembling of hands and feet Pain Weariness; of arms and legs Tearing in r shoulder Sticking in 1 shoulder-joint Pain in r. shoulderjoint. Tearing in r arm, extending to upper arm, then to fingers Heaviness of arms, with weariness. Tearing in r upper arm, then in r shoulder-joint, sudden, in l upper arm, < deltoid Rheumatic pain Trawing in spermate cont, initioring wars studied, in Tupper arm, Ventoria Altermate pain g Scrotten shrvedled and toking, destrong steep, in I upper arm, waking him Pan on inner side of scrottan shad, which caused a coluptious sensation Vesi-I upper arm Tension, weary pain in upper arm, in class on scrottan and penis (local effects) Herpette cruption on scro-lameness Boring in I elbow at noon Tearing in I Drawing in r forearm, above r wrist in evening. Swelling of hands Jerking of l. middle and r ring fingers Tearing in r finger-joints Drawing in I middle finger, with tearings

Lower Extremities.—Swelling of nates where they

approximate by the anus, after moving about, with burning Tearing in I thigh Pain in thighs; sore, between I thigh and scrotum, tensive, in l. hip-joint, < by rising from a seat Weariness of thighs, with tensive feeling. Heaviness of thighs on waking after Respiratory Organs.—Laryngeal catarrh Mucus in midnight Paralyzed feeling in I thigh. Cramplike Mucus in bronchials, which he cannot re- Pain in legs and feet Sticking on r outer malleolus,

Tearing along edges of ribs, extending backward and face; red P, with corrosive itching and sore pain when to small of back Pain, on touch, and in l. chest, 1 touched or rubbed; on a red base, hard, burning hypochondrium, in 1, with oppression Pressure itching, about neck Erythema of face, often symover sternum, deep within at middle of chest Ful- metrical Erysipelas, erysipelatous phlyctenulæ on ness, with burning sticking in l chest and towards scapules; face, ending in desquamation Redness, with cold-F, with pressure and burning; F. impeding respirations, then warmth Red spot on l. thigh opposite scrotum,

Redness of affected part, with smarting, heat and and whistling on deep breathing Throbbing bubbling white, glossy, tense pustules, then desiccation, leaving in r, between sixth and seventh ribs. Throbbing in a yellowish spot or crust, then entra-epidermic pustules, r. posterior part; sudden, in region of aorta. Hollow then dermic or sanguing-purulent pustules and a twostory pustule, when the scabs fell off from the scratched | covered with gooseskin, > in bed. Cold limbs Sudden sowly placetics, which the saids left on front the screened covered with goodeskin, > in each. Cold miles Studden putations they were succeeded by pits, while the others C and pallor of hands, with shrivelling of fingers were still elevated, so that the hand perceived a rough- Cold feet and legs; as far as calees. Cool skin, then ness, brownish discoloration after the scales, pustules ho, then sweety. and inflammation of walls of abdomen, then desqua-

roughness of whole skin, the small pustules disap- of l thigh; in lower third of r. tibia. peared as whitish, shiny elevations, the whole skin became whitish, the large pustules red, then whitish in drops, with nausea. desquamation only noticed on rubbing itching continued, and also an alternating heaviness and tension of upper arm.

Tingling, with red points, then little pustules in apices, many formed patches filled with white opaque fluid, the eruption died away like smallpox. Pustules, on scrotum and face, those on side of scrotum were flattened and became suppurating ulcers, the other pustules dried and desquamated, with red areola, on abdomen, itching began in the night and disturbed the sleep, the P became pale and disappeared without crust or desquamation, then pale red spots; dark red, with stching and burning on movement, < touch or uncovering, with roughness of the whole spot, elevations after the small pustules had

disappeared. Vesicles on labial commissures, r. upper lid and l buttock (local effects); itching, on chin, which coalesce and form a crust, which is moist on pressure, then descuamation, then a red spot Brick color, < face, scalp, larynx and chest, in the order enumerated, > abdomen, more on muscular parts of arms and legs than where the bones are more superficial, then swelling, then vesicles, differing in size and shape, some confluent, at first containing limpid scrum, then pus. and ending in scabs (local effect)

Prickling in first r toes, in lower third of I leg Formication on face, in lumbar region, knees; r little toe; jerking, in r great toe Itching, then painful burning; I, or rather smarting, as of vermin, on pubic region and on glans, prickling, on r sole, with burning.

Clinical.—Vesicular and pustular eruptions, with painful burning and redness extremely like herres and especially like

Sleep .- Yawning , in forenoon Sleepiness , towards noon, but on lying down after dinner inability to sleep, with palpitation; with weakness Easy falling asleep, then chill across back Sleeping on the back and sudden waking after an emission Deep sleep after vomiting Sleeplessness, with anxious tossing about Difficult falling asleep Frequent waking Sudden waking Twitching of thighs during midday Uneasy sleep; with many dreams Light sleep, disturbed by many dreams. Dreams, auxious, anxious, interrupted; in afternoon nap, about the occurrences of the day, heavy, till 1 A M, then sudden waking from headache.

Fever.-Chilliness : with shivering ; with weakness ; in afternoon, obliging him to go to bed Easily chilled. Chilliness extending, < over back. Cold

Heat; with sweat and rapid pulse; with salivation; with the pustules, with anxiety, so that he sought Redness, then burning, next morning when lying on for a chair; general, then coldness in abdominal verl side throbbing, tension and jerking in l upper arm, tebræ; in flushes; prickling Heat of face, r. half, extending to fingers, red-pointed and roundish pustules, the itching and burning < touch, motion or rub-starting from lumbar vertebre Heat of skin, < bing, heaviness of arm and shoulder, rodness and hands, with swollen veins Itching burning in middle

Sweat, cold, clammy, on forehead, on forehead

# Cubeba.

A tracture is made from the dried berries of the Paper Cubebs, L.

General Action.-A marked affinity for the urethra, bladder and vagina, where it produces violent inflammation. The mucous membranes of throat and air-passages are also involved, as well as the skin

Allies -Copaiba, Canth Generalities.—Emaciation Peculiar odor to evacuations, sweat and saliva Face red and swollen, lips dark purple, saliva viscid, frothy, tongue dry, chapped in centre, brown sordes on teeth, veins of forehead and temples turgid, eyes turned upward, injected, pupils contracted to a point, clammy sweat, pulse slow, dispersed by least pressure, gasping, he was aroused for a moment by shaking, uttered an incoherent expres sion and sank back into a comatose sleep Convulsions Restlessness

ons Restlessness Weakness Partial paralysis

Mind and Head.—Mind weak Memory lost Headache; deep-seated

che; deep-seated Dulness of head.

Eyes, Nose and Face.—Eyes turgid and watery Full feeling in eyes Coryza. Face swollen; and oc-casionally flushed Face flushed Lips puffed, dry and shining Lips twisted to one side on attempting to speak or smile

Clinical.—Obtainate otorrhom, offensive discharges Nasal catarrh, with feud odur, and catarrh of the thront, with greenish-yellow expectoration of fetd odor. In catarrh of the throat the mucus trackles from the nose into the throat, is greenish-yellow, with rawness of throat and houseness (compare Sinaps).

Mouth and Stomach -Tongue white Tongue furred and most Intense thirst; Appetite increased slight T, with burning in throat Eructations, with warmth in epigastric region, acid E, with uneasiness, heat at pit of stomach and fever Nausca Gastric irritation Disordered stomach pain in stomach Burning in epigastric and umbilical regions, with pressure

Abdomen, Rectum and Stool .- Flatulence. Griping. with diarrhea Colic Burning in abdomen, in rectum. Hemorrhoids Diarrhœa; copious, distressing, with headache

Clinical.—Dysentery, stools colorless, transparent, mingled with white particles like rice, with unquenchable thirst, distended, sensitive abdomen, < fruit, acids, etc.

Urinary Organs .- Inflammation of urethra. from urethra much encreased. Cutting after micturition, with constriction. Irritation of passages. Uring copious, dark Urine frothy Hamaturia (Tereb.)

conflict. Chilliness extending, < over back. Cold skin. Coldness, < lower limbs, so that she seemed constriction during micturation. Hamorrhage from the bladder.

Inflammation of bladder and urethra in women, necessity to urnate every ten or fifteen minutes, with smarting, tenesmus and ropy

Sexual Organs .- Prostatitis (Cop., Elat), the gland feels enlarged to finger in rectum, permeum tender, last drops of urme passed with pain, after micturition

Clinical.—Inflamed prostate, with thick yellow genorrhead ducharge, especially useful in the chrome form, sometimes wis swollen tests, fee Leucorrhea, profuse, acrid, offensev, yellow or green, with pruntus, intense sexual desire, uterus swollen and partiel, etc. Acrid leucorrhea in girls Catarrhal leucorrheas, offensive, yellow

Respiration and Pulse .- Respiration hurried and

Clinical.—Dyspacea, with deposit of a false membrane in the laryax and danger of sufficiention, also useful in bronchitis, in which the ough seems to tear the bronchi, expectoration difficult, ometimes streaked with blood.

Extremities.—Numbness of fingers and toes Acute deep-seated pain in wrists, then redness and swelling of them Wrists stiff and thickened Hands swollen and so stiff that the fingers could not be bent Prickmg in soles

Skin.-Eruption from head to foot, with fever Urticaria (Cop), febrilis. Redness, afterwards eruption from head to foot, which in some parts could not be distinguished from urticaria febrilis, while in others it appeared more like lichen in its papular stage, but with more inflammation around base of papulæ than is common in that disease Itching

Fever.-Heat, with thirst, fever, with heat at pit of stomach, internal and external, with tingling over whole body, hot skin; heat at times in palms and soles, in hands and feet, with numbress of them, in flushes upon face, soles and palm

#### Cucurbita.

A tincture is made of the fresh stems of the pumpkin, Cucurbuta Pepo, L An emulsion of the seeds is given for tape-worm.

Clinical.—A uncture of the vines and of the seeds has been prescribed with alleged benefit in vomiting of pregnancy, and it also has cured vomiting of food and salivation in non-pregnant women. The seeds have been used very extensively for tapeworm

## Cundurango.

A tracture is made of the dried bark of Gonolobus Cundurango,

Generalities and Mind. Weight increased Did not teel well, when walking Miserable feeling. Soreness all over body, like rheumatism, < through 1 shoulder and under I scapula Languid when awake in the night Stiffness of the muscles Confusion of mind

Climical.—Tumors of the breast, very hard, painful, associated with ulcers in the corners of the month, this soreness and cracking in the corners of the mouth, this soreness and cracking in the corners of the mouth seem to be very characteris-tic of the drug. It seems also to have cured stricture of the desoph-agus with burning pain behind the essophagus, where the food seems to stick. Vomiting of food and indurations in l. hypochon-drum, with constant burning pain

Head.—Aching, in morning, < 1 upper part of forehead, with feeling as if bigger. Vertigo; on stooping or turning head; with slight pain across top of forehead Frontal headache; all day, at top; all day along top of brow and harry scalp, > early in even-ing Dulness in forehead. Forehead feels as if very sensation as it bladder still contained water (Hernia broad and high. Heaviness in I. half of forehead femoralis) Testicles swellen (Cop) Excitement Pain in 1 temple spreading over upper part of brain No inclination for coition, with weakness of sexual to r side of head, feeling as if some one were pulling up the upper part of the skull, with one-half of brain, at 10 AM, increasing till 6 PM. Pimple on scalp

Eyes.—Pain in l. ball Vision dim Vision of black serpents jumping in all directions before r eye, on closing I eve I seemed looking through a dense fog, afterwards the appearance before the eye was like two black horns, with large black balls on the upper ends, and a mound of crystal between them, their tops taperdifficult Pulse rapid, and full, and small Pulse ing off and tapped with black, afterwards the obstruction intermittent and sometimes slow, sometimes rapid appeared in the shape of a pear, with the large end up, red on looking towards the light, purple on looking from the light, later appearance of curled hair in front of r eye and a blur before I, retina congested, inability to recognize any one in the street with I eye closed

Nose.—Stiffness Discomfort Stuffed up Full feeling in bridge Ability to pronounce the French nasal sounds with great perfection Discharge of much glary mucus alternating with a dry feeling.

Face.—I do not look well Painful cruck in r. corner

of lips Lips unusually red , lower

Mouth and Throat -Tongue unusually clear and red . coated brown, painful pustule on r upper side of tip,

next day pain in r side of tip, pain in 1 half, feels burnt, also acrid Sore throat, with enlargement of tonsils Aching in throat extending to stomach, with burning in stomach

Stomach and Abdomen.-Anorexia Nausea; arising from r hypochondrium Cardialgia. Pain in S; < at cul de sa Fulness in S. Flatulence Emission of flatus; painful, foul-smelling, in afternoon Pain in r hypochondrium Uneasiness in abdomen; in ihac region, not quite a pain, at 8 A M

Stool, Urinary and Genital Organs.-Stool papescent. small, with mucus, without sense of aid from sphincter muscles Constination, Stool dry and scanty, Frequent micturation, at night, with urging in renal ducts. and at times copious Urine scanty, U thick, high-colored and loaded with phosphates, almost colorless, emitted without effort, urging in renal ducts after bladder is emptied Sexual appetite depressed.

Heart and Pulse—Sharp pain in H in morning on

rising, then passage of flatus Constrictive pain in H Pulse accelerated, afterwards slow, slow and small

Back.-Pain in l. scapula, then in r; under apex of I scapula; across lumbar region, about fourth dorsal vertebra; heavy, in I scapula, as if in the bone, in r scapular region, weary, in l kidney, in occasional darts through kidneys

Extremities.—Sharp pain posteriorly in I shoulder in morning when driving Creeping pain along periosteum of r. humerus Tingling in I fingers when writing. Apparent increase of strength in legs when

walking

Skin -Brown. Some congenital, warty excrescences look red, fresh and unusually large. Blotches on upper arms, < 1, after growing nearly invisible they again become red, and there is a new one below elbow, one on wrist, one on clavicle; erythematous, on face. Pimples on thighs; on front of 1 thigh; indolent, on turition. A, of pains and of hardness of abdomen after chest, one on l. side of nose Small pustule between diarrhosa, then nervous symptoms. eyebrows and one on r side of nose, afterwards pustule Clinical.—Spasmodic contractions of on border of tip of tongue to right of messal line, one on r. cheek, two on abdomen, to right of mesial line, and still farther to the right tiny papules, a large pustule that did not ripen near acromion scapulæ and legs; along anterior and outer tibial regions: shoulders and sternum.

Sleep.-Sleep as if narcotized Sound, dreamy Transient. Restless, and dreamy; Intermittent. but felt rested in morning Had a bad night; < towards morning; and snored. Dreams

Fever.-Rigors

# Cuprum.

Pure precipitated metallic Copper is triturated with sugar of milk Solutions of the salts of Copper are used

Allus.-Plumbum, Arsenic

Generalities -Stretched upon the floor without sense, lay constantly with legs drawn up, constant dorsal decubitus, on back, with head bent backward; the child lay upon its stomach, with jerking upward of pelvis; lay still and apathetic, looking straight ahead, with dim eyes and stupid expression Emaciation Violent struggles Writhing of whole frame under the pain Trembling , < hands Cramps

Convulsions, from pressure on stomach, general, with stiffness of limbs and body, jaws clenched; in sleep, twitching of fingers, arms and hands backward and inward towards body, drawing back of feet, at one time opening and distorting eyes, at another closing them and distorting mouth, after pain in last dorsal vertebre, the pain extending suddenly into 1 arm, to wrist, arm was spasmodically flexed and extended, then loss of power, these attacks returning the two next days, with constant vomiting and pain in abdomen, gradually passing into paralysis; C, < abdomen and limbs, when attacked they croaked like frogs or howled, were crazy, looked frightened, attempted to escape, eyes glistened and seemed to start from their sockets, if one was attacked the others on hearing his cries were likewise attacked Epileptic fits, epileptiform convulsions, trembling, staggering, falling down unconscrous, without crying, epileptiform attacks, with frothing at mouth, trunk bent outward, limbs forcibly thrust outward and mouth open

Shooting through body, < r. side, causing shuddering. Painful jerks or thrusts in various parts limbs, rheumatic Jaundice, with vomiting, eructations, heaviness in head, difficult hearing, grayish stools, thirst, dark, turbid urine, with yellowish sediment. Sensitiveness to changes of weather Sensibility of paralyzed parts

Agitation Uneasiness: with tossing about (Ars), with piercing cries; with anxiety (Ars), with jerking of limbs. Weakness (Ars); after walking, so that limbs trembled; with increase of corpulence Faintfrom lying down. Amelioration after stool, and mic-fusion of head

Clinical, Joseph nervous symptoms.

Clinical, –Spassodic contractions of flexor muscles, especially of the fingers, toesand thumbs. Esplergy characterized by the most vacion spassar, with cold sweak, the surface, etc. Chores the contraction of the contraction (Plumb., extensors)

Mind.—Dehrium, with disconnected talking, in attacks, with full, rapid, hard pulse, inflamed eyes, wild look and disconnected talking, ending in sweat; attack of surly, in attacks, he fancies that he is a captain in the army, fancies that he is selling green vegetables or that he is repairing old chairs, merry singing, spitting in faces of attendants and laughing at it; quiet, unintelligible murmuring interrupted by lamentations; turious. Rage in attacks, they tried to bite bystanders Talking all the time Crying like a child, C out frequently Howling in unexpected paroxysms Spasmodic laugh-

ter, immoderate L in evening Anxiety, with tossing about (Arson), doubly, in attacks, without heat; that is peculiar to pain in pit of stomach Fear, it seems as if he must tread lightly to avoid injuring himself or disturbing his companions. Melancholy; with desire to be alone and anxiety about her death, which she supposes imminent Fretfulness, with irresolution and dissatisfaction with everything, intermittent F, he does not know what he wishes, he desires to be alone Apathy Disinclination to work, yet idling is irksome. Aversion to everything Taciturnity Loss of sensitiveness and moping in a corner Obliged to think a long time before they can answer Loss of ideas, weakness of memory Lethararc stupefaction Coma Semi-conscious, voice faint, eyes half open, fixed, glassy, meensible to light, pulse weak, in some quick, in others slow, difficult to arouse, when aroused complaining of cold and of pain in abdomen Senseless, he seems in a half-waking dream. Unconscious, and fell down in sudden convulsions

Clinical.—In manua, biting and tearing, foolish gestures of mimicry, or the patient shrinks with fear and tries to get away from every one, with general chilliness, not > heat, etc.

Head - Drawn backward: D obliquely Inflammation of brain Lancinations, < turning it to either side, it felt as if fastened to shoulders by a long peg Aching, in evening, < motion, with nausea, then vomiting and purging, bruised, in brain and eyes on Pams all over; in muscles, in bones in morning, with the dache and nausea, in bones during remissions of drawing, in many parts, with vertigo and general sick delirium and convulsions, with headache, neuralgic felling Conjusion, with beatting Heatmass, with P in various parts, stomech, intestures, hips and lower sticking in I shoulder on moving it from side to side. Dulness Congestion Apoplexy Vertigo, on looking up (Plumb), with ranshing of vision as from a veil before eyes; on reading; on rising from bed, even to falling; < moving, > lying, with weakness, head sinking forward, > stool, with stupefaction, preventing sitting up in bed, m attacks, as if it were turning around in head and he would fall forward

Forehead -Intermittent lancinations, sometimes in F. sometimes in vertex, sometimes in temples or occiput, < pressure Burning sticking in 1 side Pain, over eyes, as ness; on slightest motion. Heaviness Paralysis ure Burning sticking in 1 side Pain, over eyes, as Trunk and limbs stiff, news clenched Aggravation if brain were pressed outward, < stooping, with conTemples—Venns swollen Burning stocking in 1 ple line, G lax and spongy; soft, with purplish-red and on vertex Tearing, touch Painnr, c touch, patches at their juncture with cheeks; retracted, P in temples, frontal enimences, occupit and a linean, lilecarted; swollen and ulcerated at their edge. < motion and touch, with vertigo, drawing P. in 1, < touch Painful throbbing in arteries

Pain on r, then 1 side, (P in parietal bone, < touch) and to I, side of neck Burning tearing in occuput at vertex Soreness, on touching hair.

Ciliateni.—Menungtus from suppressed enuptions, with convisions, fond serons, colon-det thumbo. In Bolto, etc. Valuable in extremely violent continued headcade, with sensation as if celd water were poured over the head. Violent headcades, with vomiting of all food and drunk, sunken eyes, etc. Extremely violent headcade over frontal annesse in massi catarrit (compare Kali

Eyes.—Sunken, and staring, and dim, and glazed Surrounded by blue rings; and sunken, and looking weary Prominent Fixed, upward Wandering Sparkling Dim. inclined to close from weakness. Pain as from night-watching, burning P, sore burning P now in one, now in other Itching towards evenmg Pupils dilated, contracted, insensible. Con-junctiva injected, C greenish-yellow Itching of balls Lids red, and swollen Pressure in lids on opening and closing them, < touch Pain in orbits, brussed, on turning eyes Photophobia Blackness before eyes, flickering vision of sparks.

Ears.—Sticking in r Tearing in cartilage of l. Pain in ears, tearing in r. Boring in and behind E. Pressure in r concha as from something hard Itch-Distant drumming in ear on which he lay in morning, > raising himself Roaring and ringing Fluttering in 1 Deafness

Nose.—Red and swollen Sensation of rush of blood, Itching internally Stopped coryza, with sleepy yawning, fluent C., with lachrymation and smarting of eyes; profuse C Bleeding, with petechne quent sneezing Loss of smell

Pace .- Pale, dirty, shining color; and thin, and collapsed, with expression of prostration or stupidity Blush, with blue lips, B over cheek-bones Red, and swollen, and swollen and hot, with heat and sometimes coldness running over body Icteric Paletunes coldness running over body Icteric PaleVellow coppery color Sallow, almost clay-colored; cough, intense pain behind sternium on attempting to swallow Greenish-yellow Lead-colored Sunken, and yellow Swollen, and discolored, and pasty Look confused Heavy Sad Anxious Suffering expression Expressive of pain Wild Distorted, spasmodically, also with staring, retracted eyes Sticking in r side Pain in 1 side as from a thrust . Pain in front of ear Drawing inward beneath chin, < touch Spasmoche contraction of jaws; tetanic C with spasm of pharynx, preventing speech Sticking range of lower jaw, < touch, and in 1 tonsil.

Pressure in 1 ranus of J, < touch; drawing P. on r side of lower, < touch. Inps pale, livid; swollen, dry, soreness within upper

Clinical.-Neuralgia of the face, burning stinging pains, < touch (Ars ).

motion and touch, with vertice, drawing P. in 1, touch Panful throbbing in arteries experience of the panful throbbing in arteries experience of the panful throbbing in arteries experience of the panful throbbing in arteries with the panful throbbing in a trief of throbbing in a trief of throbbing in a trief of the panful throbbing in a trief of the panful throbbing in a trief of throbbin whitish coat. Green White, in middle, red at Drawing in 1 saide, extending to face, ear, behind our edges Red, with enlarged papille, and dry Cracked and brownish. Swollen and pale Moist and flabby attachment of cervical muscles on moving head for Roundish ulcers with vellow base on tip and mar-Heaviness in occiput Hair colored green, gins Epithelium came off and mucous membrane from white Crawling on vertex Prickling tickling on of mouth loosened in large flakes. Dry; and foul Loss of speech

> Mucous membrane pale inside of lower lip and part of upper, mostly where the teeth had made an impression, dark blue, teeth slate-colored, < edge Froth Much mucus in morning; thick bloody mucus in mouth and throat Spitting of blood, < morning on rising. Soreness, with blisters on mucous membrane Sharp pain in M and pharyux Dryness, and of throat, without thirst Tingling of M and teeth as from a galvanic current, from acids of any sort, fruit, etc. Saliva flowing from mouth. Salivation, with swelling of tongue and of salivary glands,

> Taste -Bitter. Nauseous Sourish all the afternoon as if the tongue had been held against iron Salt, sour in morning Bad Coppery, with burning in throat; in œsophagus Sweetish, and metallic, also with saliva running from mouth, dryness of throat and construction when swallowing Flat. tastes like water Lost

> Clinical.—Paralysis of tongue associated with general paralysis. Speech stuttering.

Throat -Audible gurgling of drink Spasms preventing speaking Redness of volum, with croupous exudation on tonsils, spotted R of fauces; velum palati and posterior wall of pharynx brownish-red and dry, with difficulty in swallowing and rough voice. Inflammation, preventing swallowing Swelling, and hardness, with mability to swallow Sticking Pain, in thyroid cartilage Constriction (Zinc ); of pharynx, of gullet, of fauces, with nausea Compression of pharvnx as from a foreign body at anterior surface of throat Soreness Dryness, with thirst. Burning. Swallowing difficult

Stomach.-Eats hastily Desire for cold rather than warm food Appetite lost, in evening; but empty feeling in stomach, A diminished. Aversion to food Thirst; for cold water, unquenchable, drinking only a little at a time Desire for acids Eructations; in afternoon and evening, of mucus mixed with green lumps, bitter and sourish, as from heartburn, spasmodically constricting throat and preventing swallowing Hiccough, with spasmodic contractions of pharynx, then eructations of sourch bitter water. then vomiting of offensive odor, tasting like copper

Nausca, on attempting to swallow animal food; as if associated with intoxication, in upper part of throat, then vomiting of bitter, greenish mucus and pain in stomach; in almost whole abdomen, extending into Mouth.—Teeth green, T coated with sulphuret of throat, < pit of stomach, with putrid taste; sudden, copper; dark greenish-blue line on T , T fell out, < then vomiting of fluid arterial blood, next day vomitupper, without salivation Black line on gums, pur- ing of dark fluid, then sensation of something passing

but much ramping in limbs, of B without cough, heat. Inclination to waterbrane with deep stitches in I side of chest Billous fluid Colic in upper and middle, < presents and yellowish; and layad, liqud, with I side Drawing in r. l, from below false ribs to blood; woken, sudden, of water, with copious greenest bend of thigh. Feeling in I sai if bubbles formed and dwarrhea and cohe (compare Verati, visionic, billous, broke Swelling of liver Sticking in hepatic region, greenish

Distention in region, with soreness to touch; in epigastric region Cramps and pains, and in bowels. Griping and pressure, then vomiting. Sticking near l side of pit, not affecting respiration; gnawing S in linac region, < pressure storach. Tearing; in pit Pinching, extending at times into throat and at times into abdomen Press consultary somiting, hiscoriging the pressure storaction of t ure, with intermittent, contractive pains. Pain, in region; epigastric region; in pit, < pressure, in pit, as from something hard. < touch. Cardialgia Heartburn in afternoon, then bitter mucus in throat Burning, rising into throat and mouth Distress after eating, D in S and abdomen, < vomiting. Occasional weight in epigastric region, rather towards r side, with uneasiness, and after meals sense of distention, W in epigastric region, with weakness and oppression. Epigastric pulsation Internal heat in epigastric region Sensation of something bitter in it Sensitiveness to touch, epigastric region. Weakness. Irritability, < eating Impatient of everything but the most bland and simple milk diet Disposition to remove some offending substances, without nausca

Clinical.—Obstinate vomiting always on waking in morning, on the slightest movement. Cramp in the region of the stomach and abdomen, or very violent cutting pain going through to back as if transixed and preventing the slightest motion

Abdomen .- Tense, hot and tender to touch (Bell) Stretched like a board (Plumb.). Distended, hard painful to touch. D. with paroxysmal soreness and with falling out of teeth, < upper, without salivation, trembling of limbs, after a third attack perfect lameness, paralysis of r. hand Tympanitic Rumbling bilious, with burning and tenesmus, offensive, copious, in sleep Spasmodic motions of muscles; S motions of A. and stomach Contracted; and sore to touch, almost to spine, but not sensitive to pressure (Plumb )

Acute enteritis. Cramp at 6 AM, as if drawn together with a fist, and meffectual urging to diarrhea, occasional C Shooting across A. and under ensiform cartilage; corroding S and internal ulcers Cutting; and tearing; and construction. Chronic gastro-enteritis. Griping, after warm milk in morning; on walking after eating green vegetables, > rest and lying down, then weakness. Sudden pain as if struck when sitting reading, > pressure. Colie; during digestion; burning sticking or cutting, < meatus urmarius

rhage again, then sudden collapse Retching, m-tting and purging of green matter, intermittant C.; effectual; uneffectual, with constriction of exceptagus and intermittent, bending double; paroxysmal, with hot went; causing approximation of daphragm; violent across chest in direction of daughtragm; violent with a direction of configuration of the color of content of the color of content with purging; C, with color. Frequent, drawing, resulting at times but not intermitting, as from the color of content with purging; C, with color. Frequent, drawing. Feeling as if intestines were drawn into these, as in cholers. Of breakfast; of every kind of knees up and press hard upon bowels. Pressing to color of contents of stomeths and blue the color of contents of stomeths. food; of contents of stomach and bile, then dry retch-gether of intestines every forenoon, < walking or Of water, with lachrymation. Frothy fluid pressure, with pressure from upper and posterior part mixed with blood Bloody matter, of blood and towards I lower part Constriction Tension Senmucus; bloody, with bloody diarrhoa, little colic, sitiveness so that she could bear no covering Internal

with frequent liquid stools, and yellow-green bile, in axillary line through to pit of stomach. Griping with cramps; bitter, slimy, at one time of sweetish, in I hypochondrium, extending to hip Pain in hyclear, tenacious saliva, viscid, glarry, tinged with pochondria, in r, extending to r, shoulder; drawing blood. Frequent, almost brownish-yellow, in part P from l H to hip Sensitiveness of H., l Cramplike pain in middle and one side, < l Pain in umbilical region, l Hypogastrium dull on pressure Pressure downward in lower A as from a stone; drawing P. as from something hard, < touch Pain in 1

Clinical.—Most horrible colors, with tendency to collapse, convulsive vomiting, hiccough, etc. Neuralgia of the abdominal

Rectum and Anus -R inflamed and sensitive. Heaviness of R after stool, with uneasiness Tickling as from pin-worms Tenesmus; after stool; with scanty, dark, pulpy stools; with burning in R close to anus Frequent urging , meffectual U above anus Smarting m A after stool

Stool.—Diarrhaa, violent, bloody, slimy, brown, then greenish, with streaks of blood; profuse, with tenesmus and prostration, alternating with constipation Liquid, and involuntary, also green and offensive; and involuntary, copious, waking him at 2 A M, when lying on abdomen, and frequent, with bright red blood and shreds of membrane, sometimes scanty. sometimes containing fragments of solid fieres. Like frothy molasses Constipation, with tenesmus, with intermittent drawing pain about umbilicus and flank Green Grayish. Bloody; of bloody mucus, of almost clear bright red blood, bright blood from bowels Scanty, mucous, brownish, afterwards greenish, next day streaked with blood, S mucous, greenish, preceded and followed by griping, and tenesinus after stool. Copious Difficult Painful, green, with cutting and tenesinus Involuntary Frequent, and small, green, relieving symptoms somewhat, slimy, tinged with blood, and on straining shreds of lymph and frothy ash-colored secretions were forced out, aggravating the sufferings Omitted

Clinical.—Cholors or cholerate stools, not copious, with de-sire for warm food and draiks, which are swallowed with a gurg-ling sound, the statels are characterized by the most horrible cramps no sumach and abdomen and piercing scrasms, champs in extremuties, aspecially of the flator muscles, with intense coldness and palences of the surface, thumbs elenched across the palms.

Urmary Organs .-- Urging, with scanty discharge and < pressure; < fatigue; > stools, with constrpa Painful inability to urinate, requiring considerable

449

time and effort to relieve bladder Frequent micturi-|tracted; and small; and small, weak, hard ton, and seanty, with smarting as from sorenees of urethra Involuntary M M rare and seanter than susual Urne suppressed (Plumb) Burning sticking S. of r glands, with induration Lecinations in nape in measus Burning during meturition Urine seanty, on bendung head backward. Intermittent sticking and scalding Tinged with blood Turbid and jumentous, T, dark red, with yellowish sediment, T, brown- neck and back unite on moving head backward. 1sh, with sediment

Sexual Organs .- Penis swollen, glans inflamed. Menses delayed, dark and painful

Clinical,-Violent pains after labor. Puerperal convul-

Respiratory Organs .- Hoarseness so that he cannot peak, H on breathing cold dry air Voice trembling, stammering Cough, with interrupted, almost suppressed respiration; futiguing, with blowing of blood from nose, paroxysmal, without signs of lung disease. violent, at night, then chilliness and hoarseness from morning till evening, short, short, dry, straining, molent dry, at night between 11 and 1, < sitting, with tearing in head and return of the anxiety and pressure in chest, dry, preventing speech, hard, dry, with nightsweats, in morning, with offensive-tasting expectoration, with mucous E, with bloody E, with purulent E Much expectoration Purulent dark

expectoration Respiration difficult. Sufforative loss of breath; sense of suflocation, < walking, fatigue and in damp weather Spasmodic dyspnæa, with constriction of chest, then spasmodic comiting Short R Rapid R, with rattling in bronch: Vesicular murmur weak, absent or replaced by a subcrepitant rale

Clinical.—Whooping cough Laryngumus stridulous, with thumbs denched in the palms Spaunodic asthma, with blueness of the face and constriction of the threat, intense dypmen, rething and vonning Violent spasmodic cough and whooping cough, face became purple, romiting, the parozymas 2 drinking water face became profile, romains, the parozymas 2 drinking water more profile of the paragrams of the paragrams

Chest -Rattling when awake, R, ceasing during epileptic attack, with bloody mucus from nose and mouth Spasms, cramping, after vomiting Diminshed elasticity posteriorly on both sides Sticking beneath heart, S in side, preceded and followed by screaming, which interrupted sleep Pinching in I side, extending to hip Pain on r side, sharp drawing P in cartilage of sixth rib Pressure as from something hard on cartilage of third rib, < touch. Constriction, spasmodic, impeding respiration and increasing the anxiety. Feeling as if blood accumulated Coldness along sternum, with coldness of limbs and internal heat in abdomen

Heart.-Dulness in pracordial region on percussion Boung in pracordial region Interval Anxiety between first and second sound shortened by one-half, "brut de rappel" Palpitation Rapid action after a light supper Contractions weaker

(see Baryta)

Pulse.—Rapid; and hard and full, also with red face muttent, and small, weak, and small, wiry, and small, weak and thready Slow, large and intermittent; S

Conrum.

tearing in muscles Resisting pain in muscles where Tensive pain in nape

Back -Pain, < rest, > motion Cutting drawing in l side Sticking in l scapula on moving head; S beneath I, scapula near spine, not affecting respiration. Pain between scapula, P beneath r scapula changing on respiration to sticking Sticking transversely across small of B Lancinations in loins, sacrum, navel and in that region Pain in loins; < rest, > motion

Clinical.—Spinal pritation, with violent paroxysmal pain, extreme sensitiveness of the whole length of the spine

Extremities.—Cramps: convulsive movements Rioidity between convulsions Periodic painful contractions of fingers and toes, often so that fingers could not be extended by any force Painful jerkings alto nately in flexor and extensor tendons of hands and feet, extending into upper arms and legs, with cramps in calves. Trembling. Pain, < rest, > motion Bruised and paralyzed sensation in E and small of back, so that it was difficult to use E , with tearing Drawing and tension, often with shuddering and chilliness though skin was not cold. Sick feeling as before coryza Weakness, with pain at clows, in bends of knees Numbress; of different parts and under certain circumstances prickings in various parts of body Difficult to move

Upper Extremities.-Tearing l'aralysis as from lead. Drawing pain in shoulders. Jerking of arms and hands Arms painful during rest, < r Arms weak Thrust or jerk in 1 upper arm Pain in upper arm; as it broken or bruised Sensation as if bubbles of air issued from upper arm Tearing in ulna, < wrist, < touch , jerking T. in ulna Pain in l forearm as if something were broken Drawing pain in forearm, extending to thumb, r then I

Hand -Swelling and inflammation, and of arm. with pain, fever, quick pulse thirst, furred tongue, then abscesses on H. and arm, afterwards fingers and back of hands were ordematous and contained transparent fluid, finally it was necessary to make an incision from middle of forearm along wrist, over tendons, into palm Twitching in morning on rising Jerking tearing in metacarpal bones and first joint of thumb, < touch Construction of different parts of r H and forearm and sensation as if increased in size, motions not fully under control of his will Pain in ball as if something were thrust through it Lameness of r, forearm in constant pronation, hand bent at r angle to arm, thumb drawn into palm, fingers flexed, extension of hand, especially of finger-joints impossible, flexion only Clinical.—Chromic acrities, with distress behind steraum, etc. partial, upper limbs emaciated, < r, r hand nothing er Baryta)

Weakness; and paralysis Numb-

Fingers.-Nails white. Tearing in tips. and dry skin, and irregular; and wesk; and thready, pain beneath thumb-joints Pain in thumb-joints as and small, and small, spasmodic; and small, inter- if dislocated Tensive pain in balls of thumbs Numbness and shrivelling.

Lower Extremities.—Cramps, < calves. Reeling hard and small, S and small, S and weak. Hard; from side to side. Drawing pain in nates Sticking and full; and contracted, and small, spasmodic Con- down from 1, hip at noon, < joints of knee and foot.

Pain in muscles on anterior surface of thighs. Pain above knee as if bruised or broken Drawing pain in r thigh Pain in knee as if broken. Knees weak, and painful drawing on walking or standing, they give way.

Generalities.—Loss of four pounds in weight
Tremors in afternoon and evening Pains sharp, in calres on attempting to walk; paroxysmal, in calves, drawing one limb sideways and backward, > rubbing.

Tensive-drawing cramplike pain in calf

Tearing below knee Burrowing in and below calf Pain in legs; in calves, < quiet; in lower part of calf as from a thrust or jerk; drawing P. in lower part of calf. Legs weak. Legs fall asleep Legs feel heavy and dead

Painful heaviness of ankles Pain in ankles when tared Jerking tearing in sole and on back of foot Pain on inner margin of I sole, P in metatarsal bones, < touch; sprained P in l. sole Drawing pain in • feet; in metatarsal joints, at root of great toe; in I sole, < walking Great toes drawn totanically downward and pain in soles. Pain in toes Sensation as if wind issued from toes

Clinical.—Paralysis of lower extremities, attacks of suffoca-tion, internal heat, external cold, with anxiety and anguish, the re-sults of fright

Skin .- Yellow; light, < face and conjunctiva; and pale, earthy Red spots on arms, with burning itching, < night Flabby Dry and lifeless Contracted Rash on chest and hands on hmha Enuptions, from back of r hand to elbow and on I hand, with rritation, < night in bed and near fire, and occasional oozing. Peterbial spots on neck and arms. Tetter on bend of elbow, causing yellow desquamation, itch-ing, < evening Eruption similar to leprosy, < hair of head, the largest spots white and scaly, with moist of head, the largest spots white and each with most expensive and the special policy with most expensive and the special policy with most expensive and special policy with most expensive and special policy with most expensive and special policy with sedent policy with sedent policy with sedent policy with each expensive and the special policy with the special policy policy with the special policy arated from cutis Vesicles exuding water, on tips of fingers. Sticking outward in various parts Formication of hands, < finger-tips Itching on soles

Sleep -Yawning much in evening; frequent Y without sleep, Y., with sleepiness, but inability to sleep on account of a crowd of ideas Sleepiness, sepecially in children; with weakness Letharque sleep after counting Deep sleep after colle, D, after the weakness; D, with twitching of limbs Sleeplessness Restless S, interrupted by dreams, R and unrefreshing Twitching in sleep. Raving in S Diffi-cult falling asleep, then sleep full of dreams, with frequent waking. Sleep frequently interrupted by dreams Anxious dreams waking her

Fever .- Coldness, with cramps in limbs, internal, with external heat and at night burning skin Shiver- lect dull Stupid, confused feeling, transiently . ing. Cold limbs; and covered with cold sweat, legs, hands and feet Cold skin Fever, with full, hard, frequent, variable pulse, hectic; continuous almost typhous; hot face without sensation of heat, pungent heat of skin, hot and dry skin Sweat, at night, profuse, at night; profuse, on forehead; green; bluishgreen; light green between toes and under nails, cold, clammy during the collapse, < forehead, with moaning, cheeks and eyes sunken, face bluish, jaw hanging down; skin clammy, pale and doughy. Dry skin, then moist, and (< during great prostration) profuse awaat.

Clinical.—Intermittent fever, with icy coldness of the whole body, predominating cramps in the limbs, blue surface, collapse, suppression of urine.

#### Curare.

The arrow-poison of 8. America is triturated for use

wandering, in all parts, needle-like through various parts, < 1 temple; needle-like at intervals through various parts during the day, fleeting, first under sternum, then in abdomen, wandering, in evening, with pain under r. scapula Pulsations in all parts except feet Restless feeling Inclined to physical but not mental exertion in morning Unusual feel-

Weakness, all day, with weakness of back; on waking, lasting all day, with headache and malaise; on waking, with stupidity, the stupidity > afternoon, hurried feeling in evening; < arms and legs, > to-wards evening, with trembling feeling, with trembling on trying to walk; with vertigo on trying to hold head up, with malaise and stupidity Faintness. Numbress in all parts, < r arm and wrist, and in cervical region, with tingling Discomfort, as from a combination of numbness and tingling in superficial muscles, < r arm, beginning in r arm and becoming general, always with pain in basilar region. Symptoms gradually > towards middle of forenoon, then < again about noon, and continue severe the remainder of the day

Clinical.—It seems to have arrested the paroxysms of hydrophoba when injected under the skin Catalenay. Threatened paralyses of respiration, the breath stope on falling salesp, sometimes paliastive. Nervous dobility, especially in old people, arms and hands weak, as after long-continued stchess, numberses as if

Mind -Laughed a great deal through the day Changeable disposition, jesting and laughing, then shedding tears Sensitive, the least annoyance brings tears All feelings intensified, have to guard myself to prevent showing affection towards those I like, and irri-tability towards those I do not like Energetic feeling all day, and hurried Nervous, hurried teeling all day. Discouraged and cross, and sick of living, tired of everything Depression of spirits, and feeling like crying, desire to be alone Inability for mental work, from heaviness on vertex, I for mental or physical work, wish to keep quiet Laziness Ina-bility to fix the thoughts, overcome by the will Do not wish to talk or have any one talk to me Intelnan Forgetful

Head .- Aching, through the day, < immediately after eating, sometimes nausea, on waking, lasting all day, with irritability, on waking, after breakfast. by walking stooping and quick movements, afternoon, when there was pain in occiput, after waking, an hour after breakfast, varied during the day and evening, at times in occiput, shooting into neck, at other times pain in vertex, always in temples; before breakfast, and in early part of day, but gradually wore away, at base of brain and passing upward, beginning at breakfast, < chewing, in evening, in brain after eating, in steam-cars, with nauses, the A. > night's sleep; during menstruation, with dragging pain in pelvic organs, leaving weariness for several days after

flow has ceased, < noon, < eating, motion, light, beginning over r, gradually spreading over whole r. noise and at night, > pressure and quiet; > open air, side, with weight on vertex, it hurs to move the head, forcing her to lie down before breakfast; with time; shattered, confused feeling, head, congested feeling, ling, prickling and nausea; with malaise, sudden, with weakness and trembling of all limbs, confused shooting from temple to temple feeling and tension of head, pain indescribable at first, but soon became definable, sharp pain in forehead and I temple, with occasional pains in vertex and r temple, pains stooping and motion, sensation as if ears were filled with compressed air, tingling pain along malar-bones and zygomatic processes to PM; as if skull rested on brain, preventing sitting temples, the headache reached its climax at 11 AM. entire brain, confusion of thought, weakness of joints, pulsations through whole body, inability to study or think, stupidity and sleepiness, neuralgic, extending down spine, radiating from base of brain to vertex and outward to cars, during the day, < eating, wandering, wandering, all day, < motion and eating, located in occiput after tea; tired, on waking, increasing till 8 P M , tired, heavy, < forehead and temples. heavy, all day, with occasional sharp pains through temples and lower part of occuput.

Feeling as if about to ache on waking lasting till middle of afternoon Soreness in every fibre of brain, < motion. Confusion, > lying, with heaviness, dulness, difficulty in holding head up, weight on vertex . with enlarged feeling and with darting pain through r. temple to base of brain; with enlarged feeling and with darting through temples, < r, coughing causes a shattered, torn feeling, so that she must hold on to temples, the same sensation on motion of head unless moved very gently, preventing study Heaviness, with weak, tired feeling Dulness and stupidity Feels large Must hold on to it to keep the parts together Empty feeling, it is a great effort to talk Lightness Rush of blood, with aching Congested feeling Throbbing in all vessels. Vertigo, on looking at near objects or at water, while walking briskly to avert the headache Symptoms < stooping

Forehead -Sharp darting pain over r eye, severe at times, leaving confusion, over r eye, extending to vertex, after eating, disappearing suddenly Sharp pain in F and temples in morning on rising, < motion, > with nausea, faintness and weakness Pain, all day, and in temples, along infraorbital ridge, through temples and about ears, over r eye, < eating and at night, all day, beginning after breakfast, in central and upper part of F and in anterior part of vertex preventing thought, < vigorous exercise and stooping, in I side after waking, afterwards in entire F , and in temples and occuput, extending to ears; and in vertex, in occiput running to nape and outward to ears, also m every bone of tace, < through zygomatic arch

Temples -Neuralgic pains during the day, when walking in the wind , through I. , intermittent, through them during the day, in r, running through head to spine Sharp pains through T and r side after retiring Aching, through l, and in zygoma, malar and nasal bones, beginning after breakfast, and in upper part of forehead, but at times in the whole brain; vague, in r , through r running down spine; through r, extending to occiput, with heat on vertex, occasional, when of brief duration neuralgic, when longer lasting, a dull ache which gradually wore away, heavy, vomiting, etc.

as if all the blood were in the head and face, at times

Vertex.-Pain: in morning. < motion, walking or stooping, > eating, sharp pain at a central point within brain, also through forehead and temples, with dragging and at times sharp pain in occuput extending to between inferior angles of scapulæ Weight, at 12 30

Sides -Pain in I , now in I , then in r , then in forethen gradually diminished, < 4 PM, pain through head, in afternoon and evening, finally confined to a space in front of 1 parietal eminence; tired, in base of brain on 1 in afternoon; half dizzy, in r after eating

Occiput -Pain Pulsations at 3 PM, with strong throbbing in carotide and dazed feeling in head

Scalp -Sore to touch Itching

Clinical.-Neuralgic headaches beginning over r eye and extending through r side of head

Eyes .- Dull, and pupils contracted Feeling as if full of sticks Strained feeling Feel hot, sore, it hurts to move them Feel weak Feel badly to keep them closed. Tears roll down cheeks Feel badly desire

ness, no power over upper lids. Sensitive to light

Bars and Nose.—Ears felt as if filled with compressed air Dryness of nasal mucous membrane every evening; at night, with chapping of epidermis, and of cuticle Constant flow of nasal mucus Sneezing: violent, at 8 PM.

Clinical.—Post-nasal catarrh, constant hawking, trickling of mucus down throat

Face.-Pale, sallow, pale all day, with dark circles under eyes Red, with dark circles under eyes, cheek red, I pale, with dark circles under eyes, with congestion of blood to head. Feels tired. Tingling in zygoma, then dull pain creeping through it, then pain in temples, finally pain in occiput, vertex and upper part of forehead, and this lasted through the day Tingling numbness in zygoma.

Mouth.-Arterial pulsation in r. teeth on ascending stairs Tongue white, coated white, taste bitter, lying, with dull pain in other parts of brain, < towards coated yellow, coated yellow at base, papille raised occiput, drawing pain from occiput to between scapulæ, and bright pink anteriorly, also with bitter or bloody taste Salivation Taste bitter, in afternoon; later unclean; T foul after eating an apple in forenoon, lasting all day, T. bad, insipid

Threat .- Tough white mucus, hard to remove, feeling as if throat were full, and would suffocate unless mucus were removed. Stinging from swallowing the drug. Smarting, sore feeling Tingling

Stomach.-Excessive hunger, but satisfied with a reasonable amount of food; almost to faintness, sometimes before meals, especially dinner, sudden H before meals. Appetite lost, for breakfast, but stomach feels empty, craves acids Aversion to bread No thirst, with the fever. Nausea. Pain in S. and upper part of abdomen in evening, > pressure. Pressure in epigastrium, with needle-like pains Empty feeling about 10 AM, then faint feeling Feels collapsed. Symptoms > after breakfast, still hardly able to hold head up or to sit up.

Climical.—Perastent bilious vomiting, preceded by a chill, sociated with vertigo. In a case of cirrhotic liver it relieved the

445

Abdomen. — Bloated around the waist, < r. side | intercostal space, at night. Pain through r lower side Rumbling and uneasiness. Occasional shooting in afternoon, at base before breakfast, with pressure; through A. and chest; through A. during the day P when walking fast, when ascending stairs, stooping Sharp fleeting pame through A. and chest; at intervals; localing forward, with discious the state of the stat P. for a few minutes at a time, causing a faint, sinking dry. Lungs feel as if I had taken cold.

Heart.—Sudden fleeting in A and chest during the Heart.—Sudden intermittent sharp pain in region From a wild interest in the continuous and the cont opposite to the one lain upon, > pressure, in l hypo-chondrium when walking, also statches at night in in evening, only needed to think of any point to be bed, fleeting, in hypogastrium, with pressure and ful- conscious of pulsations there Palpitation: from a ness in vagina; sharp fleeting, through hypogastrium, little excitement, on walking, when walking a little feeling in vagina

Anus and Stool .- Itching at anus, with smarting Diarrhea early in morning Frequent diarrhea all day, with pain, F. at night, at night, with faintness during and after stools; painless. Stools milky-white, pain more in large intestines, but at times radiating to then a pause, eight beats and a pause, then two and a every part, causing a faint sinking sensation, diarrhea pause, etc

< after 1 PM. Constipation

Urinary Organs -- Frequent anxious desire to urinate Urine copious; scanty, with brick-dust sediment . thick

Sexual Organs .- Fulness in vagina when standing . when walking Weight in vagina, > continued motion Menses too early; and profuse, every three weeks, preceded by weak feeling, bearing-down pain in pelvic organs, with frequent micturition, flow lasted three days, dark, scanty, with bearing-down pains, with occasional griping in r. ovary, weakness, restlessness, tired feeling, head symptoms and depression of mind. in another proving the same, with severe pain in lumbar and sacral spine, running down thighs, with weight on vertex, loss of appetite, nausea, giddiness

Clinical.—Ulceration of the uterus, the discharge ichorous, corroding, fetid, with hismorrhoidal fissures and general appearance of scirrhous cachexia, with aching in all limbs and numerous symptoms

Respiratory Organs.-Hoarseness, almost aphonia Smarting way down in bronchia Bronchial tubes sore, inflained. Cough in afternoon and evening; C. jarring the head; dry, hard, dry, hacking, causing shattered sensation in head, dry, harsh, hollow, shaking the whole body, < head, < after 3 P.M till midnight, and lungs feel dry; dry, harsh, hollow, paroxysmal, from irritation at base of lungs, causing a shattered, torn feeling in head and redness of face, no expectoration, paroxysmal, in afternoon and evening, causing shattered, torn feeling in head. Dyspnæa, with pain about heart; D. from exercise, with distress, almost amounting to pain, in precordial region Difficulty in breathing after ascending stairs breath; on slight exertion. Sighing

Clinical.-Dyspnœa of emphysema, exceedingly distressing

< region of ovaries and uterus, with heavy, pressing hurriedly, when walking in the street and on first going into open air, on ascending stairs, on ascending stairs, with difficulty in breathing.

Pulse. - Rapid, and temperature high Slow and almost imperceptible; S, weak and lagging; some beats not as full as others, and intermittent, sometimes like half-beaten eggs; and before the stool and I could count two beats, then a pause, three beats,

Neck and Back .- Pain in region of seventh cervical vertebra after a walk, drawing, in nanc Sensation as if atlas and axis had been pried apart, on rising to the feet it changed to a sharp pain. Pulsation extending from neck along spine to lumbar region in after-noon when sitting Weakness of back, all day, all day, with lameness of it and aching at lower third of scapulæ, of B and hips all day, with lameness, when stooping, with lameness Pain extending down spine; P between scapular Bruised feeling in I loin

Extremities.—Unsteady feeling on walking, gait as if intoxicated Weakness, and in joints, W., < lower, with heaviness, with inability to walk straight, giddiness, knees feel weak Go to sleep. Arms weak; <

r, in evening, with tingling, r, with numbness Heavy, nervous, uneasy feeling in arms, with weakness of wrists Sore spots in flexors of 1 forearm, preventing a firm grasp Lame spots in flexors of 1 forearm in afternoon and evening Lower limbs have no strength when walking, with trembling feeling; weak feeling in muscles on ascending stairs feeling in muscles of 1 thigh Sore spot in flexors of r. thigh all day, muscles of I thigh sore to touch, I. knee sore to touch in afternoon and evening. Legs lame when stepping up or down Tenderness of feet in evening, T. of callosities of feet, of callosities of l, foot Feet feel nervous L foot and limb go to sleep when sitting still

Skin.-Rhagades above ankles Chapped, above ankles. Itching, on various parts, < night, on head and back, arms, arms and thighs, extending over abdomen, arms and thighs, < after waking in morning Short and after 3 PM; lower limbs, thighs, sole

Clinical.—Liver spots.

Sleep.-Yawning . Sleepiness; nearly all day, with Chest.—Statches through middle of C. and about stupidity, head feels tired and dull, slept in a chair heart in morning after waking; S on ascending a hill, at D AM while trying to study, at 1 rM, inability to with palpitation and breathlessness; about middle keep eyes open, yawning, had to take a nap at 2 rM, and lower part of sternum, later from behind sternum lat 3 rM, and deep sleep for two hours. Shortly after through whole lower part of chest. Darting pains retiring the thoughts were suddenly interrupted by a through it, in evening, now through base, then rush of disconnected ideas, which could not be con-through apex; through lungs. Sharp pain two inches trolled by the will. Sleepless the first part of the to left of sternum, extending from second to fifth night; and waking every morning about 4 A.M.: tall morning unrefreshed Restless sleep, after midnight;

Fever.-Chilliness, chills running up back, chattering of teeth, then heat and congestion of blood to head . C of feet at 630 PM, chattering of teeth, chills running up back and then extending to extremities, chill came on after eating, lasted half an hour, then high fever, face almost purple, eyes red, cannot keep them open, lids hot, eyes sensitive to light Cold hands and feet, all the blood seems to be in the head. Fever until nearly midnight Heat in cervical region, spot in each sole, < l.; in a spot on l sole in morning; alternating with great activity in a spot on each sole when shoes were removed, in in a spot on each sole when shoes were removed, in feet on removing shoes, with itching. Sweat over the to be alone, in suppressed menstruation whole body

Clinical.-Permuous fevers, with continued chilliness.

## Cyclamen.

A uncture is made from the fresh root of Cyclamen Europeum, L. General Action.-The symptoms seem to group themselves about the functions of digestion and menstrustion

Allies - Lyc , Puls , Carbo v , Cham , Coccul

Generalities.-Drawing or tearing pains, < motion, in various parts where the bones are immediately covered by skin, as, for example, on tibic and calves Boring in r metatarsal bones and in r temple, then extending into r. upper teeth, and, after leaning on 1 temple, extending into this also Paralytic pressure on chest when sitting still and in upper arm and tibia General discomfort Uneasiness at night Constant desire to he down, in a child

Weakness, in morning, on waking; in evening, in evening, with sleepiness and frequent yawning, in evening, with shortness of breath, in evening, but on rising after a nap bruised and stiff feeling in limbs and drawing pains in thighs and knees; on waking, also with clammy mouth and irritable mood, on waking, with fretfulness, confusion of head and pasty taste; after eating; after dinner, after midday nap, with tension in abdomen, passage of flatus up and down, profuse micturition, with dragging in bladder and rectum, heat in head and shivering in back, when moving, but on sitting itching and other symptoms towards evening, with pallor, sunken eyes and rapid pulse, with profuse sweat, with disinclination to work General depression, with weariness of feet, sleepiness and frequent yawning Sudden faintness as it everything turned in a circle, with blackness before eyes, then violent vomiting Heaviness of body and wearmess of knees; H of body in morning on waking with pasty mouth, hot head, pressure in stomach and passage of flatus upward and downward.

weakness of body, the latter > on moving about; with disinchination to speak and little feeling in the

midnight, and waking at 4 A.M., till after midnight, if some misfortune were impending, then sudden and waking every morning at 3 or 4 a m Frequent joy, which he expresses by quivering of joints; alterwaking, with a disturbed feeling, F waking, feeling nating with liveliness. Anxiety Apprehension, as if some one were trying to rouse me Woke in Sadness as if he had committed some evil and had. not done his duty. Melancholy, complaints about and head felt hot and confused Uneasy dreams all her weeping mood (Puls). Profound reflection connight, laborious dreams Sudden joy towards evening. Absorbed in himself and disinclined to talk; A. in thought, desires to be alone and thinks especially about his future state Paroxysmal disinclination to talk. Dunclination to work, lasting till evening, D to work, alternating with great desire therefor Dulness. Stupefaction, inability to reloice or to be sad, although he feels as if he had just been afflicted, his mind is only somewhat clearer when he is excited, and he then acts as if just between scapule Burning on 1 thigh, then itching awakened, having only half understood what was in evening; B in a spot on ball of each foot; in a going on. Memory weak, he easily misplaces words;

Head .- Sticking, > appearance of menses, with weakness; S in brain on stooping Aching, in morning; in morning on rising, with flickering before eyes; in afternoon, with vertigo; in evening; in evening on going to sleen, all night; with nausea; with weakness and nauseous taste, stupefying. Oppressive stupefaction, with obscuration of vision and sensation as if eyes were about to close Confusion; in evening, with vertigo, as if objects were wavering, stupidity, heat of head, red cheeks, glistening eyes, alternations of heat and chill, full, hard, rapid pulse, finally nausea and watery diarrheea preceded by rumbling and colic. after breakfast, with salivation, eructations and pressure in stomach; > cold applications to forehead, with other symptoms of head, with obscured vision, with roaring in ears, with warmth

Emptiness changing to prickling in scalp and skin of face Feeling as if bound Heaviness Dizzy fulness, with heat of it Pulsations in brain in evening m bed, with late falling asleep Congestion. Rush of blood, with headache, anxiety and dim vision Vertigo; all the atternoon, towards evening; towards evening, with pain in forehead, < walking; with dim vision; periodic, with general sick feeling, disordered appetite and fulness in stomach, as if descending a mountain, as if objects wavered; as if all objects turned in a circle, and on lying down frequent eructations, as if objects were turning in a circle, < motion in open air, > in the room and when sitting, as if the brain were moving in the head or as if he were riding in a wagon with his eyes closed, on leaning against anything when standing Sensation as if the body were turning around, and darkness before eyes.

Forchead.-Contraction of muscles as in anger. Sticking, in r and in temple; in forepart of brain on stooping, jerking, in r., extending to face, < motion Sudden tearing in r bone Pain, making night uneasy; drawing from r. side to 1, then back into r side, then in I temple, > after touch. Stupefying pain, in r, then nausea and eructations Confusion; gradually extending over whole head, with prickling Mind.—Ill humor, with sleepiness of mind and in scalp; in sinciput, with heat of it; in sinciput, with itching of scalp

Temples -Sticking in r., in l, then in sinciput, body, with sadness, no desire to work and anxiety as, with vertigo, then pressure in forehead; outward in bones; jerking, in 1, then r.; drawing, in 1, > touch.
Pain; in 1, with heat of head, then contaion drawing pain towards vertex, with confusion to freed, otherwise, and emptiness, jerk joint of jaw, r. in r upper jaw and in crown of r eyeing and drawing pain towards vertex, with confusion to the day, of received, and stiffness of nape.

Sticking on sides, < along coronal sutures den boring in l. parietal bone. Sticking in coronal suture, with pulsations in temporal arteries; in r, preceded by pressure. Pain in middle of vertex, at times causing vertigo; in vertex as if the brain were bound with a cloth and as if he were thereby deprived Pain in occiput; painful drawing in of his senses brain, in a line from l. side of occiput through l. temple Tearing externally Pimples on occuput. Itching sticking, changing its place on scratching Itching.

Clinical.—In mentrual derangements, vertigo, with headache, nauses and vomiting. Vertigo in gastric deringements,
things turn in a circle. > in the room. < open air (Coven),
Nux v) (the opposite of Pul) Perfocis headache on one side,
with debility, in an amenic patient. The headache of Cyclamer
are up to be associated with mentrual disturbances, or with
amenia, independent, etc.

Eyes.—Sunken and dull-looking, S and surrounded by blue rings Glittering Burning, < reading; on reading in evening in bed, with flickering of the light, of r. Sticking itching of E. and lids Pupils dilated, < r, alternately D and contracted, finally contracted, alternately D and contracted, dependent on respiration, occurring after inspiration or expiration, prover seemed able to see the fibres of the iris as through a magnifying-glass Pupils contracted Sticking in r ball and lid. Vessels visible in whites, < 1

Lids -Swelling of upper Contraction as from a strong light Blinking, on slightest pressure or rub-bing, of r upper Vibration of r upper on rubbing eye or forehead Pressure upon, on frequent waking at night, P as if agglutinated, P. in I canthus, inner canthus Dryness and pressure as if swollen, with itching sticking in them and in balls Itching, in r inner canthus.

Vision dim ; < on waking, with spots before eyes ; mafternoon, so that she could not knit Flickering, of various colors, glittering needles, vision of smoke (comp Lyc), F, with confusion of head; beginning with headache, r eye, but lasting longer in I, with inability to read, the light appeared like a luminous ball, also with open as well as closed eyes, vision of a dark disc frequently pierced by lightnings, afterwards he saw with I eye as through a dark blue glass. More acute than usual Double Rings around the light, so that she must stop embroidering on white Vision of colors, yellow, at other times green; at times yellow, at times black

Clinical.—The visual disturbances of flickering obscuration, etc., particularly associated with disturbances of the female functions and of digestion. Convergent strabiamus.

Drawing Ears.—Tearing in inner passages of l pain in inner passages of r., hearing less distinct in this ear. Itching, with removal of much wax Stopped fat (Puls), so throat and palate on eating a lattle, feeling in r. Ringing; < night, with sticking and head-caused by everything but lemonade; with waterbrash, Roaring; on walking a long time

Nose,-Pain across bones in evening. Dryness Coryza, with frequent sneezing; fluent C.; sudden fluent C., causing febrile excitement, sudden discharge of much watery mucus several times at night, without sneezing. Frequent slight bleeding. Sneezing; violent, with itching of ear and much ear-wax. Smell dimen-

Face.—Red cheeks. Itching sticking in r. cheek,

Mouth .- Sticking in last upper hollow molar Tearing in Lupper teeth; in three L back T., as if they would be torn out. Jerking through upper T, tearing, sticking J in two first r upper molars. Pain in r lower T sore P in r upper incisors, < crowns, extending into walls of mouth Tongue white; yellowish-white, T coated, coated white, tip red, burning, covered with yellow blisters, tip red, burning, covered with blisters, with pain on speaking or chewing, and with salivation, sticking, burning in I. side, with sticking, burning in tip in evening Pale M and fauces in morning Much mucus Rough, slimy sensation Palate feels swollen Dryness of palate in evening, with thirst and hunger Saliva has a salt taste, which is communicated to all he takes. Salvation, with pasty taste; with frequent hawking, frequent S, with incomplete eructations tasting of food Salt taste to food; T flat , flat to food and almost wanting, bitter T, nauseous T, sudden nauseous

Throat.-Drawing pain in submaxillary glands on bending neck forward Fauces red, and painful on swallowing, with much tough mucus. Uvula and tonsils contracted and white Much hawking Scraping in fauces, frequently, with pain on swallowing, burning Sudden sore pain Drawing-bruised pain deep in muscles, extending internally down cesophagus and causing tension in it Jerks in evening, with pain Constriction Burning

Stomach.-Appetite great, alternating with loss of A., unnatural, then at times lost, diminished, D at dinner, then constant empty eructations, lost, L especially for breakfast and supper, at these times satiety, as soon as he begins to cut Aversion to bread and butter, warm food goes down more easily Thirst, at night, after eating, great during dinner, no T all day, but it occurs in evening as face and hands become warm; absent, then greater at times than in health Aversion to beer

Eructations; after breakfast, which consisted of a cup of coffee, in evening after eating, always ending in hiccough, wherewith rancid fluid rises into throat, sour; empty after eating, empty, burning and rancid, of a fatty smell, with oppression of stomach Hiccough. after eating, when cating and afterwards, or hiccough-like eructations

Nausea, towards morning, at night, in morning after the accustomed smoke, with fulness of chest and unusual hunger, in afternoon; towards evening, with vertigo, weakness and ill humor, after a cup of coffee in evening that was not relished, with sour eructations, after the breakfast that was not relished, with vomiting, after dinner and supper, with uneasiness and qualmishness in epigastric region as after eating too much with headache, with diarrhoa

Vomiting, at night, with diarrhoea, then vertigo, dim vision and frontal headache, violent, then sleepiness; of a greenish liquid; of mucus; of food and mucus, with vertigo, of mucus, then uneasy sleep interrupted by starting up and unpleasant dreams; of watery mucus, then vertigo, so that she must lie down Distention; with rumbling in hepatic region; and of

abdomen, with eructations, especially D, like a ball after dinner; F., with dragging, F., with urging in the breast, and it felt as if air streamed out of nipples Fulness as if overloaded and six hours after eating incomplete eructations tasting of food. Sticking: in Pain; in epigastric region; in epigastric region pit; in pit, and fulness as if overloaded, ending in eructations

Clinical.-A general aggravation from fat food, like Puls., and many other symptoms similar to that drug, from which it is differentiated by its peculiar conditions.

Abdomen --- Distention (Lyc), at night, with full feeling, by gas Rumbling, with griping; R. after breakfast, with movings, then pain Flatulence Fremoving Cutting, with pain in small of back Gripfrom a tape-worm, with sensation as from something living in it Cramplike pain, in evening, with head-ache, < in forchead, sudden intermittent Pain; in afternoon and night, on touch Dragging, with increased warmth

Sticking in hepatic region, beneath hepatic region Tearing, piercing through-and-through sticking beneath stomach, on moving about Griping in upper as before diarrhea, then yellow soft stool, then griping, then constipation Throbbing in upper Paralytic pressive sensation in upper, as if part of the intestines were loose, with tensive sensation in neighboring parts. Tension in flanks Sticking in umbilical region quent griping in U region, waking him at night, pressure upon abdomen, disappearing after stool Deceptive distended sensation in r side beneath umbilicus

Lower —Rumbling after eating (Lyc), R after emission of flatus Sticking in I inguinal canal in evening. Jerking cutting along inguinal canal; sudden internuttent pinching cutting in lower A. Pinching, and pressure inward Pain on touch, with sometimes pressive, sometimes griping pain, at other times a mixture of the two Tension in inguinal region after mid-

day nap Discomfort, with nausea in it
Rectum and Anus.—Sticking in R , in A in evening Drawing pain in and about anus and in perineum, as if suppurating, when walking and sitting Heat in R. with pressure and with swelling of hemorrhoidal vessels 'Urging to stool; which was thin, with burning and straining, then streaks of blood, ineffectual, after a normal stool.

Stool.-Fluid, with frequent rumbling and passage of flatus Thin, light yellow. Diarrhea; after every cup of coffee, sudden Slimy, which afterwards is passed unnoticed Pasty Hard and frequent; in hard masses, compact, with burning in rectum Constipated. Odorless, brownish-yellow and mixed with mucus. Shooting out, at first crumbly, then soft, with palpitation With great urging and drops of blood Delayed Twice a day Absent

Urmary Organs —Pain going from bladder to urethra in evening when urinating Pressure on bladder and rectum after midday nap, with frequent urging to urinate, much urme and emission of much flatus; P. on bladder and rectum without frequent micturition or stool Urging, with pressure in anus Frequent urg-

beneath liver, with crawling as from something living bladder and rectum, with passage of flatus upward in abdomen, on rubbing the crawling changed into and downward, of much clear urine, also at night; of watery urine. Rare micturition, and urine scanty. Sticking in urethra, in forepart when urinating; with Urine increased; and passing in a large stream; diminished, light, containing epithelial cells; dark, containing floating flakes, dark, reddish-yellow, discharged as if shot out all at once, much sediment, reaction acid, chlorides abundant

Sexual Organs -- Prepuce retracted in open air Frequent erections at night without dreams to cause them. Sore sensation in glans and prepuce in evening after slight rubbing Menses profuse, black and clotted slight rubbing (Cham ), with labor pains and distention of abdomen, so that she could scarcely stoop, black, clotted and quent emissions of flatus Sticking; through A. on membranous; M. too early (Cham., Carbo v), relieving somewhat the heavmess of feet and melancholy: M. preing at night, G, then diarrhoea twice Gnawing as ceded by pain in abdomen, omitted the second day

Clinical.—Profuse frequent meastrustics, which comes on too early, with labor-like panse extending from back to pubs. Suppressed meastration with sgreav variety of symptoms of the head, eye, stomach, ansemia, etc (general dread of fresh air or with constant chilines) Chloross, with samiy and uppressed mense, great dread of fresh air Membranous dysmenorrhoss, with profuse flow.

Respiratory Organs .- Pain in larvnx Scraping in trachea in open air, with dryness, causing suffocative cough, sudden S in larynx Tickling in larynx, with scraping and with dry cough, lachrymation and watery salivation, T in larynx, with dry cough, frequent sudden T. in larynx, with paroxysms of cough Voice rough Voice weak when reading, with hiccough Cough, < during sleep, never caused by talking or walking, even against a cold wind; violent at night, with tickling in larynz, violent at night, with scraping in larynz, pain in fauces and thick mucus, hacking Much expectoration, E in yellowish-white consistent lumps. Suffocation

Chest.-Sticking in r. side, l., about 1 nipple at 4 PM when walking, in r side above sixth rib in evening, 1 side, < by inspiration, intermittent, in upper part of sternum, tearing, with dyspnea and short breath, tearing, on last true ribs on bending forward Pressure on sternum, in middle of S in evening, in 1 side, < about heart, as from too much blood, with palpitation Tightness in morning Oppression, with difficult respiration Fluttering in l side Burning in l. Mamma feel larger than usual sticking and tensive pains in them, glands hard and painful, flow of watery milk from nipples, the milk left a starchlike spot on the linen, as this fluid appeared the symptoms of the breast disappeared Feeling as if air streamed out of breasts, with swelling and painfulness of them and discharge of watery, milky

Heart and Pulse.-Sticking in pracordial region at night on waking; S. in region of apex. Heart's action excited, fluttering in region Palpitation in evening. Heart's beat and pulse scarcely perceptible. Pulse full. Pulse rapid and respiration somewhat accelerated, P. rapid; but respiration quiet, R., hard and full;

R, scarcely perceptable.

Neck.—Rheumatic drawing in 1. side on bending head backward Drawing rheumatic pain in l. side in evening on moving head, with heat in muscles of ing; with scanty discharge Frequent micturition neck and in l. ear. Paralytic pain in nape, > on bending head backward. Smarting sore sensation inter-| when sitting and standing, < walking, < near heel nally and externally in nane

backward, throwing shoulders forward Tearing venting walking, burning sore P in heals, walk-across scapile, with stacking and paralytic pain in arm ling in open air. Weakness of feet. Heaviness of Sore pain in region of lacromium, < taking off over-feet, paralytic, making walking difficult Dead feelcoat. Sticking in region of l. false ribs when sitting, ling in feet at toes after walking, and when walking > touch. Periodic deeply-piercing, griping stick- sore pain, < jumping. Pulsating tearing on lower ing on r side near spine, between os innominatum and surface of r toes. Pressure on 1 great T, drawing last rib, < during inspiration, which is impeded by P on great; drawing P outward in periosteum of I times < stooping, at times < pressure Drawing on great T unites with metatarsal bone small of , D pain. Tension in lumbar region

on motion. Fatigue as if their mobility were im- red, and the forchead was covered with similar spots.

tending to fingers and precenting writing Drawing in in evening in bed, causing scratching 1 arm, extending into fingers Tealing in elbow and Itching on lower jaw, scalp, neck, shoulders and

and ring fingers.

knee, in acromium and cap, in bends when standing, | dreams in bend of r, becoming a drawing, in flexor muscles, more painful when sitting

r., > touch and when walking; in foot when walking; sleepiness. Sleep interrupted and towards morning

and m ankles. Drawing pressure on back of foot Back - Drawings down spine, > throwing shoulders when sitting, > standing Sore pain in heels, pre-Pressure in region of lumbar vertebrae, at little Drawing in 1 great T.; D inward where the 1

Skin .- Red spots on thighs like burns, R spots on Extremities.—Stretching as before paroxysms of face, < forehead, with pustules The almost imperfever Trembling of hands and feet Pain in joints ceptible scars of smallpox became distinct and dark parred Hasynness, arms and hands, so that objects in the firmless on forehead, on scalp, face and rest of skin; casily drop the firmless. From the firmless of forehead, on scalp, face and rest of skin; heat P on r chest, tching P on parotid gland, Upper Extremities—Heaviness Sprained pain in shoulder-joint Paradysed, hard pressure in r upper whiteh-yellow lymph Sensation as if a large animal and norman, in periodsion much deep in muclea, or: were running over her body. Prickling and sticking

wrist Bruised pain in l'elbow, B pain across outer below avilla, in region of L inguinal canal, on side of elbow, < moving arm and on touch Pain in elbows, on calf, on r calf in morning, with swelling r elbow, > morning after rising, returned in forenoon, of veins extending to foot, so that he scratches till it. gradually extended to shoulder and fingers, ; fore-bleeds, of r calf in evening, so that he scratches till arm, > moving arm or changing position, returned on it bleeds, which causes burning pain, in evening, not keeping arm quiet, the pain returned on going to bed only in skin, but apparently in bones of 1 toes, on Sticking in muscles of r forearm. Tearing in 1 back of r great toe, after scratching itching white forearm; in periosteum of I radius near to and in pustules, the I - rubbing until the toe is sore, on rotation, in periodical for Lands food of the fine of the first first form of 1 little finger, then red vesicles; then where it is so when the rotation is difficult. Pauful draw-1 red pumple on metacarpal joint of ring finger, soon rings in many surface; surface of shelf of their, and in write, becoming white as from a black-t surrounded by a red Bruised pain in r forearm, extending from elbow to areola Sticking itching in all parts in evening in fingers, painful on motion, waking him, > towards bed, sudden S itching between fingers, sudden S morning Swelling of veins on back of hands in itching above ankles and on toes, now better, now evening Aching on back of I hand Feeling as it worse, then warmth alternating with numbness of everything would fall from hands. Numbness of r skin, statching itching in various parts in forenoon, hand Cramplike, slow flexion of r thumb and index, changing to drawing and tearing pain, sudden throbthe tips approach each other and have to be forcibly bing S itching in various parts, then numbness extended Tearing in periosteum of little, middle litching gnawing in various parts, > for a time by

d ring fingers.

Lower Extremities.—Tearing on outer side of r Sleep.—Yawning, frequent Sleepiness in forethigh in evening Cramplike pain above r populates noon, at noon after eating, with weariness, in after-Rheumatic drawings in I gluteus maximus, along its noon, with fretfulness, in evening, with deep sleep attachment to thum, towards sacrum, when sitting, | at might and lascivious dreams (after a cup of tea, standing Weakness of thighs and legs, on long with four teaspoonfuls of rum), after eating, when standing they sway to and fro. Sprained pain in I sitting, irresistible in evening, also with chilliness knee-cap Bruised pain in I knee; when walking, or Early sleep and confused dreams Sleeps longer than fatigued pain, B. pain, now in one, now in other knee, usual in morning Sound sleep, with indistinct, fright-> on motion Drawing pain in I knee-cap, in r ful dreams, S sleep, with confused, unremembered

Sleeplessness, with thirst, heat and headache. Late extending to tips of toes, < 1 leg. Tensive drawing falling asleep and frequent waking, late falling asleep, in tendons of knees when sitting and standing much dreaming and frequent sudden waking, fully Weakness of knees Twitching internally beneath a wake at 4 m, but sleep again about 6 30, with no knee Sticking in muscles of r calf Tearing in I desire to rise Starting from sleep. Realizes sleep; leg. Tearing paralytic pain in tibue on motion, with interrupted by dreams, with frequent crying out, with weakness and unsteadiness of knees Drawing in 1 frequent starting in fright, caused by dreams, then leg. Drawing pressure in table, appearing when sit-weariness in morning on waking, with dreams of ting, and disappearing when walking, or vice versa, but money, with confused dreams, though he went to bed after midnight, and disturbed by frequent attacks of Sprained pain in ankle on stepping; when walking anxiety and nausea. Frequent waking and standing, > sitting down Cutting behind I inner carly, with inability to sleep again, and when he malleolus when walking. Spraued pain in l. foot, in wishes to rise mability to do so from weakness and woke

some evil were impending, after cating, after dinner, a room
with congestion to brain, after a feverish attack and Pupils always dilated and insensible to light, and in eating, without thirst.

when he first fell asleep

in r side, with fulness, and in abdomen, rising into thinking of something else. Pulse slow and full head in bed, with sensation as if head were turning about, rising into head and lasting till evening: rising into H, with sweat, and towards evening cold shivering, then palpitation In various parts, hands, lis purpures, L nape, nock below jaw, and after an hour dryness of palate with thirst. In whole I leg in evening, with out redness, offensive S between 1 toes

#### Datura Ferox.

Datura feroz, from India. Symptoms from numerous cases of poisoning. Compare Stramonium

Symptoms on an average continued twenty-four sensibility on the second day contraction of pupil and forms of dropsy, with a weak heart in many cases an attack of fever, but in the fatal cases the tympanitis of abdomen increased, come set Bry, the Alkalies (Calc., Kali, Bar), Zinc, m with stertorous breathing, pulse weak, at last imperceptible, cold perspiration over whole body, death Distressed appearance and did not like to be touched

many dreams, with an emission. Unpleasant dreams, gible words, and if one sang she began to dance in the frightful, in evening Nightmare in evening as soon Japanese fashion Delirium, characterized by incoas he fell asleep, inability to cry out though he herent talk and by peculiar movements of hands, as if to pick up something from the ground or moving Fever.—Coldness, all the forenoon, after the usual away from an imaginary thing in the air Tried to warmth begins the nose is still cold, but as this be-escape whenever held, and shouted loudly and atcomes warm the hands become cold; general, after tempted to strike and kick when caught. If left alone midday nap, with heat in head, tension about flanks, they lay on the ground curled up, with legs drawn up pressure and heat in rectum, with swelling of hemor- on abdomen and chest bent forward, groaned incesrhoidal vessels, flatulence, prostration and ill humor, santly but did not speak nor answer. Whenever they towards evening, with sensitiveness to cold, then heat said anything it was with reluctance. In boys a in different paits, on backs of hands and on nape, but tendency to run away. Considerable strength, eight not on face, towards evening, without thirst, with or ten persons were required to hold a nationt when sensitiveness to cold, which causes sudden shudder the stomach pump was used. Two brothers of 50 ing, then heat of certain parts, with anxiety as if and 55 years wrestled with each other when alone in

paroxysms of heat and throbbing in head, then gen-extreme cases ball insensible to touch Conjunctive eral heat, of face, with redness that was < after clear or pale blush for the first twelve hours, became bloodshot afterwards and remained so for nearly Coldness of cheeks, with internal and external heat twenty-four hours. Sight could not be fixed on any of hands and swelling of teins Coldness in back object and lids were mostly kept closed. In almost after midday nap, with tension of abdoinen, passage all cases the lips, inside of mouth, and threat were of fattus up and down, C over back after midday dry. Tongue dry, with theek fur, causing difficulty in nap, with heat in head and eyes, frequent urging to iswallowing and hourseness. Stomach and bowels urmate and pressure in rectum, C over back after generally found loaded. Sour smell from mouth due eating, with pressure upon bladder. Cold hands in to undigested food in stomach. Vomiting took place morning, C limbs till midnight, with heat in face, of itself in one case only Tympanitis In one case, causing restless sleep. Chill alternating with heat, which died on the seventh day, symptoms of ententis, then profuse sweat. General shivering in morning, fever and constant discharge of muco-sanguineous with yawning, but without coldness or gooseflesh; stool, peculiar, hoarse, feeble and hesitating speech, shivering in open air, sudden S in evening, sudden though answers were rational and senses perfect, rapid shaking chill at 8,30 r x, then a sleepless night, with loss of flesh, no appetite, the day before death tetanic heat, fever lasted next day, with headache through spasms, mostly in legs Bowels in general costive, afternoon, in evening again fever lasting till 2 AM, and they took a long time to move, even with purgatives, in a few cases looseness of bowels followed after Heat, at night, preventing sleep, during restless they were once opened, and one man died of enteritis, sleep, also with sweat Internal, in morning In discharging blood and mucus. Answers in an under-head, in morning on waking, with pressure in fore-tone when recovering, answers shortly and quickly head, in morning, < forchead, with pressure in and suddenly appears to lose the string of thought, temporal region, towards evening, with confusion, looks in another direction and wanders away as if

# Digitalis.

A tincture is made of the leaves (of the second year) of Digita

General Action .- The chief interest centres in its drawing pain in it when sitting Sweat at night; every action on the circulation, which it seems to affect time on waking, S on waking, burning in face, with- through the vaso-motor centres. It slows the pulse, increasing arterial tension and causing contraction of arterioles Its action on the heart is remarkable in that it produces vigorous systolic contractions which become very irregular, one portion of the ventricle dilating while another remains in a state of contraction, finally the heart stops in systole Its actions on the urmary secretion is uncertain and variable, but it hours, then usually recovery with the return of mental is a valuable remedy (at least a palliative) in some

Allies - Apocynum c, Tabac, Hell., China, Ferr

Generalities.—Lay on back prostrated, scarcely able to move a limb, lay supine in morning, cold, pale and covered with profuse sweat Could not bear the upright Raving Out of her mind, dizzy and sleepy, at last position. Falling senseless. Tense white swelling of sleep, in which the eyes were more or less open, if whole body, with pain on touch, afterwards becoming disturbed she sprang up raving and uttered unintelli-soft and changing to anasarca Wasting of body in

proportion to recuperation of mind Convulsions. [Phos., Cocc., Apoc. c.), so that he must fix his eyes Epileptic attack. Crampe Stiffening of body, pam-upon some object, with inability to think, with dim ful S of trutk and limbs, < thighs Universal and vision, preventing descent of stairs partial trembling Symptoms of inflammation of Forehead -Sticking in 1; externally Sharp pain would lose consciousness, with heat and sweat Faint sion on turning eyes to one side; T in forepart ness; between attacks of nausea, and nausea on motion Heaviness.

numor sauness, and weeping about disappoint of head and incipient vertigo, in protuberance, as ments, and all objects appear as to one suck with fever Continual complaints Disanchination to talk, the same of th Inability to connect ideas Dulness, < evening, with syncope

Generalities.—Trembling, with faintness at stomach Heavy pain over r eye at 1 PM, extending to temple. Sharp pains in various parts at 4 P M ; darting from one part to another in evening; darting cramping pains in in 1. at noon. Digging in 1 at 10 AM. Sharp pain;

ment and conversing with persons not present, with lafter going to bed, in stomach, abdomen, arms and restlessness, palpitation, and at 1 a M an almost perk-lags. Occasional pains in bones Feeling in foremoon ing pulse, with palpitation and unesamesses, < lying as if he had taken a bad old, pains in bones, head, r on I sade, and pulsations in cars, < I Lattle sleep, temple and r lung, with chillness, in afternoon and drawn threstlessness of mind, little sleep, fasturbed by evening pain in occiput, the threat feels sero but is not dreams. Slumbering instead of falling asleep, comon swallowing, pain in r. lung, in back, hips and legs, plote consciousness without ability to sleep. Difficult < r side, sharp pain in I hand and fingers, chilliness, chilliness, in sleep. Frappert acating as from anxiety and as if it and chilliness, then sweat but no fever or thing, and were time to rise, F waking in fright, from dreams of sharp pain in heart Nervous, easily troubled. Great falling from a height or into water Restless and unre- desire for the open air at 5 PM Restlessness; at 4

on back, with emissions, and waking in semi-cone evening, < ascending stairs, with pain at head of on outs, with convenients, and waking in semi-role retempt, ascending sains, with part at least of secondaries, and he less only on the back, with merry thin ; with trenbling of hands and legs; with rest-dreams. Many dreams, not unpleasant, unpleasant lessness, but selic of pains on moving. Desire to lie of full of unwinceesful projects, auxious, confused D., idown and keep still. Faintness; at 3.A M. jadre going to bed, at night on waking, with numbress, the faintness < sitting up in bed, the numbness < lying down and > lying on back and pulling the hair in front of Fever -Sensitiveness to cold Chilliness; before the ears, at stool Aggravation on lying down stool, after counting, then heat and redness of skin, Amelioration in open air, and especially when morning then pain in lower limbs, calves and knees, then in open air (Puls, Magnes), of all pains in morning, frequent general warmth, but cold sweat on forchead, except the headache, by motion, of symptoms, except

> Mind.-Irritability, with dulness and desire to be alone, usually am fond of the society of ladies, but now they seem repulsive Conversation is troublesome Call things by the wiong names in evening, write r for l Stupidity; in afternoon

Head.—Aching in morning, in morning on wakness in back, in the room after eating, with burning ing, at 5 AM, with vertigo, in forenoon, < through temples, at night in bed, after dinner < occiput, with nausea, deep in centre Confusion during then of whole body, of one hand, with warinth of the stool. Dulness, with heaviness and occasional quick pain through it Fulness Tightness as if squeezed after breakfast Heaviness, at 8 PM, with pain between eves and on side of head near top of ears, at 9 PM, with feeling as if it would be crushed when it real H, with swollen venus and rand pulse, sudden rested on the hand Bad feeling til after dinner general H, then general weakness. Heat in head before the statement of the sta AM, with rumbling in abdomen, in evening, with vertex, with heaviness, in face, in back, then creeping coldness, with cold hands and shuddering through headache, when eating, with inclination to go to the right, sudden, in afternoon and evening, with heat of

Forehead -Intermittent cutting along r. side at 9 30 A M., shooting to ear, ' pressure and cold air head, with dryness and roughness Sweat, in morn-ing pain over 1 eye at 10 30 PM, > motion Boring ing on waking, at night in sleep, in palms, opposis, in morning, extending to occupit. Sharp pain in cold morning, over l eye, over eyes in morning; over r eye in morning; over r eye at 1 PW, extending to occiput, over r eve at 2 PM, over l eve at 10 80 PM Pain, in morning, in evening, and in I side of head. General Action -The most prominent effect of the at 9 rm, at might; at 11 rm, occasionally sharp, and Pain in every part of the body in vertex, extending into nose, with nausea and sympshooting and cramplike, these pains usually resemble toms of a cold and fluent coryza, at 8 p m, extending the neuralgus of the various preparations of Magnesia to occiput, as if he would lose consciousness, with inand Pulsat, they are generally relieved by motion in clination of head to fall backward, over eyes, over the open air Most useful in practice hitherto have eyes, sometimes one, sometimes the other, over r eye been the abdominal pains, here again comparison may in morning; over r. eye at 2 and 5 r.m; over l. eye at 7 PM , over r eye to occuput; between eyes and over Pain as if lifted up, and in temples r., < afternoon

Temples.—Darting in 1.; at 5 P M. Digging cutting imbs and various parts in morning Cramping pains in r.; l.; l at 6 A M; l. at 8.30 A.M., r. in morning;

in afternoon, in 1. in evening; at 10 P.M; in 1, with pin evening; in front of both, in front of r., in front nausea and chills beginning on back, < over l scapula; of r after going to bed. Pulling pain in front of both in sudden shocks in l. in evening; occasionally in r., as before comiting. Soreness internally in l. in afterin suddest anoces in 1. in evening, occasionally fatting in r., is occore vomiting. Soreness intertally in 1. in atter-in r. and over r. eye, in morning, occasionally datting inon, internally on touch at 8 r.m. liching in even-to 1 temple Twisting pain m r, 1. Granding pain ing, 1 internally; internally in lat 1 r.m., internally in 1. Squeezing pain at 5 an, with nauses, chills and at 10 30 r.m. Stopped feeling; suddenly at 8 r.m. dryness of mouth, but no thirst; S pain in r in morn- Buzzing in morning. Ringing at 4 P.M., < r to morning, tending to angle of jaw, sometimes sharp; sharp, in norming, mignigut at a sharp, in r. at 9 r m Pain; 1, < r, in morning; 1 r m Smarting inside nostrils, at 6 r m Soreness on 1 in morning, at 7 a. m, < 1; r. at 7 a. m, then 1, at 9 side, afterwards on top and r side and swelling of r A.M. in both, < stooping or walking; in forenoon, r side; soreness inside nostrils at 9 PM, inside at 7 PM, in forenoon, at noon, < r , r. at 5 PM, in evening, with dryness Dryness at 11 PM, with bad smell in it ri novening; after dinner, > pressure, in 1, > press. Triation in passages Riching in r nostril at 3 rw ure, which causes heat in 1 nostril, pressure after the Sneezing, violent, with vertige Stepinge, inclinain; in r, over a large surface externally, but con- but to, at 7 As. Watery discharge from 1 nostril, centrated to a point internally. Stupefying pain, at constantly at 9 p.m. Discharge of bright blood in temples

11 AM.; above and before ears at 5 P.M., as from a Smell as of bilious faces, in morning

band at 6 AM, with coldness of head

afternoon, and in shoulders

morning, with stiffness of lids, in morning, < r, < of jaw in morning on edge of upper lid, at 10 AM, with weakness so Mouth.—Teeth Jumping pain in 1 upper in morning Feeling in 1 at 7 PM as if dut were in it in afternoon, at 9 PM Feeling in forenoon as if a foreign hody were in them,

Tongue.—Coated in morning, brown in morning,

< r. Soreness, r; morning, < l, r in morning, < brown in morning and sore at tup, yellow, white, yellower lid; in morning, with agglutination of lids, l lowesh white Steking to root of mouth in morning at 830 AM, extending to I temple, afternoon, r in Bitton often in evening when neither talking nor chew-

Lachrymation from r, lachlymation in open air dryness in morning, with bitterness and societies. Sharp pain in r ball at 730 rm. Siye on r lower lid. Mouth in General—Soreness in morning, evening, Smarting at inner angles, cr. P ain over r lower line of roof, of roof in morning, or froof in evening. Yery canthus in evening Vision blurred

and to angle of jaw. Sharp pain behind 1, behind r uses; at 330 A, with interness and sorsess and sorse and to angle of jaw. Sharp pain behind 1, behind r uses; at 370 A, with interness and sorsess and in morning; in front and behind both in morning; longue, in forenon, with soreness, at 8 r m, with behind 1 at 7 r m, in 1 at 9 r m, over n at 9 m, in the strenges sharp and the property of the strenges sharp and the strenges and the strenges are strenges and the strenges are strenges and the strenges and the strenges and the strenges are strenges are strenges and the strenges are strenges and the strenges are strenges are strenges and the strenges are strenges are strenges and the strenges are strenge pain of front of both, extending to angles of jaws | Taste -Bitter; in morning, also mouth clummy (Puls.), Pain in l.; in l in afternoon, from blowing nose, r. in afternoon on waking; in evening. Rough, flat.

1 P.M. > during pressure Unpleasant feeling through morning, with spiting of blood, bright blood from 1 temples Sides —Pain in 1, pain in morning, 7 a.m., before dark clot and spitting of blood. Bad smell, at 7 pm and behind ears at 3 a.m., before and behind I ear at Simell as of bilious fever in morning, at 10 pm

Face -Sharp pain in I cheek or in lower part of Occiput—Sharp pain in 1 in afternoon, suddenly temple, then dry cough Laps sore at 9 P.M., 1 corner in 1 protuberance at 5 P.M., repressure Sharp twist- of lip sore Laps burn at 9 P.M. Spasmodic action of ing pain in 1 at 7 AM, rubbing Intermittent jaw in evening Spasmodic closure of jaws, with bit-cramping pain in r in evening. Pain, in morning, ing of tongue Jumping, darting pain at r angle of in 1 in morning, forenoon, cr, afternoon and even—jaw at 7 PM Grinding pain at 1 angle at 6 30 Am., in I in morning, someons, I, american and cream and the lower jaw, between teeth and angle, at 7 PM seated in I Pulling pain; at 7 AM , in I in morn-Digging at 1 angle at 5 PM Sharp pain in I angle of mg, in I causing a stupid sensation. Heavy year in 1000er jaw at 10 AM Pain in jaw near teeth in afterternoon, and in shoulders

Byes.—Redness in morning Smarting, r, in Diawing pain at angle of jaw Sore pain at 1 angle

that he could not read coarse print, in evening, after ing, in a r upper in afternoon, as from touching a going to bed, as if hot air came out of them and passed bare nerve. Sharp pain in upper incisors in morning, over face Sharp pain in r at 8 30 Am, in 1 at 2 Pm, in a r upper molar in afternoon Pain in incisors, > pressure, with necessity to close it Aching in 1 in lower, at 3 PM, upper at 6 PM, lower, with soreness; evening. Feeling as if sticks were in them, at 10 PM in 1 lower molars at 6 PM, extending to angle of jaw Feeling as if a large smooth substance were in them, and parotid Soreness of 1 Swelling of inside of guins at 8 PM Feeling as if dust or eyelashes were in of upper incisors. Soreness of gums and roof of mouth

evening, in evening, with smarting and with smart-ing. Biting stinging in tip at 4 PM. Soreness of tip, ing lachrymation of r so that it must be kept closed, when eating, soreness on I side at 7 AM; S in evenat 10 r M., in night Itching, in moining, evening, ing, r side in evening, l. side at 6 r M.; near last r at 2 PM Weakness in morning, at 120 PM, molar, by talking Burnt feeling in morning, on 9 PM, with soreness and smarting, 10 PM sides Dryness in morning, with stiffness, of sides,

of r; below outer angle of r at 11 PM Soreness of r smooth feeling Slimy in morning after eating, and hd; at 7 A M, but they do not look sore Lads teel sore Sticky, nasty in morning Burning, and in stiff. Desire to keep hds closed Itching of l inner fauces Burnt feeling in morning Claiming in morning onthus in evening Vision blurred ing Dryness in morning (Puls), with bitterness and Ears.—Balls of wax fall out of r. Darting behind roughness, eating, with bitterness; but full of I in evening, in morning, extending in front of ear sticky mucus, at 1 AM, with bitterness and sore-

rising Of food ten hours after eating

Throat.-Pain in 1 parotid, in parotids in afternoon. Sharp wringing pain in 1 parotid at 10 PM Soreness of parotids in evening, with pain extending to throat drium, in E at 7 PM; in E at 9 P.M., and in r. hypo-Congestion of tonsils Stinging in fauces, at 9 PM; sudden, in r tonsil at 230 PM Smarting of fauces, inspiration and < behind sternum; in evening, when posteriorly, and dryness Pain at 11 AM and in r eating light food after fasting nearly twenty-four ear, below r tonsil at 11 AM extending to ear, in hours, > while eating, in E on going to bed, extendback and r side of throat, causing choking Pulling ing into abdomen; in E at night and in hypochonhousemens, it seems sore in morning but is not, in Polling pain at 3 PM Deferes, in morning, and in afternou and evening, posterior fauces, of fauces, with liver, in morning, and with burning, at 7 AM, with smarting, and appearance as it the skin had peeled off; locations and appearance as it the skin had peeled off; locations and appearance as it is a superior fauces, with dryness and difficult swal-little, > empty oractations; had to unfasten the clothes;

with roughness and frequent inclination to swallow the room to get the breath Burning of tauces, 1 tonsil and 1 side of throat, 1 tonsil, then itching morning, but it causes nausca

in morning, with sharp spasmodic pain in umbilical stirred-up feeling in abdomen

quent suking, cramping, in epigastrum and upper abdomen.—Rumbling (Puls, Mag); in evening, abdomen, standing erect or by pressure, almost pre-with emission of much fatus; with urging to stool to tenting a lalking and breathing. Gramping pain in pit, Emission of much fatus, offenses (Sulph); of coppery then condutions of wind, then become and emissions of older, frequent E, with rumbling in 1 side, frequent still, in epigastrium at 10 30 PM. > motion, and in Incarcerated flatus •Grinding pain at 7 PM, with bad smell in nose

Pain; in region, epigastrium; in morning, and in Sweetsh, in morning on waking. Bloody. Sicken-Pain; in region, epigastrium; in morning, and in ing, with whitish cout on tongue Bad in morning on abdomen; in morning in epigastrium and I. hypochondrium, in E in morning, with soreness; in E. before breakfast, in E at 9 AM., in E in afternoon, with fulness; in E. at 6 P.M., and in l. hypochonchondrum, in E at 10 rm, and at lungs, < deep pain in I tonal in evening Soreness in morning, with dria; on touch; in E, > evictations of sour bitter wind at times cutting, < stooping, < sitting down after Dryness, of fauces, of posterior fauces at 8 30 PM; riding or walking, at times necessity to walk around

Heaviness in morning, as of undigested food: II. Tickling low down at 630 A.M., in epigastrium. Fulness in evening, and in abdocausing deep cough Irritation in morning; of 1 side, men, with pain, in E Bad feeling, in morning; in in morning, extending to ear and down pharvnx, caus-engastrium, as from undigested food, at 1 PM, with ing cough, in fauces in evening, in fauces in evening, rawness Sourness, in evening, with burning, in with inclination to cough, at 10 PM, with inclination evening, at times extending to roof of mouth, with to cough, < evening. Constant desire to swallow in burning; after eating, with burning. Burning; in orning, but it causes nausca cpigastrium; waking at 2 AM, in morning, in epistomach.—Appetite increased, at 7 AM, lost for gastrium in morning and in 1 hypochondrium, and breakfast Empty eructations, at 7 PM, with sensa- across dorsal region; at 7 AM, 2 PM, 5 PM, with tion as if temples were in a vise; but the wind is smarting and soreness, in evening, with smarting; in stopped by dryness of throat, sour, in evening, with evening, with smarting in throat, in evening, extend-butterness, < on sates and back of tongue, bitter; ing over chest; sour, at 8 A M, sour, at 3 P.M. Un-bitter, with shuddering, sour, bitter, with shuddering, easiness, in epigastrium in morning on waking bitter sour in evening, also with pain in epigastrium. Ineffectual inclination to cruciate in evening. and I hypochondrium, acrid, at 5 r m. Eructations ness, in morning; in morning, with soreness; in epiof sour water Eructations tasting of rotten eggs gastrium in evening; in night; in epigastrium, par-Eructations tasting like bile Hiccough; after a light tally > cructations Faint pain in epigastrium in supper, with emission of flatus, and shuddering morning, extending to umbilicus, > standing, < Nausea; in morning after cating; in morning, on stooping Weakness in epigastrium at 6 PM, > supswallowing, with shuddering, in morning, with chills, per, with desire to sit down, sinking in abdomen and

in morning, with senart spasmoute pain in unrighted the search of the regions, with rumbling on pressure, with disgust for food, with rumbling on reading part of stomach Cutting tearing in epigastrum and region of gall. Neurslay of the stomach most severe, pan even along sternam bladder, at times spasmodic. Cutting and in region of gall-bladder, in epigastrum, in morning, frequently and times and times. Addragen. — Rumbling (Puls. Max.): In evening,

flatus; ( pain across epigastrium at noon, holding me E, with pain, < hypogastrium and desire for stool Griping (Colo, Puls, Sul.); in abdomen and legs, cutting, in epigastrium occasion-morning Cutting all through; C in morning; in evenally in forenoon, < afternoon, with faintness extending, < walking Tousting in all parts, < lower, constantly ing nearly to umbilious, as before diarrhoea Sharp changing at 3 30 AM. > a soft vellow stool Grinding pain in epiqueteum, at 2 30 AM, extending to 1 hypo- at 7 AM, with desire for stool Sharp pain in afterchondrum, in stomach at 7 AM; in E at 7 AM, < noon Griping drawing pain on sitting down, with by stooping, standing erect, at 7 AM. in E and pain in legs, the colic > lying down and by pressure 1 hypochondrium, > eructations, which leave sore | Pain, in morning on waking, > rubbing, with desire is si, in E at 9 AV, causing bending over; r. side of for stool, in forenoon; on going to bed; on lying E at 10 Au, stomach at 3 PM, E. at 6 PM, > down, > rising and walking, renewed on lying down, sitting erect, in E and 1 hypochondrum in evening; with pain in r. leg and urging to stool; in evening, in E in evening, extending to 1 nipple; in E, > eat-with emission of much fatus, with frequent cutting in any Sharp, sore pain in epigastrium Frequent stomach and small intestence; frequent, at 9 A.M.; intersharp. prickly pain Twisting pain in epigastrium mittent, at 6 P.M.; paroxysmal; spasmodic, with Grinding pain at 7 P M., with bad smell in nose burning in the intermissions and with soreness. Pressure from front and sides. Distress; in morning, gion at 9 pm; sore D in 1 inguinal region at 9 pm with full feeling; with desire for stool, with deepyellow diarrhoca, heavy in morning Heaviness in the fore diarrhoca. Stured-up feeling fore diarrhoca, > emissions of flatus Cutting in Soreness in morning, with weakness; S, < walking; morning; across in evening, in l. inguinal region in S. on pressure, with eructations Burning Unpleasant evening Sharp pain at 4 A.M., > emission of flatus, feeling at 4 P M. Guryling sensation Constant desire then urring to stool: in I. incumal region in evening. to pass flatus. Faintness, at noon, with hollow feel- in I inguinal region, extending down leg Frequent ing, without hunger, > dinner, with pain around wringing pain in I inguinal region at 1 PM Wringnavel.

in 1, with stabbing, then aching in 1 temple ('ramp-guinal region in morning Heavy pain in 1 inguinal mg pain in 1. part of 1 and r side of r; in 1 at 3 PM, region, with soreness Soreness at 7 AM, in 1 ingui-1, then in epigastrum Twisting-sinking pain in regron of gall-badder in norming Digging in 1 at 5 sout. Ying down at night, the pans are generally walking for a Pain, m. 1, in region of gall-bladder at 7 A w to the standard and the pans are generally cutting (Serb), in L. in morning, in 1 at 1 v v 1, at 8 N v v 1 at 9 r v, when lying on 1 aide, 1 at 10 30 r v, v to the standard in the shortest of the badding into cleast area, with the shortest of the passage of gall-stones, pain shorting into cleast area, with control area, with the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control area, which is a short of the shortest control a motion, at night, 1 on lying down, < lying on r pains shoot up into kidneys and side, 1, with faintness of stomach, chills in back, cold, clammy sweat, etc. (Berb.). pain in r temple, sharp pain in middle of l. tibia. empty acrid eructations and shuddering Lame pain in I in morning, < motion Sorcness of I in morning. Distress in l. at 6 A M

Liver -Stabbing in evening. Darting through liver through to back Heavy granding in region, < evening Squezing pain at 8 30 AM Twisting pain in region at 230 PM Painless twisting sensation at 10 PM Pain, in morning; in morning, < inhalation; > exhalation, in forenoon; at 5 PM, at night in hed, < by lying on r side; with chilliness Heavy distress in r lobe, in region of gall-bladder when lying on r aide

Umbilical Region -Bloated and sore on pressure Griping; at 8.30 AM; at 9 AM, below umbilious after umbilious suppor Cutting, waking at night, frequent, < walking Cramping pain above umbilicus at 3 pm Sharp pain; at 5 A w , at 7 A w , and in lower abdomen, with causes a faint chilly sensation, between epigastrium drium in morning, and in hypogastrium, waking at Bearing-down, prolapsed feeling 5 A.M., with urging to stool, profuse, thin, gellow stool, and relieving the pain, another thin deep yellow stool reluctions the pain, another thin deep yellow stool reluctions to the pain, and the pain, then fauthores of stounch, not certain the pain and the pain ing, < doubling up, > pressure and motion, with distress frequent cutting through all small intestines Pain as if a

ing twisting pain in morning Pain at 3 A.M., > uri-Hypochondria — Pricking in 1 at 7 pm Darting nating, P. in morning, in l inguinal region, 1 then in 1 at 11 pm Cutting at 8 Am Sharp pain in l, r inguinal region, in inguinal regions in evening, 1 at angle of ribs, in morning preventing walking or inguinal region and glands in evening, with soreness, deep inspiration; in hypochondria in morning, with inguinal region, in evening, with chills, inguinal reurging to stool; in region of gall-bladder at 11 A.M., quons, extending to testicles, r. groin, extending down in region of gall-bladder in evening, in 1 at 7 PM; inside of leg, making me lame Pulling pain in 1. inin I in evening, frequent cramping pain Twisting and region in morning, extending down spermatic cord, pain in 1 at 8 A M, in 1 in evening, in region of gall- with nausea, 1 groin in night, with pain Faintness bladder at 2 P M, wringing, in 1 Wringing pain in at noon

Clinical. -- Most violent flatulent colic, generally > walking

Rectum .- Darting Sudden pricking at 5 PM Occasional pulling twisting pain. Pain in morning, afternoon, evening Itching, in evening, of I side Urging to stool, during breakfast and dinner, with faint burning pain in rectum, with cutting extending Cutting, in r lobe Sharp pain in morning, extend-from umbilical region to rectum, with shuddering during to nipple, S pain at noon, frequent, in afternoon; ing stool and chill after stool, and small bilious stools and pain in abdomen during stool Sudden urging, with small stools and much flatulence, S at midnight when urmating, and loose stool driving out of bed in morning, driving out of bed, stool loose, in twenty minutes ineffectual straining, then in half an hour a soft dark stool Constant desire. Frequent desire, beginning with pain in upper part of sacrum, extending to rectum, then to region of bladder, causing a sick, faint sensation, then pain in rectum and distress at Ineffectual desire

Anns .- Hæmorrhouls like red cherries protrude after stool, with pain in anus, afterwards one is dark livid blue (Sulph ); If partially prolapsed, H sore, sore inclination to stoop, the pain > standing erect, which at 2 PM, and itching, sore in evening, preventing sitting still Oozing of moisture, in evening and umbilical region, > standing erect Pain; in Involuntary discharge of mucus Sharp pain from morning, at 1 of umbilious and below r hypochon- the hemorrhoid to region of liver at 5 r w Pain

Stool.-Diarihora, with pain in epigastrium and finger-tip were pressed upward and backward on cutting in rectum, frequent. Loose, with straining umbilicus Faint pain at 830 AW, extending to and protrusion of hamorrhoid, L. and offensive epigastrium Distress, with deare for stool, distress, Soft, with pain S, very yellow, then a weak, faint and in hypogastric regions, with intermittent cutting feeling. Watery, with shuddering Last part thin, in a stomach and small intersines (Colo, Gamb) Un- and hour a small soft stool, with urging transiently > stool. Slimy; and light-colored; and light-colored, Hypogastrium.—Swelling of 1 inguinal glands, with loose, frequent, and almost white; white, like the white soreness and pain. Intermittent shooting down into of an egg, but lumpy, with straining and burning in iliac region, < r. Drawing darting in I. inguinal re- rectum and sensation as if faces were hot; and darks offensive; with straining in rectum, each stool smaller part and in scapula, extending down inside of arm, than the preceding

with pair in heaver-rhoids Slightly costive, dark, at 7 A M; through lung above inpine, below and up billous First part dry and black, the last part mushy | 0 of mpple, suddenly at back near centre at 7 RM and white First part lumpy, then diarrhea Almost Sharp pulsating pain at top of steraum. White Dark, and frequent, small, offensive Offensive; and billous Forvible at 4 A M, then straining, steraum at 8 P M; in middle of steraum at 9 P M, in at 6 30 A M, then straining and pain in hemorrhoid lungs Pain in r lung, in morning, then in 1; at 8 Fmall; with straining and shuddering Large and (3 A M; at 5 P M, through r at 6 P M; through top difficult At an unusual time Driving out of bed at 9 PM; in centre in the morning; in centre in even-at 2 AM Delayed Frequent, with straining and ing; back central part at 10 PM; above nipple at 8 burning in rectum and with one stool shuddering, P.M ; below nipple at 8 PM, with feeling as if it and each smaller than the preceding one but more would arrest the breath, not < deep inspiration, but slimy, with less pain before the stool but more pain causing inclination to cough, through lung below after the stool

Sexual Organs .- Relaxation and coldness (Agnus c. Carbon) in evening Coldness and almost msensibility Inaction Pain in penis and I testicle in afternoon No erections for many days Shong-weell- back lower part in morning, parallel with and at side ing sweat on scrotum and pubes (Sil, Thuja) Scrotum cold and moist, penis cold Cramping pain in 1 spermatic cord in morning, extending to testicles ment, with frequent ejections Desire diminished, in evening Emission in sleep (Dig )

the pterus

m throat; violent, at 8 AM, from tickling deep in around navel throat, can but just breathe, cannot walk, frothy expecat 9 PM from tickling in throat

Chest.—Darting below 1 nipple at 10 30 A M , arrest- ing the chest and waking suddenly ing motion, but > motion, D in lower part of l lung at 7 PM, in lower part of r. lung, from back to lung at 7 Pm, in lower part of r. lung, from back to Mape and Meck.—Sharp twisting pain at 3 30 Am front, twisting, beneath axilla at 8 Pm, extending to in 1, then r. side Pain in morning, evening, pain arresting breathing. Cutting in I lung. Cramping pain in morning, < 1 side, P pain in vertebras at pain in r lung below nipple, at 6 P.M., arresting motion 1 P.M. and respiration, twisting, below I axilla at 9 p M.

inspiration, through 1, above nipple and towards Cutting in 1 scapula. Sharp pain at lower part of 1 sternum, at 9 P M., arresting respiration; deep below I scapula at 1 P M., at 3 P M., extending through lung, axilla in morning, arresting breathing Sharp pain in deep, in morning, then through middle of r lung r lung at 9 Am; 10 Am, 5 rm, evening, at Pain in 1. scapplis and through lung, at 7 Am, at night, lower part also at 9 Am, posteror part in 5 rm, through r. scapplis and lung Drawing pain morning, in centre, in centre at 10 Am, through between scapplis External sorness over r. scapcentre in norming, through centre at 4 P m, in centre ula at 9 P m. Sharp pain in dorsal region. Pain in at 9 P m, at side of mpple, below imple in morning; dorsal region. Lamencess of dorsal region at 6 a m, below imple at 7 n m and in 1 lung below axilla, be- in morning, n motion. Sudden sharp pain in I side low and to right of mpple at 4 n m, opposite or at at tenth rib, in afternion side of mpple, pressure, in region of imple, hin- Lambar Region.—Darting in r Cutting on bend-

in centre in morning, in region of nipple; outside Dry and lumpy, and black, then prolapsus of anus, and parallel with mpple; through L lung near nipple with pain in hiemorrhoids Slightly costive, dark, at 7 A M.; through lung above nipple, below and to

nipple at 9 PM as if it would arrest the breath, Clinical. - Diarrhora, with violent twisting cohe, paroxysmal but by > deep inspiration Pain in l. lung in Clinical.—Districts, with violent twaiting only partial many through top at 4 mm. In pure part in character, shock most frequent in the norming, generally informing, through top at 4 mm, in pure part yellow, this, followed by exhaustion (Colo, Gambage)

[8xxa] Organ.—Relactions and colines (Army c. 1) upper posterior part at norm, back part, morning, back part at 5 rm; back part near lower part of scapula at 2 rm, in centre posteriorly at 930 rm, of nipple; above nipple in morning; frequent pain through 1 lung at 9 P.M

Flying pain in chest and back (cervical part). Excite Drawing pain in r lung at 7 A M Sore pain in centre of r lung, S pain in upper part of both lungs in evening and in back part of l Burning pain behind Clinical.—Seminal emusions from sexual atony. Uterine top of sternum at 7 AM Dragging below 1 axilla at 2 colic (dysmenorrhos), pains shooting in different directions from | P M Distress in 1 lung near heart at moon , D across the nerse 

Respiratory Organs — Construction of glotts Irri- > deep inspiration Tightness across upper part causing difficult breathing, for the standing of the standing of

Heart .- Sticking, in evening Darting at 4 PM, toration seems to come from the head, during the arresting breath Catching pain in evening Sharp cough pain at the lower end of the sternum so that he pain; and to left of it, at 7 Pu, with faint feeling in can hardly move, then pain in front of r. then in both it, arresting motion in morning and in torenoon; frecars, as if the head would burst Inclination to cough quent, in morning Pain in morning, with faint feelin morning, at 2 PM from irritation deep in throat, ing Faint distressing sensation. The beating can be heard after walking a little Hard, slow beating, shak-

Pulse.-Pulse 80

nipple and about ninth rib and deep into lung, almost extending to occiput and shoulders, < 1 Pulling

Back .- Pain : at noon, and in middle of r lung Sharp pain below 1 nipple at 6 PM, in 1 chest in Lumeness (Berl), in morning Weakness of spine, evening, in middle of 1 eighth rib, hindering deep with soreness Tearing through scapula and lung

dering breathing Sharp pain in I lung in evening, ing spine. Cramping pain at 5 p.m.; C pain in r. in lower part at 7 A m., lower part at 9 p.m.; in back sacral region. Sharp pain in r. in morning; S. pain

in muscles in morning; in 1. at 9 a m , < stooping, | Forearm—Sharp pain in middle of 1 radius Grind-hindering motion, in r. at 3 m m; in evening, in ing pain in middle of 1 Pain in r below 1 elbow, morning, extending to testicles, in r in afternoor, in middle, in hones; in middle of 1 ulna, in middle no bending sine; < bending spine; < walking or tent, in middle or in evening Drawing pain, and stooping; < stooping, and in hips Heavy pain, < in wrists stooping, Fulling pain in 1 at 10 30 pm, > motion Wrist—Sharp pain in r. in evening Sprained extending to legs Lameness, in morning, in morn- at 9 p w oxtending to legs | Lameness , in morning , in morn and Fig. | Hand — Sharp pain in r. Darting sprained pain in fig. < r self with pain; st 1 rm, 2 rm, with pain, | Hand — Sharp pain in r. Darting sprained pain in 6 rm, 9 rm, with stiffness; 9 30 rm, 10 rm, - r in evening Cramping pain in r at 3 rm Grindstopping; 11 rm, with pain in 1 inguinal region, < r ing pain in r at 9 rm, Pain, m r, L; in bones in bones in

with stiffness, A in hands and feet, in elbows and little finger knees, in r elbow, then in r. knee, in morning, in r in l elbow at 1 P w, alternating with pains in knees at 10 A M Staffness of hands and feet

sore pain in r Pain in 1, with soreness, in r, ex-thumb in evening, 1 index in evening tending down arm, < walking, with soreness

Shoulder -Sharp pain in r , 1 joint, trequent, in r, on top of 1 m morning. Sharp jerking pain in 1 back sides of legs at 1 PM, < above knees and head, < at attachment of sterno-cleudo-mastoideus as if gluteals were too short, < walking, rest top of r. at 4 PM

assing into forearm Pw. Sharp pain in middle of I humerus Pam m'space at 4 PM, above r knee m evening аt 3 Рм.

Elbow -Sharp pain in r , in l in morning, in r in of l. in morning, with stiffness.

morning, extending to testactes, in r in auternoon, in intuities, in bones; in matter or i units, in morning pulling me over backward and to the right, and in 1, of 1, between units and radius; in morning; middle pulling me over backward and to the left. Sharp of bones in morning; under side of La 230 and 5 drawing pain in 1 at 7 a.m., at 7 r.m. Pan; r., in an, bones of 1 at 10 a.m., in middle of r at 10 a.m., region of liver in morning, in r in merning, with | at 2 30 r m, r at 3 r m.; bones of 1 in evening, 1 at 2 a.m., at 7 r.m. In a t 5 r m., it at 10 r m., middle of 1 ulna at 10 r m, in ulnar side of in evening, in evening, with lameness, in upper part lower third of 1, extending to little finger; intermit-

Lame pain, hindering motion, L pain in afternoon, pain in l Pain in l, at 9 AM and lameness, in r

by stooping or pulling (holding a horse), in region of morning, < 1, in night; frequent, between third and liver in morning, so that turning in bed was almost fourth metacarpal bones of 1 in afternoon Drawing ingossible, walking Soreness in norming Weak, pain, in 1 in morning, a barty, in 1 in morning, ness, standing and walking.

Weakness in morning, 1 rv, r, r nevening Weakness in morning, 1 rv, r, r nevening Extremitees.—Nails of fingers and toos britle Numberes of 1 at 7, a M with pricking in index, N Aching in wrists, hands, fingers, ankles, feet and toes, at 7 PM, . 1, of 1 hand and forearm as if asleep, <

Fingers -Sepsation of a briar in middle, I then r. knee, r ankle and 1 elbow, in morning, in l aim, l with throbbing pain, darting stinging next to the bones, leg and l. foot, in hands, fingers, ankles, feet and and tenderness on piessure Cutting tearing Cutting toes, > exercise, with stiffness of them Frequent in rindex Sharp pain in little, l thumb; r thumb, pains in joints, in morning, at 6 PM, in knees and r thumb at 7 PM, in bones of one, then of another in elbows, in evening, in elbows and knees Lame pain atternoon Grinding pain in first joint of r thumb Twisting pain in first joint of r thumb in morning Pain; in a spot on back of l thumb, between Upper Extremities.—Axilla Sticking in 1 at 9 first and second joint, in first joint of l. thumb, first PM. Sharp twisting pain below 1 at 1030 PM, > joint of r thumb in morning, r thumb at 5 PM, 1 motion Sharp pulling pain below 1 at 4 PM Sharp little, at 6 PM, first joint of r thumb at 8 PM, 1 Numbness of r in morning, with tingling

Lower Extremities .- Occasional cramping pains in Pan m l; in r, in top of l; in morning, < l, on in whole length of r leg, < buttock and heel Diffitop of 1 in afternoon, on top of 1 at 1 PM, in 1 at culty in getting out of a chair at 2 PM and in walk-7 PM, > motion, with lameness, in top of 1 at 7 ing Tearing in r hip, hindering walking Sharp PM, extending into neck, in Lat 11 PM. Frequent pain in r hip-joint. Pain in r hip, in morning, in pain on top of 1; F pain in 1 in forenoon, occasional 1 hip in evening, in r hip in evening, extending down pain in joints in forenoon. Pulling pain in r , through front of thigh nearly to knee, causing imping , in 1 shoulders in morning; on top of I, extending to neck hip, heel and sole in morning Lameness of r hip

Thigh -('ramping pain midway between hip and muscle, sharp, in r. at 7 a.m., extending to back part Thigh—Cramping pain midway between hip and of lung; frequent, in l. and in neck Weight on knee, I then r., C pain posteriorly in r as if muscles were too short, < walking Pain like an electric shock Arm -Pain in 1 at 3 v.m.; P in l. arm and elbow, from 1 to vertex when lying in afternoon after dinner Numbress, and of hands Pain in r ; in l in morning; above l knee in morning . Weakness, < elbows. Cutting in 1 above clbow at 5 in r femur above knee at 7 AM, above r popliteal middle of 1. humerus in evening, in r upper arm pain on inner and back side, D pain above r popliteal space at 10 r m

Knee -Tearing in 1; r at 1 PM Cramping pain; Elbow—Sharp pain in r, in 1 in morning, in r in ... Knee—learing in i; r at 1 r M. Cramping pain; forenoon, in r at 7 r M. Sharp cramping pain in r in morning, alo back side in morning, alo actending at 7 a.M. Grinding pain in morning, in at 8 a.M., idown back of r leg, in 1 at 10 a.M., r at 11 a.M., at 9 in M., is as if out of by ascending stars; r at 3 r M., in posterior side of l. joint Pain; in morning; 1 in morning, 6 a.M., r at 11 r M. Sharp pain, in morning, on made of at 1 r M. r at 4 r M., at 4 r M. at 30 r M. r at 4 if 2 r M. forenoon, in outside of l. in afternoon, 1. might Drawing pain in 1 at 9 r M., D pain in blows, pophteal space at 1 r M., in front of 1 at 5 r M., r in writes and fingers, at times very sharp in fingers, evening; on inside of r in evening, in might, on inside of r in evening, in might, on inside of r in evening in might, on might of r at beautiful start of the from I. down ulna towards wrist, at 7 AM. Lameness inside of r at head of tibia; r popliteal space, hindering walking. Twisting pain in 1 at 10 PM Grind-e

ing pain in r, on inside of 1 at 8 PM.; at 9 PM.; at | Foot.—Cutting in soles and bottom of toes. Darting stairs; at head of r tibia in morning, on inside of Drawing pain ing stars; at head of I fubla at 9 Am, in r in foremon, at moon, in afternoon; in r at 6 PM, when in a stars, cr; Toes—Stucking on under side of r great at 10 P.M.; noon, at moon, in afternoon; in r at 6 PM, when in a stars, cr; Toes—Stucking on under side of r great at 10 P.M.; a conding stars, cr; Toes—Stucking on under side of r great at 10 P.M.; a corn on 1 second in overning; biting, in same at hindering walking, in l at 9 AM, extending up thigh, in I r, title, p. Pressure, S pain in a corn on 1 second. in I, extending into toes; S (Grinding pain in r. metatassal joint at 4 P.M.; then on when rubbing, but appearing in feet and returning in 1 for the stars of the property of the stars of the st front, at 7 AM Pain in 1 as if out of joint, > mo- P, with soreness tion Brussed pain at 10 30 AM Drawing pain, in Clinical. Sciatics, pain shooting the whole length of the r in morning, r poplitcal space at 6 P.M., in r at 9 extremity, in the r side, slying perfectly still (Bry.). PM Soreness at 1 PM, < walking Sore pain in r popsoreness, in evening, of l. in evening Weakness, in morning. 1 in morning. in afternoon: evening: at 9 with trembling

Leg -Cramping pain at head of I fibula at 9 A M. walking, in evening, C pain posteriorly in r leg in ing, then in r tibia, then in r hand Grinding pain in upper part of r tibia at 9 PM Pain, in middle of below knee, on both sides below r knee on waking Pain in bones at 130 Am, P below I knee at 3 A.M, posteriorly near r knee at 11 AM, in upper part of 1. fibula at 1 PM, in middle of r tibis at 4 45 PM when afternoon, at 5 PM, with a book in his hand knee, frequent P in I tendo-achilis Dawing pain in upper part of I thus at 2 r m, at head of r Fewr — Calliness, in forence, in the calves, in upper part of 1 thus at 2 r m, at head of r Fewr — Calliness, in forence i forence, in the calliness, in forence in forence in the calliness in the calliness in forence in the calliness i pain in upper part of 1 uois at 2 m, as need of the fibula at night Lameness of r at 3 M. Sore lame going to bed, at 1 30 Am, with hitter mouth; over 1 teeling below r knee and in front at 6 45 rm Weak gasqula, on back, beginning over 1 sepaplus. Shudness, of r in morning, with numbness, on rising, beginning the dering. Hot head at 7 Am. Burning in 1 lumbar feet at 7 PM

Ankle -Stinging on outside of 1 at 5 PM Sharp pain in l . on inside Pain, < r; r in morning, in morning, with lameness; in afternoon; in r at 2 PM, with lameness; in evening; in 1 in evening when sitting; in 1, with lameness; in 1, with inability to sit still. Drawing pain Weakness of l

lower part of 1 patella at 10 pm Para, 1; r, on ing pan mr. hele at 2 a x, darting to the body, leav-nastic; at head of r tiba, m 1 politeal space, then ing pan m r. hee at 2 a x, darting to the body, leav-nary m r. hee, then m r pophiteal space, c, mner and; sudden sharp pan m outside of r. foot at 10 zm, then posterior side of r . in morning . in morning on ascend- in leg up to knee. Pain; < r., running into soles.

knees on ceasing to rub, the pain > motion, which is little Pain in I great; at base of r second, > motion difficult on account of a dry, grating sensation, alter but returning; in corns on both second, with sore-nately in each, beginning at back and extending to ness, in corn on L second in evening, in same corn

8km .- Sudden stinging in various parts in evening. hteal space, S pain on inside of 1 in afternoon. Creeping, tingling through thighs and legs, > rubbing. intext space, S paint of master of the state of the space, and the space of the space, and the space of the s lower part of 1, over r and between scapulæ, day and evening, over l at 11 A M, then over r, over l. at 3 P M. PM. 1, in evening when walking, in evening from evening, over r at 4 PM, in evening, < r, over and between standing a short time; < descending stairs, with pain S in evening, over lower part every evening, between at head of tibia, r, walking; > continued walking, r S and spine in evening, beginning over r. and extending over body, < arms Itching of I side of chest; of wrists, r palm, r hip, 1 thigh and 1 hand, hips and r thigh at 5 PM, over hips in morning, exkees Sharp pam in r, in 1 at 9 x x, hindering | cundressing or getting child; 10 oct at 6 45 m r, ribills at the state of r fibula at might, in 1 tibia near ankle, causing limp- on front of ankles when walking, on front of r ankle when walking, extending over joint, sudden itching in upper part of r tions at 9 m rain, in inidile of over r scapula. Biting itching over r scapula at 9 30 r tibia, at middle of 1 fibula, below r knee, < on | m Stinging itching over and between scapula at 9 back side. Pain in morphism is tanderability of pm. Stinging itching over and between scapula at 9 30 r m. back side Pain in morning in r tendo-achillis, in r M, S itching below l knee, suddenly over r hip r calf, at head of r tibia, below r knee, in bones in evening Burning itching over r scapula at noon; over scapulæ in evening, < r , on outside of l leg near ankle

Sleep.-Disposition to vawn and stretch. Sleep in fibula at 1P4, in minute of the man extended to I falling saleep, with pain in joints and bones. Sleep-side of knee, at edge of patella, causing lameness, then lessness, with restlessness Restlessness from midthe pain moved to lower part of fibula; in I fibula in might till morning, restless might, woke at midnight to the pain might till morning and pain in add (south). side of knee, at orige or paccins, causing fanceness, with restinguished to the part moved to lower part of fibula; in 1 fibula an evening, at middle of 1 fibula in evening, in bones with pain in 1 lobe of liver and pain in 1 side (eighth when walking at 10 30 r ×, > louch, with soreness, ril), brussed feeling in the whole of spiral cord, the pain when walking at 10 30 r ×, > louch, with soreness, ril), brussed feeling in the whole of spiral cord, the pain when walking at 10 30 r ×, > louch, with soreness, rill is given by the pain the whole of spiral cord, the pain when walking at 10 30 r ×, > louch, with soreness, rill red and in hver continued next day with pain. whell making a true detains feet; at head of r tibla, ex-in I lumbar region Sleep, with confused conscious-tending into knee, at head of I, fibula, extending into loss of the conversation around him. Confused sleep,

Fever .- Chilliness, in forenoon; evening; after scapula, on back, beginning over I seapula sources, of dering, tot head at 7 Am Burning in lumber walking Heavness Numbness and heaviness of region at 5 r.m., on top of l shoulder evening; it seapula over eacube in evening, with tiching; over leaching to the complete of the seapula on back, beginning over I seapula dering. He was the seapula of the seapula on back, beginning over I seapula dering the seapula of the seapula Burning in l. lumbar over scapulæ in evening, with itching; over l. scapula at 9 PM, with itching Hot and dry skin Sweat during sleep; S. on forehead at 8 AM.

### Dirca Palustris.

A tracture is made of the fresh inner bark of the twice of Dires. palustris, L.

one position Uneasiness and sensation as if some- of stool, stool dark and thin, coming but little at a thing unpleasant were to happen Full sensation time, relieving the pain, which soon returned, to be through the body, with sluggishness. Weakness, at followed by another stool, after passing all that was 1.45 P.M., with desire to lie down, towards evening, possible, had the cramping pain every few minutes, at 9 P.M.; so that walking was difficult. Necessity to in afternoon; at 9 P.M. on walking and on pressure; at lie down at noon, feeling as if my senses were leaving 10 rm, with desire for stool; partly > diarrhoa me Aggravation every four days, later every two days | Discomfort; in evening, with burning like "stomach-Time passed too slowly Expecting bad news con-stantly in the daytime, worried and annoyed by every-as before stool, but no satisfactory stool. Soreness of thing. Dulness, of mental powers and mertia, with muscles Lancinating pain in I hypochondrium with indisposition to talk Inability to think or study, tympanitis, the pain spreading over abdomen Gripdull and bewildered condition. Difficulty in thinking ing about umbilicus, below U. at 1 PM, with aching of what word to use in writing Absent-minded, often Biting above U, < 10 P.M. Pain above U. at 9 P.M. writing the wrong words.

flows and offices of sufficiency and the control of drawn forward towards frontal sinuses Pain in fore-sage of mucus; but only scanty passage of frothy head and temples in afternoon Congestive pain in mucus, ineffectual desire Violent purging, with forchead, with darting inward from each temple tenesmus Frequent and profuse diarrhea. Diar-Sonsation as if brows were corrugated and as it brain rhors, with flatus. Watery stool in evening, with were drawn downward Congestion to forehead in tenesmus, only partially > by stool, W, partially morning, with pressure Dulness in forehead at 9 30 relieving the colic, W, yellowish, and gushing, and AM Sticking in r temple, < motion Darting pain bubbling, with flatus, preceded by rumbling, and in r temple before noon Sharp pain in temples, < mucous towards evening, with pain in abdomen, l, extending inward. Pain in temples; at 3 pm, ex- and frequent Passage of freed mucus before rising, tending inward, > hard pressure, at 7 PM, extending with flatus Stool at first consistent, then thin, farcal, towards centre, in I towards evening, extending slimy, with flatus Constipation after catamenia, C. towards centre Pan in vertex after dinner, "news and no desire tor stool Stool small and insufficient, ure, pain in vertex and occuput and all through head, three times a day, and pasty, and stoky, and dry, extending into spine Throbbing pain in I halt of stocky, with apparently no power to expel it Stool head, < coughing or moving, could not have any scanty and soft Stool, with colic and griping thing touch occuput, felt better with the hair down or Urinary and Sexual Organs.—Pain in region of blad-high up on head Intermittent pain high up in occu-der, with soreness Urine diminished and highput, in afternoon, extending inward Pain low down colored, diminished and with white, sometimes redin occuput in morning on waking, < raising up or dish sediment. Uterus feels as if too low and as if it moving head. < towards noon, when it extended over would come out while at stool. Menses sooner than vertex to forehead, where it was a congestive pain, usual, not so profuse or long-lasting as usual gradually > evening, with throbbing of carotids. Respiratory Organs and Chest. Stinging from with-

bing of carotids. Fauces red and raw; rose-red towards, ness of chest as from a cold evening, and dry, pain on swallowing throat at 9 30 Pm. Swallowing painful Acidity in

noon. Uneasy feeling, as of a lump

Abdomen.-Distention; and tenderness on pressure, ing continuing after the stool; frequent missions of new, with crawling sensation and occasional darting fetid. Occasional griping at 9.20 AM. Sharp pain pain Extremittes weak and trembling on standing about every fifteen minutes before going to bed and Neuralgic pain in arm before noon, N. pain in shoul-

Generalities and Mind .- Inability to sit quietly in | afterwards. Pain; on waking at 6 AM., with urging

with flatus, sore pain in and below umbilical region "Head—Aching; with sore pain in temples and ver- Burning about umbilious at 730 rs., below U at the Dulness. Congestion, with fulness of bead, 1230 rs. Bearing down in lower part of abdomen as mack and chest Fulness, < temples and in front, if it muscles were rollaxed, > when the head ached less

Scalp felt dry and tight.

Byes Bars and Face.—Hanness of retuna Eyes sore (Cough, or morning, and appearance of a cold Exand painful to touch Lids heavy Photophobus ( processing the Cough), or morning, and appearance of a cold Exand painful to touch Lids heavy Photophobus ( processing the Cough), or morning and appearance of a cold Exand painful to touch Lids heavy Photophobus ( processing the Cough), or morning and appearance of a cold Exand painful to the Cough ( processing the Cough) and the Cough ( processing the Cough ( proces pale, and sunken Face red and bloated in morning pression of chest, desire to clear throat and much Mouth and Throat.—Tongue coated white, thicker spitting Out of breath on ascending a slight elevation, at base, duty white, thicker towards centre and far with palpitation, vertigo and pallor Sharp pain in r back. Tongue light and smooth Taste sour Throb-chest, extending into abdomen and I shoulder Sore-

Heart and Pulse -- Heart's action excited by the least motion Pulse rapid, and full and strong, then sud-Stomach.-Appetite diminished Nothust Eructa-denly weak and irregular, then slow and weak Pulse tions; empty; of sour-tasting gas Nausea, < after-slow and weak, but excited by the least exertion.

slow and soft Pulse weak

Back and Extremities -Pain in back and loins; in tympanitic; tympanitic at 9 r.m., with pain. Rumbling small of back and in side before going to bed, run-Emissions of flatus; with pain in abdomen, < about ning around into r side, in the night sharp pain in umbilicus, > bending forward and by a consistent stool, the latter spot, low down in r. side, waking her three soreness and smarting of anus during stool, the smart- times, and a hard lump. Heavy pain in region of kidextending down l leg

sleep But little sleep at night Sleep delayed, rest- at r temple. Pain above r temple Boring exterless and disturbed Sleep full of dreams Dream of nally on vertex Pressure externally at vertex, with dead bodies

Fever - Cold feet Heat at night, with restlessness at 10 PM, then sweat Sweat on hands

### Dolichos Pruriens.

A tincture is made of the fuzz (hairs) of the pods of Dolichos pruriens, L , they are scraped off and digested in alcohol for a week or more

Pam in throat below r angle of jaw as if a splinter were imbedded vertually, < suallowing Pain in the gum so that she could not sleep half the night Twitching of muscles

Clinical. -- During pregnancy intolerable itching all over body at night. It has been prescribed in jaundice with white stools, also in complaints from worms and for affections of dentition Herpes zoster beginning on I scapula, extending to axilla and then to sternim and backward to spine, with burning and smarting It has been found valuable in the intense itching of jaundics, itching worse at night, and < scratching

### Drosera.

A tuncture is made of the entire fresh plant of Drosera rotund-

the action of the drug on the respiratory apparatus. especially its spasmodic cough, closely resembling whooping cough It is said to have developed tuberculosis in animals

Allies - Hydrocy ac , Con., Kali carb , and compare spasmodic cough remedies

Generalities.—Weakness in morning, on waking, so that he can scarcely open his eyes, general W, with sunken eyes and cheeks

Mind.-Rage at a trifle Mental uneasmess when reading Ill humor Depressed by persecutions of others on all sides and discouraged and solicitous about the future Despondency, with anxiety and loss of appetite Uneasy, sad, he imagined that he was deceived by spiteful, envious people Anxiety evenings when alone. A . about 7 or 8 PM as if impelled to drown himself, with restlessness and distrust, rising from region below ribs, as it his enemies allowed him no rest, as if he would hear unpleasant news, with general flushes of heat, < over face, afterwards with shivering over whole body without heat or thirst Obstinacy in execution of matured plans Taciturnity, with dread of hearing something unpleasant Joyless. stupid and disinchned to physical or mental labor

Head -Tearing in brain, < towards forehead, < moving eves, > resting head on hands Aching, in on walking in open air, and inclination to fall to food 1, with disinclination to work Forehead, cutting ing externally above brows in morning, with drawing expectoration and hourseness so that he speaks with ex-

ders and arms, making it difficult to keep them still | thence into cerebellum; boring outward on stooping Soreness of muscles of thighs extending to knees, when writing; pain after violent motion and while with stiffness, making it difficult to rise from the bed walking, like the confusion of head which arises from or chair Neuralgic pain from foot to knee, N pain violent talking, pain above orbits on stooping, > walking: pain extending outward in F and zygomatic Sleep.—Sleepines and dulness; S, but mability to processes; sore pain in I emmence Pressure outward at times gnawing Drawing pain in r half of brain, extending towards occiput; in 1 brain extending toand mability to sleep Feverishness on going to bed wards temple Scalp, sore sensation in skin of r temple; sore pain above r side of forehead, burning sore pain of r side, > touch, biting burning pain on vertex, itching, < sides, itching-gnawing on forepart, > rub-

Eyes.—Statches extending outward, < stooping Cutting transversely across l Pain more biting than pressing, on exerting vision Tensive burning transversely across I and hids Pupils dilated; contracted Sticking in I. ball during rest Tearing across I ball Burning pain in r ball, with sticking in I inner ear Agglutination Sore pain in r lower lid, < touch Itching of lids Drawing, burning pain in superciliary ridge. < towards temple. Pain in I brow and lid as if suppurating, on pressure Vision as through a veil, the letters run together when reading V obscured at 7 PM, on entering the house from a walk, with vibrations before eves Presbyopia and weakness of eyes, a vibration before eves on attempting to recognize small objects Ghstening flickerings, < about upper part and on one side, on looking at the flickering it moves out of the field of vision, disturbing him when reading

Ears .- Sticking in 1 middle, with twinging, S in General Action -The greatest interest centres about | r, not wholly external, slow S inward through 1, tensive, < externally, tickling, in innermost part of r Tearing in front of I meatus, with twitching pain Gnawing beneath cartilages Pain in r middle as if everything would be pressed together Drawing pain in r lobule and part of cartilage Pricking and burning pain externally in r, then drawing inward Difficult hearing, with increased humming before E Humming before E, with roaring or sound as of a distant drum

Nose -Prickling in l. side, with crawling in l ear Crawling in r , provoking sneezing Frequent sneezing, with or without fluent coryza, painful S, with cough, obliging him to hold his hand upon his chest Fluent coryza, < morning Bleeding; morning and evening, in morning, on blowing when washing the face, on stooping. Very sensitive to sour smells

stooping Very sensitive to sour smells

Face.—Sudden jerking in l. cheek Jaw, sticking tearing in 1 lower, as if in periosteum, burrowing in r. joint and in adjacent bones, < opening mouth , pain in r joint, drawing pressure on upper Crack in mid-dle of lower lip Dry lips and little taste.

Mouth.—Teeth (loose), sticking in morning after warm drinks; pain, cold sensation in crown of an Tongue, whitish ulcer on tip; round, painless swelling in middle; picking sticking on dorsum; sticking biting in r side and tip Biting on inner brain, he feels every step in it Heaviness on holding side of l. cheek, as after pepper Bitter taste to bread; it upright, > steeping, H and confusion Vertigo B taste in throat in morning, till dinner. No taste to

Throat.—Rough scraping dry sensation in fauces and striches in r , tearing tensive pain, < stooping , gnaw- soft palate, causing hacking cough, with yellow mucous ertion in a bass voice, with oppression of chest as if the | of the chest and abdomen, when he must hold his sides with his handle

and food on coughing , of blood Sticking in pit, with throbbing Clawing together in pit Pinching ten-sion in pit as if everything would be drawn inward, Pinching ten-< deep inspiration Tensive pain in epigastrium before and after a soft stool, if he holds the breath. during inspiration and expiration. < sitting and

Abdomen.-Cutting Cutting blows in muscles of A and chest, < sitting. Pinching, with clawing and diarrhoea, cutting P as from incarcerated flatus Pain, twisting Constriction when coughing if he does not expectorate easily, with efforts to vomit Sticking in r side when sitting; boring S in r parietes, drawing S from r. side to 1 when walking, almost arresting breathing Pain across hypochondria and lower part of chest, in H on touch and on coughing. obliging him to press upon them when coughing Constriction in H on coughing, in H, presenting cough unless he presses on pit of stomach Sudden contraction of lower A as if about to vomit, on expiration in evening in bed, causing cough Sticking in r iliac tossa, drawing S from I, loin into penis

Clinical.—Constrictive pain in hypogastrium during the paroxysms of cough, so that he cannot cough on account of the pain, and so that he presses his hands on the pit of his stomach or holds his sides

Rectum and Stool.-Pressing-out pain in R when not at stool Thin stool, then ineffectual urging Stool always becomes softer as it passes Copious, pasty Scanty, hard, with pressing Frequent, with Bloody mucus, with S, then cutting in abdomen pains in abdomen and small of back

Urinary and Sexual Organs .- Frequent urging to armate, with scanty urine Profuse urine, and frequent micturition. Watery, odorless urine, with slimy offensive stools Itching sticking in glans

Respiratory Organs .- Brused feeling in larguz when mhaling Crawling in larynx processing backing cough (Con ), with sensation as if a soft substance were in it and with sticking extending to r side of pharyes. Cough wakmg him at 2 A M (Kali c), C in morning, with expectoration; in evening on lying down, at night (Hyos), from very deep in chest, paroxysmal, so that he could scarcely get his breath (Hydrocy. ac) Bitter expectoration in morning, nauseous E. in morning, (salt E by coughing and hawking). Dyspnaa, < tulking, > walking, with constriction of throat Difficult respiration Deep respiration The breath from the lungs has a burnt odor when coughing

ertion in a base voice, with oppression of chest as if the jot the chest and addomen, when hemst held has helde with the hands, as the west withheld on talking and coughing, so that the the cough generally need with expectation of mucus. Whoopbreath could not be expired. Burming rough semestion in deep in T after dinner. Canwing bitting in r side of faunces when not swallowing Stomach.—Ravenous hunger without appetite, returning when he thinks it is satisfied Thirst Acid reructations Bitter cruciations The theory of the cough cough after midnight, breaks into sweet or waking, etc. Bronchits and the class of the cough of the chest, pararysmal cough after midnight, breaks into sweet or waking, etc. Bronchits can be cough in the class of the cough of the chest, pararysmal of the policy with stupelying headache, < in forchead. Vom. Ambient of the cough of the chest, pararysmal the class of the class of the cough in the class of the cough of the chest of the cough of the to remain, so that he cannot fully expire, speaking and coughing Whooping cough, with hemorrhage from mouth and nose, and sufficution.

> Chest.—Hæmoptysis (Ip ) Sticking in muscles on coughing and breathing, near axilla through the day on coughing or breathing deeply, > by pressure, with purulent bloody expectoration, in 1 intercostal muscles during inspiration and expiration, almost arresting breath, hot, in muscles of r true ribs during inspiration and expiration Pain in and below clavicles, over a small space in lungs, when inhaling, extending round to scapular, P transversely across chest, more pressive than sticking, when sitting, with pain on touch; tensive, in muscles during inspiration and expiration Construction of lungs when unhaling Burning in middle without thirst Crawling in 1 intercostal muscles, with pain in temples, < r

> Neck and Back.-Stiffness of nape and pain on motion Cramp in muscles of back and abdomen on turning head and body Sticking in 1 muscles of back Sticking tearing in spine when sitting, extending to anterior spine of 1 ilium Bruised pain here and there in back Strained pain in B in morning Drawing pain in B, and shoulders Rheumatism between scapulæ on moving, extending to sacrum. Sticking in tuberosity of ischium on rising from a seat, itching S in coccyx when sitting Grasping punching in l. loin on rapid walking, impeding respiration, > pressure

Extremities.—(Jerking or jerking sensation) Sticking in muscles Pain composed of gnawing and sticking in shafts of bones of arms, thighs and legs, joints, > motion, with sticking in joints Bruised feeling, with pain externally Pam, with general paralyzed sensation Aching in those upon which he lies, as if the bed were too hard Cramplike pressure, now in upper, now in lower Paralyzed feeling in all

Upper Extremities.—Sprained pain in 1 axilla on walking or standing, > touch Pressure outward in axilla during rest Twitching in r shoulder during rest. Bruised pain in shoulder-joint on bending arm backward, raising, touching it or lying upon it Pain in S-joint as if arm would go to sleep and were tired, > continued motion Sticking in r arm, with pain extending from shoulder to elbow and with suppurative pain in elbow on touch Pain in arm on motion, as if muscles would be torn from bones.

Bruised pam in region of elbow, then in shoulder. Pinching tension in bend of elbow on flexion, only slightly felt on stretching it out Sticking through Clinical.—The cough is usually (night, compro nimues): middle of 1 forcarm Sundien cutting between bones and the result of the r with outward pressure in forchead. Spasmodic con- chilliness, no tasts to food, thirst, heat of head and traction of flevors of fingers when holding anything, watery salivation. Warmth of upper part of body towards Now 1, now 1 fingers inclined to contract spasmodic comman Fixe hot and red Heat of head, on chest, cally, and on grasping anything joints of middle finger thinghs and hollows of knees, with sweat on these inclined to be stiff. Sticking extending into fingers parts and thirst) Sweat, at night, after midnight; and out of their tips Tearing in ball of I thumb.

Lower Extremities. - Thigh Intermittent cutting stuking in middle anterior part of l Cutting pinching in posterior part of l (Tearing after eating, with heaviness of legs ) Pain in bones of r thigh and leg, beginning at night in sleep, > stretching, P in posterior muscles of 1 at night. < pressure, stooping and lying upon them, > rising, paralytic, in r T and hip-joint, causing limping, in l T and knee as if broken

Trembling of knees when walking, < ascending steps Painful stiffness of knees Sticking in shaft of fibula, extending to calt, waking at night; cutting S in r call when sitting, > walking Pain in leg on stretching it, with imping (Sticking about r ankle, 'Asleep sensation in legs, then in thighs, arms and other when lying at night, with throbbing) Tearing in r parts, afterwards patient could hardly talk or stand antie on walking, as if dislocated; paralytic T in ankles, Lemon-juice acted as an antidote quiet Stiffness of ankles Sprained pain in r ankle

feet, causing tottering on beginning to walk, > con- him walking, causing limping. Tearing in a spot in ball are silly and nonsensical

of r great toe during rest

Skin.—Red elevations on back of hand and above white scaly skin, (painful to touch behind and be-consciousness of what had occurred neath l ear) Corroding ulcer on back of r hand. with itching, which after rubbing changes to burning. then exudation of bloody moisture Corrosion from application of the herb Burning pain in front of r corner of mouth Pricking burning pain beneath l eyelnl

starting from sleep in evening Frequent waking, ing backward and forward, obliged to be held by always on the breaking out of sweat, F waking as if another when eyes are closed from fright, but without anxiety on waking Dreams vivid, partly joyous, on waking Dreams vivid, partly joyous, and print looked blacker at doublethe usual distance, eyes partly anxious, vivid, vexatious, about the ill treatment of others, anxious D, D. of thirst and of drink-

ing and great thirst on waking

on face at night

### Duboisia.

A functure is made of the dry leaves of Duboisis myoporoides, B Br These contain the alkaloid—Duboisine—from which most of the effects have been observed

General Action,-Almost identical (as far as known) with Belladonna

Allies —Belladonna, Stramon

Generalities.—Trembling Intoxicated appearance Restlessness, in afternoon Ineffectual efforts to sit up in bed Weakness, all afternoon Faintness Asleep sensation in legs, then in thighs, arms and other

Mind .- Delirium, with tendency to pick at surround-Itching sticking in 1 sole when sitting, and in balls of ing objects, drawing up of arms, restlessness, rapid Tearing in heel on motion Pain drawing up pulse, heat, attempt to get up Hallucinations and down feet, extending to calves Weakness of ety Stupor, with weakness as if he had no life in Unable to concentrate thoughts, absent-minded, tinuing to walk. Sticking in three middle toes on thoughts wander from one subject to another, but all Memory lost sciousness Carphology, suspicious glancing beneath the bed-clothes and behind the back, incessant activity. wrist, at first painful, then itching sticking in a spot, the whole room was upset, flow of disconnected senwhich are < rubbing Pimples here and there in tences, memory of things that happened years ago, an face, with sticking on touch and pustules in centre; air of fun and humor, symptoms of childishness rather red P in middle of chin, below lip, covered with than of violence, imagined it was dark, afterwards un-

Head.—Inability to hold it up Aching, over eyes, in forehead and temples, over 1 eye. Dulness as after interrupted sleep Heaviness Strange feeling Vertigo, on rising up or walking, the legs seem unable to bear the body, staggering, but can walk straight by concentrating mind on the action and watching Sleep -Frequent yawning, with stretching. Snor- steps, inclination to fall backward, < ascending stairs, ing when lying on back Sleeplessness Frequent almost impossible to stand with eyes shut, constantly sway-

feel tired, sharp pain in upper part of ball, afterwards paralysis of accommodation, could not bear to read at any distance, could not look at food when eating on Fever.—Chilliness, through the day and heat account of pain. Hot and tired, hot and dry, also Cool feeling; in evening. Lachrymation Pupils dilated; irregularly, apparently body, with cold hands, hot face and nausea. Shiver- in segments; ovoid, afterwards nearly round; dilataing, during rest, during rest, though warm to touch; tion grows less as paralysis of accommodation inores' whole body, with hot face and cold hands, without creases; pupil vertically ovoid and irregular, in re-thirst also with warm forchead Coldness of face, sponse to change of light and shadow the least dilated hands and nose, (cold checks in evening, with hot parts show the most movement, at ten minutes it is hands), (I half of face cold after midnight and stick-firmly contracted everywhere, except at temporal side,

pain in occiput, heat of face and usual warmth of rest tinct, retinal veins dilated, arteries diminished, whole of body, lasting till 3 PM, in the evening well, at night fundus hyperæmic, accommodation paralyzed, could profuse sweat, < on abdomen, after the heat nausea, not read Jager No. 1 at any distance, but with + 36 Februle paroxysms, head heavy, confused, constant could read it at twelve inches, any change in distance causing blur. Smarting sharp pain in upper part of | Pulse.—Rapid, varied from 108 to 112, but always ball On looking up from book pain in upper part of fell to 80 when the patient was supported in a sitting balls and in forehead similar to sick headache, and posture and increased again on reclining Slow Ineyes feel large and protruding. Lids agglutinated in termittent, and feeble Strong, full. regular morning Palpebral orifices contracted all day.

within two feet of me, print shows blue, orange and tingle as if asleen reddish-brown, can see to read with + 20 glasses, but glass strained the eves

### Clinical.-Neuro-retmits. Exonthalmic gottre.

Ears. Nose and Face.-Earache in morning. L ear felt as if water were in it, a dull feeling Sudden ringing in ears, < r Nose stopped: and dry Dark flush on face Smarting sharp pain down r side of face

Mouth.—Dryness, and of tongue; and throat, > Solanum Dicamara, L. lemon-juice, of M and throat in afternoon, < lips, with stickiness, but not much desire for water Taste bad: bitter

Throat .- Patches of partially translucent, adherent, vellowish-white mucus in pharynx Pain as from a splinter in 1 side on swallowing, < empty S. Dryness, < back part; with burning and cough, without

Stomach.-Appetite lost Nausea, all the afterlight as if intoxicated, face feels warm but is not flushed, mouth and throat dry, saliva scanty and viscid, giddiness on walking, it seemed as if I could not control all parts of body at the same time, pain in forchead, pulse 52, full, occasionally at rate of 80 for a from wet-cold (Rhus tox, Nux mos) few beats.

Urinary Organs.-Burning in urethra during mic-Urine increased

Respiratory Organs.-Epiglottis hyperamic, vicinity of glosso-epiglottidean folds, membrane lining early as if called and sees a ghost, which keeps enlarglarynx engorged, dry, with patches of viscid, semi- ing till it disappears in an upward direction translucent, adherent mucus, appearing like a pseudo- tion. Picking in the air and at his clothes (Hyose) membrane, the hyperæmia < along course of ary-opi- Quarrelsome in afternoon, but not vexed thereby Restglottidean folds, the membrane covering cartilages of less Wrisberg, the capitula Santorini and the interaryta- Anxi nordal commissure, in the last-mentioned localities the most of the dry, translucent discharge was seen, vocal when spoken to Coma cords congested, < near posterior commissure, mucus | Head.—Statches, so that she became angry about adherent to their free borders, forming narrow bands | them, < evening, > lying | Boring outward before that stretched from side to side when the cords were Hoarseness. widely separated in deep inspiration and phonition difficult, constant desire to clear throat, generally unsuccessful, voice husky and indistinct

Cough increased (have always had a C, but not so upper lobe of r.

Extremities.—Heaviness. < lower Weakness of Photophobia Things seem elevated. Letters ran arms and legs. Jerking of muscles of arm on extendtogether in evening when reading Vision misty for ing hand to grasp anything R hands and fingers near objects Accommodation paralyzed, soon and feel as if going to sleep Gast unsteady, occasionally before the pupil was fully dilated and continued when it had seeling as if I stepped on empty space, and I would regained its normal size, cannot read at any distance, catch myself for sear of falling R knee some below can read with + 20 glasses. Cannot make out print patella, as if strained or rhoumatic Lower limbs

> Sleep and Fever .- Gaping and sneezing all day Drowsiness Night restless, could not get to sleep for hours, had to get up for water every five minutes Chilliness. Heat. < internally.

#### Dulcamara

A tincture is made of the fresh plant, before flowering, of

General Action.-The most prominent effects are temporarily > water, constantly thirsty for large quantities frequently repeated, of M, throat and bongue, carna Its resemblance to other Solomer is slight, but marked Its adaptability to conditions arising from cold-wet is very pronounced
Allies —Bry, Merc, Caust, Hyos also Rhus tox

and Nux mos

Generalities.- Emaciation Spasms, of facial muscles, then of whole body. Twitchings of tendons much thirst; pharynx dry and hyperæmic, purple-red, T of hands, lips and eyelids, < cold weather and capillaries much engorged, here and there varicosities, dampness, > approach to the fire, sudden T through capitaries much encorrect, not and state that a state of a principles every prominent and configuration of spinal whole body, seemingly from pains in abdomen, with column readily distinguishable, a picture of pharyn piteous cries, then muttering Trembling Sticking gits sicca as if the body would be cut off above hips, obliging noon Deadly, gone feeling all afternoon, as if at him to move back and forth, but without relief Pains greater curvature, not > eating or drinking Sick in various parts as after taking cold Restless, and feeling, general faintness, < epigastric region, head could be add by the held could be a feeling. sensation, as it she would sink through the bed, she Wearmens, in must get up at night and walk about sudden attacks, like faintness Necessity to he down. Almost ımmovable Aggravation towards evening.

> Clinical.-Very valuable for chronic muscular rheumatism. cold weather, especially in cold wet weather (Rhus t )

Mind.—Screaming as in hydrocephalus Wakes Ill-humored and not inclined to anything Anxious after midnight and tearful for the tuture Noticed none of his surroundings and heard nothing

midnight Aching, in morning in bed, < rising, with indolence, general coldness and nausca, causing stupidity, < evening, with increasing coryza, drawing pain through brain, < evening, pressing-out towards evening on walking in open air Pressure internally severe as this), next morning hard, dry, hacking, from in spots as with a dull instrument. Dulness in eventickling at bifurcation of trachea, cough causes sore-ing, D, with painful stupefaction, with drawings in ness or rawness over lungs, < lower lobe of 1 and frontal eminences, as after intoxication, > open air Heaviness; with boring outward in temples and foreDulcamara.

head, as after a debauch, as if scalp were tense, < | less pressure upon I malar-bone. Trismus Pinching nape, where it became a crawling Vertigo, in morn- in lower part of chin ing on rising, with trembling and weakness (Bry , Lyc ) , in morning on waking, with heat of head and with obscuration of vision, which changed to flickering of black spots, at noon, when walking before eating, all

face Forehead -Sticking deep in brain, with nausca r eve, in F and root of nose, as from a board in ness Tenacious and soaplike saliva front of head Painful throbbing in I, with vertigo

Intermittent tearing in temples, l Boring in i Drawings in temples, extending into head, Tearing pressing together in vertex Drawing pain on bility to swallow vertex in evening when eating, extending to nasal bones, where it is a constriction Paroxysmal press-would vomit A, with hunger Soon satisfied when eature inward on 1 vertex as with a dull instrument ing, with fulness and with rumbling in abdomen. Thirst Stupefying pain in I vertex, above I car, as if some-but drink was immediately vomited, inquenchable T thing blunt were pressed into head Sticking in occi- Eruclations, with hiccough, with scraping in cosphagus put Pain in occiput in evening in bed , P. in 1 bone Occuput feels enlarged Heaviness in occuput

Clinical.—Headaches during cold wet weather, heaviness of head, flicketing before eyes, nausea, etc., < motion, etc. Scald head, thick brown crusts, bleeding when scratched, < cold wet weather

Eyes. -- Inflammation Pressure. reading Feeling as if they would be pressed out of their orbits Feeling as it fire darted out of them when walking in the sun, and in the room Drvness and tension Pupils dilated, and contracted alternately Paralysis of upper hid Contractive pain in border of orbit Vision dim V of sparks

Ears -Sticking in meatus and parotid gland; pinching S in 1 ear, extending towards drum Tearing in with sticking outward, drumming and hubbling so mouth cracking as if something snapped asunder Twinging in 1, with nausea, T in r, with sticking Prickling as if cold air were in them Aching all night, preventing sleep, > suddenly in morning, except a rushing noise Drawing in external meatus Ringing

drum, caused by exposure to cold rain, several cases.

Nose -- l'imple in inner side of 1 wing, with ulcerain region of longitudinal sinus, which continued after

secretion of mucus

Clinical.-Facial neuralgia caused by going out in the wet or slightest exposure to cold

Mouth.—Teeth dull and seem insensible Gums objects in front of him seemed to stand still, and it loose and spongy Tongue white, itching crawling became black before the eves, with rising warmth in on\_tip of T, T could not be protruded, swollen, stiff, paralyzed, and mability to articulate, paralyzed Stammering as if delirious or intoxicated Articula-Boring outward above r brow, B outward alternately tion indistinct. Loss of speech, then rattling resin F and temples Burrowing and pressure, B deep piration, cramps, tetantic stiffness and death Conin, in morning in bed, a rising, with gloominess and stant grasping at M as if he would take something distended teeling in brain Pain in I frontal emi- out of it, with constant spitting about Pimples and nence pressing-out P in 1 eminence in evening, ulcers on inside of upper lip and on anterior part jerklike pressing outward, motion, tensive, above of palate, with tearing on moving the parts Dry-

Clinical.-It has been found useful in the salivation of Mer-Drawing in commence. Stooping, pressive D commenced by the stooping which is not been used in the proposed to the stooping the stooping which is notably were in during weather. It reported to the stooping the stoo

Throst.-Constant hawking of tough mucus, with pressive D m I temple in afternoon Pressure as scraping in pharynx Pressure as if uvula were too with a dull instrument, now in r, now in 1 temple long Dryness in evening Heat in pharynx Ina-

> Stomach .- Aversion to food, with shivering as if he and heartburn; empty, empty, with shuddering as from nausea, of the soup when eating Waterbrash Aausea, with chilliness, with inability to bring anything up Retching , ineffectual Vomiting , of mucus in morning, preceded by warm uprisings in pharynx of mucus, then of a thick, blackish-green liquid; of Wide open, moist, glistening tenacious mucus Distended feeling in pit, with emptiness in abdomen. Sticking in pit, I side of pit Griping, taking away the breath, G in epigastrium in evening in bed till falling asleop Pain in pit as troin a thrust, < pressure Tensive pain in r side of pit, as if strained Pressure extending into chest

Abdomen.—Distention , after a moderate meal , when eating, with repeated griping. Rumbling, with urging to stool, with pain in I groin and coldness in back, with pain in small of back Emission of much flatus, that he could not hear distinctly and on opening F of the odor of asafectida Pinching as before diarrhoea Griping, even in morning fasting, with cutting and distention, (i. here and there, with jerking cutting, in A and chest, with cutting, as from incarcerated flatus, as if a long worm were crawling up and down, with gnawing and pinching Bur-Clinical.—Inflammation of middle ear, with injection of the rowing, with griping, cutting and moving, as before diarrhoea Colic, with rumbling before and after stool, as after taking cold; as before diarrhoa; as betive pain Dryness in evening Sneezing, Stopped of after a purge, moving about, always on stooping; like ing of bright red, very warm blood, with pressure inclination to diarrhea, > emitting flatus. Uneasiness, with distended feeling and frequent empty eructations. Emptiness

Umbilicus -Sticking in region; on l side near, in Clinical. - Catarrhal troubles in cold, wet weather, with free evening, griping S on r side Pinching in region as if he should go to stool, but without urging, P. in Face.—Puffy, hot, P, anxious, distorted Tearing region and above I hip, > hard, seanity, difficult stool in cheek, with drawing Cramplike contraction be- and emission of flatus Griping below U when sitting neath lear, extending to ramus of lower jaw Pain- beth, G in a spot to I above U. Gnawing throbbing

Sticking in r side beneath ribs, arresting breathing, S outward in a spot in l. side, arresting breathing, with sensation as if something would force itself out and pain on pressure, intermittent S in 1. < pressure. Sudden cutting contraction in 1 side. Inguinal glands swollen and hard, I inguinal gland S Griping in hypogastrium in evening, with desire for stool Burrowing above crest of l. ilium, > pressure Pam now in 1 inguinal glands, now in r Tension in groin, in region of pubis on rising from a seat Burn-

Rectum.—Pressing during the usual stool Desire for stool in evening, with griping in hypogastrium, then a large, moist, at last thin, sour stool, after which he was relieved but felt weak, he had a hard, difficult stool in afternoon. Urging, then small hard stool, sudden U, then

Stool .- Yellow watery diarrhoa, with tearing cutting before stool as after taking cold (Hyos, Rhus t, Thuja) Thin, afternoons, with flatulence Soft, in small pieces Infrequent, sluggish, hard, difficult Suppressed

Clinical.-Diarrhosa always < cold, wet weather, stools mucous, green or changeable, of sour odor, with general dry heat

Urinary Organs.—Catarrh of bladder Pulsating (stitches?) outward in urethra Burning in meatus marus when armating. Involuntary micturition

Clinical.—Involuntary discharge of urine, paralysis of neck (meltus) of bladder. Catarrh of the bladder, the result of taking cold. Inflammation of kinders, with suppressed urine, caused by working in water.

Sexual Organs.—Heat in female, pruritis, also desire Respiratory Organs.-Cough, with expectoration of tenacious mucus and sticking in sides of chest (Dros ) , hacking C as from deep inspiration Respiration

scapula, suddenly coming and going in r, pulsating in bed and in morning after rising. Paralytic sensa-beneath I short ribs when sitting; intermittent, in I, tion in r upper arm, violent motion stupefying, beneath r clavicle, extending into chest, and afterwards when upright Cutting and pinching as drawings in 1 ulna. Weakness of 1 forearm, Intermittent pressure beneath sternum Oppression; nerve to end of little finger, and again upward along < breathing; as after sitting bent Intermittent the main tract of that nerve till it was lost in the info-

above U Twisting in region, with burrowing and squeezing in a spot beneath upper part of sternum grping (Diose). Foreing-out pain, as if a hermia Drawing externally over forepart, with tension, D mould occur on L and beneath U beneath sternum, with jerking, intermittent surging, tearing D through l Tension on deep breathing Feeling as it something would be forced out of l

Clinical.-Suppression of milk caused by taking cold

Heart and Pulse.-Excitement of H Palpitation, : night, P as if he felt the heart beating outside of the chest Pulse rapid, and irregular, and small, P slow, intermittent; small and hard in evening

Neck .- Pam in nape as if head had been lying in an uncomfortable position : drawing P. in r cervical muscles . ing in the bubo on motion and touch, with sticking constrictive, in muscles of nape as if the neck would be twisted, stupefying, in nape rising to occiput, in muscles of nape as from stiffness, on turning head to one side Suffness of muscles of nape (Caust,

Rhus t, Lath ) Back .- Sticking in middle of spine on breathing, after some time hard sluggish stool, with pressure and tacking, in middle of r scapula, intermittent throb-griping and cutting here and there in abdomen, U, bing, in 1 side near spane intermittent tearing with griping, yet passes but little, with pressure, in thusis on outer side of r scapula. Drawing tearing effectual U all day, with nausea. ure on I side of spine near nape, when lying on back in morning Pain in small of B. as after long stooping (Bry) Sticking outward above 1 hip on every mapiration, S outward in loins on every inspiration when sitting bent after a short walk, burrowing S on 1 side near sacrum, burrowing, in 1 loin, > walking, returning when sitting, jerklike, above r hip, near Cutting deep in low, transiently - pressure (Bry ) Bruised pain above I hip close to spine

Clinical.—Lameness of the small of the back, or stiffness and .

lameness at ross the neck and shoulders, or severe drawing pans in muscles of the back, with fever, after getting wet or cold

Extremities.—Trembling Shooting in I toes and thumb Drawing tearing in r shoulder, above r huomt and above and below r knee Pain, cramplike, here and there, < fingers Brussed sensation Weakness and heaviness 'Heaviness of arms and thighs Sudden numbness in evening, with pains in knees and clows, increasing so that he could hardly move his lumbs

Clinical.—Cough < cold, wet weather, sometimes dry, but more frequently with very free expectoration, caused by constant inching in laryin, the expectoration is tough and greenish, or the cough is dry and homeo, or even apamoide, the whoping or benching it backward or forward. Panulytic brussed cough (Drss.) Very frequently useful in bronchind cuarrh, with panum it arrill a Pullating panum it availla, > motion Jerkings of arm the cough it of the cough is dry and homeo, or even apamoide, the whoping or benching it backward or forward. Panulytic brussed panum in a valla. Pullating panum it availla. Pullating panum it availlating panum it availlati and coldness of arm as it paralyzed, and with bruised Chest.-Sticking on sternum, S in 1, in region of pain in elbow when bending or touching it | Jerking fifth and sixth ribs, in r, in region of third rib on in upper arm on bending it and drawing it backward, pressure, extending into small of back and to between but on stretching it out stiffness of fingers so that she shoulders, and on inspiration sticking on margin of 1 could not close them. Pain in upper arm in evening

Intermittent corrosive gnawing on outer side of on sternum, like a thrust Sticking tearing from mid- elbow Drawing from 1 elbow to wrist, seeding dle of sternum to spine when sitting Thrusts be- it, twisting boring D from elbow to wrist, during neath axilla: intermittent T on l side above ensiform motion Sudden jerking, pinching tearing in middle cartilage, extending deep into chest, when sitting bent of 1 forearm Drawing pain in r forearm Frequent from mearcerated flatus; deeply C. pain beneath elbow, with lameness. Sticking on r wist, motion l. clavicle, > pressure. Pinching, < inspiration Inflammatory rheumatism of l wrist, pain beginning Digging in r, > pressure; D or strained sensation at pisiform bone, extending along branchings of ulnar that he could hold nothing firmly move the thumb

would be dislocated, the pain teriorly close to I knee, sticking tearing in T, draw 3 o'clock, waking him, at first <. then > scratching ing tearing from middle of posterior part to knee; drawing tearing or constant pain, at one time sticking, at another pinching, > when walking, then changing to weariness and returning when sitting (Rhus t), pain, drawing pain on anterior part of r . drawing here and there in muscles, with sensitiveness to touch, paralytic drawing on anterior part of r

Tearing in knees when sitting, sticking T from knee up thigh when walking in open air Rhythmical undulating pressure on inner side of knee Weariness of knees. Swelling of leg and calf towards yawning Snoring, with open mouth evening, with tensive pain and weariness. Cramp in calves so that legs were drawn up against thighs, C in I calf when walking Sudden sticking in I calf, then sensation as if warm water or blood were flowing from that place Tearing up r tibia in morning, posteriorly on 1 calf, > moving foot Crampli Cramplike, almost cutting drawing through 1 leg Pain as from ribbing extending down l calf posteriorly Pain in tibiae as from weariness Numbness of calves in afternoon and evening Cramp in r. inner malleolus, waking at night, > walking Tearing extending from outer malleolus towards forepart of foot, drawing T near r inner malleolus ('utting in r sole Pulsating tearing in first and second 1 toes

Skin -- Nettle-rash over whole body (Rhus t , Apis) , without fever. Dark purplish color of face and hands with languor of circulation. Blotches on forehead, with sticking when touched Warts covering hands Spots like scarlet rash over whole body White wheals, with red areola on arms and thighs, with sticking and itching and evening in warmth of room, and after scratching, sticking itching and burning, P and ulcers about mouth, with tearing on moving the parts; itching, on thin itching, on thest and abdomen

Pricking and itching Agreeable tickling on outer margin of r scapula. Itching of cheeks close to wings of nose, I on anterior part of body and thighs at night, with heat and offensive transpirations without moisture, preventing sleep; soon returning after scratching, in middle of r. forearm, also on outer side of l. leg, on outer side of r leg, ending with itching

rior origin of flexor carpi ulnaris muscles, with redness sticking, general, < on nates, where skin was red, and swelling of integrinents, the little finger flexed and | partly from rubbing, and where there were wheals, inflamed Redness of back of hands, and if he be- red spots on inner side of forearm, the swelling always comes warm by walking in open air burning pain Fre- renewed on going to bed, without regard to time, when quent stretching of hands as if they would take hold of there was general sweat, sleeplessness till 2 or 3 A.M. something, hands hastily carried to mouth, with mo-tions like chewing or swallowing Cramp in hands so the tenth day shivering and heat with inclination to Cramplike jerk- sweat, the eruption worse on back, back covered with ing in first phalanx of r middle finger Cramplike red points, and sticking between and below scapulæ, drawing in ball of I thumb so that he could scarcely on arms the eruption was in spots, where there was desquamation in small scales the red points disappeared Lower Extremites.—Staggering Inability to stand and there was biting itching, on legs red spots and or walk Sticking or nates Hip, drawing sticking sensation as if lying in burning nettles up to hips, in I joint when walking, extending into groin, with with copious sweat, the eruption < warnth of bed, sensation on every step as it the head of the femur sweat, coffee and all food, heat of body after eating, violent stretching of then itching, symptoms > cold Burning itching on leg, which seemed to replace the femur, but bruised thighs; externally on r upper arm, with redness and pain remained and caused limping, drawing pinching a burning piniple, sudden creeping here and there, in r hip, drawing tearing in I Thigh, sticking post as from vermin, < night and mostly between 12 and

Clinical.—Uricans, with violent stching, especially when caused by nour storach. Uricars that comes on in cold weather, a exposure to cold sar, for example, undressing. Sometimes also useful in excess, with great stching and watery discharge, and it has even been found useful for color and durrhors following sup-pression of an eruption in cold weather Pemphigus. Warts, large smooth water or fleshy water on face and hards.

Sleep -- Frequent, violent yawning Sleepiness all day, with much yawning, S, with indolence and Uneasy sleep after 4 AM , U sleep, tossing about in discomfort, sleep, with profuse sweat and interrupted by confused dreams, tossing about all night, with dulness of head Starting as from fright, in evening on falling asleep A kind of waking towards morning, with closed eyes Sleeplessness; towards morning, with weariness in all limbs and lameness, as after great heat. Inability to sleep again after being wakened early, with weariness, turning from one side to the other because the muscles of occiput were lame and he could not he upon them Confused dreams; frightful D, making him jump out of bed

Fever -- Chilliness, with discomfort in limbs; cool skin in evening, chill towards evening over back, nape and occiput, with feeling as if hair stood on end, Clinical.—Paralysis of the lower extremities from getting C in back in open air, < in a draught, without thirst cold, the paralyzed limbs feel icy-cold. Shivering as from chilliness and nausca, with internal and external coldness

Heat of body, with sweat and redness, itching, burning and pimples, < face, so that face seemed swollen, dry H, dry, at night, internal and external, < hands, with thirst and slow, full pulse, then chilliness; of skin, burning of feet, B in skin of and after rubbing burning Lopra Pimples in angles, back, with sweat or face and moderate near, incoming of nose, red P in bend of elbow, noticeable morning, tell and the sweat; < back; on palms, back, with sweat of face and moderate heat, intermitcold, profuse, in morning, < head.

# Elaps.

The poison of the Coral viper, Elaps corallinus, is triturated with sugar of milk.

General Action -Evidently on the blood, but our knowledge of its effects is too meagre to permit any generalization.

Allies -Serpent-venom in general.

Generalities and Mind.—Rheumatic pains on mov-

being alone, as if something would happen or as if row-men, preventing standing, < warm drinks, especially dies would break in. Peevishness in afternoon, even tea and coffee with herself, desire not to be spoken to. Aversion to work.

Head -Sticking at 1 A M., preventing sleep, S, exwith shaking chill Aching: in morning and at noon, < evening, wilking, with stitches in side Oppression of C in with shaking chill Aching; in morning on waking, from 1 to 11 AM, after midnight, lasting till daybreak; at 7 PM, on r side; on 1 side at 9 PM., in vertex, as if brain were loose, and at night inability to hold the head still on account of nausea. Sensation as if attacked by apoplexy, all the blood seemed to be collected in the head and to stand still, afterwards it seemed as if the blood streamed from the head or from the finger-tips into the body, > being up Fall- ing to head, with stiffness of I shoulder Rheumatic ing out of hair

Climical.—Violent headache in a man who was blind, first in I then r eye, headaches extending from forehead to occupit, vision partially restored

Eyes and Ears .- Boring outward in eyes to and fro towards noon, the letters ran together, vision unsteady in afternoon and evening Large red. fiery points before the eyes, becoming violet and then black on becoming erect, < reflecting on what had been read, on stooping rush of blood to head Tearing in lear at 9 Am, > 11 Am Diminished hearing from time to time in afternoon Cracking on swallowing Roaring in r ear at 3 P M.

Clinical.—Bindness Deafness, with offensive yellowish-green discharge, buzzing in ears, headache in forehead and occiput, dull pain from nose to ears, pain goes to ears on swallowing Chronic otorrhosa. Sudden attacks of deafness at night, with rearing and cracking in ears.

Nose .- Fluent corvza.

Citiatean.—Subject to nosebleed, cruption about nose, pain in nose and forehead, skin dry and hot, but complaints of feeling rold Storpages and stindings high up in nostifi and dull adoing in foremost of the stindings high up in nostification of the stindings high up in nostification of the stindings of the sti none always stuffed up with plugs of dry mucus, pain at root of nose (compare Lycop)

Cheek.-Redness of r from 1 till 6 PM, with heat and formication in it Pressure in r, with redness, then swelling, then general shivering Swelling of r, with small red pumples beneath skin, then round tetterlike spots, the redness of face > next day towards noon, in afternoon swelling of face, < r side of nose, the next day the swelling of face lasted till 10 o'clock, with increased redness and swelling under eyes, the next morning red spots on face, which was puffy

Throat, Stomach and Abdomen .- Burning in pit of throat on swallowing, in the morning on waking, < more by heat than by cold, > towards 9 o'clock Thirst at night, with heat and sleepiness, in the morning sweat, dull pains, now here, now there. Pains, < 1. side. burning T. all the forenoon Violent vomiting of mucus in morning. Sudden cut- spirits. Fear of some approaching disaster Headting in abdomen towards 7 PM, disappearing at one ache in evening Aching in forehead, in region of time, suddenly better about 10 PM, < after midnight, causality, temples, region of combativeness, r and l > morning, return of the colic at 5 PM, as if she sides, headache, with constriction of temples and would sink together, < sitting, > walking and resting forehead. Dulness of head till late at night.

ing about. Faintness on stooping Fear, dread of the hands on the hips. Pressure downward in abdo-

Clinical. - Distress in stomach from cold drinks

Chest and Heart.-Sticking in side of chest, 1 from evening Palpitation, with anxiety and unsteadiness of hands

Clinical.—Cough, with expectoration of black blood and terrible pain through lungs as if they were torn out, especially in r. upper chest. Coldness in chest after drinking. (In the cold feeling in stomach and chest compare with Colch and perhaps Lach).

Neck and Back -Sticking in I side of nape, extendpain in neck on motion. Stiffness of r side of neck about 5 P.M Sticking in the whole spine Pain in

back, with chilliness, icy-cold feet and tenesmus vesice Extremities — Cramplike contractive pain in 1 shoulder at 6 PM, extending to head, as after carrying something heavy in the hand Sticking in upper arm burning in eyes, in morning on waking. Indistinct towards evening Rheumatic pain in 1 arm at 6 PM vision in morning The crochet-work seemed to move then in l leg, which was also lame Unsteadiness of hands Intermittent sticking, rheumatic pain in 1 leg from 4 to 6 PM, extending through the whole 1 side, with mental exhaustion and indifference Rheumatic drawing pain in 1 arm and leg in afternoon

Skin and Sleep -Red, hot rash above r wrist easy sleep, with frightful dreams

Fever -Chilliness in afternoon without thirst, then dry heat; C, then dry heat, C, then burning redness of face, at 8 PM alternating with heat, with the heat moisture without thirst, the C continues on going to bed with more sweat, then good sleep, the next day the fever returned at 7 PM with less C, but more heat, with sweat, interrupted by heavy dreams, breathing difficult all night, good sleep towards morning, the next day fever at 7 pm with less chill, more heat, much thirst, but little sweat, good sleep at 10 PM Shaking chill as if in the bones in the evening, then heat, hot skin with thirst, at 9 PM headache on 1 side and borng outward in eyes, the fever lasting till 10 AM Shivering at 10 PM

Heat at 10 PM, with thirst and mental excitement, the heat > about midnight, the next night the same dry heat after midnight, lasting till 9 AM Heat in flushes in evening, with redness of face and ears Dry heat from 7 to 9 r m, then chilliness till 10 r m, dry heat at midnight, but the slightest uncovering is unpleasant

### Elaterium.

A tracture is made of the green fruit of Momordica Elaterium, L (Ecbalium E , Rich )

General Action -A most violent hydragogue cathartic, producing inflammation of the whole gastro-enteric canal

Allies - Jatro., Coloc, Grat

Generalities, Mind and Head.—Sharp, fugitive or Nausea, with vomiting. Weakness; on going to bed at 10 PM Depression of Clinical.-Sometimes useful in the mundice of new-born

Eyes, Ears and Nose,-Sticking in 1 inner canthus Sticking near rim of cartilage of 1 car Enistaxis

head and then headache Vomiting, nearly all night, pressure of finger-ends in temporal fosse, from 3 PM at 7 Av of a dark brown fluid mixed with food, till evening, < 1. side, pressing inward, in r temple. with prostration and weak feeling at stomach, frequent, Pain in occiput, pressing outward in occiput in mornof scanty clear liquid, then difficult V of copious ing on rising, increasing till 4 PM, then declining till bilious greenish substance and all the contents of the 6 P M when it disappeared, < open air, motion, rising stomach, violent, and eructations of the odor of bad or stooping, > warmth of the room, cating or sleep-Stricture or oppression of epigastrium

Abdomen - Retraction Discharge of flatus Rumbling in cacum and colon Cutting like the griping of eyes, of conjunctiva, with redness Could not read medicine Griping Pain, coming on in the warmth of because letters seemed blurred Red face, cheeks, the bed, in r hypochondrium, over crest of r ilium, 1 Salivation, watery Constant spitting of clear,

round to back, extending deep into pelvis Soreness of anus Ineffectual desire for stool brown, then whitish vellow, watery, frothy S dark masses of bilious mucus Constipation

always gushing

Urine -- Copious, and limpid Scanty, after dinner, acid, pale, and high-colored, no deposit, with heat High-colored

Clinical.—It has been prescribed for dropsy consequent upon disease of kidney, even for dropsy of pericardium, or in jaundice with high fever of an intermittent character, with violent pain in abdomen, watery stools, dark urine, etc

Chest and Back .- Sharp pain at lower part of sternum, passing through to spine or lower angle of r scapula Pain in 1 sterno-cleido-mastoideus muscle noticed on the urinary tract, especially on the bladder near its insertion into the sternum Pain under r scapula, in region of 1 kidney Fugitive sticking in lumbar region, < r side

Extremities -Shooting in 1 axilla, near insertion of pertoralis major Pains in r shoulder, forearm and fatigue hand, extending to fingers, in shoulder, extending toes Arthritic pain in great toe

Sleep and Fever -Incessant gaping, with chilliness Fever

# Epiphegus.

A tincture is made of the fresh plant of Epiphegus Virginiana,

Languid feeling Aggravation from walking in open air, on rising from supine position Amelioration in morning, A. after sleep. Fears death from palpitation, F injury to her health from the drug When Mouth and Throat -Tongue coated dirty brown writing could not make the desired letters Found Unpleasant smell to the breath Bitter taste: with himself using wrong words in writing Difficulty in salivation Pain in back part of throat as if scalded | thinking correctly or in selecting proper words or ex-Feeling as it choans and upper part of resophagus pressions Sensation as it something were wrong in were enlarged his head, < forepart (morning after headache).

Stomach.—Loss of appetite Eructations, empty, Headache, < rising up in bed., < working in open seasoning, with names Naussa, till after two air Head confused Head full, in forepart. Pain liquid stools, with frequent vointing, at first slimly, in forepart of head; in middle, of forchead, sudden, then colored with bile, with increase of salivation, transient, in middle of forehead, in r temple; I temempty curcutations, flatulence, rumbling in abdomen ple at night in bed, < rising up , 1 temple till bedand scraping in throat, these symptoms > warmth of time, temples, < r, leaving dull heavy pain < r, bed, but replaced by pains in abomen, confusion of piercing, in r. temple, flying, in temples, as from Pain in epigastrium, in pit of stomach, with ing, with nausea Fulness in occiput, with dizziness in forehead Scalp feels tight during headache

Sharp pain over centre angle of r eye Smarting of

watery saliva Almost constant desire to expectorate Rectum and Stool.—Bleeding of the hamorrhoids Saliva riscid Taste viscid, and sticky, T pitter Stool (secondary) Nausca Gnawing in stomach, moliquid, copious (Coloc. Jatro, Grat), frequent, at first tion, > eating and quiet. Acidity in stomach, with Olive- accumulation of flatus Weight in stomach as from a green S Last part of S soft Dirty yellow S S of cold substance Loose stool, with griping Stool difficult although soft Palpitation which makes her weak Clinical.—Stools watery, forcible, frothy, copious, preceded by violent cutting pans in abdoness, with chiliness, presentation, lower limbs, cot lower limbs, with weakness of them faultient color, est Stools sometimes of tweepen and watery, but seedless sleep, with much dreaming Temperature lowered

> Clinical.-Several cures of "sick headache" are reported with the general characteristic of being caused by unusual excitement or fatigue, for example, visiting or shopping, some cases associated with nausea and vomiting

### Equisetum.

A tincture is made of the whole plant of Equiscium hyemale, L

General Action -The most prominent effects are Allies — ('antharis

Generalities and Mind.-Stiffness of muscles of trunk Uneasiness in different parts, U in evening General malaise Weakness Irritability and easy

Head .- Neuralgia at night in different parts, to ends of fingers and shooting back to elbow Stick- temple Aching all the morning, at noon, with pain ing in muscular parts of thumb; in I fingers, out to in upper part of eyes or roof of orbit, with inclinatheir tips, in I thigh, in course of sciatic nerve, ex- tion to scowl, stupefying, about 4 o'clock Heavitending to instep and out to tips of toes, with dull ness, all day, with general prostration, of brain at 9 Pain in r knee, extending into instep and AM, with dulness; at 1015 AM, with dulness and with construction through temples and weakness from the slightest exertion, in afternoon, with inability to study, with confusion, with pain above r. temple. as if it would fall forward at 9.30 AM Vertigo on moving head, with wavelike pains in head and intermittent lightness, and on walking feeling as if he would fall

Forehead.—Aching; over r. eye; at 9 30 A M., with | quently during the day, with desire for stool, three tightness of scalp and pain in roof of r orbit, across thin stools in the morning. Pain in hypogastrium at F and upper part of eyes and through temples at 11 Am, with passage of flatus, at 12 50 Pm, with passage of much fetted flatus; above crest of 1 illum at ing to occiput, then darting from 1 to r side of occi- 140 PM, extending forward to median line of body put; deep-seated, with prickling of skin on rub- Heavy pain in both sides of hypogastrium and in bladbing. Prickling as from electricity in evening and on der, with frequent desire to urmate, the desire not rubbing Fulness, with pain and feeling as if skin of micturition. Soreness in hypogastric region on press. F. were tight, < looking up, with heat in face, but no ure, S in r. side of H region in morning and in reredness, F as if all the brain were packed in front, at gion of bladder. 930 AM Constriction, and in vertex; across F and Anna.—Smarting during and after stool Aching in I temple at 1010 AM, as if scalp were too tight, during stool, with feeling as if rectum would protrude, C in F and through temples in afternoon, with and after the stool smarting in anus, with sensation as shooting through temples, < r, the pains in temples if some faces remained < movement and in open air, not > quiet, but / Urinary Organs.—Pain in bladder, not > micturition , eating Heavy dull feeling at 11.30 A.y., and in the region of bladder pain and tenderness, with soreness. temples

face and forehead, through T in afternoon and even-night.

100 < 1, then the pain moved in a straight line. Urethra—Pricking at 1015 a.m., a short distance 12 45 PM

with pain through temples

Occuput -Sticking near lambdoidal suture, S on l side of occipital bone, near superior curved line Darting on sides of bones, near superior curved line in meatus at 2 25 PM, scratching Boring changing from side to side Drawing pain in part during copious mictuition evening, and in neck

quires an effort to smooth again

Eyes.—Pain in 1, in roof of r orbit at 10 20 A M Sharp pain in outer angle of r at 4 rw

PM, with a stiff teeling Sounds intermingle so as to Cantharia) be indistinguishable Confused sounds, < 1 Rumbling, with dulness and heaviness of head. R in 1. then confusion of sounds

frequent desire to swallow Sticking in throat at 1 30 р.м.

Stomach - Excessive hunger Much wind at night tric and umbilical regions, heavy, after every meal Uneasiness; in epigastric and r hypochondriac regions 1

Burning over epigastric region Abdomen.—Emission of much flatus with the stool Distended feeling at 11 30 AM Feeling as before meh to I and over mpple at 1.30 P.M. Pain in centre diarrhosa. Sharp pain above crest of r ilium at 10 45 at 12 50 pm on any forward movement. P in r, A.M.; above crost of l. ilium at noon, in hypogas- evening, with pain in r. lung preventing filling it with trum at 11 AM, with sticking in anus Pains fre- air, next morning, and at 9 pm feeling as if both

of testicles, extending up spermatic cords Temples.—Sticking near 1 at 9 AM, extending in a bladder as from distention; with pricking in urethra straight line on anterior of forehead to r temple, then during and after micturition Tenderness in region of darting pains extending to vertex, occasional S in 1 bladder and in lower abdomen, extending upward from at 10 A.M., S darting from one to the other, with a groun, < 1 side, in forenoon Constant desire to uriheavy, drowsy sensation Darting in each; in lat mate, not copious discharge of clear light-colored 10.45 m, < in open air and extending over level, in urns the first copious discharge of clear light-colored 10.45 m, < in open air and extending over level, in urns the first control, but only a small quantity is passed each roof of orbit Boring in 1 at 11.45 m, B in 1, time Frequent desers in afternoon, with bit passed each fool of true borning in 1 at 11 10 AM, D in 1, time Trepers and after monotoning, frequent D, the ing to supraorbital region, with redness and burning urine has an ammoniacal smell, frequent D, with of face; suddenly in r at 11 25 A M, intermittent, in cramplike pain in hypogastric region, which was > by 1 at 11 A M, extending to roof of L orbit Pain over incturition. Frequent meturition, the quantity growing r, in r at 925 am, P at 1045 am, with heat in less each time while the desire increases, frequent M at

from one T. to the other Constriction through T at from meatus at 11 10 AM, when urinating, during the frequent and profuse micturation, with biting Vertex -Pain Weight Heaviness at 12 30 p. M. Prickling of meatus, with soreness from touch or pressure Cutting at 12 35 PM Pain at 11 AM, and in testicles Smarting on urmating, extending back an inch from meatus, with prickling Biting itching Burning when Sharp and quick pains near I superior curved line urinating, and sharp pain in root of penis, in fore-

Urme - Scanty and high-colored; S, with technique it Scalp -Tight feeling, with continual inclination to be had not urmuted for hours. Copious, in morning, raise and wrinkle the brow, which when wrinkled re- in morning on waking, and pale, with pressure in vesical region, heavy aching over l kidney and sharp pain in 1 hypochondrium, and specific gravity higher Heavy, Darker Specific gravity diminished Cloudy on standsleepy feeling in lids. Soreness of I ball in evening ing a short time. Should great excess of mucus after stand-Ears.—Pain at back of 1 mastoid process at 12 40 ang a short time (Compare all urmary symptoms with

Clinical.-Nocturnal enuresis Curative even when vesical irritation is marked, especially in women (Eup purp.), and urine contains blood and mucus. Cystitis, with tenderness over region Face, Mouth and Threat.—Flushed face at 125 M r, with hot feeling Feeling as if blood pressed into the face, < forehead Salivation at might, causing in old men Weskies of bladder, dribbling, in meane people frequent desure to swallow. Stelene in thost at who will not attend to the bladder

Sexual Organs .- Pain in penis on urinating, with Acidity Pain in region of pyloric orifice, in epigas-burning Violent erections Sharp pain in r testicle just before unnating Pain in testicles and cords, Soreness of testicles and spermatic cords, - 1.

and the cords seem gone the whole length No desire Chest -Shooting through lungs, S in 1 breast an

fourth and fifth ribs Soreness

< mspiration . Rapid pulse

Neck -Pain at 10 30 A M , extending to shoulders on motion Stiffness of muscles

Back -Pain in morning, > lying on back and walksitting, P in back and hips in forenoon, with temple, then in r, with constriction of whole scalp; on dull pain Drawing pain in abdomen deen breathing

pain over r kidney, over kidneys, preventing sleep lumpy stool, sudden in H, then a mushy stool the first part of the night Heaviness like a lump | Stool and Urine.—Loose stool, at noon after a ni over r hip-joint Rheumatic pain in region of sacrolumbar articulation and through 1 hip-joint, at 2 30 quiet, ; beginning to move, but > continued motion, paper red in back and hips the pains were gnawing and deepseated, but not continuous Soreness of kidneys, < r

Extremities -Sharp pain in I shoulder at 11 15 A M , with general shivering and heat in head. Pain in upper part of shoulders and in region of vertebra prominens from 10 AM till 1 PM, < motion or touch, an r shoulder at 10.15 A M , extending to middle of upper arm Occasional sharp pain through 1 hip and in lumbar region at 12 45 r v. Pain in r hip-joint and near knee Sharp pain in inner side of 1 knee in morning on waking, > walking Heavy pain under 1 patella at 12 15 PM Weakness of knees on least exertion

Skin .- Tension of forehead, at night, < opening of eves, with confused, disconnected dreams where many persons were present

of evelids, at 5 r u, with headache and tension of in- at 9 r u, on walking. Pain in knees in evening tegument of forehead. Sleep unrefreshing, with head- Drawing pain in 1 ankle, < walking ache on waking in the morning Restless night Intermittent sleep, constant change of position Sleep and evening Restless night, but no pain disturbed and full of tiresome dreams of many persons, places and things Sleep crowded with confused dreams of many people

Fever - ('hills run up back at 12 35 Pw Heat of' tace from 1 till 2 P M , without redness Burning in face, neck and r car at 1 40 pm, without much redness

### Erigeron.

A tincture is made of the entire fresh plant of Erigeron Cans-

Generalities .- Languor all day and depressed spirits, L in morning in afternoon and evening, and no ambition to move, with aching in all large joints Symptoins every morning

Head and Eyes -- Headache on waking, with aching nation of lids in morning

Nose, Mouth and Throat.-Nasal mucua increased in lungs were becoming congested; under sternum at 10 30 A 4, on deep breathing, P. in r lung between forenoon, with roughness in pharynx and sensation as if something had lodged in upper part of esophagus Heart and Pulse -Sharp pain at heart, at 150 P.M., that caused frequent inclination to swallow. Bad taste Sore throat, all night, with frequent inclination to swallow and feeling as if something had lodged in upper part of resophagus Roughness of pharynx; in morning. Dryness of pharynx at 9 PM

Stomach and Abdomen. - Eructations of air Nausea soreness, Pall the afternoon, with throbbing pain in 1 Intermittent cutting in epigastric region at 2 pm., then movement, sitting Pain in scapulæ, < through lirumbling pain in A, with aching in lumbar region Soreness in r scapula, in l on movement of l arm Rheumatic pains in abdominal muscles Cutting in Laureness below lower angle of scapule, < motion or r side of umbilicus Pain in umbilicus; r.; frequent in 1 , frequent pain in region of U , with feeling as if Lumbar Region - Pain, < r; P at 12.30 PM, < sit- anus had been torn, sudden P in region of U. when ting still, P extending along coccyx, in two lower walking, with pain in lower dorsal region and singing vertebric, in region of r kidney, with urging to urinate; in r ear Distress in U region, frequently with achin r kidney at 9 r v., then in 1, extending down 1 side ing in whole dorsal region Pain in 1 hypogastrium of sacrum Heavy pain in morning on waking, H and umbilicus, in hypogastrium, then a dark, hard,

Stool and Urine.-Loose stool, at noon after a natural one in the morning Mushy S , next day none. Hard, lumpy S S omitted Natural S, then neuralgia in PM extending down outer side of l leg, ending in anus and tenesinus. Urging to urinate, waking at front three inches above knee, > lying on back and by 4 A.M. Urine increased and pale, and turns litmus-

> Clinical.—Persistent hæmorrhages from bladder, in stone in bladder Chronic gonorrhes, with burning micturition, which is offensive, continual dribbling, smarting, burning, etc Post-partium hemorrhages. Hemorrhages from uterus, with painful micturition (compare with Mitchella)

> Back - Distress in dorsal region at 6 PM Aching in dorsal region, < r side, in afternoon and evening. and in lumbar region Sticking in region of r kidnev, I kidney, passing from I to r Pain in lumbar and sacral regions in morning on waking Drawing pain in r lumbar region at 9 P M , passing to r testicle, then dragging pain in 1 hypochondrium

Extremities.-Aching in arms and legs in afternoon and evening, A in all joints, with despondency. Drawing pain in elbow and r metacarpal bones in Sleep - Sleepiness in forenoon; at 2 P M, heaviness evening Rheumatic pains in r thumb. Pain in hips

Sleep.—Frequent disposition to yawn in afternoon

## Ervngium Aquaticum.

A tincture is made of the fresh root of Eryngium yuccefolium, Michaux (aquaticum, L.)

Generalities .- Erratic pains in muscles during the day, E. pains in trunk and limbs Restlessness Erethism of nervous system Nervous, moving about constantly, in evening. Debility. Tired, < lumbar region, after a long walk in afternoon on rising suddenly, stepping down or turning head quickly.

Mind.—Depressed spirits Dulness at night Loss of energy Inability to think steadily. Thoughts confused in afternoon, difficult to concentrate

Head.-Shooting, < forehead, especially over 1 eye, in large joints Pain in forehead at 9 PM.; pain in F, < lowering head or thinking intently, passing when with smarting of eyes, in F and r. eye on waking sitting in a stooping posture from eye into neck and Smarting of eyes in afternoon and evening Aggluti- along muscles of shoulder and beneath scapula, where it remained some time Aching; < stooping or turning head quickly, and in neck Heavy pain in morn- Urinary Organs.—Sensation as if urine remained in ing nead quickly, and in neck. Heavy pain in morning on rising, heavy, full P from concentrating mind urethra, burning smarting Urining to urnate after Vertigo in evening, V after dinner, V, with elation rising, burning in urethra before urinating, urner Tearing or boring over 1 eye; P, causing dimness of turnton in drops every few minutes, with ingling vision. Heavy pain in frontal part of brain; H pain in forehead from reading or writing, < stooping Ex- urethra behind glans during metarition, urne at 11 panding sensation above eyes, < stooping Heavy. Am, scanty, lightish-red, darker before rottring, and pain in masteid portion of temporal bone, passing symptoms in urethra more marked. Urne profuse, from eye to teeth, in morning.

Dragging pain in occiput, neck and shoulders, dis-boiled, a white flocculent sediment after standing appearing in occiput about 11 Am, but extending into Sexual Organs.—Desire suppressed, then excited, with eye, causing blurred vision, the pain < exercise or level dreams and pollutions, discharge of prostatio fluid excitement, next day > in head, but < neck and be- from slight causes. tween shoulders Scalp sore to touch, pain on comb-

ing hair

Byes.—Purulent inflammation of 1, congestion, redness, swelling, tenderness to pressure, pain, the latter with heavy pain, dull expression of eyes and sleepi- weak ness Stiffness of muscles, with pain on turning them .

Ears and Nose.—Eustachian tube inflamed and l and cracking in l. car Profuse discharge of thick, ful on motion

vellow mucus from nose

ness of tongue and fauces, with insipid taste Thick, confused Heat in flashes Sweat of urinous odor tenacious, disagreeable mucus in mouth, thick, tena-, in evening cious, yellowish inucus in mouth on rising Constant hawking up of mucus Redness and swelling of mucous membrane of throat, with profuse, thick, whitish mucus, causing an ulcerated appearance, without bad feeling Smarting, raw pain along 1 side of Lab throat, with dry tongue and discharge of thick yellow burning in fauces Choking on slight pressure

Stomach.-Appetite diminished, no desire for particular kinds of food . D . restored at the sight of food

intestines Piercing pain in A, with bloated feeling, sleep Mental depression list not visible distention, with heaviness on walking Head and Eyes—Dulness of H Fulness of H and screness on pressure Pann in A in morning on Cerebral conjection, with much excitement. Congeswalk. Hard, dark brown stool, with tenesmus and Frontal pain. Eyes hot, and smarting Lads heavy. with cutting in anus as the frees passed Stool Nose, Face and Mouth.—Stiffness of nose Coryza. ate the bowels then

through to opposite side, at 11 A M, when sitting in the deep yellow. Urine scanty Twenty-six ozs. of U in lecture-room Shooting in vertex and in r. side of face twenty-four hours, acid, sp gr 1016, containing 382 11 gr solid matter. U. lightish red or amber-colored when

Clinical.-Seminal emissions without erections, day and

Respiratory Organs, Chest and Pulse. - Mucous heat, then profuse discharge of purulent fluid, stick- membrane of larynx seemed thickened, causing hacking the lids together, flowing on cheek from all parts ing cough and expectoration of stringy, light yellow of the lid, leaving the conjunctiva granulated and mucus, mostly from larynx Dyspnea as if the rough Shooting from r to teeth in forenoon Burn clothing were too tight Oppression of chest, with ing pain, with heaviness, congestion and squinting in fulness, desire to take a full breath, but mability to do a strong light Smarting burning from a strong light, so, lungs seem solidified Pulse rapid, and soft and

Neck, Back and Extremities.-Rheumatic pain in quickly Sensitiveness to strong light and congestion, nape at 11 AM when in the room, with stiffness of looking at a strong light or walking in bright sun- cervical muscles and soreness on motion Soreness of muscles of neck on turning head quickly, and heavy pain on pressure Pain in lumbar region at 2 PM ear swollen internally and externally, tender to press. Weakness of lumbar region, with dragging pain Rheuure, painful, bleeding readily, discharging thick, white matic pain in 1 shoulder, 1 arm, r wrist and r hand and bloody, offensive pus Bruising-tearing as if ears Lower limbs languid and heavy, with profuse sweat were being torn from their location Ringing, singing on walking L patella and os calcis sore and pain-

Sleep and Fever.-Sleepiness, < afternoon Early Mouth and Throat.-Tongue grayish, ragged Dry. waking Wakefulness at night Dreams disturbed

# Eucalyptus.

A tracture is made of the fresh leaves of Eucalyptus globulus,

General Action .- It produces general vascular exmucus, which increased the smarting Smarting citement, followed by depression and low temperature; finally muscular and sensory paralysis Absinth

Generalities and Mind.—Rheumatic, jerking, tearing, Names about noon, then acrid cructations, N between stacking pains, < night Pain when walking or carry 9 and 10 PM, with drawing, cramping pain in stomach ing anything Feeling as it he had taken cold. Maland heavy, compressing pain between shoulders are during fever Weakness Effects removed by a Heavy, dragging pain, at night Heaviness in morn-cup of coffee General excitement and desire for g Emptiness, with heavy, dragging pain exercise, pleasant excitement, with desire to move Abdomen and Stool.—Cramping pain in A, in small about and buoyancy General calmness and soothing

waking, P in I groin and testicle, < during exercise tive headache. Intoxication, then mental depression Heaviness in groin in afternoon, perhaps due to a and exhaustion Vertigo and pulsation in forehead

omitted for two or three days without uneasiness, and Lower hp sore. Sore pain in upper incisors Raw it was more an act of the will than necessity to evacu- feeling in tongue. Increased secretion of mucus and Clinical.—Cures chronic catarrh of passal passages and scute

Throat - Posterior nares inflamed and smarting, thick, whitish discharge on hawking, frequent violent Fulness and soreness on swallowing, and burning Sensation of phlegm in afternoon, with expectoration of thick, white, frothy mucus and a relaxed, aphthous condition. Tickling, smarting, in-

chest, expectoration scanty, transparent, mucous Stomach.-Appetite increased , lost Thirst . during the fever Eructations tasting of the drug, and burning, smelling of the drug Digestion difficult and painful Fulness as it he had eaten or drunk too much, F, with pressure. Weight Tenderness and burning in S and abdomen, with heat in rectum, then tenesmus, with discharge of mucus and prostration, purging and hemorrhage from bowels Burning, after dinner. in epigastric and umbilical regions, with head, frontal pain and tightness across bridge of nose with heart, lasting all the afternoon and next forenoon

running through A . . morning, with thin diarrhoa . S pain in hypogastric region after dinner, in hypos pain in hypogastric region after dinner, in hypogastric region a diarrhea Sticking in spleen and I inguinal region Uneasiness in umbilical region, extending farther, with now in r side, now in 1, now in both skirmshing pains in upper A, feeling as before a nail were pressing into r side near vertex diarrhoa

ing to stool Diarrhora smelling of the drug Irreguithe balls seem compressed and are painting lar S Insufficient S Urine has a herbaccous smell, obscured, V of dark spots Roaring in ears of violets Urea increased Urine diminished, none at night, which had not occurred for years. Sexual appetite increased

### Clinical.-Subscute cystitis.

Respiratory Organs, Heart and Pulse.—Sore pain in Coutting in tongue, in muscle under tongue trachea and posterior narcs during empty swallowing Asthmatic, with crampy feeling in chest and back Breathing quickened in fever Painful palpitation Rapid pulse

thitis, with profuse expectoration

Extremities .- Pricking, then aching in arms and legs, with fulness in veins and a stiff, weary sensation as if too lazy to move Tingling in lower, as if asleep Heels sore as from too much walking Sticking in 1 sole, near great toe

and metatarsal joints Eruptions glandular enlargements, foul and indolent ulcers

Fover —Temperature lowered Chilla running down hack, and posterior where the Chilla running down hack, and posterior where of legs Cold fingers; tips pechality for gazire deerangements associated with allowance for Fover, seemed to have rheumatic, in flushes, also with "segat (Lye, Sapha)." sudden sweat Burning in palms Sweat at night; Sexual Organs -Cutting in penis, extending to towards morning Sweat odorous, of trimethylamine bladder

Clinical.—It has been prescribed in fevers, intermittent, typhoid and remittent, but without marked indications lits steadily reduced the pulse and temperature in typhoid

### Euonymus Europæus.

A tracture is made of the fresh fruit of Euonymus Europæus, L

General Action.-Evonymin, obtained from the bark, cossant hacking cough in evening, weak feeling in of E atro-purpureus has a positive action on the liver mcreasing the secretion of bile It is to be compared with Berberis, Chelidon . Podo , etc

Generalities and Mind .- Sticking in various parts Sticking drawing in all parts, < back oblige lying down, and then disappear, but reappear in other parts Aggravation of symptoms of head, chest and abdomen after a meal Most troubles appear on 1 side Morose Disinclined to work Loss of ideas, on exerting the mind and ill humor thereat

Head,-Aching, with chilliness Deep stitches, now thirst, faintness, vertigo, dimness of vision, fulness of low down in r side of occiput, then in 1 frontal eminence, now in r temple, then in r parietal bone, now as before epistaxis Faintness after dinner, with in 1, then in r temporal bone, as far as mastoid probeating sensation in abdominal aorta synchronous cess Vertigo, forehead, sitting, V, with tremulous mist before eyes Frontal headache, intermittent, Abdomen.—Burning, and in sternum Sharp pains between eyes, drawing Benumbing pressure above r orbit Painful drawing from 1 side of frontal bone to malar-bone Tension of skin of forehead, at times Feeling as if

Eyes and Ears.-Eyes painful Pressure in eye, Stool, Urnary and Sexual Organs.—Ineffectual urg—external pressure, r upon mone, man fill Vision

> Face and Mouth.-Stitches in 1 malar-bone, intermittent, beneath r zygoma Tearing in face, I side of face, < frontal bone Pain in malar-bone, drawing in face, paralytic, in r malar-bone Painful ing in face, paralytic, in r malar-bone pressure on lower margin of 1 malar-bone. Drawing from malar-bone to lower jaw Tearing in teeth, r

> Stomach - Nausea Vomiting and diarrhou Stitches in pit, near pit, now r, now l side

Abdomen -Cutting; in morning in bed, with constriction, as if A would be cut off under the ribs Clinical.—Whooping cough Gangrene of lungs Bron-Acute pain, at one time seeming like a pressure upward of the diaphragm, at one time like constriction, at another like sticking, again a drawing about in the intestines as from flatus; frightful pain, profuse diarrhoea, then collapse, with involuntary evacuations of blood and mucus, on lifting him up tetanic convulsions, which immediately preceded death. Stitches Skin.—Swellings in different parts, one of the size beneath I last ribs after cating, S beneath navel of a filbert-nut below r nipple was the seat of stab. Pain in umbilical region, during and after eating, bing and darting pains; nodular S over metacarpal above navel, near pit of stomach. Stitches in middle Herpes, and of r side of lower A , in I half of lower A on inspira-

Sloop—Stoopmess during the day, difficulty in falling salvely, aloopmess the normal as if he had not slept as e-saled bloomes, breads, exceed tonget, slot take, considering and the had not slept as e-saled bloomes, breads, exceed tonget, slot take, considering and the had not slept as e-saled bloomes, breads, exceed tonget, slot take, onestigating and the sale of the had not slept as e-saled bloomes, breads, exceed tonget, slot take, onestigating and the sale of the s

Respiratory Organs.—Sighing.

near ensiform eartilage, above r. mipple, below or with glutinous secretion from Meibomian glands. on last r. true ribs, and difficult respiration with every Dim vision on looking at small things Nose dry statch, shattering benumbing, in region of 1 nipple and stopped. Redness of face, of cheeks, with dry-Burrowing beneath sternum without actual embarrass-ness of skin ment of respiration , B. in 1 side, now beneath scapula, ment of respiration, B. in 1 side, now beneath scapula, Clinical.—Violent coryza or influenza, with third, heavings and near spine, now beneath arm, now beneath nipple, over head, hone-pains, soreness of eyeballa, etc manifesting itself by thrusts, stitches and pressure Pain in I. side on a line with ensiform cartilage, P < inspiration, > expiration. Sore and bruised sensation Painful drawing in region of 1 nipple in evening before of I side, with special pain in region of I nipple and beneath I scapula, benumbing C beneath I nipple

even the spirits

of spine, about the middle of the body, frequent, like ought to come up without ability to raise it electric shocks in a zigzag along spine from lumbar to ness S seemed contracted from side to side scapular region Crawling, biting, itching, or paralytic pain in 1 side of posterior circumference of pelvis

joint Pain in I humerus and shoulder-joint; in fulness fingers, paralytic here and there in fingers, drawing, in finger-joints Painful drawing in metacarpal joint with sinarting and heat in anus Four or five watery of 1 index Sticking now in both hips, now alternatisticols in a day Loose scarty stool, with tensemus ing between them Drawing pain in thighs In- Unite dark, clear termittent drawing in upper part of 1 thigh, beneath Urine copious, limpid ioint Pain in forepart of knee, paralytic, in knees from walking, standing. Paralytic drawing on inner side of r leg when standing Pain (pressure and sticking) beneath 1 outer malleolus. < anteriorly. along outer side of foot, with soreness and pain in bed Pain in feet, in toes

Skin -Pustules (reddish spots) on chest and back. without moisture down I half of back Biting, itching, crawling in various parts, obliging scratching, followed by burning

Fever -Shivering chill over whole body

### Eupatorium Aromaticum.

A tincture of the fresh root is used.

Clinical.-Great soreness of the mouth in an infant Vomiting of bile, pain in stomach, headache and fever.

# Eupatorium Perfoliatum.

A tincture of the entire fresh plant is used

Allies - Bry , Ars , and probably Carduas ben. feeling in every bone, preventing lying in bed and above and below elbows, as if beaten. Painful sorecausing despar, mouning and crying out | Inability ness of wrists as if broken or dislocated. Stiffness of to lie on 1 side Aggravation in the morning of one arms, of fingers, with obtuseness of touch, of lower day and in the afternoon of the next Headache, < limbs on runny to nath, with soreness Soreness of lower first going into the open any. - the house and by concerns-limbs, with aching. Pain in r hip when sitting, P lions, with internal soreness Whirting around in brain in I glutted inswelep, susaing round in fort of troin morning, as if placed in a coal screen and whirled chanter major, with sensitiveness Calves feel as if around two or three times, soon repeated forehead, extending to occiput, < 1 side. through temples, with sensation of blood rushing across sensitiveness of 1 great toe, the pain in foot < standhead.

Clinical.—Periodical headaches, especially in occiput, throb-suddenly moving to r bing, sensation of great soreness of eyeballs, soreness of scalp, etc.

Fever.—Intermitten

Eves. Nose and Face.—Eveballs sore (Bap ) Chest.-Electric-like shocks towards I side Stitches creased lachrymation. Redness of margins of lids,

Mouth and Throat .- Tongue coated whate (Bry ) Mucous membrane of mouth pale Instead taste Throat

Stomach .- Desire for ice-cream Loss of appetite going to bed Fulness obliging deep breathing Ten-Thirst for cold water (Bry.), T. for something cold at sion in sternum Compression in whole circumference might Belching of tasteless wind, with feeling of obstruction at pit of S Nausea , from odors, the smell of cooking, etc., with vomiting, free perspiration and Heart —Anxiety like an internal pressure, affecting conous expectoration Betching and vomiting of bile. Vomiting preceded by thirst (Ars), V. after every Back —Statches in first lumbar vertebra, near | side draught (Ars), of food. Feeling as if something Beating in epigastrium at night

Extremities — Tearing in shoulders, 1 shoulder-in 1 hypochondrium Soreness in liver region, with Abdomen.—Tight clothing is oppressive Tightness

> Stool and Urme -Diarrhea in morning Scanty urine, and high-colored

Respiratory Organs .- Cough, with soreness and heat in bronchi, C, evening, hacking, in evening

Clinical.-Inflammation of larynx, with soreness and hoarsethe convertible of the convertib

Chest.-Aching under l breast, behind sternum, with soreness, weight, inability to inspire naturally or twot the body to r'on'l because of the soreness, he feels best when lying on the back with his arms down and legs straight, but inability to move to r or 1, mability to twist the body when standing, sitting or lying Soreness on a full inspiration, S from coughing, > going down on his knees Grating sensation on very deep inspiration Heart .- Pressure as if in too small a place

Neck and Back .- Beating pain in nape, > rusing, and in occiput Bruised pain in back. Trembling in back during fever Pain and soreness in small of B as if beaten, deep-seated P in loins, with soreness from touch Weakness of small of B

Extremities. - Aching in bones, with soreness of Generalities and Head.—Soreness in bones. Bruised fiesh. Soreness and aching in arms and forearms; Pain in they had been beaten. Pricking in soles Pain in Darting upper part of I foot, with sorciess and with increased ing upon it. Pain in first joint of great toe, I, then

Fever.-Intermittent, quotidian, tertian and quar-

The paraxysm usually begins in the morning, thirst tobacco. Scalded feeling in throat. Smarting in posseveral hours before the chill, continuing during chill terior part of T.; < posterior part, with burning. Soreand heat; C. in morning, heat through the day, but no ness of T Roughness and dryness in T. Fulness in sweat; C through the night and in the morning, with T, can hardly prevent crying, F, with choking, comnausea from the least motion, C, with nausea and trem- pelling frequent swallowing Fluttering in pit of T. bling. C alternating with flashes of heat General shuddering proceeding from the stomach heat at night, with sweat Heat on vertex, with pan pan in pit. Gnawing, which is > by pressure, H of soles in morning abdomen.—As hard Sweat at night, with chillness from motion or unless, with pain Cr. covering

Clinical.- The characteristic fever, intermittent fever, for CHRICAL.—The characteristic lever, intermittent tever, for which this drug should be prescribed, has thirst beginning before the chill and continuing during both chill and heat, it is extremely important to observe that vomiting is particularly apt to result from drinking or taking any nourishment, either before or result from drinking of taking any noursament, either neutre or after the chill sail fever, this vonting from taking water is much more characteristic of the drug than the bone-pans, especially the vonting of bile as the chill passes off, the volont hone-pans, the volent headache, pan and soreness of the mustles, are the universal scrompaniments of the intermittent fever, the patient feels is if all the bones were breaking, it is very frequently obleels wit all the bones were breaking, it is very frequently ob-served that these Kupatorium cases present an incomplete par ovvem, for the chill and fever are well marked, and perhaps vio-lent, and yet the sweat is entirely wanting; while this is usually the case, it is true that the drug cures cases in which there is a de intel sweating stage. Valuable for catarrhal fever, especially of there is bilious vomiting, with soreness of the chest and muscles and bone pains, running from eyes and nose, soreness of the eyeballs, soreness of head, etc.

### Eupatorium Purpureum.

A tincture of the fresh root is used

Allies -Eupt perf, Apocyn c

Generalities and Mind.—Neuralgia from below upward, < up 1 side of back and hip Rheumatic pain inflammation of the bladder with dysuria, and in intermittent changing about always from below upward Tiro! [ferer when dysums is a prominent symptom, with constant desire teching, in every organ Faintness, with the urinary to urinate, with aching in kidneys and bladder symptoms, after rising, with sickness Numbness, < pression Homesickness though at home and sur- I ovary. Leucorrhea leaving no stain rounded by her own tamily Fear of sickness

moving in all directions falling to left, V, with deep dull pain through I | Neck and Back.-Stiff, wry neck | Lame feeling in temple, in which the whole body seemed to participate; nape, in neck, with weak feeling Sore pain in the as it flying round and round Fulness in vertex; whole extent of the spine, from below upward Achivath pressing as if lifting up from adjoining parts, ing in sacrum running into kidneys, deep in l kidney, confusion and heaviness Thumping pain on l side deep in kidneys, with cutting of occipital bone Soreness of scalp Pleasant pricking in Scalp Itching of scalp

Eyes and Ears .- Eyes wide open and fixed Lachrymation Inability to see as far as usual Ears feel full Reports in E Squeaking in E Crackling in E like the burning of birch bark, < swallowing any-

Nose and Face.—Copious watery discharge from nose Constant discharge from a sore, from continued wiping if the heels were crowding through the boots of nose Face shining as from washing with much

Mouth and Throat -- Gums red and hot, Stinging in end of tongue Prickling in posterior part of vation Sensation in throat as after swallowing with staring eyes.

Stomach.—Eructations. Nausea. Swelling. < 1

Pungent side, with fulness Crampy pain Griping, crampy

Abdomen .- As hard as a rock Rumbling Ful-

ness, with pain Crampy, windy Twisting pain Pain in the whole: < 1 side, with soreness, deep in ossa innominata, as in diarrhoa, without much alteration in stools

Rectum .- Pressure all day Ineffectual urging to stool

Urmary Organs .- Cutting in bladder, with pressure and fulness. Pain in bladder Smarting in bladder and urethra, with burning, so that she could not stand Feeling of continual micturition Constant urging to urmate, with cutting in bladder, frequent and copious micturition, the stream smaller than usual Frequent micturition, 58 ozs in twelve hours, once with an aromatic odor, pale, containing a white flocculent mucus, in the next twelve hours greater urging and more frequent micturition, but less urine, the next day almost constant urging but urine scanty, one-half to two ounces at each evacuation, of higher color, during the three days occasional spasmodic action of bladder Cutting in urethra Smarting in urethra during micturition, burning S in U Smarting burning in urethra during micturation Feeling of having retained the urine long Heavy pain in urethra

Sexual Organs.-Constant wet feeling externally in groin Aggravation on l side of body Delusions, Jerking in and above l ovary Cutting two inches of sight and hearing. Talkative, exclamations De above I ovary Heavy pressure during the day above

Respiratory Organs, Heart and Pulse.--Frequent Head—Heavy pum, < forehead Feeling as in a sighing. Desire to inflate the lungs, which she did bad cold Lightness < morning, at 12 celeaks, L, from time to time without particularly noticing that with sensation as if failing to the left Sensation as if she did it Heart and throat futtering Palpitation Vertigo, with sensation of Pulse from 80 to 100, full and bounding

Clinical.—The severe pain in the back noticed in this drug sometimes seems to indicate its use for chronic or subscute inflan mation of the kidness, especially from taking cold, with suppression of urine or with more or less difficulty in urinating.

Extremities.-Gnawing pain Weakness, with uneasiness Cutting in 1 shoulder, running to occuput Gnawing in hip-bone Weakness of legs, < l., with numbness of r. Feet feel as after a long walk, and as

of nose. Face shining as from washing with much some Congestion of face. Rush of blood to F. Red-course of the leasts nerve. It has also been used for selatics, severe pain in the ness, dryness and internal and external heat of F. Red-course of the leasts nerve. It has also been used for selatics, severe pain in the ness, dryness and internal and external heat of F. It has been used for selatics, severe pain in the ness. cedematous swelling, scanty urine, cold extremities, etc.

Sleep .- Yawning Sleepiness; with dulness, it retongue Numbness of tongue as from Acontte. Sali-quires a great effort to move about Wakefulness, Fever.—Clinical.—In intermittent fever it has generally been found cursuive when the thill begins in the small of the back and apreads over the body. This drug, as well as Eup. perfoliation, seems to remove the bone-pane, the other symptoms of the vor remortes seem also to be similar, whether there is a marked.

\*\*T. nost: difference in the drugs it is for future experiments to determine.

### Euphorbium.

A tineture of the gum-resin of some African species is used

General Action. - All the species of Euphorbia have General Action.—All the species of Euphorbia have; an acrid, milky, juice which seems to exert a prettyl hedults, surey fieldshape from sys and nose, with surupular constant effect; namely, most violent vomiting and cough The juice of some species is said to be valuable for wars, purging, or if the dust of the gum be inhaled most. It must be applied two or three times a day. violent irritation and inflammation of the mucous membrane of the air-passages The juice of some tearings in muscles of I cheek, almost as in toothache species even produces vesication, like croton oil Nu- Tensive pain in cheek as if swellen Sore pain in merous subjective symptoms have been developed by Hahnemann's provings See the skin symptoms and compare Anacard, and Rhus tox.

and feeling not at all like work.

Head.—Sticking, < forehead Pain; as if it would with toothache Tension, < forehead and cervical mus- Inability to speak intelligibly cles Vertigo, even to falling to the left, when walking in open air, V when standing, everything turned about and he threatened to fall to the right Sticking in 1 side of forehead Vertiginous tearing in 1 side of orbit, externally above I eve, with lachrymation and inability to open eye on account of pain, stupefying Stupefying pain in forepart of r side of head, extending into torehead Sticking externally in temples; S beneath r parietal bone Pressure in 1 half clinical. of brain; P in occiput Bruised pain in l occiput,

preventing lying upon it with leckrymation Aching, as from sand Heat and to stomach, with mucus in mouth, extending to smarting. Glutinous sensation in r Gush of lears stomach, with trembling, anxiety and heat in upper or rasing lid, which was difficult. Pupils dilated part of body, nauco, they of water from mouth and White of eye pale red and puffy, cornea dim, pupils dryness of checks, and in stomach, as it a flame small, drawn upward, meensible, the inner vascular streamed out of it, with necessity to open the mouth zone dark brownish-red, vision prevented by photo- Inflammation of resophagus phobia and lachrymation Swelling of lids, with Stomach.—Great hunger, with a lax stomach, hangtearing above brows on opening eyes Inflammation ing down and sunken abdomen Thirst. for cold of hids and nightly agglutination Agglutination of drinks Incessant eructations, empty E Hiccough, r. lids in morning on waking Hardened mucus in r trequent Nausea during the day, in morning, N, external canthus. Pinching in 1 external canthus with shuddering Lidd dry and pressing on yes Heaviness of hids, fitted, with darriess Spannotic contractions, with control of the pressing of ing in orbit, extending across brow and lid, both lids, in I side, with clawing, then constriction of cardiac hot and swollen, the upper hanging down immovable 'orifice, with salt salivation and shuddering in skin hot and swollen, the upper hanging down immovable ordice, with salt salivation and shuddering in skin L brow and temple swollen, red and hot, upper lid Pain in pit, spasshodic pain in S. Bruised pain in hanging down over lower, ordematous, immovable, S. on touch Pressure on I side. Construction from eyes watery, with sticking in them and vision of all sides towards the middle, with salivation sparks. Photophobia; and intolerance of noise. Vis. nauses. Burning, in pit after eating, with pressure ion dim and short. Double V. Everything seems! Agreeable warmth as after spirituous drinks. too large, so that he litts his legs too high All objects appear in variegated colors

Roaring at night. Chirping in r. as of

Nose .- Fluent corves, without specing Stuffed. < r. nostril Discharge of purulent mucus, profuse discharge of mucus, with suffocative biting, extending to frontal sinuses, so that she could draw no air through nose Increased discharge of mucus without coryza In I nostril meffectual irritation to sneeze Sneezing, with fluent coryza and full feeling in head, frequent S . without corves

Face.—Swelling Pale, sickly looking Jerklike vernulion border of lower lip as if he had bitten it

Mouth.—Sticking in last 1 upper molar, in first 1 lower molar Gnawing tearing in teeth on beginning Generalities and Mind.—Starting as from an electric to eat, with chilliness, headache as if shattered by the shock at might when awake Relaxed and tired in the toothache and a screwed-in sensation in brain and whole body Faintness Anxiety; as it he had taken poison Apprehension Quiet and earnest, Q, refect lower molar; in last I lower molar, > biting teeth together, in next to last tive, seeking quiet, inclined to work Dull, listless 1 upper molar, < touch and chewing, P in hollow tooth as if screwed in, with jerking as if it would be torn out, pain in tooth like a boil on touching it be pressed asunder, as from a disordered stoni- Tongue covered with a thick mucus Coated tongue Screwed-in sensation in brain and zygomati, and almost all the concomitants of nervous crethism Much tenacious mucus after midday sleep A membranous pellicle peels off upper part of palate Burning on palate Dry sensation without thirst Salivation, with salt In I side of forehead Vertiginous tearing in I side of taste on I side of tongue, with nausea and shivering F on moving head Frontal pain, r side, above I Taste bitter, and foul, < back part of tongue, after beer that he had relished, T as if mouth were covered with rancid fat, T flat after breakfast, with whitecoated tongue

Clinical.-It has cured toothache, with throbbing pam,

Throat.-Profuse discharge of mucus from posterior Eyes. Sticking extending into inner part Bunq, nares Scraping and rawness Burning, extending

Vomiting, incessant, of watery

Abdomen.-Rumbling, in I, then emission of flatus Emission of much flatus Griping, then a thin stool, Bars .- Aching in open air. Runging, also when with burning itching about rectum

easiness, with heat Emptiness in morning as from ulna. Paralytic pain in wrist on moving it ahum Tearing in I groin as from a sprain, when r thumb, > touch and motion standing Spruned and lame pain in 1 side of pubis Lower Extremities.—Feeling of deadness and coldon stretching limb after sitting, extending to thigh ness in I when sitting, as if it would fall asleep, not lower A

Rectum and Stool .- Burning sore pain about rectum . tum, with urging Hard, difficult Constipation

fund from the relaxed poins. Frequent desire to uri- as if tendons were too short. Painful lameness in r nate, with scanty discharge, urging, micturation by hip-joint on stepping. drops, with sticking in penis, then a natural discharge Sticking in inner knee when sitting. Tearing out-

dyspnea and shortness of breath, then in morning support the body much expectoration (' from burning tickling in

standing, in I when sitting and standing, in I when borng, growing and digging from gum into ear, and with sitting when walking, intermittent S in I when itching and crawling in check when the pain is reheated part Warmth in middle as from hot food

Pulse -liregular 150, 78 in morning

scapula Spasmodic pain in dorsal vertebræ in morn-ling, inflammation, cold gangrene, death with burning in all urmary organs

tympanites. in one spot: flatulent. > resting head rest, tension in joint like paralysis, in morning after yoni almost, in the spot, induction. It can make the section in Joint and spot and the learning are in Joint and the section in Joint and spot and the section in Joint and spot and the section in Joint and the section in spannodic pressing abunder and constriction, > elbow in morning in bed. Sprained pain in r upper turning about, but returning on lying quictly Un-; arm, near elbow, on moving arm. Drawing pain in an emetic. Agreeable warmth, as after spirituous mittent tearing in muscles of I hand. Pinching in drinks. Sore pressure outward in I flank and after muscles of r hand near wrist, < moving it. Spasmicturition, also in r Pinching on posterior part of modic drawing in r hand on writing Pain in ball of

Pain in inguinal region Anxious sore aching in > motion, and on walking internal coldness romains, < leg and foot Weakness on walking in open air

Thigh -Tearing in muscles of l hip, in muscles Fatal disentery Diarrhora several times a day, with about r hip when sitting, in anterior muscles of 1 burning in anus, distention of abdomen and pain as thigh when sitting, in muscles of r thigh when stand-from internal soreness, protuse D, preceded by itch-ing and sitting, intermittent, in muscles on outer side ing in anus, with urging, profuse, with vomiting of r when sitting, intermittent statchlike, in muscles Loose, large S, with tenesinus and sore feeling, as if of 1 hip when sitting. Pain in muscles about 1 hip dysentery were coming on Thin S after pressure, at Sprained pain in hip-joints, S pain near bend of 1 last three hard lumps without difficulty Soft S., thigh when walking in open any, stanting Pain santy, mixed with small lumps, delayed Pasty S., as from a blow in I gluteals on motion Pain in fore-and yellowsis S. at first natural, then termented part of hip as if crushed, only on moving body while and watery Clayer S, preceded by stching in rec- sitting Burning pain at night in bones of hip and thigh, waking frequently Tensive pain on stepping Urmary and Sexual Organs -Discharge of prostatic forward, extending from I gluteals to hollow of knee,

Itching sticking in forepart of urethra ward in knee Legs, sticking in r , hot S in I calf, when not unnating Much white sediment in urnel as with a knife, tearing in I this below knee when Intermittent cutting sticking in glaus when stand-sitting, T in forepart of I leg when sitting, T in mg. Erections at night without emissions or lakery-imuscles of r when walking in open air, sticking T in ions dreams, E without cause when sitting Volup- in muscles near ankle when sitting, gnawing T in thous tiching of prepuce, with discharge of prostatic in r calf when sitting and standing, pain as from a fluid Pinching burning pain in | side of scrotum | blow on outer side of | calf, frequent falling asleep Respiratory Organs - Irritation to short cough in to above knees, with painful crawling in them and inupper part of traches Cough day and night as from ability to move them, weakness as if they could not

Tearing burning pain in ankles, with heat of the under part of trachea, almost uninterrupted dry C, parts Cramp of metatarsus, drawing the toes todiv hollow (' from tickling in chest during rest, hack- gether Cramplike pain in foot, < towards external mg C from rawling in throat Dyspinca as if chest malleolus, when sitting and standing, > walking, were not wide enough, with tensive pain in r pectoral pain in r, heel as if suppurated, when walking in museles, turning upper part of body to right. Deep | open air. Sprained pain in I heel, < walking. Freinspiration hindered by sensation as if I lung were quent falling asleep of feet when sitting, with ma-adherent bility to move them, and painful crawling in them

Chest.—Sticking in 1 on walking in open air, so Skin.—Erysipelatous swelling of check, and vesicles that he must stop, in stermum when sitting and filled with yellow liquid. Red swelling on check, with reading Tensive pain in 1, < turning upper part of Erysipelatous inflummation of face and external head, body to right Spasmodic pressing asunder in lower | < face and head, with great tumefaction and throbbing headache, < forehead and vertex Erysipelas bullosum, with fever. Swelling of 1 cheek, with ten-Back — Jerking sticking Intermittent sticking in sive pain and on touch bruised pain. White swelling one place in the middle when sitting Pinching in 1 of cheeks, feeling ordematous to touch General swelling when lying on back. Pain in muscles, nightly stripes on 1 forcarm, which itch when touched but P in ischia, P in small of when at rest, in 1 kidney, disappear when rubbed, with sensation as of a thin cord under skin. Reddish pimple on chin, painful Extremities.—Rheumatic pains Shoulder, staff on touch Pustules above r brow, itching, and after pain in r < stretching towards the left, tensive pain is cratching exuding bloody water Vesicles filled with in r, preventing raising arm high, tensive pain in r, yellowish serum, with diffused redness Ulcerating, walking but returning with greater violence during boil-chaped elevations. Gangrene and back of I hand. Corrosive? on I thigh; on r. close; been squeezed, in spite of partial sleep she heard to hip; on I leg near knee in morning. Stacking I everything, and on closing eyes large heads appeared on upper arm near elbow. Burning I on middle making gramaces, she woke with chillines over the knuckle of index; on outer side of I. forearm. Tick- whole body, < thighs and knees, then pressure in ling I on r. sole.

Clinical.—It seems to have cured crysipeles of the cheek, of the vesicular variety, with violent fever. Abconses and sryspleatous inflammation. It has been found useful for old torpid ulcers and for gangrene. It is said to be a valuable topical remedy for cancers, and is said to have cured entirely epithelome.

day meal. Irresistible sleepiness during the day cold sponge bath, with pain in sinciput; at 10 and 11 Stupid slumber in afternoon, from which he cannot AM, with emptiness, after dinner, with heaviness of arouse himself Slept with arms stretched far above head and sleepiness, in evening, with bruised pain his head. Sleeplessness, with tremulous tossing about (and fluent catarrh), so that he must be down earlier before midnight, roarng in ears and mability to close than usual, though the headache was < lying, C on eyes
Sleep poor and tossing about two nights, after blowing nose, with pain in nose
wards heavy sleep. Frequent and easy waking, F, but immediate falling asleep again

Dreams after 3

Strking in r side of forehead and becoming eye, extending into middle of forehead and becoming AM, of the transactions of two days previous Anx- a pressure Frontal pain, at 9 AM, > open air, and ious, confused D, without end. Vivid, lascivious, orbital, with photophobia and lachrymation, extendwith emission Vivid, anxious, causing him to cry ing into eyes, > open air, intermittent, at 9 AM, when out, whereupon he wakes

walking in warm open air; C, with sweat, with sen- in forchead (Confusion and pressure externally in sation as if he had not slept all night and were com-vertex) Sticking in r side of brain in brain bepletely washed out, and with disappearance of veins neath r parietal bone, in upper part of 1 side of of hands Cold hands, with heat in face and warm brain, in r side of brain on stooping, in brain, of hands the control of the control with pulse at 86, all day, the clothes are burdensome, in cars, > cold applications, with heat in head and loss with heaviness of whole body as if he had carried a of appetite for dinner Tearing sticking in I side of great load, of face Sweat in morning on thighs and legs, but not on feet; on neck every morning in bed and on rising, in morning, extending from feet over obscures vision and obliges him to press the lids tothe whole body, with heat, without much thirst ('old sweat, on legs in morning

(Euphorbia corollata has proved valuable in terrible attacks of deathly retching and vomiting, with a feeling of clawing in the stomach and with cold sweat, after Cocculus, etc., had failed.)

### Euphrasia.

A tincture is made of the fresh plant (except the root) of Euphrasia officinalis, L.

General Action .-- A "catarrhal" remedy, with special reference to the mucous membranes of the eyes writing, on fixing eyes for a long time vision vanishes and nose

Allies - Sulphur; Puls > cold and open air Compare also Allium cepa, nose and eyes

< adductors of r thigh and last phalanx of the finger on walking in open air, C feeling in r, with lachrywhich carries the thimble and which had been bruised mation, C from both sides, < upper lids, in evening, a few weeks previously, S jumping about in hands, causing frequent winking spine, arms, legs and genitals, frequent S in 1 side. Itching, ot 1, in afternoom on going out, obliquing fre-

lessness till 2 A.M., lasting into the night; as after blind; in morning Sticking in ball. fasting; obliging her to be down towards evening, with Lids -Burning and swelling (Apis, Sulph). <

Itching, with urging to stool, and stool too soon, I jarms were as heavy as lead, wrists felt as if they had stomach as if overloaded Symptoms > coffee.

Mind.—Irritable Reflective and disinclined to speak Indolent, hypochondriac, external objects had no life for him.

Head.-Sticking Aching in morning on waking, Sleep.—Frequent yawning. Sleepiness after mid- in morning, > riding Confusion, on waking, > a

walking in open air, extending into eyes Sticking in Fever.—Chillmess of whole body in morning, C when r temple, externally in l Pain in temples, with heat occuput in afternoon

Eyes .- Cornea feels as if covered with mucus. it gether, in morning Vessels running through white nearly to cornea (therewith a pressure and a dark spot on cornea that had lasted a long time disappeared within two days) Sticking in r Biting at times, biting water runs from them; frequent burning biting, obliging winking at noon, > increased lachrymation Pressure in r, then l, extending from inner cauthus, with lachrymation, the lids seem smaller, pupil dimmer and eye cold, P in r morning and evening, with lachrymation, in r in bed at 11 r u, the dark, with frequent winking as from twinging in eyes, when and eyes water profusely, causing frequent blinking, as if sleepy, as if some one were pressing upon them at 2 PW. > a nap Pain from glare of Generalities.—Sticking here and there, in muscles, light, as from insufficient sleep Contractive feeling

of head, liver and spleen (wherever there was sticking quent winking and wiping of eyes, with increased luchrymathere was a sensation as if warmth penetrated), S tem 1tching tension, now in one, now in other, < and burning pain in I. scapula, liver and diaphragm, upper lid, becoming a burning on scratching Burnin the latter, especially, removed by deep inspiration.

The latter, especially, removed by deep inspiration in ing till noon, with lachrymatton; < \(\tau\), and the letters Pain in adductors; Further state of the Weariness; in morning, during the day, and sleep- from loss of sleep Lachrymation, so that he was almost

heat of hands and rapid pulse (as she thinks), upper morning on waking, till towards 11 A.M. with misty

ing for Euphras. 18, accord and 18, according to the acrist, making the lids somewhat sore, the margins of the lids even may become ulcerated, there may be hurming lackrymation, or the dacharge may be thek and yellow and somewhat acrid, one very prominent characteristic of the drug is the tendency to an accumulation of stucky mucus on the cornes, which is removed by frequent winking. It is found useful in a large number of cases of requent winking. It is found useful in a large number of cases of the corner of the asterized by free discharge of matter which seems to be acrid, heat, gradually affecting the whole body making the lids somewhat sore, the margins of the lids seem may Abdomen.—Distention before dinner, as without discharge from the nose is generally quite bland. It is said to have cured inflammation of the cornea and even ulceration with

sation as if hot water penetrated it. Tension in 1 along l inguinal canal on rising from a seat, extending Dragging outward and a spitting noise

Nose.-Swelling of mucous membrane of I nostril discharged through nose and posterior narce, irritation when sitting Painful crawling in evening to succe all day without cause Profuse fluent corves in bath, with pressure in forehead near root of nose

sticking Sticking in chin, with internal heat in the first, then pasty Scanty Profuse and formed, twice same place Sticking through r lower jaw, S forward, a day Delayed Omitted two days through I lower jaw at noon when cating, hindering touch Drawing pain transversely across upper jaw night Urine increased, and pale Urine scanty Drawing in a lower jaw in afternoon, with indications of aching in r car Excoriations in corners of lips

vision, next day with redness, B. and S. of margins. termittent pain in a molar which had been sensitive Redness and swelling in forcing with burning and several months (Throbbing in two teeth) Protension in r ball, R. and S. of margins (Sulph), . l., fuse bleeding of gum. (Inflamed swelling on gum with intermittent stehning burning in them and increased near last molar, which had been loose and painful for bathrymation Reluces and dryness of margins Swelling weeks) Pain in 1 lower gum on rising, where there and sandweeks Frequent inclination to blink. Blink- is an inflamed ring around incisor. Tongue coated in ing during the day as from twinging, B in morning, morning, with earthy taste. Hesitation after the twinging pain in e.es. Pressure at 11 P v., in bed on periods in order to select another expression, and repe-looking at the reflection of the moon on the curtains; titten of the first words. Dry mouth Taste clayer by neess. Burning in margins (Sulph), < forenoon, T in sipid. Unnatural T to food at non-Bitter with widdles unabling. (auth), in morning on waking, T to tobacco-smoke in morning Tsthmus faucium

Stomach .- Hunger at noon without appetite Dry mucus in canthi, in inner Sticking in outer petite lost Little A for dinner, and breakfast, with C with burning, then lathrymation Fressure in I pasty taste. Little reliab for cigas No reliab muce C in IC with seems protuded and cold, for cigars Thirst in evening Eruckitions tasts with sticking in ball and pressure in I. Frequent; jing of food; in afternoon, E of food in after tching burning in I C, with tension above both eyes noon Hiccough Nausea, on beginning to smoke, (at noon, with migraine) Tension in outer C Pain from tobacco-smoke, which has a bitter, biting in upper orbital regions at 6 PM, > lachrymation, taste, - a swallow of water, with emptiness in distance, when walking in open air, D in evening, epigastric region, beneath pit of stomach on inspira-of r eye, - after a stocking from forehead out of r tion and expiration in evening when stiting Ghaw-eye, by candid-hight, sometimes the hight seemed to ling at noon after eating Pressure, as from fulness.

with frequent empty cructations Distended feeling, > Clinical.—Conjunctivitis, the inflammation of the eyes call- afternoon, with frequent cructations of food Discoming for Euphras, 14, above all, catarrhal in nature, subscute, char | fort, increasing in the room to nausca and uprising of

flatulence Rumbling at 10 30 AM, with hunger that was satisfied with a bit of bread, R. as from hunger and emptiness Griping (in the morning he had had a difficult, unsatisfactory and delayed stool), G, with three soft stools and rumbling, G waking at night, and rumbling, emission of flatus, paroxysmal G more cures maximum on on the cornes and even interation with and running, semission or mater, paroxysimat to be being smarting tears, mining from nose, etc., and various [Pain, burning, extending transversely across Disforms of superficial inflammations of the eyes and lids are treated trees. Stacking in hepatic region at 6 r.m., extending the back, S extending sometimes to abdomen, sometimes (it is even reported to have cared into). times to r lung; in spleen in morning Griping in Ears .- Sticking, in r mastoid process Boring umbilical region in afternoon, G, with nausea, then outward in region of r drum Pain in r, with sen-rumbling in abdomen Sudden sticking drawing pain into testicle

Anus.-Swollen and tense hemorrhoids, sticking in in morning Dryness Itching in nostrils Sneezing, H. after stool, with burning, pain in H, burning in (frequent, with discharge of much watery mucus), H in afternoon, also > cold sitz bath, itching in H, with profuse fluent coryza, whereby much mucus was the itching in H becomes boring sticking Pressure

Stool.-Diarrhoea three times in a day morning, with much cough and expectoration; fluent part in evening, after a nodular one in the morning; C at 5 AM on waking, > at 6 after a cold sponge P., thick, delayed, preceded by flatulence, with urging, followed by burning in anus Constitution Hard Face -Redness and heat, of cheeks Pallor Pain and scanty, and at an unusual time; II and sluggish; in facial nerve below eye in afternoon Stiffness of 1 H and difficult; H nodular, unsatisfactory, delayed, cheek when speaking and chewing, with heat and followed after two hours by itching in anus; H at

Urmary Organs .- Frequent urging at night. Frechewing, forward beneath r lower, near throat, > quent macturation, in evening, with profuse urine, at

Sexual Organs.— Cramplike drawing inward in evening in bed, with pressure above pubis Sticking Mouth and Threat—Stocking in lower teeth, S in on tip of glans, voluptious itching S on glans when sita hollow tooth in afternoon when walking in open air, ting, painful after scratching Voluptious itching on entering warm room, also in r lower jaw In- margin of prepuce, and after scratching and pressure shorter than usual

difficult, even in the room; inspiration is difficult even standing, with heaviness with sohbing

Clinical.-It is sometimes indicated in acute colds with

Chest.—Sticking in r , in r pectoral muscles , in always renewed by deep inspiration, beneath sternum, itching over whole body Heart.-Sticking tion Palpitation on rapid walking

Bock—Steing along spine mornings on waking,

Bock—Steing along spine mornings on waking,

moving about Champlake pain, internittent Pain rhal simplons of measles, inflammation of cycs, photophobia, when sitting and walking. Rheumatic drawing from goody, running from the nos, headest, etc. disappearing in evening

ally almost febrile condition

incon, extending to impose Arine issuep state in the property of the property cramp, on going out. Deadness of r fingers

pain. Heat in glans Testicles drawn up and crawl- Lower Extremities.—Sticking in r natis; in 1 hiping in them Menstruation delayed, scanty and joint when walking; in anterior muscles of r thigh orter than usual when standing, posteriorly in r thigh when standing, Respiratory Organs.—Irritation in largest causing in fascia lata of 1 thigh, with burning Sticking cough, then tension beneath sternum. Pressure in larynx drawing from upper part of thigh into groin, sitafter prolonged reading in evening as if its calibre ting. Pain in adductor of r thigh when walking. were diminished Hoarseness in morning. Cough, corresponding with the pain she had nine months preduring the day, with mucus in chest which cannot viously, when she pushed with the foot something during the day, with mucus in clear which calinot viously, which and passed with the foot sometimes be loosened, profuse expectoration of mucus by volum-istanding on the ground. Burning pain in r thigh tary hacking cough. Sudden violent O from inching in and gluter Jerking stecking in I knee on walking arying Suddensity waking from midday Tension of tendons under knee when walking Wearnap (apparently from mucus in posterior nares), so ness of knees. Boring stacking upward in this Pain that homist at upright and cough. Breath lost when if drawing upward and downward in periods unit from the thing the state of coughing, almost as 1st whooping cough. Respiration of l tibia when sitting. Cramplike pain in calf on long Cracking in l external when sitting Breath short; on lying down in bed, malleolus when stepping Tension from outer malleolus, near tendo-achillis, to calf when walking and sitting Sticking in heel in the beginning of the night . CHinical.—It is sometimes indicated in acute conq wind frequent S in ball of r foot in afternoon, becoming a cough associated with severe corpy and running from eya, the cough begins in the morning on rising and continues through its burning when sitting in lancinating S in L os calcius at day, not irreduling the patient a majit, in some case the cough is 6 r is when sitting. Numbness of 1 foot, with an uniform the control of the control Tickling crawling in 1 toes and after rubbing pain.

Skin.—Pustules on wings of nose. Formication belungs, l. lung, in r lung in region of nipple at 8 PM, neath 1 scapula in afternoon Frequent biting and (Sticking in the condy-< inspiration Sticking pulsation in I lung in region lomata when sitting, < walking, with sore and of mpple. Pain beneath sternum, < forenoon, with stick-burning pain when touched) Itching sticking here any here and there in chest Pressure upon chest Ten- and there at night, with tossing about and coldness sion, < 1 side at night, with sleeplessness till midnight (Itching in condylomata) Voluptuous itching on r Pain in afternoon, with palpita- calf in evening when walking; on forepart of thigh when walking in open air, and pain after scratching

uppermost dorsal vertebra to I clavicle in atternoon, Sleep .- Yawning, when nalking in open air, with with pain on touch. Heaviness in small of back in sleepiness, but inability to sleep, then nausea, > a morning on rising, changing to sprained pain, so that glass of water, in short, then in long attacks, frehe could hardly stoop forward and could not bend to quent, at 5 PM., frequent, with sleepiness, sleep only right, > forenoon, extending into l. hip, where there about 11 PM, incessant, in evening, without weariwere similar heaviness and straining, > dinner and loss, spasmodic, before she had completely yawned a second yawning began, without weariness, with lach-Extremities.—Weariness in evening, W and gener-trymation, humming in ears and pulsation in throat, then indistinct vision in leve Desire to stretch when Upper Extremities -Sticking in r shoulder-joint in sitting and reading. Sleepiness during the day, in afternoon Stacking in arm Pain in r arm in after- afternoon, early in evening, with activity, which noon, extending to fingers Arms asleep Stacking begins in even, overpowering, in afternoon over-

veins, the pain extending to middle finger and thumb, frequent W from leverish dreams, with chilliness, frethen suddenly jumping to larynx, < to I side, then quent urging to urmate and copious micturition suddenly returning to hand. Tearing in elbow and Waking every moment after 3 A M for three mornings, wrist Sticking in I, forearm close to wrist Pain in then stupid sleep at 6 AM, on waking from this sleep r. forearm and hand as from being asleep Cramplike pressure on upper part of chest, heaviness of head, pain in wrists Paralyzed sensation in r wrist, ex- nausea, general sweat, vertigo, < motion, even to falltending to elbow. Sweat at night in sleep, in disabling of the face and head and habits to violent headaches, sleep, waking, of strong odor at night in sleep, in anemia the extremities are generally cold, and the feet and < chest, on rising chilliness Distressing dryness of hands often swollen.

### Ferrum.

Pure Iron, reduced by Hydrogen, is triturated for use

various preparations of iron for febrile and inflammatory states has been greatly neglected

Generalities .- Emacuation Trembling, in frequent attacks, anxious T, alternating with fatigue Blood darker, corpuscles intensely colored, more colorless corpuscles, coagulating in a shorter time, darker, corpuscles intensely colored, sharply margined, more and larger colorless corpuscles, fewer elementary corpuscles, longer in coagulating, serum darker, corpuscles deeply colored, colorless corpuscles smaller, longer in coagulating, serum increased in one case, diminished found anemia. in four, dired serum diminished ashes of serum inincreased in three cases, diminished in two, dried torn, in morning slumber creased in two cases, diminished in three

Periodical pains lessness

felt at beginning of menses disappeared, < towards sticking evening, with falling asleep, with drowsiness and Emptiness. Heaviness; in morning on waking; disinclination to talk or work, with aching in all with stupefaction in forchead and pressure in temples;

of fires and conflagrations from lightning Confused ling, by motion, heat, eating, drinking water, conversation, the sight of any person, even the dearest Fever -Chilliness, internal in forenoon, but in noise, the sound of voices Amelioration from gentle

Mind.—Wandering and discontented. Excited by the slightest opposition Anxiety, from slight cause, with throbbing in pit of stomach, with alternations of trembling and weakness; as if she had done something General Action—Iron acts chiefly on the blood, had, also at night, with sleepieseness and tossing producing more rapid oxydation, with rise of temper-labout. Depression before menses, during menses, ature, at first an increase of red color (or of red with excitement, after menses, when alone, but corpuscles), but subsequently a dimmution of red without complaints or weeping, (as from too loose corpuscles and profound anamia. The use of the bowels) Ill humor; after menses, with disinclination for labor; with indifference, also periodically Sober and uncomfortable, but not gloomy. Quarrel-Allies - Cinchona, Bell, Mangan, Phos, Puls, Lyc some, insisting that he is right. Disinclination to talk or work. Desire for solitude Too gay one Blood evening and sad the next My surroundings seem large, and I am inclined to attribute great importance to trifles and am unusually earnest Dulness and heaviness all day Stupor, with headache, S vertigo Indisposition to think and confusion of head Memory weak.

Clinical.-Hypochondrissis or even melancholis, with pro-

Head .- Shooting before menses, with singing in creased in four cases, diminished in one, coagulum ears. Intermittent tearing. Aching as if brain were Aching all day, < in coagulum increased in two, diminished in three, ashes evening, < on r side of forchead, going down to r of coagulum increased, red sediment increased in nostril, in afternoon, with fever, every evening, with three cases, diminished in two, fibrin increased in dulness over root of nose, in evening after a walk in one, diminished in four, water increased, dry residue the open air; after menses; from writing; < when diminished, fat increased in two, diminished in two, walking or stooping, > when sitting, > towards soll salts in ashes increased, iron in ashes increased in evening during a foot bath, but soon returning more one case, diminished in three, calc phos in ashes in violent than ever, with languor and stiffness of head; with coryza, extending into nostrils, acute, then Wandering about at night on dull, > towards night, with stupor, intermittent, account of pains Magnetized sensation on waking, during the day, undulating, drawing. Sick headache irresistible sleepiness. Nervousness, after menses; after menses, with hot head and cold feet; sick H. a few for three successive monthly periods, with headache days after menses, which, till within six months and various veins in I ankle, and hysterical feeling, (after Veratium), always preceded or followed menses, pronouess to weep or laugh immoderately, with chok- this time with throbbing in vertex as if a vein were ing in throat as if it were swelling outwardly. Rest- too full, pulsation in stomach extending through asophagus, as if a nerve were quivering, causing at Weakness; all day, with sleepiness, by day, with times a sensation of suffocation as if something rose in sleepiness (little > by sleep), in afternoon, general, the throat like a valve, hysterical sensations. **Ham**from muse speaking, from walking, walking in open mering and beating, so that she must lie down, for air, during menses, at beginning of menses, > ex-'two, three or four days every two or three weeks, then ercise, with mental depression, and the pain usually aversion to eating and drinking. Pulsations, with

limbs, periodical, then persistent (after increase of with fulness, every pulsation is felt in temples. Fulphysical and mental energy), < walking. Tired ness in afternoon; F, > sleep Dulness in mornaching as from lying long in one position. Inclinating; on waking, as after a wakeful night, with heavition to lie down Syncope, when walking, darkness ness; at 8 AM, gradually > towards night; with before cycs, feeling as if she would have apoplexy and heaviness of eyelids Confusion; > after motion, with at every step roaring in ears, then weakness. aching in one or other temple, as after a sleepless night.

Aggravation in evening, A by sitting; when stand-Congestion Rush of blood, swelling of veins of head, and flushes of heat in face (Bell.) toxication A giddy shock in brain walking, on descending (see Mercurialis), as if she orbit would fall forward, as if everything went round with her, brows, extending into nose tration and lethargic dulness, then sleep from which other when reading or writing it was difficult to rouse himself, two attacks of V in afternoon as if balancing to and fro on water, on ly- with violent palpitation, extreme nervousness, etc. ing down, as if shoved forward or as if driving in a coach, > shutting eyes, with cold hands, with stupor, restlessness and inability to apply the mind Symptoms, except the fulness, > after sleep

Forehead .- Sticking over 1 eye, S. inward; cutting Prickling in I. sinus, then in r, changing to pressure, > at 3 PM Sharp pain over r. eye Pan as if it Nose—Numbness and stiffness Spasmodic sneez-would burst Pain all day, with cold test; P waking at ing four times at 1 PM. Watery discharge all day, 130 AM, with rumbling and gurgling in abdomen, with dull headache Bleeding in morning on stooping, over eyes, over l eye, with lachrymation, in eminences profuse B in morning after rising, relieving the head, in morning after dressing, then extending over forehead to dropping from r nostril in forenoon, B from I nostril vertex, then changing to pressive pain from without inward, < descending stars, transently > pressure, decidedly > in open air, changing at 2.15 pm to dull pressure, > pain. Pain above I. brow, towards nose. Dulness and heaviness in forepart of head. Heaviness in F. and over eyes in morning

Temples —Sticking; as with a penkinge, waking at 3 | Clinical.—The face is generally bloodless, often puffy, but AM, extending over forchead, with childrens, preventing with the headache it may be flushed and hot sleep Pain, > lying quietly, P extending over forchead Heaviness Pulsation

Pain in vertex, waking at 2 15 A M., < every change of position and preventing sleep till 4 A M., throbbing P. on moving suddenly or quickly ascending steps, peculiar pain in cool open air Soreness in vertex, < r side. Shooting in I side of head in afternoon. 1-sided headache, all day, r-sided, with itching in eyebrows and nose Pain in occiput and neck at 8 AM. gradually extending to forehead Periodical beating pain in occiput and neck, gradually extending to sides and forehead, < moving or stooping from car to car Heaviness in occuput in afternoon Falling of hair, with pain in scalp and formication Pain in scalp as if blood were extravasated, with pain on touching hair Soreness of scalp, < in front Itching

Clinical.-So-called congestive headache, with violent throb-The season of the season of the season of the violent irrolent irr

Eyes -Redness, with burning pain White of eye discolored: vellow. (Shooting in 1) Aching in r. with agglutination of lids at night, A as if sleepy, A as if they would protrude (Bell.), < r Burning Itching in evening and aching as from sand. Weakness, with lachrymation; and watery discharge from nose Lachrymation so that he cannot read long; L of l eye, < open air Pupils capable of only slight dilatation. Redness and swelling of lids, on upper a stye, the lower lids full of hard purulent mucus Lids heavy; in morning. If he writes two hours he cannot especially for meat; can eat only bread and butter, meat

Beer rises to head. In- open the lids wide, the eyes are watery as if he had Vertigo, when not slept enough Stacking in external corner of ralls), as if she orbit Pain in 1 orbit, with heartburn Pain in Darkness before eves in on looking at running water; on sudden rising after evening, with pain over orbits and dropping of blood sleep in the afternoon, with sensation as if a dark cur- from nose, D, < rising from stooping. Inability to tain were slowly let down before the eyes, nausea, prossee the stitches when sewing Letters run into each

Clinical. ... Morbus Resedown after suppressed menstruation.

Ears -Sticking in r. in morning. Ulcerative pain in I external Ringing in r Chirping before E like crickets Rushing, > laying head on table, with disagreeable feeling in brain

### Clinical.-Fetid discharge from 1 ear.

### Clinical.—Nosebleed.

Face - Yellow Flushed and cheeks burning, when towards 8 Pm, also lasting from 4 to 6 Pm; in emi-nences, then in whole F Studden intermittent pum pasty Earthy and spotted blue (Pale, with rumbling over l'eye Pulsating, tickling pain, and in head, in abdomen, contraction of chest, congestion to head, Drawing pain, with hot head and cold feet, sharp D spasmodic cructation, then heat in face, < r cheek, and shooting on crown ) Expressions by turns melancholy and fretful Pinched Swollen feeling Laps pale, and dry

Mouth - Toothache all the morning Tooth back of r eye-tooth teels clongated and sore Gums discolored (Gums and cheeks swollen) Tongue coated white, and mouth dry, taste bad; and taste slimy, without loss of appetite, T white, T coated yellowish-gray, T red at tip, coated, white anteriorly, yellowish-white posteriorly, T more natural after eating, sticking posteriorly and in centre of T, < touch of food and drink, but when not eating or drinking the part feels burnt, numb and stiff Mouth dry in moining Taste dry to all solid jood as if it contained neither juice nor strength, he likes warm liquid food best, T bitter to all food, T like rotten eggs, putrid T rising into mouth in afternoon, taking away his appetite, earthy pasty, of iron constantly, (sourch in morning), bad on using, improved in morning by drinking cold

Throat -Rising of phlegm, Pain on swallowing, with heat in fauces and stiffness and pain in cervical muscles on movement Soreness, not painful when cating, S, with dulness and heaviness all day, (with Choking. roughness and hoarseness) Construction Sensation of a lump below l tonsil, painful during empty swallowing, > when eating and drinking. (Sensation of a plug when not swallowing) Tickling with dry cough, then a spoonful of bright blood came Burning, with eluctations of acrid gas (On swallowing pain in esophagus and soreness as after the bursting of a blister )

Clinical.-Gottre, with protruding eyes, palpitation and

Stomach .- Appetute great ; in evening, diminished; little,

disagrees with him, even when she has A. she can eat griping, fulness and tension, > emission of flatus and but fulle, she is mmediately full and the food op-presses her Anorexa, dishke for all food (Dinna), when stung up Nosy flatulence Discharge of A without bad taske or this X, A for he shouge feels full, flatts; frequent and offensive, after rising in morning. but drinks are relished Thirst after the day sleep, T after dinner, for he knows not what, T at 3 PM between the chill and fever, in evening after chills

able, in evening Adiosia feels drawn together, sour and acrid; profuse, on tak- and a bad vapor and putrid taste rise into his mouth. ing acids and beer

epigastric region Spasin (Campille pure Pann, in Fattus in r side when riding in a carriage soon pass-pit, in pit at 2 × N, after every med), after eating ing off from pain in 1 side Pithiess in hypo-meat, after drinking, in pit on touch Feeling as of; chondria Shooting in 1 hypochondrium Crampa hard body or of undigested food, then burning and like sensation in splenic region. Pain in liver, in r acrid eructation Oppression whenever she eats Painful hypochondrium; in splenic region, with heaviness contraction of everything at pit at 6 AM in bed, then Flatus in lower A, mearcerated in 1 side, and copious spasmodic cough, with mucous expectoration Tenermissions by mouth and anus. Rumbling and guigsion, in epigastric region, with rumbling, becoming ling in transverse colon, < in carcum pressure, heaviness and griping, extending over abdo- A men, < morning and evening, at times with nausca Feeling as if he would vomit, without nausea Feeling as if something rose in it

> after eructations, in epigastric region, also with stool fulness, with indigestion, with cramplike pain in tuiness, with indigestion, with cramplike pain in spleme region, with general unpleasant feeling, being cardes with itching unput appetite, flushed face, etc. febrile symptoms, with soreness and languor of limbs, indigestion and eructations, the heat in S < before the cardiac extremity and in splenic region

stook with griping, pasty taste, dryness of fauces and less. Mucus and sometimes blood with the S. Scantv. nausea, with soreness, with gurgling as before diar-fricea, but stool normal, with headache, waking, with (China), as a role paintes, recurring particularly when eating or

Movement as before diarrhosa, but stool natural.

Sticking. Sharp pain; and bearing down in uterus, with aching below it. Pain : in morning after rising, < and fever, in evening, then heat and sweat; unquench-eating, > stool, after midnight, then diarrhoea, at 230 A M , and urging to stool stool free, loose, with griping, Eructations, constant, as soon as she cats (Ant cr, cutting and straining, nausea, disagreeable taste, > Phos, etc.), of pool after cating, without nausea, acrid, drinking cold water, at 6 A M another loose, brownishacrid and burning, foul Nausca on rising; N in yellow stool, with colic before and straining during forenoon, at S PM, with flushes over whole body as stool; in attacks, waking him, > emission of flatus and before sweat, at night, with diarrhora; after eating, profuse stool, flatulent, and emission of flatus; paroxbefore and after eating, when walking, and head in-vernal drawing P, bearing down, in morning, as bechied to right, with vertino, in throat, ending in cructa- fore menses, contractive, and in back. Soreness as if tion Heaving like the nausea of disgust, when eating beaten or as after purgatues, on touch and on coughing.

Vomiting of food after midnight, then accretion to food Distress, < in opigastric region, increasing to a pain on and dread of open air; V. of food immediately after eating touch, > walking Discomfort increasing to a sick (Lyc, Puls), V before midnight, < when lying, feeling, with bitter foul cructations and griping, then especially on I side, on eating having the taste of copious, for the most part liquid stool Tension. ron, or else of clear, frothy water, of mucus and Warnth, < in epigastric region, > walking, with press-water every morning and after cating, a kind of water- ure, tension and griping in abdomen; heat rising from brash, water runs out of her mouth and her throat A after sleeping an hour before midnight, mouth dry

g acids and beer

Sharp pain in upper A and pit of stomach PressDistention in regions of S and abdomen, D in ure just below stomach as soon as she cats or drinks

Weight in lower A, < walking Rectum and Anus .- Protrusion of large hæmorrhoids Violent hemorrhoidal flux. Ascarides are passed with the slimy stool, itching and gnawing in R Heaviness in pit Fulness, as if he would cructate Spasm of R Tearing in R, in anus, with hard stool after walking, > after cating Drawing in epigastric Urging, then frothy stool, with loud flatus, then three region Discomfort after overy nical; D, > after watery, almost odorless stools, then griping in pit of duner, with bitter cructations smelling like foul eggs stomach, but relief of the full feeling in hypochondria, Occasional uneasiness in I extremity Heartburn, in frequent U, with burning in anus and pain in back on evening after sourish beer Burning after eating , B , moving Straining at stool all day , S , with and after

Stool .- Watery, with flatulence, and frequent, more after eating, upward from pit during exer-frequent after taking food or water (Color, Crot t); W cisc, like apprehension she must lie down Sensation and sudden, without pair or smell, W and profuse, with extending through or sophagus. All sensations are at cutting in abdomen Diarrham, frequent, violent, with nervous spasmodic pain in abdomen, back and anus Clisical.—The patients may have ravenous hunger, but the Condeptiton, and hiemorrhoids which cause pain in Appetite sometimes vanishes and thereis absolute dayant for food, groung to stool, S. only every two or three days, freappetite sometimes vanishes and thereis absolute dayant for food, groung to stool, S. only every two or three days, freappetite sometimes vanishes and thereis absolute dayant for the strong on the first food of the data food with follows, there we often soweroes of the walls of the ablonem: In and pieces, with straining, at first brown, then greenish Abdomen -- Distention , and hardness , without flatu- or greenish-black, only once a day was there a copious lent symptoms Rumbling, all day, with pain in soft S., hard and delayed; hard, greenish and black, small of back and kidneys and soreness in urethra on afterwards copious pasty stools, partly hard, copious, urmating, at 1 30 v M, with gurgling, in evening, with generally delayed, greenish or greenish-black; hard soreness and feeling as before stool, > after a copious and soft on alternate days Black Yellow. Odor-

drinking, especially spit to receive at might; with the diarrhoes there | tenacious mucus, mixed with black blood, frequently instrumed hungar, with easy finding of the face, great will 4 r.M. Tockling in traches, causing frequent cough, gualing, valency, painles, < laight, with colders of the body and : inspiration. Once admost extend, ulterance difficult and great proturtion. Diarrhoes in teething children, stools undergreatly with children associated with from thing, both control of the contro

Urnary Organs.—Pan in bladder Urging, constant, expectoration on waking Coughing up blood in morn-wath pain in twee, chest and kidneys, south tacking in ing on runn; at night, then increased dyspinous, while in avientlar extending to neck of blooder, beginning with tacks uscleding the child. Hemophysis Expectoration sently, ling in navicular fossa, obliging frequent micturition, then, frothy, with streaks of blood; it, of bloody mucus with tenesmus rect in evening Involuntary materia by hacking Copious purulent E in morning (with ton < by day (Bell), at night (Puls), slight, when putrid taste), on waking, and greenish, with suckly standing Frequent micturition. (Gonorrhoa) mu-taste, copious, purulent, white E after coughing, < cous discharge from urethra after a chill Soreness of smoking tobacco and drinking brandy weether on unrating Technique and unrating the state of t the whole urethra, afterwards with frequent urging when he walked a little, sometimes < when walking the whole uretars, atterwards with irequests organic when he wanted a fittle, sometimes ~ universal water waters without increase of urine. (Burning in urethra on in open ar, with wearness of limbs, from heaviness urinating) Urine copious, with prostration and in I lung, and slow breathing, by whatking and nervousness, C wincy-glow or reddish, sp. gr rose; talking or by constant reading or writing, < when from 1005 to 1025, reaction acid. Turbid U Dark quiet and especially when I ying, particularly in evenyellow U Blood-red, charged with blood-corpuscles ing, he must take several breaths before he can fill the Light-colored U, with whitish sediment Sediment in lungs Suffication from quivering and pulsation in U , profuse, mucous

day, the child wets himself even while walking, also nocturnal chest enuresis.

Sexual Organs.-Tickling of glans between 8 and 9 AM and 6 and 7 PM, with warmth and irresistible desire to urinate, when the urine reached the glans oppression of chest and difficult breathing, may be compared with distressing pulsation, which continued after micturi- those of Phos , Fer. is certainly extremely useful when the chest

against a fulfilly could be supposed in the supposed of the supposed in the su smarting and soreness Discharge of stringy mucus from uterus before menses, with sensation in abdomen ility without abortion conjous.

Clinical.-Great sensitiveness of the vagina to coition (Sep.

Pain in larynx provoking cough and hawking, < press-transiently by drinking use, in morning on waking, but at non giving place to a similar sensation behind upper third of sternum, Tension in precordial region. Stool.-Light vellow diarrhora morning and evening,

Urmary Organs .- Frequent and profuse micturition, urine light, of sweetish smell, F and P micturition, with pain in whole urethra Pain in urethra in evening during frequent but scanty micturition, P in urethra, on unmating, then in the whole penis, in methra during micturition, with soreness and with frequent desire Prickling itching in urethra. Generalities .- Pain in and between shoulders, in forepart, with frequent urging, but little urine at a day, with weary, bruised sensation in all limbs, < |eps and especially in rectum Sensation in morning as it and calves; all night, with bruised sensation; with urnne remained in fossa naticularis and could not be deleptiness. Indelence in evening, with sleepiness and forced any farther Urne dark; with a thek white bruised feeling in limbs, < calves

tion waking him, with pain and burning in the whole | Generalities, -Malaise all the evening. Weariness urethra, but mability to urmate from tenesmus of in morning on waking, at 1 P.M. (not having eaten neck of bladder, though there was a violent urging since breakfast), with desire for brandy.

Clinical.—Uterno congestion, with great bearing down, with feeling as if something sore were being pushed up when sitting down Uterine displacements, retroversion and prolapsus, with atomy, difficulty in retaining urine Suppression of menses

gravish-white, tenacious mucus drawn out in threads, irritation in atternoon to cough and to expectorate, ure beneath sternum.

from 1 upple to arm at 11 AM, < pressure, returning frequently in afternoon and evening Intermittent evening, > sleep sharp pain Pain in sides, in evening on respiration. Congestion of lungs

Pulse.-Rapid

Back .- Pain in small of, and in kidneys, < evensmall of back and kidneys

tion and great aversion to moving. Paralyzed and hips) bruised sensation, < legs, in r arm in evening, with bruised sensation, < legs, mr arm in evening, with

Citnical.—Symptoms of meningins of the brain, suffused
wearness, so that he must stop writing
Rheumatic eyes, full, soft pulse, with dressness and heavines.

Rheumatic eyes, full, soft pulse, with dressness and heavines.

Rheumatic eyes, throbbung, followed and by noe-soleed Violent headparalyzed feeling in r upper arm and r shoulder schess during menstration, the head is extremely sensitive to pain

Rhuised haracter feeling in thinkin extradions to Bruised, paralytic feeling in thighs, extending to knees, which are heavy, the legs feel much lighter in proportion, in the afternoon this paralytic sensation pelvis

Sleep -Sleepmess in morning after a long sleep at headache above periosteum of that side. might, with no desire to rise Frequent waking, with urging to urmate and pain on nucturition Restless the external ear, with muco-puriod discharge, ear red and swolnight, with frequent waking, many dreams and easy len, masted process swollen and sore erections, R sleep, with dreams of long-past events. Nose and Face.—Laps blue after a tepid sponge bath, Dream that I had grown very large and was from Grumbling in I lower jaw, near filled molar. Smartthirty to fifty feet high, everything about me seemed small and insignificant, the bedstead was too small sage a inspiration, expiration, and short, and waking with a paralyzed sensation, and hands and feet could not rest Dreams of thieves on tongue, with yellowish unt increasing towards the and of fighting with them, waking him D towards base morning that he met many acquaintances, each of mucus whom complained of a different indisposition

Fever -Coldness from 9 to 10 AM and again in afternoon, C at 10 AW, after 12 the pulse was 84, with sleepiness and soreness in small of back and kidneys, about noon, some fever at 3 P v, then rapid head, H in afternoon, H without sweat

# Ferrum Phosphoricum.

The pure Phosphate of Iron is triturated for use

Mind.-Hasty, intolerant feeling in afternoon petuous feeling in evening, yet obstacles cause hindrance and annoyance and trifles seem like mountains, intolerant of hindrance and annoyance Annoyed at Respiratory Organs.—Cough, with expectoration of the conversation of fellow-passengers in street-car, < when earnest or excited. > afternoon Shrinking and timed at hearing cross words about an absent stranger with much mucus in throat Short breath, necessity Soothing, pleasant effect from walking in a quiet to take a deep breath, oppression of chest and press- part of the city after dark, ceasing on returning to the bustle of the central streets Inertia, indifference to Chest -Sudden sharp stacking, extending outward ordinary matters, craving for brandy without real muscular debility Loss of courage and hope early in

Head .- Feeling as from insufficient sleep, fell asleep and deep in abdomen and in region of spleen (where at my table at 430 PM Pain all day, < r side, < it was more like a stitch) Oppression, anspiration, first thinking of it, P from r brow to r, ear when O, more in upper part of lungs; O, with expectora- reading, in r side. Sharp twinges of pain over tion of thick yellow mucus, with necessity to breathe whole I side at 11 PM, from r vertex to r supraor-deeply, which caused soreness, as from a weight bital foramen in afternoon. Aching dulness extending from vertex towards orbits and sides of head as a pressure, < holding head down when writing, > when walking, but when walking in the street more in evening, and extending farther downward . in occiput, and when rising, walking, etc., most in vertex, lumbar vertebre, extending to lower part of spine, as the force of the circulation most impinges, it always seems in subcutaneous cavities. Pain in posterior Extremities .- Painful drawing in tendons on back part of base of skull in afternoon at every concussion of r hand and 1 foot Weakness, with bruised sensa- (as of coughing or even sudden and hard smacking of

Eyes and Ears.—Smarting in edges of r lids Neuralgia at 1 inner brow and down 1 side of nose, in extends into calves, even r tibia is painful Rheu-evening when riding Sharp aching at outer edge of matic pain in back of I foot in evening, extending to 1 orbit, as if in bone, at 730 PM, on r side at 830 Sticking in r ear, oh going to bed, extending as a

Clinical.-Encysted tumor of the eyelids Inflammation of

ing in r anterior nasal passage, r posterior nasal pas-

Mouth and Throat.-Increase of the usual light coat Liberation of pharyngeal, tracheal and nasal Working down of phlegm behind yelum palati, also loosening from below

Clinical.-Sore throat, catarrhal affections of the Eustachian tube and ears, especially in singers.

Stomach.-Indifferent to food on sitting down to pulse, next day ( between 12 and 1 with sleepiness, supper, but ate heartily Thirst for cold water and for at 3.30 p. u. rapid pulse with heat. Heat beginning at braindy in morning, for braindy on rising in morning noon, 3 p. u., with hot skin, ~ 4 p. m and pulse de-after studying till 2 A m, took a teaspoonful with good creased, skin moist and profuse, sweat only on fore effect, for ale at 1 P M., at 3 P M no desire for dinner but for brandy, if he took a teaspoonful, he then ate with relish, the same desire before breakfast Irritating, greasy cructation Hiccough at noon after sitting bent towards the floor; H. when respiration compressed the stomach and afterwards. Nausea in morning on rising. Heartburn at 9.30 P.M. when sitting bent for- | Clinical.—There may be hest, with quick, soft pulse, thirst ward reading, with eructations causing coughing and and sweat, which does not relieve the patient (Fer ). hemming, irritation in throat and behind left of midsternum, later eructations of gas and of greasy fluid provoking cough (had had stewed ovsters and aromatic tes at supper). Pinching in engastrum.

Clinical.—Dyspepsis, with loss of appetite, nausea and vomiting after eating, aggravation from ands, especially with pulsating headaches, profuse menses, restlessness, etc. Persistent vomiting of food, often before eating in the morning, in women

Abdomen.-Emission of fetid flatus when standing leaning over the table, continuing when undressing Pain in transverse colon, at 3 pm; at breakfast, when bending forward, reneated when standing, using arms inoderately towards the left. Threatening of diarrhoga from colon to rectum

Stool and Urmary and Sexual Organs.-Stool soft. Urine pale, copious, in cool weather, vellow, casy in warm weather, and limpid, less copious and darker in cooler weather, when pale there were several crysent parts in evening, in hour parts in hour

ton Hamorrhage from the bladder Irritable or inflamed black, jetking burning, almost borning, in a small of der, vith frequent urging. Rejention of urms, with fever, in this construction of urms, and the construction of urms, and the construction of urms, and urging the construction of urgins of u

Chest, Heart and Pulse.-Pain in C in morning Oppression of 1 C and stomach from indignation. Palpitation when sitting, when sitting writing. Pulse; accelerated

Clinical.—Its action upon the respiratory organs may be clearly foresistanced by the provings of Feer and Phos, like Pearly foresistanced by the provings of Feer and Phos, as the when there is considerable feers, especially notice that the opprasion and dyspons, both of which are extremely marked in Fer and Phos, as eduplicated in this chemical compound and allowly and provided the control of the provided provided by the provided p

Meck and Back.—Pun in neck in morning Pun I. Climical.—It has been need in tribuid fever, especially for in I. lower lumbur region when walking bent forward; in secreci-line symphysis at I PM on walking in the remarks the need enderly to deschibits. In a general way it is a merely for an unbellity condition of the tasses in broken-down

writing, extending downward in dorsal tendons, rest, then the pain ebbs and flows, when writing it aspects, on rising felt in little finger to first phalanx, > warmth and wrapping

pain, or of the ankle, with shooting pain

### Fluoricum Acidum.

For use, 1 part of the pure acid is dissolved in 99 parts of water and preserved in guita-percha vials. This should be well diluted before taking

General Action -It is an irritant to mucous membranes and a profound tissue remedy Indicated in deep destructive processes (periosteal, osseous and connective tissue generally affected ) It also seems to affect the veins and restore their tone

Albes - Boron (Borax and Boracic acid), Silicon (Silicic acid, Silica)

Generalities - Writhing about in indescribable agony, Motion of hands, fingers, toes, feet, jaws, lips, eyebrows, lids, muscles of face, etc., fond of movement of the whole body when sitting Pain, < hand, arm to elbow and in foot, with lameness, transient P in different parts in evening, in neck, knee, r forearm, l leg. answering to cystin, and tablets answering to uric acid times above elbow, erratic, in 1 half of body, in air, chest, nates, etc., with itching, jerking, in different parts, behind 1 ear, on 1 middle finger and in small of

> with internal numbness in 1 forearm and pricking in it on stretching it Sensation almost like rush of blood. though rather as if caused by the nerves, somewhat like numbness and confusion or burning, in r. side of forehead, then in r sides of jaws, in posterior half of occiput, in bladder, and so on in various places Lameness Lasatude, in forenoon; at night when walking, sudden, in evening Many symptoms worse when standing, though better when standing than when sitting . S < r side, during rest, in the room when reading or writing, as soon as she rises Amelionation on motion, on ualking, pains after breakfast, except pain in

In sucro-line symphysis mainty on waiting in the removal for an unhealthy condution of the tasses between the habitual aching constitutions, as in drunkard, variouse veries bed-vorse, sphiline in dorsal spine (... standing or stifting, ... walking or destruction of treutes, exosiones and hose pains, sphiline of position. Tired feeling in r lumban region in even fing when atting in church

Extremities.—Rheumantae feeling in r wrist after mainerous discusses, for example, immore, felors, etc.

head on motion of at

Mind -Satisfaction Enforment of everything Gaucty rest, then the pain cobs and nows, when writing it next morning Sensation as if dangers memaced him, < sometimes extends up forcarm, dorsal and ulnar during pressure in occiput, during the staggering, pain in bladder, etc , without fear Annety so that sweat frequently breaks out. Ill humor Discontent in even-Chinical.—In articular rheumatism, especially of the shoul-log, but joy in the morning after a restless might der, the pains extend to the upper part of the chest; and of the Ungovernable anger when considering what might hands, which are swelles and paintly, or die then, with severe happon Hardet, which he vents in words lint a addenly altered view as soon as he sees the people. Sleep and Fever.-Drowsiness at 4 30 r.m., felt much Dissatisfaction, with discomfort in abdomen. Aversion in eyes, extending up into head, necessity to take a to his business. Disposition when alone to repulsive nap. Sensitiveness to cool air, at noon, all the even-tantastic imagination, especially in regard to people ing. Dry heat of palms; when sitting, and of face, with whom he is connected, for example, that he must D heat of face, hands, throat and upper chest at 6 P.M. get rid of all servants, children must go out of the

house, a betrothal must be broken off, a marriage must be dissolved, etc. Indifference  $Mustakes \ r \ and \ t \ m$  the skull, < temporal bones. making notes Writes December for August daily

Byes—Quivering externally in r, then burning though memory is good Forgets the most common shooting at bottom of orbit. Pain in r. Pressure

blood to head and unconsciousness, he could not ing around r eye in evening remember where he was Determination of blood, in morning on rising, lasting when walking or sitting, eyes then eructations and nausea

in frontal and parietal bones, on lying down she feels opening eyes. it all over, in I side in evening; in r protuberance in evening, in r side of sinciput and in r eye in evening after lying down, in sinciput on stooping, with pressing on r eye Compressing pain in r protuberance Heavy pain, in upper part of sinciput in evening, < stooping, sometimes passing to upper part of temples, < to 1 Heaviness above eyes, < motion, stirring in with finger, with itching Itching in r, with nausea Painful, quick determination of blood the large in morning temples, < to 1 Heaviness above eyes, < motion, then 1 Sensitiveness of hearing increased in morning to sinciput in evening on beginning to walk after standing, not after sitting

Pain in temples, 1, in 1, proceeding from within,

Parietals-Sharp, darting pain like a prolonged electric shock, or compression of ulnar nerve, from near posterior superior angle of r bone to r mastoid process Shooting, undulating pain from 1 side about middle of head and near sutura interparietalis to I temple near exterior part of orbital cavity, causing an idea of impending danger, this pain shoots about for two seconds, but the undulation lasts longer Pain in course of 1 coronal suture in mornon I bone Dulness and painful tension towards r side of head Drawing in r side of head

Cramp deep in I side of occiput. Pinching in falling of hair

things If his ideas are interrupted by other thoughts upon r when stooping Burning. Itching; in l. as he cannot recall the former, or only slowly and stupidly from a grain of sand Affected so that he must wink Peculiar rush of memory every morning Atten-tion difficult to fix Comprehension of philosophical works difficult, but facts appear clearer **Head**—Aching, with nausea and vertigo. Pressure balls, which felt inflamed. Pricking in internal canthus, outward, P in brain, extending upward. Contractive with burning. Itching of upper lids and inner pain, then beneath r scapula Confusion Dulness canthi, upper his in evening, I in l'internal canthus, in morning till breakfast, in morning, with drawings in r internal C in evening. Pain behind r eye, deep in r side of head, D, sensation as if brain were above and behind I, occasionally in evening; behind pressed upward Heaviness till going to bed, he l, extending far into upper jaw, at 1 o'clock, the same wakes with it in the morning, > 9 Am, H, with pain behind r. between 5 and 6 rm, in bone behind 1, deep in middle of forehead. It seems to proceed towards temple, in 1 nostril and in forehead, as if from throat to head, feeling as if he would be something pointed were forced deep into it at 1 PM. struck by apoplexy, a kind of determination of Throbbing in bone above and behind r brow Draw-

Pleasant sensation as if lids were wider open or with heat in forchead, increasing to pain in os frontis eyes were more prominent, vision clearer, and he feels a Stunning sensation, < in front A kind of shaking kind of luxurious enjoyment when looking at things in torenoon, after 10, < occuput, and more towards r, he sees every day. Inclination in morning to go at first when sitting, then < every quick, short move without glasses, though his shortsightedness was no ment, on rising, turning, during walking Vertigo better, it was very irksome to bring objects near the Vision of a large, bright ring on closing eyes en cructations and nausea firmly in evening V. of a light crossing itself like Forchead—Shooting in l Pain, in upper part of lightning in evening in bed V of red sparklings F and vertex, towards r, in morning on waking, in crossing each other in all directions on closing eyes r side in forenoon, over r brow in torenoon, at noon after going to bed, then red, flaming, trembling, >

> Clinical.-Lachrymal fistule. Chronic inflammation of the lachrymal sac, cold air

> Ears .- Sticking in r. Jerking behind l Pain in r . behind r, extending upward, about r in forenoon, as if ringing in ear would begin, peculiar P in 1, > starring in with finger, with itching Itching in r.

Clinical.-Otorrhoa, with hardness of hearing.

Nose.-Pain on 1 side, nose had not been sore or Pain in temples, 1, 1, 1830 r M on bending head, que, ktrobbing P in r at 830 r M on bending head, some emissions Sore feeling, < towards I side as in stooping Pressure outcoard in temples, in 1 (Crawling Feeling as from a bad cold Sincerage with painful for several months, sudden P in 1 side after Pain like a contraction on vertex towards the right in afternoon, violent 8 seven times in morning, with scanty discharge of thin mucus from nose, salivation and sensation in nose as from very cold weather Suddenly full of mucus in morning on rinsing mouth with cold water, as quickly passing over Coryza, in frequent attacks, suddenly appearing and disappearing, coryza > excitement, fluent, and on r side, with crawling before sneezing, fluent, at night in sleep or next morning, after drinking red wine in evening, constant dropping and stoppage of nose; sudden fluent, all day after drinking ale in evening, suddenly disap-1000, P., a partial fulness, as if something were lying pearing; sudden tickling fluent, all day after ale in

### Clinical-Chronic nasal catarrh and ozena.

Face.-Appears to have become suddenly old, he lowest I sade of occuput in morning after waking sees in the glass superficial whitish, puffy folds be-Pressure in occupit beneath protuberances; P in r neath the eyes, extending towards nose, etc., without Frommer in wripine neneath produced to the property of the pro r upper, with heat, reflected in lower; drawing pain

in r. lower, towards the middle: peculiar sensation | much phlegm mixed with blood Sensation posterinear bone of r. lower in evening, with drawing in en-orly at entrance to coophagus, < on l side, as if raw, tire r. limb; sensation in r. joint as if a spasm would or as if an ulcer would form, in morning and forenoon, occur, cramplike confusion in joints, < 1; warmth in and when hawking he thought blood would come r. upper, with confusion, burning pain on outside of from it. Warmth, in fauces in morning Swallowing r. lower, near first or second molar, numbness in r joint, with warmth and sensation as if it would begin joint, with warmth and sensation as if it would begin | Clinical.—Gottre Syphilitic ulcerations of the threat, with to pain | Lips warm; burning like a sore near inner | fetid smell, much tumefaction, threat very sensitive to cold

edge of lower, towards the right upper teeth there is pain on pressure. < evening, temporarily > cold water Bluntness; with sticking, contraction and tension, then the mucous membrane of mouth became whitish and peeled off Lower incitongue Warm feeling, < 1 upper, especially incisor and canine, then warmth in pharynx Acrid offensive of r upper meisor, on which an artificial tooth is fixed, in morning, like ink in evening, from a l taken out (Painful excoriation near first r lower molar.

Prickling of tongue, with salivation, afterwards with smarting of palate as if something acrid had been after headache began, and a sensation as if head were before diarrhora, viscid, tasteless S on waking at 2 content) A.M., with burning pinching in stomach and sensation of flatulent distention, . emission of wind, after a copious pappy stool the pains concentrate in umbilical region, the pain > after the stool but returns, a second stool with pain in umbilical region, and a pasty one at 7 Am Taste intolerable, T. salt in morning on of what he has eaten, < afternoon.

Throat.--Hawking of bloody mucus from low down Constriction at first in afternoon, with difficult swalburning in stomach, eructations, retching, then constipation for two days Soreness of pharynx, extending below larynx, swallowing bread is painful, S, Rectum and Anus.—Urging and soft stool, next day with difficult swallowing, > after breakfast next morn-stool protracted and small, ineffectual desire; indo-

Mouth.—Teeth. Digging in a r lower incisor Pain Stomach.—Appetite increased; after diarrhora, voin I.; I lower, P in a r. tooth disappears for a mo-racious Good, but soon satisfied. Speedy sourcety A ment and jumps to outer part of 1 thigh above knee; p impressed, study A ment and jumps to outer part of 1 thigh above knee; p impressed, at might Longing for coffee Aversion to knee, in r eye-tooth in evening; in a r upper coffee Relishes wine no more Euclations, in even-carious incisor in evening from the cold air of the ling, with nausea, flat, nauseous, sour, frequent sour, Drawing in I lower. R. eye-tooth, which was once you but afterwards smooth, is now rough and begins, with yerrors and emission of flatus, rough but afterwards smooth, is now rough and begins, with yerrors and headche; with heaviness above to ache of a typic part of the proper part of the part of the proper part of t rough but alterwards smooth, is now rough and roughns; eyes, without inclination to vomit, with dulness of unner teeth there is not negative. Sevening terms head Retching Vomiting, difficult, several times, of clear, viscid fluid, with coagulated white pieces

Rumbling, after eating, with urging as in diarrhora Burning pinching before diarrhoa Burning, with sors feel sharp, as if broken, and pain on touch of pressure, before eating, > eating, then heaviness and again heat, < walking Pyrosis Weight between meals, simulating indigestion Sensitiveness to presstaste coming from the roots; acrid putrid T from root, ure Discomfort in forenoon Sensation as if nausea or a kind of vertigo would set in, but it does not

Abdomen -Rumbling, in forenoon, with eriatic lower Pain where the roots of 1 teeth had been pain Frequent emission of flatus and eructations, leaving him more comfirtable and feeling as if it were the last, but excruthing is renewed in the same order, and so on for two or three days, only at longer interials; much inodorous and noisy flatus, offensive in morning, scanty, gargled, tenderness in larynx and soreness in throat offensive, before stool, scanty, offensive, like a mixture on coughing to clear it Painful deer in anyle of carburetted, sulphuretted and phosphoretted by fow Contractions, with prickings and sour taste

Pain as from hot water, teeth so painful that he cannot in afternoon, two hours after eating. Feeling of secuchew Sensation during a walk as if the passage to mulated flatus Pain after eating fish with vinegar, nose were wide open. Dryness in evening of 1 half! (P after watermelon), before diarrheas, < after emisof palate, and roof Gressy feeling Sahaton: Warmth at night, with dragging towards bladder Intoo heavy and would drop from one side to the other, (Innanon would after eating herring, and dis-

Pam in region of splcen Pinching in region of spleen at 11 AM , in umbilical region at 2 AM , and copious watery stool. Faintness in umbilical region in morning before eating, > bandaging, pressure of watch and eating, with desire to breathe deeply, in the evening it is more like a burning, when occupied he waking, till breakfast, sweetish in throat at night, T does not observe it Shooting towards r side in evening, as from wind Pain in 1 side, in evening Sensation in 1 side as it pain would arise and wind be Clinical.—Dental fistale, with persistent bloody, salty dis-charge, which keeps the mouth foul Several cases of dental joint of lower Studden acute pain above 1 hip, hindering fistals and carse of the jaw-bone have been cured by this drug resouration. Decu-seated pain in incumulal regions respiration Deep-seated pain in inguinal regions Burning in r inguinal region in afternoon

Clinical.—Numerous symptoms in the liver have led to its use conservation as iris in auternoon, with difficult swal-lowing, C in I side, C, with pressure in stomach and fulness in epigastric region, disgusting cructations and in the properties of the liver in con-squence of sleoholasms, and also in abdominal dropses associated in the principles. With the above hepair and addominal nausea, with rumbling in abdomen, pressure and symptons there is sometimes found offensive bilious diarrhos, especially in hard drinkers, with great aversion to coffee, desire for

ing, the same morning hawking from low down of finite desire, scanty odorless wind and pappy stool, in

a tertian type, one day with copious micturition, after towards the front, impeding inspiration, not > the stool better appetite than usual Constriction of deep inspiration Soreness Burning from 1 breast anus on attempting to emit flatus. Feeling as if wind to groin. Throbbing in C. and abdomen on feeling were retuined in anus. Determination of blood to A. them.

watery, infinements after rising in norming. Distributed at 4 A w. Loose Large, pappy, yellowish-brown, offensive Pappy and frequent Free, twice a day Hard, twice a day. Constipution. Scanty and delayed, S. intermittent and lumpy (In lumps and difficult)

(Every other day and every time later Urinary Organs .- Pain in region of bladder, above neck of B after micturition, in lower part of B before and after nucturation and on pressure, in region of B, like an electric shock, extending into r thigh, burning quick, nervous pain from region of B extending to r thigh, when in bed Frequent desire to urmate Micturition twice at night, frequent M of light urine, leaving him more comfortable, and during and after micturition elasticity (in muscles?) of urinary organs, then agreeable sensation, he drinks less than usual. Burning in wrethra during and after micturition in morning Urine copious in evening, and of strong odor, C, with the diarrhora, C and of clear color, C, then more thirst Urine diminished, evening and morning, with odor like Benzoic acid Urine offensive, and acrid The habitual whitish sediment is mixed with a copious purple one

Sexual Organs.-Erections, with desire and voluptuousness, E in morning without desire Occasional sticking through 1 testicle to abdominal ring and spermatic cord Drawing from 1 testicle to spermatic cord Sensation of pushing towards spermatic cords. in evening Desire increased, with erections at night in sleep, diminished, lost Menstruation eight days too period according to the former calculation

afternoon on the bed if he wants to take a full breath sensation and pricking Breathing continued after radial pulse had tailed and Pinching in 1 deltoid Pain above 1 elbow in even action of heart had apparently ceased

cartilage in evening, from 1 to groins, from 9 to 10 clbow to shoulder, with lameness Pain in r. elbow, Au, deep respiration, in groin and back, pain I in evening as if a stitch would appear behind heart, burning 8

ness, jerking Pulse rapid and small

Neck.-Cramp in some muscles of I side and towards shoulder, in forenoon when reposing and when rising, > after exercise, the pain changing from one set of muscles to another, but is always in more than one, the omohyoideus is decidedly affected, but not the sterno-cleido-mastordeus Pam m r side in forencon, P in nape, beneath scapular and in 1 side of chest, extending from nape through centre of head towards torehead, gradually concentrating towards the left, as it throbbing would arise there Drawing pain along r side, in afternoon Constriction of 1 side at 9 AM Soreness of 1 half of nape Stiffness

Back.-Burning pricking in 1 scapula Pain sometimes beneath scapulæ, sometimes in kidneys, deepseated P below point of scapula < towards l, < when sitting, especially when riding; in os sacrum; in the middle of tuberosities of ischia, deep in I loin at night Jerkings in sacrum.

### Clinical.—Neuralgus of the coccyx, excessive aching.

Extremities.—Rapid growth of nails Sensation as if shoulders and hips were being pulled out of joint Pain in bones of r torearm and knee, in l arm, leg and hand, intermittent, in bones of forearms and legs, about the centre

Clinical.—Synovitis

Upper Extremities .- Pain extending from r shoulsoon, copious, thick and coagulated, lasting five days der-joint into finger, as if air passed down, sudden jerkinstead of six to seven, the next time at the regular ing pain in bone of I shoulder. Bruised feeling in r shoulder and upper arm after lying on I side, with Respiratory Organs.—Pain in forepart of larvnx, as numbress Cramp of r arm in morning Frequent if in cartilage, inducing him to swallow Scraping in burning, pricking and jerking pain in l arm as from larynx, provoking hawking and swallowing Soreness a slow electric shock, at 2 P M , < inside of 1 little finını larynx when coughing or hawking. Itching in ger, with intermittent sticking outward in tip of finger larynx, causing swallowing and hawking. Breathing Pain in r arm, 1, r at 9 A M., L in evening, deeply oppressed deep internally, not > deep breathing penetrating P in arm, < about junction of the can-bifficult B as from an impediment in region of pit of cellated with the solid part of r, then I humer, then throat and upper part of chest, with itching pimples soreness, a similar pain in muscles over head of 1 ricon back and pain in chest below point of secapila dius. Lannesses of r arm so that writing is difficult Deep B as if the breast within and below were full, Numbness of r arm in morning on waking after lying in foreinon when utting and writing Sighing inspiration in afternoon and outning, more observed by about noon, with perking and lanneness R arm falls others than by himself, he has to bend backward in asleep at 10 i.m when resting on it, with paralyzed

morning, P in r, then I humerus in afternoon, ex-Chest -Stitches in side, under ribs to l of ensiform tending to elbow; rheumatic, in l humerus, from

Forearm -Trembling of biceps Jerks along l in l Pain close to r nipple, in last r rib, near spine, radius to thumb, which moves involuntarily Pinchin centre of sternum in afternoon, after retiring at 10 ing in middle of 1 in evening. Pressure in r.; P. and " a pain in middle of chest lasting till he fell paralyzed sensation. Soreness in bones of 1, towards asleep, in 1 side beneath skin, on moving and a the middle Numbness of Levery forenoon, but every similar pain in 1 shoulder at 10 pm, next morning day later and less decided, with paralytic sensation on rising P again in I cheef to Oppression on reclining, Numb pain extending to hands. Paralytic pain ox-with troubling in lower limbs, O, with pain. Tight-leading into hand Asleep sensation in I. forearm uses as it something were fixed in upper part, more and hand at 5 A.m., when I/ying on r. side; intermittent, in 1 forcarm and especially in hand, < towards Lameness of l. hip Numbness of r thigh in evening medial side, more internally, < hand from the time of when crossing legs

ling in ball of thumb on stretching arm and hand.

ing in r from 8 to 11 AM

Hand -- Redness internally, R, < in palms, as if feelling in r Hand—Redniess internally, R., < in pains, as it results in Leg.—Trembling Deop-seated pain below r knee swelling, next day fingers and especially thumb in line vening. Drawing pain in I, and foot. (Iameness flamed, the hot bright red skin on the tips discolored, of r, with pain in femut, tibs and fibula.) Tred and the last phalanx almost immovable, the pain in hands heavy L falls seleep easily, in morning when sitting extended to shoulders, and fever, towards overning of, after resting it over r, leg, and the back of the foot feels second day the pains were throbbing and finger-tips like a cushion, yet motion is unimpeded, falling more swellen, on the third day the finger-tips were lasleep of r in evening on crossing it white and thumb was enveloped by a white blister, on Ankle —Pain in r external in evening, drawing P which the nail rested, with throbbing pains, on open- in r during a walk in evening, spreading gradually ing the blisters a thick, brown, offensive, acid fluid over whole leg, causing lameness in knee and ankle, was discharged, under these blisters was seen on fin- rest Sprained pain in 1 when walking, 8 lanegers the uninjured true skin, on thumb there was un-ness in afternoon, passing all around the joint, < stepderneath a second blister, upon opening which com- ping mencing suppuration was found, the thumb continued! Foot —Pain in 1, in r heel, in corns of r, in 1 after a cold from exposure to snowy air, like that for like a rush of blood, in evening Soreness of corns, merly in r. leg Lameness of r Powerless sensation | like a boil lasting all the forenoon.

Fingers - Jerking in 1 thumb in forenoon, extend- walk joint, jerking P in I middle, intermittent, in l in (Painful bleeding excoration on 1 second toe) dex as if in bone, during the day, the whole finger is pain-Piniples on nose, between nose and reve, in r side of

Clinical. - Inflammation of the phalanges of the fingers, index, like a felon, indeed most violent inflammations of the index macs, are a set on, indeed most votent innamations of the macs finger, with purulent discharges and tertilic pain, have been relieved. The nails become crumbled or have longitudinal furrows. In panaritiums the pain is violent and throbbing, sometimes with sharp stitches when the nail is pressed upon.

Sticking in r hip-bone, spreading over nates Burning evening, with itching shooting downward in r. hip, as if in a nerve, . inside on getting in and out of bed, with pain on motion and on back, in forenoon, > rubbing, almost only

waking in morning till noon, several days, with prick-

in evening, in outside of l. at 8 PM, > friction, pene-Wrist -Pain about r. wrist and finger-joints Draw-trating, on outside of 1; drawing, in hollow of r in forenoon, extending down calf to tendo-achillis Dull

to secrete thin pus Pain in r metacarpus in evening instep in evening, in r instep, with burning, in I heel,

Internal numbness in 1, different from that produced Toes —Pricking in tips of r in forenoon; burning by long pressure, extending to forearm, not ex- P under T in morning Pain in r little, in first joints ertaon L. asleep in morning after lying on r side, of r, in all I toes except the great one, in r little, in forenoon, burning P in all, so that he could hardly

ing to middle of forearm Prickings, in tips of m- Skin -Redness, with heat and pain, then desquamadexes, < 1 and in r thumb; outward, in tip of 1 lit- tion in scales, R in spots above brows, red blotches tle; intermittent burning P in fleshy part of I thumb over brows, most abundant on I side but lasting longer at 11 AM, passing out at tip; sensation of a splinter un- on r, excatrices, dating from thirty-two to two years, der thumb-nad and in cellular tissue when touched, pulsa- are red around the edges, and covered here and there trny pain in hand, < in tip of thumb, which was sore to with itching vesicles, those of more ancient date have

ful internally, < in evening; frequent throbbing, in face, on abdomen, < thighs and legs, the points formbones of tips, like a contusion, in evening Someness ingacrust, here and there, and itching, warm days. in I index Burning about bone of r middle, amount on shoulders and back, < towards I, with itching, group ing to pain about first joint, with itching prickling in of red P on 1 hip, in back and lower part of region of skin , jerking B in the of I little at 10 AM Paroxys- joint and below, opening in night after scratching Pusmal painless sensation as if something were working tules. Vesicles on r index, with itching, V in groups its way out beneath I nail, in forenoon Sensation of on ulnar side of r thumb and radial side of index, with a hair on back of 1 little, in forenoon, till 2 rm itching, leaving dry scurfy spots, carmine, round, Numbness of r in forenoon, with rigidity. strong and steady pressure, but returning immediately, near r napple, on r side above navel, r side of chest, inside of r arm, the larger ones becoming darker.

Soreness of warts on I hand Burning pain in spots on back of r hand, angle of index and here and there on I hand Itching burning spot externally Lower Extremities - Trembling when reclining near r eye Crawling in r. sole, on r shoulder in

somewhat resembling nævi materni

Itching, in cycbrows, r brow, r side of face, of knee. Pain in r hip; in head of I femur, in fleshy chest and r side of nose, middle of I scapula, back, part of l. thigh, on outside; in r ischiatic nerve in small of back, cicatrice of an abscess on inside of l aftermoon; burning tiching P in back part of thigh, thigh, r shin, I nates and forchead; I hed, all div Bruised pain in muscles of thighs, B pain in thigh, in different parts, < on back. every morning and coposerior and inner part; in I hip, < morning and evening, oil add of hape, on to part below shoulder.

till sleep, pumples on back, of all ceatroes in ovening, in fisce, < m morning, then in ovening, with desire they are all on 1 side, on thigh, upper arm and 1 to wash in cold water; in r. palm in forenoon; in hand, on throat and clees it in evening when walking, forehead, increasing to pain. Glowing in a spot on the other, with intermittent sticking, on and around flushes, like a warm breath, from nape to occuput r nipple in evening, next morning the nipple is larger, Intermittent heat in face in evening after animated redder, and arcola darker and covered with a brownish conversation, with headache like a forcing deep intecrust, as of sweat and dust, < evening, in centre of riorly towards the left, then passing to l. upper jaw, permeum, evening, in different parts, < posteriorly, as if teeth ached, even where the teeth had been exsudden intermittent, above anus, burning in r eye-tracted with inclination to bite together teeth which brow, > after scratching, pricking burning, near r no longer existed side of os coccygis Sticking itching in face; r side Sweat, < face. of face, inner side of I finger, in spots in evening, heat, < on r upper part of body, especially along and on thigh, < 10 to 11 PM, crawling, in points, streams, S., with anxious imaginings; profuse sour, in usually in groups

### Clinical.-Ulcerations of the legs, with various veins

Sleep .- Sleepmess . every forenoon, or so weary that he must be down, periodical, in afternoon Sleepiness carly in evening, with sound sleep and early waking, and he lay down on the bed dressed, though the window and door were open and the night cold he had taken no cold in the morning, and had not slept enough, afterwards after a walk he is wide awake and cheerful Sudden sleepiness in evening; after wine he has down and does not wish to rise, on going to bed he is wide awake and the face warm. Sleens in the evening more than usual. Sleep long and sound, profound S till late in morning, and confusion of head on waking Irresistible sleepiness in morning after a refreshing nap it returns every two hours till evening Sudden falling asleep in evening, then sleep all night and long in morning Sleepiness on going to bed, but mability to sleep on account of his thoughts

Slieplessness, till near morning, then short and light sleep refreshing him as if he had slept all night, with feeling as if he had slept, S in evening Late falling asleep, frequent waking, many dreams, yet early waking in morning and feeling better than usual Easily awakened if called at night, but when walking weary, indifferent and relaxed Snoring in sleep and exclamation in dreams Restless nights, with unremembered dreams; R, with dreams easy to remember, of the occurrences of the day

Dreums towards morning, only after midnight Frightful, soon after falling asleep, with waking at midnight, the rest of the night many dreams of disday , V , that he sees his nearest relatives die That P < at 10 AM, when sitting after a walk he was dead and ordered the rapid removal of the corpse from the house, of the death of his son and of the son of a friend, he reproaches himself and weeps bitterly because he has neglected examinations and remedies

on back, but sometimes on throat, in scars on ball of Sensation as if burning vapor emanated from all I thumb and joint of index in afternoon; on I shoul- pores. Heat under eyes; extending from centre of der in afternoon, on back in evening, < late at night dorsal region to loins; in r. sole, in face after wine; in evening, changing from the top of one shoulder to outer lower part of r. buttock in evening. Heat in

Sweat, < face, S. from 7 to 8 PM, and sensation of < 1 side, especially on side of chest towards back r side of nape, almost to shoulder, as if in warm afternoon; cold, clammy, glutinous, evenings, with itching here and there, dripping, glutinous, warm evenings when walking

### Formica.

Formics rufs, L. A tincture is made of the live ants, crushed

Ally --- Apis Generalities .- I'nk, flat, spreading swelling of the bitten part, with itching, the S increased so that it was tender on bending wrist, then the S went up arm, red like crysipelas, with itching, pitting on pressure, leaving a white indentation with crimson areola, aching in wrist, S. > warm bathing the itching by Arnica Shooting from back and hips down thighs, and in shoulders shooting to hands and fingers, with pricking in skin over region of the pain, the pain < 1 side, darting S in arm, neck and chest of r side. Sharp, corroding, sore teeling or pain here and there, more or less all day. Aching in bones, with feverish state of system and with fulness and dulness of head; before a snowstorm A in aponeurosis and muscles of head. neck, shoulders and back Discomfort

Wretched condition, causing gaping and stretching. Indisposed in evening, forgetful, sleepy and tired, much affected on hearing of a threatening evil Liability to take cold and bad effects from it Lightness Agility increased Dulness in morning, with heaviness and bruised sensation Indisposition to exercise muscles, they pain when exercised, < extensors of legs Languid feeling in whole system, pain in all limbs, with chills and horripilations along spine Weakness, with paralyzed feelings in muscles Powders taken at middlight, the rest of the night many dreams of dis-night have most effect, Aggravation in open air tant acquaintances Lucid, sometimes disagreeable Symptoms all on r side. Pains recurred after a slight Vivid, detailed soon forgotten, of the thoughts of the cold, P. < study and sitting quietly, > smoking,

> Clinical.-Articular rheumatism and gout, the rheumatism appears suddenly, with restlessness, but motion aggravates the pain, pain > pressure, r. side most affected (Hering).

Mind.—Exaltation, desire to run but soon tired. < Fever - Chill towards evening; C in l. arm and evening, E almost as from champagne, after pain in whole body Heat, in evening, < next morning, in vertex had abated till after 9 AM., with internal with inclination to walk about naked, cold bathing coldness as from mint. Very happy during the day, rs very agreeable, < behind ears and on nape. General heat in overlaining after little exercise, G heat, with plain, H changed by trilles to transient becomes maken with heavines and lameness. Internal heat Excitement Sudder return of mortification and grief. at night, but feeling better in morning than usual. Irritable and low-spirited. Morose in evening, disinthe day Inability to study long at night Confusion changing to a rancid taste Unconsciousness.

from noon tall 10 P.M., < stooping; in afternoon; in ynx at noon during empty swallowing Coldness, as afternoon, with occasional fluttering of heart, with from mint-drops. Difficult swallowing at noon, with nausea; with vertigo and occasional boring in r temple contracted sensation in resophagus and pain in l., at base of cranium, extending upward, in garden, with nervous shudderings and vomiting, is causing smarting in mouth and throat subject to these headaches from overfatigue, but this after sweat, with vomiting and depression. (Tampwas more severe than usual and was accompanied by like pain in evening, > emission of flatus. Pain in before Confusion Dulness, with pressure between shifting to vertex, followed by creeping down back temples and ears large and heavy Congestion, and to chest Vertigo, oppression and weight Heat in epigastrum, exin morning when writing after dressing

Frontal pain from noon till 10 PM, over eyes every day from 12, earlier every day and in morning, P. in scanty emissions in morning, then diarrhoa-like r; over l eye, with pricking and itching, heavy, urging, fetid, almost putrid F (had eaten at dinner in front of head in afternoon, with occasional shooting from r temple into head Lancinations out-diarrhora, with much yawning, then regular stool, the ward in r. temple Pain in vertex and forehead, < last part of which was thinner and of peculiar odor through temples. Surging in upper part of brain at Sticking in region of liver, in r hypochondrium. 10 PM, then dim vision Headache on 1 side after Pain beneath short ribs, on deep inspiration, in dinner Drawing headache on 1 side in afternoon, > region of spleen, in lower umbilical and upper hypoafter supper Tearing in occiput at 10 r M Head- gastric regions, > after diarrhou, with tenesmus, in ache in r upper posterior part, headache in posterior pelvis, from one acetabulum to the other, in hypoupper and inner part in morning, < drinking coffee gastrium, > transiently by emission of flatus, then and washing with cold water

stinging in ears Cool burning as if snow were falling | papescent stool, then constriction of anus, another on conjunctive and cornea. Itching of conjunctive in stool at 9 AM, with tenesmus, then constriction of morning, with burning when rubbed Shooting in 1 anus Bruised pain in umblical region after drinkball at night—Itching of r outer canthus, with sore-ness, dimness of vision, sensation of sand in eyes, lach-Rectum and Anus—Painful, protruding piles withrymation and soreness of lids Stitchlike tightening out constitution of anus posteriorly and inwardly over 1 as if a stick were auus at 10 PM, > scratching, also about A in afterpressing around something, with burning, then pain-noon, > scratching Sensation in A all the evening, ful dulness of head, except upper back part Boring as before diarrhoa Pressure in rectum, < in evening in r orbit, then pain in 1 ear Pain deep in orbits and in bed Vision misty

Clinical.-Rheumstic inflammation of the eves and its sequelse loucoma, ptery gum, ulcers of the cornea, etc. (Hering)

Ears .- Swelling of all surrounding parts, with discomfort Shooting in l., at 10 PM Sharp twinges of pain in r in morning in bed (perhaps attributable to after straining Twice daily a thin nightcap) Pain; in 1, then - r, in the deaf ear, extending into temple, with external sensitiveness Itching deep in 1, at times almost painful

sticking in I side of vertex Coryza, sudden tran-cretion under propuce Nervous fluctuations in I sient, in evening; thin, acrid, nose sore to touch and half of penis, in region of prostate, with jerking pain. feels stopped

lyzed feeling in l. side as if everything were hanging ing, in morning on lying down after urinating; insuf-loosely. Lower lip dry and cracked Laps sore at the ficient, during conton the hing of scrotum. Excita-

Mouth.—Periodical tearing in r. upper incisor, with drawing, grumbling, soreness and elongated sensation Pain in a carrous tooth, with inflamed gum and swollen day, next day scanty and pale again. cheek. Tongue sore at root. Stinging in palate, < eating, smoking or touch, extending after two days to toun in larynx, with loose expectoration during the tip of tongue. Watery, offensive taste. Long after day Sticking in r side of chest at 4.30 r m . arresting

clined to work and apprehensive. Very active during taste after using fresh and sweet fat with his meal.

Throat -Soreness mornings on getting up, with Head. Aching all day, > combing hair, A daily carache, S, with huskiness. Pain in r side of phar-

Stomach.-Hunger after 9 o'clock Thirst Eruc-< temples: sick, in afternoon after unusual exertion tations of sour wind, of fluid tasting like sour food. shooting neuralgia in temples, which she never had epigastrium at 10 PM, extending from 1 to r. then Stupid feeling, with stiffness of P in S as if something had lodged at cardiac end neck Heaviness, with sensation as if brain were too at 6 PM, four hours after dinner, burning P, with

tending over a large space

Abdomen.-Forcible emission of flatus, difficult. soft stool with heat and burning irritation of anus Eyes.—Pain in morning on waking, > washing and weak sensation in bowels, in transverse and Irritation as from sand. Fulness, and in ears, with descending colon from incarcerated flatus on waking,

Itching of

Stool.—Scanty, painless diarrhora twice in morning, painless D in morning on waking, compelled to go at once, with numbling another stool immediately after breakfast, with urging Pappy every morning, with inclination to sit at stool and feeling as if mucous membrane were thick and stiff. In two small balls

Urmary Organs -Urme copious, even at night. Urine like saffron, passed often

Sexual Organs .- Feeling on ascending stairs as if Nose.—Sneezing at 9 PM., with fluent corvea; then asleep Hot red swelling of prepuce Increased se-Erections in forenoon when riding in a carriage, Face.—Checks red and burning in evening Para-strong, in morning, with increased desire, long-lastbility Menses eight days too soon, scanty and pale, with bearing-down pain in back, darker next day, cramplike pain through hip-joint and pelvis the third

Respiratory Organs and Chest.-Cough from irrita-

part of chest and in abdomen

Heart and Pulse .- Palpitation in afternoon. Heart's action increased Pulse 92, irregular

ing up; P in 1 side, sometimes with itching or always > scratching, burning, in bend of 1 knee, < burning, as if it would break, < 1 side, when rid- at 9 30, the same sensation, which is a union of itching in a carriage Jerks along I side of spine, in ing, burning and pressure, here and there on body region of muth rib Shooting in region of 1 scapula after going to bed, < motion

r arm and leg, < joints

upper arm, then on various parts of body lower down Pain inwardly on inner side above r elbow, < in direction of upper arm Rheumatic pain in r elbow Pain in r elbow and wrist Shooting in forcarms and hands at 1 PM, S in course of 1 ulnar nerve to little finger Rheumatic pain in r forcarm and wrist, in r wrist and course of ulna Shooting in carpal bones at 9 PM when writing, extending down third and Inflammation of backs of hands, with redness and agreeable S at night, copious S after whisky swelling, then suppuration under finger-nails, then loosening and falling of nails Tearing in 1 middle finger at noon Burning sticking in finger-ends, first in l and < evening, then on r and < morning, < middle finger

Lower Extremities .- Bruised sensation: in 1 hipjoint, interfering with walking, in hips at night in producing nausea and vomiting bed, causing him to change from side to side Shooting in thighs down to knees at noon, in hips, at 7 way in evening when walking, on account of pain aggravation on r side. below it, next day the same and hindrance in walking from a similar pain in I middle toe Pain below knees on rising, with vehemence; I, with vexation, anxiety and in shins at 9 o'clock, P in r. tendo-achillis Sharp and desire to work, though the work does not advance rheumatic pain in ankles, < walking feet at night, < under toes, and always in a small spot : ing him at 3 AM, and the same when lying on a lounge in a warm room Stinging in I great toe at night, with burning Sharp intermittent pain in 1 toe, then pain in lower part of l. tibia.

Pain in chest on full inspiration; P in lower in region of r. nipple, then on l. side of back, then on part of l. breast, then of r. at 8 PM., with chilliness other parts. Tingling of l. fingers. Itching on scalp, down back and lower limbs, sudden P in I lung, arms, abdomen and whole trunk; at r. nipple; in I then sensation as it I were falling Warmth in lower palm, in l. axilla, then soreness with a sore place inwardly, afterwards the soreness, < scratching; in r axilla, more outwardly, mornings, instead of in the inner and anterior part of l , intermittent, on l. scapula Neck and Back -- Pain in neck in evening, < look- and I thigh near groin, in evening, night and next day,

Sleep .- Frequent yawning at 1 PM , with necessity to from 11 30 to 12 P v , S in I lumbar region. Acute stretch the limbs Sleepiness, with heaviness of eyelids pain in lower part of scapula at noon Pain in chest and inability to study, sudden S. after water-soup, and and dorsum of thum at noon, extending across sacrum falling asleep in his chair, on waking he does not feel with traction at attachment of muscles, P in sacrum refreshed, but goes to bed and falls asleep at once and dorsum of that as if muscles were strained and | Sleeping easily in evening; easily falls asleep at night about to be torn from their attachment, at 5 PM and after being disturbed. He does not feel like getting up in morning, he has scarcely aroused himself when Extremities -Tearing down I arm and leg at 10 he falls asleep again Can do with less sleep. Went P. With drawing Pain in bones, shifting about in to bed at 1 after drinking beer and wine in evening, woke at 3 and felt as if he had slept enough. Sleep-Upper Extremities.—Soreness, very painful in an lessness the first twenty-four hours, then alternations terior part of l axilla. Twitching in l triceps at 9 of waking and sleeping. Difficult falling asleep, PM Shooting in arms at noon, extending to elbows. with frequent waking on alternate nights Sleep dis-L arm and hand asleep in morning on waking turbed, night restless Dreams lewd, with erections asleep sensation in arms and < hands, when riding in some nights, vivid, lewd, with crections and emissions, Intermittent pinching in middle of 1 D not unpleasant, a mouldy sausage in his room caused a D that he saw a funeral procession with a large coffin and many smaller ones, the persons had died of scarlet fever, the procession almost came up with him and stopped at the corner, as he attempted to get out of the wind which blew from the procession he woke.

Fever-Susceptible to cold , < walking against the wind in evening ('hill at night Cold feet, Heat, fourth finger Burning pain in I carpal bones at 11 < scalp; of hand and face; of palms, pressing burn-PM Indefinable sensations in and around I, wrist ing in spots on skin Claimy sweat on waking, dis-

### Gambogia.

Gum Gamboge, obtained from Garcinia Hanburii, Hook f, is dissolved in alcohol (1 to 9) for a tincture.

General Action .- A powerful drastic cathartic, often

Ally.—Aloe

Generalities.—Sticking, < evening, burning, at times PW, < 10 PW, extending down thighs Rheumatic in fingers, at times in hand, also in malleoli, then pains from I hip to r Pain in hips, small of back over whole body; like a pinching over whole body and sacrum Uneasy painful sensation in hips and Pressure on head, stomach and chest Congestion of thighs, with desire to change their position often when head, chest, uterus Feeling of ease and lightness in sitting Lancinations in knees, waking him. Rheu- all movements Faintness, Aggravation in evening or matic pain in I knee, < r, < walking R knee gave might; A when sitting, amelioration on motion in open air;

Mind.—Cheerful, talkative. Ill humor in morning

Cramp in as he would wish.

Head.-Pain in forenoon and beating in forehead C in soles, < in forepart and under toes, < r., wak towards nose; oppressive P in afternoon, > open air, with heaviness in forehead or with general heat. Com-pressive pain; from both sides in forenoon. Heaviness, with mertia, drowsiness and pain in small of fourth toe, then burning pain behind ball of I great back. Vertigo in morning on rising, or in forehead when spinning (then anxiety). Heaviness in fore-Skin -Creeping down back. Pricking stitches, < head in forenoon, with beating. Tearing in I. temple Brused pain in vertex in forenoon, > open air.

Eyes. Burning in evening or afternoon, photophobia, both > walking in open air, but returning next mornthi; D. as from sleepiness, with yawning and sneezing region Nightly agglutination, burning in morning, photophobia through the day, and frequent stinging in eyes. Pressure in r. internal canthus as from a foreign body obliging rubbing Itching of uner canthi (and in forehead), with acrid lachrymation after rubbing. > open air . I. of l. lower lid. Biting in external canthus, > rubbing Dim vision of r eye occasionally.

Ears.—Sticking Deep-seated tearing in evening Painful drawing from r. to vertex in forenoon Throbbing pain in l as in an abscess. Frequent ringing in morning. Frequent buzzing in afternoon and evening, > after a sensation as if a leaflet were bursting

Nose.—Ulceration of r nostril, with burning pain might Sneezing, violent chronic, only in daytime, < forenoon, < strong smells, with irritation in r nostril, above wing of nose, dryness of r nostril, the sneezing caused tearing in forehead, sticking in 1. side, heaviness of lower limbs and flushes of heat all over body. Stopped coryza; then discharge of offensive mucus

Face.—Tearing in r malar-bone in evening and in r lower law frequently during the day Burning ves-

icle on inside of upper lip

Mouth .- Tearing in r molars and in gums, with sensation as if gums were sore and swollen Beating in a Taste sweetish in mouth and throat, then expectoration of bright red blood, taste S in throat, with expectoration of bloody mucus. Taste bitter

Throat -Tearing in tendons of sides of throat, with choking, lancinating tearing in throat under 1 ear, < gottre Sore pain, which is felt on external touch breath Swollen feeling internally Sore burning posteriorly in fauces when not swallowing Roughness and burn-

ing, causing constant hawking

Stomach.—Violent hunger. Increased appetite and much thirst (loss of thirst in the first days of the proving) Aversion to food. Thirst after dinner, and < evening; violent T in evening and at night, preventing sleep Frequent, violent, empty eructations Hiccough in morning after rising Nausea; in morning on eating soup, > bread; when walking in open quent, but little at a time, of one or three drops at air, with salivation, gulping up of sour water and a time, then intermitting and finally returning with movements in stomach; with stomachache; with burning at orifice Urine increased; scanty Leucorptyalism and roughness in throat; then pinching them Menses too soon and too profuse in umbilical region and diarrhoea. Constant heaving, > dinner. Violent vomiting, horrid V. and purging, with faintness. Dartings. Gnawing, with movements with hoarseness and hawking of mucus, C < night, of flatus in abdomen. Ulcerative pain, > eating, then rumbling in abdomen when walking in open air, and violent, at night, with expectoration of loose mucus: papescent stool. Paroxysmal pressure in S. and dry, at night, forcing him to sit up; hacking and dry, chest at 3 and 9 P.M., impeding breathing. Pain as if in daytime. sore, with sensitiveness to touch, with contraction. Chest.—Sticking, in axillæ, etc., beneath r mam-

in afternoon. Statches in r. side and in temples. | Constriction after dinner. Beating, < leaning against anything. Emptiness, and in abdomen. Weakness as

after fasting, with salivation

Abdomen.-Rumbling Inflation and accumulation of ing. Itching in evening Dryness, with redness of can-flatus (Aloe), I. and tension, with pinching in umbilical Frequent emission of flatus, < evening and Inflammation of intestines Cutting, with night. wanderings, then emissions of fetid flatus Pinching after eating; immediately after eating, P in abdomen or sleep, frequent P without urging, or else succeeded by diarrhosa and burning in anus, after which the P ceases. Flatulent sensation, < small of back, then urging Burning and movement of flatus, painful B in hepatic region Pinching around umbilious from morning till evening, with frequent urging to stool, and protrusion of rectum Contraction at umbilicus, beneath U, with twisting and urging to stool Gnawing in a spot beneath U Sticking in groin. as from flatus Sudden darting in (+ when sitting Tearing in bones of dorsum Itching of nostrils all Priching in G, in r., as with a nail Constriction deep in l. G. Tension in G , when standing

Anus and Stool.—Sticking in anus before stool Ineffectual urging. Yellow and green diarrhea, mixed with mucus, preceded by cutting around umbilicus (Aloe); repeated D, with discharge of green mucus, preceded by pinching in abdomen; D, with burning pain Mucus smelling like pus. Hiemorrhage, and from and tenemus of rectum, protrium of anns, and puch-mouth and throat, bleeding from r nostril in evening around umbilicus, sometimes with discharge of flatus, watery, profuse, with colic and tenesmus, fiecal, forcible, with burning in anus, preceded by cutting in abdomen, waking him about midnight, > compressing abdomen, which is small, as if eviscerated, awakened again by pain in back, with cutting, fre-Flower molar in cold air Cold feeting in tips of the state of the stat quent, with burning and tenesmus Frequent soft trusion of rectum, hard, before midnight, then burning at anus and passage of a lumbricus or with sticking in groins and emissions of flatus Repeated S, rather hard than soft, then a hard, then a soft stool S late external pressure, descending to region of larynx, with in evening, with frequent emissions of flatus, which stinging in throat when swallowing Stinging in r seems to press on bladder, causing stinging, hardness side in evening, S on swallowing, > cating; S in the and tightness in region of bladder and shortness of

> Clinical. -- The diarrhosa of Gamboge resembles that of Aloes in respect to the suddenness of the movements, which are Access in respect to the widdenness of the movements, which are expelled in one goah, the extentions are thin, vellow, generally watery, or with some muce, and the standard growth and and the standard growth and the standard growth and the standard growth and the expelled in the standard growth growth

> Urinary and Sexual Organs .- Micturation rare, fre-

Respiratory Organs.—Scraping in region of larvnx at night, causing dry cough Cough in afternoon. with soreness in chest; < night after lying down;

mary region, repeated S in forepart of sternum, in morning, with elongated sensation in anterior teeth, afternoon and evening, intermittent, in forepart in with chattering of teeth, thirst so that the lips stick afternoon and evening, deep in forepart in evening, together, but skin warm to touch, with empty eructa-alternating with S in r mamma, beneath C in evening, then pressure in middle of chest, with want of ing as of ants over whole body (at night) or sticking in breath, under I abilla, > rubbing, in r side, ex- ears, in the beginning, sudden transient shaking C. breath, under I axilla, > rubbing, in r side, extending from ribs towards axilla, after carrying a heavy load, arresting breath. Digging in subcostal at 6 to 8 15 P.M., lasting from a quarter to two hours or region in evening, or gnawing Pam, as if every part were were, even when not coughing Pressure in muldle. with sticking from both sides towards each other; pressure upon C, not affecting breathing Weight at might, preventing sleep Oppression and heaviness, with sticking in back, subcostal regions Tightness and heaviness, with sticking extending to back, in flushes, H mounts to head, with sweat General < hypochondria Choking sensation ascending into sweat in morning, on waking at 4 A w ; at night throat, arresting breathing

Neck and Back -Tearing in nape and I shoulder lancinating T in side of neck Sticking in region of l kidney , in r sacral region , sudden, in sacral region, walking Bruised pain in small of back Gnawing bens, L (wintergreen)

in or coccygis

Upper Extremities -Intermittent sticking in top of r shoulder Tearing in shoulders or in axilla, in tendons of extensor muscles of fingers, in ball of thumb and index and between metacarpal bones of index and middle fingers, so that the skin is drawn backward Pinching in r humerus Sticking through palm to back of hand, then burning in hand, S in last joint of 1 index, in ball of r thumb and middle finger, with numb feeling, then S from palm through to back of hand and extending to forearm, with heat

with tearing and with contraction of toes. Sticking in I calf Tearing from middle of r. tibia, extending above knee, T in tendo-achillis, with drawing as if too short. Pain along r tibia in afternoon and evening in bed, with stiffness and with difficult stretching of toot Bruised pain below I patella with ulcerative pain on touch Pressure as with a hand above 1 externus mallcolus. > pressing foot to the ground, with sensation as if asleep Spasmodic constriction in region of r externus malleolus and great toe, when walking, causing limping Sticking in r sole, & rubbing Pinching in dorsum of r foot, towards toes Heaviness and languor of feet. Cramp in r great toe when walking and in evening in bed Sticking beneath r great toe Spasmodic tearing in two r smaller toes

Skin -Pimple above orbit, with tensive pain , P. on inside of forearms, with redness and itching in evening Itching blister, pale, then red, on hands Biting over whole body as from ants < evening and at night, even walking It hing, < evening and night, and after scratching generally a burning ulcerative pain, with swelling and redness, I of ball of I thumb, I here and there on head, I side of forehead, face, upper surface below elbow, ball of thumb, index, bend of foot, dorsum of hand, voluptuous, here and there over whole body, < evening and night, even waking, usually with burning, at times followed by redness and swelling

by anxious dreams dancing, lice, etc.

waking him at night; internal and external, beginning till 5 A M , sometimes with thirst , shaking, from 7 P M. till 4 AM, proceeding from back, with external coldness, even of forehead, in l. temple in afternoon, as from a wet cloth Remittent or intermittent, quotidian or tertian fever, rather postponing than anticipating Heat in afternoon, with anxiety and sweat, H

# Gaultheria.

A tracture is made of the fresh leaves of Gaultheria procum-

Convulsions Insensible, apparently in sound sleep, but could not be aroused for ten hours. Restlessness Hemiparesis of 1 side and loss of power Stupidity Headache and noise in ears like the buzzing of bees Dizziness, and drowsiness, then delirium Contraction of pupils Disturbance of vision when she was not delirious, with hallucinations of sight and hearing Dulness of hearing Tongue dry, smooth and swollen, so that speech was rather indis-turct, mouth parched Inability to speak. Beating of to back of hand and extending to measure, and the learning of the learning of the learning of the learning in head of 1 thigh. Tearing in 1 hip, in bend of 2 thigh. Tearing in 1 hip, in bend of 2 thigh the learning in the learning in the learning of the learning in the the V with retching continued all night whenever anything, as a cup of water, was given him, but she was nearly strangled by the contents of the stomach lodging in fauces Gastritis Pain in epigastrium and lower part of hypochondria, < pressure with finger. Cramp in epigastrium Two copious stools at night Urine contained salicylic acid Pulse 125 Respiration labored, and quick, labored, slow, prolonged, loud but not stertorous Sleep only prevented by strong currents of electricity. Cold limbs Hot skin Cold sweats

Clinical.—The oil of wintergreen has been very largely used for both acute and subscute rheumatism. The plant itself con-tains salicylis acid, and to this fact may be due some of the benefi-cial effects of the drug. It has also proved useful in pleurodynia in the anterior part of the chest.

#### Gelsemium

A tincture is made of the fresh root of Gelsemium sempervirens,

General Action .- It produces spinal convulsions and paralysis, lowering the force and rate of the heart, and finally paralyzing respiration. The paralysis of the oculo-motor nerve is noticeable, with double vision. ptosis, squint and vertigo Consciousness is preserved to the last stage of life

Allies -Arg nit, Cimicif, Nux vom, Ign, Con., Gran Generalities. I ying on I side Trembling at noon, Sleep - Sleepiness all day Uneasy sleep Disturbed with general chill, T. in afternoon, with weakness; Vexatious, anxious D D about general, in afternoon, with tingling in legs; with profuse micturation (Arg nit); with anxiety. Sudden Fever -- Chilliness all day or only in forenoon; in acute darting pains along single nerve branches in almost every part, at one time in quick succession down outside and front of tibus, leaving tendermost in from paralysis of parts. He cannot hold it erect track Pans fugitive or fixed, here and there; Brusted sensation (Nux vom) Pam, after immer, P of a shifting character all day; erratic rheumatic lasting till evening, after breaksts, < us the day ad-(Cumicif); drawing and aching, which seem to come | vanced, in occiput, head > dinner, but < 4 r m and from bones. Running in all nerves at noon, < till evening, with nausea, head > shaking it, > sit-fingers, and jumping as from ant-bites in finger-ends, ting, in head and eyes, < moving eyes, generally nails blue half way to root. Unpleasant sensation at 10 in forchead, < just over eyes, some call it dulines over A.M when in a hospital, with vectores, pullor, nausea and eyes, others a heavy pain, others a giddy pain, tentrembling of lower limbs, > open air Feeling as after dency to P during the day, < ascending stairs; band-"a fit of sickness," in forenoon; feeling of general like, around head, with shooting in laws and parietal illness, as in fever

lightness and sense of metability in whole body. Feel-is widden movement of head would cause pan, but it ing of danger of stumbling or failing inclination to did not like down Weskness and trembling through whole system (Arg. n., Cimicif.); W. in morning, with vertupe, coated tongue, bitter taste, full and strong pulse, impaferancen, mental and physical in afternoon, in contaction, tertipe to failing. afternoon when reclining for the purpose of study, ness; with throbbing and uneasiness of occiput, and after sleeping an hour was unwilling to move, > stir-excited or feverish feeling Heaviness, > profuse micring around; when reclining before a heavy shower, turition; H in afternoon; of brain, with fulness, with drowsiness; < clevators of lower jaw and lids increasing to pain, > copious micturition, then pleasand muscles of arms, with emaciation; with muscu- ant languor of system Discomfort Lightness Inlar relaxation, convulsions, staggering, want of co-or- toxicated feeling, with painless diarrhea Vertigo: dination through system, with diuresis and flaccidity, after breakfast, < sudden morement of head and walking, and coldness of gentials, with irregular and slow with light-headens; standing; with blurder vision breathing Easy futgue, closee limbs. Sensation as Symptoms < smoking and look circulate.

Aclazed muscless and motor | Forehead - Singing, with pressing in eyes as if too paralysis. Paralysis, paralytic symptoms through large and with external coldness of F. Shooting in muscular system, first in knee, then in inferior tibial sinuses, extending to eyes and jaws, with pricking from region Aggravation from any movement or touch of middle of eyes to canthi, < r eye, where the pain head or application of any fluid to lips, the dread of rolled about, S in middle in evening on turning eyes which nearly equalled that in hydrophobia

extremules, etc. Paralysas following diphthers. Locomotor status. Paraplegis In general, hystercal spassms, a kind of hystero-epilepsy Persent of neuronal convulsions. Convulsions from suppression of menses. Catarrhal sifections of various mucious membranes, with a relaxed and debilitated condition of the system, sepically in some Neuroligias of various nerves, with loss of control over the part, pans in the muscles of the back, laps and lower extremities, the pans are mostly deep-seating.

Mind.—Uncontrollable might Vivacity in morning after rising Cheerful, caroless, then depressed Irritable, impatient Anxious Melancholy; all day, ness; > profuse micturium (Nux vom). Listless and feeling on centre of scalp incupable of reflection, as after ague, with headache Paur in reference mile. S and averse to study; S. and disinclined to conversation. Aroused with difficulty. Semi-comatose Unconsciousness

Clinical.—The patient has lost control of his mental faculties, this ideas flow on in a disconnected fashion, the attempt to think of connectedly cause a parinful feeling in the head, dizmens, hat of the face, odd feet, etc., on falling saleep the patient is apt to be didfrients. In low types of fever the patient is governed by the patient is given the patient is given the patient is given the patient in a part to be desirable to the didfrient in the face of the patient is given the patient in a part to be desirable to the patient in the patient is given the patient in the patient is given the patient in the patient in the patient in the patient is given by the patient in talking or singing.

bones, stupefying, < forchead and temples Sensi-Restlessness, with chill after breakfast Feeling of tiveness of brain, with sensation as if every step or

Forehead -Stinging, with pressing in eyes as if too or head and on stooping, extending as far as half the brain, intermittent S in middle in afternoon, extend-Clinical.—General presention and loss of muscular power, printing intermitted in a minute in nucleiton, extension of the graph of the control with dim vision, roaring in ears, sensation of enlargement of head, confusion, almost amounting to delirium, the headache was heavy and alternated with sharp laborlike pain in uterine region extending to back and hips; in I frontal region, waking at 230 AM, extending to r occupital region and occasionally over whole head Pressure as if too narrow, with pressing upon eyes as if too large, P in sinciput as if too narrow in morning on waking, > pressure of hand, table, impatient Anxious Meiancnory; an usy) necessity to close eyes. Brunen pain neovember and stuped, in afternoon, with headache. Inability to los for rists. Fulness of sinceput. Weight over F think or fix the attention. Listlemess and languar Dud. Drawing over eyes, I Vertigo in brows. Contracted

all day and digging in r. ear all the afternoon
Mistinaness of brain, not affecting lucidity of thought, but
head Pain on r side of head, at breaktast, periodi-Pain in r temple, with vertigo, blurred vision and confusing the perception. Stupid, intovicated feeling, cal P extending from 1 parietal protuberance to mastold process Pain in vertex, extending to occuput, with general vertigo and headache; P in V in afternoon when writing, then in 1 occuput, on both sides

bing, previously at breakfast cutting on l. side; with

sensation as if the crown were lifted off in two pieces. heavy, at night Numbness

Cilialcal.—A large proportion of the conditions indicating Gel have more or less vertigo, which is sometimes intense and associated with loss of sight and lack of nuncular steadness, so that the pattent staggers when walking (Con) Headache as from a band around head. The pans is motly estated in the posterior part of the head, associated with muscular screeness of the new, headaches, the treat feels large, concluded and dray. Headaches at the base of the brain extending through the head to the eyes, <a href="headaches,">headaches, the treat feels large, confused and dray. Headaches the base of the brain extending through the head to the eyes, <a href="headaches,">headaches, the treat feels large, confused and dray. Headaches the base of the brain extending through the head to the eyes, <a href="headaches,">headaches, the read feels large, confused and dray, Headaches, with barries and panels of the couption of the control of the control of the couption of the climacteric period, with drowsiness, vertigo, blurred vision, > profuse menstruction.

Eves -Suffused Bloodshot Inflamed and weak. with lachrymation at intervals Yellow Distended Staring, with inability to raise lids. Strabismus Dulness in forenoon Pains extending deep downward in 1 Sore at night, sensitive to light, and lachrymation, S in evening as if a foreign body were irritating conjunctiva Burning, with weak vision and heaviness in forehead; B in forenoon as if too Dryness Heaviness as after night-watching Pupils dilated, and insensible; and muscles of accommodation paralyzed and vision weak Sclerotic congested Continual twitching of balls (Zine ). Sticking outward through 1 ball. Aching in balls, < moving eyes, now and then shooting, sometimes < in one ball Pain in orbits, with fulness

Lids -Drooping (Con ), < 1, with pain on attempting to open eyes widely, > closing them Closed; in spite of him on looking steadily at anything, partially closed and motionless; half closed and apparent inability to move them Swollen A stitch traversing r vertically Difficult to open or to keep open Heaviness, and congestion Paralysis of upper hid and lower jaw, overflow of saliva from corners of mouth Burning

around r inner canthus.

Vision --- Smoky, with pain above eyes. Dim; with morning stool, by holding finger extendily before nose, to the death of the description of the death of the d ing Blindness, with vertigo; almost B, and control over and higher many was seen by the covered eye, when numbrass (Con., Acon.), felt thick and he could not articulate the object was high above the head the images gradu-late; stiffness and thick, guttural voice; use lost and ally coalescot and the object looked like a thread, feeling like a foreign body clogging mouth. Speech with well-marked D there is impaired movement of muffled; S difficult; unable to speak or move. ball, affecting the rectus, < external, the ball oscillates | Dryness; and of throat, as after salt bacon, with disposi-

when carried as far as the muscles are capable, the D. often changes rapidly, thus while on one side the outer image is higher, if the object is carried to the other side the inner image is higher, or first the outer, then the inner is higher.

Clinical.—Serous inflammations within the eyeball Iritis with serous exudation (descemential); choroidius; detachment of with scrous exudation (descensetius); choroudius; detachment of the retuna, evintum, with hasy viteous or extravenations of blood, returnit in Bright's disease, in all these intercouls in minimumstance about the eye Paralysis of the must les of the eye, of the upper id and of the proper muscles of the eyeball. Asthenopis from mus-clar weakness Double vision from paralysis of muscles of the

Ears.—Sticking in external meatus near noon when sitting. Often affected by the pain which ascends from back to occuput. Heaviness Rush of blood. Humming. Sudden and temporary loss of hearing.

Clinical.—Deafness, the result of catarrh of the middle ear and Eustachian tube, several brilliant cures have been made by it. Deafness resulting from quinne has been cured

Nose.—Pain extending from bridge to eye Tingling in nares Lively action in region at 6 r m, when sewing, as of a worm or fish Watery discharge Bloody mucus; mucus in nose and upper part of trachea, it slips into the trachea when talking and keeps up a hacking cough Sneezing at 9 30 PM, with headache; S at 11 30 P.M., then tingling and full sensation in

Clinical.-Nasal catarrhs, with excorating discharge, sore UllBRGRI.—Assai cuarras, with excornating uncharge, sore throat, associated with physical weakness. Acute ansail catarris, especially in the summer, with inflammation of throat and pain extending much the ear, and desfiness. Disposition to take odd at the slightest change in the weather. Hay fever, with the peculiar head symptoms of the drug.

Face.—Flushed and hot to touch Congested, then pale and deathlike Heavy, besotted appearance and dark. Yellow Livid pallor F. and lips blue and livid. Looked strange, staggered and fell Countenance miserable, sunken, grayish-yellow, with dull dusky eyes Contraction of muscles, < orbicularis oris, impeding respiration Numbness Lips livid, lips pale in forenoon, dry L at 11 30 PM. and heated Jaw drooping, J. wagging sideways, no control over

Mouth.—Foaming Discharge of bloody brown upper lid almost lost Double; on raising head from mucus during the fits Stinging in I lower hollow back stooping or on looking sideways, on inclining head to tooth at 6 P M, through lower jaw to ear and zygoma, ether sule, controlled by effort of will, the images some- with burning. Pain in last r molar, up towards temple times above each other, sometimes on a level, in one Tongue so thick that he could hardly speak. Tongue case preceded by weight under upper lid, the constant coated; yellowsh-white, yellow, whitish. Tongue red, form of diplopus occurs only in upper half of field of inflamed in middle, dry T and throat; burning, vision, first with objects at extreme r or l, then nearer soon extending over mouth and throat, then through the middle, and at last only in a median vertical plane, exophagus into stomach and abdomen, then the same then D disappeared in the inverse order, the outer burning pain passed around in all intestines, simultalateral image was higher and the farther the object neously with descent of burning pain into esophagus, was carried to the r or l the greater the horizontal burning in chest, then a stitch in l lower anterior side and vertical distances between the images, when a of chest, extending into I scapula, with weakness, flutcolored glass was placed before either eye the outer tering and irregular beat of heart, constriction at base,

tion to swallow frequently. Astringent sensation. Par-| in two spots on r. side of U., extending into bowels, < alysis of muscles of M. and throat. Saliva yellowish, pressure, P below U. in evening, extending to testes, as from blood Fetid breath Breath and taste foul > expulsion of flatus. R inguinal gland swollen the latter part of the day, with frequent need to rinse and tender to touch. Movement of flatus in hypomouth or spit Taste bitter; and slimy, T mawkish, clammy T, feverish feeling.

Clinical.-Desorders of dentition in children, with fever, fughtened feeling, apparent vertigo, or with drowniness and confusion, sometimes dilated pupils, dim vision, etc Paralysis of the tongue, it feels numb and heavy (Acon).

Throat.-Pain in sterno-cleido-mastoideus, back of parotid. Hawking up of bloody matter Soreness about root of tongue and larynx when swallowing, with mucus in upper part of trachea, causing frequent clearing of throat. Dryness, with burning; D in fauces. Burning, with painful swallowing, the sufferings < food and drink, especially warm, B. from mouth to stomach.

Spasmodic sensations in gullet, with cramplike pains Inability to swallow: from paralysis of muscles of T: difficult swallowina

Clinical.—Various forms of sore throat, mostly catarrhal. Ullineal.— Various forms of sore throat, mostly estarrist, rarely olcentities, sometimes with difficulty in swallowing from the rarely olcentities, sometimes with difficulty in swallowing on the control of the contro

Stomach.—Hunger, appetite alternately increased and lost; want of A in afternoon, sudden satiety after a moderate meal Thirst during sweat Eructations; sour, of wind and bland fluid at 11 30 PM, rising of tasteless semi-solid matters in œsophagus at night when sitting studying, with flatus and sensation of something lodged in esophagus. Hiccough Nausea: with headache Retching Vomiting

Rumbling in epigastrum, > emission of flatus, with pain Pain, with nausea and dim vision, then ineffectual retching, restlessness and general sweat, I' from pyloric end to axilla and under scapula and down r arm to outer side of forearm, a hand's breadth from elbow, > biscuit and coffee, cramplike P in epigastrium, leaving constriction, then burning in stomach Gastralgia in afternoon, with colic and intoxicated feeling Cardialgia at 11 A.M when driving, in evening! when sitting, with eructations Heartburn at noon when riding, with pain at cardia. Oppression at breakfast, necessity to loosen waistband, then colic to L of navel, as before stool Sensation of something wanting in epigastric region Empty and weak feel- bladder (Nux v.) Dysuria from stricture ing in S and bowels

cough, some chronic cases, < evening

Abdomen.—Emission of flatus above and below, with rumbling Lancinations disturbing sleep, > discharge of flatus Griping through A after supper, cumbilical region. Sharp pains with pappy, cream-colored stools. Pain; in evening; at night, towards morning. Burning towards 12 o'clock, the pain going around in intestines Palpitation of muscles

gastrium at 11.30 p.m. Gnawing in region of transverse colon all afternoon. Pain in l. iliac region. P in transverse colon, with vellow face, moving P in hypogastrium (after chills, headache, feverish and prolonged sweat) waking him, then a large natural stool without relief, soon > bilious stool, nine hours afterwards another bilious stool without pain.

Clinical.—Gastro-intestinal catarrh, with jaundiced hue, ersistent nauses, dizziness and diarrhosa. the liver, with vertigo, blurred vision, etc.

Rectum and Stool .- Piles returned with raw smart-Urging to stool caused by exciting news, stool papercent, dark yellow Stool bilious, and soft, preceded by threatenings of diarrhosa, the latter renewed at noon by exciting news and afterwards when walking Loose but difficult S, great strength in sphincter muscles. S at first consistent, then papescent, bilious, homogeneous, preceded by flatulence A second, consistent S after Tea-colored: and semi-solid Insufficient. Slow (having been put off), leaving a sensation of more to be passed and abdominal repletion Attempt to pass stool, but only wind passed.

Clinical.—Diarrhea, both acute and chronic, resulting from depressing emotions, such as fright or grief, stools generally paintess or even involuntary, without much thirst (compare with Arginit, which is also indicated in diarrhea from emotional excitement) Paralysis, more or less complete, of sphincter ani, and in some cases partial prolapsus of the rectum.

Urmary Organs .- Paralysis of bladder so that there was constant dribbling of urine, with muscular weak-ness, < r side, in arm and leg Frequent micturition of clear limpid urine, relieving dulness and heaviness of head (Ign ), frequent M. Urine copious at night; C, dear and watery (Ign ) , C , watery, with chill, trembling and allowation of heaviness of head, dulness of mind and danness of vision. Urine at times clear and limpid, at times milky and turbid Redness about orifice of Feeling as if something remained behind when urmating, stream intermittent (Nux v) Agreeable sensation in urethra during micturition

Clinies1.—Loss of power of the bladder, especially in old people, or following diphtheria. Fundus of bladder paralyzed and the bladder enormously distended. In incomplete paralysis of the bladder the flow is intermittent and the patient seems not to empty

Sexual Organs -- Irritation in spots on mucous mem-Clinical.—As a rule the Gel cases have no thirst, and there is brane of presults assistant of empirical washings in the someth, is generally assistant on feeling of a heavy load. Munerous cases of he I of r testes in afternoon and evening, then dragging pain extending into groins and hypogastrium, > discharge of flatus Emission at night without crection. Sharp labor-like pains in uterine region, extending to back and hips (Cimicif) Discharge of blood from vagina from 4 to 5 PM, next day after 6 PM.

Clinical.-Great weakness of the sexual organs, so that men colored stools. Pain; in evening; at night, 'towards morning. Burning towards 12 colored, the pain morning. Burning towards 12 colored, the pain going around in intestunes Palpitation of muscles Heaviness. Weak nauseated feeling Tenderness of parietes.

Sharp drawing pain through 1 hypochondrium. Pain in 1 hypochondrium; pulsadive, at 3.30 p.m., Rumbling in umbilical region Sticking around umbilicus. Pain in U. region in morning till rising; 1.3

Respiratory Organs.—Glottis spasmodically closed. Paralysis of glottis and difficulty in swallowing

throat as if to tear it open Struggling for breath, quiet, but subject to great variation from exercise, and kindeath sensition, as in to tear it open. Struggling for breath, quies, out subject to great variation from excrease, and Sufficiantly sensition, as in hysteria. Difficult, with op-wirely unequal, when the first stroke is stronger than pression in pracordial region, then a series of short stretchous and imperfect. Heavy, in morning, in the pretending one the second one is scarcely perceptand maprations, then three or four prolonged gaps, station of which is stroke is stronger than Stertonous and imperfect. Heavy, in morning, in their crimiteria pulse, shaking of heart so that she feels it afternoon. Moaning, Sighing, slow, at times sob-lass far as neck. Weak. Scarcely perceptible; with hong Slow, and eatching, and superficial, with now diffiliness, cold feet, thest and pain of head, etc. and then a deep inhalation, with rapid pulse; with Pulseless at wrist and carotids. offensive breath and slow pulse, then rapid breathing and quick, weak pulse, then spasmodic Scarcely soreness Rheumatic pain in 1 side on lying down. perceptible

ular action of heart and dyspinea; in I lower anterior beginning of fever side through to I scapula, with irregular action of heart Construction around lower

cerative pain on touch and even on pressure of a loose of great toe. Rheumatic pain drees, and with fulness, B in chest at noon, going into Weakness towards 12 o'clock, W of hands and feet, put of stomach and radiating over the parts covering with indusposition to move Heaviness Gradual loss of the intestines like a tree, the stem of which is in pit of control. stomach with fulness, sighing and anxiety, B under lower part of sternum in afternoon, with heaviness of chest, drawing towards I. lower anterior side of chest, where there had been sticking, which is now repeated, ulcerative pain and tenderness to touch, chest > when the burning went to I side Weakness on speaking

Heart.-Sticking Shocks in forenoon at every extrembling, weakness and sweat, S at noon, with heavy breathing Feeling as if it would stop beating if she did bling of body. Sounds heard as if far distant.

ing of muscles, albuminuria, sharp cutting pain from the neck of Clinical.—Palpitation and oppression about the heart, the the iterus nuward effects of grief Heart's action feeble, the pulse soft and weak, exeffects of grief tremitles cold

Pulse.-Rapid; and full, and bounding, then feeble Burning from laryny into chest under sternum Voice and thready, and weak, and weak, small; and small neal, V. thick as if tongue were too large Paroxys- all the afternoon, rises during the reaction after the mal hoarseness, with dryness of throat Food drops chill as far above the normal as it has been below it. into traches when eating, causing strangling Cough Full. Hardish at noon, and intermittent, during the from tickling and dry roughness of fauces. hacking intermission two quicker double strokes of heart, C, with feeling as if a drop of liquid were in wind-changing in rhythin but not in time. Irregular in pipe and with frequent clearing of throat Expecto- afternoon; I, feeble and sometimes intermittent ration of thick yellow pus Inability to expectorate. Fluttering Slow, but arterial tension increased then Respiration — Choking, pushing his fingers into his impairment of heart's action, when the person is

> Neck .-- Aching in muscles of N and shoulders, with Contractive sensation in r side at 5 PM.

Back .- Pam as in cold stage of ague. Rheumatic Clinical.—Paralytic aphonia, with dryness and burning in throat, C during menstrution. It has been used for spann of the groun in historic and joints of B and limbs at night the glotten inchilers. Occasionally in surgents. Caratrial affections of the atr-passages, with distressing fallows in the cheek codd attention. Dysness, with distressing fallows in the cheek codd attention test, threatening sufficient, dealer for fresh air, see paralyses of the lungs, ospeculity in old people and the surgent paralyses of the lungs, ospeculity in old people. ralysis of the lungs, especially in old people sacral region, in sacro-iliac and lumbar regions and Chest.—Sticking, in anterior lower 1 side in after- lower part of 1, thigh at suppor-time on entering a noon, through I lower side into scapula, with irreg- warm room, < eating, with languor and thirst as at

Extremities .- Trembling in afternoon, at 1 30 P M. when sitting quietly, paroxysmal, downward in upper with chill, then stinging outward along I lactiferous part of r lung on taking a long breath. Cramp in r ducts, < sternal half of breast. Sensation of a galside at last short ribs. Pain as of a thrust with a sharp vanic current down torearm and hands and in feet, instrument under I floating ribs at 2 PM, when lying, when sitting Pain, waking at 4 AM, at night, changing immediately to 1 temple, causing contractions after midnight, > day, at night, < forearms and tion of brow Pain, behind fifth rib to l of sternum calves, also in knees and elbows, in l clbow, wrist, at night. > cructation, periodical, in pectoral mus-knee and both ankles, deep, and in joints, in muscles; extending from ensiform cartilage along free cles, deep, in muscles, > movement; deep in musends of r short ribs to lumbar region, as if liver were cles of upper, waking at 3 or 4 AM, in 1, arm and congested, < a hand's breadth from lower end of ster-both calves, in bones or deep in muscles in region of num, shuddering, in r breast Soreness when cough- humerus and in lower limbs, at 10 AM. in muscles of r arm and shoulder, and sometimes in 1 arm and Heaviness in afternoon Burning in I anterior side lower limbs Pulsative pain in I hand and fingerat S A M , where she had lately had sticking, with ul- joints when lying, and at same time in r foot, < ball

Clinical.—Loss of power in the extremities, the hands are syst trief from playing on the pinne, writer' cramp, loss of power in the lower extremities, gait saggering, the lower limited as heavy as lead. Rheumatic symptoms in the lower extremities, the flesh feels sore. Trembling of all limbs, loss of muscular control, numbers and take of sensibility of the extremities.

Upper Extremities.-Inability to pour coffee from a ortion, with throbbing of pulse through whole body, cup Shooting from r shoulder to dorsal vertebree after breakfast Spasmodic pain extending from inner condyle of r arm to axilla. Arms insensible to pain not move about Palpitation in afternoon Hregular Aching in 1 elbow at 7 30 p.m.; crampy, in bend of r. beating from noon till 5 pm, in afternoon, with trem-when walking after writing. Drawing about 1. elbow at 3 PM. when in a draughty church, with sching.

blunted, but not in proportion to the loss of motion work and of many people; unpleasant D

moris at 11 30 r M, with drawing in r calf down to breakfast Knees feel when walking as it standing in cold water, generally with heat of head and bones did not fit Pain under r K. when walking, face and headache when pains are felt above K they are not felt below, Heat in forenoon, in afternoon, as if sweat would and recevered Drawing pain in I hamstring, extend-break out, then chill down back Heat in face, with

rior temporal ridge, a P sore to touch on l side of at 11 30 P M larynx Painless vesico-pustules on inside of thighs ing, with profuse sweat Itching at 11 30 PM about cold (after pain in forehead) till 6 PM Dry skin. elbows and forearms; of points on face and at edge of Clinical — Eruptive fevers, especially measles, with catarrhal

Clinical—Enquive forms and the office of the properties of the pro as if I side from neck to knee were a soft muscle jerking up and down with the elasticity of jelly, the centre of this motion seemed to be in region of heart.

Sensation of a galvanic current down forearms at 6 | while r side of back, on which I lay, was quiet, with P.M. Pain in flexor muscles of r forearm. Pain in r inability to stir, on waking drawing pain in lower wrist, with weakness, sharp P. in r. at 6 p.m. Draw-third of 1 thigh, which was repeated next day Little ing sticking in dorsum of r hand, running into inid-inclination to sleep, and when it comes dreams much die and ring fingers. Sensation in hands and arms about business, etc. Dreams and early waking, D of

recors of hands and arms paralyzed and extensors | Fever.—Club!, during the day, all day, < morning, nearly so Shooting in last joint of r thumb in morning Pain in little and fourth fingers | Pain in little and Lower Extremities.—Staggering Pain, paroxysmal, cold sweat, between 2 and 4 P.M., then heat, then cold in 1 Fatigue after slight exercise (Arg nit) Feeling sweat, all without thirst; at 3 P M., with cold sweat, hot during and after a walk as if they could not be moved running in legs and burning in soles, without thirst, another step Loss of voluntary motion. Jerking at 9 PM, with profuse micturation; with chills running about middle of r rectus muscle, of vastus externus from loins to nape, with pains in and between bones muscle near r knee; from r sartorious about middle of l calt, inability to descend stairs without holding of thigh Sticking as of drawing or cramping of sin- on to something, with tremor and sudden general gle fasciculi of muscle, about origin on 1 gluteus cold sweat, so that drops stood on arms; with cold maximus, running in direction of hip-joint Campy limbs, hot head and face and headache, then flying pann in inner part of thigh when walking, drawing heat and pricking in skin, then sweat, then heat, <
C pain in bones and muscles of thighs, extending to about head and face, with full, rapid pulse Cold skin; toes, during the headache Sharp drawing pain in and congested; and claiming, finally covered with cold hir-joint, extending at times to outside of this, < sweet, in afternoon, and sweet, head cold touch in movement. Pain in this, at 7 rm, in I rectus its dismonon Chills on upper half of body, to back and nape, at 3 PM, when reading exciting news, C Sudden twisting on inside of patella when sitting along spine, cold limbs, hands and feet, feet as if

ing across joint to organ of gastrocuenins. Rheumatic fulness of head, with brused again in brain and rapid pain in r K, when walking Weakness of K Shoot, pulse, at 2 30 r M without external heat in ing in r calf at 3 r M, S midway between knee and gygomatic region and in cycs in afternoon whenever ankle in paroxysms, each more violent Sharp crampy aroused from sleepiness, B in L zygoma in afternoon, pain about largest part of I gastrochemius Contract then in r, drawing down to a gland at anterior r side ing pain in I gastrochemius, unlike other pains in of neck, where it swells and pains as if an ulcer were limbs, not > sitting Soroness of gastrochemil as forming (at this spot she had, twenty-two years ago, if beaten. Pain in I ankle, with spasmodic contract a glandular abscess, which opened internally), in I Il Detter. Plain in I antice, will a spasmouric contact: a guantituder assected, which offers and drawing pain in them. Cramp in r juggoma, with swelling, and in eyes, < 1, then in r instep. Crampy pain in r foot spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma contact | r s, in 1 zygoma before 2 r v, and in spasmouric contact | r s, in 1 zygoma contact | r s, on face and neck. Papules as in measles, but larger running through all limbs in afternoon, with burning and more distinct, < on face, with little or no sensa- in first joint of 1 index as if blood would come out tion Sore pumple, with inflamed areola on I side of (this joint is stiff and anchylosed from a wound) Hot neck, one at r corner of os hyordes, another at 1 ante- and dry hands at 10 A N . in afternoon, < palms, palms

Sweat, with prostration easy, from movement, Sudden stinging in whole skin at 4 PM as before an profuse, profuse and cold during the stinging in 1 eruption, with greenish color, then burning, then itch- breast and after the chilly tremer, sudden, profuse,

# Gentiana Cruciata.

A tincture is made of the fresh root of G. cruciata, L Generalities .- Tension of all nerves so that walking was difficult. Uneasiness. Faintness Amelioration in open air

Apprehension, with rapid and difficult breathing, side of neck to shoulder, with jerking. Tension in swelling of temporal veins, pressure in temples, and lumbar region. on reading print, indistinct vision

tiveness after dinner, < violent motion of it Con- in soles Creeping in evening over whole body as fusion Vertigo Pressure in forchead, in temples from fleas Uneasy sleep Sudden stitch through 1 temple towards 6 r m Tension in vertex, and at times jerking pain, the tension becoming an acute pressure, < exerting eyes or con-

stant thought Eves. Ears and Nose .- Pressure inward in r eve Eyes feel as it lying deep in orbits. Acute drawing

in mastoid process Frequent sneezing Face and Mouth -Two auhthous ulcers on marcin of lower hp, on either side of freenum Saliva in- heart.

creased Throat.-Violent pulsation in carotids. Redness of posterior part of palate, of both tonsils and upper ness. Aggravation in afternoon part of pharynx, at certain times of day, R of arch Head.—Confusion, when writing, with heaviness; of palate, uvula and posterior wall of pharynx, with with heaviness, and with tensive pain in sinciput; difficult swallowing and anxious constriction; R., with constriction so that swallowing was difficult, and constant hawking up of tenacious mucus Sticking in towards sinciput Feeling as after drinking liquors, tonsils Rawness and scraping; with constriction on Vertago. Sticking in middle of sinciput Pressure swallowing; R causing frequent hawking Scraping, in sinciput after 12 o'clock; P in forehead, with dragand in soft palate and half way down resophagus, ging; P outward in forehead. Confusion of sinciput. Constriction, with frequent necessity to hawk and Pain in temples, in occiput in afternoon. expectorate Difficult swallowing

Stomach.—Appetite increased, lost Thirst. Eruc-redness of conjunctiva, in balls Sticking in l'upper tations of air tisting of the tencture, of air and of lid Vision obscured Nose stopped Irritability of acid fluid tasting of the drug, of air relieving the nostrils as from coryza, then watery discharge tension of abdomen and the headache, acid E., then three sour, watery vomtings Nausca, with inclination to the down, with constriction of throat Vomiticular, or sealing, violent, difficult, of mucus, difficult, of scanty, posterior part of palate, with sticking and constriction. bitter, sour-smelling mucus, leaving scraping and rawness in throat Movements, then in abdomen, > tion to eructate Burning Sensation all day in S mation, with anxious pressure then cold water, < eating, > drinking water

Movements, with headache, then copious pasty | Faintness; and emptiness sensitive protrusion the size of a hazel-nut

rest, < motion, and delaying sleep

Neck and Back .- Drawings in cervical muscles: extending to ears, < turning head, an uneasiness so that Mind.—Weeping mood, with disinclination to talk, he could not remain long in one position; D. along r.

Extremities, etc.—Jerklike drawings in extremities. Head. Construction on prolonged sitting. Sensi- Distressing drawing in r. shoulder. Cramplike pains

# Gentiana Lutea.

A tincture is made of the fresh root.

General Action .- In moderate doses it acts as a "tonic," increases the appetite and power of digestion, stimulates the heart and raises the temperature Its prolonged use enfeebles digestion and depresses the

Allies.—Cinchona, Erythræa.

Generalities .- Dulness, with morose mood Weak-

with heaviness and fulness as if enlarged Fulness with throbbing pressure, especially a pressure upward

Eyes and Nose .- l'am m eyes; at 4 PM, with

Mouth and Throat. - Dryness Saliva consistent.

Stomach.-Appetite ravenous in evening; diminwalking Pressure, as from a stone, with nausea, ished Eructations, violent, and Nausea, in even-inward in pit Full sensation, with constant inclina-Wind and esophagus as if he had swallowed a hot morsel, and fulness, T in epigastric region, with pressure, T in stomach and external epigastric region, with dis-Abdomen.—Frequent passage of offensive flatus tention, pressure upon it causes nausea, then dragging Distention, > continued walking, with constriction, towards anus Heaviness, with pressure, anxiety, with heaviness in stomach and frequent empty cructa- nausea and difficult, full respiration Constriction

stool Paur Tension, > a profuse pasty stool, and Addoman.—Distriction, with tension, and offensive with nausea. Intermittent griping, sore sensation in flatus, and puin in lower abdomen, < about unbilling tension, < dinner, > sitting and lying, < co.e. Rumbling and gurghing, with distention, heavistanding and walking, obliging him to bend forward, ness and fulness, R, it seems as if bubbles rose the result of the unbilling seemed, dinny forward (Luting in morning, so that the must bend up, then Dragging in r inguinal region as if something would heat extending from lumbar vertebre, sleep delayed, protrude, > sitting and lying, after violent sneezing waking about midnight with aggravation of the heat, cutting in A , rapid breathing, the pain prevented sleep Stool -- Urging, then three watery stools Three and obliged him to toss about, > lying on back with liquid, preceded by griping. Pasty diarrhoea several feet drawn up, constant passage of wind upward and times Free, pasty, without the usual itching in anus downward, distention of A, even above transverse Sexual Organs.—Menstruation three days earlier colon, except epigastric region, and pain on touch, than usual, during which there was headache as if slumber after 2 A M., the pain in A alone disturbing head were too full, with distended feeling in skull, > sleep, weakness and desire for sleep, but inability to really sleep, next morning pain, with cutting when Respiratory Organs .- Hoarseness, the voice gave out touched, < from pubic region to transverse colon, in the middle of his speech, H in attacks, with sensi-ncessity to walk slowly because A. was painful on tiveness of throat Frequent expectoration. motion or a hard step. Twinging, then scanty, yellow districts twice in quick succession. Pain: with times and to shake in direction of sides. Vertigo: on during twice in quick succession. rem; with the sum of the succession and urging to stool; in going into open air; on ascending winding sairs, < walls; especially tensave pain in r. ade, < posteriorly, descending; at times, ground seemed ware when with tension in lower A. Tension, < towards even; standing, with indistinct vision; with unsteadiness ing, with shortness of breath. General sick feeling, in walking, which seemed to start from hips, so that mig, will shortness of locatio. General sick feeling, in waiting, which seemed to start from hips, so that with dragging towards anu. Discomfort in 1 hypochondrum, with pressure Pressure in umbilical Forehead.—Drawing stutches extending to r mergon, with tenson; inward; pain like a drawing cantibus Lancations; in r eminence, extending inward. Umbilical region sensitive to touch and above orbit, with heaviness of eyelid. Pain, in bone,

in afternoon. Soft stool, twice soon after rising, and light yellow, preceded by cutting Pasty, frequent,

yellow stools. Urine increased.

Voice, Chest and Pulse.—Hoarseness; in forenoon with pressure and with difficult breathing rapid in evening.

Back and Extremities.—Pain in B and abdomen, < sides Reeling in O, with gray spots before eyes motion, > sitting; P in small of B, with heaviness, and tension in limbs Sprained pain in I knee

of head, with confusion of it.

### Ginseng.

A tracture is made of the dried root of Panax quinquefolium (wild Ginseng)

to Araha

Generalities.—Heaviness in all movements Pressure and drawing alternately in forehead, r forearm, toes, thus and calves Sensation when sitting as if Bleeding from r nostril, at 9 A M. on slight touch, at the body fell backward Malase, after dinner, with 9 PM on blowing. Frequent sneezing drowsmess, internal coldness, external heat, formicain limbs; < legs, with pain in various muscles; altering and soreness in fauces; D in lips and mouth nately in back, knees and arms, sudden, at 7 r s, is far as pharynx, with swollen feeling in lips and with creeping coldness, flushes of heat, cool sweat and nanesous odor from mouth, in lips, mouth and longing to expose the body to cold air and to have fauces, < talking, with rough voice and scraping in something strengthening. Aggravation on r side

ness. Forgetful.

Head — Pain; after dinner, with heaviness, deep in open air or on exercise, with rapid breathing in brain, changing about; in longitudinal sinuses. Houth.—Tongue red and smarting, with thirst, then Heaviness; constant, with pressure in forehead rhyth- white in middle, T white, dry, with large glistening mical with pulse, and objects have a tremulous mo- papille. Speech difficult and indistinct on account tion rhythmical with pulse. Confusion, all day; < of affection of mouth Dryness; > eating, of arch of forehead, then vertigo, sleepiness and heaviness of up-palate, < arch of palate and tongue, then flow of per lids. Fulness after dinner. Seemed enlarged at saliva, < tongue, arch of palate, whole fauces, with

ressure; pain below U. region on bouch.

Stool and Urna.—Dragging towards anus, with tenwith heat, with drawing transversely through it,
semus. Sudden urging, then copious stool; constant at times. Drawing in r. bone. Heaviness ('onfuU, with frequent consistent stools. Bilious diarrhors ison in sinciput Vertigo

Pressure in temples; in r, and in l sensation as if too thick, constant P and pulsation on exertion, on vertex Pain on r. side of head Pressure in sinuses of cerebellum, P in occiput, with impending vertigo. Pressure in middle to l. of sternum; upon chest on Drawing in occuput in afternoon, on mental exertion, motion. Tightness of C. Fulness of C. in morning, so that he involuntarily bent the head backward Pulse Sudden blow upon occiput, then bruised pain Sensation in occiput when sitting as if swaying to the

Eyes.—Sticking deep in upper half, then pressure, repeated in evening by the light, S., with lachrymain r. hip near small of B., in hips and small of B on repeated in evening by the light, S., with lachryma-stooping, as from a girdle about hips Prostration tron, redness of conjunctive of bulb and inclination to close lids. Pressure inward. Pupils contracted, with Crawling in knees. Sticking and tearing in soles on the sensitiveness of eyes to daylight in dim weather, bending toes when walking

Sleep and Feyer.—Yawning. Uneasy sleep Three stimes shivering spreading over back like an electric difficult to open, with neaviness and pain the line of the stimes shivering spreading over back like an electric difficult to open, with neaviness and pain the line of the stimes shive and pain the stimes shive a stime shive and pain the stimes shive and pain the stimes shi shock, then exhaustion. Heat, of head, < cheeks, lids Biting of margins of lids, with itching, with burning Constriction of I upper lid Wearted by a bright light Blinded by daylight. Letters run into each other when reading Vision indistinct, distinct, but objects are not seen clearly because the eves wander too quickly from one object to another, swimming of objects on going into open air, with unsteady Allied botanically and somewhat symptomatically gait Vision of black floating points, of large white spots Vision double on looking steadily

Nose .- Dryness , with sensitiveness to air Scanty,

Face .- Alternately red and pale Pressure in zygotion in fingers, yawning, stretching, shivering, tremb- mata, in joint of jaw. Drawing in 1 side of lower hng, thirst, dryness of mouth, drawing in stomach, jaw, D. in ascending ramus of lower jaw, 2ygoniata weakness of thighs and legs, as during convalescence and upper law of r side Lips thick, covered with Uneasiness obliging him to walk Indolence Weak-dry rough scales. Lips red and dry, they crack ness, after a short walk, on entering the house, with and bleed, < lower Dryness of lips and mouth, heaviness in sinciput, with internal trembling feeling | < open air, > dinner, but returning, with scripthroat, in lips, mouth and fauces, < open air and Mind.—Anxiety after dinner. Generally calm, but talking, at the same time scraping soreness in fauces, impatient impulses and fear of accidents, with at times compt swallowing and by drawing art flowing hose, disposition to weep or to be anxious about the future which is dry; of lips, teeth, mouth and throat, all Thought difficult. Not inclined to thought or bust-parts stack together; D and roughness of lips, mouth, teeth, tongue and fauces as it covered with sand, in

508

and butter is difficult and leaves sticking deep in throat, ing a reddish sediment alternating with salivation, dry sensation in palate, Sexual Organs.—Erections when sitting at engrosswith salivation Salivation, with nausea Saliva ing business, nocturnal without pollutions Pressure almost grass-green Mouth and throat troubles < open in testacles Excitement air, > dinner

with soreness, cumpty swallowing, with dryness, inspiration, with sticking in r lung soreness in fances, extending into pharynx, Chest.—Sticking in r taking away the breath; sudscraping soreness in faures, extending into pharynx, scraping soreness in faures, extending into pharynx, 130 PM, after dinner Paun on swallowing bread, den, beneath I ribes so that he holds his breath which was not reliable I Fauces sensitive to air of the I franging in afternor wall P am near heart, preceded

time Thirst absent Eructations, with relief, empty evening Tightness, in region of heart on deep E, bitter E Nausea, with sore pain in r. flank, breathing, > walking Oppression, < sitting under ribs, touch Swelling, with throbbing, anx- Heart. Lancinations in precordial region, here

Abdomen.—Inflammation, with pain and borborygmi, but oppression in pracordial region I, with tension and pressure in hypogastrium; I as Swollen sensation Pain, then liquid stools in evening, P rising to region of stomach, with pain on leaning against it, vague P, and in chest; as from a bar, with digging and starting in r hip, then internal pain, in r side from hip to below ribs, in r side as far as groin, with formication reaching to foot Digging in r side as far as groin, rising to stomach, with griping in whole hypogastrium Pain in r side of hypogastrium extending to groin, with painful and occiput, with stiffness of nape formication as far as great toe, causing lancinations H Brused pain in r iliac region, < pressure Heaviness of pelvic members

Clinical.—Loud gurgling noise in the cecal region, dry tongue, debrum on going to sleep. It seems to have relieved the threatening inflammation of perityphilitis, and possibly also re-lieved the local symptoms of typhoid fever.

Rectum and Stool .- Sticking in rectum Stool soft; hard, hard, difficult, then smarting at anus, tenesmus and lancinations in rectum , difficult but not hard;

smarting Sticking in fossa navicularis Tickling in in spite of a bad night Weakness, < 1 fossa navicularis, voluptuous T in end of urethra.

stale odor from mouth, so that swallowing of bread red lateritious sediment: lemon-colored. after stand-

Respiratory Organs .- Voice rough; and hoarse, Throat.—Redness of uvula, fauces and posterior deep Dry cough, in afternoon, in paroxysms Dysppharynx, of uvula and fauces, with pain on empty noa. Oppressed breathing; worse when sitting than swallowing and swallowing of saliva Sticking in when walking, slow, deep, difficult, short, auxious, pharyny Scraping in fauces, in T and fauces in after-deep now and then Frequently deep, labored inspinoon; in fauces and pharynx on empty swallowing, rations, when sitting, frequent deep I, with tightness with dryness and rawness, in fauces, < talking, also of chest, anxiety and heaviness of limbs. Difficult

by shivering, which extends to elbow Constriction, Stomach.—Appetite increased; great, at an unusual with anxiety, C. transversely across lower part in

nety and nausea. S from flatus Lancination in r and there Pain in pracordial region; at 1 side of side of epigastrium Pain, with feeling as if it would cardiac region Tightness as if something were lying burst, dyspnoa and pressure in 1 frontal eminence on praccordial region, with deep, labored inspirations Constriction in region, with difficult breathing, C Palpitation Beats increased; stronger and irregular; constitution in eight from the control of the contr

Pulse.—Rapid, in morning, in afternoon, and irtar as below r ribs, with pain, from flatus, discharge regular, < slightest cause, and full, and irregular; of which relieved; from flatus, and pain in umbilical and small, weak, and small and soft, after coughing region, < pressure Tense, painful Rumbling Noises and jerky; small, then slow and full, alternately rapid from wind, it goes upward and downward Tension and slow Jerky, sometimes like a quick trembling, that is also felt in chest Slow and full Irregular, and sometimes 90 when sitting, at 3 PM, more rapid when sitting erect, slower but fuller and larger when sitting bent forward Fluttering Could not be felt, but it was an undulation, then small, soft beats

Neck .- Cracking in upper vertebra on moving head Pain in nape, in muscles of neck and loins Drawing in I muscles Pulsation in r side Heaviness of nape,

Back.-Sticking Painful lassitude along, with there, P on r. side of II, extending to I, then rising bruised feeling down to sacrum Stiffness Pricking to region of heart, in H, with pressure in groin; ex- in scapulæ extending to I shoulder Lancinations betending from within pelvis to thighs, as if one must tween scapulæ, in shoulders and along spine to such to the ground, then four thin stools; vague, in sacrum < straightening himself, with difficult breathing Pressure in spinous processes of several dorsal vertebræ. Deep lancinations around loins Bruised pain in sacrum Pain in'l lumbar muscles, < bending or turning

Extremities.—Cracking in joints on moving them. Drawing in arms and limbs as if beaten Bruised pain in various muscles; B pain alternately in difterent parts, B pain in afternoon when walking, with weariness, alternately in 1 knee, elbow and foot when sitting Peculiar lightness and vigor in spite of much Urmary Organs.—Frequent desire to urmate, with walking, peculiar lightness and flexibility in morning

Upper Extremities .- Pain in shoulders, with crackwith erections Itching in urethra, with burning pain ing in them, P in shoulder-joint; in l. upper arm. and frequent urging to urinate Urine scanty; and Weakness of shoulders and upper arms, of arms, with dark; and clear, in a thin stream, the bladder did painful drawing in muscles of upper arm Constricnot empty itself, only by pressing is a broad stream tion of flesh of lower part of l. arm Pain in muscles produced; abundant and clear, yellowish U., with of lower part of 1 forearm as from a hoop Objects held with uncertainty, so that they easily fell, with | cold skin, bluish nails, weakness of r limb. onnressed haste in all movements sensibility of fingers Hands feel swollen on closing light Warmth of skin, which seems soft and fine. them, and as if the skin were tight. Fingers feel fine Heat of head, forehead, of whole body, < back, from and smooth, and agreeable warmth of their skin Con- a small glass of Malaga wine, with distention of veins, traction of r fingers, with stiffness of their joints. externally in tips of fingers. Drawing in side of r index.

Lower Extremities.—Tottoring, with knees bent and legs spread apart, in open air, with beginning vertigo Sensation as if tottering in open air; always on going into open air, and sometimes real staggering, < ascending steps Cramp-pain from r hip-joint to tips of toes Heaviness Difficulty in walking, with limited the peripheral vaso-motor nerves Its action is ing; D in ascending steps, without weakness Cutting in r. hip, extending into abdomen and forcing him to bend over Bruised pain in hips Pain in muscles of I thigh; in muscles of interior and middle parts of! thighs when sitting: from 1, groin to knee, with stiffness . in r. knee : in outer side of r. knce Crackr calf Retraction of muscles of r leg, with brused printing and frohing at mouth, after alternations of pulpain in hip-joint Sticking in r, then I tibia when walking and sitting Tearing here and there in mus-cles of 1 leg, in I. tibia, on surface of 1 leg, between tibia and fibula Pressure in r calf. Drawing in calves Weakness of legs, r Lancinating tearing in r tibial-tarsal joint Pain in knees and ankles, soon alternating with drawing in calves and r joint of jaw, < walking Tensive pain above and behind 1 malleolus when the foot leaves the ground in walking and the tension is brought upon the tendo-achillis, extending to sole, < walking rapidly, so that he lumped, > walking slowly Drawing in feet when sitting, extending to back, with coldness Weariness of feet Lancinations alternately in both great toes Sharp pain in I great toe, long affected with gouty swelling which has disappeared Pain in r great toe and in muscles of forepart and middle of thighs Peculiar weak pressing in r toes Internal trembling sensation in 1 toes

Skin.-Veins very small Itching pimples on neck and chest Prickling in calves Smarting on r cheek, chin and wing of nose, with itching and heat, then erythematous burning redness, then miliary pustules with formication, then tetter ending in desquamation Formication along r thigh to foot, with stiffness, F at night along r thigh to great toe, where there are lancinations Itching under r. foot

Sleep.—Yawning though he had slept all the mornstart Many dreams, with frequent waking, mostly A from tea. Alternations of head and heart sympwith headache Remembered dreams. Vivid, volup-

tuous dreams. Fever.—Sensitiveness to cold Coldness after a walk, C, with trembling and with numbness of and vascular excitement generally hands, coldness of fingers, which are white, numb and prickly; piercing into occiput, in r elbow and seemed strange. She felt as if she woke from a dream parietal eminence, with crawling; through back, in and she moved her arms like one waking from a back, extending into bones of arms, with cold hands dream and blue nails, in back, extending into limbs, which and inclination to jest Agitation Terror are cold and feel brussed, in spine, > walking, with sensation as if chest were screwed together, F. with coldness in head and limbs, weakness of limbs, that she had been poisoned, F that her death was ing, oppression of chest, prickling in calves, pulse 55 atom to run away. Depression Recalls old griev-to 60. Shivering through back, with warm limbs; ances and determines to justify limited to destinate when walking and sitting, extending into arms, with ideas, so that he could not tell where he was; scorredy

Sticking in I hand, with in- respiration, pupils contracted, and sensitive to day-

### Glonoine.

One part of Nitro-glycerine is dissolved in nine parts of alcohol for the tincture.

General Action .- Identical with Amyl-nitrite, paramore lasting than that of Amyl

Allies - Amyl-nit , Cactus, Mellilotus, Nitrous oxide Generalities.-Head fell backward, jaw dropped, stertor, pulseless at wrist Tremor, sopor, lassitude Falling down unconscious, congestion to head or heart, face sometimes pale, sometimes red; F down senseless, with was poured on head, ending in vomiting, then short relief, then return twice of pressure and throbbing in brain, each > vomiting. Fulness in vertex, forehead, through body, chest and abdomen. Throbbing through whole body; uhen bying, on moving about, wherever the body touches anything, wherever he puts his hands, with heat and sweat Feeling as after ether, lightness, then fulness in brain, with dizziness Discomfort Inclination to stretch backward Sensation

as before ague Nervousness; with clammy sweat Weakness, in morning; during headache, with apathy; with sleepiness, inability to study, dulness when thinking, wandering of thoughts when writing Faintness, before nausea; fell senseless on pavement, lay breathless, sighing at long intervals, face pale, conscious in two minutes, sweat, nausea, cold hands and feet, pulse feeble, must have head elevated, it felt full, vision indistinct, dizzy, face pale, at times flushed, at times dark livid, symptoms < motion, > hot foot baths, vomiting caused by jolting of carriage, sticking m occiput Body seemed asleep while the mind was awake, the latter resolved to take notice of crooked, lagged objects before the closed eyes, attempted in vain to raise the body, it seemed to shrivel till completely asleep. Paralysis of all voluntary muscles, partial P of muscles of mastication and of face and eyes Aggravation on r side, A during rest, from coffee if wine has been taken. Amelioration from ing Sleepiness Sleep deep, prolonged, quiet, to hisck coffee, A during sweat, after each evacuation, wards morning Wakes with difficulty or else with a but return of headache each time he continued, partial but return of headache each beat and heart sump-

Clinical.-Epilepsy, with great rush of blood to the head

Familiar things Mind.—Delirious, then comatose Animated, talkative, great flow of thought pressure in testicles and elbows, frequent deep breath-approaching Anxiety, with headache, with inclinknew what he was about, > effort of will; C, with weakness and with diminished power of tongue. Inability on moving; of brain on shaking head, with sensation to collect the thoughts Memory difficult Stuper, as if hard and loose, < shaking; and he is afraid to weakness of mind and body Partial misensibility and shake it lest it should drop to pioces; with laced sendislike to being aroused Unconsciousness

pulse very rapid, pulsition in carotids, or in other cases when there was violent minincal excitement with hot head—It certainly has relieved the mental confusion which is characterized by the loss of the sensation of location, so that one loses his way in wellknown places Insanity caused by long-continued heat of the sun , thought he was the Lord Almighty

backward II and face puffed up, blood forced up- smaller than cavity of skull ward, convulsions, frequent unconsciousness, conjous urine containing much albumen Brain tever Sudden piereing pain Sticking in morning on stooping Darting pain in morning when stooping Painful twitching here and there, T. at every step on ascend-

Aching, from morning till 2 o'clock, in morning, diarrhea, pain > stool, returning, < moving or sitting crect, soloness on I iliac region on pressure, with throbbing the T < 1 side shuddering and heat in anus, at noon, < sudden risof position, on rising, so that he could not stand, in open air, at a concert, > during the walk home, with fulappears, with congestion and fulness , A and pulse increase and diminish together Aggravation of A mornings and forenoons and one afternoon; afternoon, < occiput, shaking head, pressure, stooping, stepping, moveopen air . after dinner; reading, writing and smoking . after expelling breath, if he waits before inhaling. Amelioration in open air, A. in evening; throwing H. back, lying, repose, sleep; pressure, combing hair; smoking, strong toa, walking, gentle exercise, especially in open air (Ferr) Aching, with nauses, and with dull, heavy puin in stomach; A with buzzing in I car and redness of 1 eve

Aching deep in brain; A in median line, A, rising from below upward, extending to nose; extending over shoulders and under arms, so that he walks the room all night; waking three or four times, impeding in afternoon, on descending from a carriage. breathing, like migraine, concentrating over r. eye, with dulness about eyes and heat, drawing A., extending to occiput, racking, with faintness, intolerance morning till night, undulating, in middle of brain; U, during fulness of heart Throbbing pain; all night, > in morning by coffee, on stooping; after motion, < shaking head, > night, preventing lying down, obliging him to hold on to head as if to prevent rupture of skull; rising from base of skull to vertex with every throb of carotids.

sation and pain. < shaking head sideways. Oracking Clinical.—It has proved valuable for the effects of shock, sensation in brain, obliging him to hold on to need on which show themselves by sudden attacks of terror so that he does movement to prevent apparent threatened rupture of not you not the street in autie manus or insensity it has been cranium. Sinking sensation, and in chest, as from found useful when the head was hot, full, throbbing, eyes starting, working in the hot sun. Feeling as if hungry. Sensasensation in brain, obliging him to hold on to head on tion as if he had eaten too much. Strange sensation after the pain. Disagreeable sensation, < at base of brain. Dulness; < light shaking, not by violent shaking; externally Confusion Stiffness of H and neck: or tension as if laced Heaviness, with warm sweat on Head - Holding it with both hands Hands frequently forehead, skin otherwise cool, as from a weight on raused to it Inclination to bend backward, to throw it brain, from middle to ears Feeling as if brain were

Fulness: with full, quick pulse and red face; and throbbing, without pain; at base of brain, with throbbing in all arteries of head and nape; with throbbing above and behind temples and pricking on I side of tongue near tip, afterwards the same throbbing, with almost twitching in scalp of same place, < getting up, walking across room and sitting down with general heat and tetid flatus, in morning on rising, again, vorse now and then, changing places Felt too with pain in hypogastrium and painful copious large. Feeling as if brain were distending in all directions; as if head were swelling, < stooping, with

Shocks synchronous with every pulsation of arteries ing or shaking head, with soreness, returned at 1 P M (Ferr ) Throbbing (Ferr ), during motion; < stooping, after drinking coffee, afternoon, evenings, after eruc- < temples and over eyes, < motion, > sitting still, tying tations, when rising suddenly, from every change or pressure, with heat in head, < ascending stairs; with confusion of senses, sensation of balancing requiring constant effort to keep head erect, < above ears, and in ness in rolex and throbbing in temples, when the period temples, with bursting sensation and choking as from a band about neck, which prevented blood from returning from head, heard and felt in brain at 815 PM. after running up-stairs, and at each pulsation sensation (amounting to pain) in scalp above ears; ment, motion from side to side, on every motion, begin-ning in open air, continuing in the house, > a second Undulating sensation; upward, < turning head. Feelwalk, ascending stairs quickly, leaning forward, in ing as if something moved inside on shaking head, and hit skull

Sensation as if hanging with head downward, and as if there were great rush of blood in consequence. Congestion; till midnight, sudden, frequently, in an old woman, always causing coldness, and to chest, and to lungs, alternating with C to heart Vertigo; in afternoon, on shaking head, on throwing head back, on turning around; going into open air, with reeling; on rising, with blindness and nausea, also with desire to drink cold water; < moving about, with nausea; with dim vision; with faintness, then nausea; sudden,

Forehead -Sticking in r from laughing. Piercing pain outward towards middle, more upward Tearing near middle line, not very deep. Aching; in mornof light, general distress and alarm, bursting; upward ing on waking; on looking long in one direction; on from middle, as if pressed by a band; as if brain were moving head, and in occiput; < shaking head, also pressed towards centre from temples and occuput, from evenings, > night's sleep; > when driving; in sinciput; sides of sinciput; over eyes; over r eye, in "benevolence;" in "wonder," < r, then 1; in 1 "wit," with sensitiveness to pressure, the pain > continued pressure; in "wit;" l., then r., r. side of F and l side of occiput, < shaking head; over nose and in r petrous bone; headache, beginning at root of nose; then in vertex, then in whole head;

with sensation as if eveballs were pressed out; in | remove his hat in open air because it was too heavy; alternately in temples, occiput and ears, changing to headache from front backward; extending to middle occiput and ears, late falling asleep, waking frequently of brain; extending over verex to occuput; extend with the same pain, > next morning Drawing in ring to r margo-superculiaris; over r eye and over Oppression, and in occuput Throbbing, in arteries, supraorbital ridges, across from r. to 1; and in eyes, which felt like whipeords; in r, < motion, < standard causing winking; and in occuput, as after intoxi- ing or walking in open air, moving from T to T, in

temples; extending to vertex; beginning in glabella, running through them. Rushing sensation as of spreading unward and backward. < first in front of r. then behind 1. then < occuput, extending to nose and contracting eyelids, and at root of nose and in temples after vertigo in occiput, < evening; in region of first Undulating pain in r, then l, then over whole head, fontanelle, also with fulness, in region of 1 corocompressing burning pain in F. and vertex, m a spot nal suture; extending to nape, intermittent in inwhich might be covered with the hand, with heat, shooting tensity, with confusion of mind and throbbing in temples, burning in malar-bone and forenoon, in region of 1 coronal suture, under V, with eyes, soreness in head all day, gnawing in occipit and heat and redness of face, sinking beating in aorta beinability to think Bruised sensation where the pain hind umbilicus, beating in 1 parietal region, all pains had been, B sensation in I organ of "form," then shaking head, stooping, first motion after rising, on on both sides Soreness, with bruised sensation walking, standing and turning around Confusing Pressure downword towards eyes, P upward, so that pain, with languor Burning pain. Bruised sensation he must support head; upward in F and vertex in in brain in V and region of first fontanelle, < movne most support nearly grower me and vertex in in brain in v and region to ark nonaticle, < moving foremon, as from a liquid upward from root of nose; ing head, in "firmness," r, then pulsation there and through sinus longitudinalis, with constantly in-Soreness just under V, < stooping or stepping, > creasing force, with general sweak, reduces of face and quest and lying down Pain in V and temples as if anxiety Pain in middle as if water were trickling pressed together; in V and sides of head as if pressed down inside Dulness, > open air, D in l. upper together Sudden pressure inward on V, with rush part, in l and in sides, with heat in face Drawing of blood, P upward as if there were not room enough, extending to eyes and root of nose

temples. Heaviness; over eyes; over eyes, towards pain extending to nape, paroxysmal, and in temples temples, between brows and across nose. Tension over and occiput Fulness. eyes and nose, extending behind ears, then choky feeling Parietals —Twitching in r side of head and in r about throat like strangulation, T. over sinus and across orbit at noon, then in 1 side and ringing in 1 car were loose. Brain seemed to move in r Sensation ing to read, increasing to pain in F and occiput as if something rose to vertex Vertugo

over I temple. Pain undulating and raging through < shaking it Congestion, it seems as if he must lose his whole head, < at last in region of sagittal suture. reason. Vertigo; then pain in vertex. O and neck

Pressure outward : < 1. and towards eves. Tightness sinciput, with nausea; in sinciput, with necessity to Tension in r, with occasional prickling in r. eve: T. tion r, with sharp pain, then in both and behind ears,
Throbbing pain, in afternoon and evening, and in could count the beats. Sensation as it something were

Vertex .- Pain: at night on waking, in evening Throbbing pain, in < motion, especially of head, > during rest and in Weariness like a weight over eyes, extending to open air, also across eyes. Throbbing, upward, with

nose, with fulness above and in front of ears, with press- Pain in 1, then r side of head, l half of head, ure at root of nose Fulness; all day; in r.; over vertex, r side in front and l side behind, behind ear orbits, upper part, with throbbing; in enceput; deep in and up in forehead, behind ears on shaking head, in sinciput, with throbbing Throbbing; in sinciput, sides, extending to over eyes, intermittent, in 1 P over eyes, in "wonder," sinciput all afternoon, < region Throbbing on each side near vertex and by every motion of head, < rising, under bone, ex-across in region of coronal suture, < motion and tending to temple, beneath bone, extending across looking up Fulness forward from P protuberance, temples. Sensation on moving head as if something including the whole of the anterior parts, on attempt-

Occuput -Cataleptic state of occipito-frontalis muscle during the day, with obtuseness of brain Stick-Temples.-Veins enlarged and face flushed Stick- mg Gnawing. Pain, in forenoon, gradually extending in r , then l, causing vertigo, with sickness; from ing forward and upward, from congestion; > nights r to 1, with weakness and inability to stand or walk, sleep, in lower protuberance, < r, < turning head, r without vertigo, intermittent tearing S, extending and towards ears; and in region of ears and in nape, as towards masseter muscles Piercing pain externally if in medulia oblongata, < moving head, with stiffness on 1.; P, < in I., after flushes of rising heat. Cut- of neck; with fulness, heat and thumping, then in verting, tending to move towards ears Pain; through tex, extending to vertex, extending to vertex, extending to eyes and temples, T; in r, then in both and behind ears; r. on headleshe from back to front and from below upward, exshaking head, on running up-stairs, with throbbing tending towards vertex, < shaking head sideways and in them, nauses and vertigo; < walking, talking or only a little on shaking it backward or forward, ex-reading; > open air, returned at night in bed, and tending to nape Twitching pain; in 1 and in 1 orbit when pressing on them haze before eyes; from r. to 1; Drawing pain towards O Sore pain Tensive pain extending from one to the other, to 1 of T, extending upward and downward and towards both inwardly to nose Twitching pain. Throbbing pain, sears, with intermittent tension above reve Coppresat each step, obliging pressure on temporal artenes; < sion Dulness Beating in head from back to front,
moving head, > application of snow to temples. Thain as if it would round early and at forehead, less fremoving in waves towards middle of brain, with a quent than pulse "Pulses; < outside, then pain
bursting upward and with a piercing pan on skull locateding to forehead; thumping, when sitting down, more affected than any other part. Relief in open air. but tensive pain in O returns at times.

Skull feels too small, and as if brain were attempting to burst skull, with violent action of heart and pulsation over whole body Skull teels empty Shedding of hair Pain in wens as if pressed together by a ring Numbness of scalp

Clinical.—An extremely valuable remedy for most violent **CLIBICGIL**—An extremely valuable remedy for most volent approximate congestions from a great variety of causes, in all of the properties crusing and oppressing, the oran sees as it argue in waves (Acomie). A nois valuable emerly for the effects of smateries of recalling the names of objects becomes threy and losse has way Attacks of volent hemicrans. Threatening apoplexy Symp-toms of cerebro-spinal meningitis, pains seem to rise from neck through occupit. Terrible headachs and sensitiveness of the upper part of the spine, from being thrown from a carriage

Eyes.—Staring, and wild, protruding Injected, l. during headache Bluish pallor under eyes Lifeless, much winking, looking strangely about, blue rings under eyes Dim and tearful Quivering, with mability to see straight Prickling in r Pain at 7 PM, then drowsiness and heaviness of lids, P behind l eye and ear Pressure across E , P downward upon E, P deep mr at 7 r m, when walking home Sore-ness when moved Whirling sensation under r and in bone, then above eye Heat, with tension Sensation as it water were running out Lachrymation, with heat Pupils enlarged Burning in balls; 1, with sticking Pain in balls Conjunctiva congested Lids, lower swollen, lower dead, dirty looking, as if sunken, eyes unsteady, lids contracted early in evening, as by sleep, heaviness in morning, with difficult waking Heat in r outer canthus Orbit, sticking in r , pressure in r ; twitching pain in l Pain in supraorbital ridge as if sore

Vision dim, suddenly; with tingling in nerves of hole body Weak in afternoon, letters seem blended whole body Weak in afternoon, letters and small Confused, dancing of objects He thinks he sees, with every beat of pulse, the blood-globules passing in eyes. Visionary objects pass before eyes Of sparks Lightnings so that he cannot see Black floating spots, < on attempting to stoop, > driving, with vertigo so that he could not stand Blindness, on attempting to read when standing, with faintness

Clinical.—Supraorbital neuralgia, pulsating. Retinal congestions the result of exposure to a bright light

Buzzing. Humming

ness, with heaviness and stopped sensation, partial Nose.—Twitching in wings and prickling twitching in face. Twitching pain in r side of root, darting T running from nose, late in evening

Face.—Red: during headache. < upper part of cheeks, lower lids and ears, but not forehead Blue, then red and swollen Pale, after sweat; and agitated, with nausea and congestion to chest, alternately P and red, or at times flushed, at times livid Twitching in I malar-bone, T pain in I malar-bone and temples Pain in l. malar-bone, extending over forehead to vertex Bloated feeling and heat. Sensation as if chin were elongated to knees, chin had been injured twenty years previously Masseter muscles contracted, tight as if lockjaw were coming on. Gnawing in masseter muscles. Pain in joint of law . P in r. lower jaw, < about joint, with stiffness in both sides of lower law Movement of law impeded by twitching of temporal and masseter muscles. Cyanosis of lips, with involuntary diarrhoea. Sensation as if lower hip were swollen and pendant, but it was not. Burning in lips and tip of tongue, in various places in lips, in lips and fauces, with smarting. Itching of lips and after rubbing swellen sensation Numbress of lower lip, with swollen sensation

Clinical. - Neuralgia of the face extending through the head,

Mouth.—Throbbing pain in all teeth (Sul ) Drawing pain in all r teeth as after taking cold, alternating with same in ear and lower jaw Pain in lower molars, < r, then I Tongue white, enlarged, indented by incisors, coated white, red specks, papille sore, stinging near centre and tip of T, pricking, and in fauces; pricking, a chilling burning, pricking-biting, biting in a spot on 1 side, with pricking and burning, prickling on 1 side near tip, feeling swelled, raw, with twitchings, burnt feeling, and in mouth, numbress Difficulty in conversing from diminished power of tongue and confusion of ideas

Pimples on r inner cheek Soreness Sensitiveness of hard palate Swollen sensation in hard palate. with throbbing Burning in hard palate Dryness, at night, with thirst, of M and throat at night, with choking and frequent inclination to swallow, and clamminess, and throat dry and painful during empty swallowing Filled with thick offensive saliva in morning, during the day shiny saliva which had to be ejected as if was too disagreeable to swallow Offensive breath Taste fatty, and like cinnamon, Toily; bitter; sharp and tenacious, aromatic, like pine wood, like pine roots, sweet, burning and acrid;

Clinical.—Suproorbital neuralgia, pulsating. Retinal cor-isone the result of exposure to a triphi light in the state of the core of the c ternating with pressure in forehead Piercing pain luon as if swelling, with fear, causing her to feel it confrom region of r towards r eye Throbbing pain stantly; swollen sensation in fauces Choking sensaporting outward in r Pain in r. as if swollen Pain it ion Soreness Roughness Contractive sensation below in astod process at 9 as on pressure Ten in soft palate Dryness of soft palate, < towards back save pain below in rocess. The part of mastod process. Stopped feeling in model ling, with increased saliva Tecking; waking at 2 Throbbing above E. Fulness, < r, about E. Rose. Am, with pain as if a rough feather were drawn up any and audible pulse Rushing noise like escaping his throat, causing cough, > drinking water, had the steam (racking in 1 Buzzing, Humming Deaf- same once before, Reing and in soft radiate Consame once before. Itching, and in soft palate. Constant inclination to swallow Swallowing difficult

Stomach.—Appetite lost. Thirst Increased desire to

smoke, and the smoking regulates the bowels. Eructapain in r side of root and r side of forehead Pain tions; before headache; empty; empty, with pressure in root Stoppage at root Fulness Schneidernan at pit of stomach, heavy, long, but easy, of food. membrane thick as in dry coryza. Sneezing, with Naucea; from fulness and heat in head; > sweat; > oysters and stout; > open air; > open air, with headache, congestion to head and chest, face pale; with pain in stomach and rumbling in abdomen; with pain at epigastrium, with sinking at epigastrium as from vertigo; with congestion of brain and lungs; with faintness and thirst for cold water; but inability to vomit, then headache, then repeated forcible vomiting of vellow mucus, then several thin stools, > brandy, in attacks till midnight, with congestion to chest and head. Retching. Vomiting of frothy saliva caused by coffee; repeated violent V

Gastric catarrh Cutting in S and chest. > morning, with sickness, griping in abdomen and inclination to stool Gnawing in pit and yawning Pain in pit, P. > eructation. Soreness in pit on touch, > stooping Faintness in pit; in epigastrium, with sensation of incarcerated flatus. Emptiness Sinking in parox-Unessiness, with heat in throat. U emanating from S Heat in pit, in waves through bloodyessels digest well.

### Clinical.—Sessickness.

Abdomen.—Rumbling, with feeling as before diarrhea, R. mornings, with diarrhea Flatulence all the evening Emission of flatus; frequent, noisy, during stool; offensive, giving relief Pinching before and after stool, till falling asleep, with rumbling Pain, before stool, < motion, especially walking, waking early in morning, then at 6 AM copious liquid stool, similar stools at 10 PM Sensation as before diarrhora Burning Peristaltic motion retarded Shooting under r ribs (region of gall-bladder), when standing, causing bending forward Piercing pain in l hypochondrium in morning. Pain in a spot in l hypochondrium, half way between pit of stomach and side Sensation as if blood rushed from 1 hypochondrium through chest to head, also from r, with throbbing Cutting under umbilious Pinching around U Rumbling in transverse colon, in middle and lower A., and bursting of flatus, R < lower A, during stool at would rise to throat, and pulse decreased from 72 to after 10 PM, < in bed, still worse when lying on 1 side, 64. Heat Weakness in praccordia Action rapid; lasted till sleep

Rectum and Anus - (Haemorrhoids ) Anus seems of whole condition

Diarrhoea in morning, at Stool.—Several thin might after eating peaches in evening, with sharp burning, D, with rumbling and emission of flatus, D, with sudden cessation of menses, copious, blackish, lumpy. Soft, copious Copious, loose, after lunch at 2 PM, later when driving griping in rectum

Urinary and Sexual Organs.-Urine copious, yellow, then small frothy; C, containing much albumen, U high-colored, with burning in urethra during its passage, and seventh corrical vertebre, on throwing based back.

Sensation in gentials as after repeated cottus, without learning the sense of the control of

Clanical.—Suppressed menstruation. Puerperal convulsions Cerebral congestions during pregnancy.

Respiratory Organs .- Rattling of mucus in air-passages Prickling in epiglotts. Constriction at top of larynx; C in larynx, obliging swallowing, spasmodic C in larvnx and upper part of traches. Undefined C in larynx and upper part of trachea. Undefined sensation in larynx and below it and in articulation of jaw Cough from tickling in throat Stertor Dystincea, and loud mucous rales over whole chest. Breathing rapid; and the pause after it longer Breathing oppressive and slow. Deep heavy B Breathing superficial, with occasional deeper inspirations Inclination to sigh; with short breath and oppression of chest Inclination to deep inspiration

Chest.-Sticking below sternum. Piercing inward above and below r. nipple Occasional sharp catching pain under l ribs "Incipient headache" in l Tension and frequent inclination to deep respiration to head, there changing to pain Supper did not Oppression, causing deep, heavy respiration Constriction, and oppression, with palpitation, compelling deep breathing Tightness about lower part Uneasi-Sensation as if misfortune were impending, Sudden throbbing in waves from 1 breast to head, < motion of head and change of position Fulness rising to head, throbbing in head and sensation as if skull were too small Heat rising to face and head, with throbbing in vertex

Heart.—Sound loud, strong and irregular Sticking Lancinations from region to between shoul on stooping Shocks, with pricking in hands and arms Sharp pains Pain, then heat , P., with contracted sensation: I' through to suprascapularis Tension in cardiac region Oppression, with heat in forchead. Anxiety in precordial region, about H evenings when lying, < lying on l side, > lying on r side, ceases after walking, with throbbing, a purring noise and intermittent pulse, necessity to lie with head high; A after dinner when leaning back in chair Heaviness and disagreeable feeling Fulness, it seems as if

with pulsations over whole body; with nausea, labored A, with oppression and frequent pulse Palpitation, pressed. Sudden urging, stool normal, full, then relief in hoat in face and pulsations in tips of all fingers, with diaphragm slow

> Clinical.—Angina pectoris, with fluttering of the heart and violent beating as if it would burst the chest open, with labored breathing, pains radiating in all directions, even into the arms, with loss of power in the arm

Pulse - Rapid, on shaking head, on walking, during and urging, resisted till 6 PM., then loose stool, not headache; after dinner and wine, and full, and hard, copious, it seemed as if more were to come, but that and full, throbbing, and intermittent, evening after there were an obstruction high up in rectum, before the living down, and intermittent, and irregular, full, and stool sickish and faint, the urging less when driving full, hard, then slow, and small, compressed, and soft, than in warm room, after dinner another loose scanty small, then slow, then suddenly slow, then quick. stool, then all symptoms relieved Consupation, with Full; and jerking and soft. Rounding Irregular; hemorrhoids which itched and pained Hard, at 10 and full Intermittent Double Slow, suddenly; P.M., an unusual time, with pinching in abdomen before and full, weak, then rapid, then slow again Soft and after it till sleep Small and weak Scarcely perceptable, then rapid,

ble sensation in nape, vening on pain. Constriction sleep; in afternoon, but restless and unrefreshing Tuphtuses Congestion Sensation as if something Sleep till 9 Am Difficult waking, and hids heavy moved from hape to head Turobbing, extending to Early waking. Sleeplessness, waking with fear of nape Fulness in nape, in sides Muscles weary apoplexy; S, with restlessness, thirst, heat and nausea from headache. Sithness in nape, in 1 side, with Kestless sleep on account of pains Dreams in morn-

per, going to bed, with nausea and thin stool.

Falling asleen of those on which he lay at night. The walking flushes of heat Cold limbs, feet feeling passed off with a whirling sensation The first sensations went upward, then downward into arms and Weakly, warm sensation over whole body, < standing,

the (') office, unit multi-shoulder, across shoulders, person in forehead and throbbing in temples, in head, with soon extending to arms, < on back of r hand, at throbbing, in H in finishe, with pulsation in head, inchinger-end of third motacarpus. Drawing through in growards H, from above downward in H; stangshoulders Arms drooping could not be raised Pain | ing burning in spots on head and < on neck, less on in bones of arms Heaviness of A, with numbness, body, as from a caterpillar's hairs In torehead, over H as if circulation were checked or as if going to F, with sweat, feeling as if warm water were trickling sleep. Uncasiness of A and hands. Weakness of A down inside of F. Of face, during palpitation; in and hands, I arm, with numbress and with stiffness flushes, with vertigo in forehead. m middle joints of fingers Pain in elbows, < r, in malar-bone and eye, r cheek, itching, on 1 cheek hollow between inner condyle of humerus and olecra- From nape down back Between shoulders Warmth non, where cubital nerve descends, l, then < r, similar and fulness down arms, as if in cutaneous nerves, pain in elbow but on exterior margin, P in I elbow, and in sciatic nerve, with warm aching in loins with weakness Contracted sensation in r elbow Sudden glow in hands Feeling in r wrist as if tied up, causing lame feeling along arm. Trembling of hands, < r, < 1, with during headache, · face and chest, aneltomating sympoleosic, and of wrists. Prickling pain in hands and toms, on forehead, on forehead during headache; on arms. Pain on inside of r third finger, drawing to face, hands; palms, running in streams from head the bone, from metacarpus to first joint Pulsation in and limbs, clammy finger-tips, causing trembling of hands and electrified sensation on taking hold of anything, P in I finger-

Lower Extremities.—Twitching Wearmess after walking a few steps Cracking in r hip-joint when walking, then in r knee, C in r hip and knee, then I Thigh feels as if it would give way Weakness of 1 thigh and pain from buttocks to heel along ischiatic nerve, < calf, W of l thigh and leg, with numbness, which began to lessen from above downward. remained longest in foot, on lower half and outer side of tibia, at ankles and in toes L thigh asleep Crackling in r knee when walking. Sharp pain in l knee Pain under patella, not in tendon, but on both sides, P under l patella, in l knee, with weakness, heel, especially downward and inwardly

Skin. - Dark blue Rash on face after washing through whole body to soles Itching on face; on gia in upper jaw

# Gnaphalium.

A tincture is made of the entire fresh plant of Gnaphalium polycephalum, Michx.

Generalities .- Weak all the morning, in morning, and unrefreshed, after being awakened in the night, at night, perhaps from over-mental and physical effort during the day, with uneasiness, from diarrhoea.

Mind and Head .- Irritability after the diarrhoa Headache from 3 to 4 PM, with muddy feeling about head, not > smoking at 8 PM, then night-sweat, headache, bathing with bay rum Morning on waking. fulness about temples like threatenings of nervous headache (which is periodic with him, usually after below knee, in calf, deep in I calf Legs go to sleep excessive smoking or mental effort or anxiety), > when sitting Burning itching pain externally on r. washing head with cold water. Pain in occiput Vertigo. < rising from a recumbent position.

Eyes and Face.—Pain about r eve in morning Crawling on forehead; from head to tips of fingers, after rising Intermittent shooting in eyeballs Face with sensation as from magneto-galvanic currents, then bloated and expression heavy Intermittent neural-

beck, on hands

Buth—Tongue covered with long white fur;

Au and bad taste. "Furry feeling in morning-on Sleepmess, at 2 Pm.; with hot face and pallor Heavy waking, and bad taste, > washing with cold water.

Taste flat, sweetish, sickening: T. as after chewing flamed. < 1 Taste as of rotten eyes. Tonsils swellen

shippery-elm bark.

Stomach and Abdomen. — Appetite diminished. hiccough. Nausea all night, with pain in abdomen Vomiting, with purging. Flatus in stomach, with windy eructations and nausea Borborygmi, with frequent emission of flatus, B., with griping during the day, in the evening diarrhous stool, with uneasiness in bowels till sleep. Pain in abdomen in morning, also with flatulence, P in various parts of abdomen, abdomen sensitive to pressure. < region of escum Weight in pelvis

Stool -Ineffectual attempt Liquid, dark, offensive. L and copious at night, three L, at night, with riage Menstrual headaches pain and nausea. Loose, pale Diarrhea, frequent; profuse D, with pain in abdomen all day; D early in profuse D, with pain in abdomen all day; D early in maintained or the tymposity running towards the sinit. Another morning, again before noon, with pain and rumbling good, with great prostration and faintness over the uterine running abdomen, dimminished urine, loss of appetite and gion Sterling. taste Early. Large, in afternoon after a good stool in morning. Constipation, preceded and followed by diarrhœa

Urmary and Sexual Organs .- Bladder feels full and tense, even when just emptied. Urine copious, pale, modorous, very free from sediment Urine scanty Frequent pain in region of prostate gland. Occasional stinging in glans Erections mornings, waking at night, with desire Desire increased

Clinical.— Dysmenorrhos, scanty menstruation, chocolate brown, with distress in polytic region. Acne of the face, nodes under the skin, face motified and menstruation scanty. Erythema around anus and genitals.

Chest and Back - Pain in chest darting from side to side Pain in kidneys. Numbness of lower part of pain in 1 foot, < motion, > rest back and lumbago

Extremities. - Weakness of arms Rheumatic pains in elbows, in knees and ankles Pain along the sciatic nerve and its larger ramifications Numbress occasionally takes the place of the sciatica, and then walking is very fatiguing (Phyto) Cramp in calves, in feet, < in bed Gouty pains in great toes

Clinical.—Sciatics, intense pains extending to ramifications of the nerve, with feeling of numbness, the numbness sometimes alternating with the pains, these pains extend into the toes, Gnaphas cired rheimstold pain confined to the toe.

# Gossypium.

A tincture is made of the fresh inner bark of the root of the cotton plant, Gossypium herbaceum, L.

General Action.—It is said to be a powerful ennmenagogue and commonly used by negroes at the South to produce abortion It seems to arrest uterine harm-

Generalities .- The pains are stinging, drawing, tearing and sometimes burning, extending from one place to another, jumping from one place to another, and from one limb to the opposite one The pains generally take a downward direction. Uncasmess, with anxiety and sighing. Lassitude, with pains as if beaten Amelioration after breakfast

Head,-Aching. Stinging from forehead to vertex. Drawing pain over eyes, with stinging in pupils Pain from temporal bones to middle of frontal bone, first drawing, then stinging. Knocking pain in r. parietal bone.

Stomach and Abdomen .- Nausea and salivation: N Almost aversion to food after diarrhosa Attacks of before breakfast Rotating pain in pit of stomach Sticking in r hypochondrium, then drawing pain from hypochondria to pit of stoniach. Intermittent pains

ın hypochondria Urmary and Sexual Organs.-Frequent desire to urinate, with burning pain Intermittent stinging in ovarian region, with drawing towards uterus Swelling of outer part of labia, < 1, the outer skin of both studded with pale, somewhat reddish granules Menses watery and nineteen days late

Clinical.—Valuable for retention of placenta after miscaringe Menstrual headaches Tumor of the breast, with hard lumps, scanty menstruation, swelling of the glands of the axilla, inflammation of the lymphatics running towards the axilla. Morn

Back and Extremities.-Pain in back Tearing in r arm and hand Heaviness of hands. > hanging down, < warmth of bed Pain jumping from one finger to another Twitching from hips to knees Tearing from lower part of r thigh to instep, then jumping over to 1 leg. Drawing pain in knee-caps and from calves to ankles Twitching changing from one leg to the other Trembling of legs when standing,
> sitting or lying Sensation as if the marrow were being squeezed out of the bones of legs Drawing pain from above downward in legs, in r shin-bone from knee to ankle Weariness of legs, < ascending stairs, > lying, with crushed feeling Contracting

Skin. - Soft tumor between I thigh and vulva. secreting a watery fluid, with sticking, < at night Soreness between thighs and vulva, with watery secretion Pale red, itching papules on backs of hands, with watery exudation after scratching Round dark red, itching spots, with pale red circles, around kneecaps and over shin-bones, burning after scratching Crawling in all fingers as from the moving of worms Itching of the whole skin: I in round spots around l. ankle

Sleep and Fever .- Sleep a great part of the time External coldness, with internal heat

### Granatum.

A tracture is made of the dried bark of the root of Punica Granatum, L. (Pomegranute)

General Action -An ancient vermifuge, especially for tape-worm The alkaloid, Pelletierine, is particularly valuable for this purpose, but large doses cause paralysis, especially of the oculo-motor nerves, with vertigo, acting similarly to Gelsemium

Allies -Gelsem , Verat alb

Generalities. — Émacuation Laxity of muscles Tremulousness in morning (Gelsem ) Rush of blood to upper part of body, head and chest. Discomfort and nausea Weakness, in morning on rising after good sleep; with heat in hands, could scarcely keep upright (Gelsem), sleepy, with confused pain in fore-head, as after a night's debauch Better after dinner.

ain from temporal bones to middle of frontal bone, state drawing, then skinging. Knocking pain in resident pone. Knocking pain in resident bone.

Mese, Mouth and Threat.—Nostrils swollen and in stones, pajustice, faitness (Gebes mothing moving in the

and weakness of mind, tranquility and persistency, heat of skin, and especially hot forehead. Want of Anger changing to insults. Sensitiveness. Sad. Hypo-thirst. Inclined to criticise and chondrise Discouraged blame Dread of work, with headache Confusion.

Stupefaction

rising. V after stool, on reading, reflecting and men- and hot forehead; with confusion of head. Loud tal labor, with vomiting; like a dimness before eyes retching Vomiting, with diarrhosa (Verat. a), with (Gelsein), in attacks, with obscured vision, roaring trembling, with anxiety, with weakness and sweat. in ears and trembling of hands Frontal stacking, Epigastric region distended and sensitive. Fulness outward, beneath I enumence Pressure in sinciput of pit Stacking Cramp in morning fasting Conduring stool Frontal pain, with shivering, pain in 1 tractive pain, and in small intestines. Pressure in pit eminence, F pain extending towards temples, with and on chest, P in pit, and sick feeling. Burning in tearing, then becoming a tearing outward, F pain so pit and in abdomen that she could scarcely look up, stupefying pain in Abdomen —Distention and pain, with ravenous frontal sinuses and upper jaw Frontal heaviness hunger Emission of flatus Frequent flatulence. side of head occiput, with hot ears

Eyes. - Inflamed as in catarrh. Surrounded by pale blue dirty rings Tearing in r, which is red and swimming in tears Dryness and burning Yellow sclerotics Pupils dilated, and sluggish, contracted Opening of the lids contracted Jerking of r lid Burning of canthi, with redness Itching of inner canthi, burning I in outer canthi Vision dim, V

Ears.—Sticking in 1 , S outward, < 1 Tearing in 1, sticking T outward in 1 at night Cramplike pain Ringing, in front of l Roaring before ears Nose -- Pinching as if in mucous cavities, extending pain in r groin, < touch from root into r zygomatic region Itching-crawling membrane Catarrh alternately dry and fluent.

Face -Red, and hot, with sparkling eyes, heaviness of forehead and oppression of chest Earthly, sickly color Stupid expression Tearing in 1 half Pinching in 1 side R cheek feels swollen. Jaw racked painfully when chewing, as if dislocated, tearing in joints, < 1, with tension and pinching, pinch- tickling. ing in I ramus, numbness. Lips dry, biting of lips, then burning, burning on "crown" of lower

ing in incisors, then stitches Tearing throbbing pain! too long on biting anything hard. Tongue coated,

fecting of "adstriction" of papille ) Tenacious mucus, spongy part into glans with need of constant spitting Salvation; watery. Sexual Organs.—Exertement Painful dragging to-Taste altered , at one time acute, at another blunted ,

abdomen Throat -Hawking of mucus; bloody, from choanse Tough mucus in choange causing sensation of a lump

Mind.—Hallucination Excited easily, excitement tastes unusually good. Thirst for water in evening, with

Granatum.

Eructations, after liquid food; < after potatoes loud, of air; offensive, after fat food; of liquids, (of watery substances, < fasting). Nausea; with pain in ab-Head.—Sticking on moving, S through brain domen, south salvation, frequent spitting, pain in stomach and Pain in whole brain who walking, < forehead; P in abdomen, fermenting in abdomen, frequent insflictual virying brain, extending into lovelistal protuberance. Heavi- to sook, childrens, eicht jook and thintor (Verst. a), with ness, with dread of work, with red face, rapid pulse threatenings of diarrhoea, with pain and fermentation and weakness Confusion Vertigo in morning on in abdomen, then diarrhoea; with shivering, cold hands

Abdomen -Distention and pain, with ravenous Toaring in t temple, extending into r eye Pressure Movements of flatus, M as from diarrhee Wander in I temple Heavy pain in vertex Traing in r ings like urging to stool Gripping, then two soft stools Tearing jerking in r side Pressure in Cramp before menses, with dragging from small of back to genitals Pain , after every meal , < morning fasting, > drinking cold water, > external warmth and lying down, with diarrhara, flatulent, crawling, which was a sticking towards precordium Drawing like urging to stool Sensitiveness Anxiety.

Navel distended to a ball, like umbilical hernia Sticking to 1 side of umbilicus, as from suppuration Griping about U Twisting in umbilical region and stomach Prayging in groins as if a hernia would pro-trude from both sides, D towards groins, almost painful dragging towards goins, with swelling of the parts. D in pelvis, with heaviness Drawing inflammatory

Rectum.-Sticking when sitting Pressure Sensaand tickling in nose Heat within Dryness of mucous tion in R and anus as if something alive were moving about Itching and tickling Heat after diarrhora Desire for stool Tenesmus, with protrusion of anus during the usual stool Ineffectual urging.

Anus.-Protrusion like a ring during stool Hæmorrhoids protrude during stool Sticking in evening Proctalgia Itching frequently during the day, with

Stool.—Diarrho a, frequent; mucous Liquid, two ithin an hour Frequent Profuse, with much within an hour Profuse, with much Mouth -Stitches in incisors at night in bed Draw- flatulence. Delayed and insufficient (later action)

Urmary Organs.-Urethra, discharge of mucus, a in upper hollow molar Toothache in morning on kind of blennorrhea; inflammation and swelling, cutrising Incisors pain as if numb and sore Teeth feel ting and sticking, cutting in evening after lying down with smarting in it and with relaxed penis, cutting, white, and moist. (Moderate dryness of tongue, with after micturation, burning drawing extending from

wards genitals and uterus Yellow leucorrhaga. Mensweetish, flat, with salivation, nausea and pain in struction too early and profuse, with griping in abdomen and dragging in small of back, extending to

genitals

Chest.-Sticking; in r , l ; middle; < walking, not Tearing, extending to arms and fingers (Contraction.) influenced by breathing, rheumatic drawing S. in Stomach—Unusual hunger (Verat a), (in morn-pleurs, now here, now there Cramp in pectoralising in bed) Craving for a variety of things; C for major, statches extending towards axilla. Pain in r.; Trul' (Verat a ), for juicy or sour things. Appetite at lind, and in spine at insertion of disphragment one time diminished, at another ravenous. Does of som, with sighing; O, with weakness of lower limbs on appetite. Aversion to eating Craving for coffee, which is ascending steps. Heaviness like suffocation, then palgradually extending higher, with pinching and intermitting statches. Pinching contraction in muscles crawling as if frozen. Sweat on slightest motion mutting statches. Pinching contraction in muscles about r nipple. Feeling of catarrh.

Heart.—Sensitiveness of præcordial region. Palputa-

tion on least exertion

Neck and Back.—Rheumatic pain in nape and throat, making stooping difficult. Pain in loins, on occurrence of menstruction; as if beaten, as if sprained, < sitting. Dragging from loins to anus Weight in loins

Extremities.—Wearmess and heaviness preventing sleep. Brused pain in shoulders and between them, as after a heavy load, even the clothing is oppressive; B pain in r shoulder as far as axilla, < raising arm. Arms, tearing, extending forward; boring extending to fingers; rheumatic pains; paralytic drawing; paralytic weakness; paralyzed feeling (Gelsem.), could scarcely be raised Tearing in ulna at wrist; in radius at wrist; cramplike T in r forearm Periodic drawing in r forearm, > external warmth Tearing in wrists Rheumatic pain in l wrist Sticking in second joint of thumb Tearing in fingers, with stiffness, T, so that she could not hold anything; T in last phalanges, < ring finger, in first joint of thumb Rheumatic pain in all finger-joints Paralytic stiffness of F.

Lower Extremities.—Special withering Sticking in 1 hip when walking Pain in hips, as if injured Sticking in l. knee Tearing in knee, I Paralytic Sticking in l. knee drawing in knee, with heaviness, hindering walking Legs weak, < walking; W, with uneasiness, leaden heaviness, he feels better sitting with legs resting upon sota Sticking in I ankle Sprained pain in I. ankle in evening, hindering walking Pain in corns

Skin -Pimples on forehead and I temple, with sore pain, they suppurate and leave nodules Formication down arms. Itching biting between middle and ring fingers and between ring and little fingers, with red, hot hands, I biting on balls of thumbs, they become bluish-red, hot and swollen, with distended veins, which form a bluish-mottled swelling, as after freezing Itching on forehead and eyebrow; in palms, with bring, in various places on face and whole body, as if pumples would break out; on back of hands as if an eruption would break out; scraping I on cheeks; burning I. about anus, on nates, perineum, scrotum and hairy parts of genitals, extending thence over almost the whole body, < thick parts of thighs

Sleep.-Yawning, with filling of eyes with water, with stretching, violent, with stretching, sleepiness and creeping chills from hips to calves. Sleepy early in evening Falls asleep late Screaming in sleep at night. Unsound S Uneasy S. Night full of dreams Numerous and varied dreams, so that she cannot remember them in the morning. Dreams immediately if he only slumbers, cries out and awakes

Fever.—Chilliness, < forenoon, but heat in evening; C., < arms, with sweat in palms Shivering; about I side; over scalp, the hair stands on end, over scalp in open air, and in lower limbs, with paralytic drawing in r thigh; over l. hip and abdomen, with pain in l side of forehead.

Intolerance of warmth in evening, desire for cold.

pitation. Pressure upon C, P. outward through H in forehead in evening H of face; in evening; sternum. Tension in l., beginning below ribs and during diarrhous; during stool; of r check, with blu-

## Graphites.

Purified Graphite ("Black Lead") is triturated as directed in the Pharmacoposias.

General Action.—A profound tissue remedy (like all the Carbons), showing a particular tendency to develop a cutaneous phase of internal disorders

Allies - Carbo v., Carb an Carb sulf . Petrol . Nat

m, Sil, Nit ac., Sep, Puls, Lyc Generalities. — Emacuation Swelling of feet and cheeks during menstruction Trembling in morning. T and twitching in head, neck and r arm Jerking in all limbs, now in one, now in another, even in shoulder and scrotum Constant tossing about at night without weariness Inclination to stretch and yawn, without ability to stretch enough Stitches here and there in whole body, S downward through whole body. Shocks through whole body as from fright or clectric shocks Intermittent cramplike sensation in various parts, arms, neck, fingers, feet, whereupon the parts are swollen, red, indurated and sensitive to touch Intermittent pain here and there, then soreness of the part on touch. Pain pressive rather than drawing, now here, now there, in periosteum of bones, during rest, < falling asleep Pains return on beginning to walk Bruised pain in whole side of body on which he lies in midday nap, and arm is asleep

Drawing tension, arms and trunk Drawing in whole body in morning after rising, as in intermittent fever Oppression, with anxiety and unpleasant sensation in stomach Dread of open air in morning Takes cold easily and has headache therefrom Sensitiveness to draught of air in evening, with hoarseness, chilliness, dryness of nose and anxiety General sick feeling, with necessity to groan without knowing for what pain. Uneasiness, > walking in open air, with no thought for his work, no inclination for anything Tremulous sensation through whole body Pulsation of blood in whole body, < heart, < motion, P in heart, trunk and head in morning in bed Indolence of whole body, > a long walk Weakness of whole body as from catarrh, W in torenoon and towards evening, with sleepiness and much yawning, after dinner, with falling asleep, on walking in open air, after contion, with sleepiness, sudden, even to sinking down during and after walking in open air, with retching and nausea, faintlike, when walking in open air. as if beginning in abdomen Attacks of faintness. Symptoms disappear when walking in open air

Clinical.—Chlorous, with tendency to rush of blood to head and flushing of the face (Fer, which is contained in Grap), meness pale, scanty and delayed, profuse lectorrhea, pumply cruption on the face, wore at the meantrul period, constipation. A goueral tendency to get fat (Calc.), the obserty of Grap is more particularly seen in older people, that of Calc in children. Herpeide constitution, with a great variety of complaints Paralytic symptoms, especially with suppression of menses, with numbers and coldines of arms and have

Mind.—Sadness, with thoughts of nothing but death Heat, with rapid, hard pulse; H., < legs, she must keep them out of bed. General heat on getting into bed, and dimination to weep, n attacks; A. > weeping with dry tongue, without thirst General dry heat. R frequently seemed as f his end were near or maightune passed out of her mind Would rather be alone irri- walking. > lving, disappearing at night. tated by every disturbance Indisposed, frightened, (nervous) Timid Early excited, hot hands even which disappears on weshing and then is humid from speaking Hestation Slowness of purpose and Scurfy spot on vertex, with sore pain on touch. Erupthought Loss of inclination to work Lively in tion on vertex, painful to touch and humid. Humid morning, depressed in evening Laughing at every trifle in forenoon, inclined to grieve and cry in even-ing Absent-monded Beclouded Incapable of menac, Sep, Sul). Hair becomes gray Hair tangled tal work after midday nap Mistakes in talking and (Borax) Pain and moisture beneath scurfy spots. writing Forgetful Fancies at night Fixed idea at Sore pain. Coldness and spasmodic contraction night, so that he could not sleep before midnight Itching Thinking of all sorts of things at night, so that she

Head .- Tearing like rheumatism in morning Aching, every morning on waking, in morning on waking, with vomiting, diarrhoea, cold sweat, faintness, necessity to lie two days on account of weakness, with alternation of chill and heat, on moving head; during with cruciations and nausea, during menstruation, < evening, with nausea, as from abdomen; here and there in brain, at last behind I ear, A as if numb and pithy, A in morning as if she had not slept enough Construction, cocuput, extending to nape, which pains as if broken on looking up, at noon, afterwards the pain extends down back and to chest Feeling as if screwed together and full Bruised pain in evening, with genbrain, < occiput, with painful stiffness of neck, the P trying to sleep Sharp drawing tension in nerves of brain

Confusion in morning, with nausea and sour vomiting Stupidity mornings Weakness extending to throat Emptiness after midday meal Orgasm in afternoon, with compressive pain in vertex, frequent O during the day, with heat in it and sweat Brain teels loose Feeling as if intoxicated Vertigo, in morning on waking, in evening, with stupefaction and necessity to he down, in evening on walking, with reeling, during and after stooping, even to falling forward, with nausea, on looking up, in attacks, with inclination to fall forward, inclination to V, with reeling, loss of sense, shivering and chilliness.

afternoon, with internal heat; pain as if torn from sorts of images on closing eyes at night. ing after rising, < motion, in morning when half asleep, and in vertex, > when completely awake; P extending deep into brain Bursting pain after eating Smarting pain on touch Drawing pain, with pain in nape as if stiff Drawing, then in occiput in evening; intermittent D Pressure outward after eating Confusion, with contractive sensation. Throbbing Feeling as if wrinkled.

unpending Grief at trifles, even to despair Anxiety | Sticking in l. temple; in temples, extending through impediant ciriq at tripes, even to despair valuely sometimes and in temples, extending arround till lying down in evening; A, with headen, vertige jees to internal canthi, if he looks intently at any and ill humor, with haste, driving him about like an thing white or red Pain in I temple, sharp P. in the veril-doer, so that she trainbled, so that she cannot sat, temple upon which he does not he in morning, with nauvea and sweat, preventing sleep all might, in Sucking in sides of vertex towards middle from mornevening, as if a mistortune had happened, with heat ing till 3 p.m as if head would burst, > sweat in heat of face and coldness of hands and feet. Weeping in of sun. Tearing in r side in evening. Painful shocks evening without cause, W at trifles, at music, in a in r side Jerking pain in r side. One-sided pain in child, with fretfulness Fietful, and uneasy, and violent in morning, hypochondrise in afternoon Hypo- in side upon which he was not lying Intermittent chondrise uneasmess, discouragement, anxious sweat, throbbing in r side Pain in occupit; with heaviness loss of sleep Easily angered, but it just as easily of head, tension and stiffness of nape, the pains <

> Scalp -Scales causing itching and becoming a scurf, eruption, with suppurative pain on touch Old scabs come

> (Winten).—Excess of the bead, glutinous mosture and most scales. Most eruption on the scale, matting the hart (Ronx). Tince capits, with dry eruption Porrigo decalvans Violent-semilateral headsches during suppression of messes, with unbiness, constitution, etc., or in the same trouble congestion of the head, with feeling of heat

Eyes -Redness, of white, with lackrymation and phoand after eating, when riding, during menstruation, tophobia, with inflammation, drawing and pressive pain, then biting lachrymation Hardened mucus. Maturating, with pressure in them and drawing pain extending into head Sticking in r Biting Drawing pain Para morning and evening, P on opening as from exertion by reading Weakness Burning, in morning, in evening light, when writing, with double vision of letters; with dim vision, with pus in canthi, with lachrymation in open air Lacheral sick feeling. Drawing pain extending into face rymation, in similability on walking in open air, with and to neck. Tensive pain on waking < surface of closure of eyes as from sleepiness. Pressure in r brow, extending through eye

Lids - Dry mucus on lashes. Inflammation of margins (Sep ) , I. of external canthus. Stye on lower, with drawing pain before discharge of pus Swelling of lids and lachrymal glands Agglutmation in morning. Dryness and pressure Heaviness Inclination to draw lids together in external canthus. Paralytic pain. Heat, in evening on reading and in morning, with dryness. Burning biting in inner canthus Itching of inner canthus Twitching beneath eyes

Vision - Vanishes during menstruation, l hand becomes dead, with crawling extending up arm and with crawling in lips. Photophobia Blinded by the light; B on looking at a white object, and lachrymation Eyes affected by daylight, not by candle-light Foggy Short Forchead -Tearing in morning on waking; in Fiery zigzags around border of field in evening All

Climical.—Ulceration of the cornea. Fustules on the cornea and conjunctiva. In the numerous cases of pustules on the cornea and conjunctiva there is usually photophobia, thin, rather sort discharge from the cyrs and nose, with covares of the outer behavior of the contract of the corner of the corn

Ears.—Moist and sore places behind both (see Petrol.); corners and bleeding. Ensums about the nose and mouth, with M. on ears. Suckling of glands beneath, ears, with tensive cracks in the corners of the lips and wings of the nose pass (Ear. c.); So of a gland beneath, r.; Se within I Bloody duscharge Redness and heat. Ulceration of 1 den, after moderate excitement, as, for example, readaway from it Flapping on every eructation as if air could not be completely closed. Sucking tearing in were forced through Euskachian tube.

Screaming tone in evening in bed, shooting through all limbs. Hissing all day. Ringing in 1, then roarSul.)

Lips — Erupton, eruption in corners (Lyc., Sep., Sul.)

opening and shutting, and cracking on swallowing, especially with eruptions behind the ears, which crack and ooze Deafness after scarlet fever, with thin offensive discharge from the ears and moist eczema on the face around the ear Eczema behind the ears, the skin cracks and bleeds.

Nose.—Redness Black comedones Papules in l nostril, itching, then burning Screness on blowing (Sil, Aur) Pain internally; ulcerative P in r nostril Tension within Stuffed and contracted sensation Stoppage, yet discharge of clear water. Itching inside Burning suddenly in a spot on 1 side

head oppression of chest, heat of forehead and face, < about nose, and loss of smell Fluent catarrh, acho, chill, internal dry heat and thirst, and pro-sitting leaning backward, with salivation the pain fuse, with oppression of chest, head confused and hot, chewing titted air in nose Neur lin nose, with pain (ffra. un-Offensue edor, and from mouth Seedling, with drivines of mouth, painful, with size, purident discharge (Hep, Puls) (ffrance mices) in evening, with drivines of mouth, painful, with Profuse mices, at one time thin, at another thick and swelling of check and general weakness, painful, over the profuse mices, at one time thin, at another thick and swelling of check and general weakness, painful, over yellowish Tough white mucus in 1 nostril, difficult upper teeth, as if sore even when touched by cheek, to the hard of the de the description of the descri with palpitation, heat and pain in back, at night Urinous odor and exhalations from nose and mouth Ulcerative pain Rush of blood Itching gnawing. Smell acute, she cannot tolerate flowers. Smell in nose as in old catarrh; S in morning as from burning soot; at night as from burning hair mingled with sulphur fumes.

Clinical.—Nasal catarth, frequently with dryness of the most but great screens, with formation of scale, a kind of essens, which the door, the normin externally are ulcerated, exceded not extend the contract of the contrac

Bloody discharge Renness and near. Orderstand of I dee, after moderate extrements, as it exhausted. Swelling in T winging pain in middle. Frequent ulcering of I side in morning after rising, a kind of cystic stave pain in I Sensation of a hard body behind, on swelling of cheek; S of glands beneath chin Twitch turning head to I. L feels full of water Tightness ing of messeter muscles Taring in 1 systems are cenabout 1 Itching in 1, in evening. Sensation in r on ing in bed. Sensation of a cobweb (Bar ac.) Pain every step as if a valve were opening and closing alternately in all bones Pain in masseter muscles as Polastion, stooping and after esting, P in morning if puralyzed, so that she cannot close paws when cat-slower than pulse Frequent sensation and report as ing Incipient paralyses of I side after swelling of it, if bubbles bursts. Bubbling on stooping, with heavi- and toothacher, muscles of face suddenly distorted, ness of head, on becoming erect or leaning back the mouth drawn to r side, its motion and speech im-

Scrap- of flatus, then pressure, drawing and stocking altering, mornings on waking, with dryness behind arch nating in body, then weakness of eyes Coldness and

Abdomen.—Distention (Carb v, Lyc, etc.), on eating; or adherent mucus, so that on attempting to swallow after eating, after eating, with sourish, astringent anything small it stuck in this place Burning as if taste, < eating, with sensitiveness to pressure; with everything were sore, preventing speaking aloud Sen- heaviness; with rush of blood to head, heaviness of head, vertigo and confusion, and in stomach, with loss of appe-Clinical.—Chronic sore throat, with a feeling of swollen tolerance of anything tight about hypochondria Tympantite and constinution , as from incarceration of flatus, inites after stool, with uneasiness and griping Tense. Stomach.—Appetite increased; for meat at supper- with diarrhea Rumbling, in morning, during noon

disgusting and nauseous Aversion to animal food. (Mur ac., Petr, Nul) when thinking of it, but it tastes to lorably when eating it, but bread tastes bitter; A to urme. Cutting in morning, with several stools; Comparing the next food in morning in the walking in open air, C. and burning of pring always eating. Desire for beer, without remarkable thirst, logic emission of falus, G < region of esecuri; by only doze for its internal cooling.

May errectation, tosting of food (Puls., Sep., Sul.); jerk, with thirst without appetite. Burnowing, Dragging during menstruation, with labor-pains, pain in E all day, with nauses and loss of appetite, at night back, anxious pain in small of back, beginning with of the soup taken at noon, ineffectual; of mucus in tickling, with eructatations and then jerking-sticking morning, sour, of food Waterbrash; at night in bed toothache. Cohe in morning, then diarrhea, then Hiccough in morning after rising and after dinner; consistent stool, C. after eating, after emission of in evening, after every meal; after a meal, with dull flatus; one day before and two days during menstruation, with heat in abdomen; > pressure. Flatulent Nausea, in morning during menstruation, with weak-colic when walking; during excitement of genitals, ness and trembling during the day; in morning after ris- hindering contion. Drawing pain at night, with desire

tight after eating (Lyc., Carb. v.).

Upper—Pain as if everything would be torn to pieces Frequent; the first hard and thick, the others soft during menstruation Sticking in r. hypochondrium in Urinary Organs.—Urging, with dribbling after the u night on waking.

umbilicus, with cutting, then natural stool.

inguinal gland, with sensitiveness, inflamed gland in r turition groin Sticking jerks in pelvic muscles about r. hip groin Sticking jerks in pelvic muscles about r. hip when sitting Cramplike sticking Sticking in group | Gimieni.—Nocturnal coursels associated with the eruption when sitting Cramplike sticking Sticking in group | Grap Inflammation of the urether, the precipitation of the urether state precipitation of the precipitation of the urether state precipitation of the ure Pain in r, < every step and inspiration, burning P in r groin, as if intestines would protrude, which seemed to move, < stretching body, > stooping, sore P in l inguinal glands L inguinal glands feel swolwalking. Heaviness, with dragging Nausea

Clinical.—Induration of the liver. Relief of ascites Chromic catarrh of the intestines and discharge of masses of mucus with the stool, with constipation, stool covered with mucus Note the numerous abdominal symptoms, constitution, accumulation of large masses of faces, which are covered with mucus, the anus is fasured, the cracks bleed and ulcerate

Rectum.—Prolapsus (with its hamorrhoids), without urging, as if anus were paralyzed Discharge of blood, with studing in it Studing, as if everthing were indurated Dragging in R and anus, with burning; with heaviness in perineum and tensive pain in penis on as with hemorrhoids Urgan, stool not hard, but different to the control of mailtainty of R. Tenesmus with each secretaring the total of a woman caused sexual feult on account of mailtainty of R. Tenesmus with each secretaring in the troubling in all limbs. Emissions stool Pressing without stool Provocation to stool without need therefor

Anus.—Burning hamorrhoids Swelling all about. much S of veins A cord like a swollen vein extending from anus towards nates, painless to touch. Single stuckes, tearing S. extending into rectum Cutting (rectum?) in morning in bod Sore Smarting sore pain on wiping (Æsc. h). Itching (Sul) Burn-

Stool.-Liquid, with mucus Diarrhea almost without pain, then prostration; frequent D., with burning in anus; sudden slimy, with feeling as if flatus would pass, preceded by sinking and coldness in abdomen Soft, with blood; three S, at night, with cole; S. and sour, offensive. Pasty, dark. Hard, with urging and sticking in anus (N ac.); H and lumpy, H. and blackish. Lumpy, with threads of muous, and after stoll muous in anus Dark, half-digested, of pain in back, > motion soot user to still much in once Datz, manugested, or intolarable of Gulph.) Thus, like a round usern. Sour-smelling, with burning in rectum. Much white missions, consipation, etc. Herpes of the prepare Hydrocels mucus with stool; reddish mucus. Blood with stool; or delayed mentration or suppression of the menes, with great after mentration, with smarting in rectum. Round mental depression, weeking, vertice, expetions on the face and

for stool, but without diarrhose. Intelerance of anything worms with stool. Passage of thread-worms, with itching in anus Increased fæces mixed with mucus.

Urinary Organs .- Urging, with dribbling after the usual morning after rising; in l. H on motion; in r, extend-discharge, U. in morning in bed, but only a few drops ing to back, in hypochondria, obliging him to lie passed, with cutting in urethra, sudden U, with but down; in hepatic region. Acute pain in hepatic re-little urine, anxious U at night, with cutting in abdogion after breakfast so that she must lie down Pain men, frequently forcing her to rise, though but little in region of spleen Tension in hypochondria as from was passed, with cutting Obliged to urinate early in a band, with oppression of chest; T in hypochondria, morning; at night Micturition in a thin stream as if extending deep into lower abdomen. Burning in I H withra were contracted Frequent micturition, at night, when sitting, > motion. Beating beneath short ribs at and copious. Involuntary M. Raw pressure in root of urethra, with desire to urinate. Tickling in urethra Jerking in side Gurgling in r. side, extending into when urmating Burning in urethra when not urmat-limbs, as from softly falling drops. Sticking in 1 ing, in orifice after urmating. Urme clear, but after Burning in a spot in l Constrictive griping about four or five hours covered with iridescent film Acrid, sourish odor to urine Dark brown U, with a statch Hypogastrium—Sudden flatulence passing painfully in urethra during micturition Dark U, depositing towards ring, flatus < side, with rumbling Fulness, reddish sediment U. becomes turbid and deposits a < evening and night, with hardness and sensation of white sediment (Berb, Sep); becomes turbed after two incarcerated flatus Swollen glands in r groin; S of an hours, with reddish sediment, buting in wrethra during mic-

Sexual Organs.—Tension when walking and on touch of clothing, with unpleasant sensation Penis, eruption . P covered with thick mucus, pinching, jerking pain, len so that he cannot walk well, but they are not drawing pain, bubbling sensation during erections swellen nor painful to touch Tension in groins when Erections without lascuvious thought; strong E; strong E after contion Vesicles on prepure Prepuce swells to a large water-blister, without pain (see Nit ac ) Swelling of scrotum (in coverings of testicles? Hydrocele?) Itching and moist eruption on scrotum (compare Nat in ), I. within scrotum R testicle seems swollen Sticking at times in r testicle Drawing in testicles Jerking pain in 1 spermatic cord Voluptions mentability Revival of desire Lascivious thoughts, so that he feared he should be insane, with running about, and excitement and trembling in all limbs Emissions nearly every night Ejaculation does not follow contion in spite of every exection

Female - Pressure towards, when standing Papules on pudenda, with itching Itching of pudenda before menstruction. Soreness of pudenda Vesicle on labia, with itching biting Painless pimple on internal labia Frequent sticking in labia Biting in ragina ing with the stool. Swollen feeling. Sore pain on of white mucus; profuse when walking and sitting, with r side of perineum, where there are pale red, irregular weakness of back and search, thin, with distended ab-pimples between the hairs, with acute pain on touch. domen Swelling of the l indurated overy, with stony hardness, with pain, partly on touch and partly on inspira-tion or hawking, when stitches shoot into it, with general sweat and sleeplessness Menstruction delayed (Nat m. Puls, Sep, Sulph), with heaviness in abdomen and dulness in head the first day, suppressed, with heaviness of arms and legs M too soon (Carbo v) (secondary action), too soon, thin, of short duration, with

herpetic eruptions on other parts of the body Menstruction rery irregular, sometimes scanty and pale, at other times the flow is dark, associated with violent colic, at other times suppressed, with severe cutting and bearing-down pains in uterine region and hips Particularly adapted to menstrual irregularities in women who are inclined to get fat and who have herpetic eruptions Suppression of the mensis, with induration of the ovaries Leu-Suppression of the mensa, with industation of the oversite and the cortical instead of mentitations, the discharge coupling in guides, with great weakness, screenees of the pudends, ulceration Mensaco dynamic processes of the pudends, ulceration Mensaco dynamic processes of the pudends, ulceration Mensaco dynamic processes and the pudends, ulceration of the pudends, under the pudends of the pudends, ulceration of the pudends, ulceration of the pudends, ulceration of the pudends, ulceration of the pudends, under the pudends of the pudends, under the pudends of the pudends, ulceration of the pudends, under the pudends of the pudends, under the pudends of the pudends, ulceration of the pudends, under the pudends of the pudends, ulceration of the pudends, under the pudends of the pudends, ulceration of the pudends, ulceration of the pudends, under the pudends of follicular and cystic diseases, are sometimes cured by Gran. Sub-acute or chronic inflammation of vagina and neck of uterus Tumors of the pelvis, with bearing-down pains. So-called caul-flower excrescences, with severe lancinating pains, have been re-leved and perhaps cured. Indurations and excrescences which bleed easily, on neck of uterus, Indurations and excressions which with violent pain on touch or on breathing Induration of both ovaries, which are very sore, < taking cold or getting feet wet, with tendency to cold, wet feet Indurations form in the mamme cracked and bleeding

Respiratory Organs .- Tickling in larynx, - evening in B bed, carring hardeng and short cough Hoarseness every coccyx in evening, eccuring H during menstruation, with catarrh and Extremities—Stretching, with weakness of them catarrhal lever Scraping in trachea (ough, with Jerking in evening or inclination thereto, J outward evening on lying down and cough on deep inspiration, on walking crawling in them, in evening Paralyzed sudden D, with difficult short breath Difficult sensation

Clinical.—Chronic horseness in persons subject to herpetic dency to excibernit granulations (Arnica). The finger-nails been suppressed, the comparison personally if the eruptions have been suppressed, the come rough and discolored. The toe-nails become extremely fostative parcoy and, which awaken from sleep, eating Whooping cough.

when sitting, in r ribs on touch, in lower ribs near and hand. Sore feeling in upper arm sternum on touch, in upper part on yawning, touch or Elbow —Twitching Pain in condyles on touch, ration Intolerance of anything tight Oppression; cold water were running through bones, cutting D in morning on rising, ampiration; I sufe and heart'r, whereby arm felt paralyzed Paralyze pressure in morning Burning pressure beneath I axilla il E and foream after middley map Burning in middle on inspiration, with tension and Tearing in 1 forearm near wrist Gnawing in r sensitiveness Burning throbbing externally in 1, < ulna and radius Burning pain in r forearm, upon heart, with sadness)

hand and causes anxiety

Neck .- Sticking in nape; tearing; S. in sides on moving head Smarting cutting as from an ulcer at seventh cervical vertebra Pain in nape, and shoulders on bending head forward, preventing raising arms to head; and in shoulders when lying upon them or turning (from swollen glands on side of neck, which

Back.—Drawing Scapulæ, sticking in l, with pain, pressure between, bruised pain in scapulæ; rheumatic pain in 1 , contractive pain between. Cutting dragging downward from kidneys before urinating Sticking in small of B Griping and twisting in small of B, as from tongs, then pain in arms and feet as if they would turn outward Pain in small of B, in morning and become cancerous. In nursing women the nipples are sore, on rising, > motion, near spine, as after long stooping; bruised, also < touch Throbbing in small of B Pain in coccyx when urinating Drawing in

catarria and heat in head, C which fatques chest in in evening with consciousness, J of hands and fest morning and during the day, > might, before and Bruised sensation in all Pain in joints as from wearf-during mensiration, which fatques chest, with pain, ness, on stooping and sitting down, so that she could low down in chest; dry, during menstruation, with not rise again from her seat E on which there was profuse sweat; dry hacking, wakes him at night and an ulcer began to pain on touch or slight motion, even lasts next day, C in evening on lying down, with at a distance from the ulcer Internittent drawing much expectation Expectantion of blood, with and tearing in E on which an ulcer was healed, < constitueness of palate and tongue Whistling in an open air. Uneasmess in one in evening Meckness on breathing Suffocative sensation, waking illeaviness, with depressed mood Stiffness; of shoulther at might; on walking in open air Dyspinca in der and knee Arms and legs fall askep, when sating,

Upper Extremities .- I'mching in r axilla, with stick-Chest -Mucus Sticking in 1, in forepart of 1 in ing. Pain in axillar Sticking in shoulders and elbows, conset—stores storeing in 1, in forepart of 1 in inc. Fain naxima storeing in storeing in solder taking away the pressure of hand, externally 11 r near storium, < breath, frequent burning 8 on 1 shoulder, taking away the pressure of hand, externally 11 r near storium, < breath, frequent burning 8 on 1 shoulder Tearing lying on r side, in middle on ascending stops, with in r 8 at night, external warnth, in 1 point on oppression of breathing, in r arresting breath Tear-imoving arm. Rheumate pain in 18 Burning in mg in r Pinching, in evening obliging him to shoulder-joint Arm, jerking of museles, in first sleep stretch, on walking long in open air Pressure on 1 at might, here and there in arms in evening in bed. side, increasing to punching and almost intolerable punching in I, with heat in it, drawing Falling asleep twinging pain, only when sitting Pain in nipples, in of arm when lying upon it, and hand, when sitting, sternum between breasts, P in chest on ascending, F asleep of r arm. Sticking in upper arm, forearm.

riding horseback, across from I to r side Raw pain P in bend, so that he cannot stretch arm, in bend, as like interfer flesh Catarrhal rawness of C and trachea if too short, on stretching arm Drawing during rest, lickling low down, with loose cough and salt expecto- with tearing in it on raising arm and sensation as if

inspiration (Emptiness and coldness in C and about which he was lying at night, with sensation of falling asleep in elbow Spasmodic tension in a muscle of Heart.—Sticking Pressure on breathing Throb- forearm Sticking through r wrist. Sprained pain in bing in evening when lying on 1 side, turning over, r wrist. Hands wasted; tearing in r H; T. in hands with anxiety Palpitation, sudden, like an electric like rheumatism; sticking burning pain in I palm in shock from heart to throat, which moves arm and evening in bed, which soon passes to thumb; pain as from a blow on back of 1, < pressure; numb and saleep after much using: saleep when sitting: r'istep, extending to great toe, so that he must hold him-

Fingers -- Wails become thick. Swelling of middle

and legs; S in 1 hip; in part S at night, disturbing | Toes -Swelling of T and balls of toes Drawn insleep, in part burning swelling above knee Brussed pain in middle, B Pain in r great; in maid of great, beneath balls, so pain in femora Drawing pain in femora, jerking D that he limped. Constriction of ball of great, as with pain towards groin, < rising from a seat Jerking sen-iron pincers
sation in nutseles Wearness Stiffness of nonwalk
Stim—Hard and cracked on hands. Soreness high ing, with feeling as if bound about knee Numbness, up between thighs during and after a walk, between

sitting, with heat

in I when walking Brused pain at night, in morn-between toes, with itching, smarting soreness between ing in bed, > rising Drawing pain Drawing in 1, instes. Exuption covering thm, itching E full of corwith tension, D in 1, with jerking Tension in hol- resive water, in many parts; gritty E on fingers Spots lows all day, so that he could not stretch leg Pain like flea-bites Red spot on thigh, R, itching spots, in hollows, as if too short, with tension in tendo-achil- < calves Erysipelas of hands; of both sides of face, lis, so that she could not step upon it Fatigued burning sticking, then catarrh, with sticking in gum pain, < knees, when stooping and sitting down, so Red raw spot like tetter on thigh opposite scrotum, tiching that she could not rise again from her seat Weakness in morning Tetter becomes an inflamed swelling of 1, with heaviness Stiffness, in hollows when sitting, as if held tightly by a hand. Numbness, Itching P. on face, moist after scratching; hard, painwaking at night

Leg—Swelling, even in bed, hard S, with sticking thighs, painful to touch, on nates, deeply-seated pos-Sticking in r. on blowing nose, S in swellen varices, teriorly on thighs and legs, rapidly forming vesicles, in varices, with tension Sticking burning pain in a on trunk and limbs (not unusual with me, but they spot above malleolus, so that she could not step upon assumed a peculiar appearance after three days, init, but must raise it high, because on allowing it to creased to size of a pin's head, were filled with fluid hang down the blood settled into it, with burning and at tip and were brownish-yellow) Red uching pumples sticking Tearing in tibine; rheumatic, in both and in tipped with pus, which burn after scratching Moist pap-I hip Cramplike pain here and there, with heat ules on nose Unhealthy, every injury suppurates Pain in varices during menstruction. Rheumatic Pustules on chin and chest; on both little toes, with pain Brused pain in tibur, and pain as if broken; sticking B pain in leg and scapula on which he lies Drawing Boils on neck, back and arms, on nates Vesicles bepain on tibue, in tendo-achillis Drawing from above neath malleoli, on little finger, itching, discharging much downward; cramplike D in varices on stretching leg | mutter, with burning sticking; white, on one toe | Proud Tension when walking, with bruised pain; T where flesh in ulters Ulcer on fourth toe; scaly, on tibia, there were swollen veins, with sticking in them Un- with inflamed border and surrounded by swelling, so easiness, preventing sleep all night Weariness sensitive that bed-covering could not be endured Heaviness, r. Crawlings as if they would go to sleep Offensive odor fr Fulling asleep; and seeming dead on walking in open like herring-brine air; inclined to fall asleep at night, and peevishness Numbness in bones of r

Calf - Cramp all day: in morning in bed: at night:

walking in open air, > in room. Pain in r. malleoli as if lymph exudes and hardens, over whole body, after broken, < morning after rising, with a stitch at every scratching pumples containing water, corrosive, here

self in order to avoid falling. Constriction Stiffness. Foot -Swelling of the injured Jerking in soles joint of middle, with stiffness. Spasmodic contrac-Sticking in heels, with pressure, S in heels, even when tions, of l. index Cross each other by a kind of sitting Tearing on back, in borders; in heels, in some, of muce cross each other ye am of stating reacting of ozec, in obsters; in ricers, in reers, in spasm, but they separate when she strikes them ball when walking; in r sole, with tacking, rhematic, Sticking in the of r, with ulcerative pain; S in ball in feet and toes. Ulcerative pain in heels, in soles of thumb; beneath r thumb-nail Tearing in bone Sore pain in corns, almost without external pressure of first phalanx of thumb; rhematic T in first joint Burming pain in a corn. Fain in corns on waking of r thumb, c during rest Feeling as if thumbs would Blood shoots into diseased F. when standing Heavibe drawn inward when holding something in hands ness; with weariness Falling asleep of 1 in evening Crawling in tip of index, with numbness. F remain when sitting. Numbness on back when walking in stiff and bent after grasping anything open air (in June), with increased coldness Stiffin

Lower Extremities.—Thigh Sticking in spots in T in a sore F. after eating, with pressure and sticking open air (in June), with increased coldness Stiffness

Tearing posteriorly in morn-ward, with cramplike drawing up to knee Sticking ing, T. now in r, now in l, extending into hip, from in l great, when sitting Tearing in l great, in little, afternoon till evening, rheumatic, in hips. Cutting in as if it would be drawn towards the side; goutlike

sitting, with heat thighs, near pudenda, during menstruction, between pu-Knee—Stocking in 1, S in patella Sprained pain dendum and thigh, covered with pumples, vencles and utces,

ful to pressure, behind r ear; red, itching a little, on Suppuration of margins of great toes Offensive odor from an ulcer, scab of ulcer smells

Tearing in ulcer Smarting of the limbs covered with tetter, S all over hands, on moving fingers the skin cracks Burning pain in scars from old ulcers. from carrying anything, with trembling of legs, at Pressure in an ulcer, with sticking, itching in an baginning of cotton, preventing coition Jerking, in ulcer Sensitiveness of an ulcer Tingling of feet all muscles of l. Spasmodic drawing at night on stretch- towards toes, like tearing Formication on back ing them; S drawing on using. Sticking when drawing on boots. Sprained pain. Throbbing in outer on back and arms, balls of I hand, swollen varices side every hour, always lasting about fifteen minutes of legs; of all toes; r temple, with burning after Ankle.—Gnawing in bones of A and heels Pain scratching; on coccyx above anus, with moisture and shout malleoli; on touch; in r. Sprained pain in l on scurf; lobules of ears and on cheeks, after scratching and there Sticking itching in r. great toe; in a mole, transiently > rubbing, on thigh, as if an eruption would appear in the place of a previous boil

Clinical.—It has removed scars, Dr Guernsey states that he has removed by it scars after msmmary abscesses. Impetigo. The tiching of Grap is generally < waranth it seems to his soved the tendency to recurring crystel of the vestcular Herpe zt harpe blasters and accessive burn

forcarm and hands, the skin becomes thick and fasured Rhus poisoning (Compare skin generally with Petrol)

asleep early in evening, with weariness before midnight from heat and anxiety, S till 2 after 3 A.M., for several hours, then waking at 7 dizzy ning; when walking a little, making toes sore; and tired Restless night, with sleeplessness always | feet begin to smell (Bar c, Sil.); so that they are from 12 till 2 o'clock, with heat, with anxious warmth and anxious dreams Anxiety at night and constant talking in sleep Jerkings in sleep Frequent waking, as from fright Waking too early Waking at 2 A M . with restlessness, he remembered everything that could injure him and was anxious, so that he did not know where to turn; W. every might at 2 AM, with

Dreams — Peevish, with moaning and groaning lower bowel and pelvic viscera (bladder and sexual Frightful; with danger from water Vivid, and reorgans), rush of blood to the head and faintness, etc. membered long Vivid, anxious. Anxious, so that she! was beside herself on waking, A, taking away her breath, she cried out and lay in sweat, A, of num-noon, with consciousness, then deep sleep, with an berless dogs and cats, with loud talking, of drowsi- emission, after waking general bruised feeling, < back ness and unconsciousness, then difficult waking from and l. arm Sticking in several parts, < lower limbs deep sleep, with stiffness of cervical muscles Full of Bruised feeling in trouble Of unple that she woke with anxiety Numerous, distorted, about Pulsation through whole body, it seems seated lower verything that had happened to her during the two than pit of stomach, < stool Weakness; in ning last days Only of what she has seen and thought of on waking, with sleepiness, all the forenoon; all the during the day the head Voluntuous

Fever.-Chilliness all day and night, preventing o'clock sleep at night, C during the day on lying down to going to bed, in evening before sleep, then itching, at night, with drawing pain in limb, waking him, then Earnest, reflective Averse to everything at 1 p sticking above I breast and in I side on every inspira- desire to talk or move Disinclined to mental work tion, even in evening in warm bed, thirst all the evening and night, profuse sweat after midnight till mornlimbs and coated tongue, during menstruation; after

trustion, with cutting in abdomen, then diarrhoea, with ringing in ears; in a child for half an hour every evening, sudden, all over; as from want of motion of body; < 230 rm. on rising from a seat; Daily intermittent fever, shaking chill in evening, then heat of face and coldness of feet, no sweat Shivering, in a ning, with sticking in temin back evenings, in r limb after midday meal suddenly in legs after cortion.

Heat at night, so that he could not stay in bed; H. at night and orgasm of blood in morning; H after coition, with sweat; from riding in a wagon; frequent, sudden, when sitting, sometimes with anxiety; dry, in evening; dry, every evening and till morning, with pain in vertex and nape till noon. Heat in head after dinner. Burning in spot on vertex; hands and soles, feet: l. sole, soles < walking, heels, < morning in bed, with crawling, sudden, in a spot on forearm; sudden, in a spot on r upper arm, with cold sensation

Sheep.—Frequent yawning Sleepiness; during the eating, even on slight motion; general, from earnest day; during the day, with weariness, towards noon, conversation, even from a short walk, coloring linen after middly meal Sensation in morning as from insuf-int sleep, difficulty in getting out of bed Falling from body, S on head when falling asleep; on ster-

Sleepless num every morning Sweat of feet in evening, with till 2 ing in feet and hands, of feet, < afternoon and at 7 dizzy ning; when walking a little, making toes sore; between toes (Sil.).

### Gratiola.

ure is made of the entire fresh plant of Gratiola officin-

General Action .- In large doses it is a violent emetic, cathartic and diurctic, causing inflammation of the lower bowel and pelvic viscera (bladder and sexual

Allies -- Magnes c, Sulph, Colch, Iris, Sul a Generalities .- Tetanic condition when lying in afterbed. > rising, but cond ill humor (Sulph.) rrences of the day, so fused in head Dis mfort Of fire Of dead people Fatiguing forenoon, with ill humor, < open air, of body and mind Aggravation after dinner and from 2.30 till 3

Mind.—Talkative and joyous Lively and desirous sleep, in morning in bed; in morning and evening, to jump and dance Excited and unable to sleep in then heat, then sweat; over whole body after break- evening. Anantety, > open air, with general heat and fast, with shivering, before noon meal; over whole weakness. Sad. Frettill, and desirous to be alone; body after 5 rm, with cold feet; from 4 rm till after irritated by every contraction, angry outbreaks, nthropic and solicitous about his health.

Irresolute, not persistent in work. Confused Memory lost in afternoon, and self-absorbed In deep thought with the chill in evening headache and tearing in at 2 30 PW and does not seem to hear what is said to her

Head .- Aching all day, with heat in face; A. i th nausea; < afternoon by open air; throbbing at one time >, at another <, and at another disappearing in open air. Sudden ribration internally at 10 A M. when sitting, as if some ples, I car and teeth, the sweat at night; before and one let go a stiff steel spring, so that hearing and after eating, then anxious heat in evening, in back sight vanished Fulness on going into open air, with 1 forenoon, with freque yawning and sleepiness; stoppage of nose, F. as if brain would be pressed outward Heaviness on stooping and on rising again; Coldness above eyes, hands and feet; feet in morn- H, with nausea and sleepiness. Brain feels contracted ing; hands and feet in evening, with heat of face; and as if head would become smaller, > open air, with general discomfort. Confusion ; painful, > break-

brain; rush of blood, < motion, especially riding, Vision short when reading V. better for distant than increasing to unconsciousness, > sleep, with throbbing for near objects, with heat in face. All objects seem in forehead, amounting to vertigo, with blackness white on opening eyes V suddenly vanishes when before eyes Intoxicated feeling during and after writing or looking at bright objects, > closing eyes. eating; she seems I., > open air. Vertigo; after but constantly returning. without thinking of it, in attacks, a walking rapidly, pressure, with drawing upward and downward. Crawlas if turned to the right, > open asr; as it he would ing internally fall forward in open and with weakness, as if head. Mose.—Tearings in upper part of I side Pressure on closing eyes. > open air.

Forehead -Sticking in morning and at 3 45 PM, bcd. Running of water from r. nostril Sneezing durwith beating, S, with warmth in it; S, in l eminence, ing dinner, with sticking in hypochondriac region. r eminence, in sinciput at 2 30 PW, tearing Tear- with sticking in 1 side. ing, in ., it suches, was unotage in any acover zero-red faller leading in that it such as the red in the such as the red in the swelling. Tenang in r sinciput, between soon; < r. side, with burning, lower jaw at 1 rm. Swelling of upper lip every drawing, in leminence. Beating in forepart at 3 rm, smorting. Sucking in upper lip in morning, as if it with tearing farther back towards vertex Screwed-would crack, with thirst together sensation in F, vertex and occupit Tension Mouth.—Teeth Stick

the middle.

Painful throbbing and drawing in vertex Sticking a hollow tooth inflamed in r side of head and in occiput, in 1 side of brain, Tongue raw T coated slimy, with natural taste to pen air Tearing in sides and in occiput at 2 P v.; food and great appetite Sticking in palate near 1 side 7. ml side above forchead, > rubbing, in r. side, of uvula, with cutting and stiffness so that swallowing extending to ear, with brussel pain, in l. side, then was painful Burning in palate, with dry and raw sticking in l side of forchead. Headdender in r side, sensation. Crawling in palate, with dry and raw sair formething heavy fay upon brain, till evening as if breath were offensive, > rising Salvation. Drawning in l side on going into open air. Heaviness Taske bitter in forcenon, B in mouth and throat, with ın l. half

Sticking in I occuput, then tearing in I side of chin as from meal, after morning soup

Frequent pain all day. Pressure upon them in after- if bitter fluid is evacuated Pressure as from mucus noon. Burning pain in 1. Dryness and feeling as it which she could not hawk up nor swallow Feeling sand were in them. Lachrymation when reading, with of mucus, with rawness and inclination to hawk. feeling of weakness in eyes Pressure in balls Rancid feeling after dinner Crawling in fauces. Twitching of I. brow. Drawing pain in I. brow. Lids Rawness, with hacking cough; R., with hoarseness. closed on account of weakness, twitching of I after Scraping in back, extending into pharynx, S after dinner; agglutinated, with dry mucus, canthi, dinner, with nausea, S. in œsophagus during and itching; itching of r., > scratching. Canthi red, more after dinner, with scidity in afternoon than in morning, and itching; sticking Stomach—Hunger at 7 r.m., with dread of eating, < in r. inner, > rubbing, with itching; pressure, with solld food; H., but want of appetite. Appetite dimininflammation of conjunctiva; tension in outer at 2 ished, bread tastes best, does not reliah the dinner.

fast, but frequently returning after dinner. Dulness PM. when reading; tickling in 1. inner after dinner, > in evening; between 7 and 8 PM., only somewhat > scratching Vision cloudy after breakfast, with feel-lying. Very light and free. Rush of blood and intoxicated feeling in whole usual; C at 1.30 PM, when reading; when writing,

moved back and forth when reading, as if objects in 1 upper region. Stoppage, when vomiting Itch-wavered, < l. side, as if she would turn in a circle, ing in r nostril, > rubbing. Itching biting in r nos as if the room went round and as if she would fall, it il irritation and tackling in l. side as if one would sneeze Tendency to sneeze Coryza in evening, >

ing, in I, in sinciput, with throbbing Pain, above Face.—Red Pale Tearing in r half; in I side of

Mouth.—Teeth Sticking from r upper molars to as if drawn in folds Feeling as if a hair hung down head Tearings in last 1 lower molars, > pressure frequent T in r upper anterior molars Intermittent Sticking in r, then I temple. Tearing in temples boring in first I molars in afternoon, < at night > in afternoon, night and morning, generally < cold and forenoon Pain in all, < touch and on taking cold warmth, with boring, the temples become sensitive things, P difficult to describe in hollow eye-teeth on from the pain; T in upper part of r temple, a simple eating and drinking cold things and on drawing cold pain in this place on pressure, T in l, in r muscle, air into mouth. Drawing in upper incisors. Cold-Pain in temples; in l bone on touch, as from a blow, ness in l upper molar, in r upper incisors. Gum of

nausea, which continues after vomiting Taste pasty,

Pain in occiput in morning on waking early, > rising | Throat.—Steking jerkings in forepart at 2 PM and lying upon abdomen, P on 1 side as from some- Jorklike drawing in torepart of neck. Mucus, which thing heavy; bruised P. in 1 after sneezing Burning she cannot raise or swallow, provoking cough Hawksticking on scalp, > scratching. Biting on r side of ing of mucus, < morning. Sticking from afternoon occiput, not > scratching; B. in a spot on r side after tall midnight, S in pharynx at 5 P u , in l side, < dinner, then on 1, > scratching. Itching biting on by swallowing, in 1 side, when not swallowing it is vertex. Itching biting, > scratching, on vertex; above rather a clawing Aching as before inflammation, forehead, on occiput, but frequently returning. Itch-constrictive A. in forepart of neck, indescribable A, ing > scratching, on vertex, on r. side of occiput, causing constant swallowing, which is difficult, as from above I. frontal region at 2 p m , burning, on vertex constriction, but food and drinks are swallowed with—

Eyes.—Tearing, with mucus in lids, < inner cantili. out difficulty, this sensation = cructations, especially

Appetite lost Aversion to food, to fat, she eats even ! water

Eructations, empty, empty, after morning soup; tasting of jumper, sweet, bitter, bitter when walking in open air, tasting like bitter almonds, relieving the with feeling as if water would rise with it: nauseous fluid rises into throat, of water at 130 P.M., water- hef of abdomen, copious, in atternoon, offensive. brash in frequent attacks, < fasting and cold water Inclination to eluctate, with pressure extending from stomach into throat, so that it takes away the breath .

changing to nausea, meffectual

Hiccough during dinner, with eructations tasting of the drug and heat in head; H after dinner Nausca, at noon, in afternoon, > eructations, at 1 PM, with uprisings of water, at 3 30 PM, > eructations tasting of the drug, after dinner, after dinner, with mability to vomit, after dinner, > stool, with sleepiness, after dinner, rising from lower abdomen into stomach and farther up, with salivation, during cructations, < open air, > breakfast; > dinner, > eructations, > cructations, but returning, not > vomit- > sitting after dinner, then stool, at first soft, at last ing, with feeling as if water would rise, with accumulation of water in mouth, with coldness in stomach and feeling as if full of water (Colch, Sul ac), with pressure on chest, obliging him to he down, > open air, with spitting of saliva; sudden, in morning, > walking; frequent; intermittent, after dinner, with discomfort in stomach Constant empty retching, empty R, with salivation, the nausca transiently > eating Vomiting: bilions, twice, of yellow, bitter sour water, without exertion

Rumbling in forenoon, with movings in abdomen, atter dinner, with griping and feeling as before in evening, in hypochondria, emission of flatus diarrhosa Flatulence, some hours after eating, and stool, with fulness Intermittent cutting, when with burrowing and with distention of epigastric region, eating Twinging at 3 45 PM, with ineffectual urging eructations and retching, whereby bitter mucus is to stool; T. after dinner, intermittent T and cutting thrown up with exertion Sticking in epigastric at 2 PM, so that she must bend up, then sticking beregion, when walking, < inspiration, near 1 side of neath 1 short ribs. Digging. Burning in r.: 1. > pit after stool; tensive, in epigastrium in evening, walking with nausea and eructations. Cramp in morning in bed after a late supper Cuttings in epigastrium sitting, > walking; deep in 1 at 5 PM, which then Twinging in epigastric region Digging in epigastric extends to I chest and back again Pain in I, with region, with sudden nausea and shivering on scalp movements of flatus, P from both sides towards Pun with nausea and general discomfort, P, with anx- umbilious, after the nausea Contraction from both ings extending into chest, nausea and eructations, r. extending into r. epigastric region, with movings in epigastric region from food, with fulness, in stomach, extending into chest, with nausea, feeling as if U in afternoon, after stool; about U before the usual he would eructate, the nausea > rancid eructations, abdomen Sensitiveness to pressure, and in abdomen . half after dinner, H in pit Tension, < inspiration of a worm Discomfort after dinner, with fulness, D. in epigastric region Burning, then coldness, pressure and nausea, < two pasty stools Coldness.

Abdomen.-Distention, in morning; at 1 P.M., after beef without appetite; to the accustomed tobacco; dinner, with heat in it, after dinner, obliging loosenwith shuddering and nausea Thirst at an unusual ing of clothes and bonding together, waking after hour, in morning, in evening, the nausea > drinking midnight, then diarrhoea five times consisting of mucus, with tenesmus , > emission of offensive flatus (Sulph ); with hardness, flatulent, in places, then offensive flatus Rumbling; after breakfast, with uneasiness, constant desire for stool and emission of only flatus, after stomach, tasting of the food, of food while eating, of dinner, with gurgling, in evening in bed . < eating, the meat, forcible, as of rancid fat, after morning soup, with uneasiness, with soft stool Flatus moves about, with burning. Emission of flatus, at 2 P M., then re-

Cutting when sitting, intermittent C.; intermittent, so that she must bend up, with urging to stool, intermittent, extending around abdomen, < about umbilicus Intermittent pinching at 4 PM, > bending together, with nauseous pain in stomach. Griping, at 4 A M, and at 9 two pasty stools, the G > emission of flatus; in afternoon, with drawing and rumbling, evenings, after eating, < morning and evening, after eating, then ineffectual urging to stool, after stool, then two diarrhea-like stools Twinging, > emission of offensive flatus, with movings; T, with movings, then stool, which is first hard, then soft Pain, at 9 A.M., after morning soup, on walking, after each stool, hard, with pressure, with nausea, driving heat into head, causing pallor and nausea, > pasty copious stool, sometimes with offensive flatus, as in diarrhora after taking cold, > bending forward and by rest, with flatulence and burrowing. Feeling at 1 P.M as of a purge, with moving about Pressing inward after dinner, with nausea Uneasiness, in afternoon, with desire for stool Coldness

Upper-Frequent rumbling Sticking in l., in r at 230 PM on sitting down; in r after dinner, with R in epigastric region Movings in S and abdomen cutting in abdomen, beneath r false ribs at 2 PM and

Sides -Sticking in I on sitting down and while

stool, near r side; in middle of abdomen Sticking P in stomach, as from a foreign body Contractive drawing pains extending from both sides of U into pain in epigastric region, which seems to come from inguinal glands. Cutting in region, about U., then three watery stools, then smarting in rectum, interin pit Gnawing in pit as from hunger, > eating, but mittent; with tearing. Twinging from 2 to 4 30 pm.: soon returning Emptaness at 2 P m., with loss of appe- in middle of abdomen at 4 P.M., > emission of flatus title Full feeling; in epigastric region after every Griping about U after eating. Pain in region Flatus meal, < dinner, > if a little bread was eaten during lent feeling in region, without desire to pass flatus, the third hour after dinner Heaviness an hour and a Crawling in region, with burrowing; C. in region, as

> Lower—Sticking; in r, l. groin Cutting; at 1 P.M., with dragging downward in groins. Griping Pinching Twinging in sides, extending into chest,

with contraction, then sticking above umbilious and imicturition drawing inward of it Sensation as before diarrhoea. action), duminished, scanty and reddish, becomes tur-Pain as from a blow on 1 ilium, on pressure Press bid on standing; contains mucus, with cloudy sediing inward, > walking and rubbing, but frequently ment on standing; U like muddy water on standing. returning; P. inward above pubis Tension in region deposits a slight cloud of I illum on bending trunk to that side; T. in I abSexual Organs. — Sticking from 1 spermatic cord
dominal ring when standing, > when sitting and by through abdomen to chest Drawing pain in glans emission of flatus Burning in r. groin at 2 30 pm, Emission in morning after a lascivious dream, then then sticking beneath r breast; B above pubis, rather long, painful erections Menstruation eight days car-

then succing centes at a consequence of the state of the

stant; ineffectual

previously respiesared, with sticking bitting Spas-, norly in 1, in 1 female breast, beneath rise, posse-modic contraction of sphinder Sticking. Pracking beneath 1 female breast, then twinging in whole abde-after usual shool. Smarting after diarrhooa. Throb- imen, in r manna at 230 PM. on bending together after usual stool Smartung after duarrhoca Throb-imen, in rinamma at 230 PM, on bending together bing pain Burning at 5 PM, after scratching it > becoming erect, it is a simple pain on inspiration, Itching, with urging to stool and alternately hard and in 1 on inspiration; in r lung on every inspiration, thin stool; I., > scratching, but returning

yellow-greeniah water, then burning in unus (Iris v), tent, between short ribs during dinner, intermittent forcible, of green, frothy water (Mag c), three times in last 1 false ribs in morning on rising after stool after dinner; wotery freeze, frequent, with secretary in mest; must fine it morning on Iraing, after stool after dinner; wotery freeze, frequent, with secretary in and after dinner. Tearing in r fomale breast, with anus; bright yellow fluid freeze, tunce, then chilliness stacking in r costal region, T beneath cartilages of I (Canth); area stool of yellow water, then ineffectual, lables ribs, with pressure Camp, a sensation as if urging Semi-fluid, othe-colored, after dinner, with contracted, < between scapula and beneath sternum, emission of flatus, S at first, then solid, with burning, | > eructations after rubbing the back in morning after rising, S., the last part more solid | Pain beneath I short ribs after dinner | Throbbing but scanty, and with pressure three shools after din-pulm in region of 1 short has Pressure, in r, on ner, the first part always semi-fluid, then solid, and upper part, not affecting respiration, in I. during in passed with pressure Durahea, in morning; twice, spiration and on slooping Oppression in evening on with burning in anus. Thin, yellow, T. twice a day, ascending a hill, O, > cructations, O, with increased next day constitution that on an order of the pressure Durahea. small, thin, dark, urgent, stool at first as usual, then ness in r., provoking cough Burning in 1 upper copious thin stool, with pain in abdomen, then tenes- part, B above pit of stomach, then in head, with redmus, then pain in abdomen, then frequent liquid ness of face and hands, but moderate warmth of skin stools Soft, then sore pain, S, dark, copious, also Heart and Pulse.—Pressure at H as from an impediwith flatulence Pasty, with tension in abdomen, P ment to its beating, with pulse rapid, once intermitand offensive

Hard, after long urging, then twinging in anus, least exertion. Pulse small, after the pulpitation, and some hours later daily, preceded by frequent urg- and intermittent. P slow before breakfast. Fall in mg; and scanty, with great exertion. Copious, in the beat of P. c. head.

Neck and Back—Drawing in r side of neck, with Frequent, and watery; two in afternoon; two, bilious, yellowish-green; F, with burning and pressure forward from maps into head Drawing downward
and pressure out of great lumps, with sticking in
anue, then passage of offensive, brown, corrosive ishoulder towards r female breast, at 230 r u, in
mucus, then after several attempts there pushes out a jower dorsal vertebra on 1 side, in region of 1 mucus, the last exertion evacuates only mucus like in coccyx after stool Frequent pain in I loin, the white of an egg, then relief of irritation in anus walking, > pressure Bruised pain in loins and of pains in r. hypochondrum and abdomen Omitted; and urine scanty. (Ascarides expelled)

Clinical.—Diarrhos, profuse, yellow, watery, gushing, < excessive drinking of water. The diarrhos is generally painless, associated with cold feeling in abdomen (Colch.), but sometimes with

evening; F., of watery urine; rare and less than ing, with tearing in all joints; weakness of r during

Urine increased (apparently secondary

ful contraction after stool Urging; in evening, with soreness in trachea Dry cough in morning on rising, discharge of blood after stool, at night and in morn- > walking, D cough about midnight, with oppression ing, then partly soft stool, with pressure, with rumb- of chest and chilliness; waking towards midnight, ling, as before diarrhosa, then hard stool, with press- in shocks in forenoon, with pressure in abdomen ure; as before diarrhoa, but the stool is hard, con- beneath I short ribs.

Chest .- Sticking, in middle, in l, fourth rib, in r ' Anus.—Hæmorrhoids which existed sixteen years upper costal region; in region of I short ribs, postein r. < inspiration, extending from 1 side to stomach, Stool .- Watery faces, yellow, frequent; diarrhos of after dinner, inward beneath r false ribs, intermit-

tent Violent and rapid beating of H Pulpitation on

griping in abdomen. A small part passed unnoticed, tearing Nape feels as if grasped Pressure as from mass of pasty, dark brown, offensive faces mixed with kidney. Burrowing in r. ischium in evening Pain

> Extremities -Suppurating pain in r hand and l foot Heaviness of arms and legs on moving about Relaxed and paralyzed feeling Weakness of arms and legs all day; W of hands and feet when walking

Upper Extremities.—Sticking near r axilla, through l shoulder-joint Rheumatic tearing in shoulders Urinary Organs.—Urging. Micturition frequent in Arm tearing, drawing pains, < I. elbow and wrist, drawusual. Burning in urethra during micturition; after dinner, with trembling of r hand, paralyzed feeling in 1 m evening. Upper arm, sticking above bend of of nose; in r. palm, on r tabia above ankle; on sacelbow, tearing in flexor muscles, T above 1 elbow; rum at 2 p m, on l, side of chin at 2 30 p.m.; of r. experiodical T, bruised and tired feeling in r when ternal ear at 6 p.m., on r. temple, then appearing in l; moved, cramplike drawing in lower part of 1 Elbow, on l clavicle near shoulder and in maps, returning near elbow, in 1 beneath elbow in atternoon. Wrist, at 2 PM. tearing in 1, above and below r.; in 1, with throbbing. Sleep - Yawning, with weariness, Y at 2.30 P.M., pain, tearing drawing in bones of r, extending to tips with indolence and sleepiness, frequent during the of fingers, at noon, lasting three hours, with itching in day, with sleepiness, at night quiet, sound sleep; freing in first joint of I thumb Tearing in back of r PM when reading, two hours after dinner, after dinindex in atternion, with sticking, T. extending from ones, not open air, after midday meal, with weak-two r small ingers towards back of hand, T between ones, overpowering, in evening, and feeling every first and second phalanges of thumb in atternoon when inorning and evening as if she had not slept enough, writing, so that he could not hold the pen

gion, as after long bending to the left, bruised pain after sleep, during which she hears everything drawing extending to knees Knee, sticking in inner of his relatives; foolish, disconnected. sticking in calves; I leg and foot go to sleep when sit- in it, creeping over back ting, > motion, with drawing inward of toes Mal- Heat at 130 PM, with sweat of head and hands, leoli and knees, tearing, boring in ankles, B in H, > head, > open air, rising, with red face and exankles and knees only when sitting. Feet weary, ternal heat Heat of head, after rising from stooping; F lighter than ever before

in places, in nape, ankles Tearing on tip of nose just as suddenly disappears. Heat of hands; with at 3 rm, > scratching Tension on r side of neck swelling of them Burning in external surface of r. after dinner, with burning. Crawling on face, < lower thigh while sitting down, in bend of r knee when jaw, provoking scratching, then pustules, then desqua-sitting after dinner, > walking, tickling, in axilla, > mation Tickling, > scratching, posteriorly on ball of scratching. r thumb, on first joint of r middle finger, on r brow, Sweat, a but returning. Biting on r. flank, in I ankle, > mov-night, profuse, towards morning, on palms. ing , at 3 P M , > scratching, on 1, evebrow and 1 side of neck, itching B on cheeks Itching biting, > scratching above r temple; above r ear, on r lower jaw, in r inner malleolus, on r. zygoma, then appearing above 1 brow

sticking from bend of 1, through arm to tip of elbow, and changing to burning, then to biting. Itching not alterwards only in bend, S on upper surface of r. on > scratching, in r axilla, on outer margin of 1 foot bending, tearing in 1, T in r at 1 PM., T. from bend Itching on r thigh like scraping, with burning after of r towards index, as if in bone, tearing throbbing scratching. Biting itching in a spot on 1. tibia, in pain in 1 Forearm, tearing on anterior surface of 1 middle of inner side; posteriorly above bend of knee

Hands, cramplike drawing in places Stick- quent at 1 PM, without sleepiness. Sleepiness, at 2 > if after rising she took a short nap Falls asleep Lower Extremities - Reeling Thigh, sticking in early. Stupefying sleep, he is confused on waking. bend of l, above r knee, in l hip at 2 30 Pm, tear-| Falls asleep late Sleepless till towards 3 Am.; S if ing in r femur below trochanter, T from middle of he remained up longer than usual Frequent waking I to knee, pain extending from r hip to hepatic re- after midnight, after which only half sleep Light a short walk, B pain, obliging him to sit, paralytic joyous, lively, frightful, of serpents, etc; of the death

surface of r after dinner when walking, S beneath r Fever.—Chilliness, in forenoon, with shivering, c patella on sitting down and on rising, > walking, down back, with cold hands, at 3 30 P.M., on entering tearing on inner margin of 1 patella, painful tension 100m; in bod, which she believed continued in sleep, in 4 spot in 1, drawing pain in 1 when walking, > a on waking from a dream that she is cold, when vomitiong walk, with tearing Legs, sticking in r calf in .ing, after stool, with shivering and hair standing on aftermoon, sticking tearing in middle of tibue when end, frequent, with cold hands, creeping Frequent sitting, ; walking, when there is sticking in r calf, > shivering, S during dinner, with nausea, on entering sitting, boring in tibize towards evening, drawing like room after stool, over head in evening Head sensia pain from weariness at 7 r m, extending to knees and tive to cold Chilliness in head, frequent, on vertex, into feet, laxity, weakness in forenoon, with heavi- at times painful, changing after covering with a cap to ness. W when walking in open air after dinner, with heat; externally on face at 2 PM, with internal heat

in evening, with weariness and laxity of body, > Skin .- Pimples with yellow tips on r chest, burn- open air, with redness of face, about forehead after ing after scratching Boil, with pus at tip, painful on dinner, rather external; frequent, sudden in 1 frontal pressure Itchlike pustule beneath 1 nates, which eminence after dinner Burning before I car; behind was unconsciously scratched off at night and then r. ear at 4 PM Heat of face; after dinner, with exterwas unconstructed statement of the state Sticking like flea-bites from 1 angle of jaw to neck, crawling, then also in 1, sudden, in r zygoma, which

Sweat, after morning soup, general; profuse, at

### Grindelia.

A tincture is made of the fresh herb, Grindelia squarrosa, Dunal

Fulness of head as from quinine, then rheumatic Itching on inner surface of 1 knee at 2.30 r.m.; I. pain and soreness in 1. syeball, running back to brain, between 1 thumb and index, after scratching two < moving it, puil disted, the same pain and soreness small techniq vesseles, of r, ear at 2.30 r.m., and in r, knee, then r, eye affected like l, conjunctive inafter rubbing burning, on 1 lower margin of eye, at jected, eyes appearing as in congestion of brain, unbear-3 PM., > rubbing, on 1 scapula at 2.30 PM., > rub able pain in region of liver and spleen, so that I could bing Itching, > scratching above r. brow; on l. side not he still a moment, with rheumatic soreness in region of the pain, respiration would cease on falling asleep, and would not be resumed till awakened by the suffocation

tile suriocation.

Clizical.—Conjunctivitis. Purulest ophthalmia. Iritis Ashma, with profuse secretions, which are tenselous, the expectoration relieves. Puracymind dyspens, with palpitation, fantness, reading relieves to the process of the second secretion of the second sec

# Guaiacum.

### A tuncture is made of the gum from Guasacum officinale

General Action -- It seems to promote perspiration Appetite lost and nausea for everything and the secretion of urine and to augment the men- Eructations, empty for secondary syphilis, chronic rheumatism, etc

Compare Iod , Comocladia, etc.

Generalities.—Emaciation in men of dry constitushortly before sleep, a few from 9 to 12 A W

Clinical.—Arthritic diathesis. Chronic rheumatism. Secondary syphilis. General tendency to emaciation. Stiffness and contraction of muscles, tendons and extremities, with rheumatic swellings of the joints. Aching in the bones and chronic inflam-mation and degeneration of the bones, which are very sore and cannot bear the slightest touch. Growing pains in children

Morose, he speaks little Mind.—Fretful temptuous Obstinate Loss of ideas at breakfasttime, he stands in one place and looks in front of him without thought Menury weak

Head.—Sticking upward in brain Aching at night like a pressure upward in brain. A ending in a stitch into a pressure upward in ordin. A canning in a satisfar in r frontial cuminence Brain feels loose in morning monstruction and dysmenories. Chronic inflammation of the and as if it moved at overy step. Forehead, stricking lovaries, with seconding pansi, irritable bladder in r eminence, tearing externally from I bone into muscles of cheeks, drawing T in forepart, pain transversely across; pressing in forepart, drawing pain from middle of bone into nasal bones. Temple, tearing externally in 1, pressive pain in r as from some ration on backing and hawking. Sticking from larynx thing broad; pressure in 1, without pain Side, sticking in 1 at junction of parietal and temporal bones, drawing S from r parietal bone into frontal spiration Sudden stuffed sensation in chest, in praemmences, where they end in a single statch, drawingtearing S in r, extending towards frontal bone, tearing in whole 1. Occiput, sticking in 1; tearing in r, expectoration grawing-tearing in O and forchead Headache exter-Clinical.—Pleurite pains in apex of lungs, especially in ally as if too much blood were in scalp and it were consumption. In consumption it relieves the extremely offensive swollen, when sitting Pulsation externally, > walking, transiently > pressure, < sitting and standing, with sticking in temples

Clinical.-Violent rheumatic or gouty (or syphilitic) pains < night.

day. Pupils dilated Hardened mucus in r. canthi striction in dorsal muscles; constriction between S

Ears and Nose.-Tearing in l ear, in outer margin of I concha. Aching in l. ear. Frequent watery discharge from nose

## Clinical.-Persistent desiness, with recurring earsches

Face. Swollen, red and painful Spasmodic drawing in muscles of r. cheek in morning on rising Sticking in r cheek, in r malar-bone Sensation as if struck with a cloth in evening on falling asleep, so that he woke in fright Pain in I lower law drawing. ending in a stitch

### Clinical.-Facial neuralgia.

Mouth and Throat.-Tearing in l. upper molars Pain in 1 upper molars on biting them together Taste flat.

### Clinical.-Neuralgic toothache. Tonsillitia.

Stomach -Violent hunger in afternoon and evening Constriction in region, with strual flow It has been much vaunted as a remedy anxiety and difficulty in breathing Frequent pressure in pit, with difficulty in breathing, oppression and anxiety.

Abdomen.-Rumbling Gurgling as from emptiness tion, with hectic fever Everything seems too tight Pinching cutting transversely through A on insuirain morning on waking, and he tosses about the led tion Sticking in I hypochondrium Griping, which General discomfort Indolence Weakness, thighs extends more and more downward, then emission of and upper arms Most symptoms appear when sitting, flatus, G in 1 side of umbilicus, in hypogastrium, < morning, immediately after rising, or in evening which constantly sinks downward and backward. Trembling of inner muscles close to r ilium Pain in groin as from a hernia

Stool .- Thin, mucous, preceded by griping Soft, crumbly Constinution Omitted

Urinary and Sexual Organs .- Sticking in neck of bladder after urmating Something biting passed Cutting when urmating as if Frequent virging to urmate, with small discharges, constant desire, with profuse urine each time, obliged to urinate every half hour and much each time, urging immediately after micturition, when only a few drops passed Emission at night, without lascivious dreams

Respiratory Organs and Chest.-Spasmodic inflammatory affections of trachea, < larynx, with palpitation that threatened suffocation Mucous expectoto I clavicle, S beneath I true ribs, < towards back, from centre of r chest to beneath r scapula, < 11cordial region, even at night in sleep, like arrest of breath, causing frequent dry cough until there is some

expectoration (compare Cap ).

Neck and Back.—Pain on sides of cervical vertebrae. P extending from I side of neck to vertex and ending in a stitch. Rheumatic stiffness in l side of back in bones of the head, < top and I side, extending into the face, from nape to sacrum, with pain on slightest motion Drawing down r side of spine from axilla to lowest Eyes. - Feeling as if swelling and protruding, the lids ribs, with tearing Scapula, sticking extending along L. seem too short to cover them (see Comocl ), with sen- side of nape to occiput; sticking tearing on posterior sation of insufficient sleep, yawning and stretching all margin of r, sticking tearing on margins, then con('limical.-Muscular pain and stiffness in the back

Upper Extremities .- Stretching, with yawning Frequent sticking on top of r shoulder, S in r upper arm, middle Drawing tearing in Lupper arm, extending to finger. < wrist. Upper arm weak as after hard labor Frequent drawing-tearing sticking from I elbow to wist Tearing in r forearm, extending into wrist, T in I wrist, drawing T in I wrist Sticking in r thumb

Lower Extremities.—Stacking in nates when walking, stiting, as if she sat on needles. Thigh, stocklower thee, S above I knee, which meet in most above r knee, S above I knee, which meet and welling of the lag, even up to the hip and extending to the
knee, drawing tearing from middle of r to knee, drawing tearing from middle of 1 to knee, growing pain in r , bruised pain in 1 on walking in open air, crawling pain from middle of r femur to knee when sitting still, drawing pain from middle of 1 to knee on stretching leg, - drawing it up and bending it, tension, a r, as if muscles were too short, when walking, < touch, > sitting, with weakness Drawing pain in knee, which ends in a stitch Tearing sticking from middle of I tibia to toes, between tibia and side of calf. Painless constriction in r calf Leg Tearing long-drawn statches from r tarsus to knee Pam in a spot on back of r foot, ending in sticking, : motion

Skin -Sore, painful pimple on nose, hard P, with white tip, sore on touch, on r eyebrow Grumbling on whole leg, with heat in it Crawling in chest, in thighs and legs, extending to toes, when sitting, as if during day

refreshed in morning on waking Sleep full of dreams as if drunk, as if brain were swimming around all refreshed in morning on waking Sleep full of dreams
Dream of that she was pierced by knives D of
Forehead — Aching, in morning around on rising
Forehead — Aching, in morning, across bone; over Dream of that are was present the subjects Nightmare nose and eyes, over reye at 9 AM, < sitting or standwhen lying on back, and waking with cries

with thirst, without redness or sweat Sweat every F and over eyes at 8.30 AM on rising, with empty

### Hamamelis.

A uncture is made of the fresh bank of the twigs and root of Hamamelis Virginica, L. (witch-hazel)

chiefly, we presume, by virtue of the gallic acid con- if vermin crawled along edges of hair. tained in the bark.

Allus.—Arnica, Rhod., Carbo veg., Vipera.

Generalities .- Disposition to take cold easily. Takes a fresh cold on being exposed for a moment, coldness creeping over body on standing a moment in open air, chill running up leg, head stopped, pain over orbits. Inability to keep still though motion made him worse Desire to he down Wearmess; at 3 P.M., on rising, with vertigo, when walking, instep feels strained Tired casely; in evening when standing; when walking.

Mind.—Feeling that she ought to be reverenced by all around her and have great respect paid to her opinions Desire to hear sublime conversation after the heat, with indisposition to talk myself Impatient, did not care whether he attended to his practice or not Angry, nothing suits him Irritable, and not wanting anybody to speak to him Gloomy, > evening, with no disposition to move Discontented all fibula, extending to patella, tearing-drawing S from day. Wishes to be alone, unable to settle mind on middle of r tibia to knoe Jerking stitches in outer study Quick to perceive anything out of shape seems brunsed after walking, feeling as if brittle work, likes to sit and muse, no desire to study or read Wearmess of legs, < thighs Sticking in rankle when sitting, drawing S from r ankle to middle of in evening. Inability to read or study, I to concentrate thoughts, with restlessness and discontenument Forgettul - words when talking, F of what he reads

Head .- Aching , all day , in morning , in morning on waking; at 7 Au , towards night, on rising, < second sleep in morning, a morning and when indoors, > thinking, reading, walking or talking, evening, < taking cold, > evening, > out-doors. thighs and regs, extending the stitches like flea-stomach and umbilical region; interinitient Burstbites on thigh, < sides of knee-cap, ; scratching stomach and umbilical region; intermittent Burst-Burning itching, correctiong, correspond I on back ing pain on waking, bending forward, B pain at 7 AM on waking, volume towards evening, with vertigo on Sleep.—Yawning all day, with stretching and sensa-stooping Fidness, all day, in brain, < at top, after tion of insufficient sleep, Y, with stretching and the heat, with feeling as if a bolt passed from temple tion of insufficient sleep, Y, with stretching and to temple and were tightly screwed. Feeling as if she comfort. Sleepiness in afternoon. Sleepless two hours had taken cold. Dulness. Vertigo, at noon, when comiont. Siepniness in atternion includes two noises in a terming, and tossing about the bed. Late falling stooping, on insing after stooping, after lying down, as not waking as from fright or as if falling. The when reading, with nausca and desire to be down; as if drunk, as if brain were swimming around all

Fever.—Chilliness, in forenoon and in evening before r eye, < when sitting or lying quiet, about noon, > ing, - lying, - rubbing forehead and pressure, over sleep, sweat in morning, internal general, in evening, revenue and in open air, returning next day at 10 r m, then heat, < face, without thirst, in back in after a walking in open air, returning next day at 10 r m, and the control when heat, when heat, when heat, when heat is the faces or when heat is the property of the control when heat is the property of the control when heat is the property of the control walking in open air, returning in the property of the control walking in open air, returning the property of the control walking in open air, returning in the property of the control walking in open air, returning the property of the control walking in open air, returning the property of the control walking in open air, returning the property of the property of the control walking in open air, returning the property of the control walking in open air, returning the property of noon Shivering in back, in breasts. Heat of face, lower part of epigastrum and umbilicus, bursting, in morning, S on walking in open air, < head, pearly | feeling at pit of stomach, the headache > towards S on torchead profuse S on back at might night; stupefying, over eyes and root of nose Fulness Sensation as if anterior lobes of brain were too large for cranium Stopped feeling over root of nose Dulness, < over eyes and at root of nose; root of nose all day, < 11 P.M.

Aching in temples, < morning, sharp pain in T General Action.—Its curative power seems to extend Mastoid portion of temples, shooting in 1; shooting over the venous system, it has been found useful in when walking in wind, sore pain in r.; pain in mornvenous dilatations and hamorrhages, which it controls ing , peculiar sensation. Pain in occiput Feeling as

Eyes.—Blue margins around eyes; under E., < r.;

Vision dim

(Arn.).

Ears.—Burning in r in evening. Itching in l., and

Nose.—Swollen, inflamed, painful to touch, septum swollen and painful to touch Pain at root, with ful- bing. Heaviness, back of S. ness Stoppage; > evening Sneezing at noon, S, with running of water from nose Coryza, only from 4 to 10 PM., from exposure for a moment to a draught breakfast Pain, morning and evening without a hat, with hawking from throat of what without a nax, with navaring them, burning and smart umbilical region, after rising Griping in U region at ing Tough, green plug from r nostril. Profuse epis- (7 a.M., at 10 \*\*), before dinner Distress at umbilicaxis, > smelling camphor, between 9 and 10 a.M., cus, with natural stool. Pain in groins; drawing. with tightness in bridge of nose and crowding pressure in forehead between eyes, and numbness over os frontis Bad smell from N. Smell oversensitive

Clinical.—Nosebleed, either vicarious or idiopathic Espe-cially indicated in diseases of the nose, pharynx and mucous mem-brines, generally when there is a variouse condition of the small bloodvessels, which bleed essily.

Face.-Muscles sore and stift. Shooting along r upper jaw to malar-bone

Mouth.-Lancinating pain extending from molars to malar-bone and into temporal region Pain in r teeth. Soreness about r upper wisdom-tooth Gums and with di bleed easily (Carbo v) Tongue pale, clean, but not Constipation so red in middle as usual; coated white in morning, blisters on r side; scalding sensation just beyond tip, pressing distress at root. Taste bad, putrid, flat, rough

### Clinical.—Gums spongy, bleeding easily

and tonsils, with pain on swallowing. Stinging in like laudable pus. Urine clear, saltish uvula on coughing, as if it would break off Pain, on swallowing, in pharynx Soreness < fauces, and every inhalation seemed to dry up their mucous lodged in fauces, causing constant inclination to swallow Distress in pharynx, with roughness of fauces, D in pharynx and esophagus, extending to stomach very painful on swallowing food, fauces congested, tonsils swollen.

symptoms were < smoking Eructations; in evening; at night, three or four hours after meals; after eating; after tea, of air; tasting of food; of unusual taste in morning; taste of food rising to pharynx three lowish or greenish-gray mucus. Return in evening of or four hours after eating. Hiccough; and spasmodic inflammation of diaphragm, which was caused fifteen

at inner canthi. Dull color of sclerotics. Sore pain, Nausea; at 8 P.M., 11 P.M.; on waking, with pain in Painful weakness. Feeling as if they would be forced frontal bone, after eating; after dinner, with cructaout of head, > pressure, < transiently after removing tions, has to remain quiet, even without reading, to pressure. Swelling of balls and lids, with bloodshot avoid vomiting, has even then eructations and heartappearance of r eye Twitching of upper lids, r, then burn; after pork; after pork for dinner, with eructal Burning of his on closing them at 4 P.M., with heat; tions and violent hiccough, then burning pain in stomach and esophagus, then cramp in stomach and chest . Clinical.—Ecohymoses in eyes from bruses Traumatic with vertigo, compelling him to lie down in order to fiammation of iris, with hamorrhages. Intraocular hamorrhages avoid falling. Vorniting before midnight of plums eaten at supper.

Gastric troubles. Distended by wind over body under the clothing Pain in mastoid pro- after a hearty dinner of usual food, and in transverse cess in afternoon and evening on first going into wind colon. Burning distress in lower epigastrium and umbilicus, with ineffectual urging to stool Throb-

# Clinical.-Hematemesis of black blood

Abdomen. - Discharge of flatus Griping after in morning Pain in r hypochondrium passing to testicles

Rectum and Anus.—Pulsations in rectum when he is half recumbent. P in rectum as if piles would protrude, in R. and penis, synchronous with radial pulse Urging to stool, with large easy stool in morning and afternoon, ineffectual Spasmodic contraction of sphincter Rching in anus

# Clinical.—Hemorrhoidal flow Discharge of blood from the rectum, painless, dark and thick. Intestinal hemorrhages

Stool.—Soft at night; at 6 AM, covered with mucus. and with distress in bowels. Covered with mucus.

Urmary Organs,-Urging, but little urine, in drops, frequent urging, acts upon the kidneys more when lying, compelling her to rase soon to pass much unne Frequent mucturition during the day, frequent, with constant desire Urine copious, with frequent desire, C and pale, C and clear; profuse, but little at a time Throat. - Pam along r sterno-cleido-mastoid, < and light-colored, profuse, light-colored, with greasy morning and when moving Congestion of fauces deposit, which rises to the top on shaking and looks

### Clinical.-Hematura

Sexual Organs -Glans, statching, tungling, pulsamembrane Rawness, and in fauces, and in fauces tons Erections, at night, on retiring, without in evening Feeling all day as if something had desire, but in morning he found he had had an emission, frequent Pain in spermatic cords running into testes, at night Sweat on scrotum at night, profuse and cold Frequent pain in testicles all day (Clem, Dryness; not > by water, with thirst causing him to Rhod), with distress in bowels, dawing Pin total drink much water frequently, with burning, uvula ides (Rhod). Desire increased Emission at night fallen, difficulty in talking, all night, with feeling as if without sensual dreams, and without being aware something had lodged there, compelling frequent swal- of it, E, without erection Active uterine homorlowing, which caused pain in tonsils, next morning rhage; loss of over a quart of bright, fresh blood, not congable, midway between two menstrual periods, her menses were usually dark and congulated

Stomach.—Thirst in afternoon; in evening, lacking.

Clinical.—Varicocele Varicos of the labus Dysmenorrhora,
Aversion to water Increased desire to smoke, but
with pain in ovaries Chronic metritis Uterine hemorrhages,
dark removaling flow or the labus Dysmenorrhora,
dark removaling

Respiratory Organs -- Hoarse in morning on rising. Cough dry, sometimes expectoration of thick, yeleructations; violent, at 6 P.M., four hours after eating years ago by running, now all the original symptoms, labored respiration, tightness of lower part of chest, day, occasionally pulsating. Sharp pain in corns on inability to inspire deeply and fully, and on attempt- toe. Pulsations in corns on 1 toes in evening: P. in ing to lie down mability to breathe, with fulness of corns on both feet after paring them in morning. blood in neck and head, and suffocation so that he was Skin.—Herpes on lower part of nose, on nose in obliged to sleep that night in a chair with the neck afternoon, > evening Hands chapped Pimples bebare. > morning, but returning, riding and walking tween thumb and index. < r, on face, caused by pamful

Chest -Sudden hamorrhage from lungs Spas-Cramp, at 11 PM Pain in r lung, at 10 AM

Heart and Pulse.—Pricking pain in region of H and in veins of arms Palpitation II's beats can and hard, then almost imperceptable, 60, every fifth, sixth or seventh beat a little faster and stronger.

Neck and Back -Sore pain down cervical vertebra | affected by washing in cold water in sacrum and hip all day, walking

Going to sleep easily in afternoon

Upper Extremities .- Arms, drawing pain in flexors in the room and fear of injury therefrom of r , weariness , stiffness of A and shoulders after elbow, with stiffness of elbow. Shooting along flex- and dry, burning in palms, with dryness. Hot and ors of r forearm into palm. Pricking pain from wrist dry skin. Sweat at night after lying down. to shoulder, along course of superficial venns, < press-ure R wrist and inferer still in morning P and in an in a least of the pressure in the special pulse, see. It has been given for back of r hand, extending to shoulder-joint, P in liemorrhage meshes, hemorrhage analized and purjoin hands and fingers in morning, with stiffness. Sore pain in r thumb-nail after a slight knock, a night, afterwards with sensation as if growing into flesh, afterwards transiently > discharge of pus Finger sore after rubbing off a small piece of skin Fingers stiff at night, and sticking in first joint of r index

from hips to feet, inability to run fast; in r at 6 PM, symptoms with forcing feeling in varicose veins, in r, where there are varicose veins, > placing it on a chair, revaricose veins Stiffness of upper part of thighs.

emissions, with bad feeling, on nates, sore on touch, behind ear and on body, sore on touch and pressure, modic movements of disphragm Occasional sticking fine, all over body, next day not so sensitive. Feeling as if vermin were running over body, all over hairy parts. Tingling in foot when counting femoral pulse. Itching of hands; axilla, < r, all over body on unbe counted by lying still and pulsations are felt in dressing; on lower limbs on undressing; of hands in balls of fingers Pulse rapid Pulse irregular, full morning on waking, transiently > rubbing them together. < scratching, I next day at 6 A.M on waking, > rubbing and putting them into cold air, un-

Teaming across back Backache, caused by an emission, all day, and pain in legs, along spine, back inclination to sleep than usual, slept well all night of stomach, about 4 P w , in loins all day; in loins Sleeplessness from thinking too much Could scarcely in morning, in kidney region in morning on rising; sleep, heard the clock strike every hour. Uneasy sleep in morning U sleep, constant waking from thinking Extremities.—Aching and tendency to go to sleep of the business of the day, turning over in bed, unre-Drawing pain in hands, legs and feet Rheumatic freshed on waking Restless night, whole body felt symptoms in arms and legs through the day Ful- hot and dry, sexual dream, with emission, then weariness in joints as if they would burst. Weariness in ness and pain in loins. Sexual dream, with an emisr , r arm and leg , of limbs and arms when walking sion , without emission Fearful D Unpleasant D at 5 Am, then uneasy sleep D that a bat was flying

Fever.-Coldness, on going to bed, running up horseback riding, bruised pain in upper A and legs, in flashes over back and hips at 9 A M., extendshoulders, < motion, next day with drowsiness Pain ing down limbs. Heat, then tearing across small of in humer, extending to elbow and causing stiffness back and fulness in joints of legs as if they would in elbow, sore, in head of r in morning, extending to burst, which soon extended to all joints Hot hands;

# Helleborus Niger.

A tincture is made of the dried root of Helleborus niger, L

General Action .- It produces a "bluntness of sensibility" of all the special senses, also occasionally con-Lower Extremities.—Bruised feeling, < 1 Tired, vulsions It first produces scanty urine and dropsical

Allres -Puls , Colch , Apis

Generalities.—Flesh feels soft Convulsions, with moved by walking. Sensitiveness of varices Pccu-coldness Cramps and convulsive motions, with shoothar feeling in variees. (Apparent diminution of varicose ing in brain General tremor Unsteadiness in her considered shee? Stocking along Leciste nerve, S in actions Tearing stocking in several places at one, I hip and under I patella when walking Sorepan coverings of bones, S borng in various parts, < cold of femoral vessels to middle when walking Sore pain coverings of bones, S borng in various parts, < cold or femoral vessels to middle with a sore pain coverings of bones, S borng in various parts, < cold or femoral vessels to middle with a sore pain coverings of bones, S borng in various parts, < cold or femoral vessels to middle and a street of the street lower third, and in popliteal space, with dilatation of feeling in open air as if he had been sick long, all objects seemed new Soreness in flesh (Distended Pain in I knee Sore pain in popliteal space. Sore sensation in swollen parts, with heaviness.) Could ness of knee Rheumatic pains in legs Fulness in neither sit, stand nor lie, and constantly pointed to his joints of legs as if they would burst, then dread of heart. Feeling as if blood were poor and thin, listmoving the limbs, with weary, stiff, full feeling R lessness Necessity to stretch as soon as he opened leg tired l'ain in feet and toes; in r. great toe, sud- his eyes in morning, then weariness and closure of delly in r great for when running Feet seally go to lids. Wadness; in formon, with sleepiness and sleep when driving in cold wind. Stutching in corns jawning Sudden relaxation of all muscles, with our four at 10 A v, afterwards as soon as boots are falling to the ground, coldness of body, cold sweat on put on in morning (rainy day), permanent during the forehead, stammering, slow pulse and contracted pu-

Faintness. Aggravation in afternoon and even-in ears and unsteady gait, with pleasant warmth in Amelioration in open air.

Clinical.—This drug seems to be useful in a general condi-tion of want of reaction, a semi-paralytic state of the system.

Mind.—Delirium. Vivid fancies after lying down. a hundred forms float before his eyes, suddenly coming and going Self-confidence Happy carelessness about everything Mirth alternating with melancholy, desire to laugh, then desire to weep. Anxiety; with restlessness, apprehension of misfortune, with indifference to joy or sorrow, contented with nothing Restless, impatient, hopeful, feeling as if circulation were increased, could accomplish great deeds, fearless, feeling as if brain were boiling Anger at trifles Fretfulness. Despair about his own life Sadness, on seeing a cheerful person; on account of his condition. Homesick Do not wish to speak, dread company, do not wish any one to speak to me or look at me. Reflective, taciturn all the afternoon Tranquil and desirous to be down. (Irresolute) (Dresses himself awkwardly) Stupefaction, with slow answers (Phos), S., with vertigo Distraction when studying Inability to reflect Memory weak.

ing, etc.

Head .- Tearing in various parts Piercing pain, which on sitting upright becomes a burning in brain Aching, all day, with heaviness in it and pain in occiput, with heaviness; in skull, deep, so that he moves constantly, > lying quietly in a half dose, with eyes closed, stupetying, all day, as from drunkenness. as if compressed all day, as if brain were pressed inward on every step in open air; as if brain would Bruised pain; now in one part of brain, now in another, < stooping, with dulness.

Brain feels too large, on waking, with paroxysmal here and there; and noise hurts, sound of wind distresses Heaviness; all day, < during fever, > open tresses Hatenies; all day, < during fever, < ) open start, with tension and pressure inward in temples, < fractional tension and pressure inward in temples, < fractional tension and pressure inward in temples, < fractional tension and the start of the

ing, with heaviness of head, then nausca, he feels

stomach and abdomen; stupefying, with inclination to fall forward; as if objects moved in a circle, with stunidity

Forehead -- Muscles drawn in folds Drawing in skin so that it is wrinkled Sticking externally in r., then I.: boring S. transversely across Tearing in I eminence, involving 1 eye Boring in bone and along coronal suture, in F and occiput, with sticking. Boring drawing pain Aching, in I, over eyes, in bone; in sinciput, deep in sinciput, in sinciput all day, with heat in it; in evening, with pressure in r temple, in eminence when sitting, with vertigo, in sinciput, < evening, with tearing and heat; in r eminence, < walking in open air; over eyes extending to temples, skin of F feels tight, disposed to frown, head feels weak as if dazed; bursting Pressure outward in r. Brain feels too large in front, occiput feels empty, then reverse in forehead and occiput feels as if it would fall forward, disposed to be down and roll head from side to side, feel helpless like an infant, disposed to draw up feet like an infant Pulsation, and in temples, with heat in face Confusion. all day in sinciput, with heaviness and pain Heavi-Clinical.—The general mental conduton characteristic of inclining in this drug is one of almost complete supor, it is extremely difficult to arous the patient (the Phose as, patient can be aroused cault). There seems to be great physical prostration, or at least in head alternated with pressure in r upper arm, then lose of control of the mind over the body, possibly due to cerebral efficient (serous); this tendency to serous efficience superior of the body, and in dropscal efficience server, where Hell, is the receive if the patient be stupped (Apai) Merchandle, have for death, a kind of stupplicity, amentalights mutter-accidunt, fast of death, a kind of stupplicity, amentalights mutter-accidunt, fast of death, a kind of stupplicity, amentaling the mutter-accidunt, fast of death, a kind of stupplicity, amentaling the mutter-accident, fast of death, a kind of stupplicity, amentaling the mutter-accident, fast of death, a kind of stupplicity, amentaling the mutter-accident fast of stupplicity, amentaling the mutter-accident fast of stupplicity, amentaling the mutter-accident fast of the stupplicity and the stupp pressure, eyes, as if something would fall out of F

Pain in temples; in r after exerting attention, < walking, compressive; drawing, to ear; bursting sensation Pulsation in 1 temple, ending in a stitch limbs; every day from 4 to 8 PM, on waking, < Drawing pain in vertex in morning in bed Pressure upon vertex; as with a point, as if skull were pressed inward, like a clayus Bruised pain externally in vertex and occiput, < during chill, becoming on motion, < stooping and ascending steps, a jerking in scalp, > pressure. Sticking in region of r coronal be pressed from both sides towards middle and up suture, as if rising out of brain. One-sided tearing, with chill. Pressure in l side, drawing P in l hemisphere of brain from behind to forehead, as if brain accumulated there Stunefving, dizzy drawing now in pan in forehead, c movement, > pressure Confic-sion, till evening, with heaviness; < stooping, with Confusion of I side, with change of corvza from fluent warmth; > pressure of palm; open ar, with heavi-ness and inclination to vertigo, with paniless digging brunsed, < stooping. Sensation as if scalp were tight over occiput

magestion of brown

Vertigo; all day, walking; in morning on wak. exphalus Effects of concussion of the brain, after Ara had failed

with handstress of the brain after Ara had failed

Eyes.—Staring Sunken and discolored about lids. better when sitting and bending head, but on rising Sticking as if they would lachrymate Boring deep return of nausea and vertigo; on stooping; on stoop in r Pressure; deep, P. upon them. Feeling as if ing and raising head again, > becoming erect; on pressed together by something heavy from above in becoming erect; on walking, with nausea and pros- open air, he must exert himself to open them widely. tration; with indistinct vision, dilated pupils, roaring Burning biting, < inner canthus. Pupils dilated;

contracted Sticking in I ball. S in ball and its cov-|deglutition, much viscid mucus from mouth. Scrapering in morning after waking, on pressing eyes ing; in fauces from 10 to 1 and from 10 to 11 P.M.; in tering in norming after water, on pressing eyes light macces from the National Pain in r ball; in a spot on laces, with dryness Rawness as atter acrid liquor. I ball, between it and external and upper part of orbit Pressure on swallowing, with excorated feeling. Contributing of Ids, upper I.ds, half open in slum-stration. Burning and dryness . sgreesble warmth ber and pupils drawn upward; (swollen, red); biting from pharynx to stomach and over whole body, as in r : B in margins, burning and prickling. Canthi, after spirituous drinks inner full of dry mucus in morning, soreness in 1 in

sticking-tearing toothache, only the earache remained in morning and during the day Pressure; in fossa

of upper lip in morning after waking Ulceration in a streak of fire

corners of lips, with itching

together, extending into roots, sticking T in r molars on pressure, painful Rumbling, with uneasiness in evening in bed, < warmth and cold, so that he Movements of flatus, as if bubbles rose and burst, sleeps little, the lower molars seem longer, > during then offensive flatus, rising of flatulence towards through them Tongue, trembling, vesicles, pimple in morning after the customary milk, after dinner, on the with streking on touch, sticking, dry and white Steking, with tearing transversely across it Chiting in morning on rising; stiff, meensible Scraping pos-continuing in evening Griping on ascending steps, tetroriv on palate; S on arch of palate and in fauces (dysentery-like C transversely across after eating. Bur-Dryness all day, with scraping in throat; of palate, rowing with cutting scraping in it on moving mouth to swallow. with thirst

### Clinical. -- Aphthe of the mouth

Stomach - Appetite great, in forenoon, with fremorning on waking, with moisture in them, pressure quent tasteless eructations, ravenous, diminished; in r inner, < closing eye, itching lost; A., but no relish to food and nausea while eating. Orbit, sucking in upper margin of I, rather towards Aversion to food, to fat meat, to green vegetables and inner canthus, "during pressure with finger; tear-sauerkraut Thirst; none all day Erudations; of mg on outer side of I, as if between wall and ball, bluter fluid, suppressed Empty eructations; after affecting ball, aching, deep A, A as if eyes would breakfast, with nausea, but mability to vomit. His-fall out Twitching of brows and cheeks, with heat cough. Nausea, in evening; in evening, > bitter of face Blow, sticking tension in 1 on touch, as if a vomiting, with prostration, then helpless feeling; at pumple would form, pain drawing back and forth, night, with prostration and bitter vomiting; after with spasmodic contraction of their muscles. Photowith spasmodic contraction of their muscles. Photophobia, during fever Sensation as if everything were rising from pit of stomach, in whole abdomen, it to clear and black Vision dim; in morning, flickering, of floating specks; of black specks, of black specks, of longs, of brother and dark spots

Ears—Burrowing boring-sticking in r at night, with

Distention in pit and epigastric region, impeding respiration, with ulcerative pain. D in stomach, with Mose—Pain in root Constriction as if suffocation Griping Camp in pit and just below it, > straight-would follow Heat; in nostrils, about nostrils, ening up and when walking straight-would follow in the construction of the cons would follow Heat; in nostrils, about nostrils, ening up and when walking, returning on sitting, under nose, itching, in I wing Biting itching beneath with nausea Pain, m pt, in pit at every step; nose and on upper lip, as in commencing coryga ulcerative, after every meal, distending; bruised near Spasmodic tickling as if it would cause sneezing, with and beneath pit and in region of pylorus, where it is painful on every step, the pain < talking loud and on upper lip cracks in middle, in morning fasting; with touch Soreness, < stepping and coughing Scraping as if rubbed with woolen Biting, in evening, with heaviness and distended feeling, during a short walk, with gnawing, ravenous hunger and prostration Face .- Pale during heat of head, P and features dis- of lower limbs, in morning fasting, then pain in abdotorted, and sunten, pulse lost, wy coldness and cold sweat men, with rumbing, then slight soft stool, then dragdo eer body, so that a drop is on end of every hair Red gring run return Oppression P. It feels drawn inward Yellow Boring in 1 sygoma. Pain in 1 sygoma, in Feeling as if a fluid were poured into it. Uneasiness ra si in hone A row of statches behind ascending is as fore vomiting Burning; rising through esopharamus of lower law, near car Vesicle in middle of red gus; rising into head like nausea, and in fauces, like

Abdomen.-Distention, in evening, with constant Mouth Tearing in third molars on biting them ineffectual urging to stool, with ulcerated sensation Hollow teeth feel as if cold air passed short ribs, with empty eructations Offensive flatus,

Colic; on waking at 5 AM, with more urging to Salivation, watery Taste bitter in throat, < eating, urinate than usual in morning and scanty urine; at B. to all food, sourish T, with salivation, dry, slimy, night; with pallor, sunken features and staggering, found leaning against a tree, arms hanging down relaxed, hands cold, eyes sunken, lids closed, pupils moderately dilated and Throat — I'am in cervical glands Flapping as of clammy sweat, pulse thready, 102, then four liquid stools, mucus, like the opening and shutting of a valve on with tensemus, retching and vomiting twice of slimy, every inspiration Sticking, low down, and in fauces yellowish fluid (compare Colch); as before diarrhera; and tongue, with strangury and constriction of throat bruised pain anteriorly and laterally in walls. Loose and difficult swallowing, pain at epigastrium and vio- sensation in morning, so that pressure was agreeable. lent sickness, swelling of tongue and other organs of Heaviness Coldness. Discomfort, with coldness, as

before diarrhes: D., with drawing pain as before diarrhea, then urging to stool and pasty stool.

Twisting griping in hepatic region extending down-urine has accumulated in b ward and forward. Umbilicus, twisting about, in Pain in region of r ovary morning, > bending together and passage of flatus, with cutting; pain deep in region; heat deep in region; sharp pressure inward transversely across below U, < sitting Rumbling beneath umbilicus, R low tica, in afternoon Pressure on middle of pubis.

Clinical.—Many cases of ascites have been cured. Dropsy the result of disease of the kidneys or following eruptive diseases

Rectum. - Aching. Tenesmus after stool. Frequent inclination to stool. Sudden urging, with cut- on every deep inspiration when lying in evening ting in abdomen, then pasty stool, with disappearance Cutting on lowest true ribs outward through chest, < of discomfort in abdomen; sudden pressing asunder inspiration Twinging at one time in r anterior part, urging, then a thick, dry, difficult stool, with smarting at another in region of heart Piercing pain in L in anus during and after stool. Ineffectual urging No desire for stool at usual time, and a sensation cles, near r axilla, in l breast on leaning over. in l. as if anus were closed forever, then sudden pressure breast and shoulder on moving, extending down arm and sensation of distention, at first only short emis- to elbow. Constriction so that he gasps for breath, with sions of flatus, then a hard, large, difficult stool, with open mouth, but cannot breathe Tight, as if lungs were smarting during and < after the stool.

pressing asunder sensation, then stool difficult, trothy, part of sternum. Warmth in lower part mostly hard freces in balls Sudden pressure as from Climical.—Hydrotherax, difficult respiration, necessity to sat a foreign body, with desire for stool, but only flatus is up, with great construction of chest and gasoing for breath passed, afterwards return of pressure and a small; amount of large fæces Feeling all day as of constipation. Burning biting after stool Itching as from ascarides.

Stool .- Of only clear, tenacious, colorless mucus (Colch ). White, gelatinous, like frog spawn, frequent, with pressure Liquid, twice at night Diarrhora, with nausea and colic; always preceded by colic, which is relieved after stool Soft and in part thin, with feeling as if intestines had not power to evacuate. if it drew itself tightly together and something with put, during rest, < moving head, rheumatic S of nape sharp edges were sticking between its walls. Large, difficult, with burning snarting in anus, which con-boring S. in region of spine just below shoulders, tinues after stool, < sphincter Undigested Fre-Pain in various parts, P underscapula, in 1 scapula, quent. Retained, next day earlier than usual, and in becoming sharp on moving it, in lumbar muscles, afternoon diarrhea

urinating there is no stream and no desire, as if blad-, arm and knees l'am in fingers and toes, fingers, der had lost its power of expulsion
Urine conious, knees and shoulders, arms, toes and knees, knees, without much urging; and watery
diminished; U toes and shoulders, I knee, r shoulder and in toes; decomposes in a few minutes; U dark yellow; passed lower part of thighs and m elbows, anterior muscles without a stream.

Clinical.—Subscute inflammation of the kidners, with sup-pression of urine in dropsical symptoms Inflammation of the bladder and almost complete suppression of urine

Sexual Organs.—Relaxation and no desire Itching sticking in tip of glans. No erections even when urine has accumulated in bladder Desire suppressed

Clinical.—Suppression of menses.

Respiratory Organs .- Mucus, so that breathing was audible. Contracted feeling, with audible inspiration. down as if in spine. Sticking in hypogastrium, dis- Cough, sudden, constant hacking, when sitting smokena turbing sleep Jerking cuttings from r iliac region tobacco as usual; dry hacking, with painful tension in (beneath and outward in umbilicus) to outer part of 1 short ribs. Moaning. Greaning and grunting. 1. iliac region, returning in r. iliac region, which was involuntary sighing. Breathing difficult, in evenpainful to pressure. Pain in r. groin, becoming a lng, from tightness of chest, and he must breathe sticking, a sensation as if a hermia would form; inter-slowly and deeply, with frequent need to breathe mittent, in outer surface of os ilium, similar to scia- deeply, < walking in open air Rapid breathing. Short breath when reading or speaking Breathes better with mouth open.

Chest -Sticking in walls, in top of lungs, in l . I costal region; beneath 1 ribs, in 1 short ribs when walking, in last true ribs on every inspiration, in l breast near axilla. Pam in walls, in muscles, I mustightened, because ribs do not seem to expand L Anus. Inclination to hemorrhoids Dragging, with short ribs seem screwed to spine Scraping in upper

Heart and Pulse .- Pain in region of H Heaviness in region of H Palpitation Violent throbbing of H Pulse rapid, then slow, slow; varied from 30 to 50, small, at times scarcely perceptible; small, small and tremulous, small and feeble, strong, felt vividly through whole body, < heart

Clinical.-Heart's action weak, pulse small and tremulous, with dropsical symptoms.

Neck.-Pain in cervical bone, P in nape extending Hard, scanty, during and after to vertex, in some muscles on moving neck, with which there is cutting sticking upward in rectum, as stiffness. Stiffness of muscles of nape as far as occi-

Back. Sticking in middle of spine, with gnawing . above waist, rocking from side to side, bruised, in Clinical.—Diarrhos, stools of jelly-like mucus, hie frog spine between scapular, bruised, in lons, P' in lons spawn, generally with tensemus (Colch); sometimes profuse as from flatus which could not pass, towards evening watery diarrhos ashersating with constitution, in abdominal lymen sitting; contractive, in account.

Extremities .- Stretching Unsteady, feet weak Urinary Organs. — Urging, frequent, with soanty knees tottering Stacking in calves, shoulders and discharge (Colch); desire and seanty discharge, with toes Tearing in toes and fingers, T in joints at burning through urethers. Frequent nucturation When, might in bed Boring drawing pain in fingers, foreof thigh and in wrist; all day in r. knee and in legs, externally, in tibie, joints of fingers, wrists and ankles: r. ankle and leg, then in r shoulder, then in r. fingers, between metacarpus and fingers, changing from one count to another. P and drawing alternately in L whole body and nails fall out. Pimple on L side of fingers, calves, I ellow, beneath r shoulder, in I cer- forehead, with bruised pain on hard touch Yellowynal muscles, in r knee, then more seldom, in toes ish roundish tetter on arms, exuding water on scratchand I side of head, rheumatic P in bones. Drawing ing. Vesicles between first joints of fourth and fifth in fingers and toes. Heaviness, with sensitiveness of fingers, smarting on touch, moist, then scabs; moist muscles Weariness, standing, with bruised pain painless V on middle joint of r. fourth finger, with in small of back. Limbs and arms relaxed. Para-soreness of bone on pressure. Crawling in 1 cheek. lytic feeling, they feel large and heavy Torpor, with Itching corrosion on arms after going to sleep in even-

Upper Extremities -Shoulder, tearing in 1 , press- salt water. ure, in I, which feels higher than r Arm, tearing in Wrist, sticking in 1 in evening on walking in open air, morning, during which he turns from side to side. pressure, pressure in r, drawing pain from r into in- Dreams confused, unremembered, often anxious. hand

ing of 1 index towards future during the day when, when he where he will not well be replied in the walking, sitting and reading, and sometimes pixting of only a little at a time (Pulls), shaking, in morning, with thumb towards fingers, sometimes sudden J. of muscles between two fingers. Tearing in I middle, < muid. drawing tearing in halo, frequent stecking joints, < die joint, on backs of all 1 in morning in bod, par-, aboves and shouldes, without thirst. physical, and is indicated in atonic conditions. It acts Skin.—Sudden dropsical swelling; swellings in fore-upon the kidneys, increasing the flow of urine and Allies—Sepia, Nat ars, Nat. mur, Tereb., Cimicif another yellow and mushlike First half hard, dark Generalities.—"Bilious," sleepy during the day, brown, the second soft and light yellow Two S, and head dull and stupid, poor appetite, no taste to food, small, brown. S in four lumps, in quick succession, etc Restless Weak at noon; W. on walking a mile semantion as if anus were distended and then a lump Sensations as from great fatigue, > the work of walk- shaped like a Minnie bullet, the big end first, was shot ing. Amelioration when moving about and when out doing something which absorbs the whole attention.

Clinical.—Effects of excessive fatigue, especially in women, with tired acting in back and legs. Sometimes useful in debility following exhausting diseases, such as diphtheria.

Mind.—Despair after a feeling of general wellness Discouraged. Irritability during headache; I, all Urea increased Specific gravity lowered conversation unpleasant, desire to be let alone

Clinical.—Profound melancholia, intolerance of contradic-tion (associated with uterine derangements, "consciousness of a womb").

Head .- Darting pain Aching, with dim vision and vertigo on sudden motion of head Fulness, with pressure up to vertex, the latter < looking steadily at one point. Vertigo. Frontal pain extending towards vertex; P. as from a band an inch wide from temple to temple. Fulness all through forehead between temples Pain through temples, with fulness in head, and vertigo; P in temples and forehead every day at 4 or 5 PM. or between 8 and 9 PM, with pressure over root of nose, feeling as if I had caught cold, internal heat and irritability, P. in vertex, < stooping Pressure on vertex every afternoon, P outward in vertex and occiput, > reading carnestly, concentrating attention, < turning attention from the book to my hand, with burning in scalp

Mouth.—Tongue and fauces dry on waking at 5 A M (unusually early), with bitter taste Dryness and bitter taste.

Clinical. - Salivation of pregnant women Nursing sore mouth

Stomach.—Appetite not as usual. Tasteless eructa- Sensitiveness to cold the length of sternum and as tions. Nausea; when at supper Vomiting, of din- wide apart as nipples ner, which was fermented Irritability. Cramp. Pain Pulse .- 84 in evening, and full, irregular Weak, partially > empty cructations, with tightness. Inde- and slow Slow and small, and weak scribable sensation in epigastrium Indescribable distress in epigastrium Burning; griping, in epigastrium, with salivation; pain in lower part through to uterus, like inflammaglow, with flashes of heat through system Heat and tion Kidney region, aching at 10 PW , A , then albucold in region

ing, with burning in bowels S loose and in an hour region.

Urinary Organs - Spurting of urine after micturi-Irritation of urethra (Scalding when urine passed over the denuded mucous membrane ) Urme copious; then scanty; C and clear, light-colored. Urine neutral, then acid (formerly faintly alkaline) phous phosphates the exception after the proving, and not, as previously, the rule )

Clinical.— Dabetes maipidus, urine very profuse, light-colored, with great debility and emaciation Dabetes mellitus, large quantituse of sugar in the urine, with emacation, thirst, restlessness, melancholia, etc. Constant aching and tenderness over the kidneys, which seem excessively active Acute and chronic inflammation of the kidneys, with great restlessness, frequent micturition, weakness, etc. Albuminum during pregnance, urine very scanty, with soreness and pain in region of kidneys, restlesmess, etc

Sexual Organs. - Uterme hamorrhage (External labia and pudendum puffed, hot, red and itching, so that she scratched till the surface bled, every morning thin, transparent exfoliations, the mucous membrane of labia red, swollen, covered with a white, curdy deposit, like aphtha, the inflammation reaching to onethird of vagina )

Climical.—This drug seems to have proved valuable in atonic conditions of the female organs, prolapsus with general mal-nutri-tion, prolapsus following parturition, this local condition being associated with general debility, mental depression and particu-Clinical. Hashches associated with uterine derangements, subscience with general delutity, mental deryrestion not purchase especially burning on top of head or fulness and pressure on vertex.

Eyes.—Sensation of mutch light, with dim vision, moving body morning as well as the has a wonth. Menorrhage, with oleration of the certra, dark, and on sudden motion of head almost blind Blind of movements and the control of the certra, which constroudly counter that the control of the certra, which constroudly counter that the control of the certra, which constroudly counter the certra of the c the local uterms symptoms of displacement or of chronic inflam-Clinical .—Infammaton of the optic nerve and reinn, with matton, stee, there are generally pain in the luminer region, dial albumanous irrue, borning nain in lumber region extending down aching, sometimes weight on the cleent, pressure on head, sic the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs, feeling as if the head were bandaged in the logs of the logs of the logs of the logs.

Respiration and Chest.-Feeling as if respiration were about to cease Breasts swollen, nipples tender and painful. Tired aching in chest when walking, as if front of C, and especially in a strip four inches wide down sternum, had been compressed in a vise

Back.-Lameness and aching Sharp, spasmodic Vague distress in forenoon pain running to crest of I ilium Piercing drawing minuria, urine copious, with increased specific gravity , Abdomen.—Full of flatus and each eructation caused sudden A at night on undressing, as if shot; wearinausea (?). "Bellyache" before stool Feeling before ness and weight, also in afternoon and evening, with stool as before diarrhoa; feeling at supper as before general fatigue, sensation as if kidneys were two bags diarrhesa. Distended feeling in spleen, causing pain of hot water Lumbar and dorsal regions, aching and Intermittent pain in hypogastrium Frequent pangs burning Lower lumbar region weak Lower lumbar of pain like electric shocks deep in r. groin when walk-ing, causing Imping, > pressure with finger-tipe, spine, tired A in spine on sitting down at 3 50 P sq. Burning in lower third, as if pelvis and to midway with burning, in red after resting. Secretan, aching in between umbilicus and pubis were filled with warm afternoon; at 4.45 PM, extending into each buttock; A in upper part and in pelvis, < night; dull feeling Anus and Stool.—Burning in A. after stool. Purg- in morning; weakness, tired aching, and in lumbar

Clinical.-Effects of fatigue, with burning and heat in doreel region

Extremities .- Rheumatic pain in r hip Burning, or rather warm numbness streaming up from both tendoachilles. < over region of gastrocnemius and in knees Pain as if a wedge were driven into r ankle. till sleep Feet numb when sitting still.

Sleep.-Waking every morning at 5, an unusual

Heat in flushes on every movement in the room Internal heat during headache Burning in upper dorsal spine, B in dorsal region when sitting reading at night. < between lower half of scapulæ; between scapulæ, with tired aching in lower lumbar and sacral regions, in sacral region. Heat in renal region

# Henar Sulfuris Calcareum.

Calcium sulphide, prepared as directed by Hahnemann, is triturated for use

General Action .-- A "tissue" drug of wide action It simulates Mercury in its action on the glandular in its action on the skin and mucous membrane of the when at work Stupidity, with heaviness in forehead of air, easy perspiration, profuse secretions and sup- ing in open air. purative tendencies are marked characteristics of the

Allies — Mercury, Calcarea, Sulphur, Silicea, Nit acid, Kalı in general, Phos, Puls, Bry, Tell, etc

Generalities .- Emaciation, with chill in back, red cheeks, sleeplessness, larynx affected, hoarse, weak voice, anxiety, apprehension and irritability, as in hec-tic fever Inflammation of affected parts Stretching Painful throbbing here and there from slight wetting of body Sensitiveness to open air, with chill and frequent nausen Sensitiveness of nerves in various parts, as, for example, in septum of nose Nervous irritability, every physical or mental impression causes a kind of inward trembling Weakness, in morning, and after good sleep, with heaviness of body, in evening, with palpitation, after eating, on walking in open air. after eating, with stretching as before ague, on walking tarther cold sweat and in evening in bed heat, which prevents sleep till 2 A M , with sleepiness, with bruised feeling in all limbs Sudden faintness towards evening, with slight pain Heaviness of body Aggravation of pain at night, during nightly fever, especially during chill Amelioration from frequent eructations and emissions of flatus

Clinical.-Sometimes indicated in the marssmus of children who have durrhous, < in the daytime and after eating, with the peculiar sour odor to the sweat and stools. Cases requiring Hep peculiar sour door to the sweat and stools. Cases requiring Hep-are, as a rile, extremely sensitive to external impressions, espe-culir to the algebraic cold, for example, it has removed the effects old and sticking on touch mornings. The pressure of of maliraral possioning which have been malicreate with calomet-sall quanter from the simple indications of profuse and easy that the planet water an overcent in for weather. Hep is speci-tably indicated by extreme sensitiveness of inflamed parts, as if it. Pulsating sticking in 1. temple at 10 A.M. Boring ally indicated by extreme sensitiveness of inflamed parts, as if in T. Extending upward into head. Painful throb-

they were about to suppurate. The pains of Hep, are almost universally aplintor-like in character, even the neuralgass and tooth-aches are of this sort. Its indicated in threatening suppurations, with great screeces and sharp pains as if about to suppurate General aggravation from cold dry winds.

Mind.—Irrational talking Ghostly image of one who was dead, in morning in bed when conscious, which frightened him, and it seemed as if he saw his neighbor's house burning, which also frightened him Nour Fever.—Coldness alternating with heat, < epigastric Fright on shundering, cven after eating; F. concerning region Chill radiating from solar plexus all over seckness in the family, < walking alone in open air body, on motion of arms Cold limbs Heat in Anxiety at 10 Ps, after lying down, with unessiness in whole body and painful jerking up of lower limbs; A in evening, belief that he would die and sadness even to suicide Sadness and bitter crying; S and apprehension . S from stretching out on sofa. Hypochondriac Remembers everything which has been unpleasant during her life Everything of which she only thought was disagrecable violent about trifles, he could have killed some one after rising, he will not speak; I about trifles; about his pains, and discouraged , I and desirous to be alone , and obstinate: and impatient Discontented with himself Contrary, does not wish to see his own family. Desire for nothing

Memory weak during peevishness. Mistakes when system, especially on the liver and kidneys, Sulphur talking and writing Sudden vanishing of thoughts intestinal tract. Calcarea in affecting the respiratory Stupor, with contracted, irregular, scarcely perceptible tract, and all of the foregoing in its general action on pulse, sunken, pale face, cold skin and limbs, vomiting connective tissue Extreme sensitiveness to a draught and diarrhera Unconsciousness in attacks when walk-

> Clinical.—Dementis, with complete stupidity, is silent and peechless Melancholia, with paroxysms of violence, hasty speech, speechless meanurables, was proceed to ther"), in patients who have taken much mercury Hypochondrasus

Head .- Sticking , waking him at night, with confusion, as if skull would burst, after deep sleep in morning. > walking in open air, on stooping, with bursting sensation, eyes close on account of the pain; on rising from stooping and on every motion, < walking in open air Hammering Burrowing mornings, > tight binding, with nausea Aching, in morning on waking, in morning, > rising, every morning on any shock, on shaking it, with vertigo, contractive, before kind of inward treining receases, in morning on waking, ing < open ant > in the room, with pressure against with palpitation, in morning in bed, with uneasiness skill, tensive, confused Swashing Vibration internally during cough Confusion, during cough, with throbbing in forchead and temples Vertigo in morning after rising, in evening, with nauson, on rising, during dinner, after eructations, with blackness before eyes; when riding in a wagon, so that she could not stand alone on getting out, with heaviness of head; with faintness and rigidity or vanishing of vision, as if he sat in thought; everything turned in a circle with her. on closing eyes for midday nap

Forehead.-Jerking of muscles in afternoon when lying. Sticking Tearing at night, with general heat, without thirst. Tensive pain above root of nose Pain like a boil from midnight onward, with sticking on stooping and on coughing, also externally pain like a

bing in r T Pressure in T during the day, with ing in l. half on blowing, as from a foreign body. drawing Pain in vertex, with heat; P. in evening, Rush of blood Contractive feeling Burning lasting with palpitation. Sticking in r parietal region on into the night Stoppage after stool Stopping, with vanishing of senses. Pain is one-salf, injust waking, S after paroxysms of cough; S caused of brain as from a nail or plug. Boring in spot on by tickling; from tiching in nose; frequent Coryza, side Pressure in r hemmaphere of brain, at turnes with much spitting of salive; C, with influence according to the property of the were. Sticking in occipat and temples as if a nail or of nose, which spans like a bod, with cough; with scrapping were driven in (Thiu, Ign); pulselike 8 in occipat ing in threat; stopped; obliged to blow nose every and lower part of it. Pain externally un r. side of occupat, moment, with too great appetite; mucus from podernor gradually extending to nape, throat and scapule. Hair nares muzel with blood, blowing of offeners mucus, even

Clinical.—Headache following the abase of mercury, of a control of the control of

Eyes.—Inflammation and swelling, with redness of white. Blue under E Sticking. Pain from daylight, in bright burning Yellow, with blue margins about eyes morning on waking Smarting in external canthus, and Blindness on rising and standing up after sitting bent over

Clinical.-A great variety of scrofulous inflammations of Clinical.—A great variety of scrolulous inflammations of the eyes, particularly ulcerations of the cornes involving the mere layer and accompanied by collection of pain in the interior diagglab type, amenia, west early, < night, very sensitive to open air, and perhaps have been salvasted. Kerato-zitta, myoti-ning also the citary body. Chronic catarrio for the conjunctive, with very profuse muco-purulent discharges. Ulceragion of the margins of the lids and inflammation of the Merionaling slinds. margins of the lids and inflammation of the Meshoushin glands. Subsactia inflammation of the ladrymal aso, with very free secretion of pas in the inner angle of the eye Inflammation and olseration of the margins of the lids, with collection of much dry matter in the lastice. Erraipelations inflammation of the substance of the lids threatening supprantion. Most, offensive excent of the lids threatening supprantion whose, the substance of the sub

Ears.—External, red, hot and itching night when lying on it. Itching in E Cracking on blowing nose, () as from electric sparks Whistling Uniealthy guns, which ulcerate and bleed, with offensive odor on blowing nose, in r Roaring in 1 Murmuring in l.; before E. in evening after lying down till sleep, with throbbing.

on touch (Merc.); ulcerative P. in nostrils; bruised P. pain as if everything would come out of forehead; in tip; sore P. on back on touch; drawing P. in morn-beneath largez after supper Fear of construction; sufficeing, extending to eyes and becoming a biting. Crawl- twe C. towards evening. Smarting, < swallowing

without catarrh, dropping of yellow, glutinous water from one nostril. Bleeding, after singing, blowing of

Face .- Red checks, in morning; in evening, and daylight if he moves them; P at every step; < moving Pale if she becomes heated on moving about. them, with redness, frequent P during the day, causing Swelling of 1 cheek; crystpelatous S of cheeks in mornlachrymation; as if they would be drawn into head ing Pain in bones on touch Lip, swelling of upper Sore, agglutinated at night, hard mucus. Lachrymation (Calc c), with tension and with pain on touch; eruption from tickling cough Pain in balls, with bruised pain in corner, with heat, crack in middle of lower (Puls), on touch Boring in upper wall of orbit. Obliged to crack, with pimples in red of lower and burning pain. wink after writing Redness of upper lid, with influmma- smarting painful pumple in red of upper, ulcer in tion, swelling and pass more pressing than stacking, R of corner, twitching of I side of upper, with trembling, lids, with pressure as it sleepy. Cannot open lids in pain, tension in middle of upper

Mouth .- Teeth Looseness (Merc.), of all, with hard mucus Cutting in external canthus Flicker-tenderness of gums (Merc), of hollow, with pain on ing, and everything looks dark, then grest weakness biting on it. Steking. Aching, in all after cold drinks Dim vision in evening by candle-light, D. when reading or opening mouth (Merc.): < eating in hollow, with sensation as if too long, jerklike, extending into ear. drawing, in hollow in evening, as it too much blood pressed upon nerves, drawing, in evening, in a T which begins to be loose, < warm room, > open air, < bitmy teeth together, which causes jerking in a tooth Gum, ulcer, inflammation on inner side of front, with swelling, swelling of back, with pain as if a new tooth would come through, < touch and biting upon it; bleeding easily, jerking

Tip of tongue sensitive, burning pain in tip, even waking at night White aphthous pustules on inside of leps and cheeks and on tongue (Kali chl), with pain, < touch and drink Dryness Much mucus Salivation Drivelling from r side Offensue odor Bitter taste, in back of throat, with natural taste to food, B, Wax in- slimy in morning, to food Taste metallic, and sourcreased. Purulent discharge. Sticking on blowing ish, T as of bad eggs, doughy in morning, earthy nose. Jerking pain through E. Pain in external, at in throat, with natural taste to food, lost

Throat -Sticking like flea-bites externally and behind ears Pinching near r. side of thyroid cartilage CHalcal.—Inflammation of the outer and middle ear, ulcer. Hawking of mucus in evening after enting, what she ation and offensive, bloody discharge (Tellur.), generally with hawks up is mixed with blood. Mucus causing ribest pain, perforation of the drum, especially following over hoarseness. Sticking as from a splinter on swallowing, doing with mercury. Nose.—Redness and heat internally and externally, S. on turning head, extending to ear; every morning, with swelling of it Scabe in r. nostril. Pam in bones with dryness; on deep breathing, during cough, with

solids, with rawness and scraping Rawness with pain cult swallowing of food without pain in throat Tickling, and moist, provoking cough

Clinical.—Torsillus in the suppurative stage, it is indicated after Bell and Baryta, these three remedies may follow in successions. sion. Bell in the very outset, Baryta after the Bell -dryness and splinter-like pains on swallowing and great sensitiveness to air, or even chilliness Sometimes indicated in folloular inflammation of the pharynx, with splinter-like pains and the general symptoms of the drug

Stomach -- Unusual hunger in forenoon Appetite for only sour pangent things, A for something at times and when he gets it he does not like it Appetite lost, with lower A. emptiness in abdomen Disgust for everything, especially fut (Puls) Thirst greater than hunger, T. from morning till evening, T, but she is afraid to drink much because it distends the stomach Desire for R as from thread-worms Urging, but large intestines vinegar Longing for wine. No thirst

in throat, E after eating, of sourish fluid, frequent, exertion, with distention of stomach and abdomen, tasting of tood, hot, after eating Waterbrash, with flow of saliva from mouth two days at the same hour every morning, V of bile in morning after long violent mucus mixed with clotted blood, spasinodic

Flatulent distention, with cold hands Gastric enteritis. Pain in pit every morning on waking, P after cating a little, in pit on blowing nose, when walk- not hard with much urging; D, of hard pieces mixed and, as if it hung loose; as if lead were in it, drawing, in with yellow moisture. Hard and unsatisfactory, with epigastric region and back Gnawing as from acids, rising into throat. Burning during cough Heartburn, and eructations as from too fat meat Tension across pit, at night, but little is passed, with pressure, tenesmus he must loosen his clothes and cannot sit Uneasiness in and weakness pit during digestion, with heaviness and acidity.

when sitting, with sensitiveness, D and hard Rumbling Noisy movements Emission of flatus, every tines. Heat after eating

Pressure beneath pit of stomach, with feeling as if on swallowing saliva Scraping; in morning, with everything in stomach were hard like a stone. Drawroughness as from burnt lard, and constantly full of ing pain in upper A. and across small of back. Flatwater Feeling as of a pluy of mucus or swelling at ulent distention of 1 hypochondrium Sticking in entrance in morning, teeling as of a plug in pharyix hepatic region when walking, in spleen when walking; Feeling as if he had to smallow over a swelling (Phyto), beneath 1 ribs, in r hypochondrium in morning. with bruised pain in external muscles of throat Diffi-Cramp in r hypochondrium, with nausea, then inef-Con- fectual urging to stool Pressure in r. II. as from a stant sensation as if water rose after sour things stone, with cramps in stomach Painful rush of blood to H, with pain on every step Congested feeling in II on every step

Fermentation above umbilicus, with eructations of hot air Paroxysmal clawing in umbilical region, from fever have subsided, then if suppuration threatens Hep, the insides of abdomen, towards middle and sometimes to put of
dications for which are the fetid odor of the salivation, sharp stomatch, critising ranges with auxious best of cheels stomach, causing nausca, with anxious heat of cheeks Twisting above U Sore pain above U Pressure, almost sticking, in I side when riding in a wagon Smarting in I side Suppuration of inguinal glands, buboes (Calc. c, Merc, Thu, Nit ac) Pain in an I gland, < on Pam about hips. touch, with swollen sensation Fulness of lower abdomen after eating Smarting in

Clinical.-Threatening or actual abscess of the liver

Rectum and Anus.-Rumbling in R Crawling in are wanting in peristaltic action and cannot expel soft Eructations, with burning in chest, E, with burning faces, only a part can be forced out by aid of abdominal muscles; ineffectual U, with many eructations without odor or taste, constant empty, during mental Protrusion of hemorrhoids Soreness of anus, with discharge of moisture after stool Burning in A

Stool .- Drarrhaa, with colic, inclination to lie down, hot hands and cheeks, three times with rum-Hiccough, after cating Nausea, in morning when bling and nausea in abdomen, frequent, slight, presitting and standing, > lying, at night, with vomiting, ceded by griping, with flatulence before and after movement with flow of saliva from mouth; frequent, stool, of bloody mucus, with rumbling in back like a foreboding of faintness, in morning Vomiting Liquid, dark brown-greenish, frequent, with yellow lumps of green bloody mucus, smelling like bad eggs, retching, of mucus and bile, the slightest drink with rumbling and urging so that they were frequently caused retching and vomiting, sour, in afternoon; of passed in bed, preceded by cutting tearing in abdomen, amblical region, extending deep into pelvis, the pain < before every stool soft, difficult; S, with blood Thin, more frequent at night Difficult, scanty.</li> mactivity of rectum and swelling of anus colored Greenish Blood with stool Frequent, even

pit during digestion, with heaviness and acidity.

\*\*Clinical.\*\*—Deepeds following the abuse of mercur or even is acid along and with effort. Stooks may be light-colored, rouning, indicated by the longing for highly-seasoned food or for sends.

\*\*Clinical.\*\*—Devels very mattre, the soft sciols are even-with entire stooks may be light-colored and along with effort. Stooks may be light-colored and along with effort. Stooks may be light-colored or remaining microus, yellow or green and of decayed door. The Abdomen.—Distended, tense (Graph, Lyc., Carb v, drg (By, Rheum). Chrone catarrh of the miestines, abdoment ct), D after stool; D, worse when walking than detended, tender, with fermentation or with feeling of clawing or cutting extending towards the umbilicus

Urinary Organs .- Discharge of prostatic fluid durmorning, with colic, < sides; at night. Sticking, ing stool. Bladder weak, urine drops down vertically here and there many hours after meal-time, < every and he must wait before urine flows (see Caust, Op) pulsation, with cutting and griping, as from flatulence. Micturition impeded, he must wait and then urine flows Cramp Cutting; towards evening Griping mornings, slowly. He can never finish urmating, some urine with soft stool, ( as after taking cold. Pain rising to always seems to remain in bladder (Helo). Urging with soil soon, it as after taking coult. Fall training to aways was a way and the property of stomach, > emission of flatus, periodic P, in morning on waking, but difficult slow interition; during fever, drawing P, bruised P when walking, frequent desire. Meatus urnarius red and sinfamed. Constriction, before eating. Tension all day, fre- Urethes, stacking; cutting in female, during micturiquent spasmodic punching T Empty feeling in intes- tion; sore pain during micturition. Urne acrid; and burning, making inner surface of prepuce sore and ulcerated (Merc.); U. burning; last drops bloody; milky, even difficulty in breathing; it follows well after Spong. Spong. should

the control coll—Valuable in certain stages of inflammation of the kidneys representably filter whose of marcing, with sceness in region of the control collection of the coll

Sexual Organs.—Excitement and emission without amorous fancies or desire for women Weakness. testicles relaxed, penis hard. Itching of glans; and frienum; on scrotum Ulcers externally on prepuce, simthat to chancre (Nit ac ) Sticking in prepuce; S. in water moved about in it Heat above heart Itching region of frænum præputu. Paintul erection during caresses, with soreness and pinching in penis extendtween pudenda and thighs Discharge of blood from uterus during menstruction after distention of abdomen Menstruction delayed and diminished.

Clinical.—Venezal ulcen, with fettl duchings. Profuse secretion of an offensive odor from the glass pain. Newsra of an offensive odor from the glass pain. Newsra of an offensive odor. Herpse of the propuce, which is very sensitive mostures in the folds of the skin. Enlargement of ovaries, with great sorenes, pain in back [16-0], etc. Absectese of the lake, which are very sensitive, with splinter-like pains. Extremely offensive issucorrhean of the uterus, with offensive discharge.

Respiratory Organs .- Weakness of organs of speech and of chest, so that she cannot speak aloud (Phos , Caust ) Tickling in larvnx waking her about midnight and provoking cough and expectoration. Cough day and night, in morning, waking her frequently; in evening, evening and morning; < walking; < deep breathing, so as to cause comiting, paroxysmal, if slightest portion becomes cold, with sensitiveness of nervous system (compare Nux vom ), paroxysmal, forcible, deep, painfully shocking larynx and causing retching, backward, nequence pain, walk nor lie, sprained almost uninterrupted, from tickling in l upper part of throat, < from talking and stooping and till late in evening, then suddenly country, tickling at 3 PM, suffocutive, from lightness of breath; provoking comiting, scraping, rough Dry cough, in evening in going to sleep, and paroxysmal, in evening, and short; hacking, after eating; and deep, in paroxysms on deep inspiration, from tightness of breath, with sore pain in chest. Cough, with expectoration; paroxysmal, of mucus, thinghs and legs, with paralytic sensations, in paint in all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < knees Crawling pains, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, from scraping in larynx and < throat, of joints of shoulders, hips, < all day, < mucus, and violent, from 11 till 12 in bed, of bloody mucus, bloody, preceded by sensation of a hard body all, as if getting cold in pit of stomach, offensive sweat after the cough, then weakness of head Expectoration of acid mucus at night, almost without cough; bloody E from chest, with peevishness and weakness Dyspness. Frequent deep breathing, as after running

and (Merc.); U. burvang; last drops bloody; milky, even difficulty in breathing; it follows well after Spong, Spong, should work passing, with white sediment; pole, ofear becoming it should be been seen to be stressed to be considered to be seen to be stressed to be considered, and scanty; copious; copious, pale, with pressure on bladder, shimmering filip (Graph., Sul); pellicular fat upon U.

Clinical.—Valuable in certain stages of inflammation of the kinderys, especially after abuse of mercury, with screenes in region (of kinderys, necessaturging to, urbane, possensul urging to, urbane, possensul, p

Chest.—Tenacious mucus Suppuration on last r. rib, with sticking in it and great pain on touch. Sticking in side extending to back, S in sternum when breathing and walking. Pain in 1 side; in side on which he lies at night Flesh of r side and beneath r. arm sensitive on touching breast or moving arm Oppression, with burning Feeling as if hot of l nipple

Clinical.-Late stage of pleuritis, with exudation, with the ing from bladder Desire duminished Soreness be seneral indications of the drug Chronic pneumonia, with pro-Itching of pudenda the lungs, when the symptoms indicate.

> Heart and Pulse .- Sticking in region of heart, and in I chest, with palpitation Palpitation after dinner, with tightness of chest and need to breathe deeply Pulse rapid and hard

> Neck -Pain in muscles of nape on touch, < beneath ears Bruised pain in muscles, with painful swallowing as from a swelling, B pain in nape on bending head backward

> Back -Sticking, in 1 side Tensive pain, < turning body at night Drawing in B and sacrum in morning, pain in whole B after rising, so that she can scarcely move, with weakness of limbs, aversion to eating or working, shivering, chilliness and loss of thirst Weakness of spine Scapule, sticking between, S, in r on blowing nose, hawking and deep breathing; pain between S, sensation during micturition as if something were running internally in r. Loins, sticking, with cough, S in 1, in region of 1 kidney : pain, < walking, extending across back and pain in loins and ischia on sitting and on turning body when walking, bruised pain on walking, bruised and sharp pain in loins and lumbar vertebre, < articulation of sacrum, with pelvis extending into lower limbs, causing limping, pain as from fatigue, on stooping and leaning against anything when sitting

Extremities.—Sticking in joints Thawing pains, < thighs and legs, with paralytic sensations, D pain in walking and standing, which bend him up Sick in

Clinical.—Very valuable in run-rounds and even in felons, with sharp suppurative pains Hip-joint disease in the suppurative stage

Upper Extremities. - Axillary glands suppurate. Shoulders, tearing in 1, pain on raising arms; Clinical.—Subscute inflammation of the larrinz, with considerable secretion of mucus. In a late stage of membranes around the stage of membranes. The stage of membranes are stage of membranes around the stage of membranes around the stage of membranes. The stage of membranes are stage of membranes around the stage of membranes around the stage of membranes. The stage of membranes are stage of membranes around the stage of membranes around the stage of membranes. The stage of membranes are stage of membranes. The sta sprained pain; drawing pain, pain as from a weight.

Arms, jerks here and there in 1, bruised pain; weariness, falling asleep of one on which he leans at night.

lent walking, > open air. Forearm, boring sore pain | feeling as if anus were swollen. Pimples like hives on inner side of F and across back of hand after mid- sore on touch, on scalp and nape; on chin, above and might, < touch, > during the day, hrussed pain in a below lips and on throat. Itselfing pimples on chin; spot, paintid drawing in flexor tendons, drawing on top of L shoulder and beneath 1 patella; about charing in extension muscles of F and fingers. Wrist knee Warts become inflamed, with sicking in them paintul Hands tremble when writing, swelling of r Erysipelas on diseased leg Fingers, swelling of all when lying down, with stiffness, swelling of all, with tension on moving them, thigh (Sulph), with swarting biting Cracking and swelling of joints, with gouty pains, easily put out of swarting of hands and feet (Graph) Scabby cruption joint, they crack if pressed when hand is outspread, on hands Scurfy eruption beneath I corner of mouth sticking in one

Itching pustules on I elbow, P, with sore pain on Lower Extremities.— Uncasiness during the day sternum Boils, on nates, on leg, with mability to when at rest Paus in nates and posterior part of thighs let leg hang down Vesicles as from nettle-rash, for when sutting Thighs, cramp at night, extending into example, on wrist, corroding V on last phalanx of foot, (' in muscles of T. and pelvis if T is drawn thumb, with sticking on pressure, burning V and up, tearing in r, T in l hip on undressing, T ulcers on r side of chin towards lower lip. Ulcer when sitting, with numb crawling, T as from weari- bleeding on slight wiping (Nit ac.), sour-smelling ness, and in legs, pain in hip when walking in open matter from U; sticking in U on laughing, correan, brussed pain in unterior muscles, B pain trans- sive pain, itching corrosion, burning at night, with

under knees, preventing sleep; on hands, with rough, dry, Cramp in calves, in morning in bed, on bending shrivelled skin; sudden in toes, near nail of 1 index, knees Legs, tearing in tibue, above malleoli, at night, as if a paronychia would form, sticking, crawling in T in tendo-achillis in bed, when walking a sticking toes at night Burning itching in toes; on forehead in it, cramplike pain in muscles on walking, cramp- and cheeks during dinner, < morning on rising, like drawing pain beneath r knee on walking, un- with white vesicles after scratching, which discharge a

Sleep -Yawning from morning till noon, frequent paroxysmal sprained pain on walking, stiffness, with Y, causing pain in chest. Sleepness towards evening, with almost convulsive yawning, sleep-weariness in Foot -Swelling about mallcoli, with difficult breath- evening, so that he slept from after supper till morning, cramp, C in soles and toes, C, between great ing; sleeps in evening sitting up, with weariness toe and heel; stacking on instep, S in heel; itching Sleep too long and dull, then confusion of head, with S. on back, at base of toes, tearing at might, T in pressure in temples, troubles from a disordered stomsoles, with drawing, bruised pain on outer side of one ach, eructations tasting of food and scraping in throat on which he had lain, in evening after uneasy sleep, > as before heartburn, sleep long and confused, with to white no had man, in evening size thready steep, > has bento nearbourn, sizely long and contaboo, what is been strong and strong strong and strong strong as from a stone, soles sensitive to walking over unlike drifting clouds. Slumbering sleep for several even stones, drawing burning pain in evening in bed, days, with drauns of the business of the day and extending to malleoil, burning pain in morning in many thoughts, which passed through his brain like bed, and their backs. A hitherto painless corn be-clouds, at times he woke somewhat, not stupid, gave gins to burn and stick on slight pressure Toes, stick-right answers, attended to his needs and immediately

walking than when standing, pain in nail of great on from midnight till 4 AM, then sleep, sweat at 7, all night after lively conversation in evening; all night, Skin. - Yellow Jaundice, with blood-red urine and with meaning and greaning; all night, only slumber, yellow whites of eyes Unhealthy, sight injuries sup S, with chill, with tossing about. Difficult falling purate (Silic) Actilerash on face. Painless swellings, asleep and uneasy sleep. Frequent waking, with on forehead Chilblams on feet, so sensitive after erections and desire to urinate Sprang up from sleep healing that she cannot wear the shoe Itching miliary before midnight, full of anxiety and it seemed as if he

windows two nights in succession.

with weakness and slow pulse, at 8 r m., with chatter—moving Dull feeling. Nervous feeling, but dreading of teeth, coldness of hands and feet, then heat, of moving Restlessness. Weakness: < walking with sweat, < chest and forehead, and slight thirst, Amelioration after eating, after dinner at night, in open air and a painful sensation presses Head.—Aching; in morning, sharp at times, mostly her down so that she must walk bent over; with fre in temporal region, < 1 Dizzness Frontal pain. ner down so that sine must wait open down over; wait pro-ident natures and sensitiveness to open air; alternating just above eyes, at times worse in I temporal region, with heat, with photophoba. First bitter taste, then from over eyes to occiput, < 1 ande, shapp, over 1 chill, with thirst, then heat, with interrupted sleep, eye, had to soowl and rub the parts Pam in all twice on the same day. Shaking chill, with chat-temples, r, 1, and in occuput; sharp, in 1, sharp, in tempor to the colliness and pallor of hands and teet, front part of 1 pallor of face, change of expression, unconsciousness, pain in back, in and about hips and in abdomen and morning nausea, frequent S in forenoon in open air, frequent S extending to head, where hair is sore to touch lobe of l ear, had to pinch it. Stinging in nasal pas-Chilliness in arms and less in morning, m feet during sages. Burning in nasal passages extending to throat

touch and to slightest cold, constant chill, with sore throat from I nostril Sneezed often as if raw, pain on swallowing salwa, muscles of nape, < preventing sleep. Heat, then nights in succession, looks mottled, arteries show very plannly, stacky from 4 r. through night, with great thirst, headache, nucue in mouth and T, smarting in T, < 1 side, delirum, so that sleep was bad, with violent vomit. T dry and sore on waking from a nap, T looked ing of green and water and tenacious mineus and granulated, expectoration sail Irritation, of lade nauses, dry, at might, with sweaty hands, which Suc and raw feeling S. and burning, posterior fauces cannot tolerate uncovering. It in forelead, hands; gray and covered with memilianne or tough nucus, moving it, flushing, in tace and head

even on writing a few lines frequent, without heat, ossophagus, stomach and bowels general, at night when awake Profuse sweat; general, stomach—Belching of texteless wind in morning, general, with burning of skin, and surr. Paun, all the formoon, with occasional hot flashes, smelling at night (Bry ), and clammy, at night; between sharp, after a light breaktast. Distress on waking

Clinical.—The easy chill from exposure to air, even from putting the hand out of bed (causing cough), and the general tendency to sweat are the general indications in februle states, there is comparatively little fever. Sour sweats

### Homarus.

The reddish, offensive liquid (the digesting fluid) contained in a sack just back of the mouth of the live lobster is triturated with sugar of milk. (This fluid mixed with warm milk solidifies it in ten minutes, making a coagulum harder than cheese-curd)

ing. Of expectoration of blood and pus. Of broken tried to take hold of the door-knob I could not do it readily, but put my hand all around it, I guess I Fever.—Chill; every day at 6 or 7 P.M.; at 6 P.M., was a little scared. Felt sick, unable to move. >

Eyes .- Aching; in r and above l angle of r . in l . coma, when aroused he talked irrationally or stared with soreness to touch; from l. side of r to occiput, without expression. then heat slight in comparison with in I when rising, later in r, as if something had been the chill, with dry mouth, periodic colic and liquid blown in the eye suddenly Sharp pain in I, over stools. Shivering, then heat, waking at 2 a m, with and back of 1, occasionally in r. Smarting Sharphot, dly skin, frequent S from nape down back and juan in r ball. Aching pain in l ball, not much over chest, then sleep, from which he woke with sweat, alacted by the light Lids stuck together in the

Ears and Nose -Frequent stabbing through lower after rising Sensation of mucus in I nostril Nose Catarrhal fever, weakness, with sensitiveness of skin to stopped in morning Discharge from nose; watery,

Throat.-Pain near l. ear; sharp, sudden, transient, beneath ears, painful to touch, with dry cough, no appetite, in 1 side, occasionally extending to ear Smarting. no thirst, sleeplessness all night, with moaning and groan- and redness, < r side, back of it looks as it covmg. C fever, with internal chill and fretfulness; C ered with tough mucus, constant accumulation of fever. with sick feeling in all limbs Orgasm of blood mucus in fauces, next day throat sore and burning, palm and wrist, face night and morning on waking, in arteries show very plainly where there is no mucus or soles in morning in bed, of one hand, with redness appearance of deposit, S < 1 side, less on 1 than and swelling and bruised pain extending into arm on posterior parts, with smarting, the smarting and inchination to cough > opening mouth and inhaling Constant offensive exhalations from body Sweat at very cold air, in 1 side of T, ear and neck, with night, as soon as he lies down, < head, then S in aching, the S seems to be in the muscles rather than drops on face, about midnight, < back, before mid- in the mucous membrane, > holding side of head might, after midnight in bed, from midnight on, then with my hand Tingling, and inclination to cough. chill in morning, S. on slightest motion (Merc); S raised white mucus Burning, in 1 side, and in

upper part of legs, on head in morning S on perion in the night, > morning, returned in evening, before neum Cold S on hands; on feet and after a light breakfast, after a plain dinner, followed by a little ice-cream; through to back, through epigastrum to back, worse near spine, several times duiing the day, around body at epigastric region before rising, extending down back to region of kidneys

Abdomen and Stool -Pain in diaphragm, in hypochondria: lower part of liver, liver and spleen, liver and spleen during the day, in liver, < evening Sharp pain in region of liver, in liver in morning, in l lobe of liver, region of liver, < drawing a long breath; under ends of I. floating ribs after returng. Generalities.—Pain somewhere all day, in eyes appeared to be in the spleen, but a little higher up on and various parts of body and limbs after retiring, the other side, may have been in lower border of liver. Strange feeling all over, was not diszy, but when I Frequent transient inclination to stool during the day,

lung after actiring, and around body at diaphragm;

in centre of r lung and through to scapula Burning distress at right of lower end of sternum, in both sides, with difficult breathing.

wake and lie awake one or two hours Wakefulness when writing Memory deficient, and head confused in the morning, but later in the proving it was both in the pain extended to the thighs, the pain was so severe ples Intoxicated feeling in morning that I felt as if I trembled all over, but think I did sleep again

cold, and damp, afterwards burning

## Hydrangea.

The dried root of Hydrangea arborescens is used either in the form of infusion, fluid extract or tincture.

altérnate diarrhera and constipation, changing every three or four days

Gental Organs.—Long-continued excitement every morning, and in might

Respiratory Organs and Chest.—Difficult breathing faire returning Sharp pain in back side of I lung Pain through chest, in sides, in r. lung, in back (Didgeon), and with Ocinium (Murc.)

Cilinical.—This seems to be a valuable remedy for certain frame of "graved," particularly useful for proceed deposits of the tendency to forustion of calculus in the binders, a well as to the tendency to forustion of calculus in the binder, a well as to the tendency to forustion of calculus, with onesse over the region of the kidneys, blody urns, etc. With these motivations, and the tendency to forustion of calculus in the binder, a well as to the tendency to forustion of calculus in the binder, a well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus remot from the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus in the binder, as well as to the tendency to forustion of calculus remothers.

# Hydrastis.

tindure is made of the fresh root of Hydrastis Canadensis, L.

General Action .-- A "catarrhal" drug, causing inflammation of all mucous membranes, with profuse Back - Aching, just below diaphragm, in centre discharges. It depresses the vitality, causing atonic

Allies -Puls , Stann , Borax , Chel , etc

Generalities.- Darting pain occasionally in long

ankle, in feet, with furning Lame pain in r knee esymptoms the control of the con

Mind.—Affections active Exhibitated, and desirus to sing Sanguine and contented Vindictive. Sleep—Slept in a chair (unusual) after dinner ous to sing Sanguine and contented Vindictive. Restless at night Sleepy after retiring, so that eyes Spiteful, > towards evening, and disposed to hit ached, but could not sleep for a long time Sleepless things in general, S. and angry, and desirous to snub sometimes to such that skeep for a long time.

Neepless, stimes only central, 5, and sagry, and destroits to smuld for nearly two hours after returing, and resides, had, any one who differed from me. Angry, and destroits headache, pain in back, stomach and bowels, woke at to curse everything and amybody who bothered me indinglid, after a few innuttes sleep, with hurned. Feetful Despondent, > "quiz" in evening Gloomy, desire for stool, > passing much wind, after much taciturn Fearful that he will become sick all over effort passed a large, long, tenacious stool Every Dislikes to go out, to read, write, do anything Averse night go to sleep on retiring, and in five or ten minutes to mental occupation, and memory dull Forgetful

Head .- Aching on rising, after breakfast, with senthe first and last part of the night. Woke early and sation as if brain were pressed against frontal bones. could not go to sleep on account of pains all over, < A. till sleep, with sticking through temples, extendepigastric region, back, arms and legs legs lame and ling from centre of brain to r parietal protuberance, painful as from severe exercise and cold, expected to bounding, throbbing, nervous, gastric, till noon, be very lame on raing, but felt incely Woke two Heaviness, amounting to pressure over root of nose hours earlier than isual, with dull headache, burning Fulness after breakfast, then aching in temples, < all over chest, seeming to be in the pleura, aching pain every step or sudden movement or coughing, with through lungs to scapula, aching in back part of shoul- bursting sensation on ascending stairs or on sudden der, outside of upper portion of scapula, pain in hypo-chondria, extending down back, burning pain in legs memory of recent events, the heat and confusion > and feet, mostly below knees, so that I could not go to pressing cool hand across forehead Brain feels parsleep, feet so hot that I had to put them out of bed, then tially narcotized, then cutting darting through tem-

Forehead -Pann, on rising at 6 30 A M; at 8 30 A M, not, I felt as if I could not move, but on moving there in supraorbital regions at 8 A M; over 1 eye at 9 A M, was no pain and I felt better by moving, could not with soreness in forehead, stoppage of r. nostril, the aching > walking in open air, when watery corvza sat reco again. Fever—Chiliness all over so that I trembled. Feet in, the latter stopped again in the room, above 1 eye at 10 am, always > laying hand on part; at night, and in temples : throbbing P across sinuses. Bursting, almost stupefying sensation on waking at 9 A.M. > pressing skin towards middle of forehead and when in motion and when mind was engaged, < pressing ness, < over l. eye at 9 A.M., in a warm room, > open up sensation in posterior nares and nasal sinuses. with air, with fulness

Temples -Stinging, with dull pains in vertex and over eyes. Cutting through T., with dim vision. Pain over l. eye at 11 A.M.; P. at 9 P.M from emotion, > pressure and open air, in l. at 8 AM, extend- D of watery mucus on walking in cold open air, D. ing into I nostril, throbbing P. all day, < with all of thin mucus excoriating upper lip, afterwards other symptoms, in warm room, when sitting and thicker Blowing out blood and yellow mucus resting, especially when thinking of the symptoms, > Bright red blood from nose at 2 30 PM, after dinner fresh air.

Pain in r. parietal protuberance at 8 30 AM. on ascending stairs, P. in a spot over 1 parietal protuberance at noon; heavy P in 1 side of head all day Heaviness of r. side of head, with drowsmess Dulness in r side. Pain in r cerebellum, then l Heavy pain in I. occiput, > pressure of cool hand and cool open air, with pale face, heat in head and pressure outward in region of temporal fossa

Eyes .- Lids agglutinated in morning on waking

Clinical.—Catarrhal ophthalmia, acute, with swollen lids, profuse secretions, smarting and burning, chronic scrofulous, with profuse discharge, opacities of the cornes, etc. Dry catarrh of the conjunctiva Biephantis.

Ears .- Pain in r at 6.30 PM , after supper, then fulness in forchead and pain over I eye, P extending from I mastoid process to scapula at 9 r.m.; tensive from 1 mastoid process to scapula at 9 r.m; tensive dryness at root. Sticky mucus around palate, with P in r in morning and afternoon. Eustachian tube bad taste. Sticky, with fur on tongue and aphthe on partially stopped. Noises, at night on waking, with rumbling in bowels. Ringing, with pain in anus. Taste bad in morning, T peppery, acid, peppery on Roaring at 9 PM. Noise as of cogwheels at night forward half of tongue, strange, to food, Whirring like a partridge on habitual waking at night

Clinical.-Catarrhal inflammation of the middle ear and deafness, after scarlet fever. Otorrhoa, with thick mucous discharge

sional sneezing Sharp excornating feeling in nares, fauces; mucus in fauces, which cannot be swallowed (Puls) with constant inclination to blow nose and free discharge of mucus Sore inside at 330 PM, air felt lowing, of r upper part of pharynx, < dry swallowpainfully cold on inhaling, with hawking of mucus ing, > swallowing fluids; < about epiglottis, with from throat and posterior nares; internal edge of r. rawness and hoarseness, and dryness Roughness in wing sore and thickened, I nostril stopped, r dry and painful (in room) Sensation in r. nostril of a curtain opening and shutting during inspiration, gradually passing to 1, leaving r. stopped Tickling in back suffocating, the suffocative feeling > drawing long part after sneezing. Tingling down r nostril at 3 30 breaths through mouth Dryness at 4 PM, with P.M., then a few drops of arterial blood, stopped with swelling of uvula and mucus about posterior nares, cold water; T. in r. at 430 P.M., causing sneezing Itching in r nostril from 6 AM to 1 PM, always > cool air Air seemed cold to l. upper inner nostril at match, the fumes of which passed into mouth, > 9 A.M and 2 PM. in open air, with pain extending coughing and drinking from posterior nares deep into head and with pressure in and over l. eye Dryness; < r. nostril, with stoppage, and stoppage, with scabs in it. Stoppage; in morning; in r nostril; l. nostril, with tickling in r like a hair.

Sneezing at 7 A.M. after breakfast, from tickling in r. nostril; S at 7 PM; at night, every time he woke, sudden, at 8 P.M. in a warm room, then excoriating watery discharge from nose, he goes to bed very sick, constant.

skin towards temples on pressing in forehead and on which ceases in room, and nose feels dry and sore wearing a light hat or loose hat drawn tightly. Heavi- when breathing through it. Stopped corves. Stuffeddischarge of thin, clear mucus, posterior nares stuffed up, smarting as from a recent cold, with increased nasal secretion. Profuse discharge from nose and bronchis. Discharge of thick yellow matter (Puls ), frequent

Clinical.—Nasal discharge, watery, exconating, with burning, rayness of the throat. Catarrh meally in the posterior nares, which become obstructed, with leadache, the discharge dropping into the threat. Hypertrophic catarrh, with yellow-greenah, offensew discharge. Ozens, with alteration and bloody discharge. Ulceration of the substance of the substance of the control of the con

Face.—Pale Tight feeling of skin around corners of mouth, which seem drawn down. Aphtha on under Fever blisters in r. corner of lower lin

Mouth.-Edges of teeth sensitive to draught of cold air Tongue, large and marked by teeth . aphthæ (Borax), yellow coat, broad yellow stripe and bad taste. Scalded feeling in morning on rising, < smoking, scalded feeling in 1. side of tip, spreading over antenor half of tongue, with smarting and with a burning painful vesicle where the scalded sensation started upper lip Smarting in 1 side of palate in morning.

Clinical.—Numerous cases of aphthous sore mouth Stoma-titus in children or women Canker in the mouth, after chlorate of

Throat.—Unusual clearing when singing Hawking Nose. Constant snuffing through the day and occa- from uncreased mucus (Stan.). Sticky mucus around Soreness: in morning on waking, < coughing or swalmorning on waking, < swallowing, with soreness Feeling of a lump in lower part of pharynx causing constant derlutation, at times the lump seems to rise, almost throat seemed raw and swallowing scraped it ling low down in pharynx at 6 PM after lighting a

> Climical.—Catarrhal sore throat, it is very extensively used both internally and locally by homeopathic physicians, without spe-cial characteristics, and while the indications for its use are not cui characteristics, and while the indications for its use are not always plain, and it doubtless has no effect in a large number of cases, yel it seems to have a marked curative action in a certain class, probably in those characterized by hypertrophy of the moreous membrane, with rather free discharge and with burning and rawness extending into the nose and other. Following plaining the more many controllers plaining the more many controllers plaining the more many controllers plaining the product of the prod

Stomach.-Desire for eggs; D for bread and tea. Coryza; in afternoon; < morning, > evening; in Appetite poor; diminished for breakfast. Dislike for r. nostril, with constant inclination to sneeze from 7 meat and vegetables Eructations of wind, loud, in a.m. till 1. p.m; with dry feeling in nose in morning afternoon. Names, at 11 a.m., with cructations of on walking, on going into open air discharge of water, wind, empty feeling in stomach and visible sinking in 3 PM, after eating, in stomach and l. hypochondrium after dinner Acute pain Pain (Stan), in region at noon, > empty eructations Feeling of something twisting in it on lying upon it Weight Heartburn in afternoon Sinking in epigastrium, in morning Empty feeling in morning on rising, with scoopedout appearance of abdomen, nausea and heavy, whitecoated tongue. E teeling at 11 A.M. with pain

Clinical. - Inflammation of the stomach, with frequent vomiting and loss of appetite, great soreness over the region of the stomach and burning, in a disease that had been diagnosticated as cancer Atomic dyspersus, with acidity, especially in old people Ulceration of the stomach

Abdomen.-Trembling Rumbling as before diarrhoa Fetid flatus Cutting, at 10 A.M., extending to anus. > slight emission of flatus when lving. durwind before evacuation, first part of stool natural, last A M , > rubbing part soft and dark brown, after breakfast, > emission of flatus, before and after dinner, as before dysentery. Griping, with external soreness, G, with several light, acrid stools, G., with profuse light-colored, prostrating stools Pain at 9 AM, with passage of wind and pressure to stool Uneasy, burning sensation

Rumbling in I side at noon, with gurgling, R high up in I side, with gurgling and pain Cutting in hypochondria. Intermittent acute pain in liver region, extending to scapule (see Chelid), < between 8 AM and 2 PM Pain in upper A Soreness in upper A. in morning on rising, while inhaling Cutting in umbilicus at 5 P w, extending to penis Pain in umbilical region and in anus Cutting in sigmoid flexure of colon at 2 15 PM , C from r iliac region into r testicle at 11 PM, which left the parts above Poupart's ligament sore and tender, with pain extending into root of penis when pressing upon it; C in hypogastrium before each stool, > stool, with uneasiness, frequent scanty stools, with tenesmus in rectum, which caused dragging, bruised feeling in ovarian region Pain in r groin at 2 PM when walking, P. in r. groin

Ciliateni.—Gastro-duodenii estarib, with sucking in the region of the stomech, palpination, set. Liver torrind, akin yullow, stools laght-colored, hepatic region tender, etc. Jaundeca. Gallistone colic, with paundice. Chronic catarinal inflammation of the bowels, with mutous ducharge, or faces covered with mucus faces and mured with mucus.

# Rectum.—Heavy distress

changed to 1.

Clinical.—Ulceration of the rectum Fissure of the anus Prolapsus of the rectum, especially in children

Stool.—Diarrhosa driving him out of bed at 7 AM. and stool almost entirely of yellow water at noon, D preceded and followed by tenesmus, before stool sensation of weakness and trembling, after stool weakness, D preceded by tenesmus and nausea and followed by tenesmus Three loose, greenish, with pain in bowels as after a drastic purge. Mushy, copious, light-colored. Soft and of small diameter. Of natural size, but excoriating anus, as if covered with sand Scanty Two mormal, in one day. Tinged with blood, covered with blood, painless. Natural, then profuse discharge of bright red arterial blood, causing anxiety, then sensation all day as if the hemorrhage might be repeated, and was in consequence squeezing sphincter am all the time. Constipation; no desire, passage of some flatus.

Clinical.—Chronic constipation, especially valuable after purgatives (Nux v.). Constipation in children Obstinate constipation, with a weak feeling in stomach, sour eructations, dull frontal headache, etc. Constipation following parturnition, with hemorrhoods and headache Constipation and hemorrhoods in

Urinary Organs.—Micturition frequent, of considerable limpid urine; F, but not more copious A little urine escapes into urethra when eructating Tickling in urethra in evening, generally low down, once at orifice Urine diminished and pale; D. and smelling strong; U has an unusual odor; U. smells decomposed

Clinical.-Catarrh of the bladder, with thick ropy mucus in

Sexual Organs .- Offensive sweat, < scretum, and excorating S under prepuce. Aching in penis during and just after stool, A. at root just as flow of ing breakfast, then desire for stool, with emission of urine stopped Voluptuous itching on scrotum at 8 30

> Clinical.—Chronic genorrhora. Hydrocele. Pruritus of the vulva, and hard nodular tumors of the breast, with lancinating pains Ulceration of the cervix, with prolapsus of the uterus Cancerous ulcerations of the uterus Hamorrhages from the Cancerous ulcerations of the uterus Hemorrhages from the uterus, appending with ulcerations. Yellow, tensoriol secondrises The leacorrhees is almost always tensectous, ravely with albuminaria, associated with great proteintion, palyination, or with deviation of the protein of the protein of the uterus (submirolitutos). Uterus fibrods inflammation of the cervix, with heat and tiching of the vagina. Ulceration of the neck of the womb, fungual, electorrhea produce

Respiratory Organs .- Hoarseness, with sharp acrid feeling near epiglottis Desire to cough increased to nausea at times Cough from pressure of fingers on trachea; short and dry C, then loose, C, with sweet-ish expectoration Breath oppressed; constant want to draw a long B., short B

Clinical.—Lary ngeal catarrh, mucous membrane pale, vocal cords relaxed Bronchial catarrh, yellow, tenacious mucus

Chest.—Catarrh descended into C. causing distress and difficult breathing constant desire to take long breaths Stinging at 8.30 A M Spasmodic pain under r. clavicle in morning when laughing, extending to r side of chest and back Retching pain in I lobe of lung, from front through to back, from 9 A.M to 1 P.M. with congestive feeling and sensation as before bleeding of lungs. Pain as from excortation under upper part of sternum at every cough, with constant desire to cough. Soreness of C. and upper abdomen on drawing a long breath, later soreness in mammary regions and disposition to stretch body backward and arms upward, with yawning. A vertical drawing streak in l breast, half way between nipple and sternum, twelve inches long, spreading like a feather from median line, going as quickly as it came Constriction about sternum, at middle of S. (Compare chest symptoms with Stannum )

Heart and Pulse .- H. agitated at 5 PM when at a Pulpitation, in morning. Pulse slow; and labored

Neck and Back .- Pain from 1 side of neck to shoulder, > laying hand on it; P in nape, extending to r. shoulder, with heavy pain in r shoulder. Soreness in muscles of neck, with harshness. Pain under l. scapula all day; sore P. in small of B. and region of kidneys all day.

Extremities. - Pam in r. shoulder, l elbow and knees; in outer side of l. knee when walking causing limping, with pressure in 1. shoulder: stinging rheu-|swelling. Occiput sensitive. < touch Construction matic P. in elbows, forearms and knees, in morning, of back part of skull; C. of posterior and superior Shoulders, stinging in r.; sharp pain, and in arms, integuments of skull. and < 1 index; deep pain, < 1., with pain extending from head to shoulder, heavy pain in 1. Soreness of muscles of arms on moving them Elbows and biceps muscle, outking; contusive lameness. Elbow, throbbing in r; ringing; ringing in 1, with stoppage, crok in r and in l phalanges; pain in l, with snapjoing in shoulder-joint on rotating arm. Drawing pain on radial side of l wrist, extending towards elbow at lefter bleeding. Stoppage Coryza, dry Bleeding 11 30 A.M. Pain in r hip when walking passing to knee. Rheumatic pains in thighs, < first sitting down in 1 cheek-bone. after walking, later extending to hips and knees Knees, pain in outer part of 1 when sitting and walking; stiffness, < descending stairs. Shooting postemorly on l. leg, down to os calcis, at 10 30 A M. Aching in l sole at 7 A.M.

Skin .- Yellow, < around mouth and neck Swelling of lips, nose and mouth, pumples around mouth and chin going through the various stages of varioloid. Erysipelatoid rash covering face, neck, palms, wrists and joints of fingers, with maddening irritation and burning, after four days exfoliation, but irritation remained in a slighter form, < night Itching of skin and pudendum, disturbing sleep after 1 AM, > scratching; I. in spasmodic attacks in various parts during the day, < scalp.

Clinical.—It has cured hipus, epithelioms, malignant ulcers of the skin, lips and various other organs. It has benefitted vari-cose ulcers, especially when applied locally. Eczems, especially in the margin of the hair on the forehead, with coung secretions. Bed-sores. Chronic ulcers, which bleed casily and mell badly

Sleep.—Sleepy at 10 AM., at a lecture Sleep at 11 AM, S. unusually sound in morning, hard to be awakened. Waking once or twice at night, thinking it was time to rise, but immediately falling asleep again Restless sleep, waking every half hour, upon each occasion seeking a new position; and seeking cool positions; and full of dreams (had studied hard); with frightful dreams and fancies Dreams of monsters; of being pursued by wild beasts, troubled and lascivious, with profuse emissions, vague, unremembered, lewd, disturbing sleep

Fever.—Chill at 9 A M , at night on undressing , in back and thighs at 11 A.M., when walking in open air, then agreeable heat in those parts Sensation of a draught of cold air on r lumbar region and r nates at 11 AM General heat at 10 PM., H, with itching in various parts, H of skin; in flushes over face, neck and hands

Clinical.—General tendency to profuse perspiration and unhealthy odor

# Hydrocotyle.

A tincture is made of the dry plant, Hydrocotyle Asiatica, L.

Generalities .- Brussed feeling in all muscles, B feeling on waking. Wandering pains in muscles of chest and legs. Drawings in several muscles Malause. Weariness: with heaviness and dulness: and unfitness for everything

Mind.—Gloominess. Misanthropy Inclination for

solitude. Ennui. Indifference Head.—Aching. Painful drawing in almost all Neck and Back.—Renewal of old rhoumatic pains in cranial nerves Heaviness Congestion of blood. I rhomboid, c pressure Bruised pain in loins. Obfrontal nerve. Pain in posterior part of skull, with cation in kidneys.

Eyes and Ears -Look unsteady. Injection of palpebral conjunctiva. Pricking in eyes Vision dim Dazzling. Pain in 1 internal meatus auditorius. Ear.

Face.—Intoxicated expression Intermittent pain

Mouth and Throat.-Whitish spots on l upper and under sides of tongue Impediment in speech Red-

ness of velum palati, with pain on swallowing, < food Hyperæmia of buccal mucous membrane Saliva increased Taste insipid or bitter Tonsils red Pricking in pharynx. Disorder of constrictor muscles of pharynx. Œsophagus dry and rough; burning and pricking in O.

Stomach.-Loathing of food. Anorexia; then strong appetite Aversion to tobacco-smoking Eructations frequent; acid E. Nausea. Swelling of S Contraction Cramplike pain. Sensation as if gases collected into a ball. Anxiety in region, with weight Heat in region, spreading out like a bar

Abdomen. - Borboryomi in different parts Flatus Violent contractions of intestines. Pain, every five minutes; < transverse colon Constriction Sensation as if all organs were in motion Pain in upper part of liver Obstruction in hepatic region Heat in hypogastrium.

Clinical.-Cirrhosis of the liver.

Rectum and Stool.—Weight in rectum Busus Itching in anus Ineffectual desire Burning in anus Itching in anus dry, dark Stools increased Stools easier

Urinary Organs.—Feeling of weight in prostate gland Irritation of neck of bladder Constriction of bladder Frequent desire to urinate Irritation of urethra Urine increased Urine becomes brown on cooling U turbid, without sediment

Clinical. - Inflammation of the neck of the bladder in women, with inflammation, heat, etc, within the vagina and nock of the womb. Prurities of the vagina

Sexual Organs.—Drawing in spermatic cords, < 1 Scrotum relaxed Impotence Indifference to intercourse. Vulva and vagina red Heat in bottom of vagina, at its orifice picking and itching Leucorrhora increased Pain in ovarian region Uterus, redness of cervix, pain, < 1 side, laborlike pain in U and appendages, heaviness

Respiratory Organs and Chest -Pricking in vicinity of glottis. Dryness of windpipe, of ventricles of larynx Voice weak Speaking soon fatigues Irritation of air-passages Difficult expectoration of bronchial mucus Breath short Oppression of chest relieved suddenly, then intermittent

Heart and Pulse.-Cardiac spasm Constriction of heart; with quiet and regular pulse, or with a few separate beats in certain arteries, or with hot flushes in different parts of face Irregular beating of heart Pulse stronger and fuller

Neck and Back .- Renewal of old rheumatic pains in Vertigo; with torpor. Neuralgic pain in external struction in region of kidneys, with heaviness. Formi-

Extremities.-Contractions of forearms and legs Irresistible inclination to stretch Pain in all joints; ings. Spasms; with unconsciousness; then paralysis; < 1, P m all muscles Sensation as if hot water ran of lmbs, < upper, and of chest, face distorted limbs through marrow of bones Wearness m all muscles spasmodically extended, head drawn down on shoulof shoulders Crampy numbness of r forearm, hand ders, so that head seemed buried between shoulders and fingers. Pain in finger-joints Gait unsteady, and arms nearly turned around by action of pronator Inability to stand Sharp pains in hips Weariness muscles; beginning in toes, then distortion of eyes in muscles of thighs, with crampy movements in towards the right and upward, then general spasm, dis-

face, neck, back, chest, arms and thighs, E, with ically bent forward Trembling. much itching, E., with copious sweat Miliary eruptions on neck, back and chest. Sudamma on abdormen Pupules on face Pustules on chest Pricking on ness of senses Discomfort Sensation as of impedinose (in one who had chilblain there every year).

daytime. Heavy, dreamless sleep

Fever.-Shivering in afternoon feet, with general condition resembling procursory stage of lever, without alteration of pulse, C forearm, hand, I foot and leg, > rubbing, but returning. Febrile movements Heat of skin, H in bones of leg, in I tibia, in face in flushes, in different parts of face in flushes, < temporal regions Profuse sweat

# Hydrocvanic Acid.

The officinal acid is diluted with an equal part of distilled water to make the first centesimal solution

fell, with groaning, rapid breathing, foaming at mouth, hands clenched Leaned forward on a table, then beand forcibly Fell suddenly, and was stretched out cold, all muscles paralyzed, but eyes glistening and full of life Threw her hands over her head and fell Started up, threw her hands over her head, gasped, moaned

Throwing herself about in a violent manner. Jerkin nuscies of thighs, with crampy movements in towards the right and upward, intelligential spiesely, calves, earlies almost circular, with raised souly edges twisting around of arms, and distention, especially of Pollowsh spots on legs: Evysaphadaous redness Red points; region of storanch, he drew himself up in his seat, on eyeluls, I side of neck and both hands Red spots supported behind by r. arm, contracted lower limbs covered with whitash scales, on I side of neck Lilac- and with a facro-look and fixed eye uttered three hidcolored spot, shaped like an ear, on sole, the skin over cous groans, then twisted the body towards the left, this depressed and walking is painful. Erythema on with the face to the floor Tetanus Trunk spasmod-

Neuralgic pain in r hip and thigh, afterwards in different parts Riching in several places; I. at tip of ment to touch. Standing upon feet very difficult. Movements difficult, as from loss of power of lumbs. Ginarcal.—It has eared large of supporting yearey. Lym. Restleasness; with dyspeptic fulness of stomach, photo tumors. It has annihilated caused beginn seemed to have. Aversion to mental or physicial exerction; with diffisers the destructive processes, it also has ameliorated cases of cality in moving and depression of spirits. Weakness; with diffisers the destructive processes, it also has ameliorated cases of cality in moving and depression of spirits. Weakness; in afternoon, c. feet, in evening, c. leaves and c. feet, in evening, c. feet, c. Restlessness; with dyspeptic fulness of stomach. and head leaning on table, r hand hanging down, I Sleep.—Yawning and stretching Sleepiness; in the hand in her lap, and thighs drawn up on abdomen and Cold hands and side they forcibly reverted to their former position, eves shut, teeth clenched, face convulsed Paralysis Coffee removed most quickly the narcotic effects

Clinical.—Hystera or eplieptiform convolations, frequent, violent attacks, with feeble, irregular besting of the heart. Tetame convulsions, with complete lose of consciousness. Tetams, syransis, coldiness, action of heart irregular, feeble. Hysterical stacks, when drahking life water seems to guige down the threat Epileptic attack preceded by nauses, vomiting or waterbrash Urenic convulsions. Attacks of fantiness, o anosas, cold akin, gurgling on drahking. It has been used for the collapse of Camphon, with sudden coessition of all theshrapes, cyanoons and gurgling on drahking.

Mind - Disconnected talking Answered quickly, but he soon became heavy. Exclaimed "bread, bread," General Action.—A deadly poison, one grain of the and sprang convulsively from his seat Wild delirium, pure acid being sufficient to cause death. It slows with issens from sade to side, buting at bystanders, eyes the heart, causes extreme dyspness, blurred vision, vertazione and protruding, supile small, heart's action and tupo, frothing at the mouth, tetanic and epileptiform pulse rapid. Annaty Fair of imaginary troubles. Loss of courses. Could not remain in middle of road Generalities - Appeared like a man suffering from when he saw a vehicle approaching, even at a distance, excess of drink Increased secretions from skin, glands, but was forced to stand aside without waiting for it to salivary glands, kidneys and serous membrane come nearer Fretful. Gloomy in afternoon, > open Bloodvessels injected, whole face bloated Relaxation. | air, and ill-humored Thought difficult; impossible Rigidity of muscles Agitation, with trembling of whole Memory weak Stupefaction Coma; interrupted by body Arose slowly and unsteadily. Staggered, and sudden convulsive movements Unconsciousness; with

came insensible, fell backward and was violently con-vulsed Fell insensible, and breathed deeply, slowly with feeling of distention; with weight and heat in it and gastric disturbance; violent, stupefying, on bending head lifeless, without trace of pulse or respiration, limbs the brain seemed to beat against it; intermittent, in afternoon, now in this, now in that place; intermittent, in various parts, always extending to forehead. Confusion, then pressure, then pain; with acute pain in forestood for a second, then ran forward and fell with her head and occiput, < region of r. brow, uneasy, then head first to the ground, then was motionless and falling down Disturbance as if brain were on fire, then falling down and debility. Feeling as if exhausted by

mental exertion. Heaviness in evening, with pressure dinner. Froh; bubbles of viscid, thick, salivary, A sort of concussion. Ongestion. Apoptary. Condition tinged with blood (from her bitting her tongue). Brown like intoxication. Vertigo; <a href="mailto:motion-time-tension-tim tion of senses; with staggering and indistinct vision; and objects seemed to move; feeling as if everything tating, T bitter; sweetish; insipid. about him moved slowly, with pressure in 1 side of occi-put extending over 1 half of head to forehead, < fore-head.

Forehead.—(Pain above 1 eye.) Pressure; on r side; on r. side, extending to occiput; outward, and in orbits, gradually becoming sticking and boring. Heaviness and pressive sensation Tension. Confusion, with pain

Pressure on vertex, not real pain, causing confusion, and extending towards forehead and orbits, where it became fixed, and pressure extending from occuput down nane. Pain in r side of head; in region of crown and forehead: < frontal region, changing to region of lmastoid process, then to l. temple, then to r., intermittent P in l half, especially in region of forehead and vertex, at times changing to r Confusion of r side, with pressure in r side of occiput and sinciput.

scalp Confusion, and in forehead; C and r. side extending forward and causing pressure in forehead

Eyes -Distorted Fixed, and prominent iant Glassy, and prominent. Prominent and glistening, but half closed, pupils dilated and insensible Pain deep in E and temples, then in occiput. Balls tense and prominent Pupils motionless, and dilated. and contracted Pupils dilated, then contracted Varicose venns in lids Lads open and balls fixed; open and balls turned upward; wide open, eyes staring, injected and watery; wide open and balls difficult to move, half open, partly closed, eyes appearing as if pushed forward between them, pupils dilated and insensible; closed; closed and both eves drawn to left. Pressure over r inner canthus Vision dim; with intoxicated feeling, V of floating clouds in afternoon, V of sparks. Blindness, with pain in forehead, pupils fall. dilated, less sensitive to light, eveballs tense and prominent, with injection of capillaries of lids

Ears and Nose .- Ringing in E. Roaring in E. Buzzing in E Difficult hearing Pricking as if mephitic air passed over Schneiderian membrane enlarged. Involuntary stools Sneezing.

Sneezing.
Face —Flushed; F. and neck red and puffy; bluishrod and swollen. Almost purple Dusky Blue during mictarition Frequent meturition, urine not Gray and earthy. Almost black, then ghastly pale, increased; involuntary M Urine and sweat consous; swollen and covered with large drops of sweat Pale; U copious and saturated, copious and watery Urine and sunken Sunken. Swollen; and purple Lines retained four days Emissions of semen Sexual very distinct Wild-looking and bloated Ecstasy of disers increased: features. Congested, and veins enlarged, F and Respiratory Organs.—Scraping in larynx, with raw-head congested and hot Jaw fallen. Jaws clenched in ness; with tickling, causing dry cough, as from eatrigid spasm, C., with corner of the sheet between ing too many walnuts; S in traches Larynx feels teeth, along sides of sheet much thick white foam enlarged Increased mucus in traches; expectorated bluish. Lips distorted. Lips and tongue purplish | yellowish mucus, relieving the rattling respiration

Salivation, with attacks of nausea. Taste sharp, irri-

Throat.-Swelling and undulatory movements of jugular veins and quick and full beating of carotids. Gurgling. Drink rumbles through T. and intestines Spasmodic constriction; with hawking Pain, heat and cramp in fauces, œsophagus and stomach Scraping; till 7 P.M., in soft palate; pharynx; with sticking and increased mucus, which compels frequent expectoration of thin saliva, < larynx, with sticking, then feeling as if larynx were swollen and narrow and pressing against neighboring parts, with tickling extending from larynx low down air-passages and causing inclination to hacking cough, this condition of air-passages was compared to that after taking cold when hoarse or that caused by eating hips of roses when the hairs stick in throat, in the evening this changed to dryness in mouth and larynx Soreness Occiput — Pain in open ar ; P. in O and forehead, < hindering deglutition, flow of saliva from mouth in ... ada; P extending to anterior surface of head; extend- evening. Uncasaness. Heat; in esophagus Inability and of fronted enuses, where it becomes seated; beneath to swallow.

Stomach.-Hunger increased, with aversion to food. Appetite diminished; and digestion, A lost, lost, then unusually increased; lost at breakfast, a few mouthfuls cause nausea, desire for stool, oppression of chest and palpitation, at 12 30 sinking at stomach, but inability to eat Aversion to eating Thirst. Eructations; of gas; sour Violent hiccough, > a cup of black coffee Nausea after eating, with discomfort, N. and vomiting, with relief of symptoms Vomiting; frequent; of black houid, of black mucus Distention of region. Heartburn after eating, with waterbrash and salivation. Feeling of a lump, gradually changing to sticking, then pressure Sensitiveness of epigastric region Warmth Disturbances Unpleasant sensation in epigastrium, with such weakness of limbs and muscles that he thought he would

Climical.-Chronic dyspepsia, with vomiting of food in evening and night (Ferr).

Abdomen and Stool.-Rumbling in A Spleen feels S omitted, urgent,

Urinary and Sexual Organs .- Burning in urethra

issued at each expiration; C, and lower teeth retracted in evening; increased mucus in larynx in afternoon within upper; C, but other muscles relaxed Slight and evening Hoarseness. Cough; in evening; viomovement of jaw the only symptom of life Lips pale, lent; in paroxysms, with expectoration of black-

Suffocation, then stupefaction, and congestion and Mouth -Tongue white and dry; T. coated, T pro- pain in chest. Dyspnœa; with contraction of sides truding; irritation at root, becoming a scraping as after of chest; with pressure in region of heart; with seating dry walnuts; feeling at root as if drawn together sterior and rattling respiration. Respiration difficult; at both sides; coldness; numbness Loss of speech caused by exercises, with nausea and sweet on face and Unintelligible speaking. Mouth dry; before and after hands, and rattling; and deep. Convulsive breathing, then regular, with snoring inspiration and moan-sleepiness, on waking confusion of head and difficulty ing expiration. Gasping. Groaning Moans, low in keeping awake Sleepiness; towards noon. Con-Sighs, with occasional sols She made a noise (Oh! dition between sleeping and waking, paying no attenoh! oh!) Noisy and agitated breathing rattling Trregular breathing Anxious Auxious B Respiration slow and convulsive, and labored, and labored, lessness, with hissing, and stertorous, and deep, with frequent need of deep breathing, and deep, whereby the ribs were drawn back to spine, with deep, prolonged in-spirations and modning, and weak, and faint gasp-brandy Shivering like electric shocks; S. in paroxspirations and mouning, and weak, and faint, gasping, sometimes with slight sterior Respiration imperceptible Respiration forcible.

Chest -Sticking on deep breathing, S under short ribs, S internal to l. nipple, beneath lower end of sternum . in region of r fifth and sixth ribs, near ster- clammy; cold, covering face Dry skin. num Acute pain, with anxiety Pain, in r. side, between r fifth and sixth ribs, near sternum, in region of heart, with dyspnæa, in sides, becoming a sticking Constriction, transversely across, with sudden difficulty of breathing, obliging deep inspiration, of diaphragm, with sense of suffocation Tightness; gradually extending into r side of chest and becoming a pain that extends over chest and makes breathing difficult Tension transversely across, especially in region of seventh and eighth ribs, < inspiration Oppression

Clinical.-Threstening paralysis of lungs and heart (compare Mur ac )

Heart.-Sticking Pressure Præcordial anxiety: alternating with vertigo, pain in same locality Palpitation, with soft, full pulse Irregular action, pulse hardly to be felt, irregular, with slow, depressed pulse, action and pulse variable, sometimes rapid, sometimes slow and intermittent, also weak. Action weak, and fluttering, pulse at wrist imperceptible

Pulse - Rapid, and weak, and weak, and action of heart could scarcely be felt when lying on back; and small, and small, feeble, and small, a weak impulse tone of the different beats irregular Small. Imperceptible, almost

ın abdomen

he would fall Immovable and cold Paralyzed and chuckle burst into a hearty laugh lay wherever placed, not rigid, hands and feet P Dulness, heaviness. Difficulty in concentrating Arm stiff from tonic spasms Arms bent and hands thoughts Coma, with relaxation of voluntary musclenched Arms relaxed, fingers contracted Fore-cles, except occasional spasmodic movements of arms arms stiff and inflected on arms. Trembling of r and legs Arms relaxed, fingers contracted hand. Hands partially contracted, fingers rigid and about nails of a dark lead color Staggered Legs throbbing of carotids with every impulse of heart. dark when in a dependent position, from congestion Drunkenness, nausea and vomiting Giddiness , with of bloodvessels Legs stiff, and straight

Skin.—Pallor and coldness, P and cyanosis bescence on arms, then on legs Yellow and hvid about neck and breast Urticaria, < upper part of restless. Pupils dilated; and insensible. on neck and arms

Wheezing, tuon to surroundings, on waking sensation as if he had not slept at all Sleep prolonged and deep. Sleep-

Fever.-Chill; intermittent, creeping, in afternoon; general, then general warmth, alternating with heat vsms in afternoon when riding in a wagon over a rough road, creeping Cold skin Cold limbs Pore-head and face cold and dry Heat, < feet Sweat; general, general, clammy, clammy on forehead; cold,

# Hvoscvaminum.

The crystallizable alkaloid contained in Hyoscyamus, isomeric with Atropine, C<sub>17</sub> H<sub>32</sub> NO<sub>3</sub>. Solutions in alcohol may be used

Generalities. - Tetanic attacks Muscular system flaccid, unable to sit erect in a chair, hand suddenly pronated and supmated with a jerk. Arrest of various secretions and excretions. Restlessness and tossing about bed; R and reeling, then falling together like a drunken man Heavy feeling. Inability to stand when she got out of bed. General numbness, with loss of power in producing ordinary movements of co-ordination

Mind.—Delirium, violent, failed to recognize his family, saw animals about him, next day remembered nothing that had passed except the dreams of animals; wakeful, quiet and usually pleasing D., with illusions of sight or great sleepiness, and when aroused dreamy sleep, broken by occasional mutterings and terkings of limbs Clear when engaged in conversation, but dreamy when undisturbed, eves wide open, he reached to an object on the table and looked about alternating with a strong one, and small, unequal, on the floor, when questioned said that he thought and now strong, now week Slow, in evening, and something had dropped from the table, and that week Unequal in strength, and irrather, small, the like walls appeared to move, afterward quick, but meddlesome when not engaged in conversation, grasping at objects, attempting to remove them before Neck and Back. Neck bloated Congestion of the hand reached them, when left alone he lapsed veins of neck and face Cramp in back. Sudden into forgetfulness and dreamy, moddlesome delirium, pain in region of r. kidney, extending to epigastric re-picking at objects, having reached them after unsucgion, then spreading over abdoinen, causing warmth cessful efforts he fumbled with them till he dropped them, then on attempting to pick them up lost his Extremities - Seemed bloodless Flaccid, and fell balance, when aroused he rubbed his hand, gaped, hfeless when lifted Trembling, and useless. Con-; answered readily, a remark excited a risibility which tractions, but no tetanus Weak, so that he thought he could not restrain, and occasionally the suppressed

Head .- Aching, Congestion, and of face, violent staggering on rising from a seat; with staggering on Ru-walking, across forehead Weight across forehead

Byes.—Suffused; sclerotic and conjunctiva. Balls

Divide dilated; and insensible. Vision body Prickling in various parts. Formication, < misty; and letters run together, can read fine print epigastric region, F on thighs, legs; limbs. Itching only at distance of a yard; double V.; yellow V.; V. perverted as to color and size, she thought some Sleep. - Yawning, frequent, with overpowering pills in a box were larger than the others; inability

specially cheeks flushed and hot Heavy look.

Mouth.-Tongue dry: and brown: at centre, and hard; and rough, except margins; and rough and sions, fell down unconscious, whole body cold and stiff. brown, hard and soft palates dry and glazed, afterwards face pale, eyes closed, pupils dilated, conjunctiva intengue and palates covered with a sticky, and, offensive jected, anterior cervical muscles contracted so that it secretion, as after Belladonna; tongue and throat so was impossible to lay head upon pillow, pulse small. dry that articulation was indistinct Forepart and thready, rapid, respiration stertorous and difficult, mouth; except gums. Clammy, and moist, exhaling immovable and slept with head upon chest, red face, an offensive odor Suddenly moist. Sensation of deep respiration, warm skin, small, rapid pulse, eyes mastic in 1t

Throat - Dryness; with moisture of mouth, of

pharynx, with difficult swallowing. Stomach.-Vomiting during the coma

feeble, dribbling stream, partial retention (urine con-recognize his relatives, with frothing from the mouth tained Hyos) Urine changed from high-colored to (compare Hydrocyanic acid); with twitching of hands, glaucous green. Urine changed from acid to alkaline feet and muscles; C flex the limbs, and the bent body is and opalescent on boiling; and on standing a deposit tossed high Opisthotonos, with convulsions of limbs. of triple phosphates, the specific gravity increased Epilepsy General rigidity as in tetunus Urine pale, specific gravity decreased Specific grav-

respiration

Pulse rapid; then slow and soft Pulse slow, and at Aversion to motion and work first increased in force and volume

Sleepiness Sleep Fever.-Heat: of skin, with dryness

# Hvoscvamus.

A tincture is made of the whole fresh plant of Hyoscyamus

General Action.—It acts very similarly to Belladonna, bed

Allies.-Stram , Bell. apart and with involuntary motions of hands, with to escape. which she felt about her, sometimes closing them as

to read unless the print was within two or three inches another turned over, turned head back and forth, at another raised head and beat the bed with it, at Face.—Flushed; and hot; cheeks, occasionally; another picked straws from his mattress, groped about him and did not speak

Hyoscyamus.

Reeled, then fell; R. to the bed, fell upon it and brown, also with clamminess of rest of mouth; and was motionless Fell suddenly, with cries and convulmargins of tongue wet with acid secretion. Dryness of spasms of pectoral muscles; fell from her seat, lay closed and injected.

Tremors, horripilation and rigors Startings Tuntchings, frequent, with violent delirium, during the remissions catching at flocks in the air or pulling at bed-clothes Con-Urmary Organs. - Urging, dysuria and discharge in a valsions; after every drink, sometimes he did not

Statches come out of finger-tips and out of all parts ity decreased, unc acid decreased, changed from acid of body to neutral; sp. gr. and unc acid decreased, changed testicles (tearing, erking, gnawing) pains from acid to alkaline, sp. gr., chlorine, urea, sulphates, in outer and posterior surface of 1. upper arm and in phosphates and unc acid decreased lower end of bones of 1 forearm and in scapule Respiratory Organs. - Dry, tracheal cough Rand Restlessness, with confusion of speech and conduct: spiration R. excessive animation and hurry Peculiar sense of Reart and Pulse.—Heart's action excited and rapid lightness and mobility Activity, thought himself Pulse increased in rapidity, force and volume, then more active and vigorous then he really was Ground slow, then decreased in rapidity, force and volume seemed to give way under their feet. Oppression. Weakness, between the convulsions, with snoring; with general trembling Extremities. - Jerking; occasionally, and fidgety and external coldness of limbs. with stupor and over-Inability to walk. Inability to rise from his chair or powering sleepiness, causing staggering, with heaviwalk without assistance, and as he sat twitching now ness of limbs Inability to maintain an erect posture and then of the extensors of the legs, so as to advance and reeling on attempting to stand Faintness Senthe foot with a little jerk Weakness of legs; of feet, sibility blunted Insensibility; to pinching, loss of so that I could only walk by fixing eyes on the ground sense of touch, and he sits immovable in bed Hemi-Sleep.—Yawning; and sighing, and tired feeling plegia Aggravation in evening, A after eating.

Clinical.-Chores, with clutching motions of the hands and CURICAL.—Chorea, with cintening motions of the names and numerous nocherent muscular movements. Epilepticform convul-sions, especially in children or after labor Convulsions from fright, in children. Tetanus. Hydrophobus. Paralysis agitans. During severe malaria, congestive chills

Mind.—Carphologia: in nervous fever, with fumbling about his head, face and nose, and groping about the Ravings. Delirium; and restlessness, would but with less indication of congestion or fever, gener not stay in bed (Bell), with ludicrous actions like ally indicated in conditions of adynamia, with invol-monkeys; ridiculous gestures like a dancing clown; untary discharges, muttering delirium, carphology, etc. ridiculous grimaces like one intoricated, violent and beats people ; bit, scratched and nipped every one who interfered Generalities.—Dropsy. Distention of veins of whole with them, violent certons to get out of bed, underpited body, of neck, extremities, and face Clutching bits, rags, then weeping about, while lying she turned about her without knowing at what I france to walk the head r and l, at times mased it and snapped as if she did so with body bent backward, if she spon- she would take hold of something; strikes and tries taneously attempted to walk she did so with feet wide to kill bystanders, attacks people with a knife, attempts

Delirium most of the time, quick working and clutchquick as lightening. Constant change of position ing of hands and striking his attendants, it was difficult to Tossing about and restlessness. Tossing about the hold him on their laps, afterwards talking about everybed and screaming constantly; and rubbing his hot thing, cannot fix his attention, he cannot be held, head with both hands constantly. In bed, at one time wants to get away but cannot stand, and if he attempts drew knees up, at another stretched them out, at to walk he falls on his face, limbs seem weak, almost paralyzed, acts as if intoxicated, wants to fight, closes his
hands and strikes at his attendants, attempts to but, at afternoon Aversion to reading. When reading hands sings and at times laughs, nervous trembling imizes up improper words and sentences. Disconnected and jerking of muscles, when anything is affered him he; words. Distraction at 6 A M., with sleepiness, so that clurches hold of it with both hands greedily, the slightest he must cease reading Confusion of sense, weakopposition excites him

ing as in chores, did not know their own family. Multiple of himself, aboved, M on being aroused, became triple to himself, aboved, M on being aroused, became the hallocination in which the property of the hallocination in which the property of the hallocination in which the countenance became threatened himself in about Persons with whom he magnetized the himself in debate Persons with whom he magnetized himself in debate Persons with whom he magnetized himself in debate Persons with whom he magnetized himself in the property of the himself with the property of the himself with the himself with the property of the himself with the himself or is frightened; in a general way, loquacious answers Exritod, incoherent in speech, wandered purposelessly about the house, heart then the himself with the sunt chattering without meaning, also leaping and danc- Idiotic Unconsciousness; on waking was scarcely recognized

rectly. Typhomania Sudden intermittent excitement, room; A. from a cup of coffee with wild look.

Reproaches others and complains of a supposed injury to some.

ness of sight and difficulty in speaking, like slight Landy delirum Foolish laughter (Cannab, and.) intoxication Incapable of comprehending what was Sings love songs and street ballads, sings constantly, talks said to her. Inability to fix the attention every athashly and indistrictly, is violent and beats about her tempt to overcome this was followed by confusion and if spoken to strongly or taken hold of; merry, singing, headache Ideas stand still Ideas lost, he is troubled in spotter to Storing, of warming of the many systems of the storing with her hands spinning; (laughable, solemn about everything, sleeps several hours in afternoon, actions mingled with the raving, in an improper dress) often half awake. Remembrance of long-past events; Bettom imiged with the raving, in air improper uncess) like in an awake. In committee the committee of the does not care to things, stared at bystanders, heard nothing, answered recollect, and remembers with difficulty occurrences no questions, several men could not make her drink which he trees to recollect. or he down, face pale, pulse rapid, pupils dilated, in thoughtless staring at objects Memory weak. or its down, nace pase, puise rapid, pupils disted, in moughtiess staring at objects memory weak. capillanes of eyes impoted, sleeplessness, vertigo, Memory lost, when reading; of what she has read-stupefaction. Talking more than usual and more animatedly and; when left to humself. Scapefacton. Frequent waking as if disturbed or as if he had also remarks of the stretch of

Mind -Talks wildly in sleep after 4 AM, eyes distorted, red and staring, head hot, carotids throbbing, face red, puffy, pupils dilated, pulse rapid, hair of head moist, with dry heat over the rest of body, Clinical.—Sleeplessons, with uncestness cannot keep the bed. head moist, with dry heat over the rest of body, clothes on, difficult breathing or difficult swallowing. Very useful, apprehensive, once she sang, then wept, screamed and in the sleeplessensor children, when they twick, or yout, remble 'gasped, after a few magnetic passes she came to herself. applying the hand to head had a soothing effect Excited as by tea; at night 1rritable Apprehenple, in back (Gould not get warm in bed at night) sive Easily fresh ten get Sober Sad, at 5 P m, in Sudden chill in the house, < bright and warm open evening, and inclined to weep, which she tred to support Get and sheyrong, with hot face and cold hands, press. Religious thoughts, hopeful Weakness, of without thirst Face cold and pale. Coldness along memory, memory defective, can hardly arrange ideas and spine; in open air; C in back, < in house; C runs cannot execute her intentions, forgets what she wanted to do. from small of back to nape, C in back on walking Forgets people's names. Omits letters in writing. Mistakes

Head — Tearing stitches internally in morning. Pain, < dinner, (P waking at night); as from ham-Heat, general, with distended veins; general, inter- mering, in morning, < on vertex; P. of weight, general, general, external, without redness; hot and dry ally on passage of a heavy storm-cloud Pressing

walking in the room; in cold open air H. in artic- Forehead -Aching over brows after breakfast; A.

as if smashed, < night and lying down, < next day, \*Tongue coated whits; coated dirty yellow; T. whitish-but more towards vertex. Pressure on anterior and gray, < at base; foul T on rising. Much mucus after upper part of l. bone after breakfast. Tension as if eating. Dryness. Dry heat at 5 P m. Taste bad, crucdrawn up Feeling as if touched by oold hands in tations. Taste of blood in throat after stool, on hawkevening, then extending towards r eve. Head heavy, ing bright red bloody expectoration.

Temples.—Sticking in r.; in l. in evening, now r., during an epileptic fit, mability to speak, cured in fonty-eight Teering in evening; suddenly in l. when walking loours Tearing in r at 4 P.M. with general chill. Aching, in

 after breakfast. Tension Throbbing. Sticking in vertex at 7 P.M. Tearing in vertex in evening Pain in V. in morning on waking, with roaring in ears, < 1. Throbbing in V in afternoon, with heat in head. Fulness in vertex before waking, with ing eyes and head

Shooting up 1 occipital nerve in forenoon in occiput in evening Pain in O on motion bothered Creening feeling in r side of O, after din-heat, with heat in mouth, for wine in afternoon ner Falling of hair. Pain in scalp on l. side of occiput after breakfast, sometimes sharp, weakening, with pressure on chest, empty at 5 PM without hav-drawing P in scalp over upper and anterior part of 1 ing eaten anything, bitter, of mucus in morning,

Climical.—Severe headache on vertex, as if the whole brain would burst, extending into cheeks and chin, with cramp in chin,

Eyes -Sticking through r Tearing in r in evening Aching. Tension Weariness Pupils dilated, at 6 during dinner, with sleepiness and feeling as if stomach PM. Lids agglutinated and tense R lids spasmodically closed in evening Smarting of lids. Burning stinging in tarsi of 1 lids at 9 pm. Burning in canthi Focal distance of vision lengthened in evening Vision weak.

Ears .- Sticking through r. in evening Pain at entrance to r meatus Drawing pain in I towards morning by diarrhora Distention after tea-time, with in r in evening, with executated feeling in r side of and r hypochondrium Pressure after milk, P. after

successing, of I nostril, with crusts in it Sneezing in sour wine. Weight after meat at breakfast. Oppres-

secretion Smell very acute

ing Jerking pain in cheeks Aching, in afternoon and evening, in afternoon after eating a mulberry tart, with disturbed sleep at night, next day A. < 1 side, > diet and abstinence from artificial stimulus, in brows and face, < night to distressing aching in r. half of face. < an old tooth Pressure on malar prominences after breakfast; on malar-bone in evening. Seems puffy in evening. Tension in cheeks, in afternoon Contraction in 1 zygoma Aching in articulations of jaws. Lips dry Lips hot

Clinical.—Neuralgia of the face, which had lasted for two years, following the shaving off of a cold sore, was entirely cured.

Mouth.—Toothache in forenoon; in a stump of a r upper molar at night, keeping me awake and restless, > lying on r. cheek and keeping quiet, aching next cheeks in afternoon. Tension in teeth in forenoon on I inguinal ring in morning.

Threat.-Hawking of tenacious mucus Lancinations from r submaxillary gland down neck, at 10 PM Raw soreness after sneezing. Feeling as if a worm were squirming in it Rising of heat in afternoon.

Stomach.-Appetite great in morning, at noon, in pain and heat in it; fugitive F in 1 half of head in evening; for pickles in evening; not great for break-morning in bed Sticking in r. side of head on exert- fast; lost in evening; lost, with nausea and pressure as from an overloaded stomach, though he had fasted, Tearing no relish for breakfast Aversion to eating. Speedy Feeling satisty without pressure in stomach Tobacco is not in I. side of O. in evening as if violent pain, with press-irelisted Thirst, in morning, on waking, but in-ure, would come on Feeling in O. in forenoon as if ability to drink on account of choking in throat and

Eructations, after breakfast, on drinking water, parietal bone Formication on vertex Itching at with burning and pressure in stomach Nausea, night. in pracordial region; at noon, with weakness, in evening, with constant eructations of wind or mucus, in evening, with distress in stomach, retching and collection of water in mouth, on waking in night, and bowels were hot and swollen, two hours after eating, with pressure and weakness. > drinking water, with retching Retching

Dyspepsia after plums and pickles, with bilious diarrhoea Indigestion at night, with flatulence, woke with distention and cracking pain in hypogastrium, > zygoma, on touching zygoma it feels swollen Pressure flatulence Sticking alternately in epigastric region Itching in r meatus, > touch, but returning a small meal, after breakfast, extending towards back, Nose.—Pain in bridge on rising Dryness, with P, with burning, waking, feeling as if disordered by morning; in a sharp fit after breakfast, with free nasal sion in evening after a little rice Crawling in morning, with yawning, like hunger, but without appetite Face. - Jerking in l. zygoma in morning, with crawl- on account of nausea Feeling contracted and hot in evening Heat in morning after rising, > drinking cold water, with discomfort, II in epigastrium and chest Apprehension and crawling in pit and in precordial region in evening

Abdomen.-Distention , flatulent, also in evening , with cracking pain, waking at night, griping D, then soft stool. Hardness, with tension in r hypochondrum Emission of flatus Flatulence through the day, with pressure and dragging Cramp. Cutting and griping as from incarcerated flatus. Griping as from flatulence, then soft stool. After tea pinching in bowels, which became relaxed Pain in evening after coffee, with diarrhosa Feeling as if flatus would pass.

Sticking in r hypochondrium Dragging pain in liver at point of false ribs at 6 PM , weight and dragging in liver at 11 30 PM, from walking. Tension in day after a glass of beer, < night; tearing, here and hypochondria. Cutting in umbilical region in afterthere; tearing in r. at 3 A.M. on waking, drawing, in noon, as if something were cooking therein Pressure all lower after midnight; jerking pain in teeth and in r. iliac fossa, towards ring, in l. groin towards ring; sphincter in forenoon Dryness in morning. Inclination r side of vertebree Pain in l. scapula after dinner; ing in bed, then normal stool; U, with passage of S. in loins, with burning pain in them and coldness in small facal masses. U, with discharge of hard masses, back, shoulders and arms. Aching in loins; in renal meffectual U at night

Stool.—Painless diarrhoa, then constinution Soft: and free, bilious, and vellow, bilious, at 4 P m, had had a firm one after breakfast, as usual Hard, and knotty , and large , and scanty Free Profuse, morning and evening Delayed Difficult, with tenesmus

so that it caused nausca

Urmary Organs .-- Warm biting in urethra in afternoon Biting stinging in orifice of urethra Urging; meturition of very yellow urine Urine clear, wine- of 1 foot. Sawing pain in 1 hand and 1 limer ankle. yellow Urine high-colored, in morning, frothy, of Flying pain in r. shoulder and l calf. Brussed feel-peculiar sweetsh odor. U profuse at inglit, clear ing in all joints Drawing in 1 buttock, under taber Turbid

noon when walking, with erection Tension in uterine arm alternating with tearing region at night, as from a short band Leucorrhea Upper Extremities.—Stacking in 1 shoulder at 2 PM Menses increased, with less trouble than usual, increased, too early, preceded by pinching in abdomen. diarrhoa, cold feet, wrenching pain over eyes, > modays too late

Respiratory Organs.—Bronchial catarrh from night fogs Scraping and roughness in larynx, upper part behind elbow, with pain Numbness of 1 arm at of pharynx and nares, at night, in fog Frequent dry, hacking cough Expectoration of gelatinous mucus E of much granular white mucus Dyspnœa in fore- 1 upper arm ) noon. Short breath in evening.

in atternoon on r side and once in l. lower part Sting- and tension. ing burning pain on edge of l. pectoral muscle at noon rib down, after breakfast, on outer third of 1 clavicle sciatic nerve, on back of pelvis, at night in bed after breakfast, on nipples, with warm formication Anxiety in morning, like shortness of breath

breakfast, at 6 P M.; after dinner, and hard

ing, > washing Tension in nape, with pressure and sticking in middle of chest, T. in nape, motion of head is painful. Stiffness.

Rectum .-- Cutting warm pain all around, internal to | after dinner, with pressure in stomach; C. between S., Tenesmus with stool Urging in morn- P on top of r in afternoon. Sticking in loins at noon; region at 4 P.M when walking; paralytic, in loins. Squeezing in l kidney

> Clinical.—Spinal tenderness, with paroxysms of terrible pain, screaming if approached (Arn.), in other cases, great sensitiveness of cervical vertebre to touch, with dyspices, short backing cough, etc.

Extremities.—Sticking in r. middle finger as if a knife were thrust from joint along metacarpal bone to wrist, then a similar pain in great toes Lancing pain at 2 A M, with vertigo, almost a faintness Frequent in 1 wrist and ankle at night, and along inner border yellow, with burning Strong-smelling U at night lischii, and in r wrist in morning in bed, with sticking urbid perking on centre of back of foot Heaviness, felt

Sexual Organs.—Tearing at night, with desire to fatigue when walking before dinner. Feeling of weakurmate and micturation twice. Erratic ideas; in afterness and trembling. Paralyzed feeling in r foot and l

with every inspiration Tearing in r shoulder and forearm Pain in shoulder-joints in forenoon, < 1; rheumatic drawing, in point of 1 shoulder in morning tion, and backache, during menses sickening pain in Trembling of 1 arm and fingers, with cramp Stick-abdomen, headache and sensitive hearing; M fourteen ing in arms Tearing in arms, in 1 in morning; in evening, in l. in evening, < from elbow to fingers; at night Tension in arms Weakness of arms, of r. night, waking her. > friction. Pressure on r humerus at insertion of deltoid (Neuralgic, paralytic pain in

Tearing in elbows Pain in r. elbow, rheumatic; P in l elbow, then in r forearm Return of weakness Clinical.—Asthmatic breathing, apparently resulting from and strained feeling in r. elbow, fifting Lancing ashma, with sensitiveness of the spine storm Spasmodic pain about head of r. radius Pain down ulnar side of I forearm. Starting above r wrist on going to Chest.—Sticking in L. among tendons of serratus sleep. Jerking in tendons of I wrist on going to magnus, S in 1 pectoral muscles, in 1 in evening, sleep

Sprained pain in 1 wrist on motion, S pain
in 1 breast in evening, here and there beneath r. breast between 1 index and thumb at 1 p.m. Lancing pain in evening, through chest at 5 PM, so that she must on back of 1 middle metacarpal bone in morning hold the breath, here and there below r chest at 8 Pain as if suppurating on outer margin of ball of l P.M., alternately in both sides; outward through ster hand when it lies on the table Tension in hands num and I chest, < motion, in r pectoral muscles, Lancing pain in joints of 1 fingers; in phalanges of r extending to back around ribs , in middle (like heart middle and little fingers Tearing in r. thumb in burn), (in ribs and shoulder as after taking cold) evening. Cutting in fieshy ends of fingers Rheu-Sticking cutting in r upper half on moving about, and matic pain in last joint of 1 little F, with swelling

Lower Extremities .- Reeling as from vertigo Cramp Tightness, in evening. Oppression in evening Press in lower part of r gluteal muscle at 5 PM, then flashure, at 5 PM, with burning; on r. side from seventh ing pain on back of l. toes. Shooting down great running down 1 median nerve in evening, then P in front of thigh, P. on centre of front of l. thigh in after-Heart and Pulse.—Heart feels in evening as if it noon; in inner condule of r. thigh in morning in bed; would fall down Palpitation. Pulse rapid, after intermittent, in front of l. thigh at noon. Strained feeling in r ham at night after a walk. Bruised pain Neck.—Swollen Aching in nape and upper part in I thigh on walking in afternoon, muscles supplied of shoulders (trapezius), A in r. trapezius in morn- by anterior crual nerve stiff and sore, coming and Tension in nape, with pressure and going for days. In thigh sore and lame.

Knee -Cramp Sticking in l. Tearing in r., on outside, then pressure on upper part of r. scapula Back.—Stinging in scapulæ, near edge of r scapula Pain in r. in morning; P. in outer and upper part, in and near spine, in morning Cutting under l. scapula an outward and upward direction, as from straining a

on going to sleep; (frequent C. in calves at night, r., half awake, saying "Why should I fear, the Lord is then l.) Sudden shooting over front of l., in perios- around and about me" Exhausting, of climbing teum, sticking in inside of r calf at 4 PM when walk- mountains, pressure of business, etc. ing. Tearing in r. leg and knee; T from r calf through hunting, etc., indistinctly remembered foot at 6 30 PM Diductive pains down nerves of r. in atternoon. Drawing in r calf; in r tendo-achillis at 4 PM General shivering in evening, till midnight, breakfast: painful in r. tibialis. Flashes of weaken- when sitting, < moving about, with expectoration of ing drawing pain all over front of l. in afternoon when mucus, nausea, > drinking cold water, S extending walking and sitting. Pressure on l. calf as with a from calves over thighs, (in back, extending across blunt point Biting on 1 shin, in front in evening shoulders) Cold feet, soles, 1 leg when sitting, with Tendency to tingling, < 1. Heaviness Numbness, numbness of it General dry heat, in evening, with of 1 : of 1, in evening

night on going to sleep Tension in soles like a cramp off the covering. Heat in face in afternoon, in face, Sticking in bone in inner side of r foot on ascending with smarting. Hot ears on going to bed. Heat in steps, as if sprained; sprained or dislocated feeling in head and feet from 3 to 5 AM, with restlessness and l. foot on rising from stool at 3 PM Twinges of pain desire for cool places Sweat in morning, S. on slight along outer border of l. foot after dinner. Drawing exertion on inner border of l. foot in forenoon, cramplike D. as if feet would become dead when lying Tingling in feet, disposition to T. in bed Feet feel numb and

sticking.

Toes.-Jerking of l at night on falling asleep. Swelling and biting in toes and heels Sticking in ball of great, in fold of skin internal to nail of r strychnia, and most of its toxic properties are due great; in fourth in evening; frequent biting S m r. to that alkaloid, but the other elements contained in Stinging biting in attacks in back of r in morning, it determine marked peculiarities, especially extreme Biting on a r Gnawing in r., then pressure and ach-, sensitiveness of the nerves, symptoms of hysteria. ing in middle of l. thigh, about where sartorius neuralgia and a peculiar form of fever сгоянея

Skin .- Pimple on r. side of back, on r hip, sore Puls, Lycopod, Staph under friction of clothing, on middle of r sternohand in evening, on hands, neuto-raso on toses of toze, it is irksome to look or to open mouth to talk, hands and between fingers. Fuzzy feeling in feet, with juzzy stacking in them. Craving in hands and fret, with juzzy defing in mountage of the treast up to median line. Techniq in evening on undressing, < sacral region, let skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and seemed the skin was rough and seemed full of pumples, (I seemed the skin was rough and on restaurable the skin was rough and seemed the skin was rough and seemed the skin was rou

after eating) Heavy, exhausting sleep every night, after dating), in evening after lying down, and in with sweat in morning. Waking late Lees on back morning after waking. Crawling in all bones. Weight, at might and has emissions. Waking early, with hot conception and orgams of bloody in whole body in sweat and uneasiness Falls asleep late, sleep restless, morning on waking, with melancholy wakes early Restless sleep; and lay a good deal on

starting of legs when falling asleep, then convulsive bility Aggravation from coffee (Cham., Nux v.) and shocks preventing sleep, erethic state of nervous sys-smoking tobacco (Nux v, Puls., Staph.).

tendon, in morning on walking. Tingling in knees tem, erotic ideas and dreams. Of Mormons, horses, and lees as from weariness fights and great action, found myself lying on my Leg.-Starting of l. on going to sleep Cramp in l. back in morning, dreaming some desperate horror and Of journeys

> Fever.-General chill, with nausea General C at

Internal heat in morning, without thirst, anxiety L ankle liable to wrench Cramp in 1 foot, at with sweat, preventing sleep, but coldness if he threw

### Ignatia.

A tincture (or trituration) is made of the seeds of Strychnos Ignatia, Lind).

General Effects.--It contains a large amount of

Allies - Nuz vom , Cham., Silicea, Lach , Gels , Zinc.,

Generalities - Trembling , with twitching and spasms mastord muscle, such as had appeared before on chest Trutching in various parts of muscles, here and there after Biting eruption like nettle-rash, on hands (luster of lying down. Convulsions; so that he could not stand, itching, psora-like vesicles on root of l. thumb in fore- | < jaws, causing risus sardonicus, without other sympnoon, gone at night. (Ulcerating pain in a vesicle on toms. Frequent change of position at night, lies non here, thigh) Biting in l. fingers in evening, on back of now there. Constant motion of body, looks as if in a hand in evening, on hands, nettle-rash on backs of doze, it is irksome to look or to open mouth to talk,

Sleep.—Yawning Sleepy; at 6 P M., (in afternoon spots on touch, as, for example, on ribs Pains renewed

Weariness in morning on waking, in afternoon, back, kept jerking head backward, it seemed as if overpowering sleep at 2 PW, unrefreshed by two she lay very heavy; with frightful dreams, starting up hours' sleep, in evening, on walking, it seems as if his and apprehension. Felt as if under the influence of breath would fail, is qualmish at pit of stomach, and tes, went to bed with brain excited, sleep unsound, then coughs, from slight evertion, after dinner, < dreams vivid and active, next morning found myself 2 to 4 PM, with sleepiness (after stool), with yawn. lying on back and digging head backward into pillow ing, as from weakness about pit of stomach, with Tyring on towns and tagging near decreased into pinow ling, as front weakness about pit of stomach, with Dreams—With sweat in morning Destreams I makes and necessity to he down, so that he had Many, and waking after each. Vivid, unremembered confused Buy; and confused; and midstanctly in anything, but prefers to he Unwillingness to remembered. Awful, as that God was far from me, move, shirking of work. Stiffness of the capability of the confused in the stiffness of the capability of the confused in the co

Clinical.—The general characteristic conditions of the Ign | Paroxysmal past as from pressure of something hard on CHIRCEAL—In general characteristic continuous of use age-putent are extremely important, since they are almost stray un-expected in character, for example, if the patient has fever he is not through and wants to be covered, if he is cold he wantsto be un-covered, the headache in the forehead is relieved by stooping, the intrinsion to complete increase with coughing study and physically, a greened characteristic of fign, both milly and physically, a greened characteristic of fign, both (Chain.) General tendency to Extreme sensitreness to pain (Cham). General tendency to finitione and debullity with nervous protestion and excitability. Numerous protestion and excitability. Numerous phases of hysterns and of neuralgass in various parts of the body, spassus in children from testing or from worms, or from fright. Choren especially in children who have been frightened. Epilegey originally, caused by fright. Hysterical paralysis. In all the phase of hysteria three is a changeable mood, often flushing of one or the other cheek (Cham), the indenery to scream, or to tear, or to bite, or to cry

Mind -Fancies that he cannot proceed that he cannot walk, F at night, which fatigue the mind Weeping Houls, cries and is beside herself on account of trifles, cries aloud if one hesitates to do what she wishes. remonstrates with her or tries to persuade her, or if others wish something different from what she wishes Cries aloud it improper things are refused. Walks about perplexed and stupid Unreasonable complaints about noter Sensitiveness, delicate conscientiousness. Inconstant, impatient, irresolute, quarrelsome, in attacks Changeable moed, alternations of joking, merry mood, with lackrymose mood Anger at slight blame or contradiction, and this makes him angry with himself; A. at slight contradiction Ill humor; from headache, to-wards evening, and discontented, obstinate, and absorbed in himself Thinks of vexatious things con-

trary to his will

Anxiety: as if he had committed a crime, preventing talking, so that he cannot express himself clearly Tendency to be frightened (Stram ) Dread of trifles, < things coming near him Fear of therees on waking after mulaight, F. that she will have an ulcer in her stomach No self-confidence. Sad towards evening, S, earnest, cannot be induced to talk or be cheerful, with flat, watery taste to food and little appetite Indifference to everything Boldness Busy, restless, after exerting brain, < morning, unable to do anything as rapidly as he wishes, whereupon anxious behavior, mistakes in writing and talking and awkward actions; hurrying, with dulness of sense and rush of blood to face Merry, jesting Thoughts difficult to fix; from affection of head Fixed idea, which he pursues in his thoughts or talks about with earnestness and exhaustiveness, fixed ideas in evening before and after lying down, as, for example, of music. Memory weak.

Clinical.—Melancholia, the result of grief, sits with a vacant stare Many mental symptoms following depressing emotions, especially grief, such as signing, despondency, hysterical laughing or crying

Head .- Inclined forward Land upon table Statches through head Tearing after midnight when lying on side, > lying on back Aching, in morning, < eating (Nux v), in morning, > rising, in afternoon and evening, with heaviness, at 2 PM., < above eyes, with enery load of arieries / shoping , < talking; < Steking deep in r temple Pain in temples; < r., reading and paying strict attention to a speaker; with deep sleep; externally, extending across orbits, and when touched pain as if bestem; as if presend out ascending; J pain < opening eyes. Throbbing pain Pain in occuput and r. side; in r. half of O. all day, >

surface of brain, this and all other headaches > coffee (Cham.) Aching after midday nap, as if there were too much brain or blood in head, < reading and writing Pain as if head would burst from talking or speaking loud, > sitting still, reading and writing.
Pain as if bruised: in brain in morning on waking. changing on rusing to pain as if a nerve of a tooth were crushed, then changing to a similar pain in sacrum, the headache always renewed on thinking Sudden pressure now in one place, now in another in evening, and at night, next morning he was unrefreshed, the P increased to real pain, which lasted till 3 PM

Confusion . in morning on waking, with discomfort of head, in morning on waking, lasting till after dinner, continued next day, changed to pain in forehead and eyes, so that movement of lids and eyeballs was painful, pain < ascending steps or any violent exertion, < thinking and speaking, with pain in r. side, < occiput, then pain in vertex, then extending into l. eye and whole head, as before coryza; like intoxication, at times becoming a pain in forehead, < r. half, so that thought was difficult Heaviness, in morning on waking, as if filled with blood, with tearing in occiput, > lying on back, especially by bending head forward, < sitting erect Seems too full of blood, nose internally sensitive to air, as before nosebleed Hollow feeling Intoxication, from beer; as from brandy, with burning of eyes Vertigo, all day till 10 P M., with sticking in head; with staggering; chang-

ing to pain in r half of occiput

Forehead -Sticking, < above brows, S., with pain in r side of occiput, extending outward, and in tem-ples Tearing in F and behind I ear, > lying on back, < raising head, with hot red cheeks and hot hands Pam; from towards noon till 230 P.M., with pressure in eyes; till sleep in evening and around orbits, < sunlight, beneath r bone, above r. brow, in r. half, involving r eye, which was sensitive to light, < in eye by moving it, > towards evening, extending to different places in head, in r. half, afterwards extending to I side; in r side, extending to I, then over whole head, extending to different places in head, < evening, > night's sleep, extending downward on sides, from 2 PM till evening, extending at times more to r, at times more towards I eyeball. < motion of body, in sinciput, extending into nasal cavities, and every ten minutes sensation as before violent coryza, when after ten minutes the nose was better the sensation extended to other parts of head, and so alternated; P. above root of nose, compelling him to bend head forward, then nausea; drawing P. above r orbit at root of nose, renewed by stooping low; cramplike P above root of nose, in region of inner canthus Stupefying intermittent pressure beneath I eminence. Digging beneath r eminence and on r side of frontal bone. Dulness in sinciput in forenoon, amounting at times to real pain Throbbing above r brow

Exceeding these types over name water, they even! and water, and provide part in some cases, so me process over len, Meibourna glands secrete much mucus; extending and pelow orbits and into cheeks; < us r sade of on sides, > lying on back. Contractive pean in very forhead, retaining not r eye, essention as y bell would; but, extending to forchead, where it remained till 4 be pressed out, burning in eyes, lachrymation and much P.M. Pain in r side in forenoon; P in one half of mucus, external, head sore to touch. Jerling pain on brain on walking in open air, < talking or reflecting.

night's sleep; above mastoid process in afternoon, at ration. Ulceration of inner surface of lower lip; U of times involving ear, when hearing was blunted; in O, one corner of lips Stacking in tips, < moving them, as if bone were pressed inward, throbbing P in ole |S| in lower, in lower on touching a hair of beard in side of O. (Hair falls out)

Climecal.—The headache of Ign. is usually sharp, confined to one point, as if some parting instrument, like a nail, were being many that the state of the property of the prop with sudden pallor, delirium, rolling the head, difficult swallowing, convulsions of the eyes and lids

Eyes.—Inflammation of 1 Staring in front of hun without thought (Sticking in r) Pressure in and above them in morning on waking; P. outward in r. as if ball were protruding. Itching internally Irritability of r., with increased mucus in both. Pressure in balls, < looking at the light, with pressure above eves Itching in ball at inner canthus Pupils contracted, then dilated; dilated, cannot be dilated Pressure beneath 1 brow

Lids - Agglutinated in morning, with purulent mucus, on opening eves the light is blinding: A in morning, pressing in eyes as from sand, on opening lids sticking in eyes Sticking tearing in external canthus, lids agglutinated, lachrymation in forenoon Sensation of a particle in I external canthus, which at times presses on tissues Pain above and behind upper, in inner surface of upper in evening, as if too dry; like a soreness in external canthus on clostenacious mucus. Constantly full of mucus. Avoids ing eye. Biting in external canthi, gnawing B on opening M and speaking. Solvation, in forenoon, margins of lids in morning when reading Weariness as if they would close

Vision -Dim in r after midday nap, in one, as from tears, in evening when reading. On reading, the letters to which the eyes were directed became invisible, but those near were more distinct than ever. it seemed as if the middle of a word were marked with chalk while the beginning and end became more distinct Zigzag and serpentine white flickering (Lach ), at one side of field after dinner; a circle of white, glittering, flickering zigzags about point of vision, and letters at which one directed the eye invisible, but those at the side are distinct Objects seem to move Cannot endure candle-light.

Clinical.—Asthenopus, with spasms of the lids and neuralgic Threat.—Pain in submaxillary glands, after walkpains about the eyes. It has been used for inflammatory affections
ing in open air, drawning pain, drawning, extending
into away then swelling of clands. In anterior, as if

Fluent coryza. Dry catarrh. (Bleeding)

ing in zygoma in front of 1 ear; in checks Pressure Constriction in pit, causing cough Food seems to in zygomata before sleep; intermittent paralytic, in l stick high up in evening before sleep and in morning zygomatic process; P. beneath rami of jaw as if flesh | Difficult swallowing of tood and drink | Inability to beneath jaw were pressed downward. Jaws closed, im- swallow bread, it seemed too dry peding speech. Pain in joint of jaw in morning when Ceophagus—Choking constriction in middle in even-lying. Lips cracked and bleeding. Enlarged gland on ing, from a plug, < when not swallowing. Scientific as inner surface of lower lip, with sore pain; and suppu- if a plug were sticking in it when not swallowing. Stick-

Clinical.-Distortion of the facial muscles whenever the patient attempts to speak. Neuralgia of the face

Mouth.-Clawing digging in incisors in evening Toothache near end of a meal, < after eating, T and looseness of teeth, T as if nerves of molars were crushed, sore T. in anterior molars, < reading, T in morning as if loose; as if an incisor were numb and loose, < touch of tongue Inner side of gum and 100se, < touch of tongue Inner side of gum painful as if numb, as if burnt Glands under tongue excited, inflamed Sticking in tip of tongue, in fre-num Tearing in tip of tongue as if burnt or sore in morning after waking Sharp feeling in tip as if sore Biting on forepart from tobacco-smoke, with pain in incisors He easily bites one side of posterior part of T when talking or chewing. Burning of T Front half of T numb when talking, when eating it feels burnt or sore

Easily bites inside of cheek near orifice of salivary duct when chewing (Nit. ac ) Painful swelling of orifice of salivary duct Inner surface covered with offensivesmelling inucus in morning on waking Sticking in palate, extending to inner ear. Inner surface sore Palate feels exconated (as after frequent swallowing of saliva) Palate feels as if swollen or covered with in forenoon, with nausea, white, trothy, frequent spitting of saliva, spitting of frothy S all day, flow

of S from mouth in sleep

Taste .- Sour, salva has a sour taste Bitter, then sour, with sour eructations; B to tobacco-smoke, to beer, B and putrid to various articles, < beer (Puls) Nauscous, as after fasting, with appetite and relish for food and drink. As from a disordered stomach, flat, watery, morning and noon after eating Insipid, as if he had eaten chalk. Flat to beer, as if spoiled When eating, drinking and smoking, the good taste disappears as soon as the actual need is supplied, or it changes to an unpleasant taste, and one cannot take any more, though there is a kind of hunger and thirst

into jaws, then swelling of glands, in anterior, as if Ears.—Stocking Pan in middle. (Throbbing) on motion of throat Pan in throat on touch as if flowing in auditory ornal. Ranging Roaring Intol-ighands were swollern Tonals turgescent Stacking. erance of noise. Music causes an unusual and agree-able sensation Insensibility to music when not swallowing, and even somewhat when swal-lowing (compare Lycopod), the more he swallows the Nose.—Ulceration of nostrils; sensation of U and more it disappears, entirely > swallowing anything soreness in inner angles. Tickling Crawling itching solid; S. when not swallowing, when swallowing wasation in nostrils Stoppage of one nostril as by a leaf, not as if one swalloued over a hone, causing jerking, low down like dry catarrh, (inability to draw air through N when not swallowing, in parotid gland when not on closing mouth) Trickling from N then coryza swallowing, > nhen swallowing Pain as if raw and sore; when swallowing Soreness like a lump, which Face.—Redness from slightest contradiction. Stick-, is painful as if excorated when swallowing Pressure.

562 Ignatia.

returning when not swallowing. After dinner it seemed quietly Tense in evening after eating, mouth dry and Combina

Clinical.—Inflamed tonsils, ulcerations, with sticking pains (the general indication for Ign. in sore throat, aside from the mental state of the patient, is the relief of the throat symptoms from swallowing) Diphtheric sore throat, with sensation of a plug and with constant efforts to swallow Some alarming cases of diphtheria are reported cured by this drug

and desire for acid fruit, cranberries, to warm food and after breakfast meat, desires only bread, butter and cheese, to fruit, it does not agree with him; to acids; to wine Thirst, with chill; T in atternoon and evening, at night

finds of food, and the taste of milk taken in morn-lightness under role, with anxiety and necessity to loosen ing cannot be removed from mouth for a long time, clothes (Lyc) Internitient prin in region of sphen and testing of tood, sour, musty, mouldy in evening, prof shound. Constriction in hypochondria in morn-(mellectual, in morning in bed, causing pain in ordice; ing, as in constipation, with one-sided pain as if nail of stomach and in esophagus to pharynx) Hiccough were pressed into brain. from tobocro-smoking (Puls , Staphs) , H. after eating and drinking; in evening after drinking Nausea, to-wards noon, in forenoon, with loss of appetite, from smoking, in an old smoker Ineffectual retching

Efforts to vomit. > eating

trium Pain in bit on pressure as if sore internally Pain extending to spleen, then to spine, changing to and in liver and spleen. Coldness Feeling of flabbi- abdomen Sensation of something alive ness, S and intestines hang down relaxed Poculiar weakness in pit and epigastric region. Sensation of fasting, with physical echanistim (Sep.), feeling of F., with flat evening in bed. Pinching in region of cacum, < taste and weakness of limbs. Fulness alternating with walking in open air. Flatulent pain in morning, causemptiness, with the latter ravenous hunger Digestion ing sticking, which extended into chest and sides weak

Clinical.-Indegestion, with aversion to the ordinary diet Uninterest.—Indigention, with aversion to the ordinary diet and longing for a great variety of indigestible stricles, regurgitation of food, his cough, empty retching, weak, empty feeling, has to eat at might even, e-pecially attended with sighing, gastric symptoms generally — eating (Lach, Zinc) Gastraigns.

ing low down on swallowing, > continuing to swallow, after eating, only on standing, < walking, > sitting as it food stuck above cardiac orifice of stomach bitter, one cheek red Rumbling, and noises; in afternoon, after eating; then meffectual urging to stool in forenoon, but in afternoon several normal stools Gurgling Discharge of flatus, copious, at night, even in sleep, after eating; unsatisfactory, abrupt, offensive, not without exertion of abdominal muscles Wanderings. Flatulence which presses upon bladder.

Cutting sticking after eating, then meteorismus Stomach.—Appetite great, at 11 v.m., at 11 a.m., but dimunished when the time for cating came, raventuse Graping, in open air, as before diarrhoa, ous, at 11 a.m., with at times nausea, A. good, but (Tearing) Pinching when walking in open air, 'P when he attempted to eat he was satiated Desire for after the least fruit, 's standing and walking,' sitting fruit, D for acid things Appetite diminished Flatulent pain at night; F pain, with sticking ex-Satiety, so that he could cat nothing in evening if he tending to chest, F pain here and there in evening smoked in afternoon Appetete lost; and desire for in bed and always on waking at night Bruised pain in tobacco and drink, with frequent salivation Aversion morning in bed Drawing two days before menstrusto tobacco-smoking; though it has not an unpleasant tion, with graping in it, pressure in rectum, nausea, weak-taste, as if he had smoked enough, A to milk, to ness in pit of stomach and pallor of face. Oppression, boiled milk after his necessity is satisfied, to meat, with cutting. Throbbing Anxiety arising from A

Graping in side, then sticking Cutting in r Contractive pain from sides beneath ribs Pressure in l Distention of hypochondria, < in sides, pit of stomach and Eructations, empty, bitter E in forenoon, of bitter small of back, mability to breathe on account of tension and

Upper -Pain as if intestines would burst, like cardialgia, extending into throat, in morning when lying on side, > lying on back Pain as if something pressed towards chest at 6 PM Tensive pain as if walls were pushed downward and diaphragm upward, Sticking, in pit Slow sticking jerking pain in epi- pain < in region of spleen, whence it extended towards gastric region and pit of stomach Pinching in pit and spine, alternately worse in different places, the pain r hypochondrium Cramplike pain Spasmodic flat-returned at 3 p. v., < towards evening, when it extended ulent pain in opigastrium in evening on falling asleep into chest, where it at times became burning, which and in morning on waking Strained pain in epigas- was worse in spine in region of callac ganglion, these attacks transiently > cructations of air

Umbilicus -Sticking beneath U , abore and to l of sticking, which extended into chest, then sticking and U Cutting in region Griping in region, whereupon burning in region of spleen Pressure, in pil, in the pain, consisting of pinching and sticking, extended epigastric region, in sides of epigastrium or in hypo- into I side of chest Flatulent cohe above U. alterchondria, intermittent, in region of pit, alternating nated with salivation Pressure in region, then diswith pain in celiac region, as after Camphor. Draw tention of abdomen, painful P near 1 side; painful ing as it walls would be distended, at times with P near r side, < deep breathing and voluntary dispressure Burning, B, pressive and drawing pains, tention of abdomen, > retracting U, with rumbling in

> Hypogastrum.-Sticking in 1 Catting and contracting pains Sticking jerking pain in 1 groin in Pressure; painful in l Sensation in l groin as if a herma would protrude.

> Clinical.-Excessive flatulence, especially in hysterical subjects (compare Arg nit , Zinc ).

Rectum.-Prolapsus from moderate exertion at stool (Lyc, Pod). Spasmodic tension all day. Frequent Abdomen.—Distention, < umbilical region, D. after cutting deep in (Sil). Sharp pain in evening after cuting, flatulent D after cating; flatulent D, with lying down, S P deep in after stool, as from incarcerth hing in neck of bladder, which causes sexual desire; ated flatus (as after a hurried stool) Pain as from anxious D after eating in evening; pinching D blind piles, contraction and screness (Sil, Lyc.), after 563 Ionatia.

stool; P. as from piles, constrictive and smarting, as from touching a sore spot. Crawling as from thread-worms (Sulph); near anus Itching in evening in bed; I in

perineum, < walking.

Urging, with feeling as after a purgative, then several natural stools during the day, U more in upper that it is very small. Paroxysms of pulling tearing intestines (Nux v), stool soft and insufficient, the U. lasts pain in root of penis, < walking, > leaning against long after stool; anxious U., inability to evacuate fixers sacrum when standing (Shooting into penis at every without danger of eversion and prolapsus of rectum (Nux v); shock of cough, like sudden forcing of blood) sudden U., then difficult, insufficient, tenacious, clay- (Cramphke pain in penis) Biting of gland, with colored, not hard stool, frequent, almost meffectual atching Urging and pressure over a large surface U, with colic, tenesmus and tendency to prolapsus, about penis (mons veneris), with violent erection, ineffectual U.; ineffectual U.; ineffectual U. in evening, < middle abending with emission Erection, always on going to domen, with protrusion of rectum (Nux v.); ineffectual stool.

pumpus unem stang and stantang (Asse Internation of prepare as it excornated sting tiching hip), less when walking, cafter taking fresh ar. Junion inner surface of prepure Swelling of scrotum Swelling of margin, as from a distended vein Itching primple, which causes pressure whon sitting Hemior production of the state of the sta into rectum. Sore pain without reference to stool sudden sexual excitement, weakness of genitals and (Also, hip.); pain as from blind piles after a soft stool, external heat of body. Irresistible desire for emiswith sore pain; after mental exertion evenings, painful when walking, < standing, not painful when sitting, with insipid salivation Painless con- pains, then purulent corrosive leucorrhota Menstruatraction Drawing downward towards anus Crawling tion promoted, delayed; scanty, black, offensive, disburning Itching

Clinical.—Fisures of the anus, without constipation, with caute plan shooting upward Prolapsus and, with sharp stabbing pans shooting upward With the symptoms of the rectum and arms there is frequently spasmodic contraction of the anus, can be suffered to the stable of the symptoms of the rectum and after stool. Bleeding hemorrhooks, with the characterisate shooting pains. Violent inching of the sum caused by wellings, which produce most violent services symptoms, even contrained in the symptoms of the sy

Stool.-Diarrhea, frequent Thin, involuntary, with difficult, and yellowish-white Yellowish-white Fre-

Clinical.—Darrhea from fright or emotional excitement, especially from graf, with great urging Distributes annihilities with great urging Distributes annihilities Nix Y, it is offen indicated when there is almost constant desire for stool in the aldomen, but no stool follows Painless diarrhoa, with much morning of fasts in the bowels, but howguts on in a child by fright, the 'diarrhoas had lasted for several years and had resusted all other treatment (compare Agn in), 'dels, etc.') Alternational conductor treatment (compare Agn in), 'dels, etc.') nations of diarrhoss and constipation

bladder, < walking and eating, > when urmating just so much easier Inspiration is slow, expiration Sharp pressure upon bladder after supper, as from rapid, I. slow, he must draw it from deep in abdoincarcerated flatus Discharge of much prostatic fluid men Short respiration alternates with long, light while urging at stool. Stitches in urethra when walk- with violent. Breath fails when walking, and if he Ciliacal.—Nerosaspanse cited by cough in soratching and seratching and seratching tearing; seraphing tearing in middle in evening when stating Biting burning in large of the cough, which becomes attremely annoying and forepart of urethra when urnating Crawling in burning in limit of the cough which becomes attremely annoying and forepart of urethra when urnating. Crawling in burning, somotimes with affection especially of the uters or overse, of from woma. Stitching. Itching in forepart of urethra Frequent miduration; of waters urbne (flash ultran human). ing: 8 in forepart after dinner, ending in tearing stands still, he is attacked by cough micturitien; of watery urine (fiels.) Urine burning passages full of mucus Suking in l; in r when not in morning; (B. and dark). Urine lemon-colored, breathing; in side in region of last rib, when not with white sediment. Urine turbid

Clinical.—The urine is very much increased, not scanty, with hysterical symptoms. Retention of urine after confinement. Incontinence of urine in women and children

Sexual Organs .- Itching in bed about genitals and on pens, > scratching. Penis retracted after urmating, so that it is very small. Paroxysms of pulling tearing

U., c eating, with desire in upper intestince (Nux v)

Auu.—Blind pide, with pressure and screens in A propuce, with ulcerative pain and utching. Sore pain on and return, punjful when stilling and kanding (Asse internal propuce as if excounted Biting tehning techning techning terms.) Contraction sion, with relaxed penis Profuse emission at night

Leucorrhœa Constriction of uterus like laborcharged in clots Lasciviousness, with prominence of clitoris, weakness and relaxtion of rest of genitals and

Clinical.—Morning stekness of pregnancy, with weak, sinking feeling in stomach, > eating Labor-like pains during pregnancy brought on by emotional actionent. Nervous spasms amounting almost to convulsions during labor Suppression of amounting aimost to convuisions during innor Suppression of meness from graf, with the peculiar mental symptoms of the drug Dysmenorrhoa, with great bearing down, menese dark. Neuralgia of the ovaries Menorrhagia in a woman of 62 years, brought on by sudden grief

flatus; T, frequent, small Soft, after eating Hard, Respiratory Organs — Tearing in larynx, < swallow-then thin Slimy Acrid Copious Large and ing, breathing and coughing Scratching in upper part of larynx in evening, as from heartburn, Piococution in larging to hacking cough in evening after lying down (Sang, Sil), not > cough, > suppressing cough Inability to talk loud Desire to cough in evening on falling asleep Short, frequently dry rough, as from feathery dust in pit of throat, not > cough, < allowing himself to cough, < towards evening, short forcible C in evening from sudden interruption of breathing in trachea above pit of throat, hollow dry ('in morning on waking Difficult expectoration from chest, E from chest, yellow, of the odor and taste of old catarrh Urinary Organs .- Scraping pain in region of neck of Inspiration impeded as from a load on chest, expiration is

breathing, rhythmical with pulse, in nipple on deep

inspiration, with flatulent movements in abdomen. ing in wrist and fingers; on wrist in morning after peding respiration, and oppressed respiration, with on motion pressure in pit of stomach, < inspiration and suddenly changing to sticking in pit of stomach Throbbing in r

ing tearing in nape Tearing in nape as if strained I knee Knee stiff after ascending steps on moving neck Sharp pain in cervical vertebrae in

Throbbing in sacrum

Extremities.—Jerkings on falling asleep (Cham) meal, as far as above knee in evening when sitting Tonic spasm of all, like a stiffness Isolated twitchings. Sticking beneath malleoli on motion Pressure in Sticking about or above joints, burning S in external 1 ankle (with internal tackling), > tremulous motion prominent parts of joints, with itching Sprained pain of foot; intermittent P. above r external malleolus

legs Crawling, asleep sensation

elbow Pulsating drawing extending from upper arm of ball of heel when walking Pain in upper part of Bruised pain in head of humerus of side toes from pressure of shoe. to lingers between pain in need or named to so the second pain in the lies in morning in bed, > lying on other side or upon back, B pain in head of 1 H in the second pain in line second pain in line second pain in line second pain in line second pain in muscles of humerus, if arm hangs down or the second pain in muscles of humerus, if arm hangs down or the second pain in muscles of humerus, if arm hangs down or the second pain in the second pain

Jerking in forearm as if a mouse were crawling under skin

inspiration, with listuient movements in abdomen, ling in wrist and ingers; on wrist in morning stare Pain at both sides of stermum in morning as if ribs waking Paralytic pain on 1, wrist as if sprained, rubbed against each other Pain in sternum as if Drawing in r carpal bones. Stiffness of r. wrist and betten, even caused by touch Pressure, in 1, then r, if cheing as if salesep Yellow hands. Sticking on touchthen in ankle, in 1, then sticking in r; behind stor-ing shar on hand Cramp extending to middle finger mum in evening, in middle of sternum, it on back, and forth of index in evening after lying of the property of the propert as with a sharp instrument Tensive pain across on down Sticking in last joint of thumb. Tearing in as with a standing throught, T pain in forepart if when strangitiens up. Oppression, after midnight, im- bering Sprained pain in metacarpal phalanx of index

Lower Extremities .- Totters when walking, falls Fulness casily and stumbles over slightest obstacles Paralytic Anxiety, with pressure waking him, he must often stiffness and jerking. Sticking in hip-joint, and knee, breathe deeply and can only sleep after an hour from 4 to 8 A M when walking, on moving leg Bruised pain in posterior muscles of thigh when sitting. In-Throbling in The Heart and Pulse—Sticking in precordial region on termittent deep internal pressure above 1. hip, violent expiration Palpintons, after noonday nap, during deep P in middle of 1 thigh Thigh and leg fall asleep dunner, when in deep thought Pulse accelerated, when sitting after cating Knees crack Knee drawn and small, slow and small in afternoon upward, proventing walking, > sitting Knees give Neck.—Swollen glands Sticking in nape Stick way from weakness Sticking on inner side beneath

Cramp in calf in morning in bed on bending leg, > morning in bed Painful pressure upon neck above 1 stretching or pressing it, C in calf when sitting at dinmorning in bed trainful pressure upon neck above a streening or pressing it. C in cast when sutting at units shoulder Schfines of nape (Sti)

Emaciation (Nat m, Sul.), ending in delayed, with feeling as if anus were drawn up into marasmus, of glandular tissues (breasts, testicles, thyreturn Urnevery yellow, and smelling like saffton. rold gland) Dropsy Extensions swelling of whole Respiratory Organs.—Aphonic disturbance of voice body (Arsen) Stiling in bed, and restless Indolent in Cough from dryness of throat, C on going to bed, all movements A kind of catalepsy Convulsive with wheering from mucus in throat Smothering movements, of arms and legs, and head drawn backward, almost convulsed when the pains are intense. sensation Respiration irrigular Chest—Statking in r, extending to lower angle of scapula Pain in 1, sharp, in r, ulcerative, in 1 them Trembling; < arms from lesst movement, breast, to r of imple at night, then gramping at base and out of breath Restless moving about, with of heart, next day aching in 1 breast Soroness on, sleeplessness, so that she was taken to be insent aking a long breath, S in lungs, sore pain opez of Hysteria. Nervous condition; an internal agitation, r lung, on breathing sensition as if one observated surfaces; as from bad news or remorse after a quarrel, with mare as more and the Pading in lungs as from a heavy odd.

neck, arms and body. Rush of blood to head and General sensibility increased Takes cold Restlessness (Arsen); in morning, with anxit touched Pain along spine; along r side of dorsal lety Aversion to sitting still. Weakness (Arsen.); in vertebre, in lumbar region, with weakness and strein- afternoon, after a short walk, with feeling of fasting, but no hunger; after dinner, with discomfort; during Extremities.—Pain in l arm and l. leg, < lower menses; during the passing away of menses; after half of tibia and fibula, then extending into foot restless sleep, with craving for something reviving, Brussed feeling in I arm and leg, as the pain increases temporarily > a cordial or a little nourishment, but the muscles feel ulcerated Sticking in I shoulder; delay in eating causes malaise, drawings and often 587 Iodum.

then of organs of deglutition and respiration.

Clinical.—Cases requiring Iod., when not febrile, are apt to have great appetite, but rapid emaciation. It is indicated in numerous wasting diseases in scrofulous patients. Mollites continue Lymphatic tumors in various parts

answered irribabity, during digestion, from noon justifering cutting stitches in 1 extending towards extended the control of t and taking no interest in anything unable to 6x her around r, passing from inner canthus to joint of jaw thoughts. Anxiety, and depression, busy with the Pain, in 1 and inner canthus, as from sand Weak present rather than the future Fright, and vexa- feeling as if sunken, < afternoon Fear that from every trifle some misfortune Sticking in upper part of 1 ball would arise. Apprehension after manual labor, > Lids red and swollen, and nightly agglutination. swellsitting, A. if he does not eat every three or four hours, ing and violet color of upper, leucophlegmatic S R. yet he dares not eat too much. Aversion to work Lively and talkative Sensitive; and easily moved back and forth of lower lid Itching in canthi to tears. Mild, scrupulous and fimid, with blunted sensibilities Thoughts fixed; troublesome and un-reasonable mental impressions easily developed into fixed ideas. Sluggish, but inclined to mechanical labor It is difficult to collect his senses, and he is irresolute It constantly seems as if he ought to remember something, but he knows not what, he remembers nothing Feels unfitted for anything Stupor.

Clinical.-The mental condition of the Iod. patient is generally one of despondency, but during fevers and wasting diseases we often meet with excessive irritability and sensitiveness, much like that found under Sul.

warm air when driving lar or waixing rapidly, as found hearing; required some time to understand what from a band (Sulph); sudden, < r temple, internut, found hearing; required some time to understand what tent < 1 sude towards forehead. (Influence, was said to him tent, < 1 side towards forehead Confusion, with averston to earnest work, C at 9 AM, changing at 10 to Clinical,—Chronic deafness, with adhesions in the middle pain, > noon; with pressure in r half of forehead, ear or granular enlargement, deafness, with chronic catarrh of the making thought difficult, becoming an intermittent pann, < temples, > evening Heaviness Feel. Mose.—Scab in r nostril More open than usual, ing as if not right Throbbing on every motion wide open in morning and dry, almost all day stopped, Congestion, then pain Vertigo, in morning, with smell almost lost. Itching sticking in forepart of sepweakness; on rising, on quick change of place, < tum Pain in lower part on blowing, without cory/a. quick rising from a seat, on rising from bed and Stoppage Sneezing, without catarrh, whereby nasal walking, then unconsciousness; tending forward

sharp pain in l. upper part Pain, in a spot above root yellow mucus (Puls) Coryan, stopped, < evening, beof nose (Ign), suborbital; above eyes towards evening, < coming flient in open air, with nuch expectoration, flient, noise and tall, and in vertex; > sweat, with confusion like water, flient, with much energing, midden, riolent, of head, then violent hunger, - dinner, externally, with lachrymation, pain in eyes, then violent cough and as from suppuration. Bruised feeling in Iran, with nawes, difficult, almost wheesing respiration, feeling powerless and paralyzed feeling in whole body, < as of largne were constructed cate nally. Bleeding on arms, necessity to lie down, eructations, sensitiveness blowing. of scalp to touch, next day confusion of head and painfulness of brain on motion. Throbbing

Tearing in l, then r temple Stitches in vertex reading in leading in least a standard with force, Pain in vertex; on l side. Tearing in r side above message (c. compare Ars.). I selected and chronic catarrisis, forchead Dawing pain in l side, extending into teeth; D. pain in l. upper part, extending into temple

pain in stomach, physical and mental; so that sweat in r, with occasional pain in forehead; buting sore breaks out on talking Collapse, with sunken face P. in O. above r ear, extending backward in skin. Inability to stand Faintness. Paralysis of limbs, Hair falls out

Clinical.-Persistent headaches, with vertigo on active exertion, or congestive headaches with vertigo in old people Tubercular meningitis.

Eyes.-Red; and glistening, protruding Whites Lymphatic tamors in various parts

Mind. — Clouded Dehrium Excitement, with particular with injected vessels Sparkling and phaviness, indolence and ill humor; E. in afternoon, black rings flyfamed; from taking cold; with tension sleepiness in evening Illusions of sensation Sat all allow with the rhead leaning on her hand, and hardly dissolomation under E Sometimes fixed, sometimes when the content of the con Lachrymation Pupils dilated. hid spasmodically looped into festoons Twitching

> Vision — Disturbed Dim, and manifold Saw nothing but the white paper when reading print, when at the end of a phrase the beginning of it was visible Flickering, of statches when sewing Dark rings float down at sides and near visual axis. Of snarks Fiery curved rave shoot sideways from visual axis. near point of vision, especially upward By day objects seem illuminated by a flaming fiery red and almost blinding light, and artificial light in evening was intolerable

Clinical.-A valuable remedy in inflammation of the iris,

Ears.—Tearing in fossa beneath r and in neighbor-Head.—Stocking at times Aching, in forenoon, in ling parts of neck Aching Ringing Roaring warm air when driving far or walking rapidly, as Noises in r as in a mill Sensitiveness to noise Dif-

mucus is thrown far out Increased mucus, with Forehead -Tearing above I eye and in temple, stoppage, but without catarrh Blowing out of much

Clinical.—A very valuable remedy in acute fluent coryza, the discharge is hot, the nose becomes sore, headache at root of

Face.—Red; in evening Reddish-purple. Yellow. Sticking in occiput, > lying down. Pain in occiput, Pale; and sunken; and drawn, with blue line; pale, before 11 Am., rest, < motion of body, changing at yellowish or greenish. Wan Collapsed. Annualed; 4 xm. to enfinish of head, > 7 xm. in under surface; land excited, anxious. Melancholy expression. Pecu-

colon; or in attachments of diaphragm; extending to Scanty and red U; S, dark reddish-brown, with spine. Heat; in morning. Irritability, < region of strong odor of iodine; S. and light-colored. Biting corstomach, beginning as warmth, then cutting Uneasi- roding U. U. contained albumen; contained iodine ness, < night. Straining downward, then urging in rectum to evacuate gas and freces, then relief.

Distention of upper A lasting from dinner through digestion, with sharp pressure here and there as from flatulence. Pain between pit of stomach and umbilicus Irritability in region of stomach and in small intestines, less a pain than a moving about, then tense sensation Inflammation of liver, with pain, hardness, swelling, constant fever, dry tongue, restlessness, little sleep, small, rapid pulse, and on rusing from bed faintness L. hypochondrium hard and acutely painful to pressure (Ceanothus) Sticking in hepatic region, in forepart beneath r. ribs on inspiration, often recurring on deep breathing, in I hypochondrium, as from mear-corated flatus. Punching in hepatic region, with cut-ting Pressure in r. hypochondrium, with pain on touch; sore P. in I hypochondrium

Incarceration of flatus in 1 side Sticking in sides Cutting in umbilical region. Rumbling in site of an in I side of hypogastrium; jerking S above arch of pubis Burning tearing near l. hip; bubbling tearing in r side close to penis. Pain on r side close to penis, P near r hip; in r groin, in hypogastrium after each morning stool, which was rather hard than soft, paroxysmal, in H, < sitting, > stretching

a natural stool Burning pain in R Burning in A. in evening (Sul), B. after stool Itching in A., as from thread-worns, frequent, with smarting and itching. Pressure in R in evening in bed Frequent urging and frequent liquid stools, ineffectual U, easy stool only after drinking cold milk

Stool.-Liquid, reddish-brown, with colic and urging; of watery, frothy, whitish mucus, with griping Crawling in larynx in morning in bed, > hawking and about umbilicus and pressure on vertex Diarrhaa, excessive; profuse, bloody, mucous, bloody, scanty, region of tracked, with frequent lancinations. Rawness in in violent attacks, with violent colic. This and air passages in morning on rising, with dryness Irricopious. Soft; frequent, whitsh; and essy; and frequent, then burning in anus. Pasty. Constipation norming. A fatiguing whisper. Voice deep, V. Hard and difficult Difficult; and infrequent Containing much clear blood. Of peculiar odor and vibration of cough early. Frequent; and copious

Clinical. - Chronic exhausting diarrhea, stools frothy, whitish. Fatty diarrhos from disease of the pancreas.

when not urinating. Constant desire, and constant frothy mucus, sometimes of a ropy fluid Respiration dribbling Polyuria. Involuntary micturians Fred difficult, operatity impuration, R took Dyspines in quest and copious M; F and scanty each time; F, alternoon, suiden D, with pain or deep impuration, with urging; F, urfine copious brighty selfow, watery: rapid and violent locating of heart, and appd, small Urine suppressed. Urine dark, turbid, at times pulse Oppressed respiration on slightest exertion, almost milky; dark yellowish-green Urine thick, with palpitation and vertige Rapid R. Short R.; almost milky; dark yellowish-green with dark sediment; and copious

U amber-colored, sp. gr. 1038, acid, flocculent sediment, amorphous, acetic or nitric acid caused a conous amorphous precipitate, soluble in excess of nitric acid and from heat, on subsequent cooling a precipitate of yellow halberts of uric acid mixed with granular matter, no precipitate on boiling, no albumen, much urea, good reaction of iodine combined, not free, and of indican, next day sp gr 1025

Clinical.—Diabetes, with canne hunger Incontinence of urms in old people, with semile degeneration of the prostate

Sexual Organs.—Irritability Acute drawings in forepart of penis Frequent tickling of glans, T on and beneath glans Itching of glans Cutting drawing in corona glandis Priapism Erections without lasciviousness, violent and continual E, feeble E, slow E Burning pain in a spot on r side of scrotum Testicles diminished in size and power, D in size and consistency, with impotency, double its former size, one retracted to abdomen, vigorous activity, frequent inguinal hernia in morning on inspiration Stacking dragging towards T from 10 AM till evening Desire increased (in men) Semen increased Emissions, with dreams after falling asleep again, then weakness

Activity of uterus and hamorrhage from it A woman became barren Menstruation irregular, too early, too late, with vertigo and palpitation, retained, M that was present ceased

Clinical.—Enlegement of the sphere, with adivation and the control that th

Respiratory Organs.—Œdema of glottis Increased mucus in trachea Sticking in larynx, on swallowing Pain in larynz, with desire to cough, frequent P in region of L and sublingual glands, with stitches, pressure in region of L, not exactly painful, extending to pharynx, causing swollen sensation in the parts, even in tonsils coughing, with tickling and salivation Smarting in region of trachea, with frequent lancinations Rawness in broken; tremulous, jerky, weak Aphonia, want of .

Cough in evening, irritation to C from tickling in throat, croupy C.; dry (', dry, deep, C, with effort, so that she almost vomits, > expectoration of mucus, short, from tickling in throat, also with thick yellow Urinary Organs.—Sticking in orifice of urethra expectoration and good appetite, but sickly expression. Itching smarting in orifice of U. Cutting in orifice Copious bloody expectoration Spitting of white Increased U. slightest exertion. Breath lost Inarticulate sighing.

Clinical.—In croup, inflammation of the larynx and traches, looked as if convulsions would come on. Stitches in with hard croupy cough, difficult breathing and fever indicate; shoulder-points even during rest. Rheumantee pain in the drug. A large number of case of "membraneous" croup have; I shoulder "Descript transmit in the modal-till adawith hard croupy cough, difficult breathing asia ever inscars the drug. A large number of case of "membranous" croup have indicated in cases in the early stage with more or loss fover, with dry skin and a very dry cough; great difficulty in respiration, it follows closely after Acon, if Acon has been given and the patient is not improving, or if Acon has been given and the patient is not improving, or if Acon has relieved only the residences and extreme anxiety but not the cough, the patient is still dry and hot and the cough is still croupy, then give lod, it is, however, rarely and the ouigh is still troupy, then give lod, it is, however, rarely useful after feeble existences than 8 desappeared or if the patient perspires freely. (this stage, toggsther with the attacks of sufformers of the patient of the stage toggsther with the stacks of sufformers to the stage toggsther with the stage of the stage toggsther with the

Chest .- Atrophy of breasts Milk diminished Ratr on expiration. S in r near pit of stomach on in- pressure when stretched. spiration Tearing in r parietes Burning sticking tension in parietes. Sore pain in sides when breath-

Clinical.—It is one of our most valuable remedies for pneumons, in these cases it must be carefully differentiated on the one of of Acon and the stacking panes of Bry, but the sitch high fewer of each, like Bry, it is indicated when hepstration has taken place (contraindicaling Acon), and the cough is dry, it was formerly suppressed that left-saded pneumonis indicated lod, but it is now known that it is equally useful in pneumons of either sade, it is particularly useful in the pneumonis of excitient subjects, super-call in pneumons at the apex. Philass pulmonaris, with rough. voice, dry cough and night-sweats.

Heart.-Sounds weak, apex beat and pulse could not be felt Precordul anxiety caving constant change of position Pressure in region Squeezed sensation Palpitation (Nat m , Ars , etc ) , after menstruction , till sleep, : movement, spasmodic, as far as umbilicus, < pit of stomach Rapid action

Clinical.—Valvular manificiency, with periodical attacks of pain about the heart following typhoid, dilatation of the r side, etc Periodicial complicating pneumonia Hypertrophy of the heart

treniulous, with long intermissions

Neck and Back -Tearing on r side of neck Rheumatic pinching in N near 1 shoulder, < touch, > instead of former yellowish tint. Redness of neck and eructations, but returning Rheumatic tension in r chest as if congested Red burning spot on nose be-side of N Constriction of N Confusion in back neath eye Scratched spots become dark brown and extending through nape into head Sticking in scap- the ulcerated places remaining after furuncles become ule on lifting anything, S in small of back Pain gangrenous. Various eruptions, from erythema to under I scapula, in small of B during menstruation, morbus maculosus. Erythema of face and inflamma-in coccyx and sacrum, now increasing, now decreasing, tion. Itching elevation on nose. Itching iodine ex-Drawing in region of r kidney with pressure.

l shoulder (Drawing tearing in the morbidly elevated S.) Arm and part of hand swollen Jerking of arms, hands and fingers Twisting of arms, < r.
Tearing in arms after slight manual labor Pain in bone on outer side of arm, waking and preventing sleep again, < lying on it Paralytic weakness of arms in morning on waking. Tearing in l. elbow. Pressure in bend of I elbow. Sticking in r wrist when lifting or grasping anything Hands red. Hands tremble Tearing in metacarpal bone of r. index. Pain as from a blow on metacarpal bone of index, < touch Ulceration of nail of l index caused by a slight prick near nail. Tearing in l. index and middle finger, in knuckle of r little finger; in first joint of thing of mucus, with rawness beneath sternum and r. thumb Tensive pain in finger-joints as if they heaviness on chest Pleurisy Sticking in middle of would break on bending, with swelling and pain on

Lower Extremities.-Rheumatic drawing, < thigh and knee in evening in bed, < motion, with grummg and on touch Sudden pain in r, < inspiration, bling in bed. Lassitude as if stiff, so that he could Pressure deep in r , P , > open air and hot sunlight, with scarcely stand Pressure in 1 nates, as if in ischium sticking and frequent dry, rough cough, P on C, at Twitching in muscles of thighs. Thighs sore where times changing to pain and often causing deep dry they rub in walking (in a woman) Intermittent tearcough Constriction, then pressure, in afternoon sticking between I hip and articulation of thigh, < moving Together the properties of the like cramp, only when sitting Tearing on I knee, on outer side of hollow of r

Swelling of legs Tearing on sides above malleoli. Pain in tibia as if suppurating Leaden heaviness of legs Leg falls asleep easily Cramp of ankle at night, with jerking in it Sticking in malleoli Rapid swelling of feet and soles, so that walking was painful. Cramp of feet Sharp pain in inner half of r. heel. Leaden heaviness of feet Sticking tearing beneath nail of 1 great toe Cramplike pain extending from middle toe to tarsus Sudden pain in r great toe, next day passing to other toes, great toe less sensitive, then cold, then black, with sudden typhoid fever, the gangrene rising to thigh, with horrid pains, leg black and cold, when the woman attempted to turn in bed the tibia and fibula broke, and then the limb dropped

Clinical. - Articular rheumatism, sometimes with hot shiny Pulse.—Articular rheumatian, sometimes with hot shiny welling of the joints (Br) with great welling, sometimes with percardite, and the start, and small, scholar pulse. The start of the properties of the point of the properties of the properties

Skin .- Pale Dingy and livid Brown as if smoked. anthem, > sweat. Round, burning, itching spot Extremities.—Trembling, with staggering. Heavi- between r. thumb and index, with two whitish pellicles ness in morning Numbness Position of upper E. upon it. > rubbing. Itching papules on an old scar. Skin of arm tight, glossy, then covered with miliary [in drunkenness, in evening when walking in open air, vesucles, with hest, itching and smarting, V. ruptured with stupefaction of head by any considerable motion, discharge of much water, [of O and empreshiotones symptoms of the child stretched most from inside of elbow, < bending arm. Furuncle out stiff; then spasmodic contraction of arm. (Sticking between scapule, with inflammation of surrounding here and there, caused by motion, ending in burning) parts (with loss of appetite and sleeplessness), after Throbbing pain in head and nit of storage and parts of the storage and painless ulcers, which had knots, leaving deep and painless ulcers, which is if he had been in great heat or had perspired prohard know, leaving deep and paulies deeps, with a selection were awakened by anxious dreams, with blee day and night tabung on back above r hin heaviness of head as if brain were compressed. Sen-

Sleep.—Frequent yawning Sleepiness Sleepless ness, and indeness, at night, but weariness by day; with profuse ing. Stiffness sweat; for eight days, with restlessness and delirium | Mind.—Cres and screams constantly (a child), sticks its Sleep broken by sudden starts Restless sleep, with fists into its mouth, face pale, body rather cool Whinanxious dreams; with unpleasant and fatiguing dreams, ing, must be carried Impatient. Ill humor, secretary then sleeplessness, on getting to sleep nightmare and everything and demons that others shall not alue anothing: hallucinations Sleep bad, with nightmare and electoreause his business does not proceed fast enough, tric shocks, which wake her with a start. Waking and no desire to talk, inclined to weep, and quiet, re-

early. Nightmare Dreams; vivid, from which he wished courage to wake but could, not, then weakness after waking; often at trifles and again just as easily can be quieted anxious, restless, anxious, of dead people, unremen. Scrupulous, fearful, thinks trifles are very important, bered, with sound sleep, every alight, of swimming, I longing, but he knows not for what Pleased with walking in mire, that her daughter had fallen into a nothing Averse to everything Disinclination to brook, etc.; of having unsuccessful intercourse with work, to literary work, ideas fail him Slow flow of men, no emissions, that he was about to have connec- ideas tion with a man, but for some unknown reason the emission

fever, with constant diarrhosa on the days free from sleepiness Confusion Fulness, < cerebrum fever Irregular febrile movements Heat, after tigo, on walking, only on walking, < turning around, wine, with excitement, but feeling as if he would soon with disappearance of thought wine, with excitement, but feeling as if he would soon with ussippessance or incomparable on the second tried, in flushes Fever, with dry skin, weak. Forehead —Sticking on touch, S above eye on the second tried in flushes the second of miscoles shooting, with swellen sensation. Tearing, < stooping, with swellen sensation. carphology and more coldness than heat of skin ing, < touch Boring Pain, with heaviness of eyes, Flushes of heat in head before menstruation, with pal- P. extending to vertex, pressing outward P in 1 side, pitation and tension in throat, which became thick | < moving head; burning P, < touch Heat of hands, in r scapula, flitting across r thigh, of skin, of skin in evening, with dryness Sweat at ples and in a spot over orbits, > pressure and closing night, profuse, profuse S on forehead, viscid S, cold, eyes Pain under 1 temple as if it would burst contained iodine, general, sour, towards morning, then (Constriction in 1 temple and above orbit) Pain exweakness of limbs, acrid on teet.

# Ipecacuanha.

veneral Action—Its most marked effects are ob-served on the gastro-intestinal and respiratory tracts, it broduces nauses and vomiting (one of its most con-produces nauses and vomiting (one of its most con-stant effects), considerable increase of the secretions, seekers are considerable increase of the secretions, seeking stream in the upper portion of the untestinal canal. "unting and also dysenteric symptoms It greatly increases bronchial secretion, causes pulmonary engorgement, towards temple, on opening r lids, which were swoland even hepatization, it also produces emphysema len, copious gush of tears, conjunctiva of bulb infilwith intense congestion of the conjunctive, lachryma- ing, pupils contracted, reacting but little in the light, tion, etc.

Nux v., Phos.

refused to heal Feeling over whole body like fleating to the base of head as if brain were compressed bites, day and night. Itching on back above r hip, heaviness of head as if brain were compressed Schemen and heaving the statement of the base o Sleepless- ness , and indolence, depression of spirits and shiver-

> tired in himself, scorning everything, and sinking of Exasperated at slightest noise

Head .- Sticking, with heaviness; paroxysmal S., dream changed before the act was accomplished, no then pressure Tearing in morning after rising, > atternoon Aching; tensive Brussed feeling in brain Fever.—Coldness; alternating with heat, cold nose, and skull, prereing through skull into root of tongue, with limbs, limbs, and trembling of them, upper limbs, namea Drawing here and there Feeling as if H. hands, and clammy, feet, feet at night Quartan and torchead were compressed. Heaviness; with

Pressing-out, almost boring pain alternately in temternally on parietal bone as from a thrust with a dull point. Sticking in vertex Feeling as of a band agross the top of H from car to ear, with headache, < moving, and throbbing pain behind 1, then r ear A tincture is made of the dried root of Cephaelis Ipecacuanha, Pain in occiput and nape from moving head, tensive P in O and nape, extending to shoulders

Tearing, < r, extending Eves.—Inflammation Its cough is frequently spasmodic. It produces, in trated, tunica vaginalis swollen, cornea dim as if infilsome cases, violent neuralgia of the eyes and head, trated, small depressions, iris congested and dull-look-Allies.—Puls., Ferr, Eupat perf., Mag. c, Cact, appeared in I eye, with nausca Raging pain, r, waking at 3 A M., with much lachrymation and loss of Generalities .- Awkward and knocking against every- vision Biting and pressing pain, < r., < light, which thing. Swaying to and fro of body to either side as blinded him, conjunctive red and chemosed, lachry mation, vision lost, with 1 eye he saw flery rings with in abdomen, empty. Mausea; with empty eructations

Clinical.—Granultunes of the last are reported cured by the neutlation of the dultumes. Subsents inflammation of the cornes, with intense pain and great photophoba. Extremely valuable in partial recognitivities, especially in children inflammation of the eyes, with tearing justs and guides of tears, the contract of the service of the service of tears, the contract of the partial results of the partial results

to occipital protuberance Dull hearing with r, and pressure in it

Nose .- Mucous membrane of N , mouth and throat free vomiting, with some relief, but for three weeks like cough and tenderness of chest Titillation in nostrils Dryness, and in frontal sinuses Catarrh, with drawing pain in all limbs, feeling of dry C, as if nostrils were too dry Sneezing; with thin mucus; violent;

violent, paroxysmal, with cough and expectoration Bleeding Clinical.—Catarrh or acute coryza, with frequent hemor-rhages from the nose, associated with bronchial catarrh, loss of smell, etc

Face .- Pale, sunken , P and puffed P, with blue rings around eyes and weakness Red Yellow Anxious bilicus colic Excoriated sensation in corners of lips when chilliness, but internal heat mounting to head touched and on moving lips

anything, then constant tearing Biting on margin of on back of tongue and on palate as from chewing liver- thread-worms wort or Artemesta diracunculus, which increases saliva Scol.—Diarrhoea, as if fermented. Thin, frequent, bluming extending down throat and bronchia, with with qualmishness in abdomen; (T, with burning dyspinos. Dryness, < at top of escophagus, with stacking in rectum and aniss) Soft Frequent, of from mouth on lying down Taste flat; to heer; (Porraceous) (Lemon-yellow) nauscous T to customary tobacco-smoke, causing vomiting, T in throat as from rancid oil, on swallowing

Throat -Sensation as if he had drunk melted lead. and in stomach, causing rolling about the floor. > vomiting induced by drinking warm water, then asthma Stitches transversely through T into inner ear, S in cesophagus. Soreness, of pharvnx, mucous membrane of velum and pharvnx injected, with many hemorrhagic points Spasmodic contractive sensation, and in chest Dryness, causing inclination to cough, of fauces, with construction of glottis; pain in ce-tophagus as if dry, raw and sore, transiently > swallowing saliva or drink, dry, burning sensation, almost suffocation Swallowing painful, as from swelling at top of esophagus, S difficult, as from paralysis of tongue and osophagus

mation, vision lost, with I eye he saw flery rings with in abdomen, empty. Mauses; with empty cruciations are nanow colors. Tensive pain waking at night, with and sallystion (Cupr. Puls); distressing; with conlar hymation and loss of vision Uncessinos, with vulsive but ineffectual retching, (with hicough) conjection of palpherhal and coular conjunctive. Scald-in after customary behave-smoking, > several stools, the ing lachymation Pupils distret. Pann in balls as if last of which was pasty; (with heaviness in abdordered out of their orbits, with foggy vision Con-men); intermittent Empty retching Yomiting; on uncetve injected Hardand muces in external canthi stooping, with feeling as if he would fall, frequent; Lids, < r , would no Pryness of hisk, with sleepiness of crevything swallowed (Eurl perf.); of food (Ferr., Nux v); of food on stooping, of yellow, green and black mucus Rumbling Sticking in pit Griping Feeling as if it hung down relaxed (Sep.), and appende lost Sensation of emptiness and laxity (Sep.). Warmth; agreeable, with rumbling in intestines

as of the eyecana, amoung mo the nead, with gauses of terms, then the state of the neadest nea Nose.—Mucous membrane of N, mouth and throat jous straining than or instancing symptoms of pregning, rivitated, dyspin-ca, nostrils impervious to ar, I had to direg has often relieved the distressing symptoms of pregning, sit creet and gasp for breath, yellow water ran from etc. Gastree catarth from nyudicous esting or draking, with nostrils, soon changing to bloody serum, mouth and white-catact tongo, or sometimes with perfectly clean tongon, throat inflamed and discharging thick mucus, then Obstinate vonting of blood (Ferr. Pinc.), extremities cold, country to the control of the con

Abdomen.-Distention Griping, clawing G as if grasped by a hand so that each outstretched finger pressed sharply upon intestines, > rest, < motion (Sticking, with burning and sticking in rectum and urging to stool) Colic, with rumbling and with warmth extending into cliest, at times with sticking, flatulent, on coughing P as if obliged to urinate and urine could not pass, as in retention of urine Nausea, with incipient colic Uneasiness Tearing about um-Cutting about umbilious, with shivering, C at and livid Biting on lips , on margins of lips and on side of U , < touch, with white, frothy saliva and ditip and sides of tongue, with watery salivation and lated pupils, C about U as before menstruation, with touched and on moving lips in umbilical region, pressure Sticking in 1 hypoMouth.—Paroxysmal pan as if teeth would be torn chondrum; in 1 flank
out, P as if hollow tooth would be torn out on biting; region of pit of stomach

Anus.-Sticking; S, cutting, burning pain on martongue Burning of tongue and upper lip Sensation gin, as in obstinate hemorrhoids Crawling as from

rawness Sensitiveness Salivation; and obliged to greenish micros (Arg int, Mag c, Merc dul, Puls) swallow constantly; with nausca, thin, saliva runs Bloody; covered with bloody mucros Offensive

Clinical.—Grees, muous diarrhora. Dysentery, in some cases with dark, pitchlike blood. Autumnal duarrhors, green or farmented high-relow stools. Choleras infantum, shools light green, with nusses and vomiting. With the diarrhora frequently flatilent coolie and a dattened crieated feeling in the abdonest, with the peculiar nauses and rooming of the drug Cholera infantum, with green, fronty acotts, color hand, or the drug Cholera infantum, with green, fronty acotts, color hand, or the drug Cholera infantum, with green, fronty acotts, color hand, or the color hand acotts.

Urinary Organs .-- (Discharge of purulent fluid from urethra of a child, with biting pain.) Frequent desire, with scanty urine (Frequent micturition of strawvellow urine, with burning and urging before the discharge) Red, scanty urine. Urine bloody.

Clinical. - Hematuria, especially from the kidneys, with nauses and cutting pains

Sexual Organs --- Voluptuous itching when standing. Sticking in testicles when resting one thigh over the aralysis of tongue and esophagus other. Twisting drawing pain in testicles. Dragging Stomach.—Loss of thirst. Eructations; with rumbling towards uterus and anus. Menstruction fourteen days too

Clinical.—Menstruation very early and profuse, bright red, with colic and nauses. Threatening miscarriage, with bright red blood and cutting colic Hemorrhage following miscarriage or parturation, with persistent nauses, faintness and gasping for breath Hemorrhage in placents previa

Respiratory Organs.—Rattling in bronchi during respiration. Bronchial catarrh, with exhaustion Dry- non (Ferr); in forenoon, with short breath, as from dust ness of larynx, with burning and scraping Hoarse after eating. Construction from evening till 9 A M , with Suffocative cough; whereby the child becomes stiff and short and wheezing respiration, necessity to open the window without names. Cough, causing inclination to vomit, and goap, pallot, scarcely perceptible pulse and apparent without names. C. from constrictive tacking, extending danger of suffordion, then cough, with expectoration of from upper part of larynx to lowest end of bronch; thick, metallic-tasting mucus. Contractive sensation where part of largnz to lowest end of bronchi, the cough, with expectation of the metallic-tasting mucus. Contractive sensation of the metallic-tasting mucus. Contractive sensation dry C, from tacking in odd art, and after lying down in morning and evening, caused by down and the metallic tasting mucus. Contractive sensation between the contractive sensations and the metallic tasting mucus. Contractive sensation of the metallic tasting mucus. Contracti tion, with pain as if umbilicus would be torn out, heat in face (head) and sweat on forehead, violent and convulsive C

Expectoration of blood (Ferr, Phos, Acon, Cact)

of bronchial tubes (see Calc. acet )

dyspinces and oppression of precordia, generally be Pinching in 1 hip, extending from crest of illum-ginning with irritation of nasal membrane and rapidly to great trochanter Sprained pain in 1 knee, < extending to bronch and all their ramifications, sudden paroxysms, with mability to he down, preceded ligaments were wearied by a long walk. Twitching by tickling in nose and sneezing Suffication (Ferr), suffocative constriction of air-passages and pharynx, in r tibia Pinching in r foot with pallor and anxiety for air (Ferr) Dyspnes (Ferr, etc), in evening, from 10 PM tall 10 AM, > expectoration, with wheezing, and weight and anxiety about præcordia (Ferr), with construction across chest, violent and convulsive cough (Cact), sneezing, till face became anxious and livid, D or sufficiative stricture of chest and oppression at pracordia (Cact ) Difficult breathing, with sense of suffocation and dry, hacking cough Sudden attack of short breath, with wheezing Breathing rapid, difficult, without aid of external heat and tingling in the part, pustules became auxiliary muscles, and noisy, with sharp, vesicular covered with scablike scales, which fell off and left no respiration all over lungs, with loud whistling and mark Formication on calf rales Tetanic convulsions of respiratory muscles imperfect efforts to breathe, cough and vomit, causing indescribable suffering, irregular spasm of all muscles of chest and abdomen, every effort to vomit interrupted by an attempt to cough, necessity to be supported in an erect position, and to have the windows open, > appearance of eruption. Thorax arrested in then heat, then sweat, external, with internal heat, beneath expiration, speech and cough impossible, in the open skin, < sitting in a warm place, C, feverish and air he was able to inspire, sneezed and coughed without expectoration.

Citation.—Spasm of the glottis, with rapid alternations of contraction and relaxation of the rocal cords. Spasmodic asthern could be contracted and relaxation of the rocal cords. Spasmodic asthern contraction and relaxation of the rocal cords. Spasmodic asthern contracting the patent is not so preserved and cold as when require into guaranteements. Broachtist with reast accumulation of mucus, especially in the larger tubes, violent percovans of coupting mucus. Cough, with attentions and contractions of mucus. Cough, with attentions of the rocal contractions of the rocal contraction of the

som. The bloody discharge at close of menatruation was suppressed.

Clinical.—Menstruation very early and profuse, bright red, with colle and assume. Threatening miscarriage, with bright red blood and cutting colle. Hemorrhage following miscarriage or parture of the profuse of the collection of the

Chest. - (Griping [jerking-tearing?] beneath shoulder.) Sore pain internally Pressure

Back.—(Pinching between scapulæ on motion) Cramplike pain shooting from r kidney down r. thigh to knee

Extremities.-Cracking of joints Shocks through catarrhal E; E of lemon-colored viscid phlogm in all when she wishes to sleep Brussel pain in all balls, and traces of blood (Puls) In morning on bones (Eupt perf) Pain in all joints, as if lambs were stirring about after a night's rest from cough, mouth- asleep Pressive and spasmodic pain in hollow of r fuls of mucus were thrown up, looking like a mass of knee and in 1 arm, < touch Drawing pains in nearly transparent worms, but they were real casts humerus and femur in evening after lying down Spasmodic contractions of arms Pinching in r arm Asthma; spasmodic, with constriction of throat and Pain in l. arm near wrist, as if bone were bruised, chest, with peculiar wheezing (Ferr), sudden, with then in r Twitching of lower Weariness of lower walking, > sitting Pain in knee as if tendons and and crawling in muscles of calf, as if asleep Sticking Weariness of feet

Skin .- Erysipelatous eruption covering every part, m fiery circular patches, varying from the size of a sixpence to that of the palm of hand, elevated with rounded edges, with burning (Nettle-rash on forchead, extending into hair and to cheeks) (Tetter on wrist and about anus, itching most in evening and after lying down, after scratching red pimples) Papulæ and vesicles on a deep red base of irregular extent, they became flat, pustular and confluent, with

Sleep .- Frequent yawning; Y after eating, with (instead of the ordinary wheezing) like "holding the stretching Sleepiness, after vomiting, with wearibreath," with sighs at long intervals Simultaneous ness, with lassitude in all limbs Starts up in sleep Sleep with half-opened eyes Sobbing fearfulness during sleep Uneasy sleep, with moaning Frequent waking and frightful dreams Vivid unremem-

bered dreams.

Fever.—Coldness, all night, preventing sleep, C thirsty Shivering at 4 P M , then chilliness without thirst , S, with yawning , S, with eructations , S coldness in limbs as if startled Coldness of one hand, of hands,

and over whole body, with cold hands and feet, as heat increases to its greatest severity sweat breaks out Lachrymation; with burning pain in r inner canthus. on trunk and head, with biting and itching, < neck; H of cheeks, even perceptible externally, without mastoid processes in afternoon, > warmth of hand, redness, (H of lace, with redness of it, without thirst) (Sweat), about midnight

Clinical.—It has been found valuable in intermittent fever, the parazyma chara-ternod by persistent naises, especially with with great them, but he water them is any to be counted, it is to be compared with Eupatrum, Eupat, however, lacks the persist-ent naises of lipe and lipe lacks the bime-pain of Eupat, be-side, the parazyms of Eupat are only partially developed, while those of lipe are perioticly developed, as a rule. (They are very

# Tris Versicolor.

A tracture is made of the fresh root of Iris versicolor, L

General Action -It produces nausea and vomiting. is an active cathartic and diuretic, and stimulates the

liver, increasing the flow of bile Allus -Aloe, Sulph , Sang , Bry , Pod , Phyto

Generalities.—Malaise with the neuralgia Feeling as if he had taken cold, with lameness of trunk and lumbar region Languer, in morning on rising, in afternoon, with feverishness

Mind - Irritable, in morning on waking pleased with everybody and everything, then lively and active Depressed Despondency, thinking that he is going to be very sick, alternating with disposition to laugh at his fears Dulness of mind and special senses Inability to fix mind Memory weak

Head .- Aching, in morning after being in cold air and on quick motion, finchead and irrites, as if top of head pale, and two on r side excornated, afterwards the would come off, cough, with pain in bowels, with rawness and feeling of loose skin extended to throat, depression of spirits and debility, nerious, gastric, in afterwards rawness behind incisors after eating cherries forenoon, stunning, with neuralgia, dull, stupid Ful- in morning Soreness of hard palate, < touch of Hearness, with dulness of eyes and pain over 1 superchary rudge Dulness (resembling vertigo) Feeling as if brain were partially narcotized, then cutting through temples Intoxicated feeling at 7 A.M Diz ach, in back part of mouth and fauces in afternoon. ziness, with pressure in forchead, then lightness of with flow of saliva Burning and smarting of palate head, sudden, sudden, when walking in-doors
Forehead —Pain, over eyes; at 6 PM, and in pos-

terior fontanelle, in evening, with occasional vertigo; intermittent; changing from side to side, dull, heavy (Sulph) Tightness across Sensation of a band across (Carbol ac ), on attempting to laugh and preventing laughing.

Temples -Shooting, through, from r to l part of Cutting through T., with dim vision Sharp pains Pain, in r, then it passed over vertex and behind I ear, heavy

Pam in vertex Boring in r parietal protuberance, causing him to bend head Pain in r parietal protuberance, becoming a hammering pain, < movement, > continued movement, returning during rest Stitching in lower part of occiput. r side. Pain at posto touch, on inflamed base, with red streaks running from one to another, and containing yellow matter. Constrictive feeling in scalp.

Clinical.—Neuralgu headaches are very frequently cured by this drug, they are generally one-aded, are associated with gastric symptoms, as a rule, periodic, occurring every few days, are nearly always associated with blurring of vision and frequently with vomiting; the pain usually begins over one eye.

Eves and Ears.-Eves sunken Conjunctive red. Pressure towards and out at ears Throbbing pain in then tingling. Tender feeling in mastoid process on edge of bone

Nose .- Sharp, raw, excornating feeling in both nares. with constant inclination to blow nose, free discharge of mucus, constant speezing, bronchi similarly affected Stuffed-up feeling in pasal sinuses and posterior pares with discharge of thin clear mucus, snuffing and

sneezing Sneezing Face.-Flushed Appearance of anguish. Neuralgia in r side, waking, < infraorbital nerve, with stitches in two carrous teeth, next day facial neuralgia involving supra and infraorbital and superior maxillary and inferior dental nerves began after breakfast, with studid stunning headache, next day began after breakfast, with malasse and

headache, next day so eness where the neuralgua had been (Bry ) Lips dry and cracked Mouth.—Toothache, in warm room. Teeth sore, and feel clongated Elongated and sore feeling in molars, with heavy pain Swelling of gums on inner side of 1 lower molars Tongue coated white. Tongue and gums feel greasy or slimy in morning Tongue coated white. Feeling of a greasy coat on mouth and tongue in morning. Tongue feels thick at 7 AM Mouth and tongue feel scalded in morning; in mouth at 4 AM, tongue rough and thick Raw feeling on roof behind incisors, < cold or hot drinks, eating, touching with tongue, < onions or cheese, with feeling as if skin of that part hung loose, the ruge of mouth enlarged, tongue or solid food, with roughness, with pain in a defective filled tooth, which felt too long and was tender when used Feeling as if on fire, and in stomand fauces Profuse saliva (Merc ), ropy S (Phyto) drops from mouth during conversation Taste peppery , on forward half of tongue, and acid, acrid T; flat; flat at 7 A M , bad; lost

Threat -Tonsils, uvula and soft palate bright red and larger vessels engorged Rawness Soreness, and of chest; S, < around epiglottis, with raw feeling. hoarseness, stuffed up, smarting in posterior nares, as from a recent cold, increased secretion in nose Roughness, with running of saliva. Burning, in fauces, in fauces during expiration, in fauces, palate, tonsils and back of tongue, < expiration, > inspiration, in fauces on inspiration, extending to tap of tongue, < expiration Heat in fauces, soft palate and tonsils, changing to smarting and burning Smarting of soft palate, with burning and scratching, increasing terior iontanelle On verter, twenty-six pustules tender to fiery heat, spreading over fauces, upward towards nares and far into esophagus, the throat felt three times as large as usual and like a fiery cavern, the B temporarily > drinking water, enlarged bright red vessels on uvula, palate and posterior wall of fauces Swallowing difficult when eating, food sticks in phar-ynx Spasms of esophagus, with inability to swallow, food sticks in throat, with choking and gagging. Burning in esophagus; with nausea.

Stomach—Appetite increased; lost; lost at dinner prolapsed and smarting, abdomen tender to pressure, Frequent empty servications, empty, with pann stomach, if ying pains through the empty, sour; of sour food. Nauses; in evening, obligding him to lie down; at 6 P.M., with empty errotte in lower abdomen (Sulph). Diarrheas, after breaktons. Retching, resulting in little more than forcible fast, then pain in epigastrum; then pann unabilical eructation. Vomiting, of sour fitted. Rumbing, with region, with coloc; with rumbing and cutting in uneasiness, lumpy, bown, offensive diarrheas, with hypogastrum, sudden, after supper Mushy, copious, little pain Pinching in pit. Pain before breakfast; light-colored Papescent, with rumbing in abdomen, after disrupting cold water: taxisting P. Hearthurn with nan in unpublical green. P. after drinking cold water; twisting P. Heartburn, with pain in umbilical region; painless, with ruma hot cramplike sensation using from pit Burning bling, yellow, painless, with rumbling, also large Condistress in epigastric region (Sang.), cold water does not stipation Hard, lumpy Greenish-black, twice in one reach it, in region of pancreas in afternoon and even- day ing. Distress, in epigastric region, in epigastric region, with restlessness and fright, with copious watery stool, then > nearly two quarts of water tinged are the property of the property ness, > empty eructations Uneasiness in pit, with rumbling in lower abdomen, increased till lower part of sternum seemed to protrude

Abdomen - Rumbling Fetid flatus, in afternoon Flatulence Neuralgic pains Griping at 6 P M , with in urethra after micturition , afterwards frequent and soreness of surface; with several light, acrid stools, copious micturition, scanty and high-colored, S, red, with profuse light-colored, prostrating diarrhora then burning along urethra, S and of strong odor, Pain, in afternoon, > night, > discharge of flatus, in dark and thick in morning, passed without force and evening and night, > bending forward, with loss of after straining appetite and restlessness at night, with heat, soreness, | Sexual Organs.—Glans swollen and red Emission as after cold, and premonitions of diarrhea Nausea at night, with amorous dreams Menses three days like beginning of seasickness Faintness as if intes- late and scanty tines revolved in wrong direction

straining, belching of wind, with commotion and pectoration of phlegm in morning. Short breath rumbling above seat of pain Pain above crests of ilia, along posterior part of r crest, P in r, then l ing Cramp in I side under ribs, in 1 side like a flank in atternoon, with urging to stool

Gillateni.—Platulent colic, with constitution, especially in-cludern Demoproment of the liver, with yellow eyes and skin, numbross of r, arm, names, headsche, etc. Blitous colit, almost mocessant vomiting of extremely armi substances, with sorross over the liver. Soreness over the region of the liver, with cutting pans and vomiting of bills, which is very acred and burns the

Rectum and Anus.—Burning in anus after stool (Aloe, Sul) Anus sore in morning, as if points were sticking in it (Ign., Asc). Distress in anus as if prolapsed. Disposition to stool, with burning in anus Urged to a second stool by sensation as if wind distended rectum, > discharge of a little greenish dark and labored water, with burning in anus (see Aloe and Sulph )

Stool.-Frequent, watery, with burning in anus (Bry.), disposition to strain and bear down (Sulph), pain on sitting down Weariness Pain behind I scapula no epigastric and umbilical regions, rumbing in ab-domen, faintness, knees weak and trembing, some shrugging of shoulders and fessire to whist head from times with blood and mucus, once with water and side to side, 8 old for latissimus dorsi on motion. Tearundigested food, at last mucous membrane of anus ing in lumbar region on rising, so that he can become

Stomach - Appetite increased; lost; lost at dinner | prolapsed and smarting, abdomen tender to pressure,

symptoms,

Urmary Organs -Cutting in urethra at beginning of Clinical.—Nouses and romining of pregnancy, with tenders and tiching of gentials, the I < scratchness over the stomach and profuse ropy salvas (see fp) Nauses, in Strangury Michinican frequent, contous, limit burning dustress in the stomach, vomiting of food, beadache, etc [comp Sang] and the stomach, vomiting of food, beadache, etc [comp Sang] the stomach, vomiting of food, beadache, etc [comp Sang] the stomach, vomiting of food, beadache, etc [comp Sang] the stomach and the stomach and the stomach the stomach and the s micturition, C during micturition, with sticking and of uric acid), discharged with effort, but without pain Copious U , and offensive Scanty U , with burning

Sexual Organs.-Glans swollen and red Emission

Respiratory Organs.-Much hawking and clearing Pain in r hypochondrium when walking Rum- of larynx, frequent and painful H of tough mucus bling in umbilical region in afternoon, R in U and trom laryix. A lump of mucus rattled up and down hypogastric regions, with desire for stool, soft, painless traches, it was expectorated with a sweetish, offensive stool, R in U and hypogastric regions, waking at 4 taste at 10 AM, obstruction and catarrhal soreness of A M , with distress and desire for stool, copious watery air-passages, frequent hawking, cough, with soreness stool, which could not be retained a moment without in trachea and tickling. Hoarseness, with sharp, pain, at 8 AM, another watery stool, with rumbling acrid feeling near epiglottis. Short, dry cough from Intermittent pain in U region at 5 PM Uterine pain tickling in larynx, hacking ( in morning without in shocks from U to epigastric region, then nausea, expectoration, with soreness in larynx anteriorly Ex-

> Chest .- Rattling of mucus not to be raised by hawkknife, then darting pain in abdomen. Pain in I, as if ribs were pressing upon lower part of lung, inability to take a long breath for the sticking cutting in I lung, P in pectoralis major, during motion and in evening Constriction; about sternin, at middle of sternum Soreness from nipple to mipple in morning, with tender painful spot on'r border of sternum and pain on inspiration Tickling under top of sternum, waking at night, with cough dry and distressing because nothing could be raised nor the tickling be

> reached, rattling of phlegm low in osophagus
>
> Heart and Pulse —Heart's action increased in force and frequency Pulse rapid, and feeble Pulse slow

Neck .- Soreness of muscles, with harshness

Back.—Pain; < walking Stiffness in morning, <

erect only gradually Crampy pain in r loin in even- pressed in centre, the ing, causing sweat Pain in r kidney Pain in lum- warmth from exercise. bar region all day while sewing , P in lumbar region, bar region all day while sewing. P in lumbar region, — motion, and in sacral region, so that it is almost judge of the head, all these symptoms associated with the gas-impossible to walk; heavy P Weakness in lower livid degragements and other symptoms of the day. part of back

Extremities.—Tearing in r hip, knee and shoulders. Pain through the day, neuralgie P like constriction around l upper aim, torearm and thigh, rheumatic, in r arm and r knee, < motion, stinging, rhoumatic. in elbows, forearms and knees, tensive, in all joints, mostly the smaller, shifting about rapidly, <

from supper till bed-time

Upper Extremities -Stinging in r shoulder, during motion, < raising arm, with tension Rheumatic pain in shoulder, anotom, especially raising arm Sharp thing bad, with amorous areams and emissions pains in shoulders, arms, a index Sharp pain dry mouth and general depression. Firstly described by startings Early waking; with near outside of l arm on moving it Lameness of upper arm, with soreness to touch, the L soon extended to shoulders and nape, like rheumatism after taking cold, the L and sathioss > might and test, of skin; of near, with ausning of meet, of skin; of near, with ausning of meet, of skin; of hands and clows as after wine, H of hands all day, with dryness of them, of palms (deneral sweat, < in groins tle in r upper arm Pain in metacarpal joints of hand and in muscles of r. arm, < motion and evening

Fingers -Shifting shooting in phalangeal and metacarpo-phalangeal joints. < evening and motion Cutting in nietacarpo-phalangeal joint of r thumb Sharp pain along l side of first Sharp pain along l side of first phalanx of r middle, then in I middle fingers,

in end of r index

as if l. hip were wrenched or forced to remain long in ing it dark an awkward position, S twinges as if hip were wrenched, then burning aching, S twinges behind I trochanter in morning when writing, with lameness | poral arteries, then heat in mouth and on face, salva-log, then they in evening on walking Pain in it into, then sweat on forchead, cheeks and temples, then they were the salva mouth and on face, salva-the, when walking, in I thing Painfil drawing and incessant expectantion, sweat covering face and neck, lumeness behind I trochanter, extending to populated space then whole body red and moist, pleasant warnith, in evening, causing limping Sudden rheumatic then general sweat, which soon runs down on all sides. when exercising, causing limping, then shooting postincreased activity of nucous glands of back of throat, teriorly down thigh to foot on every motion, < walk-trachea and bronchi, salivation so great that he can ing, > 4 PM, next morning pain in 1 sciatic nerve only scarcely speak, salivary glands enlarged, sometimes on walking, with increased soreness and with weakness accumulation in bronchi cleared away by cough, thirst, of I leg, violent exercise does not increase the pain more contracted pupils, after the sweat and salivation have than moderate exertion Pain when walking in r, ceased, prostration, drowsness and dryness of the then I knee Knees weak and trembling. Pain in parts that have secreted so copously, < mouth and calves when walking, < r Stekeng in r foot Sharp back of throat, with much third. pain in first joint of r great toe when walking

Clinical. - Sciatica of the 1 side, of a burning character, shooting down to the foot, greatly < motion (Bry )

Skin.-Pumples like mosquito-bites: pimple on ! middle finger, next day the inflammation extended over hand, then great pain, it was opened but no pus found,

Crampy pain in r loin in even- pressed in centre, then crusts. Itching of face, <

Sleep .- Sleepiness; with chills down back; with dulness and dizziness; in daytime, fell asleep when reading, dreamed of dissecting a woman who was hanging by the heels in my office, woke frightened, tried to get up to shut the door but could not real nightmare Night restless; with dreams of fighting, etc., with awful dreams of the dead, with dreams of digging up corpses, and finally fell into a grave which woke me in fright, with dreams of snakes and everything bad, with amorous dreams and emissions dry mouth and general depression. Frightful dreams Dreams of suffocation

Fever .- General chill at night Heat , with itching taking cold, the L and stiffness > might Cutting in and feet, of skin; of head, with flushing of face, of

## Jaborandi.

A tracture is prepared from the dried leaves and stems of Pilocarpus pinnatifolius, Lem., which contain the alkaloid Pilocarpus

General Action.-The most remarkable property of this drug is draphoresis, in a few minutes a flush of then in | axilla, occurring frequently Pain, in last the face is followed by profuse perspiration and salijoint of I middle, in r phalanges when writing, and vation (frequently if one of these is profuse the other is greatly lessened), which last for hours It contracts Lower Extremities. Weakness and pain so that the pupil and causes spasm of the accommodation walking was almost impossible Sciatic pain, frequent, It stimulates the hair, making it coarse and often turn-

Allies - Agaricus, Physostigma

Generalities.-Redness of face, throbbing of temlameness in femoral region posteriorly in morning then lachrymation and copious discharge from nose,

Restlessness, in evening, with anxiety Weariness: in morning, with dryness of mouth and thirst; on rising, from a short walk, with hurried breathing and palpitation, so that legs give way when walking Faintness Collapse.

Mind.—Confusion Disinchination to speak

Head.—Aching; every day about noon, about noon, but it afterwards formed and discharged through the with hurned breathing, pressure on chest, anxiety, palopening, which penetrated as far as bone, a funguous pitation and pain in region of heart; towards dinnergrowth around edges had taken place meanwhle, time (noon), not affecting appetite, < 1 side, during pain extended up arm, appearance of a malignant boil, sore throat, with suffocative feeling Uneasiness, in-absolition to a similar formation on index, sweat creasing in foremon to pain in occupit, then extendwith the pain in finger Boils on back, face and hand ing to forehead, > late in afternoon. Empty feeling. Vesicles on r. wrist, which formed into pustules, de Vertigo. Throbbing pain in vertex and front of head

at 7.30 P.M.; sudden T. pain in vertex and forehead. | Urine dark Urine increased; during the sweat; and Pain in lower part of occiput, extending over l. side sp. gr diminished, urea increased. Urine decreased; of head to forehead, heavy, < l. side, pain in l. side and sp. gr. and urea increased. Urea diminished, next

of O. in evening.

Eyes .- Red spot near r. iris in morning, vascular appearance in both eyes as from cold or overwork. Cornea red after waking at 5 30 PM Lachrymation Pupils contracted; and tension of accommodative apparatus, with approximation of nearest and farthest points of distinct vision, amblyopic impairment of vision from diminished sensibility of retina, P. dilated; P sluggish Balls sore on rolling them at 7 30 PM Lids stiff and heavy Vision disturbed V changing constantly, becoming suddenly more, then less dim, dim, with pricking in eyes; dim, restored suddenly or distant objects Swimming of distant objects Clouds before vision V of snowflakes during the sweat and salivation. V lost for distant objects

Clinical.—Asthenopia of hypermetropia Spasms of ciliary muscle in hypermetropia. It has relieved the asthenopia of cataracta. Convergent strabismus Especially useful after operations for strabismus

Nose and Face.-Nasal discharge Rednesstof face and of ears and neck, and of body, involving cheeks and ears, < when the sweat was greatest, then pallor. with heat of it and with throbbing of temporal arteries

Mouth.—Tongue furred Articulation difficult and indistinct Heat Dryness Salivation, with profuse sweat, with dry skin, stringy, but not very viscid; constant spitting of alkaline saliva, alkaline saliva flows upon pillow during sleep, causing collapsed feeling in glands in checks Saliva contained a notable quantity of urea

#### Clinical. - Profuse salivation during prognancy.

Throat.-Swelling of submaxillary glands (Merc, Cale) Pain in submaxillary glands Dryness at back, dry and inflamed feeling in forenoon, with scraping on swallowing anything, the inflammation < afternoon, with swelling of tonsils and stiffness of jaws. Soreness and smarting, with headache, < 1 side, and hurried breathing

Clinical,-Mumps, especially when there is metastasis to the testroles

could not eat ing Hiccough. Nausea, sudden, and retching, often Vomiting, after supper, sudden, with hiccough in the lad who failed to perspire; of the saliva that sweat during the proving he had swallowed, severe, of the contents of stomach, then of bile, then continued retching Distress, and in lower half of cesophagus, especially the latter feels constricted; heavy D at pyloric part at dinner-time, as from an indigestible substance, > a full meal Constrictive feeling as if rugge were puckered (probably owing to aclohol in tincture)

Abdomen.—Empty, gone feeling Cutting in lower Stool.-Watery, yellow, frequent and painless; and undigested, gushing, weakening Yellow, gushing Papescent and large. First part five-eighths of an inch in diameter and about five inches long, the last part papescent and dark brown. Hard Constipation, two Increased motion of stomach, sometimes with nausea, stools a day instead of three. At 7 A.M. and again at 7 P.M. difficult, of long, large, dark fæces.

urethra. Burning in urethra, with urging to urmate. for stool, which occurs without great irritation and is

day increased Chlorine, chlorides and unc acid diminished, next day increased

Respiratory Organs and Chest.—Bronchial secretions increased Loose cough Breathing difficult Breathing hurried Sticking in chest Pain in chest and around heart. Pressure on chest, with anxiety, palpitation and pain in region of heart Anxiety in chest. with oppression, preventing sleep.

Heart .- Pain in region Palpitation Irregularity. weakness and rapidity of action, with nervous, restless

condition and constant yawning

Pulse.—Rapid, then slow, at beginning of sweat, the tracing becomes a little crooked, the rising line larger and more upright, the descending line more oblique, more dicrotic, at the height of the sweat the general outline very irregular, some beats shorter than others P rose (the reverse of temperature), returned to normal rate, with return of normal temperature, but was soft and compressible P and temperature increased during sweat, then lowered Tracings showed almost complete asystolia, with diminished vascular tension during sweat

Sleep.—Sleepiness Fell asleep while sitting read-Profound sleep, in daytime Most wretched might that he ever remembers, fever, headache, malaise, no thirst, restlessness, moving and delirium. Did not sleep well on account of restlessness, with pressure on chest and hurried breathing Distressing dreams towards morning Dreams of accidents and frights. waking him twice at night.

Fever.-Temperature sank Chilly up and down back at 7 PM Shivering Temperature 98 5°, in taking which he uncovered himself, this caused coldness. with horripilation and griping, but as soon as he covered himself again profuse sweat Heat, temperature rose, then fell, internal, in face and over body, in face, in face, then extending over body Profuse sweat , and finger-ends shrivelled like a washerwoman's, in drops on forehead, S on forehead, then over whole body, then chiefly on face, legs and feet; S on forehead and over whole body, < trunk, simultaneously with the salivation, on face, on face and upper part Stomach.—Appetite. Hunger disappeared and he of chest, on face, then on whole body, on chest, then uld not eat Urgent thirst Eructations and vomition of these parts. < upper extremities S of neutral on other parts, < upper extremities reaction running down all over body S contains urea Perspired easily before taking, but did not

Clinical.—Flushings at the climacteric period, with profuse perspiration, cold extremities, nauses and vomiting.

# Jalapa.

A tincture of the dried root of Ipomea purga, Hayne, is used

General Action -An active hydragogue cathartic Allies - Jatropha, Rheum, Coloc

Uneasiness, with tossing about of limbs Weakness Fainting fits Headache Humming in ears Stinging in tongue and fauces Nausea and vomiting. succeeded by increased activity of small intestines as far as region of cæcum, where there is seated illness, Urmary Organs.—Sudden shooting from bladder to then motion in colon and its flexions till there is desire Jatropha.

if there be another looser stool Pain in small intes- Deafness times as if they would be cut to pieces Inflamma-tion of intestines Anus sore The first stool is Violent, excessive stools always thick, reddish and sour Bloody stools Several untery stools, then decrease of temperature, several untery S, then weak pulse Pulsations slower Pain in thighs Febrile attacks

CHINCAL.—Coryra in an inlant, volent attacks of crying and interface, and, quiet during the day, but sereaming all inglist. Chronic durarines, atools as or eight times a day, dark, offenaive, like great, with much griping and some tenemins, it is reported to have cured a durarines, that had lasted twenty years, stoles sudden, satery, ever offenaive, generally with a little blood, much gas, tongoe smooth, glazed and dry.

# Jatropha.

A tincture of the ripe seeds of Jatropha curcas, L, is used General Action -A violent hydragogue cathartic Allies - Crot tig , Jalan, Gamb , Elat , Verat alb

Generalities.—Cramps, in evening; and twitchings, "raires were twisted around to shins" (Cupr), of exarm, painful P in lumbar, dorsal and pectoral mus- Insipid taste. < back of throat cles Brused feeling in muscles of back and chest More susceptible to wine than usual Restlessness, swallowing Scraping, < chewing Pain, burning at night on account of rush of thought and palpita- Soreness, of soft palate Acral feeling gradually extion Weakness; in evening, with rapid and weak tending to stomach, at last causing vomiting Dryness, of pulse, of vital powers, of vascular system, painful, of muscles on slightest exertion Stiffness of muscles of nape and forehead Aggravation of symptoms in hours vomiting of food, with short hacking cough muscles when sitting Amelioration in open air It Burning. Swollen feeling is said that placing the hands in cold water will stop the effects (see Jalap )

diarrhora an ecstasy as if an ideal had appeared to a vation, with burning in stomach, intermittent, poetic painter, or like that which sometimes comes to peculiar, in pit of stomach Dreads to drink on account a dying person, with bright eyes directed upward, a of namua (Verat alb.) Vomiting, easy, of much watery feeling of pleasant warmth and ethereal lightness albuminous substance, with watery diarrhaa, frequent, Anxiety, with burning in stomach and coldness of copious, violent, also with violent diarrhoea (Verat body, A. at night, constricting chest and preventing all, of all food (a few hours after Maderia wine) sleep till towards morning Easily disturbed by anx-10us events Little inclination for anything, laconic ing Cutting in S and abdomen, < pressure Pain Forgot the events of his illness, except the earliest symptoms

Head. - Aching Heaviness Confusion, and almost loss of ideas, and stupefaction Vertigo, on ing, jerking, in epigastric region, burning muscles; pain in l. frontal and temporal muscles Pressure in temples all day when in the house, extending to crown, > Pressure in occidut

rubbing, with smarting

not succeeded by any other irritation or desire, even ing in r ear. Roaring in ears. Difficult hearing.

Nose.—Ulcers, and in mouth. Itching in nostrils when eating Sensitiveness on drawing in air, which seems cold though it is warm Sneezing; with catarrh and discharge from nose Catarrh at noon, with heat of head, sudden C, with sneezing, running from nose, trequent copious discharge of mucus, which soon became alternately vellow and white, with paroxysms of cough, with difficult expectoration, but in the intervals frequent easy hawking of large lumps of mucus, with intermittent headache here and there

Face.-Pale and anxious, P in afternoon, with dark rings below eyes. Aching in r zygoma, in l. zygoma, gradually extending to r and ending with aching in r. ear, A. m masseter muscles; contractive A in l. masseter muscles Lips cracked and painful Ulceration of r corner of mouth, with smarting and tension. Soreness of 1 corner of mouth Itching of hips in morning, with tension

Mouth.—Sticking in a hollow tooth Drawing in I incisors Rheumatic drawing in a hollow tooth. Burntremities, afterwards extending to muscles of abdo-ing pain in tongue. Numbness of tongue. Dryness terminary and wards extensing or moders of those of at might, D without thirst, then all might and in back, as in tetanus Pams in lumbar nusseles, chest morning feeling as I mouth had been burnt, dry and shoulder-joints, in I andkel, upper arm, I hypo- sensation, then real dryness of M and tongue all might chondrium and I inguinal region; in muscles of shoul- without thirst, then feeling as if mouth had been ders and back, in knees and calves, with weakness, burnt, < night Burning, and in throat Salivation, indefinite P in hypochondria and various parts of thin; much spitting of saliva with the stools; frequent extremities Pressure in muscles of back and I upper spitting all the morning, with metallic, bloody taste

> Throat.--Pain along l jugular vein fauces, of upper part of T and fauces, with thirst, but dread of drinking on account of nausea, after several

Stomach.-Appetite diminished; lost Thirst, in evening Less longing for wine Eructations, of air Mind — Debrium and insensibility During painful Nausca; after cating, > cating (Verat v), with sali-

Rumbling Cramplike stitches Cramp on stoopwith pyrosis, < pressure, rising into esophagus, extending paroxysmally towards umbilious and into osophagus, in epigastric region, intermittent, drawraising head, with pain; with restlessness. Sticking tiveness of epigastric region, < pressure Anxiety in now in r, now in I half of forehead Frontal pain; pit Heat, with cramp rising into orsophagus; with with heaviness, externally, and pain on r. zygoma; in copious easy vointing, in S and bowels, with nausea, extending to spine, repeated in rapid succession. Sink-Pressure inward in temples, ing in pit, with nausea; after soft stool

Abdomen .- Distruded ; and soft , and tympanitic ; and open air, returning on entering house, with throbbing tympanitic, tense, and soft, with pain deep in umbilipain, afterwards extending now and then to crown cal region on slight pressure. Notee as of a liquid (Crot tag); < 1 side. Noise as it a full bottle were Eyes and Ears.—Pupils contracted; dilated Trem-emptied in evening, continuing after a thin stool at 10 PM bling of 1 lid, upper Itching of lids; on margins, > Rumbling, all day, > going into open air, returned Vision of black points; of in warm room and lasted all the evening and night, bright and dark spots Sticking in I. ear; deep. Ach- all night; after stool, with desire for stool; with

emission of flatus, with pain in transverse colon; with pain shooting through deep in abdomen. Move- ished urine; A. as after excessive sexual intercourse. ments Emission of flatus Griping Pain; in morning, with sensation of impending diarrhosa, in fore-side of r. thigh to knee noon, with uneasiness in it and sinking feeling in stomach, as during violent diarrhoa; with heat in it. with desire for stool; < along spine. < pressure. with distention of abdomen and desire to urinate piration difficult. Respiration quick and panting Sensation as before stool, which, however, occurs only next morning.

Piercang pam in l. hypochondrium extending to sudden S to l of ensiform cartilage, behind costal lumbar muscles Tearing deep in umbilical region, cartilages, arresting breath Pain in l clavicle, deep cyressure. Painful thrusts from umbilicus to lumbar region. Pam in umbilical region, in morning, inside nipple, in r pectoral muscles, in l clavicle in with rumbling, emission of flatus and desire for stool, forenoon, in 1 pectoral muscles, making respiration after soft stool; deep; extending into 1 hypochon-difficult Throbbing pain in 1 clavicle in morning drium and l. chest. Crawling about U in forenoon | Constriction, with attacks of anxiety, preventing sleen Noises low down Gurgling low down, with runn-bling Sharp pain in transverse colon Aching in Bester.—Sinking feeling in precordial region, with lower part, with inclination to stool Pressure out- mauses, then soft stool Violent heating; when walkward in 1 inguinal ring on blowing nose Peculiar ing slowly about the room; suddenly Action irregtension in inguinal region Feeling of tension and ular and weak Palpitation, after moving about protrusion in 1 inguinal ring on coughing or blowing. Pulse.—Rapid, and strong, and hard, throbbing nose, whereby l. leg is involuntarily flexed and drawn and large, full, almost jerking, and weak Slow, and towards abdomen

Beetum. Soft hamorrhoidal swellings Statches; Small, thready, intermittent Almost pulseless in anus Burning after stool Violent crawling of with noises as of liquids in abdomen (Crot. tig.). < 1 side

Stool .- At night Watery, spurting from him (Crot t, Elat., Gamb), W, copious, then great relief, W, copious, mucous, frequent; copious, mucous, not un-like rice-water Thm, preceded and followed by rum-Crawling beneath skin of sacrum bling and at times noise as if a bottle were emptied. (('tot. tig) Diarrhea, violent (Verat alb), violent, of hands and feet Pain in 1 calf, r knee and r with tenesmus, painless, with ciamplike jerkings in wrist, on back of r foot, on posterior surface of l calves Soft, and frequent, with nausea and much upper arm and in flexor surface of 1 forearm, P alterspitting of saliva, without relief of colic, which was nately in upper arms and r calf, only when sitting, stipation, with pressure inward in temples Hard, wrists, toes and calves, drawing P. in various parts. after the proving, and scanty, delayed Small, and in half an hour another Frequent

every attack of nausea), with drawing pain and desire Gnawing in ulnar nerve Aching along I ulnar nerve, to urmate, spasm of bladder beginning with twisting from elbow to tips of fourth and fifth fingers Interpain in umbilicus, which extends to neck of B., these attacks, like the nauses gradually > between 6 and 7 ing on back of I hand Pain in meta-carpus of r but, they are preceded and followed by noises of thumb, extending to wrist and hand, I'm interjoint liquids in abdomen and by sour eructations. Slow ooz- of r index, extending to tip, in first joint of r thumb, ing of clear mucus from urethra when walking and extending to wrist, in morning sitting. Stitches in urethra Tickling in navicular Lower Extremities—Gait tottering, body inclined fossa, with frequent micturition Urging, after mic- to l. in walking Tearing in 1 knee and malleolus turition; frequent, constant Dysuria Difficult Pain in hollows of knees, r. knee and 1 calf on walkneutrino. Urino bright yellow; and frothy. Urine in glowly in the room Bruised pain in kness, when copious; in evening after exertion; and watery Urine is sting, extending into logs and becoming seasity, dark brown, clear. (Unne white) (Blood and loss of the complete of the property of with urine)

urinate, with inflammation of the whole urethra.

Sexual Organs.-Aching, < r testicle, with dimin-

Respiratory Organs .- Painful pressure in r side of larynx at night, waking him, not painful on touch. Hollow cough at night Short hacking cough Res-

Chest.-Statches behind cartilages of I sixth and seventh ribs, S downward deep behind sternum

full, and full, soft Irregular, of normal frequency

Neck and Back.-Stiffness of nape, of muscles of worms in evening Itching in anus at night in bed nape Pain in muscles across back, in I rhomboid Urging; to diarrhoxa-like stool in morning; sudden, muscle, in region of fourth and fifth ribs: in region of sixth dorsal vertebra Stitches in lumbar muscles Feeling of a thrust in muscles of small of back when walking Soreness of small of back, and in rectum,

Extremities-Spasms Cramps in arms and legs. > emission of flatus, for several days, then con- pressive and contractive P in various parts. < in Delayed in part seeming to be under the skin

**Upper Extremities** —Pain in shoulder-joint, in 1, Clinical.—An extremely valuable and to intile used remedy for profuse gushing, watery durrhous sometimes associated with unreversible the body and unqueschable thrus; frequently with pann in shoulder-points B. and stiff teching in shoulder unabling and gangling in abdomen, at times with vomiting of ders. Drawing in muscles of I shoulder Buused alarge amounts of albuminous looking substances, it may be compared with Versi, but, as a rule, it lacks the violent pain of that quarter arm. Wearness of upper arms. Pann in discussible the properties of t in r shoulder, extending into hand, < along ulnar clows extending to tips of fourth and fifth fingers, Urinary Organs.-Spasm of neck of bladder (with with numbness and burning, causing insensibility

and cramp in calves, which become knotted (Cupr ) Scrap-Clinical. - Irritation of the bladder, most violent urging to ing on inner surface of I tabus. Painful pressure in external muscles of legs, with internal crawling ComPainful weakness of logs, < knees Stiffness of legs feeling. Faintness, > rising and moving about, when walking, with unsteadiness

Calves - Cramplike perking, with painless diarrhea, internal jerking and pressure in 1 C and toes, more towards inner angle of tibia and on inner surface of upon any one subject. Confusion so that I could not tibia Sticking Pam, in 1, in 1, < towards tibia, study. Dull feeling, cannot remember anything that with stiffness, when walking, with internal drawing in legs; drawing pain in outer part of r , bruised pain in outer part of r , bruised feeling, < when sitting Pulsation in 1 Stiffness, of 1, when walking in room, of 1 and back of 1 foot, with pressure

Pain in r ankle, rheumatic P in 1, < forenoon stepping on them Drawing on back of right foot, drawing in balls of feet, rheumatic D in I foot, extending into ball of great toe Rheumatic pain in ball of r foot in morning Twitching inward of r toes Sticking in 1 great foe Tearing alternately in toes and on back of 1 toot Pressure and drawing in great toe and on back of 1 foot.

Skin.—Pimples on wrist and back of r hand; hard, on middle of r cheek, sore painful P on nape; sore painful P. on bend of r thigh Prickling on back of l hand Crawling on legs and feet, in toes, I great toe palm, between first and second fingers in morning, > rubbing; between toes at night in bed; around mouth, - rubbing, with tension, between thumb and index, < then > rubbing, internal I in fingers, < 1

Sleep — Yawning, with nausca, salivation and eructations Drowsiness, after vomiting, with heat Dropped asleep every halt minute, but was easily aroused He is scarcely able to wake in morning and afternoon, must force himself to move, after which he feels better Waking at 2 A M on account of an angry conversation which he had had in the evening, then dream of the conversation Sleeplessness, with throbbing of pulse, all night, with tossing about Incessant dreaming

Fever - Coldness, with shivering clammy sweat. vomiting and diarrhoea Shivering, with cold fingertips, with cold hands and blue nails, with cold feeling extending through abdomen, and the palms previously dry became most and cold Shivering in back, in spinal marrow, in region of lumbar vertebrae, creeping; up and down back, starting from lumbar vertebrae, deep in lumbar vertebrae, with desire for stool earlier than usual, extending into upper arms Coldness in back; at times, deep in spine, extending into upper arms Cold hands, and blue nails Cold limbs, in evening; C creeping through limbs, extending to scalp.

Heat, in evening Hot skin, with rapid pulse and dry tongue Heat in head, < sinciput, in occiput, in occiput, in occiput, with confusion of it; in ears, in face, in face, as in catarrh, across back Sweat; during sleep, profuse, general, cold

# Juglans Cinerea.

A tincture of the fresh, young, mner bark of the root of the "Butternut," collected in the spring, is used

Generalities.-Loss of weight Aching in various parts Feeling as if all internal organs were too large, < l. side Restlessness in afternoon, with pain in nape Pricking up and down spine. Sticking under</p>

pression in muscles of l. leg, < lower part of calf | region of lumbar vertebræ. Weakness: with sick

Deathlike feeling, with chills and shuddering Mind -Want to be alone want to do nothing but eat and sleep, cannot think of concentrating my mind I read Absent-minded, forget what I am about.

Head .- Aching, in morning on waking, with yellow coat on tongue, in forenoon, in forenoon, < r. side; in evening, and I can hardly see; heavy, in morning. Feeling as large as a barrel Vertigo at 11 Sticking in 1 sole and 1 calf, with pressure, S in 1 extending to abdomen Fulness in frontal region sole when sitting, with jerking Heels sensitive when Pain in forehead, in r temple in forenoon; in occuput in morning, > rising Itching of scalp

> Clinical.-Occupital headache is said to be a characteristic of the drug

Eyes.-Red and swollen Burning in afternoon Feeling as if drawn together Loss of vision on sudden motion, with faintlike giddiness

Nose.—Numbness at root; in bridge, > rubbing Dryness Watery discharge Bleeding

Face. - Pallor Erythematous redness, with dry. burning sensation

Mouth and Throat.—Tongue coated white, coated Itching between r index and middle finger and on vellow in morning Burning and pricking in mouth and throat Taste coppery Swelling of submaxillary glands. < / Sore throat, in forenoon, with roughness, on swallowing, with swollen feeling Burning in pharvnx Pain in r ade of fauces.

Stomach and Abdomen .- Ferocious appetite Thirsty. want to drink all the time Nausea in morning; N < night. Burning in stomach Statches in hepatic region Pain in each hypochondria, in umbilical region, in abdomen after dinner, then diarrhees, with burning in anus, in region of inguinal rings, with soreness on rising from a recumbent position, flatulent, in different parts of abdomen; heavy, in umbilical region Burning in abdomen after stool

Stool.—Bilious, copious, frequent, painless rhaa, with cutting in abdomen, D, with burning in anus before and after stool, painless, in forencon, yellow, frothy, with tenesmus and burning in anus after stool. A drastic purge, producing irritation and inflammation of mucous membrane of bowels Soft, with pain and flatulence in abdomen, S and brown, and dark, sticky Constipation, with griping in umbilical region Hard, and in balls, H and dark brown, and brown, difficult, first part H. and brown, latter part diarrhous and greenish-yellow Small and brown Dark brown

Urmary Organs .- Micturition frequent and copious : frequent, with burning and smarting

Chest.—Expectoration of dark blood Pain in L. in centre at times, by day and night, with foreboding feeling at night, sharp wrenching, in 1 side at 6 PM, when walking, with suffocating sensation under sternum, compelling him to stand still, which did not alleviate the pain, the attack being similar to angina pectoris. Oppression, hindering long breathing.

Clinical.—Angina pectors, with sufficative pain behind sternum, especially < walking, has to stand still

Pulse.-Rapid.

Neck and Back.-Neck rigid. Lame feeling in

r. scanula on stooping. Pain between scapulæ; under | Migraine in a spot in region of l. parietal bone prescapula; under r. scapula, making breathing difficult, under vertical border of r scapula, < moving the part and drawing a long breath; in region of lumbar vertebræ and r. sacro-iliac symphysis, in region of lumbar vertebræ in afternoon, with restlessness, in lumbar and dorsal vertebræ at night; in region of sacroiliac symphysis, < sitting, also in forenoon, and in region of lumbar vertebræ; in lumbar vertebræ, extending through lumbar region and up spine. Occasional shooting in lumbar region

Extremities .- Pain; in shoulder, r axilla in afternoon; r axilla, extending down arm, 1 arm, elbows and knees, wrists, extending up arms; thighs and l knee in forenoon, r. knee on ascending stairs; ankles, sharp, rheumatic, in shoulders and wrists; occasionally sharp, in calves, cramplike, in hip at night; arms and wrists, as if sprained by hard work, numb, in r axilla, extending down arm along nerves; numb, in arms and wrists in forenoon Numbness of 1 foot

when sitting still.

Skin.—Exanthematous eruption resembling flush of scar-Eruption resembling eczema simplex on upper chest. with itching pricking when heated by overexertion tules on thighs, hips and nates, with riching and burning, a few pustules on body, fare and arms Itching in spots, now here, now there; I on arms, > scratching, with burning; head, neck and shoulders, with pricking; arms, with burning and redness

Clinical. - Numerous cases of scarlatina, eczema, herpes circinatus; impetigo, lichen; erysipelis, erythema nodosum, ecthyma.

Sleep. - Constant yawning, without sleepiness Sleepiness Sleeplessness; after 3 A.M. Sleep restless, and light Sleep unrefreshing Dreams vivid. frightful, frightful all night, and waking covered with sweat: troublesome, of being among Indians, ridiculous.

Fever .- Chilliness alternating with flashes of heat, C along spine, beginning in back when near the fire, without coldness of flesh

## Juglans Regia.

A tincture of the hulls of the unripe, green fruit and of the green leaves of the European walnut is used

and of Juglans cinerea are worthy of careful study and more extended application Note also the marked of spleen Tension action of both drugs on the bowels

Generalities .- Muscles relaxed Exhaustion and disinclination for the usual business

and feeling as if the head were floating in the air gripings in intestines; P above umbilicus, P in Peevish and discontented in evening Disinclined to hypogastrium, with nausea Sticking in hypogastrium talk or quarrel, as was customary with him, mentally on moving or stooping. Cutting in r hypogastric indolent.

Head .-- Aching, after dinner and in evening; with flushed face. Feeling in H and nose as in beginning obliging him to get up of coryza. Confusion cinations in forehead Frontal pain, in l side; above nied by pain in abdomen Thin Soft, large, at last Leve, and pain meyes, above eyes, — moton, — leatney thing that, and difficult, and difficult, scutty, shaking head or moving eyes; with yawning and delayed. Constitution Bowels confined in morning seasopmens; above eyes, as if dirty temples, > going into open air, returning on enter- and pressure in anus Scanty and frequent Difficult. ing warm room, with sharp pain in front part of head. Omitted

venting speaking.

Clinical.-A valuable remedy for occupital headache, share shooting pains,

Eyes and Ears .- Burning in eyes Aching and fulness in r, then I. ear, then discharge of pus from both ears, external ear inflamed and two painful sores on it. Burning in 1 car, then redness and swelling, then pimple on inside, then discharge of pus from both ears, < 1, with burning and redness of 1 external ear and feeling as if something dropped inside of ear at every step, and soreness preventing lying on 1 side of head

Face.-Swelling of 1 cheek and upper lip, with swelling on gum over 1 upper incisors, without previous toothache, then a hard reddish painful swelling in 1 cheek, in the middle of which was a sharply-defined, depressed, dark red, yielding circle, pus could be seen through the thin skin, the apparently sound tooth was drawn and ichorous pus was discharged through the opening, then the swelling disappeared

Mouth and Throat .- Tearing in hollow teeth, < warmth of bed Tongue coated white; in morning, with bitter slimy taste. Tongue covered with white mucus Salivation Inclination to keep mouth dry after dinner, could not make up his mind to drink wine or water as usual Taste bitter, T slimy in morning on waking Hawking of much mucus

Stomach.-Appetite increased; lost Aversion to tobacco-smoking in evening. Thirst increased Eructotacco-shoung in terming. All stating as after eating fat Hiccough, more violent after eating Nausea, at 6 AM, and after supper. Vomiting, woke suddenly, vomited food eaten four hours before, then slept without further trouble Burning Pain in epigastric region; with distention of abdomen

Abdomen.-Distention, after cating, after dinner, with emission of flatus, with sudden desire for stool, so that he must loosen his clothes, with pressure in stomach, so that he could eat but little in spite of good appetite: tympanitic Rumbling, with griping: with pain in epigastric region Emission of flatus, < lying Pain, > eructations, wandering, pressive and drawing, < motion, > appearance of menses (fifteen days too soon), then for eight days (instead of three as usual) copious discharge of blackish blood, General Action.—The skin symptoms of this drug often in large clots, with exhaustion and loss of appetite, drawing pain Drawing, with pressure in region

Sticking beneath I lowest ribs, Pressure in region of spleen, with eructations Pain beneath I false ribs, < deep breathing, laughing or stooping, P in l side Mind.—Excited in evening in bed as if intoxicated, on rapid walking, P over 1 side, with wandering region

Anus -Sticking at night, preventing sleep and

Heaviness Vertigo Lan- Stool.-Liquid; twice a day, preceded or accompa-

no thirst Urine scanty , and clear Urine dark red

Sexual Organs .- Frequent erections Burning in penis after contion with his wife, with abrasion where prepuce joins penis, afterwards a suppurating streak half way around between glans and prepuce, then the ulcer became larger, margins hard, base lardaceous, bleeding on slight pressure, often there was a small scal, from beneath which pus oozed and which often came off and left a suppurating ulcer, afterwards a healthy scab formed in the middle and fell off, leaving healthy skin, so that instead of one long narrow ulcer there were two small round ones, these healed and left no scar

#### Clinical.—Menses early, black,

Chest -Sticking, in lungs, not dependent on motion or resputation Oppression.

Pulse.—Rapid; and full

Back.-Stitches in sacral region

Extremities.-Drawing pain as if sprained, in first phalanx and joint of 1 thumb, < motion, and while in bed the same pain in r. great toe Stecking and itching in r leg and r. fingers Drawing and paralyzed feeling in legs and knees, with weakness and with giving away of knees when walking, and a similar sensation in r hand Electric starts in forearms and hands wake him as he falls asleep Weak feeling in r hand. Intermittent pain in r index Sticking in inner condule of knee and feeling of impediment when walking Rheumatic pain in knee impeding walking Pain in r instep when walking and sensation of impediment

Skin - Eruption behind cars of children Itching eruption over the whole body. Pimples on face, red P. on face, neck, shoulders and back, some containing thickish fluid; P on nape, discharging moisture when scratched (like acne) Itching here and there; on

thehing in r axilla, with burning, skin sore and in r knee and lips, and I. breast and shoulder Rheueracked, then red and scaly, it became most, on marinatic symptoms. Rheumatic pains in different parts, in
gun of tetter burning vesicles, the tetter aggravated knee and chest
after perspiring much, the perspiration, with the secreDrawing pain in I hand, in forcarm and mape, D.

Urmary Organs.—Frequent desire from loss of tone | cle, becoming like an indurated gland, at this time on of sphinder. Constant urging and involuntary drib- I instop, then on r, redness, with itching and wesicles, bling Obliged to urnate at night obliged to urnal leaving hard sour, whereby the whole place became ate often; and much at a time Copious urns; but jelevated and painful, the scales were pressed in by the elevated and painful, the scabs were pressed in by the boots and rubbed off so that the part was raw, after healing the spot was bluish-red and swollen.

> Clinical.-Comedones and acne of the face Suppuration of axillary glands.

> Sleep -Yawning, in afternoon, with stretching. Sleepiness Inability to sleep after dinner though inclined to do so earlier than usual Restless sleep, with frightful dreams Restless dreams

> Fever -Cold limbs, after 9 PM, with hot head Alternations of coldness and heat over whole body, with heaviness of head, which after eating increased to pain, > after 3 PM Heat over whole body in evening, H in flushes, with confusion of head, hot head in evening, hot hands at 9 PM, with rapid pulse, then general sweat

## Kali Bichromicum.

Triturations of the bichromate of potash are used.

General Action .-- A "tissue" drug, affecting the skin, papular and pustular eruptions as well as ulcers of characteristic shape, producing general catarrh of mucous membranes and frequently erosions or ulcerations (throat, nose, stomach, rectum), causing inflammation of the perusteum and of the ligamentous structures about the joints, causing also acute inflammations of the kidney, with albuminums, sympathetic disturbance of the liver, etc.

Allies -Puls . Cinnab . Merc c., Phyto . Kali in general, particularly K iod Iris, Rhus, Sin. nig, Ailanthus

Generalities.—Anomic appearance Emaciation : with hectic symptoms Cracking on moving joints of limbs and vertebre Craimps, in various parts, < calves and inner thighs, with gastro-intestinal inflammation, sudden, in lower limbs and nape Stitches sternum, on hands, r hand, dorsum of r hand, then in different parts Tearing here and there in body, in on feet, forehead, scalp and abdomen; r fingers in shoulders and hands; in r thumb, then in 1 upper afternoon; legs, arms and abdomen at night, with toss- arm, then along arches of l. ribs, in bones, concening about and mability to sleep, here and there, caustrating in little toes, with crawling, in r axilla and ing restless sleep, with dreams and erections, on on posterior surface of 1 thigh, with sticking Drawflexor surface of r forearm, near elbow, with burning ing tearing suddenly jumping from one place to another and red spot in the middle of which was a pimple, (Puls), and > moving the affected parts (Puls), D the redness disappeared, but the pumple was painful tearing here and there in morning on waking, < limbs, and pus formed the stand between shoulders Sharp pain

tion from the eruption, stiffened the linen and stained pains during the day, < limbs, in small of back it greenish-yellow, the pain sometimes so great that and in I shoulder in morning, then drawing behind violent motion of arms was impossible, there were 1 ear, in bones of face and of r. hand in morning; always new vesicles and larger extent of redness after in various parts, < bones of face, in morning after increased burning and itching, the same trouble in 1 rising, in various parts, always near bones, as if in periaxilla, then a furuncle on shoulder, on coracoid pro- osteum or in tendinous expansion near it, in morning on cess, then a painful furuncle over biceps, with circum- waking, in morning on waking, in hands, feet, occuput and scribed redness and induration, discharging bloody face, then pressure and drawing between shoulders before matter, then two red itching spots on r elbow, upon dinner, and tension in pectoral muscles; D and tearing which a yellow pustule formed, a furuncle, with indu- pains in 1 teeth and in joints of limbs, suddenly chang-ration and pain, between ninth and tenth ribs, with ling their location. Drawing in zygoma and in bones thick, bloody discharge, leaving an induration, about of extremities; D here and there in sheaths of muscles, this time a red spot on arm near seat of second furun- in neck, back and limbs, in morning on waking, > rising; in l. little and ring fingers in morning on rising, objects were enveloped in a yellow mist, heavy, on then in l. side of face and in r knee; in r index waking at 5 AM; throbbing, with sticking in a spot and in spine in evening in bed.

Discomfort in morning, with uneasiness, D after ris-Integrating of the morning with uncessiness, D sites ras-wing prostration, < limbs | Feeling on waking of hav-ing caught a cold. General sick feeling; an afternoon | Indeposition, > open are, with nausea (Pulls) | Parox. | region; sudden, about f on, with nausea, unxiety ysmal venous excitement in forenoon, with uncasiness Uneasiness, rolling over, tumbling about and nervousness. Sensitiveness to touch, to cold air in afternoon Indolence, > beginning to work Disinclination to rise brain were too large and forced bones as under, < temfrom bed and move about

rising, < limbs, after slightest motion; when walking Rush of blood in open air, with leaden heaviness of limbs, indifference, aversion to usual business, exhausting warmth. taciturnity, inability to collect my thoughts, and I cut sudden violent vomiting of white mucous acid fluid. short conversation to avoid showing the fact, desire pressure and burning pain in stomach, then relief, to be alone, feeling better in open air, with sleepiness; < region of navel; even to sinking down, so that at 10 or 11 A.M., < stooping, with nausea, as if he trembled on attempting to rise Paralyzed feeling, room whirled around on rising in bed, < lying down, < r foot Almost complete insensibility. Stiffness with nausea, as if everything turned around, on rising and difficulty in rising in morning Pain more severe from a seat, with pain in enigastrium Vertigo in in winter than in summer. Amelioration towards paroxysms, in morning on waking, in evening, sudevening, after dinner; after eating; after a short sleep, den, sudden, when standing and walking. from vomiting

Citateal.—Resonation or rhounstool pains, S maller points, sudening from one plose to another (Puls.) The rhomatism as apt to recur every spring. The pains are apt to repear and disappear suddenly and to change location rapidly, especially in chronic rhounstism. It is usually indicated in people, supecially children, who are fat and sluggah.

humor, and disinclination to business Gloomy; in with pressure upon eyes; after dinner, and in occievening; during dyspeptic attacks. Anxiety rising put, then constrictive pain in vertex; extending to from chest Indifference, with distress in stomach eyes, in arch of l orbit, extending to l upper jaw and Discouragement amounting to ennul Anthropopho- causing increase of saliva, preventing sleep, sudden bia Disinclination to mental work mental work after dinner (without physical indolence). day, in the later days a second paroxysm in evening, Inability to attend to his usual business, > sleep, but also postponing, in 1 sinus in forenoon, as in catarrh, ill humor, with distress and sickness, remained Stu- as after a debauch, on stooping, throbbing, in spots pid, but answered questions well. Unconscious, pulse- at angles, with dim vision Heavy pain on r proless, breathing slowly and with effort, skin cold, lower tuberance; over 1 eye in afternoon, above eyes, < lip swollen and purple, tongue swollen

Head—Statches, with chilliness, S now in vertex, in morning norm in temples or occuput, tearing S < temples and Tearing, < forehead and occuput, with 1. Tearing in 1; in r musele, with drawing, T, with statches in temples Aching, in morning on waking, < forehead and occiput, viii in morning on waking, < forehead and occiput, viii in pinching on hones in forenoon. Intermittent morning on waking, < vertex, > rising, then weari- pressure during the day Attacks of throbbing pain ness and feeling as if he had not slept enough; to-in I bone, extending to vertex, at first only after 4 wards noon; in afternoon, aggravated till dinner, then PM, after four days in morning, with nausea Interrelieved; in evening; in evening, then feeling as if mittent neavy pain, < cold air and motion; frequent nose were stopped, with great heat of air coming H pain in r after eating, with craving in stomach, through it, then nosebleed, preceded by burning in Drawing pain in r. Drawing, and in joint of jan, in yees and sleepiness; on waking, with thirst, after; appointures of inuseles. Tension of muscles. Conditioner, < forehead; > afternoon by nosebleed, at pression in evening. Confusion of returnes with vertigo, < temples, with unessiness of stomach and dim vision, with nausea, with protein-istended and dim vision, with nausea, with protein-istended of vertex towards noon. Stecking in reside too of limbs; with pain in yee and frequent teaming in of head and in whole occupied, in r side, extending parietal regions, flying; nervous, in vanous parts | Parietal bone | Parietal

near crown, touching the hair at this place was painful. with nausea Throbbing on bending forward

and dulness of mind, on account of the confusion and anxiety the night was almost sleepless Heaviness Fulness, < vertex, with heaviness Feeling as if poral bones towards ears and parietal bones, the ex-Weakness, in morning, till noon, in evening, after temal meatus < 1, sensitive and stopped Lightness on the state of the s rapid motion of head; when sitting writing, then then vertigo, nausea and similar vomiting, > tea

Forehead - Shooting, above r eye in evening; across F and in temples when walking, > rest Darting pain, < open air, D pain in a spot over I eye in morning after rising, spreading over forehead, < motion. Pain, in protuberance, in bone every morning, in I side in morning on waking, in F and vertex in morning on waking, after rising it changed to Mind.—Good humor and inclination to laugh Ill occiput; in r side in evening, in evening, > sleep, Aversion to P in bone along l. brow, in bone, postponing each cold air and motion Heaviness Lightness on stoop-

ears, then pain, < forehead, at times with ringing and into r ear and r side of face. Attacks of lancinations pain in ears; at a point; < sides of vertex, extending in r. side Stabbing and pain as if head were opentowards temples, generally on one side and in a spot ing in a spot in I parietal region, < night, then a hard that may be covered with the finger; intermittent, < | lump Darting or aching in one side Cutting along

Pressure in O in forenoon Sudden statches through | Heaviness of upper in morning on waking. Drymess skull Sensitiveness of bones here and there Draw-Itching; in canthi Burning pain in external angle of ing in skull Falling of hair Inflamed pimples on leve, B pain in margin of r lower lid Burning; and occiput and hairy part of nane. Crawling constriction on surface of balls, with pressure in balls; on inner of scalp Tension of scalp Itching points towards surface, in r. inner canthus on waking, then extendnape, as from coming pimples Itching of whole ing over margin of lower lid, < writing Burning in

Clinical.—Neuralgic headache confined to a small spot, with dimness of vision, (the observations of cures of "sick-headache" by this drug do not differ in any way from those cured by Iris)

Eyes .- Sunken, and glistening, with dark rings about them Swelling in morning, with heaviness Inflammation, in morning, with yellow discharge and agglutination (Puls), with loss of vision Opththalmia beginning with itching, then pain and heat in at the distance of ten paces, then sensation as if a veil eyes, agglutination of lids, redness of conjunctiva. Statches in r Smarting, < open air Sensation of vertigo, then headache, < frontal and orbital regions, sand in them Pain, in r , < looking long at an object Sensitive | 9 PM Photophobia, with jerking of lids, lachrymation ness; and margins of Inds red, a yellow purulent substance and burning in eyes, the P < afternoon, > towards in inner canthus in morning Heaviness and soreness, evening

with pressure; in evening, in r in evening, and in skin about it, in open air in evening, with pressure, in I in evening, with lachrymation in evening, < an object, with dim vision, with pressure, with run- region, the later painful to touch and glands swollen,

and uneasiness as when opened under water White Singing Roaring granular elevations surrounded by redness, on l conjunctifical.—Chron granular elevations surrounded by redness, on 1 conjunc-tiva, towards unner canthus Pustule on 1 cornea, vaits sur-tendang notice inflammation and with pricking pain, with wheet young A few cases of thesetang absesses about Leucoma on 1 cornea Brown spot in r. albugines the ear, with great swelling of the external meature, terrible pains Red spots and streaks in white of 1 White became sity to rub them

scalp, with burning and with pumples in various margins, in morning, in forenoon, with itching and on places noon, in afternoon, in evening, with running of water from nose, < towards outer canthus, of lower, < writing

Pressure about orbits A spot on r lachrymal bone is swollen, pulsating and painful Vision dim, in evening on walking; confused, weak, flickering flickering at noon, muser volitantes, so that he could scarcely write, V as if a black plate were before eyes were drawn up and down, then the first sensation, then Sensation of a foreign body in l. at times with sticking in eyes and tearing in ears, >

Biting \*\*Itching\*\*, with burning lachrymation\*\* and photo-photon\*\*, < escenage and night, with pean as from said in the photon of the eyes, catarrhal inflammation of the eyes acute iritis in the later stages, especially of the syphilitic variety (compare Kali 10d)

Ears -Inflamed swelling at entrance of 1 meatus margins of lids, which are sensitive to touch and mo- Sticking; in I and in parotid gland, in I and in l. tion, in E and lids after dinner, in r. and inner sur- outer side of throat, in r in forenoon, in 1, extendface of upper lid after dinner, on fixing them upon ing into palate, I side of head and I outer cervical ning of water from nose, with indescribable discom- through external meatus, extending into r ear, in fort in nose, though accustomed to smoke every inspi-, afternoon when walking, drawing S through r. exterration through nose caused sensation like sulphureted, and meatus, their roams in head as of a distant noise hydrogen

Lachrymaton, with burning pain in eyes Pupils di- in 1 mistoid process Drawing extending into lower lated, and fixed Pain in ball Pressure on surface law, with salivation; Debind r; D behind l, and of r ball in forenoon, with burning Soreness of on 1 lower law, with tension of 1 cervoal muscles. caruncula Redness of conjunctiva, < r · with heat Stoppage of r, with burning in concha. Ringing.

Nose -Swelling and pain; S of alse yellow; dirty yellow, seemed loose, with yellowish-ulcerated away; in upper part, as far as its articula-brown dots, < 1, which also showed a brown spot near tion with vomer and ethmoid, and purulent inflammation inner margin of cornea, with heat of eyes and neces- of whole nasal mucous membrane; septum dotted with minute ulcerations Scab in l nostril, bleeding always Lids -Redness of margins; towards external canthi on removal Twitching in I wing and crawling like Swelling of r in morning on waking, till evening; S formication, extending over side of nose to eyelids, Swelling of t in morning on waking, in sevenia, so normal south expect whiching. Solvening from our clampt in canthi, dry M in lashes in morning. Agglutantoso orbital carb to outer angle of ege (compare Cinnab.) as morning, and white of eye reddish-yellow, with very morning, citil moon, 5 towards evening, with thing of eyes, eyes weak and drawing back in other, the man begin Fricking, with sneezing, then the mem-with pain in lide on touch and lachrymatin, with brane begin Fricking, so the meeting the man begin for the property of the members of the property of the property of the members of t lachrymation, photophobia, tiching and burning. Gran-perforated, then detached Sticking in r. side on blow-ular. Twitching in r when reading and afterwards, ing, as if two loose bones rubbed against each other, with dis-Statches Smarting of external canthus. Raw feeling charge of greenish offensive masses, every portion which en margine Roughness of margins, so that winking causes passed through posterior nares had a disagreeable taste, then rubbing against balls Inner surface felt thick and rough. T nostril was filled with hard masses, ulcers in external borness of tip of nose. < r side

Burrowing inside root (in ethmoid bone f), with beating Burrowing inside root (in ethnoid bone?), with beating and extensible heat and throbbing rhythmead with pulse, in morning on washing; from r nostril, waking him in foremoon nose scollen at root and hot, nose seemed thack and full, she abstance in the incidence to blow it on account of a their from r, waking him at night, after eating, sudden a weight were hanging to it. Pain; in root ([gn.), nostril after beer during supper, thick dark blood in bones (K tod); in r bone; in bones in morning; from r nostril after eating, then tucking in nose exin septum, c touch, with burning. Pressive and tending from r nostril after eating, then tucking in nose exins septum, and in margins of nostrils, with swollen, mouth? Smell very acute; offensive drawing pain extending from r nostril with cruciations and taste of rancid baccon, which was the swollen in the root of the property of the root of th tril into r auditory canal Sore pain on r side of blunted; lost septum, < touch, then a burning. Soreness, a septum, < touch, then a burning. Sortness, a yellow scab on outer surface of septum, chiefly at junction of septum with lp; of mucous membrane, in r. nos-herns escretions, these may exast a subscute or chrone inflamtril, and dorsum painful to touch; as if nostrils were matten of the mucous membrane or there may be ulceration, but

r nostril on drawing in air Tickling; in I nostril, leaves very sore places or ulcers, is a strongly-marked characteristic in I nostril, extending upward, in evening in the of the drug. Nasal polypi house: with itching and with crawling in I side of nose and twitching in margin of 1 lids Itching, Flushed; cheeks nose and twitching in margin of 1 and 2 county | Financi; energy | need to blow it after dinner, though there was nothing through r zygoma towards forehead Tearing in I in it Full in morning on waking

nostril in morning after rising, with burning, in evening, with pain in root, as in beginning of stopped catarrh, extending to temples and affecting head, with swollen theness of bones (Aur) sensation, the walls feel stiff and relvety (K iod); with easl side of upper law sore pain in r nostril, with tension in wings and septum, and cavities dilated; towards root, extending into frontal sinuses (K iod.), with sore feeling and with with drawing and salivation burning, < r nostril, extending to frontal sinuses; of margins, which are covered with thin scales; sensation in ostem of 1 ramus Statches towards 1 car Sensitivemiddle of 1 ala as if dry or denuded, dry and pain- ness in upper, < beneath orbit Burrowing in raini Borful except in morning, when there was a watery discharge, after dinner cough forced black coffee into side of lower. Pressure below orbits after breakfast nose, which caused dryness and pain in nose

secretion after dinner, with sore pain on margin of tense nostril; of mucus streaked with light-colored blood, scanty, burning in outer margin of septum as if sore Watery covered with pimples or acue discharge; in morning, causing burning of upper lip, Mouth.—Toth Stitches in 1 molars and in an antowards noon, from r. nostril; causing corrosive pain terior upper incisor, in hollow and sound 1 molars on outer margin of septum; from r nostril, causing Tearing in l lower molars, with statches extending into burning on margin of nostril and on upper lip, with ears and I temple, sudden drawing T. in all I teeth, mo-

ders of nostrils, ulcers burn, < 1 nostril, then sensitive-|tril; sudden, from l. nostril; from r nostril, then dryness of nose.

Bleeding; from r nostril, waking him in morning;

tril, and dorsum painful to touch; as if nostrils were matton of the amoous membrane or there may be ulceration, but siff, margians feel sore Sensation as if water had been drawn up violently! Surring, misde near lip, in r side near tip, in foremone, and in upper lip, in outer margin of r nostril in evening; in r nostril after dimner, c. touch, in r nostril, then tricking of bright blood representations of the most of the margin of r nostril on drawning in air Tickling: in 1 nostril. In formation of 'cithers' in the neas, the detections are received as the surring transport of the margin of the most order of the most

Face.—Swelling, of r cheek, < over malar-bone lushed; cheeks Pale; and sickly, and cold, and side, periodical T in bones Acute pain in infraorbi-Dryness (Sin nig); r nostril, in morning on wak-|tal part of malar-bones | Pain in bones, < iinfraorbing, in morning on waking, then discharge, of r |tal part of malar-bones | Pain in bones, < iinfraorbing, in morning on waking, then discharge, of r |tal part of malar-bones | Pain in bones, < iinfraorbing, in morning on waking, then discharge, of r |tal part of malar-bones | Pain in bones | Pain tal region and in nasal bones, P in side, < zygoma and towards ears, r, then 1, in cheek-bone in evening Pressure outward in zygomatic process Sensi-Bruised pain in bones, < tacial side of upper jaw Sore burning in fossa between r wing of nose and cheek. Tension of muscles, making features rigid, a sickly expression, of masseters,

Jaws -Tense circumscribed elevation beneath peri-

Lips -Swelling under nose in forenoon, with red-Sneezing (Iod), in morning, after eating, after ness, S beneath r nostril, with redness and blisters Since any (1001) in maximum, and the strength of the strength extends through choanse into nose, in paroxysms, per Ulcration of mine surface, U, with indurated violent Coryza, sudden, < r nostril, fluent, puru-edges and smarting. Itching vesicles on margins, burnlent. Plugs. Clinkers, which if torn away too soon cause ing in evening Itching of eruption, though it had belent. Fings. Canters, when y tora away too soon cutees ing in evening. Itehing of eruption, mough it had one seveness at root of nose and inderance of bloth. Always gun to dry. Dryness in morning, with burning, D in full of thick mucus. Discharge, in evening (Puls.), with forenoon. Burning, beneath nose, on inner surface swelling; from r nostril; from lower part, increased of upper, smoking burns lips, which are dry and

Clinical.-Frequently a valuable remedy when the face is arrid, causing burning on septum; acrid, from r. nostril, Clinical.—Frequently a valuable remedy when the face is thin, acrid Thin discharge; from r nostril; with blotched, or when there is more or less indigestion and the face

redness of nose and fetid smell; with soreness, sneez-mentarily > pressure on lower jaw, lasting till towards ing and snuffling in speaking; unnoticed, from r. nos-midnight, next morning swelling of gum, which was

painful near a 1 lower hollow molar, at noon drawing | < smoking; sharp, sweetish, resinous, nauseating, < tearing toothache on same side, with stitches in jaws | entrance of fauces, after breakfast, < a glass of water; extending to ear, temple and neck of same side, that astringent, nauseous after dinner. side of neck sensitive to touch, cervical glands swollen, tearing in various parts of limbs, tongue coated yellow, in evening tearing sticking through head, at times cutting, with chillings, and flushes of heat in I, side of head and face, pulse rapid, next day intermittent tearing in I lower teeth, with sensitiveness and with sticking tearing in 1 car, temple and side of neck Burrowing in all I after midnight Gnawing in roots of all at noon Boring in r upper molars towards evening. Aching, with salivation Sensitiveness, of upper incisors

Gums-Lavid Bleeding on sucking Pain in L upper, extending through lip to wings of nose, with inflammation, then an oblong abscess above eve-tooth. between hp and gum Sensitiveness Uneasy sensation in evening

Tongue -Smooth, red and cracked, during dysentery (Rhus, Merc, All); red and dry Papillae very long on does non, with a brown patch Coating, in morning, with dryness; thick, loose, yellow, yellow, except at edges, whitish-yellow; white, yellowish-white, yellowish-white, in morning, with nauseous taste and qualmishness, in morning on waking, a light brown, on dorsum Painful ulcer Eruptive (tetterlike?) swelling which became depressed and out of its hollow oozed blood Stinging Pain at back of and on velum Burning in tip.

Apathæ Burning pimple on inside of I corner, next day it was a painful ulcer surrounded by hard swelling, next afternoon burning in mouth, < inner surface of hips Rough, papular, elevated appearance of velum Excavated cicatrix on roof, from which a slough separated, no pain till separation of slough A stream of thin blood comes into mouth Construction Burning caused by smoking Dryness (Rhus t., Puls, etc), in forenoon, in forenoon, with bitter, astringent taste, < lips, without thirst Salivation, after smoking; till noon, with nausea, with cooling, salt, astringent, metallic and then bitter taste, with salt eructations, watery, then frothy, yellow (Phyto, hawking loosened large quantities, with eructations of air Breath fetid.

Taste -Flat Pasty in morning Salt in afternoon. Bad, to water, on smoking Musty in morning Putrid Of rancid bacon Of blood Sweetish, when smoking, after soup, then pressure in stomach; S resmous, < middle of tongue, < if it touches hard palate, when smoking Saltish-sour, sweetish-sour and astringent, after breakfast, cool-sourish on back of tongue and in throat in morning on going out, with nausea Astringent at root of tongue, resinous, A, sharp, A when smoking, extending into fauces, sweet-1sh A , with watery salivation Nauscous , after breakfast, < root of tongue, on putting eigar into mouth, lost, < root of tongue, on putting eigar into mouth, N, sharp scraping when smoking after breakfast N, sharp satringent when smoking after breakfast bit. 
The stripe of the stripe

Clinical.—Syphilitic ulceration of the tongue Aphthous inflammation of the mouth.

Throat --- On r. side of root of uvuls, an excavated sore, with reddish areola containing yellow tenacious matter. Ulcers on tonsils and throat (Ail, Lyc etc), the surface of which was covered with an asky slough, and the surrounding mucous membrane dark, livid and swollen Uvula and tonsils red, swollen and painful, then ulcerated Redness in morning on waking, with inflammation; R. of fauces, with relaxation of uvula, R of fauces, with elongation of uvula and sensation of a plug in throat Erythematous blush of fauces and palate, of fauces and tonsils Coppery color of fauces and soft palate. Hawking of much tenacious mucus in morning; and relatinous: H of thick mucus in morning, also with sensitiveness of larvnx and trachea, of mucus in afternoon, of mucus and copious expectoration of thick bluish mucus, H expectoration of white frothy

Stitches: on empty swallowing, on swallowing and speaking, < moving jaws sideways, extending into ears, with redness of anterior surface of arch of palate; in l. tonsil towards ear, > swallowing. Soreness as from a broad substance covered with prickles, impeding swallowing Feeling as if something were sticking in it when cructating Feeling of adherent mucus in morning (Kalic) Pain, in morning on waking, at palate on waking, > open air; on swallowing, < moving jaws sideways, with red spots as if ulcers would form on anterior arch of palate Drawing pain here and there, at first in front between lower jaw and hyoid bone, then in ethinoid bone extending to behind ears.

Sensation of a han in fauces Scraping, in isthmus faucium, causing vomiting, in isthmus faucium, in open air, when most severe causing cough on every inspiration Rawness, of pharynx, in morning, m morning, with frequent hawking from larynx, in night, with burning, causing hawking cough Raw rasping sensation Roughness, with hawking of mucus Constriction of fauces Coldness, with mability to swal-Merc), swectish-sour, salt, bitter, tenacious (Phyto, striction of fauces Coldness, with inability to swal-Puls, Merc), full of bubbles, < smoking, forcible low saliva quickly, C. in posterior wall, gradually increasing to a dry scraping that caused painful cough. Feeling as of rush of blood. Heat, in pharynx; compelling dry hacking Dryness; in fauces, in morning on waking, with painful swallowing, after midnight, < upper part of larvnx, as far as hvoid bone, with scraping and burning, with pain on empty swallowing, the D changing after washing to the usual secretion of mucus, and saliva was salt, obliging her to swallow saliva, on swallowing burning swallowing; > evening, then rawness and scraping in fauces, with salivation

> Esophagus —Choking on swallowing, then a statch through upper part of r lung Sensation as if food remained in it Burning.

all these cases we find profound prostration, soft pulse, tendency to matter, light yellow, ınsipid fluid when walking in perspiration, general lask of acute passful sensations, slight infli-tration of the cellular tissue and very tough, adherent studistion.

nausea and salivation Good at breakfast, soon chang- bitter, bilious matter, with headache, fine scorbutic ing to disgust, so that he had to leave the table eruption covering face, taste bitter and salt, thirst, ex-Hunger, with aversion after the slightest food Di-ternal flushes of heat and internal chill, difficult, from minished : for breakfast. Burning vomiting much food and mucus, with low spirits, pal- constriction in anterior surface before dinner, < presslor, blunted sensibility and weakness, N. in epigastric ure, with nausea and salivation Wavelike contraction region; N, with headache; with vertigo and confu- at 4 PM, extending to chest Tightness in evening sion of head, with hot eructations and meeting flat sali- fasting, extending to chest Oppression in pit, with

Indigestion Disordered by meat, by anything but the mildest food, D, with general heat at night, yel-Vomiting; with violent retching, also after break- low-coated tongue, gnawing at epigastrium Discomfast, in evening after black coffee, with effort, with fort in epigastric region, increasing when walking in vertigo, burning pain in stomach, general anxious open air to nausea and almost aintness Uncasiness, sweat and shivering, the ejecta in forenoon consisted about greater curvature, as if overloaded, waking him, of food but in evening of bilious fluid, of a punket with screness and tenderness, < a spot towards 1 of glairy fluid; of clear watery fluid; resembling the rice xyphoid cartilage, with dir mouth, nausea, restless-fluid in cholera; milk is ejected (pink), with very sour ness and wakefulness, heat of hands and feet, then smell; of white mucus containing a clot of bright sweat of hands, feet and legs Hearthurn; in creaning blood; of mucus and blood, also violent, sour, on after ter; on waking in middle of night; after dimier stooping or moving, with pain at epigastrium; of un-Burning pain; in pit Burning, in attendoon, after dimdigested food, of contents of stomach, with painful ner; with salivation, extending into throat; extending into constriction of stomach, then persistent retching, then mouth, or soreness, also on waking Coolness, and in

sensation as in seasickness, bursting sensation in blood- waking me, then expectoration of blood, with short vessels of head, smell and taste keen, the nausea < paroxysms of cough and rattling in air-passages, the Ipecac, < Camphor, with general chill and shivering, cough and easy expectoration of blood repeated every trembling, cramps in stomach, then soreness and achieve hours, next day posterior wall of pharynx dark, to the 1 a fissure from which the blood issued, on men, with names and vomiting. Gastro-enteritis, catarrh, with swallowing sensation as if a dry morsel stuck in discharges of stringy mucus. throat, frequent, sudden hoarseness and then scraping on posterior wall of curtain of palate and in choans, often tenacious, metallic-tasting mucus was drawn from these parts, also boring drawing pains in bones of limbs (as often as the troubles in throat were relieved, and vice versa) Faintness; before breakfast; but want of appetite Feebleness in morning

Clinical.—Dyspepsia, especially associated with nausea and vomiting, nausea and vomiting of drunkards, nausea and vomitvomiting, naises and vomiting of orthesards, naises and vomiting with ulcration of the stomach, with soreness in a small got in the stomach. Dysepesse resulting from mait liquors, with flatilatery, oppression after esting, naises, and vomiting of mucus. Acid dysepsis, with sour vomiting coming on an hour or so after stating (194s). Oastric catarrh, with vomiting of glairy mucus, tongue thickly coated

Abdomen -Distention, after eating; after dinner, with discomfort, with sensitiveness Rumbling, after stool, after breakfast, with griping, then a second thin intestines, with nausea, then pasty stool, then burning from perincum into urethraand tenesmus in anus

Sticking, extending towards spine Cutting; in Burning atter stool

side, increasing and decreasing in paroxysms Grip- ing, then tenesmus ing in upper; on going out after breakfast, and in little had passed ing in upper; on going out after breakfast, and in luttee nan passed middle, so that sweat stood on forehead Spassmodic Constitution, with pain across loins, every three constrictions of upper Region of sigmoid flexure months Hard, then burning and pressure in anis; H tonder Sticking beneath umbilicus Griping be, and seantly, then burning in anis, H and seantly; H neath U Pain in umbilicus legion, above and to, and lumpy, and unsatisfactory, and unsatisfactory, I of umbilicus; in a spot to r of U, in umbilicus difficult, and difficult, painful; and infrequent, with after breakfast, rising into throat Weakness above protrusion of rectum. Bloody and panish Pale, umbilicus on waking at 5 AM Midway between slate-colored Copious, reheving abdome, but return building and suite of the protrusion of resin affect days. Card deat with two controls and the protrusion of the

pressure Sticking in hepatic region; till afternoon, second diarrhœa-like pressure Stocking in hopatic region; till atternoon, in evening, c. pressure; sudden, when walking rapidly Tearing shooting in r Stocking pinching labeling the properties of the properties of

neck, < stooping, causing a stretched sensation, with restlessness and depressed spirits Pain in 1 groin darting through to r Griping as if something pierced bulbus wrethra; B. in glands of wrethra when wrinating bowels, < deep inspiration, > pressure Pain in r. and afterwards, B in navicular fossa when wrinating. bowels, < deep inspiration, > pressure Pain in r. and afterwards, B in navicular fossa when urmating, groin and r hip, P in groin as if a hernia would Irritation at orifice of urethra (male) Urging before protrude, Bearing down towards r. groin. Uneasiness in r iliac region on waking

stools dark urine, nauses, sometimes with soreness over the abdo- urine.

Rectum.-Urging before usual hour, urine before stool, after stool colic and debility; U, waking at 6 AM, she could not reach the closet soon enough, a watery stool spurted from her, then tenesmus, U and only a spoonful of liquid but relief of discomfort in abdomen, meffectual U after dinner; U, but passage of only offensive flatus.

Anus.-Statches Dragging; after hard stool, then pressure in hamorrhoidal vessels, then D. and pressure during dinner so that he could scarcely sit; > emission of flatus, with pressure, in hamorrhoidal vessels after exercise, with burning Pressure; in forenoon, with burning, desire for stool, sudden sweat, < face, disappearing suddenly, emission of only flatus; in hamorrhoidal vessels in evening, when sitting after exercise. Painful retraction, < on days when there is stool, then retraction of anus and nausea, with discom- no stool. Burning pain Burning after stool (Iris, fort about umbilicus; with profuse, pasty stool, then Sulph), in forenoon, with pressure Soreness; towards tickling in rectum Gurgining Movings Emission evening, < walking, after prolonged motion, with of flutus; offensive Ulteration Gastro-intestinal indragging in harmorrhoidal vessels Sensation of a plug flammation, with cramps in various parts, < calves in afternoon when sitting Fulness of hamorrhoulal vesand inner part of thighs Sudden contractions in sets. Biting Itching, when walking. Acute drawing

Stool .- In morning on rising, then soreness in anus Dysenteric attacks for several successive years, frequent all directions, towards noon, < parietes Griping, bloody stools, with quawing at navel, then ineffectual strain-in morning, then semi-liquid stool, with rumbling, when ling. Of brown frotty water, frequent, with tensenus, bloody stools, with quawing at navel, then ineffectual strainwalking in forenoon; from a draught of air, with grip- pain in abdomen and nausea, then sudden complete rest ing, with intermittent nauses, occasional Pain, with Liquid, involuntary, two L. in quick succession, then durnbar. Sore to presente Constriction Tension, burning in anus, semi-liquid, then griping in intestness. in evening after chocolate, with heaviness in stomach Diarrhon; profuse, constant, involuntary, constant, involuntary, of mucus and blood, greenish-yellow, partly Rumbling in colon, < inspiration Cutting in 1. diarrhea-like, sudden, profuse, in evening, with grap-Pasty; then feeling as if too

umbilicus and spine of ilium, in ascending colon, of pain after dinner, C and dark, with tenesmus a tender point, which often bulges out the proposed of colored, twice a day, S, twice a day a frequent; and afficence at the proposed of colored, twice a day, S, twice a day a frequent; and afficence, extending into lumbar region, condon and dark coffee-colored; two daily, the first normal, the

Hypogastrum—Sticking in r flank, extending to Urinary Organs.—Sticking in prostate gland in after-l clavicular region and aeromion process and side of noon, preventing walking Escape of prostatic fluid at stool. Sticking in urethra, < after urinating Smarting in urethra during micturition. Burning in the usual hour, constant U. Some time in passing urine. Frequent micturation, with burning after urinating; fre-Clinical.—Duodenal caterrh, sometimes with jaundice, white quent M at night, of copious, watery, strong-smelling

Urine red. with pain across back. High-colored; on waking; C. from tickling in throat, with comous expectoand hot. Brownish Turbid in afternoon, thick ration of thick lumps of blush-white mucus, C in fits from mucous sediment; T at night, with copious sediment. tickling at bifurcation of bronchs, with expectation of reddish Milky, contained pus, reaction acid. Scanty, and reddish (with pain in region of kidneys, etc.), and high-colored, with pearly-white sediment; with white film and whitish deposit None passed. Mucous

Clinical.—Subscute or chronic inflammation of the urethrs, on urnating it seems as if a drop of urne could not be expelled performant of bugh macus, with lightness in head and it troubles the urethra for a long time, with these symptoms there is usually burning in the foss navicularis and in the bulbous in strings down to feet. Tough light-colored E E of portion of the urethra after urmating

Sexual Organs.—Itching of penis and rectum in Dyspnusa; in sleep; in morning on rising, as if evening; I of hairy parts, increasing to inflamination, mucous membrane of bronchi were thickened, < pustules, with itching and tearing, night restless, pustules united into an ulcer, in which paroxysmal stitches woke him at night Pain in penis Constriction at root of penis in morning after waking Erections

Clinical.—Venereal ulcers, especially true chancre, to which it seems particularly homosopathic, with the characteristic chees, tenacious exudation Yellow, very tenacious leucorrhoza Pruntus of the vulva, with great burning and excitement. Several cases of prolapsus of the uterus, particularly < hot weather

Respiratory Organs—Mucus; in marising, in bronchi and nose without real catarris Bronchitas. Dryness of bronchi, in morning on waking Burning in bronchi made nose without real catarris. Bronchitas are provided in the constant aswing respiration, with the harb rough voice with the constant aswing respiration, with the harb rough voice with the constant aswing respiration, with the harb rough voice with mode and chronic bronchita with great wheeing and very longh when coughing. Larguz, mucus a morning, mucus, seperatoriator, which must be pulled out of the mouth to prevent obliging the area of controlled to the mouth to prevent of the provided controlled to the mouth to prevent obliging the provided refused its service; roughness in morning after rising, obligma hawking: irritation in morning, causing hawking, tickling at dinner: tickling, causing cough and clearing of throat, tickling extending into mouth and ears (preceded noon, renewed on deep inspiration, in evening; in by pressure)

Hoarseness; in morning, with mucus in larynx; in morning on waking, < till noon, > eating, then aggravated, with at times scraping in larger and hawking of thick bronchial mucus all day: in morning on waking. < till late in evening, with pressure and scraping in largue, and in even-ing hawking of mucus; in evening, with dry cough, > expecturation of thick, tenacious, yellowish-white mucus, sudden, in evening, and rough voice.

Cough, when exercising, after meals; from tukling, from irritation in trachea Irritation to cough, sudden. then dry, difficult cough, with expectoration of thick white mucus Hard C, with weight and soreness in chest and expectoration Short Dry, in afternoon; D, then ex-axilla, in region of clavicle, in a spot to r of centre pectoration of dark tough mucus, short D, from tukling in of sternum, next day stitches there, in a spot in larynz. Hacking, in evening, with hoarseness. Dry hack-upper lobe of r lung in forenoon when sitting, then ung; in evening, in evening, with hourseness, with stitches drawing internally along r chest, in r in evening penin chest Hard, dry, then expectoration of gray mucus of etrating to back, in middle of lung on waking at midthe consistence of white of egg Dry, tickling, paroxys-night, on pressure towards middle and to I of sternum, mal, with pressure in iniddle of sternum, extending on deep inspiration, in region of three last true ribs, to hyoid bone, when she coughed violently a taste of < deep inspiration, circumscribed, in r, < inspiration. blood, at last with expectoration of sweetish-yellow pus from deep in lungs Tickling C as if an acid and ness to touch, in forepart, in region of I fifth and acrid liquid flowed from choanse over curtain of palate, sixth ribs, as if in costal pleura, with burning, then in uvula and posterior wall of pharynx, afterwards with evening beneath r axilla, so that he could scarcely expectoration of bright blood in paroxysms.

Cough, with expectoration of mucies, C (with dyspinces), < morning, with E. of white mucus "as tough as broken, next day these pains extended over cervical pitch" and which could be drawn out in strings (Cocc. region, < turning head or lifting arm, impeding respicact., Lac. ac.), with E of yellowish-green tough matter; ration thick yellow mucus with traces of blood, dense, transparent,

mucus; short hacking C, with expectoration of tenacious mucus, also white, short interrupted C. in morning, which loosens lumps of tenacious mucus, then sensitiveness of laring: "stuffing" C, with parn at chest and yellowish, heavy, tough expectoration, loud C from "stuffing" at epigastrium, < waking in morning, he then had a fit of coughing, with ex-

mucus, thick, pasty; easy, white, salt

morning, with cough and difficult expectoration of black tough mucus Stertorous breathing breathing Short breath, as if something tight around upper abdomen prevented deep breathing

Clinical.—Catarrh of the larynx, subscute, generally with-Clinical.—Catarth of the largns, sucacute, generally windout fever, but with very tenancious expectoration. An extremely valuable remedy in the late stage of membranous eroup, (it is rarely indicated in the beginning), the pulse is soft, the child is weak, perspires, the ough is not dry, but house, barking, the expectoration is very tenancious and gage the child, who somatimes true to

Chest -Sticking in sides (Kali c), in inner surface of sternum in forenoon, in region of l nipple in foreupper part of r. lung on sneezing, through chest, < r side, beneath one pectoralis major, at another time in an intercostal muscle, irregular, in integument, superficial, in r; sudden, in inner surface of sternum, tearing, in whole l, from axilla to flank, as if in costal pleura, in morning on waking Darting pain in mamma (female), from middle of sternum to between shoulders, on coughing Sharp pains Pinching in upper part of r lung, < violent motion to sticking, next day sticking so that he must incline to right when walking and take short inspirations

Pain, beneath sternum, in r mamma, in r lowest ribs, under l axilla, in pectoral muscles beneath tion, in I, in region of seventh rib, next day sensitiveturn over in bed, get up or walk on account of aggravation of pain in muscles and bones, the latter seem

Pain consisting of pressure and sticking, in a spot lumpy mucus; thick, transparent, state-colored, in morning in costal pleura, in region of 1. seventh rib, in evenning, but foreing him to respire deeply, warnth! iton, in coccyx at noon, with burning in saus; in Intermittent heavy pain in r, passing through to back, coccyx when sutting in foreion, in coccyx, after rising; then tearing Rheumatic pain between rs seventh and eighth ribs, at angles, < missing oil wristing body to l touch, with scanty high-colored urine; so that he Soreness, in evening, region of wall, under sternum, cannot straighten himself after stooping, such editions the sternum, cannot straighten himself after stooping, extending

striction. T in r half, at insertion of pectoral muscles, cending stairs and deep breathing, with pain. Dry- ing in sacrum, < walking, with pressure ness of lungs in evening, with rawness

Heart.—Sticking Cramp in region Darting pain in pracordium Sharp irritative pain in region of

pitation in bed, with pain in region of heart
Pulse.—Rapid, and full, and full, hard; and small, Scarcely perceptible

morning on waking Stiffness, of nape; of nape on bending head downward

into hip, theumatoid pains in B and limbs, as after parts, < r. great toe and r thumb taking cold. Drawing in all muscles, extending into. Pain in joints, P in shoulders and legs, in shoulaponeurosis, < bending forward or moving arms

after exertion Pain in r side of spine, about ninth places in long bones. Weakness in evening dorsal vertebra, with uncasiness in stomach.

Lumbar Region -Sticking, < inspiration and cough, S in I side and I groin after a meal, in I, then r,

Burning pain in middle of sternum, sudden evening, < when after long sitting I rose to urinate, B pain as from a knife-cut in centre of chest, be- when it extended into urethra and obliged me to bend gnning under clavicles and extending from region forward when urnating; in coccyx in morning after of lower ribs, < contre of chest, < deep breath-insing, in sacrum and coccyx in morning during coilike an ulcer under skin, causing pain on lifting arms, to nape, striking through to sternum, extending to Pressure, waking about midnight and preventing sacrum and down thigh, increasing to numbness, so sleep till daybreak, frequent P in forenoon, < be that he could hardly rise from a chair; paroxysmal neath sternum, P, with intermittent anxiety, anx- P in forenoon when walking afterwards at the molous P at night, taking away the breath Oppression, ment of sitting down, > sitting, changing in afternoon at night, < region of bifurcation of bronch, compelling to drawing pains in legs, in small of back again in him to take a deep breath with the aid of pectoralis evening, attacks of P in region of kidneys, extendmajor, in lower part on deep inspiration, with stick-ing to groins, < rest, with scanty reddish urine, nausea ing Tightness; all the forenoon Tension and con- and impaired appetite Acute pressure in coccyx in evening Sprained pain on motion Pain in sacrum T in anterior wall on deep breathing, externally in as from a blow at noon when sitting Drawing and 1 in evening when walking; drawing, in r side, < as pressive pain in sacrum in morning on waking. Draw-

### Clinical. - Neuralgia of the coccyv, . sitting

Extremities - Jerking in various muscles of thighs apex Pain; in evening, several hours after dinner, and upper arms in evening, with drawing Cramps with palpitation and auxiety, preventing sleep, cold, cracking in joints. Shooting and pricking pains in heavy, in cardiac region, with tightness of chest and morning, with general stiffness. Teaming in Jones; Tim ankles and wrists, in hands and feet; Tearing in long in joints, in joints, < r wrist and r fingers, < towards hands and feet; in r tibia, on back of r foot and r sharp Irregular, small, contracted Slow, and fili-form. Depressed and small Weak; and fluttering phalanges; in r tibia and r. ulna in morning on waking; in r ulna in morning on waking, then in r. tibia, Week.—Glands swellen and sore to touch Tearing > rising, in r wrist and ankle, < motion, in r tibua on slightest motion Pain in nape and I, shoulder in and various finger-joints, so violent in r thumb that he could not write; in joints, now in hips, now in knees, intermittent, in hands and feet in afternoon, par-Back.—Twitching in back and scapula as if liquid oxysmal, sudden, in a single fibre of legs, feet, foredropped on the flesh, it pulsates sharply like the key arms and hands in morning on waking; wandering, of a telegraph Shooting Pain from exercise; P in in various parts, drawing and T in periosteum of r different parts, > evening, running down on 1 side tibia, then in bones of r forearm, drawing T in various

upper arms, loins and thighs Tension in muscular ders, arms, finger-joints, hips and knees Bruised pain Rheumatic pains in nearly all joints; R pain in r Stabbing from third cervical to fifth dorsal vertebra, hip and 1 elbow; R pain, shooting and pricking, < striking to sternum, < motion, with mability to morning Drawing pain in 1 hip and from 1 shoulderstraighten spine after stooping Deep-seated shooting joint to elbow; in r tibia in morning, and drawing in under scapula at night, S at lower angle of 1 scapula, r hand; in 1 arm and in both lower limbs, < r foot, then in toe Acute pain at base of I scapula Pain and especially tearing extending into great toe, in under r scapula, at lower angle of r, deep-seated, at various joints, < r ankle, D and boring pains in 1 upper angle of 1, drawing P in 1 S and 1 arm, ex-lower limb and in 1 humerus. Tearing D pain in r tending into hand and thumb, in the joint and bone, tibia, r ankle and wrist, in various phalanges, < moving arm Discomfort between scapule Undu-thumbs, suddenly changing about Drawing; in fore-lating contraction of r dorsal muscles on sitting down arms and legs; on backs of hands and feet; in various

#### Clinical.—Syphilitic pains in limbs Syphilitic periositis.

Upper Extremities .- Drawing tearing in joints, sudextending down thigh, < motion Darting pain in deally changing its place Tearing in I shoulder, in renal region Sudden cutting, < moving or turn- r S, then in l. elbow and forearm; in S and upper ing, with scanty urine; C on outer 1 side of sacral arm of side not lain upon, on turning the pain went bone, shooting up and down Pain, in l. side between to other arm; jerking T from r S. to elbow; paralytic hip and fast vertebra, in sacrum and coccyx in morn. T. on top of r. S. Pain in l. shoulder, extending into ing, in morning on waking; in coccyx in morning on 1. chest, < moving arm, especially raising it; P. on waking; in coccyx in morning on waking and towards moving r as if joint were separating, < prolonged inactivity of the limb to painful stiffness, < raising torius, < walking, especially ascending steps, > sitting arm, afterwards pain, < bending arm at elbow and and lying, lasting till sleep. Tension on anterior sur-drawing it backward and outward, as in putting on face of r. Wearness clothes. Rheumatic pains in shoulders, < night; R. pain in shoulder and elbow on motion, with numbness from shoulder to elbow Spasmodic drawing in hip, acute, in knee only on walking with stiffness

arm. < near elbow and wrist: T and gnawing in I ankle. Sore pain in r, < sitting down and rising bones of r. arm and in r. thumb and index, in forenoon, indications of same pain in l., sudden T. in r | Leg—Swelling of tendo-achills, with pain Trem-deltoid in evening, with jerking Drawing in bones of bling, with necessity to sit down Twitching in calles. arms Arms weary R arm feels asleep or paralyzed Cramp of calves Tearing in r. tibia a hove at night, disturbing sleep Sudden cramplike pain in middle of outer surface of r upper arm, then sensitiveness Shooting in l. elbow Darting pain in outside of clbow. Drawing and tearing in r. elbow, extending into hand and r leg after midnight, prevent-ing bending up of foot Pain in elbow, 1

Tearing in forearm, in bones of r.; pinching T. above I wrist in evening Pain in forearms during the day, P in a spot on extensor surface of upper third of r F, more in muscles and partly in upper in r in evening Heaviness of r, in afternoon, with arm, with sensitiveness to touch Burning pain exburning of its skin, with tension, H on sitting down tending from middle of forearm to wrist, in lower end after entering house, with burning pain in a corn of 1 in evening. Drawing in bones of F; r, on radial side, D in aponeurous of muscles of r F Throbbing in 1 F Darting in r wrist; throbing D in 1, near panful on hard pressure Pain on r inner malleotus pisiform hone Hands shrivelled, wrinkled, dusky, Feeling as if museles of r sole were cut across, hinders. She let things fall from her hands, with weakness and ing walking Heels sore when walking Pain in weak

bone of first phalanx of r middle, in joints of r ing Pain in toes, with heat and throbbing middle towards evening Wandering tearing in various phalanges, intermittent T. in r thumb boring in bone of first phalanx of 1 middle, in evening, extending towards tip, > rubbing. Pain in second | Skin — Roughness on forehead, with burning | Ele-joints of 1, P in thumbs, in thumb in forenoon, vated cicatrices on r thumb; depressed C covering with metacarpal bone of thumb

that I could not be upon r. side at night, in morning traces burning pain on inner side of r lower leg, in evening after walking tensive drawing pain in whole r leg Tension in r in evening after a long walk, with heaviness Weariness

Then—Tramp, and in legs Durten pan does, panfal on pressure, a movable knot under a sai, ury. Then—Tramp, and in legs Durten pan deg, T an ulcerated spot like a corn, this hardens and is corn from 1 ham down leg; in muscles of anterior surface ered with a white skin Red, itching swelling on of r, with drawing; drawing T. in 1 hip. Pain in r wrist, then pain, then matter formed and broke the hip, after dinner, P. in scatte nerve; sching and skin and left a depressed creatix jerking pain in hip only during the day Rheumatic

Knee -Sharp pain. Sudden tearing in 1 in evening, preventing motion Rheumatic pains, and in shoulder.

Sprained pain in 1, on rising from prolonged sitting,
Arms swollen, painful and red Tearing in bones of lasted all the afternoon, at times with similar pain in Tensive pain in r Heaviness and tension

malleolus in evening, with pinching, drawing T in r tibia l'ain in bones, preventing rapid walking, < bending ankle upward, sudden P in middle of 1 tibia, suddenly disappearing, but returning, P in tendons of calf as if stretched, extending to ham and tendo-achillis, < walking, and causing lameness Bruised pain in one, then other spinal tibise. B or broken pain in bones, extending to ankles, < moving ankles upward, so that walking was difficult. Tension Wearmess

Hard, immovable swelling on r inner malleolus. drawing in arms and distention of veins of arms, forepart of I foot when walking and in a corn in hard Sticking in metacarpal joints in morning on waking skin of toe, > sitting still, returning in foot in after-Tearing on radial side of 1 hand Bruised feeling in noon after a long walk Sudden numbness in forepart bones of hands, hands and arms feel bruised and of r foot when sitting, with crawling Acute twinging paralyzed Drawing in I hand after dinner Hands in ball of I great toe, then in r Shooting in second joint of great toe at night in bed Sore pain in r Fingers -Twitching of 1 little Sticking through great toe, on inner side where nailjoins flesh, in even-

> Clinical.-Sciatica of 1 side, / walking and bending leg, < Gnawing | standing, sitting, lying or pressure

Skin -Roughness on forehead, with burning Eleextending to elbow, < motion of arm or hand, > hands Brown spots like freekles on forepart of neck evening, then sensitiveness of joint. Drawing pain Redness of index, with swelling and throbbing pain, in r thumb Tension in extensor surface of r thumb, then an ulcer on tip, with white overhanging edges > towards noon and telt only on violent motion and dark gangrenous centre Red elevation with a of thumb, and on pressure where radius articulates dark centre and elevated circumference, itching and painful Red, round spots on back, arms and hands. Lower Extremities - Trembling Drawing tearing, they formed pustules covered with scales, which came < in r great toe. Whole r. leg, < hip, sensitive so off and left dry ulcers, then colorless depressed cita-

> Swelling of arm as high as axilla, with pain, then boil-like elevation, which turned into an ulcer with a dark centre and white overhanging edges. Swelling in seat of a scratch, ulcer covered with a scab, dry,

Eruption, on eyelida and adjacent parts of face pain in r.; in hip, coming on at night. Bruised pain in Rash, beginning in hot weather Eruption like middle of r.; B. pain in r. hip when sitting, so that measles, < trunk and thigh, hands and face being he lmps in walking. Drawing pain on inner side of freest, mixed with pustiles, which do not break, but r. in evening; D pain in r. hip, extending to knee dry up and leave a scar Portions diffuse of hands, Sudden tensive pain in middle of r. missellus sur-degenerating into impedge. Acre og forc dórsnin

Sloughs on fingers and glans If there be the smallest wound (when applied to the skin) it acts as a caustic and destroys all tissues down to bone, with sharp pains, winter Pustules on hands; at roots of finger-nails, < 1, extending over back of hand to wrist, and on palm, on arms, with a hair in centre: P, then deep sloughs under them, P over whole body, with a black slough in centre on an inflamed base, filled with lymph, in r brow, painful, on back, also with bloody discharge Pustules like smallpox on face, on calf, covering body, disappearing without bursting

Suppuration of axillary glans, but they did not break Boil on r thigh, painful B on back near last r true rib Ulcers on face, hands; hands and body, index, on I scapula, with a scab, U, then elevated thumb-nail Vesicles on a red and elevated base (itching and burning, < exposure to steam), becoming pusinvading hands, arms, face, back and abdomen, V they healed

Stinging Itching in beard; I on r cheek, in vari- face; feet, with shivering over thighs and back ous parts, lasting into night, with burning in skin, in Heat in first part of night. Febrile paroxysms and legs, the scabs painful, smarting and burning, I of leg, then red cruption, which ran together and tormed scabs, discharging, with smarting pain, pustules on front of leg, eruption better in cold weather, I of forearms and hands, then pain and ulcers, from arms firmly, the ulcers left clean dry cavities, then External B over r trochanter major, with smarting, white cicatrices

Clinical.—The ulcers are generally circumscribed, penetrating, with tenacous exudation I has been found extremely used in tupos of the sluggish, paniless type Lupus, with burning pains (Merer) It is not infrequently indicated in measless when there is little or no fever but a tendency to ulceration of the eyes, with the characteristic discharge from the nose, diarrhea, etc. Also in measles a hearse, croupy cough, with tenacious expectoration. A great variety of skin diseases, with the general characteristics of deep ulcerations and adherent secretions.

Sleep .- Yawning , with stretching , constant, then pain in stomach, nausca and efforts to vomit Sleepiness, towards noon, with closure of lids, nodding, yawning and weariness of feet, in afternoon; in evennow in upper part of body, now in single parts of loss of sexual desire, imbeculity, idiocy, paralysis.

tion of feet then ulcers. Pumples, on forearms; on muscles Difficult waking in morning. Feeling in tion of reet, then theres, on joint many in missions of the had not alphy enough. Sleepless-arms, r half of face, red, on back of hand; itching, morning as if he had not alphy enough. Sleepless-on forearm and legs Initiamed jumples on forehead, ness Difficult falling saleep. Groaning and toesing r, on back, pantil, in r side of nose, towards about at night. On falling saleep starting, toesing about of arms, incoherent talking and then snoring. Restless sleep, towards morning, after subsidence of headache and nausea; and interrupted by dreams, unrefreshing Waking early; then restless sleep, then confused, heavy half sleep, in morning weariness. Waking at 1 30 AM; then falling asleep again Suddenly wakened from quiet sleep by fright

Dreams vivid, < towards morning, of various dangers and misfortunes Disagreeable D Frightful D. Nightmare at 4 AM, D that some one was lying across chest and abdomen, so that I was in danger of suffocation, groans, on waking covered with sweat,

blood in a tumult, after rising weakness.

Fever.—Chilliness, in evening, when vomiting, after vomiting, with general heat, in open air, temperature 99, with nausea External C, but not internal Internal C through afternoon nap, with burnpainless induration, deep, on wrists and arms; puin-ing in eyes, face and upper part of body, I with cold tel in cold weather, painful on touch, painful, under arms, but hot face and hands Shivering, in afternoon, < arms and shoulders, alternating with flushes of heat, sweat on back and inside of thighs, in attular and in some presenting a dark point in centre, tacks, paroxysmal S extending from legs over whole body, with sensation as if pericranium were constrictilled with serum on r sole, abraded V near umbilited, then heat with dry mouth and lips, next morning cus, with hollowed appearance, which remained after thirst, but no sweat Cold skin, < limbs Cold limbs r thigh; hands and feet, hands and feet, with flushed

torchead, with burning, of forearms and hands after night and morning General heat; at night, with dislying down, with burning in skin, in nape, with ordered stomach, with thirst, then cold sweat, then burning in skin, then on I shoulder, then I upper rigors, with general coldness, especially cold limbs arm and I chest, then on back, lasting from 6 to Heat of forehead. II of face, at 4 PM without red-10 AM, in afternoon a sudden similar I on loins, ness, in flushes at 4 PM, sudden, at 5 PM. during at might in bed, with heat, then hard, reddish knots rest Burning of feet, < soles, on inner surface of on thighs and legs, with depressed scurf in cen- r, on outer surface of l leg in forenoon. Hot and tre, surrounded by an inflamed base, I, then suppuradry skin. Burning in skin of forehead, in evening, tion and ulceration of moist surface of penis, I all with itching, in morning, < glabella; in middle over body, then pustules forming scabs, most on arms of F, in nose and r leg, in evening after entering house B in skin of face and head, without redness; in skin of face, < eyes; in skin of face beneath eves, in forenoon in open air, with feeling in sides of nose as if he would have erysipelas B in skin of nose near lower margins of orbits B in skin on inwhich nearly solid masses of matter fell on striking ner surface of r leg, in skin of outer part of l. leg

> Sweat; in evening when sitting quietly, on hands Anxious, when vomiting Cold, claiming. Cold, on forehead; on hands; on hands during vomiting.

#### Kali Bromatum.

The pure Bromide of Potash is dissolved in distilled water (1 to 99) for the first dilution.

General Action.—Like other potash salts it weakens the heart and lowers the temperature Its chief interest lies in the "Bromism" caused by it, the seat of which is in the spinal cord or the nerves leading to the brain cells. Tetaniform convulsions and even opisthotonos in animals, in man, general failure of mening, in evening, with weariness; after dinner, with tal power, especially loss of memory and of words and yawning, with headache Irresistible sleepiness, melancholia, ancesthesia of the mucous membranes, after dinner, in evening, then waked by twitchings, especially of eyes and throat, and of the skin; acne;

Generalities,—Emaciation. Marasmus. Diminishes another. Dull in morning, and depressed, irregular in the retograde metamorphosis of tissue. Diminishes gat, in afternoon helpless Stupefaction, < wellmuoous secretions. Capillary circulation affected, educated and active people. Coms
independent of heart and arteries. Threw himself down, closed his eyes, seemed above the earth, quite for single words, or one sullable is constantly dropped whenhappy Crouched by the fireside all day, devoid of ever that word is spoken, or two words are always interenergy and resolution Convulsions, > appearance of changed, forgot certam syllables or parts of certam words eruption, papules of acne united in areas, on these and did not speak these. Writing almost unintelligible areas yellowish points beneath skin, on the surface a from omission of words or parts of words, words are often crust, and where this was rubbed the surface became repeated or misplaced. Memory impaired. pocularly papillated Ataxia of limbs and tongue and impeded attendance Restlessness. Averson to exercise. Lary, mdifferent and sleepy Weakness, muscular, and bruised feeling in limbs and tong the muscular, becoming paralysis Inability to mode the self upright Faming Inability to move or feel burninshed nervous sensability in general and especially diminution of reflex sensibility. Insensibility. Complete sensibility. Insensibility, includes the moderate of the sensibility of the sensibility of the sensibility of the sensibility. Insensibility of the sensibility of the sensibility of the sensibility of the sensibility of the sensibility. Insensibility of the sensibility peculiarly papillated Ataxia of limbs and tongue

Clinical.—Convulsions, epileptiform in character, but it is doubtful whether the drug really curse true spilepy; it certainly suppresses the convulsions for the time, in many cases, but it does not seem to remove the constitutional lendency to their recurrence, nearly all cases of epilepay are obliged to continue taking the drug, often in increasing doses, in order to obtain its pallfative effect

Mind.—Dehrum Delusions about persecution and violence Imagined that he was singled out for Divine sistance were lost, with staggering Pain in forehead vengeance, loudly deployed his fate, but at intervals tell asleep suddenly, then sound sleep, next day he dinner, < 9 P.M Pityriasis of scalp. walked the room, groaning and wringing his hands, said the officers were in search of him for robbing a friend Delusion that she was deserted by her friends, hence she passed her waking moments, which were his appearance and manner similar to those of a Vision disturbed, weak, lost drunken man, except that he was very pale, pulse slow, skin cool, pupils contracted, manner excited and synchronous with pulse. Hearing disturbed, weak-rambling, hands constantly busy, timid and suspicious, attempted to throw himself from a window and scabs. Nasal mucus contained the sait. Smell weakbattered down a door to escape from danger Delu- ened sions, with melancholy, imagined that she was insulted and that the weekly bills of the landlord were tic, dirty yellow Thin. Expression wearied, and evidences of a conspiracy against her father, gave a anxious Stupefied expression, becoming that of imloud shrick and declared that she had seen her brother becility, then of idocy Looked queer in evening, next fall overboard Violent excitement, glorying in his morning as it frightened. imaginary power of mind and body, then despondent, sullen, often lachrymose, frequently even despairing Tongue red, dry and colarged, R and most, then dry Feeling that everything felt, seen or thought had been and brown, T coated, T painful and papilla promiexperienced before, as in a dream Hallucinations of nent, with roughness and burning through mouth and sight and sound, with or without mania, precede fauces; disordered action, difficult speech. Speech anathy and paralysis.

est man alive, then crying bitterly Bursting into speak Dry mouth Mucus increased, M becomes tears without cause Sadness; and indifference, alsucky, ropy M. on mouth, lips and tongue Saliva-most disgust for life; and feeling of approaching tion, then dryness of mouth, with thirst Frequent death; and absent-minded childish, giving way to spitting of viscid salva. Salva contained the salt, her feelings. Anxiety. Listlessness. Confusion. Inability to concentrate thoughts, slow perception Think- quor and sleepiness Taste salt, T foul; weakened; ing power slow. Loss of will power on waking, with torpor. Inability to express oneself. Weak, and in talk- Throat.-Mucus membrane of fauces injected; paling and writing substituted one word ending in "tion" for ate and pharynx, and swollen, uvula swollen. Con-

Head .-- Aching: developing a sort of dulness and giddiness, as in some forms of typhus, with heaviness and pressure on forehead and temples Confusion; when walking, with heat Heaviness Vertigo, with confusion, with drowsiness and sometimes with stupor, with faintness and nausea, on standing up, < walking, as if ground gave way and the sense of reand occuput, in r frontal protuberance after a simple

Clinical.-It has been used for congestive headaches, with benumbed feeling in the brain, or with vertigo

Eyes.—Hollow, fixed Expressionless, lustreless. not many, in tears, another delusion that she saw her Hazy condition of bloodvessels Glazed Retinal child dead, and when it was brought to her she refused vessels contracted Pupils dilated; and uncontractile; to acknowledge that it was here or resembled the one contracted Bloodyessels on fundus enlarged Conshe imagined dead. Delusion that lewd women had gestion of disc and retina, C of conjunctiva Sensigot into his mother's house, that he was pursued by bility of conjunctiva deadened. Constant closing of the police, that his life was threatened by members of Ilids, more noticed when sitting than lying Drooping his family, that he had gold sewed up in his clothing, of lids, so that they hang far over balls "Lids heavy."

Face .- Pale , ashy , and suffering Yellow, cachec-

Mouth.—Gums paintul, sometimes red and swollen. athy and paralysis.

hesitating, stammering, slow; slow, difficult and not Singing and dancing, saying that he was the happiseconded by operations of intellect. Inability to

gestion of uvula and fauces, then orderna. Tickling, varied, increased by small doses, chlorides increased, Irritation of T. and stomach; of fauces, with orderna save when the bromide was acting as a poison, and redness, sometimes with paleness of the parts. amount of potash increased.

Drynness of T and vucnity, of occophagus. Anaethesis (Clinical.—Dabetes, with impaired memory, dryness of the of fauces; of pharynx and larynx, of velum palati, uvula and upper part of pharynx; of mucous membrane of fauces and upper respiratory organs, in region of veil of valute. so that touch did not cause vomiting, but movements of deglututon were intact Swallowing difficult, in morning on waking, impossible

#### Clinical. - Amesthesia of the throat, the effect of alcohol

Stomach.—Appetite increased; decreased, less for breakfast, lost for dinner; lost Thirst; but inability Stomach.—Appetite moreased; decreased, less for breakfast, lost for dinner; lost Thirst; but mability to drink only a mouthful, as cool water is unpleasant, for cold drinks. Craving for wine. Aversion to cold many many than the control of the corrections, nauseous. Nausea, at thought of tobacco, < lying on I side, with pain in stomach sections of trothy volunting repeated services of trothy. Vomiting, repeated, serous, of irothy Fulness in epigastric region, with heat and mucus Habitual gastralgia Pinching or conpressure striction Agony in region Anxiety. Peculiar pressure in epigastric region Oppression after dinner Burning, then empty feeling, > eating Weakness Sore feeling

#### Clinical.-Persistent hiccough

Abdomen.—Rumbling Flatulence Emission of flatus Pain, sudden, disturbing rest at night, in course of ascending colon, in umbilical region; periodical, in umbilical region, with sensitiveness to touch, flatulent, in region of duodenum at 4 30 A M , > watery diairhea during the day Warmth Uneasiness

Stool.—Tenesmus Liquid, and frequent Diarsoft, and frequent Constipation Hard and infre-quent Increased Sluggish Diminished in weight and usually delayed

# Clinical.—Polypus of the rectum, with persistent distributes

ing partial slumber, with irresistible urging Burning to coccyx, then half way round body, into intestines at neck of bladder, with sensation of a ball forced from and all through him, from head to feet, < abdominal behind, then discharge of half an ounce of liquid like organs, then neuralgia up and down spinal marrow, white of an egg, with nucus like milk Desire to uri- > port wine, which made him eat though he vomited nate, frequent, urme diminished. Burning in ure- his dinner thra, > injection of cold water, with smarting Smartwater

Frequent mucturation, urrine copious, also pale, watery, with distress, of thin, yellowish urrine; M every half

mouth, etc.

Sexual Organs.-Pain in 1 testicle and cord, with swelling and tenderness Excitement during partial slumber, < in bed, usually with erections and emissions, which wake him, and of which he is conscious Appetite diminished, then lost. Debility. Impotence.

Respiratory Organs .- Laryngo-bronchial weakness, sometimes with cough, sometimes with changed or whispering voice, rarely with aphonia. Hoarse Voice faint: whispering, sinks into aphonia Hacking cough, dry, fatiguing C, dry, paroxysmal C, resembling whooping cough, might and ulen lying, with difficult respiration, then vomiting of mucus or food Vascular "bruit de souffle" Sighing Respiration difficult. R anxious. slow

## Clinical.-Spasmodic croup, recurring every night.

Chest -Symptoms of pulmonary catarrh Oppression Tightness on breathing

Heart and Pulse.-Heart's action feeble; and slow. rhoa, with pain in abdomen; staining violet Stools and intermitting, and its sounds distant and feeble, action slow and fluttering. Pulse rapid and irritable; R and small, R, then at times slow Pulse slow, except during the vomiting, and small, and small, intermittent, and weak. Pulse low after the fever Small, and soft

Back.—Pain in region of kidneys Throbbing in Urmary Organs.—Distended feeling in bladder dur- lumbar region, spreading to dorsal region and down

Extremities.—Disordered action Constant twitching, burning paus on urinating, with sensation as if a ing of fingers. Hands and fingers in constant action shot were forced from bladder along urethra, constant Trembling of hands, during voluntary motion copious micturation, and just at the last drop of urine Handwriting shaky and indistinct Inability to spasmodic constriction of unethra about lacuna, with stand, to walk Staggering, on beginning to walk; sharp pain along back in bladder like forcing a large and his limbs shake and bend under him, with instrument into a small place, then whitish-yellow general appearance of intoxication, impaired locogonorrhea, relief only from bathing the parts in ice motion, resembling the gait of locomotor staxia. Weakness of lower: of knees, of extensors of legs and feet

Skin .- Discolorations and of mucous membrane. hour of about half a pint, urine pale, sp gr high, Dead-white, < face Aflections, < sebaceous follicles loaded with phosphates, of which a cloud was passed and glands and in sudoriferous glands, causing inwith the urine, the crystals could be seen when held fiammation, with increase of cellular elements. Eryup to the light, on standing the sediment filled thema and swelling of nose Hard, red patches on one-quarter the whole space, heat precipitated a white legs, with pains in and around them, the redness dissediment, which nutric acid dissolved Urine copious; appears momentarily on pressure, painful control of logs painful Erupton beginning pale or peculiarly offensave Urine pale and thin, on limbs, extending over whole body, except face, Urine scanty. Uric acid increased. Acidity and col. like crythems nodosum, itching < night and getting oring matter of urine increased, the phosphoric acid warm, in irregular patches, cherry-red at their circum-

pressure or exertion of limb On limbs and trunk, tense mottled epidermis, with a red infiltrated margin. in winter, elevated, smooth patches of different shapes, on cheeks were black crusts, which being removed of onion-peel color in centre, cherry at circumference, showed a pale red papillary swelling, which bled easily bases firm but elastic, as in erythema nodosum, red- on touch and seemed formed by stoppage of sebaceous bases mirror descape, as in erystems housenin, read-oness momentarily > pressure, they litch at night in follicles: Itching, < chest, face, shoulders, forchead bod and when warm, they partially reappear when, and nose, then small bluish-red pustules, with red rubbed, they are proceded by itching and pan in procise, becoming yellowsh-white at tips, there bases limbs, with stiffness, they leave subcutaneous indus-tions, which are painful on pressure, in one case edec- litch, with swelling, the cription greatest where the matous swelling of lower halves of lower limbs, in skin is thick or oily, lymphatic and sanguine constitu-one case fever, with dry skin and rapid pulse, then tions are especially liable to it, it is more shundant in sweat, in two cases only coated tongue and loss of appout and adult age petite, in one case yellowish discoloration on former Painful eruption h seat of one patch

on calves, with smooth, raised, shining edges, a cen-slightly red arcola bleeding when removed, while the tral depression covered with a scab and having a red front and outer side of legs were covered with the periphery and hard and sensitive base Moist eczema eruption, the skin around the spots red, tender, hot, on legs. On each leg two places covered with thick, with burning, tingling pain, movement of legs causes dirty-looking, offensively-smelling scabs, those when pain, the smallest spots, which were the most recent, removed by poulticing leave an uneven surface formed consisted of clevated conical vesicles filled with a

pustules in a circle around a cherry-red place where puscles the skin is raised and flabby, this patch surrounded, Furuncles, harry parts of face, on forehead and by a deep crythematous flush, the base of the patch neck. Vesicles on thighs and buttocks, afterwards indurated and painful

pressure caused pain like that in cuts on fingers, they ulcers. became covered with thick, dirty yellow, offensivelysmelling scabs, after the eruption yellow spots covered with scabs, at first nuclei can be felt in the subcuta-ing meal; constant dropping asleep. Sound sleep neous cellular tissue, and in the vicinity of these itch- in a chair in daytime Deep sleep, and disturbed, ing, even pain and cramp, the eruption more frequent from which I woke with a mental struggle, not know-

irregular crops, generally with heat and itching, usually cult. Sleeplessness Half sleep Restless sleep, fredisappearing without suppuration, the P. leave red quently wakened by voluptuous dreams, with crec-points. Pustules, partly whitish, partly reddish, on tions Frequent dreams, and confused, D heavy forehead and limbs, which on being opened exude pus and difficult to shake off

ference, onion-peel color in centre, turning white on mixed with smegma, one on l. leg was covered with a

Painful eruption like varicella on face and legs, became confluent, with many points of suppuration, a Patches on forearms, with pimples. Papules on band of eruption up each side of face and across foreforehead and scalp Red, painful pimples and tumors head, of elevated, flattened, light brown crusts, with by vegetation and looking like the stomach of an ox, milky semi-fluid inatter, the largest spots irregularly the patches red and paining like a cut oval, elevated, flattened, covered with flaccid moist Acne; on forehead; on forehead and cheeks. Acne cuticle or light brown crusts, under which were yellow pimples, with yellow tips Acuminated itching, burn- ish red prominences, the eruption began by a minute ing spots, similar to acno. < shoulder and region of red, hot and tender pumple, on the summit of which neck On each leg, above a dirty yellow scab of older quickly formed a small yellowish-white, tense, conical date, is a red patch of acne-like pustules, some of vesicle pierced by a hair, if the vesicle were ruptured which exude a creamy fluid like that from boils, be- and pressed sebaceous matter, with the root of the tween the pustules yellowish-white elevations of the hair, was discharged, it let alone the vesicle enlarged size of millet-seeds, where there is no discharge the land contained pus, the crusts of the older spots were surface is cherry-red and feels doughy, the skin around partially dissolved by ether, which, or drying, left he erupton light red, on r. cheek a similar eruption, is greasy stain, while the rest of the crust consisted but not so far advanced, vesicles and yellowish-white of epithelium and damaged blood-cells and pus-cur-

large elevated discs, with a surrounding zone of par-On lower limbs, < calves, red patches, but spotted tally desiccated vesicles, microscopic examination yellow, as from subcutaneous purulent infiltration, showed active hypersemia of the corruin, of the papillar with mamillated edges, sometimes the centre also and sebaceous glands, especially with corpuscular mamillated, the projections being acne-like pustules and fluid exudation. Ulcers, large, elevated uniformly so close as to amount to a swelling, their bases in- above skin, edges almost vertical, with no signs of durated, the projections partially coalesce, their tips cicatricial action, floors firm and grayish-red, with discharge a sero-purulent fluid, the centre of each here and there an adherent crust, the secretions fetid, pustule then presents an umbilicated depression, ex-samous and puriform, the ulcers bled on moderate uding a creamy moisture, which dries with thick yel- touch, the tissue of these ulcers so firm that it did not low scabs, these make walking impossible, but the look like ordinary granulation tissue, it was composed centres insensible, they have a reddish areola, with of large masses and at several points a slightly villous swelling, sometimes successive appearance of fresh or rather papillomatous appearance, the U looked like clusters of pustules, with mamillations, in two cases the epitheliomata, but they were symmetrical and showed swelling on legs changed into atonic ulcers like rupia, no evidence of malignancy, they began as papules, with foul-smelling, red bases, covered with vegetation, became boils, and after discharging degenerated into

Sensibility diminished.

Sleep .- Yawning Sleepiness , irresitible, after evening at first where I was, and often broken by starts, a Pustules, < face, scalp and back, in successive but sort of vague nightmare, sleep prolonged, waking diffi-

Fever -Chill Shivering Coolskin, and clammy and in arms. Faintness as soon as he moves a little. copious and viscid S.

## Kali Carbonicum.

#### Triturations of pure Carbonate of Potassium are used.

General Action -All the salts of potash are poisonous (even though potash is necessary to the integrity of tissues) They enfeeble the heart, lower the temperature and cause anemia. They promote tissue waste, increasing the amount of urine and its solid constituents, especially uric acid and urea (Among the notashes in our Materia Medica are to be classed Causticum and Tintur emetu ) In studying the symptomatology special attention should be paid to the character of the secretions from mucous membranes, to the pams and the time of aggravation

Allus -The alkahes in general, Hep, Lyc, Nux v, Phos

ternally on head, in nape and teeth, and sticking her thoughts that she must die swelling of cheek, S and crawling within ear, with | Helfal; in evening on falling asleep, and in morning similar sensation in stomach and esophagus | Tearing on waking, during dinner, with drawing pain in head, body, extending to head and eyes

every draught of air. Dread of open air (Hep., Nux v) > pressing eyes together
Perceptible beating of all arteries Pulsation over
Head.—Jerks towards 1, then stiffness of name

in evening almost amounting to nauses; after eating. with sleepingss, after eating, with throbbing in pit of Painful throbbing when writing, stomach and headache, after a moderate walk, with warmth in stomach, drops of sweat on forehead (in as if brain pressed against skull Weakness

Cold limbs. Heat, of head; in face Sweat at night; Much talk affects her Pains recur at 2 or 3 A.M., so that he cannot he, and are worse than during the day when moving Pains renewed in morning after usual stool. Aggravation in open air, especially of febrile condition. Amelioration from emission of flatus up-ward and downward.

Clinical.—This drug is generally indicated in conditions of weakness, with low temperature, soft pulse and mental indifference, the pains in every part of the body are acute, sticking, there is to be a subject to the pains of sharp chest-pains

Mind.—Dehrum Easily becomes violent Easily aroused to anger, A. in morning on waking, so that he gnashes his teeth Fears, about her disease, in Generalities .- Emaciation, with pallor, sunken eyes evening in bed, and aversion to society Easily frightand dim vision Twitching here and there Trembling, ened, < touching body lightly Anziety, in even-sudden, of hands and legs, and easily fatigued when ling. Sad, presentiments Weeping mood, in evening, walking Sticking is the most characteristic pain, S ex- after fatigue in open air; because it was constantly in

from within I car into external cartilage, and at the | < noon and eventy noise is unpleasant, same time in bone above and beneath r patella Sup- Impattent with his children. Housiness, in day of meses, from walking in open air, after taking morning in bed. A child desires to be carried con-icold in head, with toothache, 2 forenoon, with general Restlessness as if menses would appear, a shivering chill; > sitting up in bed, < lying down, week before menstruction working, > rising, < after-down, as if something moved in lead, < moving noon, after afternoon nap, with nausea, in evening, head Painful trusting internally Seaschion as if something in it were loose and twisted towards forehead

Constriction as from a band, after dinner Fulness winter) and trembling of limbs; < small of back, with fusion; in morning, with heaviness in region of brows; whiter and tremuling of limins; so mean on once, with placem; in morning, what nearniness in region or notwer; relaxation of cervical muscles and of arms and legs; in evening; in morning after raing, as if he had not with faintness about heart, e erymorating as if he would slept enough, with loss of liveliness; on waking in faunt or have erymor, and one of the enough with a ching, nausea, warmth and weakness in was, then anxiety; as after intoxication and as if ears put of stomach, vertage and vanishing of ideas, two were stopped, with nauses; intermittent, as if seriewed similar attacks in morning, tremulance W schen scaling, in, with acticking in brain. Rush of blood, with organical tremulance when scaling, in, with acticking in brain. Rush of blood, with organical contents of the tremulance in weakers. first in knees, then trembling in abdominal muscles in body: R. at night in bed and at times sensation as if senses would vanish: R causing intoxicated feeling Vertigo, on turning around; on turning suddenly; when sitting; when walking; when standing and walking, > open air; < morning and evening, < eating; everythmg turns around with him when walking and in open air: like a swaving to and fro when sitting before eating; on rising, as if head were too light; as if there were a depth behind him and would fall, on turning around after looking into a Pam, on moving them, in 1 on directing it upward mirror and after reading.

Forehead -Sticking; in morning, in upper part of F. and above temples on moving jaws, and at times in I side of head, with pain in chest and coldness of limbs; in forepart of head Tearing in l. eminence. Boring inward above l. eye Pain in afternoon when walking, with peevishness, P in evening on going to sleep, > rest, < walking, with nauses; P. in evening, with drawing, such pressure above eyes; unth photophobus; Lids—Swelling of upper, towards nose Inflammation with vomiting of mucus and acids, estending into of r, with pain in eyes and mobility to read by the tight eyes and root of nose, with drawing tearing; through Canth maturato. Agglutination in morning Closed eyes; throbbing; crawling, above F, like confusion Paroxysmal bursting sensation Drawing in foreign and at midnight Pressure outward when writing, P outward over 1 eye. Digging throbbing in bone above l eve Intermittent throbbing in F and especially sides of head; after dinner when walking and standing Heaviness in sinciput, with pain Weakness over eyes after rapid walking

Temples —Jerking in l.: bubbling J in r muscles Sticking, inward in 1; outward above 1 and then in middle of forehead, tearing, in 1, extending into zygoma Tearing, and in 1 parietal bone, T. in r, in l in evening, extending into joint of jaw Intermittent pinching in 1, also tearings Sharp pain externally Pain; in r from morning till noon, from both vibration in r

Vertex -Pinching in whole upper part of head, < 1 side Drawing and tearing Pain when pressing upon head, throbbing P in upper part of 1 side, more externally, becoming sticking on pressure Pressure upon V in evening

Sides -Sticking forward through r Tearing externally on one when walking in open air Tearing drawing in l half, above, on front of and in temples Pain in r after taking cold, with heat in eyes; one-sided paroxysmal P. in evening, with weakness, almost amounting to nausea. Heaviness in I half

Occiput.-Stitches on surface of brain on stepping and stooping. Tearing, now in r, now in 1 O and in forehead, throbbing T in r side close to nape. Pain when standing, with rush of blood in head and heaviness, P. low down, with burning and with heaviness ing of parotid, with pain on touch Inflammation of head, even to falling forward, P extending to nape, and swelling within ear, with pain about it Redness, > open air Drawing in O and nape, < r side, with heat and itching Jerking above and behind ear; J stiffness. Sensation on stooping as if something sank on 1, J and trembling in r on riving from stooping towards forehead. Heaviness like a confusion; H, Sticking, above and behind, in evening in bed, in 1, head constantly falls backward, with stiffness of nape | > shaking head, outward in 1, into 1 in morning extending to between scapular.

rising from stooping Falling of hair. scratched.

Clinical.-Headache, with vertigo, caused by riding in a carriage

Eyes .- Redness and heat, R of white, with many vessels in it Inflammation of whites, with burning pain Swelling of r. Surrounded by blue rings Staring, it is difficult to remove eyes from an object Sticking in middle; S in r , S and biting Tearing in r; in 1 in evening before sleep Pinching Boring with weakness, with dry matter in lashes Pain as if they would be pressed inward; P at noon, and in orbits, with sleepiness, on reading Smarting Dryness, as from sand, with sleepiness of eyes Burning, and biting, < open air, with dryness, hot to touch Itching Lachrymation, in evening, with rays around candle-light; < r. eye, with biting in one canthus, scalding, < at night Stitches in ball

forcibly Difficult to open in morning on waking Statches in r external canthus. Pulling or tearing in r. lid and above r. eye. Pressure upon lids Soreness of external canthus, with burning pain, S of 1 external canthus, sore feeling in lids on waking after midnight

Coldness Burning Itching on margins of r Swelling between brows and lids, like a sac; S of glabella between brows. Twitching in r brow ing in region of r. brow, T. in r orbit and eye at might Pain in I brow in evening in bed, as if a boil would

Vision - Weak, in r eye in morning, after working in water, she sees only a small part of objects, then sticking in head above eyes, with nausea Photophobia Vanishes when writing, white stars appear, towards middle of head, outward in r Beating the lower lines seem above the upper, so that he rewrites on upper line Of spots, threads and points when reading or looking into clear air Of sparks, shooting from eyes during cough Of white falling drops on looking at snow. Of a yellow, glistening, tremulous cloud Of yellow and white radiant wheels, turning in a circle and becoming constantly larger, upon the paper when writing or in open air, of blue and green spots. Of black points and rings when reading, of a black floating ball Of brilliant colors.

Clinical.—Muscular asthenopia after various diseases, especially it associated with puffiness of the upper lid or between the brow aff day, which seas to be a marked characteristic of this drug, and which has led to the use of the drug in various chronic disease of the eyes and lids, and indeed of other organs

Ears. - Discharge of offensive moisture Hard swelltending to between scapular.

Tearing, in r, in r concha; in anterior margin of External Head.—Pain in skull extending down r, in and behind, in bones in and about l, deep in nape, with throbbing in head and whole body, nausea r, now in one, now in the other; then discharge of and vomiting of bile, the pain < touch and worse in yellow thin wax or pus Pinching in I outer Gnawing paroxysms. Pressure inward on r side of skull on internally and externally in 1 Boring and pressive Hair dry, pain Pain, in r , ulcerative, in outer part of r before Pimples. Painful boil on r. side as if an ulcer would midnight; drawing, in one, then in other Pulling form Itching; < occiput; with sore pain when behind r. Hammering in r., impairing hearing Throbbing in r. at night when lying on it Bubbling

ting, and in I a ringing rushing so that his head morning on waking. Smarting sore pain in margin wavered, stopped sensation Cracking, on forcible of red, with sensitiveness to touch. Itching about expiration Ringing, in one, with roaring in other.
Singing Roaring Noises Hearing blunted in evening, blunted, slowly increasing and decreasing

Clinical.-Chronic inflammation of the middle ear, with sticking pains from within outward, especially behind the ear, and chronic extern of the nose, and soreness, with stinging pain.

Nose. - Thick and red, < afternoon Swelling of tip Red, hot and covered with white pimples Nostrils

Itching in nose, in r nostril. Stoppage
Catarrh on second day of menses, with pain in abdomen, teeth and back, sticking in ears and restless sleep Stopped catarrh; in evening in bed, with crawling in throat, with itching in nose, with much yellowish-green mucus in nose, becoming loose in afternoon on walking Fluent coryza, . evening, with excessive sneezing, with much sneezing, pain in head and back Bloody mucus from nose Blowing offensive matter from nostril Blowing purulent substance from r nostril. Smell acute

the face or in the morning

monou-eyea, man me cam tools frozen in open arr reed-mess in morning, in a child, vomting of breakfast, loose feeling in a 1 upper molars, with swelling then pallor, then after repeated vomtings weakfases, R of checks in evening, then pallor of face Lifesses of 1 tonal and cervical glands Red Loosened and presson Haupard and erhausted look. Twitching in 1 feels in the contract of the property of the contract o then in inner side of cheek, in I zygoma in Soreness of incisors. evening and night, preventing sleep, > pressure, Tongue.—Destruction of T., gum and fauces, the of cheeks near lower jaw

Pinching in r. lower, not far from joint

Lips-Swelling of lower, with ulceration, S. of with blisters. upper, with cracks, sensitiveness to touch and easy biting itching, pointed, itching and moist P. on lips coughing, hawking or vomiting, then a raw surface, with and all around mouth. Vesicles, on red of lower, burning and pain on swallowing. Partful blisters on

in r., with discharge of much soft wax Tickling | painful to touch and itching | Stitch in upper. Tearing in l. side of upper and in gum, > pressure. Cramp-Sudden stoppage of one, r, m evening when sit- like sensation. Soreness of red, with stickiness in margins Burning; of lower.

Mouth.-Teeth Looseness of all; of one after another, with sensitiveness, or a spot on bone of face becomes painful and is sensitive, then jerking er tear-ing in one point by paroxysms. Offensive odor. Grinding at night in sleep. Statches; in morning on waking, with frequent sneezing, here and there in incisors in evening, in incisors during supper, with feel-Red, hot and covered with white pimples Nostrib ling of biuntness, and in gum, then in cheek and searly Nostrib lucerated Pimple in Lostril. Pinching in nose and root of nose, < r side. Ulcerates pure chilliness and with swelling of lower jaw and gum; as r nosbil Bunning, in I. nostril, in upper part of burning S. as from a hot iron, < night Tearing in r. I nostril, extending into ethical bone, with biting and r. lower is w. T. during or soon after esting. T in I and r. lower jaw , T. during or soon after eating , T in I. molar and 1 zygoma, < cold, > tight binding, with griping in them. Boring after dinner, as if something got into tooth Digging in a l. upper molar after dinner. Burrowing in lower from picking them Aching only when eating, at noon and in evening, as if something got into a hollow tooth, with paroxysmal drawing extending to eye and ear, A as if something got into a hollow tooth, transiently > cold water, with drawing behind ear and upon head, at last jerking in tooth and disappearance of pain Throbbing pain only when it then becomes stopped and blowing causes sticking, eating; T or picking in ar upper incisor after dinner, constrictive pain extending to occiput Bleeding (Carbo T on motion, at other times burning pain Pain every v), in morning, R nostril bloody every morning morning on waking, P in 1 in morning in bed and all the forenoon; in roots of l. every morning after Clinical.—Dry need caterh, with more or less cough and wiking, < cating, sm ood full holden moder meeting; loss of wore Caterh, with obstruction, find dascharge, burning, from contact of anything cold or warm; only on taking the face or in the morning meeting extension of the face or in the morning meeting, extension, and the face or in the morning meeting, extension of the face or in the morning meeting, extension of the face or in the morning meeting, extension of the face or in the morning meeting, extension of the face or in the morning meeting, extension of the face or in the morning meeting of the face or in the morning meeting of the face of the morning meeting of the face o tending into bones of cheek and ear, where it is a Face -Swelling of cheeks, with redness and papules; sticking, with faceache, then swelling of gums, in at-S of cheeks, with tearing and sticking, S of lower tacks, even from cold air entering mouth, > warmth part of r cheek, with stitches and pain on touch, S Constricting pain. Drawing as soon as she gets into lied of cheeks developing into ulceration of gum, without in evening; in roots of incisors and l. molars, < evenprevious toothache, S of a gland beneath chin, with ing, D and jerking as if being croded, usually after param after taking cold. Series defined the state of the

ing extending into I, temple. Tearing in 1 zygoma, Tickling and bleeding after sucking it with the tongue

with swollen sensation on cheek, pinching T in r cuticle appearing as if destroyed with a hot iron, while zygoma extending into palate Drawing in muscles inside of cheeks, roof of mouth and velum were inflamed Swelling, with painful blisters upon it. Jaws -Swelling of lower and of glands, with loose- Painful blisters, and on gum. Painful pimple on tip ness of teeth Cramp, which also draws pharynx Soreness of trp, of fremum Dry in morning, and together Tearing in lower and in front of ear white as from an acid, D in morning on waking, and almost insensible. Burning; on tip, as if raw or covered

Mouth and fauces covered with a dirty brown bleeding; lips, tongue and fauces swollen, soft and slough, which made the surface almost insensible, heat red, breathing labored, with rattling in traches and in fauces and gullet as soon as the slough began to seplarger tubes, pulse rapid and feeble, skin cold Scurf arate, during the next week large portions of tough maton upper Cracked and scaling, lower Pimples, with ter, sometimes firm like leather, were brought up by all parts, with burning pain (K. chl.). Offensive odor like appetite; on pressing over epigastric region, < eating; old cheese every morning (see K brom). Sticking in with waterbrash, with salvation and diarrheea; with back part of palate in morning and evening, before out-trembling of hands and feet, with vomiting and with break of catarrh, < swallowing, with biting, as from bruised pain in abdomen, < pressure, prostration, dryness. Soreness Raw feeling as from something confusion of head, sleepiness and watery stools, then acrid, and on tongue Itching on hard palate Numb-constipation. Nausea as if to faminess; in forenoon, > ness in morning after waking, as if burnt Burning lying down in morning, with thirst

stimp. Bitter taste; in morning, with nausea, in 1000 morn but did not, with swelling of cheeks and throat; bitter, sour after breakfast Taste sour; at guins and stitches in cheeks.

Runbling, gurgling and movings Jerking in r waking T lost in morning after waking

Clinical.—Toothache of a sticking, tearing character, extending into the head

Throat. — Submaxillary gland painful to touch, of hands and feet, then anxiety and general heat, reElongation of uvula, with staffness of nape

Mucus; hef of the pain and pallor, at last the usual stool, in-< morning; in back, only loosened by much hawking : tenacious, in back part in morning, which can after falling asleep, with anxiety, groaning, coldness of neither be completely swallowed nor hawked up (K bi) tup of nose, hands and feet, then vomiting of food and Hawking in morning, with expectoration Sticking in acids and evications of air pharynx as from a fish-bone (Hep), if he becomes cold Sticking returning after ing. Soreness, with difficult swallowing and difficult | axilla, afterwards into small of back Feeling as if opening of mouth loosened by cough tongue, < swallowing saliva, which makes it smart, < singing in evening, > swallowing food, which makes it go lower

herent mucus Dryness far back. Swallowing diffi- externally to touch, eating and talking and the state of t and tearing in desophagus.

pains, < cold (Hep ).

bread Disgust for everything Thirst, in forenoon, which often relieve, or chilliness and shivering, < in evening, at night Eructations; in morning; of hands, back and head, and the usual stool. water after midnight, loud, with salivation, tasting of Feeling as if full of water. Pressure in pit, P in

Retching; evenings; with short breath Vomit-Dryness waking him in morning; D in morning ing, on coughing, after cating or drinking, with pain; after rising, in evening without thers; dry sticky sen- < drinking warm water; without an overloaded or sation, dry sensation, with salivation. Salivation, disordered stomach, next day weakness and loss of every night, waking her at 3 AM. Insipid, glutinous appetite, with faintlike sinking of strength; of food saliva Offensive-tasting saliva Tuste bad, and mouth and acids, incessant, sour, at the time menses should

> Rumbling, gurgling and movings Jerking in r side of pit Cramp; beginning at stool, so that she doubled herself up and could not speak, micturation, nausea, eructations, vomiting of water, retching, before the vomiting shivering, during it reeling, with shaking . hef of the pain and pallor, at last the usual stool, intermittent C in morning, > walking, jerklike, at night

Sticking returning after dinner, with sensation as if Anxious pressure Sore pain, in palate on swallow-leverything were turned about; S extending towards Sensation of a plug, which is out to pieces in morning, with external sensitiveness of Feeling of a lump; on 1 side, epigastric region; cutting towards evening, in pit with sticking on empty swallowing, about root of during and after breakfast Acute pain Digging in pit in afternoon, then eructations of bitter water, with painful contraction and sensation as if everything would be turned about, with rising of water, all > Smarting on swallowing Scraping; with dryness and during dinner, but returning with burning extending roughness Roughness, with cough; R, with sneezing, into throat Digging burrowing Spasmodic pain, R on uncovering body. Crawling, morning and even- with oppression at pit Sore pain in pit during ining, provoking hawking and cough, with feeling of ad-spiration and expiration Epigastric region sensitive

contraction from both sides, > vomiting clear water, with fulness Constriction extending towards phar-Clinical.—Pharyngeal catarrh, with constant need to hawk with fullness Construction extending towards phart-hard according to explain a cooping specific of a lump which cannot you, C even at 1 A M, in attacks till morning extend-be swallowed, or of a stake stateding into the stomach Phart ing into cheek and under shoulders, where it becomes no swallowed, or or a since eacening the same stronging streking, with choking in throat and oppression of breath, then anxiety, sweat and eructations, which re-Stomach.—Appetite increased, longing for acids, lieved. Constrictive spasmodic pains from least food little; little, with insipid taste, though food tastes or drink, especially cold Spasmodic contraction in pit good Aversion to food, especially meat, to black and transversely across chest; S C, then eructations,

food, at night of food eaten at noon Sour eructations, morning on waking, below pit in morning and after-(Nux v, Lyc, Na c); in morning, in afternois, with inons, > bending beckward and after eating, P across nauses, after eating, of sour, bitter water Water labove S, and beneath play night, with cough, at night, with burn-bench His cough, at noon, before midnight. Oppression after breast, of limbs and coldness of hands and feet, not without Seedlen feeting in engagemer region Fulness in pit; in then spasmodic constriction

starting from pit, then erurtations of food and acuds Throb- rodynia Sticking tearing Cutting Pinching in 1. as han in engagery remain with sensitiveness to touch: T. in from mearcerated flatus. Plan in heer when without mil. < morning, whereby the put rises visibly Flate. P in liver changing to heaviness. P in H., with gurgling. Lent feeling rising, with cutting Sudden shock, changing to crue-burning P in liver Heat in liver. tations of air or biccough Burning acidity rising from Rumbling in upper A before dinner, with pain with her

Clinical.—The gustric symptoms indicating this drug are indigention, with bloating, sour excetations, heartfours and a weak ventering of a lump in the pit of the stomach, or a feeling of a feeling of a lump in the pit of the stomach, or a feeling of gas, bloating and soreness (Lyc, Cat's V) Gartaigas, sharp cutting or sticking, < imodels or ceiting. Dyspepsia of old people. The form flatts and after rising from a seat, burning in r side of A. or flatik in unfolding the control of t

Abdomen.—Distention (('arb. v ), after eating (Lyc.), after eating a little (Lyc), with dragging asunder and and disinclination for motion of mental effort; hard, with pain in umbilical region on touch. Runibling, with eructations and yawning, R, then two liquid stools. Swaking, then pain in stomed, afternoon by eruc-tations and emission of flatus. Movings, semission on pressure, intermittent G. pressing outward in r. of flatus, with urging to stool, M, then cutting in stom-group. Flatulence presses paintilly upon bladder ach, with pressure extending into throat Emission of Starking, in forenoon and evening; in groins and flatus. at night, offensive, at night, difficult, with flanks on moving or stretching, sudden, in 1 groin cerated flatus. Jerkings

at night, with nausea and constant eructations

with duarrhon; before soft stool, after a difficult, scanty shool, during menses, with rumbling, bad task weakness and sleepiness; till late at might, sometimes extending towards hips, on touch; in musckes on touch; and other contents of the breaks of the stool of ing cough Flatulent pain, after breakfast, transiently . emission of flatus, > eructations and emissions of flatus rusing into stomach; H. and drawing

epigastiic region, with pressure, F after eating, dui- Hypochondria -Sticking in 1; in hepatic region; in ing menstruction, with nausea then comiting Inef-r after dinner, in hepatic and r. inquinal regions, in a fectual desire to eructate in morning and afternoon, spot in hepatic region, with sore pain on touch, in 1, with pressure: and in pit of stomach, impeding respiration: Uneasiness in epigastric region on pressure, U. pinching, in hepatic region; in hepatic region like pleu-Drawing transversely in morning after drawing P. in liver, sore P in liver as after pressure;

standards with spasswelle construction Heartburn; after Cutting in upper as from movements of flatus, when supper, after cating vegetables, extending into phar- walking, with emission of flatus. Griping in upper vnx Burning, in forencen after eructations, as soon towards noon Pinching in upper in morning Pain as fluids reach it, then vomiting, extending to mouth, in upper in evening Sticking in r side of A when with constriction Emptiness Milk does not agree laughing, in r side like jerkings, in r side as after retaining urine during sleep, > emission of flatus Tearing, at times terking in r side of A, or flank in

Umbilicus —Distended feeling below, > moving about Sticking in r. side near U, S above U as from flatus Cutting about U Griping below U. durgroin, with internal and external sensitiveness and on stooping feeling as if something would fall out Digging below U as from incarcerated flatus, obliging griping, then soft stool, with pain, fulness, weakness him to sit bent over, walking in open air. Painful retraction of region when sitting Burning about U. during dinner, with griping in abdomen

Hypogastrium - Thickness Painful distention of unsatisfactory stool Flatulence at night; F. during during stool, with swelling of glands; twinging cutmenses, with bad taste and cructations of bile. Incar-ting, in 1, extending into anus and perincum, < retracting abdomen, > emission of flatus, drawing S Cramp Sticking at night on slightest movement or dragging outward as if an old scar of an operation in bed, with pressure as from an internal induration for hernia would open. Intermittent tearing near 1 Cutting at night (Nux v ), then in morning pain in hip, or stitches Cutting as if everything would be torn small of back and in chest, and in afternoon bruised to preces, deep down, then higher up Griping before and pain in limbs, during menses; obliquing him to sit bent latter diarihoea, G in groins when walking, < sitting over, pressing with both hands, or to learn fur back, with and after rising, then stocking in anus, with urging to drawing like false labor pains, as before diorrhora stool Pinching Pain, in a spot in 1 in evening, Griping, in morning in bed, preceded by chill, with in r groin on retracting abdomen, paroxysmal, above urging to soft stool, after soup at noon and in even-publs, > emission of flatus, in r groin, as from a ing and after warm cakes in morning, with uneasi-swelling, in groin, as from a hernia Pressure outness, with uneasiness and thin stool, with the usual ward Drugging towards groins during stool, in groins, stool, then urging till atternoon, then liquid stool, > emission of flatus, with sensitiveness to louch. Weight, then diarrhoza, then burning in rectum, intermittent, < walking. Feeling of tension when sitting and walking, with heariness

Rectum.-Discharge of white mucus before and dur-Constriction, spasmodic, causing ing stool, D of blood, then uneasiness in blood and coldness. Funful drawings, with constitution. Throb- pulsation in whole body. Stitches. Burning and bung Uneasiness, with hard stool. Coldness during grying; B after stool. Tenesimis; after usual stool, memes, as if a cold fitted passed through intentions, C. in Frequent urging, with search passage; frequent U. at evening, < r side, with same Heat in forenoon might, > passage of flatus; paroxysmal U, with small, natural stool, or only flatus. U. as to diarrhees, but

Anus.-Pimples; ulcerative, with sticking

orrhoids swollen, bleeding during natural stool, S. and bleeding when urinating, S. and protrude with a hard stool; H. protrude during diarrhaea, with stitches and burning for many hours, protrude when urmating and discharge blood, but next day white mucus, inflammation of H.; statches, sore pain, pain; pain during cough; pain when walking; crawling, as from worms.

iting pain as if it would burst Soreness. Smarting in evening. Biting sore sensation in and around A after in evening. Driving ore generation is the treated of the state of the perineum at night

Stool.—Semi-liquid (scanty), pain in bowels, then Diarrhoea day and night, in evening, every night morning before menstruation Diarricas day and night, in evening, comments before memorana from 3 to 4 AM, at night, with pain nabdomen, Pudenda burning biting pimples; steking trans-which lasts next day, with color, with wearness; wordsy through, burning steking; tearing in I adde painless, with rumbling in abdomen, light-colored extending through abdomen into chest, burning itch-

other day, H., and contained pieces of a tape-worm, H , delayed, at times with urging or followed by tenesmus, H, scanty in morning, then soft in forenoon in one day. Copious, brown, C, containing blackish six days, scanty the first, profuse the latter days, with membranes and streaks of blood, with colic then anxiety and dyspnæa Purulent Offensive acrid, offensive, causing soreness of thighs, which be-Tenacious, as if he could not loosen it Containing a round worm.

not urmating, cutting T. in neck when urmating, < pressing upon the urine Cutting in region of blad-symptoms of the drug. der Urging, but he has to wait long and urine flows fluid after micturation Tearing in urethra, pinching ing in bed after urmating, with biting

Frequent micturation, at night, but often pressure colored. Discharge of a few drops after urmating tickling, from tickling in throat, from technique in lar-Suddenly obliged to pass a few drops of urine while yix, with houseness (Bro) Takling C C dual affects intent upon her work Stream interrupted in after the chest, from tecking in throat (Phos). Significance C.

hard stool, with colic; meffectual U., with feeling as if pale, scanty; pale greenish, with burning during and rectum were too weak to evacuate the stool (Hep). much sediment on standing

> Clinical.-Los of power of the bladder to expel the urine, < night, the urine is discharged slowly.

Sexual Organs.-Strong seminal odor of male Glans, tearing, tearing drawing; sharp drawing pain through, bubbling sensation, tension, itching, and especially at orifice of urethra, becoming tearing; sticking itching Frequent erections; during uneasy, Skickes, in evening, with crawling, when not at fearny sleep, and panful, with spasmodic contracted, with tearing and cuting Burnan cuting the contraction, with tearing and cuting Burnan cuting tion of spermatic cords; E at might without sexual Twinging. Graping. Pinching and construction, and investment immetions E. volent exhausting E. Twinging. Griping. Pinching and constriction, and excitement, impetuous E, violent, exhausting E in epigastric region, extending to throat After vonafter midnight, disturbing sleep; no E Swelling of testicle and spermatic cord, with external heat Tension of 1 testicle, and of pubis Scrotum, soroness, bruised pain, tching, itching preventing sleep Destool. Itching; after supper Burning itching in tuous dreams, E two nights in succession Coition without emission.

tenesmus Thu, unnoticed, on emission of flatus Voluptuous sensation as during cottion wakes her in panness, with rumning in southern the panness, the panness, the panness, with wearness, lying down, loss of appering and gray, with wearness, lying down, loss of appering the and daily colic Soft, and usufficient, and tenain vagina during cotton Dacharge of clotted blood at night (after vexation) in fifth month of pregnancy, Constipation, during menstruction Like sheep-dung, with headache and yellow color face Leucerthea, painful and difficult (Mag m). Hard, and only every yellowish, with itching and burning on pudenda Menstruction too early, and more profuse, lasting longer than usual (Cale c), and scanty first day, profuse second day, scanty third day, ceasing on fourth; and lasting Bloody , Monstruction late, with pain in hypogastrium Menses come covered with an eruption

Clinical.-Suppression of menses, with bloating of abdonie Clinical.—Chronic diarrhois, generally painless and light-closed, with chronic dyapeptia or with chronic hepatic disease; general sensitiveness to cold, swelling of the upper list, set on large light-colored masses, with sharp cutting pains in large light-colored masses, with sharp cutting pains.

Urinary Organa.—Tearing in neck of bladder when not urinating, cutting T. in neck when urinating, considered the resemble of exceeded profession extraction, with the penthar not urinating.

Respiratory Organs.—Easy choking when eating. Ratslowly (Caust., Hep., etc.) Discharge of prostatic tling in traches on breathing, with gurgling, then cough Sticking in larvnx, caused by cough, with fluent coryza Intermittent cutting in urethra when not urmating Raw pain in largue on coughing Drawing pain in lar-Drawing in forepart of urethra, with tearing Buin-ynx, with rawness Constriction in larynx in open ing biting in urethra during and after urmating air; C in evening on falling asleep, then sticking dry-Burning in wrethra when wringling, after U, in orifice ness in throat Voice rough Hourseness and loss of of U and in upper part of internal prepuce in morn- voice; H., then fluent coryza, H as if something stuck in throat, provoking desire to hawk

Cough as early as 3 A M., repeated every half hour ; 111 upon bludder long before the urne comes, but scanty evening in bed, every five minutes from 9 P.M. till urine each time. She must press long before she can morning, before midnight, > during the day, waking start the urine. Micturition seldom, and the urine high- him at night, on playing the violin: after eating, from at 5 A.M., as from dryness of larynx, with cramp in chest Urine flery, diminished; dark yellow, with a cloud; so that she could not speak, redness of face and general sweat Racking C., so that she loses her senses Violent afternoon Cutting stitches beneath r. clavicle, with () in morning fasting, > breakfast, V. in morning, pain as if a thorn were sticking there Tearing stickcouring vomiting, V every evening after lying some time ling in breasts: in I costal region, taking away the Paroxysmal, C amounting to retching, causing sore breath pain in vertex, then exhaustion Fatiguing C in evennot be expectorated

Expectoration of small round lumps of mucus (Stan ) . E, of mucus at might; E of sourish taste

Dyspacea, when writing, with short breath Breath short in morning He felt as if there were no air in his thed Arrest of breath wakes him at maht Inclination to take a deep breath

Clinical.-Chronic or subscute extern of the air-passages, sometimes with dyspines, sufficiative breathing; the cough is generally dry, or the expectoration is very scanty, regularly < 3 A m, at times parxysmal and sufficiative. Cough, with sharp cutting or sticking in sides of chest or argund the hypochondria. Ashima at times paroxysmal and suffocative. Cough, with sharp cutting or stricing in siles of chest or sound the hypochonics. Askinator stricing in siles of chest or sound the hypochonics. Askinator of the languages. Chronic presuments or chronic inflammation of the opper part of the languages from the content taking cold from the slightest exposure, the patients are west, short of the language of the content taking cold from the slightest exposure, the patients are west, short gastric symptoms of the drug, it is almost as frequently indicated as Calc. cark, hough the Kali patient is worse from cold, while the Calc patient is worse from dampines, the chronic toubles requiring Kali shough most. In the content of the content

twitches in upper part of r breast Sticking mr, L; of the drug beneath I short ribs, beneath r ribs in morning, beon inspiration; in sides on inspiration, beneath last r elongation of uvula ribs on inspiration, in I during cough, between r: Back.—Sticking in r side, extending through chest. not affecting respiration, sudden S in sternum during with necessity to lie down, then sweat all night and in eructations and on swallowing liquids, pinching S, morning stool of blood and mucus. Stiffness prenar Burning sticking in . on rising from stooping; venting stooping; S. and lameness in back and small in l. when sitting, > rising; in costal regions in of back. Sharp pressure on upper part.

Cutting in evening after lying down, she does not main vertex, then textualisation range of the second to th throat; D, waking at night, with acute pain in chest on abdomen, leaving sticking in 1 chest, in morning, < coughing, little C during the day, D, almost only at about pit of stomach, as from incarcerated flatus. night, with sticking in larynx; dry, suddenly coming Tearing in breasts; on last 1 ribs, in sternum above and going C, with expectoration; in morning, < even- 1 side of pit of stomach in evening Pinching in r.; ing, of bloody mucus, C loosens mucus, which can- P in pectoral muscles Sharp pain behind sternum on breathing, swallowing liquids and eructations Bor-

ing deep into l Pain in whole ! ; in r. margin of sternum in morning on rising, with pain to touch, on breathing; in ensiform cartilage on coughing and on deep inspiration, in middle and drawing downward; starting from r breast, extending towards lever, with throbbing in epigastric region, which is painful to touch, intermittent, in forepart, < r side, < mapiration, > eructations, jerking P externally in I lowest rib, spasmodic, seructations Sore pan, < talking; in upper part on breathing, touching and lifting anything heavy Bruised pain Drawing pain across C Scraping caused by wind; tearing S, during cough Intermittent biting now here, now there Oppression, with deep moans, O., with difficult respiration, with distention of abdo-Throbbing in l. near pit of stomach; sticking T in one r rib, opposite pit of stomach. Tension in r or 1 side at night, T across C. on expiration when walking Anxiety towards evening Tickling in r breast. Weakness, from rapid walking Affected by loud talking

Heart and Pulse -Sticking in pracordial region Pinching as if it were hanging by tightly drawn bands. < deep inspiration and cough, > motion. Anxiety preventing sleep after 2 AM Burning in region, Palpitation in forenoon, with confusion of head and nausea, P on least exertion, P, with anxiety, when hungry Intermittent beats of heart. Pulse ravid, slow

Chest.—Rattling at night when lying on back last factoring in forepart, or twitching Bubbling inhammations, with abare statistic measurements of the state of the

Neck .- Swelling of glands; with pain on turning neath breasts in afternoon after lifting a heavy weight, head; with tickling, > pressure of cold hands, at then griping in sides of upper abdomen, extending angle of jaw, and hard. Seemed thicker and neckthere griping in serious of upper induning, exeming, angle or jaw, and that or seemed that an inexact and neck-forward, in sterium, in front of r breast, in evening, cloth too light. Stutches in glands, S in nape extend-in r or I sate at night, in I breast, in region of heart, ing into occupit. Tearing in nape, in lower-part of after midnight, at times extending into hawk, > 1 ving, side; T. in r side in morning. Pain in muscles on our side. Ying on I side, next mght early waking, motion, P in nape on bending head backward; in stacking in chest, short breath when lying on I side, glands as after taking cold; jerking P in L side; miolerable except when resting in highest possible drawing P in nape Drawing in r side position, > lying on r side, reappearing third night, nape, < moving head Rush of blood Staffness of when lying on back, S. in 1. on deep breathing; in r. nape in morning; in morning in bed, at night, with

middle ribs when sitting, S beneath I breast, at times Aching; in spine on swallowing; drawing P, sprained extending from low down in chest, also in evening, S ex- P; bruised P during rest, burning P., < walking in tending into C below I clavicle, in evening, transiently open air. Biting pinching on posterior parts of ribs. > pressure, intermittent S in r; beneath last r ribs, Contractive pain during rest after physical exertion; S. almost only when sitting, with oppression and pain beneath r. < moving or touching it Drawing anxiety in chest; near r., with tearing, in tip of l pain in r Tensive pain in l. in morning, so that he during hard work, extending to pit of stomach, cannot raise the arm. Tension and drawing in r. pinching; as from a sprain in 1, extending into chest; with paralyzed feeling in r arm; paralytic T and tearing, under r. Tearing in r. in morning, cramplike, drawing in l. in morning on waking, extending into between S., then stiffness of nape, on attempting to forearm, which is inclined to fall asleep. Heaviness move head it perked backward several times Sprained

Small of Back -Sticking, ascending at times through feeling I side of abdomen to chest. S in region of Lulneys, in region of l, kidney, at first on expiration, then sev- r. B., pain as if flesh were torn away on walking, > | sion just above r elbow touch. Gnawing in coccyx. Pass in region of kidneys; Sticking in bends of elbows in morning in bed; above r kidney in morning, P only on bending back-tearing, in bend of l. elbow. Tearing in bends of elbows; morning on rising; B. pain in region of kidneys in 1 wrist, < motion afternoon when sitting Drawing nan Drawing Hand —Trembling in morning when writing Restalternating with pulsation, > lying Pressure inward less at night Tearing between thumb and index; ex-

tion Staffness Clinical.—Lumbago, with sudden sharp lancinating pains, extending up and down the back, rarely through to the front, the patient is attacked at 3 A M. and cannot remain in bed Lumbago, as if the small of the back were broken, pains shooting down backs of thighs.

ning? in joints of rees, knees and mand during rees, portical nates, betteath attachments, in 1 into over last expension in joints, with drawing pain in long bones, draw-free mides, extending towards true, in 1 little owners the ing P. in all, with feeling as it had been long sick, during motion; stacking? beneath and in the popular and emaciation. Unsuesness we seeming model during motion; stacking? beneath and in the popular and emaciation of the seeming in the control of the seeming of the seeming of the popular and the popular and r. log go to sleep at the vening Store pain in last plants of thumb in night; arm and leg on which she hes fall asleep

Upper Extremities.—Axilise. Grance and to the painful to touch as if suppursing Stacking in 1, morning in bed, then numbness, numerate below A, with pressure and tearing, tearing, in r in chilliness in fingers. Bursing pain in too 1; at inserted with the pressure and tearing, tearing in 1 ton of nail of middle. Stiffness of thumb and index. below A, with pressure and tearing, tearing, in r in the morning on raising arm when writing. Tearing in 1 too final of middle. Stiffness of thumb aim time morning on raising arm when writing, sense holow I, deep respiration; T in when writing, with paralytic weakness. Fulling alleep during rest; sore, below I, deep respiration; T in when writing, with paralytic weakness. Fulling alleep of tip, r morning; thumb falls asleep towards morning, with outting. Sensitiveness in r, with outting.

Shoulder—Cracking in joint on moving it or raising thigh Stacking; in l., then in tendons on l. side of neck. Tearing in l.; in l. joint; in r. when knit Lower Ex ting, > moving it; pinching, in r. Pinching in r. < leg. Ascending steps is difficult. Jerking in nates, joint, < inspiration. Pain in l. on moving arm vio- Tearing in and on nates not far from his-joint: attacks of

Scapulss.—Sticking in 1; in r on breathing; between | lently or making strong pressure with it. Bruised

Arm -Jerking in 1; in evening on falling asleep. pain in I. Bruised pain between 8 and on 1 shoulder, Tearing in I.; down to wrist Drawing pain in I. > motion; sticking B. pain on motion, extending into Tensive pain, so that he could not raise it straight chest. Pressure in 1: between S, then burning ex- Drawing extending into hands Weakness, when writtending to crest of pelvis, the B is perceptible to ing, with swelling of upper arm and hand. Asleep hand, drawing. Tensive pain behind I on breathing, in morning in bed, with internal pressure as if stiff T pressure like fatigue extending from r along side and lame, they and hands are insensible, A. and staff of back into small of back, < riding in a carriage in cold, they fall seleep even after violent exercise;
Throbbing on unper margin of l A on which he lies at night falls seleep. Paralyzed

Upper Arm —Twitching in flesh of l. Sticking in Tearing in upper part of r and in elbow; above real times in succession, > rubbing Tearing in repercent in succession, > rubbing Tearing in repercent in succession, > rubbing Tearing in reinto shoulder, sticking, in I Brussed pain in r, <
range of r kidney; T. ne humber muceles, unpelling repercent in the showing the sticking, in I Brussed pain in r, <
range of the showing the s

ward, after standing or walking, above small of in elbows, with drawing, at times warmth Pain in r. back when sitting; with laborlike pains in abdo-elbow as if stiff on stretching arm Tearing in middle men and discharge from vagina, as if broken, on of forearms, upper part, in F extending towards moving about; as from flatulent distention, partial wrists; in styloid process of radius. Drawing pain in emission of flatus, with feeling as if bubbles accumu-forearm; paralytic painful drawing from 1 into hand lated and urging to stool; jerking, on stooping, so in evening Tensive pain on forearm Statches in l. that he cannot stand erect, sore, in region of r kid- wrist Tearing in wrists; in r when knitting, in l ney, tackling weary P. above sacrum Bruised pain, extending to ring finger Drawing on inner surface of

from sides in morning; P. during menstruction, and in tending from back of I, into fingers, on back of I, as propert of hypogustrum, as if everything would press out if in marrow of bones Pain on back of 1; P in at genitate Pulsation. Heaviness, during menstruation Staffness and the state of the property of the pr ing, with empty eructations till noon.

Fingers -Sticking in r.; beneath nail of I middle; in tips of r, as from suppuration, intermittent, in middle joint of r index, in r index, as if a needle and thread were drawn from lower part towards tip, > bend-Extremities.—Jerking Trembling and convulsive ing finger, renewed on stretching it out Tearing in 1 movements Sticking in joints and tendons Tearing little, in I thumb, in ball of thumb, in phalanges and in fingers and toes Pain when he rests them on any joints, in middle joint of index, joints of 1 middle thing; in joints of feet, knees and hands during rest, beneath nails; beneath thumb-nails; in lower part of beneath nails; beneath thumb-nails; in lower part of < under nail, in morning Drawing pain in meta-Upper Extremities.—Axillæ. Glands swollen, and carpal joints Jerklike drawing back and forth in

Lower Extremities .- Falling asleep; r. and numbness,

atting, and in thicks

Hip -Sticking in l. when standing, after sitting down sticking tearing down whole leg, as if in marrow, > after rising from seat. Tearing, even when sitting, and in knees; Sensitiveness of corns Tension. Pinching drawing T in hips or parts enveloping them, at times crawling, as from weariness Heaviness; walking is irksome; and intermittent T in 1, pinching T Jerking pain in 1, stiffness. Falling asteep after dinner; of 1 during dunner on turning leg Bruised pain, with pain on motion walking and on touch; B pain in H and limbs, < calves, on walking, with weakness

Thigh -Cramp in r and in calf, waking him at night Jerking, in anterior surface of r Soreness between Tearing in upper and inner part, T in l and in tibia, during menses, close to nates, extending towards geni-Sore pain in a spot in middle on touch Brused pain above r knee as if thigh would fall off when standing, < sitting, Drawing pain, in 1, extending to knee, as if it would break when ascending Paralytic drawing, often increasing to tearing, < stand-

fall asleep Knee -Twitching in 1 Tearing, in hollow, in evening, with warmth in it, when walking and sitting Pain on side when walking, < stretching leg, sprained P on rising from a seat, drawing pain when walking, extending to thigh; tensive P in r, then crawling, only when walking Paralytic pain in r when walkl during the day Painful falling asleep on walking fast, he cannot bend them well Stiffness, of r, with

tension and weakness, as if tightly bound

at night in bed Drawing pain in r extending to foot U above I wing of nose, painful on touch Drawing in bones, with tearing, paralytic D Tension General sticking and gnawing, itching S here and

punching T. in nates Pain in nates, suppurative, from back; beneath heel, in corns; after walking, with burning, in 1, extending inward Tearing on inside and on sole; on back, extending to toes; drawing, extending to toes Pain in heel; in sole on stepping. as from weariness Heavmess; walking is irksome; and

Toes -Cramp in 1 great, in evening when sitting, and sneezing, B pain in upper part of 1 bone when preventing stretching of it. Sticking in balls of great; in tips of great, with itching; tickling, in tips ing; in first phalonx of great; in tips of great Gnawing on outer margin of r great Pain in tips on walking; P on side of nail of great, as if it would grow into flesh Sprained P in first joint of great when walking. < bending it up

Clinical.—Sciatica, with very sharp lancinating pains. It has been indicated in hip disease of scrofulous children, with the severe pain and periodic aggravation of the drug.

Skin.-Freckles on face Dryness and roughness ing and in warmth of bed, often only in evening and of face Hands rough and cracked Crack in the at night Weariness, < afternoon, W above knees in cicatrix of an issue Red lentil-shaped elevation above evening Paralysis of 1, with feeling as if it would wrist Yellow, scaly spot on upper part of forehead, scaly, itching spots on abdomen and about nipples, moust after scratching Tetter on legs Eruption in hollow of knee Nettle-rash. Chilblain on ball of great tee, with sticking cutting, inflamed C on toes, with pain, inflamed, bluish-red C on balls of great toes, with cutting and sticking. . when in shoes,

Pimples here and there, in l. brow; on face; on ing Paralytic sensation when sitting Throbbing in cheek below ear, on ears, on nose, on I thigh, above knee, with tearing; on zygomata, with burning pain, painful to touch on lip near l nostril, red, on l frontal eminence, painful to touch, afterwards they suppu-Leg -Twitches on anterior surface of 1 when stand- rated Itching pimples on nape, posteriorly on 1 ing Cramp in r calf, in calf and sole at night in bed thumb; high up on arm, with pain; on shoulders, on drawing up leg Stitches, with pain and burning; with burning after scratching, on tibia, and vesicles S in fibula Tearing in I tibia, in tibia beneath with inflamed areola Inflammation at insertion of knee; upper part of calf, on waking at night, with nail of index, and on pressure ooning of thin matter drawing and weariness, < ankles, in r. calf, extend-Soreness behind cars, with suppuration Pustules on ing deep inward on pressure and rubbing; sn tibne, face, red, in middle of forehead Boil in ear Vesicle and pount in percentage in the total may on little finger, on 1 index, with watery discharge, Pressure now here, now there in bones Burning pain itching, in palm Ulcer bleeds; at night; superficial

in 1 calf as if too short when standing; in calves on there; general itching S, preventing sleep after 1 AM rising from a scat during the day Uncasmess in even-Pressure in location of a former ulcer on leg, with tening Weakness, they give way Heaviness; suddenly sion Crawling in tip of r middle finger, in soles, in 1, as if paralyzed, so that it is difficult to move, extending towards toes, in limbs, < legs, when sitting, at night in bed and next day when sitting Stiffness with drawing in legs making him restless; tickling C

Numbness of r in morning after waking, as if going in toes and soles of sole, then heaviness Falling askep when hying; of Rehing on chm, of an old wart on face, lobules of one, then the other, when sitting, of r., with crawling ears, abdomen and thighs, about umbilious, of hypo-Ankle—Sucking beneath malleolus; in tendons gastrum, on lower part of small of back, axillae, behind r external malleolus when running; S in wrist; between nates, on knee, tibia, under surfaces malleolus and when walking feeling as if feet would of toes, about ankle in morning in bed; general, break Tourng, just above malleolus; about M. when in evening, bed, palms near fingers in evening; test are cold, from inner M, transversely towards legs in evening, feet in evening, with heat, as after tende-achillas, spasmodic, on M, with pulsation about freezing, general, during meastratain; general in it extending up fibula to knee Drawing in 1 on morning and evening, < back, where small pimples stepping, < ovening, with stocking and throbbing in appear; now here, now there, small pimples after it and stocking in heel, she must keep the foot sus scratching; here and there, < legs, on scratching it pended, it feels heavy, swollen at seat of pain and hot easily becomes bloody, on thigh near hip, which after scratching ulcerated; of arms, then after scratching Foot.—Swelling; extending to malleol; of soles, white jumples; on mons veneris, about genitals and and redness, with burning in them, < stepping Visi- on thighs, with red papules; on r. breast, and on ruble twitching on back of 1 in evening. Sticking; on hing fine eruption; of face, preceded by whitching,

burning after rubbing; beneath great toe-nail, with pain | sleep, next morning scraping in throat, bad taste, loss and under r natella.

Clinical.—Subacute crystpelas in old people characterized by the sac-like swellings under the eyebrows. Erystpelas resulting from a wound

sleeps as soon as she sits down, S in morning, and internal heat, heat of hands and aversion to food; then late waking, in forenoon, with yawning, in alternoon, heat of face; alternating with heat in evening, then also with yawning and suffering expression, ealy m sweat at might, internal, at noon, with heat of hands evening, also with morose silence, attacks of S when and then general heat, all without thirst. century, also man successful the suc lassitude, tecling of catarrh and pressure in eyes

morning stupidity and hot hands Half-waking sleep, most asleep, feet, with hot face. in morning after waking, during menstruation, anxiety for this and that without taking anything

Waking early, always at 4 A M and frequently after- and dry skin General dry H in evening Burning wards till morning, frequent W Late falling asleep, in various places on skin, even under axille. difficult in evening after walking in open air

were living and quarrelled with her; of robbers; Crawling burning in soles, with sensitiveness vivid, of the business of the day Anxions drams, she Sweat, in morning in bed, at night, when walkeries for help, A of danger from passing forms, some ing; on every mental exertion, general, in morning of which lay hold of her, A, that his father was about in bed, cold Second maculle; on feet, soles; on to beat him. Voluptuous dreams, after coition, with emission. Nightmare as if a stone were lying on him body during sleep and his larvnx were gradually constricting, with ineffectual efforts to wake

Fever -Chilliness; in morning in bed, then heat, after a few hours again chill; in torenoon, hot hands in evening; daily from 6 to 7 P.M., with thirst, then heat without thirst, with fluent coryza, then sweat in

on touch; on back, which amounts to a pain after of appetite, agglutination of l. eye; at 9 P.M., > lying scratching; above r. wrist, > scratching; on pit of down, evenings without thirst, towards evening with stomach, not > scratching; almost sticking, over whole necessity to he down, then nausea, vomiting, crampbody at night in bed. Burning itching, general, now like pam in chest all night, with short breath, internal here, now there; on face, face, back and head, sacrum anxiety and sweat on head; before menstruation, with trembling of limbs and spasmodic sensation in abdomen, after eating; after cessation of pains, on every motion, even in bed; when riding over a stony road. without thirst, with confusion of head, with cold feet, confusion of head, faintness, swelling of lower law Sleep .- Yawning. Sleepiness during the day, she and gum, burning toothache, with stitches, with thirst,

and evening In morning, after a good sleep, he is sleep, in the room, general, with chill in limbs and obliged to he down again, and after three hours' sleep with fever, in back in morning in bed, about anus feels well Sleep too long, then confusion of head, after stool. Chilliness on head, on vertex and over whole body in evening; cold cars in a hot room, Sleepless after 1 or 2 A.M.; till 11 or 12 PM, till 1 hands, feet in bed, in back after menses, in evening or 2 A M , till midnight, after mental labor , on account and after midnight, waking, with cramp and coldness of vivid thoughts after waking at night, on account of in stomach, which last till towards noon, arms in cold remembrance of sad events, S or anxious dreams, in air, their sensation becomes blunted and they feel al-

Heat every day at 9 AM and 5 PM, with vawning. from hearing things, though she knows that she is thirst, headache and pulsation in abdomen; H. in dreaming, but inability to open her eves and difficulty afternoon at an open window, with burning in eyes, in arousing herself Restless sleep, during menstrua- then chilliness in open air, in evening in bed, in tion, with anxious dreams, on account of pain in side evening after taking cold, towards morning sweat, with on which he has, child restless, anxious, cried, longed headache and after rising confusion of head, at night, with pain in zygoma, < hands, interrupting sleep at Talking in sleep Starting in S , on falling asleep , night, with vivid dreams , before menstruction, with thirst S up awake in evening, with general shivering Jork- and a restless night, in the room after taking cold in a ing in limbs and snoring; I in arm on falling asleep draught of air, then heaviness of limbs, tearing in whole Movements of whole body in sleep as in epilepsy, with body and head, with roaring in ears, yene at roldness, durperking of arms and stamping of feet She raised her-ing the next might mour sweat, with sweat, then chill in self at night in sleep, said all sorts of senseless things a cold bed, with burning headache, heat in face, gento her husband, and could not collect her senses for a end shivering, stopped catarrh and sweat. #### Kali Chloricum.

A solution of pure chlorate of Potassium in distilled water (1 to 99) is taken for the first dilution.

General Action .- This, the most poisonous of all the

Climical, - Neuralgia of the face, sudden electric-like pain in salts of Potassium, depresses and paralyzes the heart side, < talking, eating or slightest touch, followed by numbness. and lowers the temperature very rapidly. It is a vio-

lent irritant to the whole gastro-intestinal niucous membrane, producing gangrenous ulceration in the mouth Gums bright red Gums bleed easily on brushing and throat, ulceration of the stomach and bowels teeth Tongue white; in middle. Tongue coated; at and terrible dysentery, with profound prostration causes at first diuresis, followed by suppression of urine and violent nephritis; on this account, particularly, it is a very dangerous drug in diphtheria, and cases have been killed by its unwise administration Its action on the respiratory tract is marked

Allus - (Merc c, Canth)

Generalities.—Convulsions Jerking of head and other parts Blood taken from a vein was very viscid fort Weakness, and sleepiness Collapse Relief lost from warm baths, which were always followed by profuse sweat and quiet sleep

Mind.-Liveliness, then ill humor Ill-humored, anxious, hypochondriac condition of the ganglionic nerve > nosebleed Apathy, in evening, with sadness and chilliness. Consciousness suddenly almost

lost after a glass of wine

Head .- Cutting extending into malar-bones. Aching; in evening Confusion, on walking in open air Congestion of brain, so that one half of head, face and nose felt paralyzed; feeling of C, with pain in fore- with violent cough, as from sulphur fumes head Intoxication from a small glass of beer tigo, after violent motion, with congestion Foretigo, after violent motion, with congestion Fore-head, jerking in upper and lower part of bone, pain, drawing, tension, then sneezing and catarrh, tension, diminished, lost Thirst Eructations, of air, sourextending into jaws Confusion in occiput, with peculiar sensation in muscles of nape Itching

Eyes.—Redness in evening, with pain Stitches Cramp in 1 Pressure Rush of blood, with irritational Acute gastritis, nausca, pain in splenic region, Cramp in 1 Pressure Rush of blood, with irritational collargement of spleen Cardialgia (Gastralgia) tion. Feeling of strength Detected in the tears Pyrosis Cutting Pressure, with feeling of emptines

Ears and Nose.-Roaring in ears, with a painful bloody stool Drawing in root of nose Irritation at root of N Sneezing Catarrh, violent; violent, with much sneezing and profuse mucus Detected in nasal mucus Noschleed, at night; from r nostril

Face .- Pale , blush Lavid Twitching, and of eyes : of masseter muscles Sticking in various parts Tearing and tension Pain in r. malar-bone, beneath margin of orbit, then tension in whole cheek and temple Drawing pain in r cheek till he sneezes Drawing in r cheek, and in gum, with cramp in muscles of r cheek, with pain in lobule of r. ear, at one time more beneath orbits, at another more in masseter mus-cles, in r half of face, with tension, cramplike, in cheeks, extending into joint of jaw, at times with tearing in upper jaw; tensive, in l. cheek near orbital margin Tension, with pressure towards eyes, < r side. T in cheek beneath eve, extending to ear, r, then drawing, in r. cheek, then inclination to sneeze. Sensitiveness

Jerking in nerves of lower law, at foramen maxillare posticum Cramplike pressure in joint of jaw, with stitches in jaw and teeth, < r side. blue, swollen, pimples on r corner; pimples on lower.

Kall Chloriones.

Mouth.-Aching in upper teeth. Teeth blunted. back, with diarrhoes. Two symmetrical ulcers on sides of tongue Tongue cold; and throat Sticking burning on tongue. Stomatitis, ulcerative and follicular, mucous surface red and tumid, and gray-based ulcers in cheeks, lips, etc. Tanned appearance, and in throat. Contracted feeling in muscles of palate Salwation, acid Taste sticking-burning, acid: T. burning, alkaline, as of blue vitrol, salt, sour; saltish, sour; bitter, sourish; bitter, > expectoration of mucus, Rheumatic pains in different parts Malaise Discom- with coldness of tongue, (like laurel-water with salt);

> CHaiceal.—Aphhous or gangerous ulceration of the mouth Aphha of the mouth Obstemate following committie, with extreme fetor, there is generally tough, strings saliva. It has been found extremely useful in gangemen of the mouth in children, nearly every case having been circle (at the Five Points Hospital, New York, where it was used internally and locality) Ulceration of the mouth and throat, with extreme fetor, albuminuria, hematuria, cough and dyspnosa. Nursing sore mouth of infants or of mothers

Throat.-Submaxillary glands swollen, throat red and edematous Pain, and in stomach, with inclination to eructate Scraping Rawness Dryness, and of chest, Ver ing difficult.

in sinciput Temples, intermittent stacking in r, ish, violent, with alternating pains in chest and abdona snarput in since the standing to eye-teeth men. Nausea, and shivering, and attempts to vomit, Pain in I side Pain in occiput, in evening, at times though nothing but air was ejected. Vomiting, sudden, incessant, of all food, of offensive dark green mucus

tion. Feeling of strength and the property of distention; W and oppression, almost amounting to pain, with cardialgia and flatulence, W and oppression increasing to an uniform gravative pain, W. in epigastric region, > night, with fulness and twisting Warmth

Abdomen.-Movings, with inclination to diarrhees. Flatulence; during the day; in afternoon; and epigastric distress, preventing sleep Griping. Pain Intermittent weight, tension and pain in umbilical region Pressure in l. hypochondrium, in r., extending to umbilicus, tensive, in r, > emission of flatus. l'ain in pelvic region, with diarrhœa

Rectum. - Proctica marisca, with constipation. Pain. Urging, constant, with normal stool

Stool. - Liquid. Thin. Diarrhoea, violent, constantly getting more liquid, at last consisting only of mucus, copious, as after a refrigerant purging salt (painful), with weakness. Hard, and at last mixed with mucies and blood. Constipation, but when action was solicited the matter was dark. Green. Lightcolored. Indolent, delayed.

Clinical.—Dysentery, with most violent cutting pains as from knives, frequent stools, tenesanus making the patient cry out, evac-uations very small, almost clear blood, great prostration (Canth.,

Urinary Organa.—Nephvina. Urging (Merc. c.), frequent. Twitching in urethra. Inability to empty bladder. Could pass only a fee drop of bloody mer Frequent micturition; and copious, with irritation about bladder and urethra Hematura Urine incrossed in evening and night; U scanty; black and that of Iodine as shown by the depressing action of albuminous; greenish-black, albuminous, containing Potassium and by less tendency to febrile excitement hematin; five ounces of snoky U., containing albumen, In the respiratory tract we find catarrhal inflammacasts and altered blood, drawn off by catheter; acid, tion, with free secretions and less fever (it has produced

scrotum, violent E., with emissions. Depression of

desire, with chilliness and apathy

heart, rush of blood

ble signs in heart or lungs Coldness in precordial region Palpitation. Heart's beat distinctly perceptible to touch, with coldness in precordial region Violent beating of H, with oppression of cliest and efforts to vomit, > vomiting Continual complaints, cold feet Pulse rapid, and compressible, and feeble, Sticking in I lower jaw, in tibia, I thigh, I forearm, compressible

Back .- Pain in lumbar region, with weight Heaviness in lumbar region, with dragging and increased Sensation of turning around Malaise

and along ulna Cramp in r index Drawing in symptoms arise during rest and are > motion

thigh Sticking in r. knee. Cramp in leg

Skin.—Cyanosu, lps and extremites leterus
Duskiness. Congestion Small purple maculies in the conference of the constant purple on laboulder on the conference of the conf Immense mangements rumpies out norment, netween lips and chin; on thigh, red P, burning, on 1 cheek, taching, tiching, with vesicles on back of 1 hand, plokes States Annety Fright at every trifle Appustules filled with matter, surrounded by red areals, especially towards his children; and excited, quarrell on limbs Itching vesicles on back of r. hand Itchsome Weeping from the slightest cause D reads the ders, not on joints, then pimples on face

Clinical.-Epithelioms of face, in another case epithelioma of great toe

Sleep—Yawning. Sleep uneasy, and interrupted by heavy dreams, and full of vexing dreams, and waking towards morning from an anxious dream, lying on back, snoring and breathing with difficulty. Dreams of occurrences of the day previous, quiet D of prophecies of death; quiet, of death from nervous fever; voluptuous, with emissions.

Fever.—Chilliness; in afternoon, in open air, with stiffness of hands Shivering, in evening, over back and neck, with warm feet. Cool skin. Cold limbs, r. arm; internally in r. forearm; feet, with palpitation. Heat; in bed; with violently throbbing pulse and heart: in face in flushes. Orgasms, < chest.

## Kali Iodatum.

A first dilution is made by dissolving I part of Iodide of Potassium in 99 parts of water

General Action .- The action of this salt differs from and deposits urates abundantly, turbid, suppressed bloody expectoration). The increased salivation and Sexual Organs.—Violent erections, with itching on unine followed by nephritis are similar to Iodine

Generalities.—Emacuation (Iod) Marasmus resembling the third stage of phthisis. Nervous mobility. Respiratory Organs and Chest. - Hoarseness In Trembling Spasms. Subsultus tendinum Attacks larynx irritation to cough Cough; violent, with of jerking of limbs, < l. arm, and of face, < l side, catarrh Breathing laborious Pain in sides and with anxiety, apprehension and palpitation, one attack loins Painful pressure superiorly in 1 costal region ended with vomiting and headache, once violent roll-Chest, tightness, constriction as from sulphur fumes, ing of 1 cycball, pupils contracted, facial muscles conoppression, with sensation as if lungs were constructed tracted, I corner of mouth drawn downward, mouth with a fine thread, oppression, with violent beating of opened and closed numberless times while uttering unintelligible words, short rapid respiration, pulse Heart and Pulse.—Precordial anxiety without nota- hard and full, torchead, neck and chest covered with sweat, face red, unconsciousness, after the paroxysm trembling, weeping, complaints of heaviness of 1 arm, abdomen small, soft, tongue white rather than yellow,

appearing as after a sudden and copious hamorrhage in the bones, in forenoon. Tearing here and there. Pulse slow; and small, weak P diminished in ful- Pinching here and there, < evening Gnawing in ness and force. P. in r hand full and soft intermit- r upper teeth in forenoon, then in I ear at last in tent, slower than best of heart, in I hand small, soft, tendon of hollow of I knee Anguish Agritation and nervous uneasiness. Distressing condition of nervous system Nervous susceptibility exaggerated scribable feelings in head, back and limbs Restless-Extremities. - Rigidity of muscles Drawing in hess Weakness Affects the fibrous structures, as the forearms, in wrists, with tearing Tearing in r wrist periosteum and capsular ligaments of joints Most

ing over whole body; in evening in bed, in face, at return of dawn, and the trivial details of life seem innight, next morning red pimples on legs and shoul- supportable Always troubled Troublesome and unreasonable impressions easily strengthened into fixed

> Head .- Aching, at 5 a m , > rising, with heaviness of it. Heaviness, on stooping, after dinner, making her fretful, and dulness Congestion Intoxicated feeling Vertigo Forehead, statches on stooping; tearing or jerking S in l sinus, tearing in r side in evening. transmently > pressure, with sticking; digging in l; aching, aching in sinuses and r. ethmoid cells; heaviness in afternoon, heaviness in I side of sinciput in morning after rising, H. in sinciput and vertex in evening and night, with sensitiveness to touch

> Temple, sticking in 1 at 6 P M, with tearing; heaviness in r; painful throbbing in l. in evening. Vertex, stitches in front of in evening; pinching here and there, pain as if it would be forced asunder, > external warmth but often returning, with external heat in verter.

but general chilliness, tension, with sticking in it and smell, dysponea; stopped, in morning on waking. Running with tearing in I temple extending into nape Stick from N, of burning water, making the skin sore; a stream ing in upper part of r parietal bone Screwing to of hot fluid, waking at 3 A M, with salivation, at 7 A M, gether from both sides in morning, open air, 3 in Schneiderian membrane fully competed, frequent and proupper part of r side, gradually spreading Heaviness longed sneezing Discharge of thick yellow mucus. in sides in morning Occiput, pain, heaviness towards Violent bleeding Loss of smell. evening, tension in bones, with stitches Pain in scalp on scratching, as it ulcerated.

Clinical.-Fronts! headaches, particularly over eyes and root of nose, associated with catarrh at root of nose and in the frontal sinuses, the pain is most violent, lancingting, pulsating, etc

Eyes. - Surrounded by dark rings; and sunker Fer- vessels rety in morning Cellular tissue about them cedematous Protructing Discharge of purulent mucus in ing, of Lcheek, < cyclids and submaxillary region.

morning Constant oscillation, inability to fix them, Distention of cheeks and submaxillary spaces, with pupils dilated Fixed Duliness. Tearings beneath stiffness Emacation, and of needs and submiximary spaces, with it is a pupils that the fixed bulbers. Tearings beneath stiffness Emacation, and of needs. Checks winkled, it is now and throat Buting in r, > scratching, recur- Le carnest, with, uncertain, excited, soundiness doing in evening Burning in atternoon, in evening, pressel, sad. Countenance that of a drunkard, with purtlent mucus, with redness of Inds and Sticking in I check, with prirting, then sensitiveness. with lachrymation of r. eye Uneasy feeling in 1 in Tearing in 1 zygoma in morning when lying on it, with morning on waking, external edge of periosteum of sticking Malar-bones sensitive to touch. Lost the orbit tender on pressure. I lids swollen and multrated, power of moving cheeks and lips and unable to next morning r eye similarly affected, next day a pe- masticate culiar pain in a direct line from external border of one orbit to that of the other

endure any light in the evening Conjunctive injected, when not touched, Comunctivitis, characterized by great vascularity and Orbital margin, gnawing on r lower, and vision obscured by undulations Vision dun. double V disturbed

Chintensi—Cough, with expectation like specials, is said to characteristic of the dug it is an extensive valuable of the dug it is an extensing valuable of the dug it is an extensive valuable of the dug it

Hypogastrium.-Pinching on r. side extending above both groins Cutting in a spot in r. groin, with sticking. Bruised pain in groins and small of back during menstruation. Sudden dragging in groins so that she must bend together, after the usual cold milk in morn-Clinical.—Salivation of pregnancy.

Threat.—Bellows-murmur in carotids Swelling of Striping in abdomen extending to thighs, restlessness. head, then eructations and rumbling in abdomen, the Drawing in 1 groin, with feeling as if something living were in it Heat during menstruation;

Construction Hard, and difficult, of a few small fæces.

Clinical.-Dysentery, with painful tenesmus, stools of jellylike mucus

Urinary Organs -Bladder irritable Painful urging. lackrymation Swallowing painful and difficult, with red- Obliged to urmate at night Frequent micturition of copious urine as clear as water Urine pale and watery. Urine copious, < night, clear and transparent; and the uric acid sediments disappear gradually, while those of ammonio-phosphate of magnesia increased. Urea decreased

> Clinical. -Subscute or chronic inflammation of the kidneys. Eructations, with darting pain in the region of the kidneys, chilliness, etc.

Sexual Organs.-R testicle disappeared, the l of the evening. Nausea, with pressure in stomach, with size of an almond, erection slow and long-lasting, emptiness, not ; eating. Voniting, and purging at coition painful, prolonged and no emission Biting in pudenda, with leucorrhoea Pressure in uterus when Constant "cracking and crying" Pain, internit-walking, > sitting, with dragging pain Acrid leucortent, like an emptiness and coldness in evening, not rhora (Leucorrhora became thinner and more watery) > soup Painful beating in 1 side of epigastric Menstruction returned in a week, M that had been nally in pit, B. during digestion, > eructation, but abdomen and diarrhera; two days later, but more proimmediately returning, with pressure, in epigas-fuse than usual, decreased, M that had existed two

## Clinical.—Leucorrhos, watery, corrosive, like washings of eat Uterine fibroids.

C. in attacks in afternoon, with burning and nausea, milk was especially diminished Sticking deep in midminisation to eructations, which alterwards occur, ministrative corrections of the externally about umbilious and inclination to middle of aternam in afternoon, such pressure; in I. in etcanisation of fature. Griping and burning. Hypochondria.—Stucking in I.; in r. and in I sade of when to talking. Constriction in I on a line with been on talking. Constriction in I on a line with becoming exist; in middle, when sailing, support of I. when sailing to middle of a command exist; in middle, and the sail command exist; in middle, and the sail control of the sail co in evening Pain in l as if sore externally, < touch Op- when sitting with r thigh over l. Upper part of T Unearmess about 1

Clinical.-Hydrothorax Emphysema of the lungs Chronic pneumonia, with catarrhal symptoms in the nose and throat Pleureture exudation, with great dyspiness, constant teasing cough. The feeling; in outside of 1 K. when sitting; in r tibia; sear causasson, with great tryspiers, constant tensing COURT 1.18 pains in the chest are sharp, as in all the potashes. Many cases of pneumona of plenrette effisions and of philips have been reported cared by this drug, e-pocally when associated with exhausting night-weats, salivation, etc., it is difficult to separate the cases requiring (All not be and those requiring Kall not be provided by the cases requiring the contract of the cases requiring the cases of the cases requiring the case of the cases requiring the case of the

Heart -Stuking when walking All the symptoms of endocarditis, oppression, faintlike exhaustion, tuof H and pulse, with tensive pain across chest, especially affecting r ventricle, which gradually became dilated Seemed unequal to the task of circulating the blood Palpitation, fluttering, causing faintness and sickness and preventing sitting up

Pulse -Rapid, and full, and irregular, and small Slow and weak, S and heavy, irregular Hard and tense Small and soft

Neck and Back.—Cervical glands enlarged Sticking in r side of nape when lying Throbbing between scapule Small of back, sticking when sitting, pain as if scienced in; pain and soreness, pain as before menstruction, with diarrhoea twice, pain so that she could not he quietly, pain as if beaten, so that she does not knew how she shall he, pain almost as if fallen upon it

Extremities.—Tremor Tearing above r malleolus, in 1 index and r arm, but not in joints

Clinical.-Subacute rheumatism, either articular or neuralgir, sometimes it seems to prevent the attacks of sciatics, articular rheumatism or acute gout, the pains in the extremities are

Upper Extremities .- Shoulders, tearing in 1; in r, r hand above little finger Tearing in index from up Nightmare Pinching on metacarpal joint of 1 thumb

thigh, with paralyzed pain as far as knee Gnawing sternum to ensiform cartilage; in feet Sweat.

sternum, extending to shoulders Pain as if cut to pieces in hip-bones, G. in middle of r. thigh in evening seem compressed during menstruation

Tearing twitching in r. knee. Tearing in knees at night, in periosteum of l. K at night, with a swollen I call, then weakness of whole leg, l. call, when standing, > walking, with tension, downward in tibia in evening Gnawing in periosteum of l leg Painful drawing in calves when sitting Legs give way. Painful weakness of legs Tearing in back part of l heel when sitting; in r heel when standing, > walkmultinous, violent, intermittent and irregular action ing Ulcerative pain in heels and toes Pain in 1 instep in evening as if beaten. Tearing in great toes; in r second too

Skin .- Purpura, miliary, non-pruriginous, sanguineous spots like I', in one case on thorax, in all others on legs only, more confluent anteriorly, sometimes an intermixture of petechia of different ages, the new being of a brighter color than the old Eryspelas of face, and scalp, neck, etc Erysipelatous swelling of cheeks extending towards temples, with redness, with a few spots on forehead ltching tetter on face; and dry, on cheek Pumples on chin and nose, sticking burning, below corner of mouth, sensitive, on nostril, sensitive, on cheek, surrounded by redness and swelling , itching, on chin and exuding water Erythema Eczema impetiginoides Pustules, of acne, < face does not know how she shall he, pain almost as it Ulceration and yellow color of tip of 1 thumb, beaten, < sitting bent Pain in coccyx as if she had, but it does not break Vesicles of all sizes, becoming confluent and forming bullar, on hands, arms, groins and feet, they contained a clear serous fluid, were on a hypersemic base, in the early stages those on the hands resemble dysidrosis, but became semiopaque and shrivelled and dried without forming lar rheumatam or sents gout, the pans in the extremined or crusts. Biting on nape and foreness, then between the sentence of the pans and forest bit there is great weakness, see. Rheumatam of the spine, after scratching. Itching on r nates, > scratching, with paraplega. Rheumatam of the knee, which is wollen, with joining pains might. Scattes night, like Kali carb, the part of r upper arm, after scratching a dry red spot, which itches at first

Sleep .-- Frequent yawning without sleepiness , frethen in r ear, pain in tendons of r on motion and quent excessive Y Sleeplessness, almost all night, touch like a tension and as it swollen, bruised pain only sleepy towards morning. Waking every hour in I, paralytic pain only on moving them Arm Cried aloud in sleep towards morning Starting up Tearing in I elbow, now in shoulders, now in in first sleep, but soon falling asleep again Less r elbow 'tramp in'r forearm above wrist on moving sound Restless sleep; and unrefreshing, from which it Pain like a tension and sticking in articular end he wakes with a start and distress as from some strong ot radius on moving r index. Tearing in r wrist, emotion or sense of calamity. Dreams wandering, then itching on it, not : scratching, then an itching joyous, of danger; anxious, that she would be killed, vesicle. Hands tremble Bruised pain in margin of of falling in evening, and consequent violent starting

base to tip, on inner margin of r thumb, on l mid- Fever.-Chill in afternoon, from afternoon till dle and ring fingers in evening, in metacarpal joints next morning, from 4 to 7 PM, > in bed, with of I tagers in evening; in inner surface of r ring, thirst; from 6 to 10 PM, < lying down, at night. which is thereby flexed and cannot be extended, in Shaking chill at 10 PM; at night on frequent waking. r thumb as if it would be torn out, jerking T in a Shivering, of whole body in morning, except head, line on outer side of bone of 1 thumb, with sticking which felt hot. Shivering-creeping during menstruation, with coldness of hands and pressure and griping in Lower Extremities.—Gat of thigh, now in thigh, now coldness of whole body, chilliness from 6 to 8 Pm. in thia, in 1 hip on every step, obliging her to limp creeping in back in evening, then then in the coldness of whole body, chilliness from 6 to 8 Pm. Tearing above hollow of knee, then also below if, with sleepiness Heat in afternoon; H, with dulness in I femur, posteriorly in r thigh, with sticking, in of head and discomfort of body, then sweat, from 1 to r thigh on and after waking at 11 PM, extending to 3 PM Hot skin. Heat of head, with burning and helow knee, > lying on sound side, lying upon r side redness of face; in forehead, eyes, nose and mouth, or back was intolerable, in a spot in middle of I with anxious burning in throat extending behind

### Kali Muriaticum.

## A trituration of pure chloride (muriste) of Potassium is used

exudations, sie Deliesy, chorolestunis, with hary rairous, pracedynatous kersilis, exudative relinits; reviolos inflamentarion of the eye, kersil-ortik, with put in the aniserior chamber provides inflamentarion of the eye, kersil-ortik, with put in the aniserior chamber of the eye, kersil-ortik, with put in the aniserior chamber of the eye of the eye of the eye of the eye of these of the eye o

cussed by fat food Caiarrh of the bladder, inflammation of the spirits, indianger Scrubius, genorrhous, gleet, soft chancer, chronic, mood syphilia Uterine hemorrhage, leucurrhous; albummura of appreh pregnacy; nausses of pregnancy, puerperal fever Ashma. Croupy cough, whooping cough, expectoration white, milky discontine recording the property of mattern. Caronic rheumatism Rheumatic paralysis Swellings Abscesses, boils, carbuncles; a great variety of eruptions, especially extens, crysipelas, herpes, ulcerations; warts, etc. In general, Schussler praises it as a remedy for glandular swellings, follicular infiammations, general effects of fatty food or pastry.

#### Kali Nitricum.

## Triturations of pure nitrate of Potassium are used

violent irritant to the mucous membranes, causing fulness of abdomen, diarrhoxa and chilliness, on turn-

every inspiration. Tearing in evening after eating, sticking high up in inner side of l. thigh (apparently in pecworse.) Chronic illness. Pulsations here and there in evening (after a glass of strong beer) after midday nap

of lower limbs: sudden, with sleepiness, necessity to he down and inability to open eyes, tremulous, in morning, with frequent, hard pulse and rapid respira-Clinical.—The greeral characteristic indications for this tion, paralytic miscular. Faitness, at 10 pm, when dispersion to be considere tissee expositions; diphthemac ulcera-blowing on an instrument with tight clothes, it seemed tions, especially at the base of the tongue, with whites-gray is aff overything in the room turned around, he caught expuditions, etc. Epilepsy, chorolestimits, with hary partness, himself while surking, head at one time hot, at another parenchymatous keepsilis, exactivary relimits; revolution inflam: Oold, insteady standing and sensation as if the attack cold, unsteady standing and sensation as if the attack would return, dizzy F in morning when standing, > sitting down, then blackness before eyes, weakness,

> Fretfulness; in evening, with uneasiness, apprehension and sensitiveness, and perverseness, discontenument with himself and the world and disinclination to mental labor Disinclination for work; D to think in morning, with heat in face and forehead and exhaustion Meditative and solicitous Partly stupofied as in intoxication, half stupor unless aroused Unconsciousness

Head -Hacking and sticking, with pressure about eyes and sleepiness Aching, in morning, afterwards it extended to occiput, in evening increase of heat in head, towards noon, < r side, < 1 to 4 PM, > a nap; Triturations of pure nitrate of Potessium are used in afternoon, in evening; towards evening, < r side General Action.—Like the chlorate this salt is a of sinciput, with sudden statches, on waking, with gastro-intestinal inflammation and ulceration and ing head, after dinner, < towards evening, lasting catarri of the bronchi with asthmatic breathing. In till 10 pm, with heat, so that she could not eat, its action our the kidneys and heart it is similar to the and in neck. I side, with stitches in forehead, other salts of Potash preventing sleep all night and lasting in morning, in Generalities.—Lying on back in collapse, with legs morning as after a debauch; bursting, with stitches drawn up, as in peritonitis. Swelling of whole body, in I car and clavicles, whence the pain extends into neck and legs. Twitchings, here and there, as in elbows; tensive, deep in head after dinner. Pressure chorea, < l. arm and leg Trembling of whole body, towards middle and towards I temple in morning of one half of body, of all nerves, with restlessness Drawing in middle from morning till evening, extend-Stinging through whole body, causing acute pain on ing towards i temple Loose teeling in brain, with

Heaviness Confusion, in morning, towards eventineus and triceps), then in I upper arm, then in ing, with drawing in side of head and forehead, in middle of outer part of 1 thigh, then on anterior sur-evening, with oppression of chest, on waking, with face of leg (tibiahs anticus), then on and behind ex-frequent tearing drawing in parietal bones and in ternal malleolus, then between 1 scapula and spine forehead, with drawing, with difficult thought, every-(in rhomboideus, serratus posticus superior), T in r thing is immediately forgotten, almost like intoxicaside of chin when sitting, then beneath r external tion after Madeira. Stupefaction in morning, with sade of onn when saturing then believe the resemble of any and restricted the mailtenance intermittent, day and night, transiently heaviness, as after intoxication. Vertigo, with weakrubbing Jerking pain in occipital bone, then also less of head, in morring, as after intoxication, as if
in hip-bone, at last alternating with tension behind r he would fall forward, on stooping, in attacks as if ear and continuing all night (Bruised feeling became he would fall to the right and backward, on walking

Forehead -Sticking in 1 side on stooping, with Weakness, in morning, in morning after mental pressing assunder, S. behind eyes, with rhythmical in-labor; in afternoon; with pallor; with heaviness of termissions in afternoon and evening.
